Teachers' Retirement System of Alabama
Employees' Retirement System of Alabama
135 South Union Street
Montgomery, AL 36130

Dear Board Members:

It is with great pleasure that I submit the Comprehensive Annual Financial Report (CAFR) of the Retirement Systems of Alabama (RSA or Systems) for the fiscal year ended September 30, 2007. The Retirement Systems of Alabama includes the Teachers' Retirement System of Alabama (TRS), the Employees' Retirement System of Alabama (ERS), and the Judicial Retirement Fund (JRF). Each system is considered a component unit of the State of Alabama for financial reporting purposes, and, as such, the financial statements contained in this report are also included in the State of Alabama Comprehensive Annual Financial Report.

Responsibility for both the accuracy of the data, and the completeness and fairness of the presentation, including all disclosures, rests with the management of the Systems. Sufficient internal controls exist to provide reasonable assurance regarding the safekeeping of assets and fair presentation of the financial statements, supporting schedules, and statistical tables. I trust that you and the members of the Systems will find this report helpful in understanding your retirement system.

Administration and Plan History

The TRS, ERS, and JRF operate under common management and are collectively referred to as the Retirement Systems of Alabama (RSA). In addition to executive management, the TRS, ERS, and JRF share investment management, accounting, and information system services, the costs of which are allocated to the funds on an equitable basis. The TRS was established under the provisions of Act 419 of the Legislature of 1939 to provide benefits to qualified persons employed by State-supported educational institutions. The ERS was established under the provisions of Act 515 of the Legislature of 1945 to provide benefits to State employees, State police, and, on an elective basis, to qualified persons of cities, towns, and quasi-public organizations. The JRF was established under the provisions of Act 1163 of the Legislature of 1973 to provide benefits to qualified judges and justices. Additional information regarding the administration and history of each system, including laws establishing each plan and services provided, can be found in the *Financial Section - Notes to the Financial Statements* portion of this report.

Financial Information

Accounting Method - As required by Generally Accepted Accounting Principles (GAAP), the financial information of the TRS, ERS, and JRF is reported on the accrual basis of accounting. Revenues are recognized when earned and expenses are recognized when the corresponding liability is incurred. Investments are reported at fair value.

Internal Controls - The management of the RSA is responsible for maintaining the system of internal controls (system). The system provides management with reasonable, but not absolute, assurance regarding the safeguarding of assets against loss or unauthorized disposition and the reliability of the financial records from which the financial reports are prepared. The concept of reasonable assurance recognizes that the cost of a control should not exceed the resulting benefits.

Summary Comparative Data – Management’s Discussion and Analysis (MD&A) includes a narrative introduction, an overview of the financial statements, including the notes, and required supplementary information, and summary comparative data for fiscal years 2007 and 2006. Also, an analysis of significant variances between fiscal years 2007 and 2006 is provided in the MD&A.

Plan Financial Condition

The funding objective of the RSA pension trust funds is to meet long-term benefit requirements through contributions, which remain relatively level as a percent of member payroll over time, and through investment earnings. Historical information concerning funding progress is presented in the *Required Supplementary Information* - “Schedule of Funding Progress” on page 40.

At the date of the latest actuarial valuations (9/30/06), the number of participants in the TRS, ERS, and JRF was 222,294, 129,396, and 656, respectively. The TRS’s, ERS’s, and JRF’s last valuations were performed as of September 30, 2006. The TRS’s funded percentage decreased from 83.6% at September 30, 2005 to 82.8% at September 30, 2006. The ERS’s funded percentage decreased from 84.0% at September 30, 2005 to 81.1% at September 30, 2006. The JRF’s funded percentage increased from 85.5% at September 30, 2005 to 86.4% at September 30, 2006.

Investment Activity

Total investments for the RSA increased in fiscal year 2007, primarily due to increases in the fair value of investments. Investment balances for the TRS, ERS, and JRF at September 30, 2007 were \$21.6 billion, \$10.3 billion and \$268.2 million, respectively, compared to investment balances for the TRS, ERS, and JRF at September 30, 2006 of \$19.0 billion, \$8.9 billion, and \$243.8 million, respectively. Total pension fund investments managed by the RSA increased from \$28.1 billion at September 30, 2006 to \$32.1 billion at September 30, 2007, a 14.2% increase.

Interest and dividend income for the TRS, ERS, and JRF for the fiscal year ended September 30, 2007 was \$719.9 million, \$347.3 million, and \$8.5 million, respectively, compared to \$703.2 million, \$329.5 million, and \$9.6 million, respectively, for the fiscal year ended September 30, 2006. The increase in fair value of investments for the TRS, ERS, and JRF for the fiscal year ended September 30, 2007 was \$2.6 billion, \$1.2 billion and \$26.0 million, respectively, compared to the increase in fair value of investments of \$878.7 million, \$375.0 million, and \$11.2 million, respectively, for the fiscal year ended September 30, 2006. Additional information concerning investments, including investment policies and procedures, are located in the Investment Section.

The staff will continue to purchase and develop investments that will facilitate the mission of the RSA and serve the interests of our members by preserving the excellent benefits and soundness of the RSA while providing these at the least expense to the State of Alabama and all Alabama taxpayers. With the continued cooperative efforts of the Boards of Control, the RSA staff, and the Legislature, this goal will be achieved.

Management’s Discussion and Analysis

GASB Statement No. 34 requires that management provide a narrative introduction, overview, and analysis to accompany the Financial Statements in the form of Management’s Discussion and Analysis (MD&A). This letter of transmittal is intended to complement the MD&A and should be read in conjunction with it. The MD&A can be found immediately following the Independent Auditors’ Report.

Legislation Enacted During Fiscal-Year 2007

Act 2007-296 authorized a one time lump-sum payment to certain retirees and beneficiaries of the Teachers’ Retirement System (TRS) whose effective date of retirement for purposes of receiving benefits was prior to December 14, 2007, and who were receiving or was entitled to receive a monthly allowance from the TRS on December 14, 2007. The payment was twenty-four dollars for each year of service.

RETIREMENT SYSTEMS OF ALABAMA

Introductory Section

Letter of Transmittal (Continued)

Act 2007-257 authorized a one time lump-sum payment to certain retirees and beneficiaries of the Employees' Retirement System (ERS) whose effective date of retirement for purposes of receiving benefits was prior to December 14, 2007, and who were receiving or was entitled to receive a monthly allowance from the ERS on December 14, 2007. The payment was twelve dollars for each year of service.

Professional Services

Professional consultants are appointed by the Boards of Control to perform professional services that are essential to the effective operation of the TRS, ERS, and JRF. The certification letters from the independent actuary are included in this report. The professional consultants appointed by the Boards of Control are listed on page 9 of this report.

Financial Statement Audit

KPMG LLP, Certified Public Accountants, have issued an unqualified ("clean") opinion on the RSA's financial statements for the fiscal year ended September 30, 2007. The independent auditors' report is located at the front of the financial section of this report.

Highlights and Initiatives

The Battle House, a Renaissance Hotel in Mobile, opened its doors in May 2007. Once the upgrade to the Riverview Plaza is finished later this year, it and the Battle House will make up part of the Renaissance Center in Mobile. The Battle House, which originally opened in 1852, closed in 1974 and was vacant until the RSA reopened it earlier this year. The historic hotel is also connected to the new 35-story RSA Battle House Tower, the tallest building in the state of Alabama.

In other RSA real estate news, construction continues on our eighth project, The Renaissance Montgomery Hotel and Spa, which includes a civic center upgrade and expansion, a new performing arts theater, and a 600-car parking deck. The project is expected to be completed in early 2008. Additionally, work continues on the new eight-story office building being added to the State Capitol Complex. The 280,000 square foot structure will be the new headquarters for the RSA and is expected to be completed in mid-2008.

During the fiscal year, the RSA provided the bridge financing – our largest industrial loan to date – of up to \$350 million to National Alabama Corporation. This company is an affiliate of National Steel Car of Canada; the new railcar manufacturing plant being constructed in the Shoals will produce 8,000 – 10,000 rail cars per year and employ approximately 1,800 workers. The RSA also provided financing to Raycom Media for its recent acquisition of three television stations and Lincoln Financial Sports from Lincoln National Corporation. Following the closing, Raycom stations will cover over 10.5% of U.S. households with operations in 18 states. Raycom currently owns and operates 37 stations in 17 states. Community Newspaper Holdings, Inc. owns and operates 92 daily newspapers as well as 71 non-daily newspapers and numerous specialty publications across 23 states.

The staff will continue to purchase and develop investments that will facilitate the mission of the RSA. Our aim is to serve the interests of our members by preserving the excellent benefits and soundness of the Systems while providing these at the least expense to the State of Alabama and all Alabama taxpayers. With the continued cooperative efforts of the Boards of Control, the RSA staff, and the Legislature, this goal will be achieved.

Awards

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the Retirement Systems of Alabama for its comprehensive annual financial report for the fiscal year ended September 30, 2006. The Certificate of Achievement is a prestigious national award, which recognizes conformance with the highest standards for preparation of state and local government financial reports.

In order to be awarded a Certificate of Achievement, a government unit must publish an easily readable and efficiently organized comprehensive financial report whose contents conform to program standards. Such reports must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe our current report continues to conform to the Certificate of Achievement Program requirements, and we are submitting it to the GFOA.

Acknowledgments

The compilation of this report reflects the combined effort of the staff under the leadership of the Boards of Control. It is intended to provide extensive and reliable information as a basis for making management decisions, determining compliance with legal provisions, and determining responsible stewardship of the funds of the TRS, ERS, and JRF.

I would like to take this opportunity to express my gratitude to the staff, the Boards of Control, the consultants, the Legislature, and to the many people who have worked so diligently through continued cooperative efforts to assure the successful operation and financial soundness of the TRS, ERS, and JRF.

Sincerely,

Norman D. Turnipseed

Independent Auditors' Report

Boards of Control
Teachers' Retirement System of Alabama
Employees' Retirement System of Alabama
Judicial Retirement Fund:

We have audited the accompanying combining statement of plan net assets of the Retirement Systems of Alabama (consisting of the Teachers' Retirement System of Alabama, the Employees' Retirement System of Alabama, and the Judicial Retirement Fund), component units of the State of Alabama, as of September 30, 2007, and the related combining statement of changes in plan net assets for the year then ended. These financial statements are the responsibility of the Retirement Systems of Alabama. Our responsibility is to express an opinion on these financial statements based on our audit. The prior year partial comparative information has been derived from the Retirement Systems of Alabama's 2006 financial statements and, in our report dated March 5, 2007, we expressed an unqualified opinion on such financial statements.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Retirement Systems of Alabama's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Retirement Systems of Alabama (component units of the State of Alabama) as of September 30, 2007, and its changes in plan net assets for the year then ended in conformity with U.S. generally accepted accounting principles.

The management's discussion and analysis on pages 14 through 17 and the schedules of funding progress and employer contributions (pages 39 through 41) are not required parts of the basic financial statements but are supplementary information required by U.S. generally accepted accounting principles. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was made for the purpose of forming an opinion on the basic financial statements taken as a whole. The supplementary information included on pages 42 through 44 is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

KPMG LLP

March 12, 2008

Management's Discussion and Analysis

The Retirement Systems of Alabama (RSA) is comprised of the Teachers' Retirement System (TRS), Employees' Retirement System (ERS), and Judicial Retirement Fund (JRF). The following discussion provides an overview of the financial position and results of operation for the RSA as of and for the period ended September 30, 2007, respectively. For more detailed information, please refer to the financial statements, including the Notes to the Financial Statements and the Required Supplementary Information.

Financial Statements and Required Supplementary Information

The financial statements (statements) include the Combining Statement of Plan Net Assets and the Combining Statement of Changes in Plan Net Assets. The Notes to the Financial Statements are considered an integral part of the financial statements. The statements are prepared using the economic resources measurement focus and accrual basis of accounting. Revenues are recognized when earned, pursuant to plan requirements, and expenses are recognized when incurred, regardless of when cash is received or expended. Investments are reported at fair value.

Combining Statement of Plan Net Assets – Includes all accounting assets and liabilities of the RSA and provides a snapshot of the financial position of the RSA as of the end of the fiscal year. Assets less liabilities results in the net assets held in trust for pension benefits at fiscal year-end.

Combining Statement of Changes in Plan Net Assets – Reports all additions and deductions of the RSA for the fiscal year. Additions primarily consist of employer contributions, employee contributions, and investment income. Deductions are principally made up of retirement allowance payments. Additions minus deductions provide the change in plan net assets for the fiscal year. The change in plan net assets plus the beginning plan net assets results in the plan net assets at fiscal year-end.

The Notes to the Financial Statements include plan descriptions, a summary of significant accounting policies, a description of legally required reserves and corresponding reserve balances at year-end, credit risk disclosures for cash and investments, concentration of investments disclosures, securities lending disclosures, funded status, and additional actuarial information relevant to the latest actuarial valuations.

The Required Supplementary Information following the Notes to the Financial Statements includes a Schedule of Funding Progress and a Schedule of Employer Contributions. The Schedule of Funding Progress provides trend data on the level of funding for the TRS, ERS, and JRF plans. The Schedule of Employer Contributions provides trend data on the annual required employer contributions and the percentage actually contributed.

Comparative Summary Statements

Summary Comparative Statement of Plan Net Assets As of September 30, 2007 and 2006 (Amounts in Thousands)

RETIREMENT SYSTEMS OF ALABAMA

Financial Section

Management's Discussion and Analysis (Continued)

Financial Analysis

- Employer contributions increased primarily as a result of increases in employer cost rates and covered payroll.
- Assets and liabilities related to securities lending increased as a result of increased securities lending activities.
- Investments and investment income increased mainly as a result of the upturn in the equity markets. The RSA returns on equity were in line with the overall market returns. The S&P 500 increased 16.44% in 2007 compared to a return of 10.79% in 2006 and the S&P Midcap 400 increased 18.76% in 2007 compared to 6.56% in 2006.
- Property and equipment increased mainly due to the ongoing construction of a new administrative building.
- Retirement allowance payments increased primarily due to new retirees and an adhoc cost of living adjustments for retirees.

Funding Status

The primary objective of a retirement system is to accumulate sufficient assets to pay benefits to participants when due. The principal sources of assets to fund benefits include investment income and member and employer contributions. A five-year smoothing method is used in actuarially valuing assets to limit fluctuations in the contributions from year to year.

The ratio of actuarial assets to actuarial liabilities provides an excellent indication as to whether sufficient assets are being accumulated to pay benefits when due. The following bar graph provides comparisons of the funded ratio (actuarial assets to actuarial liabilities) as of the last two valuations for each System (September 30, 2006 and September 30, 2005). The funded ratio decreased in the most recent TRS and ERS valuations as a result of the continued amortization of losses in fair value of investments that occurred in fiscal years 2001 and 2002 and changes in assumptions resulting from an experience study. Assumption changes included rates of withdrawal, disability, retirement and mortality. Since a five-year smoothing method is employed to value assets, the funded ratio is likely to continue to decrease over the next few years as the recent losses are incorporated into the smoothing calculations. However, as reflected by the following graph, the TRS, ERS, and JRF continue to operate on an actuarially sound basis and accumulated funds are sufficient to continue to provide benefits as they become due.

RETIREMENT SYSTEMS OF ALABAMA

Financial Section

Management's Discussion and Analysis (Continued)

Financial Highlights

- Total assets exceeded total liabilities at September 30, 2007, by \$32.6 billion. Net assets are held in trust to meet future benefit payments.
- The funding level (actuarial value of assets as a percent of actuarial accrued liabilities) as of the latest actuarial valuations was 82.8% for the TRS, 81.1% for the ERS, and 86.4% for the JRF.
- The fair value of investments increased by \$3.9 billion during the fiscal year.
- The investment section contains a detailed schedule of investment returns and related benchmarks.

RETIREMENT SYSTEMS OF ALABAMA

Financial Section

Notes to the Financial Statements

For the Fiscal Year Ended September 30, 2007

(Dollar Amounts in Thousands)

1) PLAN DESCRIPTION

The Teachers' Retirement System (TRS), Employees' Retirement System (ERS), and Judicial Retirement Fund (JRF) operate under common management and are collectively referred to as the Retirement Systems of Alabama (RSA or Systems). In addition to executive management, the TRS, ERS, and JRF share investment management, accounting, and information system services, the costs of which are allocated to the funds on an equitable basis.

The TRS, a cost-sharing multiple-employer public employee retirement plan, was established as of September 15, 1939, under the provisions of Act 419 of the Legislature of 1939 for the purpose of providing retirement allowances and other specified benefits for qualified persons employed by State-supported educational institutions. The responsibility for the general administration and operation of the TRS is vested in its Board of Control.

The ERS, an agent multiple-employer public employee retirement plan, was established as of October 1, 1945, under the provisions of Act 515 of the Legislature of 1945. The purpose of the ERS is to provide retirement allowances and other specified benefits for State employees, State police, and on an

elective basis, to all cities, counties, towns, and quasi-public organizations. The responsibility for the general administration and operation of the ERS is vested in its Board of Control.

The JRF, a cost-sharing multiple-employer public employee retirement plan, was established as of September 18, 1973, under the provisions of Act Number 1163 of the Legislature of 1973 for the purpose of providing retirement allowances and other specified benefits for any Justice of the Supreme Court of Alabama, Judge of the Court of Civil Appeals, Judge of the Court of Criminal Appeals, Judge of the Circuit Court, or office holder of any newly created judicial office receiving compensation from the State Treasury. Act Number 1205 of the Legislature of 1975 supplemented the provisions of Act Number 1163 and enlarged the scope and coverage of the JRF to include District and Probate Judges. The responsibility for the general administration and operation of the JRF is vested in the Board of Control of the ERS.

At September 30, 2007, the number of participating units in each system was as follows:

	<u>TRS</u>	<u>ERS</u>
Cities	-	277
Counties	-	64
Other Public Entities	-	502
Universities	13	-
Post-Secondary Institutions	31	-
City and County Bds of Education	131	-
State Agencies & Other	31	-
Totals	<u>206</u>	<u>843</u>

At the date of the latest actuarial valuation as presented in the Notes to the Required Supplementary Information, membership consisted of:

	<u>TRS</u>	<u>ERS</u>	<u>JRF</u>
Retirees and beneficiaries currently receiving benefits:			
General	61,393	17,002	273
State Police	-	735	-
Employees of Local Employers	-	14,856	-
Deferred Retirement Option Plan (DROP)	5,375	1,905	-
Terminated employees entitled to benefits but not yet receiving benefits:			
General	16,913	3,496	51
State Police	-	9	-
Employees of Local Employers	-	6,911	-
Active employees:			
General	138,613	32,283	332
State Police	-	706	-
Employees of Local Employers	-	51,493	-
Totals	<u>222,294</u>	<u>129,396</u>	<u>656</u>

State law establishes retirement benefits as well as death and disability benefits and any ad hoc increase in postretirement benefits for the TRS, ERS, and JRF. Benefits for TRS and ERS members vest after 10 years of credited service. Teachers and state employees who retire after age 60 (52 for state police) with 10 years or more of credited service or with 25 years of service (regardless of age) are entitled to an annual retirement benefit, payable monthly for life. Local employees who retire after age 60 with 10 years or more of credited service or with 25 or 30 years of service (regardless of age), depending on the particular entity's election, are entitled to an annual retirement benefit, payable monthly for life. Service and disability retirement benefits are based on a guaranteed minimum or a formula method, with the member receiving payment under the method that yields the highest monthly benefit. Under the formula method, members of the TRS and ERS (except State Police) are allowed 2.0125% of their average final compensation (highest 3 of the last 10 years) for each year of service. State Police are allowed 2.875% for each year of state police service in computing the formula method.

The JRF benefits vest from five to eighteen years. Except for justices or judges who were either disabled, elected prior to July 30, 1979, or have at least 25 years of credited service, no justice or judge is eligible to receive judicial service retirement pay prior to attaining sixty years of age. Service retirement benefits for justices and judges are dependent upon the particular office held in the judicial branch of government. A retirement benefit is payable upon the request of any member who has: (1) 25 years of credited service (regardless of age), (2) completed 12 years of credited service and has attained age 65, (3) completed 15 years of credited service and whose age plus service equals or exceeds 77, (4) completed at least 18 years of credited service or three full terms as a judge or justice and has attained age 65, (5) completed 10 years of credited service and has attained age 70 or (6) been elected prior to July 30, 1979 and has 18 years of service (regardless of age). A member eligible to retire who has not requested his or her retirement benefit to commence at the end of the term in which the member's seventieth birthday occurs is entitled only to the refund of his or her contributions (except for members with at least 25 years of credited service).

(Dollar Amounts in Thousands)

The service retirement benefit for circuit, appellate, and probate judges is 75% of the member's salary at the time of separation from service. The service retirement benefit for a district judge is 75% of the position's salary immediately prior to retirement.

Covered members of the TRS and ERS (except state police and certified law enforcement, correctional officers and firemen) are required by statute to contribute 5% of earnable compensation to the TRS and ERS. State police members of the ERS contribute 10% of earnable compensation. JRF members and certified law enforcement, correctional officers, and firemen members of the TRS and ERS are required to contribute 6% of earnable compensation.

2) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Basis of Accounting

The TRS, ERS, and JRF financial statements are prepared using the accrual basis of accounting. Contributions are recognized as revenues when earned, pursuant to plan requirements. Benefits and refunds are recognized when due and payable in accordance with the terms of the plans. Expenses are recognized when the corresponding liability is incurred, regardless of when the payment is made. The accompanying financial statements are prepared in accordance with requirements of the Governmental Accounting Standards Board (GASB). Under these requirements, the TRS, ERS, and JRF are considered component units of the State of Alabama and are included in the State's Comprehensive Annual Financial Report.

B. Investments

The Boards of Control of the Systems have the responsibility and authority to invest and reinvest available funds, through the Secretary-Treasurer and Investment Committee, in bonds, mortgage-backed securities, common and preferred stock, and other investment vehicles with the care, skill, prudence, and diligence under the circumstances then

prevailing that a prudent person acting in a like capacity and familiar with such matters would use. All plan assets are carried at fair value. Securities traded on national or international exchanges are valued at the last reported sales price at current exchange rates. Short-term investments are reported at cost, which approximates fair value. Mortgage-backed securities are reported based on future principal and interest payments discounted at the prevailing interest rate for similar instruments. The fair value of real estate investments is based on independent appraisals. Generally, private placements are valued based on the selling price of similar investments sold in the open market. In those instances where there are no similar investments sold in the open market, an appraisal is performed to determine the fair value of the private placements.

C. Comparative Combining Statements

The basic financial statements include the prior year Combining Statement of Plan Net Assets and Combining Statement of Changes in Plan Net Assets (Statements) for comparative purposes only. Prior-year Note Disclosures are not included. Therefore, the prior year basic financial statement presentation does not meet the minimum level of detail required for a presentation in conformity with generally accepted accounting principles. Accordingly, the prior year Statements should be read in conjunction with the RSA's prior year financial report from which the prior year Statements were derived.

D. Interfund Transfers

Interfund transfers result from transfers of members between retirement systems.

E. New Accounting Pronouncements

During the current fiscal year, GASB 50, *Pension Disclosures (an amendment of GASB Statements No. 25 and No. 27)* was implemented.

3) LEGALLY REQUIRED RESERVES

A. Annuity Savings

Member contributions are credited to the Annuity Savings account. Interest at 4% per annum is credited to the annuity savings account of each member on the basis of the average of the beginning and end of year balances (as of June 30 for the TRS and September 30 for the ERS and JRF).

When a member withdraws from service prior to becoming vested, the member's accumulated contributions and a portion of accumulated interest credited to the Annuity Savings account are returned to the member. The portion of accumulated interest that, by law, is not payable to the member is transferred to the Expense fund.

When a TRS or ERS member dies prior to becoming eligible for retirement, the member's accumulated contributions and accumulated interest credited to the Annuity Savings account are returned to the member's designated beneficiary. If the pre-retirement death benefit defined below is not payable, an additional death benefit equal to the member's accumulated contributions, up to five thousand dollars, is paid from the Pension Accumulation account to the member's beneficiary.

When a member retires or when a survivor allowance becomes payable, the amount of the member's accumulated contributions and accumulated interest is transferred from the Annuity Savings account to the Pension Accumulation account.

B. Pension Accumulation

The Pension Accumulation account is credited with contributions made by the employer and net investment income. The lump sum death benefit is paid from this account when a TRS or ERS member dies prior to becoming eligible for the pre-retirement death benefit or retirement. Periodic interest representing member's earnings is transferred from the Pension Accumulation account to the Annuity Savings account. When a TRS, ERS, or JRF member

retires or when a survivor allowance becomes payable, the member's accumulated contributions and accumulated interest is credited to the pension accumulation account, and all monthly benefit payments are paid from this account.

C. Pre-retirement Death Benefit

The Pre-retirement Death Benefit (PRDB) account (established October 1, 1983, under the provisions of Act 616 of the Legislature of 1983) is credited with contributions made by TRS and ERS employers and investment income on such funds. The pre-retirement death benefit (in the form of group term life insurance) is paid in addition to the return of member contributions upon the death of an active TRS or ERS member who has completed at least one year of active membership in the system and whose date of death was within 180 days of such member's last date of actual service. However, a surviving spouse beneficiary of a deceased member who was eligible for service retirement may elect a survivor allowance in lieu of this benefit. The pre-retirement death benefit is equal to the annual earnable compensation of the member as reported to the System for the preceding year ending June 30 for the TRS and September 30 for the ERS. There is no PRDB available for JRF members.

D. Term Life Insurance

The Alabama Teacher's Group Term Life Insurance Plan (established October 1, 1987) is credited with a portion of the employer contributions. All active contributing members of the TRS are covered by this plan. Contingent on availability of funds, upon death, a benefit is paid to the designated beneficiary of an insured member of the TRS. Beneficiaries of full-time employees receive fifteen thousand dollars while beneficiaries of part-time employees receive a pro-rated amount of fifteen thousand dollars.

E. Expense

The Expense fund is used to pay the administrative expenses of the RSA. A portion of the employer contributions and the interest not payable upon member withdrawal provide the funding of the

RETIREMENT SYSTEMS OF ALABAMA

Financial Section

Notes to the Financial Statements

For the Fiscal Year Ended September 30, 2007

(Dollar Amounts in Thousands)

Expense fund. The majority of expenses are directly identifiable as expenses of the TRS, ERS, or JRF. As discussed in Note 1, certain administrative salaries and other expenses are shared on an equitable basis between the TRS and ERS.

F. Deferred Retirement Option Plan (DROP)

The DROP was established for election to participate on or after June 1, 2002, under the provisions of Act 23 of the Legislature of 2002. Eligible members may elect to retire, and, in lieu of immediate withdrawal from service, continue employment for a period of

three to five years. The retirement allowance, employee contributions, and interest earned are accumulated in an account for the benefit of the member. At the end of participation, the account balance is paid to the member. DROP participation is an option available to eligible members that have at least twenty-five years of service (exclusive of sick leave), are at least fifty-five years of age, and are eligible for retirement. See the actuarial section for additional information.

G. Reserves

The reserves of the RSA are funded to the full extent required by statute. The reserve balances as of September 30, 2007, are as follows:

	<u>TRS</u>	<u>ERS</u>	<u>JRF</u>
Annuity Savings	\$ 3,038,296	\$ 1,830,813	\$ 30,286
Pension Accumulation	18,247,298	8,329,813	239,699
Preretirement Death Benefit	18,735	18,880	-
Term Life Insurance	10,949	-	-
Deferred Retirement Option Plan	534,395	184,067	-
Expense	6,279	5,601	948

4) CASH

Cash consists of deposits held by the State Treasurer in the respective retirement system's name. Deposits are entirely insured by Federal depository insurance or protected under the Security for Alabama Funds Enhancement (SAFE) Program. The *Code of Alabama 1975* requires all State organizations to participate in the SAFE Program. The SAFE Program is a multiple financial institution collateral pool. The SAFE Program requires all public funds to be deposited in a financial institution designated by the State Treasurer as a qualified public depository. Each qualified public depository is required to pledge collateral in accordance with the rules established by the SAFE Board of Directors. In the event that a qualified public depository defaults or becomes insolvent and the pledged collateral is insufficient to satisfy the claims of public depositors, the *Code of*

Alabama 1975, Section 41-14A-9(3) authorizes the State Treasurer to make assessments against the other qualified public depositories in the pool so that there will be no loss of public funds. Virtually all cash on hand at September 30 was restricted for administrative expenses.

5) INVESTMENTS

A. Investment Risks

Investments are subject to certain types of risks, including interest rate risk, custodial credit risk, credit quality risk, and foreign currency risk. The following describes those risks:

Interest Rate Risk – The fair value of fixed-maturity investments fluctuate in response to changes in market interest rates. Increases in prevailing interest rates generally translate into decreases in fair value

of those instruments. The fair value of interest sensitive instruments may also be affected by the creditworthiness of the issuer, prepayment options, relative values of alternative investments, and other general market conditions. Certain fixed maturity investments have call provisions that could result in shorter maturity periods. However, the System's intent is to hold all fixed maturity investments until maturity, and as such, fixed maturity investments are classified in the following tables as if they were held to maturity.

Custodial Credit Risk – For an investment, custodial credit risk is the risk that an entity will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party if the counterparty fails. The RSA's custodial credit risk policy requires the custodial agent to hold or direct its agents or subcustodians to hold, for the account of the RSA all securities and other non-cash property other than securities in the Federal Reserve book-entry system, in a clearing agency which acts as a securities depository, or in another book-entry system. The RSA's safekeeping agent holds all investments of the RSA in the RSA's name with the exception of domestic and emerging markets equity-linked notes. The RSA has domestic equity-linked notes included in domestic equities that were purchased by the counterparty and are held by the counterparty. Investment returns on the domestic equity-linked notes are indexed to the S&P 500. At September 30, investments in domestic equity-linked notes were \$584,749 and \$263,653 for the TRS and ERS, respectively. Also, the RSA has emerging market equity-linked notes included in international investments that were purchased by the counterparty and are held by the counterparty. Investment returns on the emerging market equity-linked notes are indexed to the returns of various emerging market indices. At September 30, investments in emerging market equity-linked notes were \$189,346, \$92,586, and \$3,124 in the TRS, ERS, and JRF, respectively.

Credit Quality – Nationally recognized statistical rating organizations provide ratings of debt securities quality based on a variety of factors, such as the financial condition of the issuers, which provide investors with some idea of the issuer's ability to meet its obligations. Domestic fixed-maturity

investments may consist of rated or non-rated securities. International fixed-maturity investments may consist of securities with a rating of at least A by one of the principal rating agencies at the time of purchase or acquisition, except that up to 2% of the fair value of each System's total portfolio may be invested in obligations of sovereign countries with a rating of BBB or BAA at the time of purchase. The Systems may hedge against the possible adverse effects of currency fluctuations on each System's portfolio of international fixed income obligations when it is considered appropriate. Short-term investments may consist of commercial paper rated at least A-2 and/or P-2, repurchase agreements, short-term U.S. securities, and other money market investments.

Foreign Currency Risk – The risk that changes in exchange rates will adversely affect the fair value of an investment. In order for an international equity security to be eligible for purchase by the Systems, the issuing company must be incorporated in a country whose debt securities are eligible for purchase as discussed above, and the fair value of the aggregate outstanding equity of the issuing company must be at least \$100 million.

Concentration of Credit Risk – The investment policies limit the aggregate amount that can be invested in each class of investments. The policy limits are as follows:

- Domestic Fixed Income – Limited to 50% of the fair value of the aggregate portfolio for each System.
- International Fixed Income – Limited to 10% of the fair value of each System's total portfolio.
- Domestic Equity – Limited to 65% of the fair value of each System's aggregate portfolio.
- International Equity – The aggregate fair value of international equities is limited to 25% of the aggregate fair value of each System's total portfolio. Also, each System may not purchase or hold more than 5% of any class of the outstanding stock of a company.
- Real Estate – The suggested limit is 15% of the book value of each System's portfolio.
- Alternative Investments (mezzanine financing, LBO's, venture capital, limited partnerships,

(Dollar Amounts in Thousands)

futures, commodities and derivative investments)
 – Limited to 10% of the book value of each System's aggregate portfolio.

- Short-term Investments – Limited to 20% of the fair value of each System's aggregate portfolio.

The following tables provide information as of September 30, 2007, concerning the fair value of investments, interest rate risk, and foreign currency risk:

B. Concentration of Investments

As of September 30, 2007, the TRS and ERS owned debt and equity securities of Raycom Media Corporation which represented approximately 7.7% and 9.2%, respectively, of the TRS and ERS investments. As of September 30, 2007, the ERS owned debt and equity securities in Community News, which represented 5% of ERS investments.

C. Securities Lending Program

The TRS, ERS, and JRF are authorized by the Boards of Control to participate in a securities lending program. The Systems' custodian, State Street Bank and Trust Company, administers the program. Certain securities from the TRS, ERS, and JRF are loaned to borrowers approved by the Systems. Approved borrowers of securities provide acceptable

collateral in the form of cash, securities issued or guaranteed by the United States government or its agencies or instrumentalities, sovereign debt, Canadian Provincial debt, convertible bonds, irrevocable bank letters of credit by a person other than the borrower or an affiliate of the borrower if State Street determines to be appropriate, and such other collateral as the parties may agree to in writing from time to time. All security loans are open loans and can be terminated on demand by the TRS, ERS, JRF, or borrower. The initial collateral received shall have (i) in the case of loaned securities denominated in United States Dollars or whose primary trading market is located in the United States, sovereign debt issued by foreign governments (other than Canada) or corporate bonds that are not denominated in United States Dollars (other than those issued in Canada), a value of 102% of the fair value of the

(Dollar Amounts in Thousands)

loaned securities, or (ii) in the case of loaned securities which are not denominated in United States Dollars or whose primary trading market is not located in the United States (and are not referenced in (i)), a value of 105% of the fair value of the loaned securities, or (iii) in the case of loaned securities comprised of UK gilts, a value of 102.5% of the fair value of the loaned securities, or (iv) in all other cases, such value, not less than 102% of the fair value of the loaned securities, as may be applicable in the jurisdiction in which such loaned securities are customarily traded. Pursuant to the terms of the applicable securities loan agreement, State Street shall, in accordance with State Street's reasonable and customary practices, mark loaned securities and collateral to their fair value each business day based upon the fair value of the collateral and the loaned securities at the close of the business employing the most recently available pricing information and receive and deliver collateral in order to maintain the value of the collateral at no less than 100% of the fair value of the loaned securities.

The TRS, ERS, and JRF cannot pledge or sell collateral securities received unless the borrower defaults. Cash collateral is invested in the State Street Quality D Short-term Investments Fund (QDF).

The following describes the QDF's fund guidelines. The QDF's average effective duration is restricted to 120 days or less. The maximum option-adjusted duration of any variable rate security investment of the QDF shall be five years or less. All fixed rate instruments must have an option-adjusted duration not to exceed 30 months. At the time of purchase, all securities with maturities of 13 months or less must qualify as first tier securities and all securities with maturities in excess of 13 months will be rated A or

better by at least two nationally recognized statistical rating organizations (NRSROs), or, if not rated, be of comparable quality. The QDF may invest in other State Street managed investment vehicles provided they conform to QDF guidelines.

As of September 30, 2007, the average term of the loans was 4, 4, and 5 days, respectively for the TRS, ERS, and JRF. Cash collateral investments in the QDF are matured as needed to fulfill loan obligations. There is no direct matching of the maturities of the loans with the investments made with cash collateral.

At September 30, 2007, the fair value of the securities on loan was \$2,923,901, \$1,391,978, and \$46,023 for the TRS, ERS, and JRF, respectively. The fair value of the collateral pledged by the borrowers was \$3,018,637, \$1,437,141 and \$47,230 for the TRS, ERS, and JRF, respectively. Since the amounts owed by the TRS, ERS, and JRF exceeded the amounts the borrowers owed to the TRS, ERS, and JRF, there was no credit risk exposure as of September 30, 2007. There were no significant violations of legal or contractual provisions, no borrower or lending agent default losses, and no recoveries of prior period losses during the year.

Investments purchased with cash collateral are held by the custodial agent, but not in the name of the Systems. Securities pledged as collateral are held by the custodial agent, but not in the name of the Systems. Letters of credit pledged as collateral are issued by the borrower's bank and are irrevocable. The following table provides information as of September 30, 2007, concerning securities lent:

D. Mortgage-backed Securities

As of September 30, 2007, the TRS, ERS, and JRF had investments in mortgage-backed securities. Embedded prepayment options cause these investments to be highly sensitive to changes in interest rates. Prepayments of the underlying assets reduce the total interest payments to be received. Generally, when interest rates fall, obligees tend to prepay the mortgages thus eliminating the stream of interest payments that would have been received under the original amortization schedule. The resulting reduction in cash flow diminishes the fair value of the mortgage-backed securities.

Notes to the Financial Statements

For the Fiscal Year Ended September 30, 2007

(Dollar Amounts in Thousands)

6) FUNDED STATUS AND FUNDING PROGRESS

State law provides that the Boards of Control engage an actuary to prepare an annual valuation of the assets and liabilities of the various reserve funds. Under the provisions of GASB Statement No. 25, *Financial Reporting for Defined Benefit Plans and Note Disclosures for Defined Contribution Plans*, the actuary determines the “unfunded actuarial liability.” The “unfunded actuarial liability” is the difference between the actuarial value of assets and the actuarial accrued liability.

The funded status of each plan as of the latest actuarial valuation is as follows:

FUNDED STATUS						
Actuarial Valuation Date	Actuarial Value of Assets	Actuarial Accrued Liability (AAL)	Unfunded/ (Overfunded) AAL (UAAL)	Percentage Funded (A/B)	Annual Covered Payroll (C)	UAAL as a % of Covered Payroll ((B-A)/C)
	(A)	(B)	(B-A)			((B-A)/C)
TRS						
9/30/2006	\$ 19,821,133	\$ 23,945,100	\$ 4,123,967	82.8	\$ 5,458,443	75.6
ERS						
9/30/2006	9,287,531	11,457,564	2,170,033	81.1	3,070,146	70.7
JRF						
9/30/2006	260,664	301,592	40,928	86.4	39,185	104.4

The schedules of funding progress, presented as required supplementary information (RSI) following the notes to the financial statements, present multiyear trend information about whether the actuarial values of plan assets are increasing or decreasing over time relative to the AALs for benefits.

Additional information as of the latest actuarial valuation follows:

	ACTUARIAL ASSUMPTIONS		
	TRS	ERS	JRF
Valuation date	September 30, 2006	September 30, 2006	September 30, 2006
Actuarial cost method	Entry Age Normal	Entry Age Normal	Projected unit credit
Asset valuation method	5-year smoothed market	5-year smoothed market	5-year smoothed market
Amortization method	Level percent open	Level percent open	Level percent open
Remaining amortization period	20 years	Within 20 years - varies by employer	19 years
Actuarial assumptions:			
Investment rate of return ‡	8%	8%	8%
Projected salary increases ‡	5.00%-7.75%	4.61%-7.75%	5%
Cost of living adjustments	None	None	None

‡ Includes inflation at 4.5%.

7) CONTRIBUTIONS REQUIRED AND MADE

The actuary has computed, as of the date of the latest available actuarial valuations, the estimated present value of benefits payable to retired members, beneficiaries, and active members. The actuarial valuations for the TRS and ERS are prepared using the entry age method, while the JRF valuation utilizes the projected unit credit method. The present value of all expected benefits payable from each system to the present group of members and beneficiaries is calculated by adding the present value of the expected benefits payable to the active members to the present value of the expected future payments to retired members and beneficiaries.

As required by statute, the TRS, ERS, and JRF provide for employer contributions at actuarially determined rates (expressed as percentages of annual covered payroll) that accumulate sufficient assets to pay benefits when due. The employer contributions required to support the benefits of each system are determined following a level funding approach and consist of a normal contribution, an accrued liability contribution, and a portion to finance administrative costs. Additionally, a portion of the TRS and ERS employer contributions fund a pre-retirement death benefit. Also, a portion of the TRS employer contributions fund a term-life benefit.

For the TRS and ERS, the normal contribution is determined using the "entry age normal" method. Under this method, a calculation is made to determine the uniform and constant percentage rate of employer contributions which, if applied to the compensation of the average new member during the entire period of the member's anticipated covered service, would be required in addition to the contributions of the member to meet the cost of all benefits payable on the member's behalf.

For the JRF, the normal contribution is determined using the "projected accrued benefit" (unit-credit) method. Under this method, the benefits of each individual included in an actuarial valuation are allocated by a consistent formula to valuation years. The actuarial gains (losses), as they occur, generally

reduce (increase) the unfunded actuarial accrued liability.

The 2007 retirement contributions were made in accordance with actuarially determined contribution requirements.

8) PROPERTY AND EQUIPMENT

Plan assets used in plan operations are reported at historical cost less accumulated depreciation. Depreciation is determined on the straight-line basis using estimated useful lives of 30 years for buildings and 3 to 10 years for furniture and equipment.

Property and equipment was comprised of the following amounts as of September 30, 2007:

	<u>TRS</u>	<u>ERS</u>
Land	\$ 5,776	\$ 3,034
Building and Improvements	60,008	31,063
Furniture and Equipment	<u>2,546</u>	<u>1,450</u>
Total Property and Equipment	68,330	35,547
Less Accum Depreciation	<u>(5,532)</u>	<u>(3,503)</u>
Net Property and Equipment	<u>\$ 62,798</u>	<u>\$ 32,044</u>

9) OTHER POSTEMPLOYMENT BENEFITS

In addition to the pension benefits described in Note 1, the TRS, ERS, and JRF (as agencies of the State of Alabama) participate in the State Employees' Health Insurance Plan (SEHIP).

The SEHIP provides postretirement health care benefits, in accordance with State statute, to all TRS, ERS, and JRF employees who retire with a retirement benefit payable from the TRS, ERS, or JRF. The SEHIP establishes the rate each retiree must pay for health insurance coverage with the difference between claims costs and retiree payments funded on a pay as you go basis through the premiums each agency pays for its active employees. During the fiscal year 2007, the estimated portion of health insurance premiums paid and included in administrative expense by the TRS, ERS, and JRF on behalf of retirees was \$303, \$330, and \$17, respectively.

RETIREMENT SYSTEMS OF ALABAMA

Financial Section

Notes to the Financial Statements

For the Fiscal Year Ended September 30, 2007

(Dollar Amounts in Thousands)

10) PENSION PLAN FOR RSA EMPLOYEES

A portion of the RSA employees participates in the TRS pension plan, which is a cost sharing plan, and a portion of the RSA employees participates in the ERS pension plan, which is an agent multiple-employer pension plan. As a component unit, RSA employees participating in the ERS pension plan are valued with all other State of Alabama employees, and therefore, report under the requirements of a cost sharing unit.

Contributions were made to each plan in accordance with actuarially determined contribution requirements. A schedule of Employer Contributions is shown below:

	<u>Fiscal Year</u> <u>Ended</u>	<u>Annual</u> <u>Required</u> <u>Contributions</u>	<u>Percentage</u> <u>Contributed</u>
TRS	2007	\$ 739	100
	2006	613	100
	2005	469	100
ERS	2007	558	100
	2006	422	100
	2005	291	100

11) RELATED PARTY TRANSACTIONS

The TRS and ERS jointly own office buildings in Montgomery and lease office space to agencies of the State of Alabama. These agencies are obligated to the TRS and ERS to lease space for varying terms through the year 2019. Rental payments (reported as investment income) from leases with state agencies totaled \$21,462 during the 2007 fiscal year.

(Dollar Amounts in Thousands)

1) CONTRIBUTIONS

Contributions were made in accordance with actuarially determined contribution requirements. The employer cost rate expressed as a percent of payroll is determined annually by reviewing a variety of factors including benefits promised, member contributions, investment earnings, mortality, and withdrawal experience.

The employer cost rates for the fiscal year 2007-2008 are 11.75% for the TRS, 10.26% for the ERS - State Employees, 30.42% for the ERS - State Police and 23.23% for the JRF. Local agency rates differ for each agency.

2) ANALYSIS OF FUNDING PROGRESS

Analysis of the dollar amounts of the actuarial value of assets, the actuarial accrued liability, and the unfunded actuarial accrued liability in isolation may be misleading. Expressing the actuarial value of assets as a percentage of the actuarial accrued liability (assets to liabilities percentage) provides one indication of the respective retirement system's funding status on a going-concern basis. Analysis of this percentage over time indicates whether the respective system is becoming financially stronger or weaker. Generally, the strength of a retirement system is considered to increase as the assets to liabilities percentage increases. Trends in the actuarial accrued liability and the annual covered payroll are affected by inflation. Expressing the unfunded accrued liability as a percentage of annual covered payroll (liabilities to payroll percentage) approximately adjusts for the effects of inflation and aids analysis of the respective retirement system's progress made in accumulating sufficient assets to pay benefits when due. Generally, the strength of a retirement system is considered to increase as the liabilities to payroll percentage decreases.

Report on Investment Activity

For the Fiscal Year Ended September 30, 2007

Dear Members,

I am pleased to present the following report on investment activity for the fiscal year ended September 30, 2007. The report provides highlights on investments in general as well as specific information on the Retirement System's investment activity for the fiscal year. The custodian calculated rates of return based on the standards set forth by the Global Investment Performance Standards (GIPS®).

After four years of decline, volatility in the financial markets has made a strong comeback. The VIX index, a widely used measure of short term volatility, has made a strong upside breakout from the lows posted at the end of 2006. Both the stock and bond markets had wild swings to the upside and downside in the fiscal year. Much of this was due to the commodity inflation that has been driven largely by strong growth in the developing economies. Oil, metals, and most agricultural commodities mounted strong rallies throughout the year. This in turn led to increased fear that the Federal Reserve was behind the curve in containing inflation. At the same time, the housing market continued to unravel, and the subprime mortgage crisis began to unfold at a rapid pace. Almost overnight, the new fear was that the Federal Reserve was not cutting rates fast enough to ward off a credit markets meltdown.

The Federal Reserve did cut rates late in the fiscal year, and this led to a strong rally in the stock and Treasury bond markets. Expectations are for continued short term rate cuts as housing data, credit issues, and profit growth have continued to head in the wrong direction. Hopefully employment growth will continue to hold steady, as the home equity piece of the consumer's balance sheet looks quite shaky. With consumption accounting for 70% of GDP, the financial markets can ill afford a major retrenchment by the consumer.

With GDP growth probably slowing from the 2.6% pace posted last year, we are continuing with our strategy of overweighting large capitalization stocks over mid and small caps. Again, we expect returns next year to be on par with historical patterns. After five years of a bull market, it would not be surprising to see the markets consolidate, or correct, at some point in the year. With profit margins at multiyear highs, earnings growth this year will probably move much closer to GDP growth. Adding in stock repurchases, earnings growth should come in the mid to high single digit range. After having added to equities the past few years, we do not foresee any major asset allocation shifts on the horizon. We will continue to demand the best execution from all our financial counterparts, and will strive to produce results that strengthen the Retirement Systems of Alabama.

RSA Performance Summary

As of September 30, 2007, aggregate defined benefit assets under management totaled \$32.2 billion. During fiscal year 2007, annualized total returns of the Teachers' Retirement System, Employees' Retirement System, and Judicial Retirement Fund were 17.46%, 17.92%, and 14.27%, respectively. International equities were again one of the best performing asset classes within the portfolio.

Equities

After the dust settled, 2007 proved to be quite a good year for the global stock markets. In the same fashion as the three prior years, the first quarter of the new fiscal year proved to be the most linear in terms of returns. The fireworks started going off in late February, mostly in reaction to news that the Chinese authorities were tightening down on the liquidity in their markets through various measures. After that settled down, the markets were again off to the races. The LBO and private equity craze that had been ongoing for 3 or 4 years continued unabated. Almost on queue, private equity firms began to file IPO's to go public. This more or less marked the top in the merger mania that had been driven by the private equity shops.

At the same time, the housing market continued to unravel, as more and more evidence of loose lending policies evidenced itself. By the middle of August, the subprime lending issues that had been "contained" per the Fed's view earlier in the year, had turned into a full blown crisis. The Fed had to reverse course and immediately cut the discount rate, followed closely by a cut in the Fed Funds rate. After nearly a 10% correction in a matter of weeks,

the markets reversed course and closed out the year near the highs set in early July. The one takeaway that really stood out for 2007 was how quickly investor sentiment could change from exuberant to pessimistic. Volatility looks like it is back in play for some time to come.

There was very little change within the equity portfolio in the 12 months ended September 30. We did add a roughly 1% exposure to emerging markets when those markets became dislocated in February and August. We have continued to favor the larger capitalization stocks, and that strategy again worked as large caps outperformed small caps for the second straight year.

In review, the RSA equity allocation began the year at roughly 62%, and closed out fiscal 2007 at 63% on average across the three funds. Domestic equities account for 48% of the fund, and international equities are now 17% of the total. For the second year in a row, the large capitalization indices beat the smaller caps. The S & P 500 index was up 16.44%, the S & P 400 Midcap index was up 18.76%, and the S & P Smallcap 600 index was up 14.93%. The MSCI EAFE index was up 24.86%, again outperforming the broad domestic equity indices.

For the year, the RSA domestic equity portfolios increased 16.60%, 16.68%, and 16.89% for the TRS, ERS, and JRF funds, respectively. International equity returns fared better, posting 25.43% for TRS and 25.50% for ERS. The combined total return for the overall equity portfolios were 18.44%, 18.84%, and 17.89% for the TRS, ERS, and JRF, respectively. Three-, five-, and ten-year annualized global equity returns were 15.98%, 17.92%, and 7.99% for TRS, 15.95%, 17.89%, and 7.95% for ERS, and 13.84%, 16.06%, and 7.25% for JRF, respectively.

Fixed Income

At the beginning of fiscal year 2007, the Federal Reserve had just ended a tightening cycle that had been active for two years. Prior to this pause, policymakers had lifted the federal funds rate 17 consecutive times with each action constituting 25 basis points. During this time, the Fed's preferred price gauge (core PCE) clocked in at 2.4%, slightly higher than their comfort level of 1-2%. Fed officials subscribe to the notion that as the economy gradually slows, inflation will also drift lower. In the last couple of months of calendar 2006, unemployment was sitting at a five-year low with the ten-year treasury yielding 4.60%. At the October meeting, Chairman Ben Bernanke and the Fed left short-term rates unchanged citing that additional tightening may be necessary and that the risk of inflation was greater than the risk of a slowing economy.

As the end of 2006 drew near, treasury yields rose significantly as any prospect of a near-term rate cut had ceased. In examining the fixed income market, spread product performed very well during this period due to stable credit fundamentals, favorable technicals, and a decline in equity volatility. The Federal Reserve left short-term financing rates steady at both the December and January meetings, marking the fifth consecutive time they had passed on policy change. In late February, investors started to witness what would become commonplace headlines involving sub prime lending. This led to a brief panic within credit markets as volatility showed signs of life and global equity markets fell significantly. This pushed treasury yields lower as risk-averse investors sought safety within government securities. The investment grade and high yield sectors also weakened during this period as growing concerns about mortgage lending began to mount.

At the March meeting, the Federal Open Market Committee (FOMC) made significant changes in the wording of its policy statement. After previously stating that there had been signs of stabilization within the housing market, they concluded that the "adjustment in the housing sector was ongoing". The committee also abandoned the reference to additional firming. This was in response to signs of slower economic and employment growth. While the U.S. economy had clearly slowed and the tightening bias had been removed, we felt that the Federal Reserve would be reluctant to ease in the near-term on concerns that "inflation would fail to moderate as expected". We were correct in our assessment as Chairman Ben Bernanke and the Fed left monetary policy unchanged at both the June and August meetings. However, there were significant developments during this time that would ultimately lead to action.

Report on Investment Activity (Continued) For the Fiscal Year Ended September 30, 2007

In mid-June, Bear Stearns announced the collapse of two hedge funds under management due to mortgage defaults of homeowners with poor credit. This in turn, triggered the “flight to quality” trade into the marketplace leading to a dramatic steepening of the yield curve. In its August 7th FOMC statement, policymakers did acknowledge tighter credit conditions for “some households and businesses”, but left the current short-term lending rate intact. A few days later, France’s largest bank was forced to halt withdrawals from three of its managed funds. This development caused overnight lending rates to soar. In response, the European Central Bank pumped cash into the financial system in order to stabilize the situation. Policy-making bodies around the globe followed suit, including the Federal Reserve. The following week, the nation’s largest home lender, Countrywide Financial, had its solvency called into question. The institution was forced to draw down its entire bank credit facility as it and others were unable to raise capital in the unsecured and asset-backed commercial paper market. The lack of liquidity and accessibility within short-term markets produced the best quarterly performance for Treasuries in five years. After failing in its two attempts to calm the market by pumping in liquidity, the Federal Reserve lowered the discount rate 50 basis points to 5.75%. This essentially was a precursor that policymakers would lower the federal funds rate no later than the September meeting. At that meeting the Federal Reserve lowered short-term interest rates by 50 basis points, somewhat of a surprise to the capital markets which for the most part were forecasting only a 25 basis point ease. In the statement, the committee stated its concern that current conditions could ultimately produce an economic downturn. Since the Fed’s September action, the economic climate has gotten worse. Equity markets have stumbled, interest rates have fallen, commodity prices have soared, and most importantly, the confidence of the consumer, which is such an integral part of the economy, has dropped. Going forward, we feel that the Federal Reserve will be poised to lower rates further in order to regain confidence within the financial system. Until this occurs, we expect that equities will continue to weaken, spread product will underperform government debt, and that the yield curve will likely steepen further.

For fiscal year 2007, the RSA purchased approximately \$1.516 billion in additional securities for the fixed income portfolio. As of September 30, 2007, the RSA’s fixed income portfolio had a market value of \$11.2 billion, of which 10.3% was in money market securities. For the fiscal year, the total annual returns for the fixed income portfolios were 17.66% for the TRS, 18.34% for the ERS and 7.59% for the JRF. The five-year annualized returns were 8.79% for the TRS, 8.90% for the ERS and 5.58% for the JRF. The ten-year annualized returns were 7.16% for the TRS, 7.15% for the ERS and 5.63% for the JRF.

Sincerely,

Marc Green
Director of Investments

I. Board Objectives

The Boards of Control, as Trustees of the Teachers' Retirement System and Employees' Retirement System (Systems), have full power, through each System's secretary-treasurer, to invest and reinvest System funds in accordance with the Prudent Man Rule: "with the care, skill, prudence, and diligence under the circumstances then prevailing that a prudent man acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with like aims." Other funds currently and hereafter under the management of the Systems will be governed by this Investment Policy Statement within each System's limitations and/or by other applicable legislated restrictions.

It is the objective of the Boards that funds be invested in such a manner as to maximize the total return of each System within prudent risk parameters. Also, the Systems recognize that a stronger Alabama equates to a stronger Retirement System, and as such, investments in Alabama businesses are encouraged to the extent the investment meets the criteria delineated by this policy statement.

The long term investment performance expectations of the Systems are to achieve a return on marketable securities in excess of the actuarial investment assumption and to exceed the rate of inflation (as measured by the CPI) by 3% through investments in a broadly diversified portfolio. The performance evaluation of each System will be submitted to the respective Board on a semi-annual basis.

II. Asset Allocation

The most important aspect of any investment strategy is the decision regarding allocation of investments among the various asset classes. The purpose of formulating asset allocation guidelines is to maximize investment returns within the standards of prudence established for the whole portfolio. Accordingly, the asset allocation decisions will be predicated on the following factors:

1. The actuarial projected liability stream of benefits and their cost,
2. The perception of the prospective risks and returns of eligible asset classes, and
3. Judgments regarding future economic and financial conditions.

The maximum permissible allocation of assets in the Systems to each eligible asset class is expressed below:

A. Domestic Fixed Income

The domestic fixed income portfolio of each System may consist of any rated or non-rated debt security including, but not limited to, the following: U.S. Treasury issues, agency issues, mortgage-backed securities, corporate bonds, and privately placed debt securities. This area of investments may not exceed 50% of the market value of the aggregate portfolio of each System.

B. International Fixed Income

The international fixed income asset class may be used to provide diversification for each System and may consist of U.S. dollar denominated or foreign currency denominated fixed income obligations of sovereign countries with a rating of at least A by one of the principal rating agencies at the time of purchase or acquisition, except that up to 2 percent of the market value of each System's total portfolio may be invested in the obligations of sovereign countries with a rating of BBB or BAA by one of such agencies at the time of purchase. The Systems may hedge against the possible adverse effects of currency fluctuations on each System's portfolio of international fixed income obligations when it is considered appropriate. The market value of this asset may not exceed 10% of the market value of each System's total portfolio.

Investment Section

Investment Policies and Procedures (Continued)

For the Fiscal Year Ended September 30, 2006

C. Domestic Equity

The domestic equity portfolio of each System may consist of both actively and passively managed equity securities. Also, covered call options may be utilized in order to add incremental value to each System's equity portfolio and may be written and repurchased as market conditions warrant. The asset class may not exceed 65% of the market value of each System's aggregate portfolio.

D. International Equity

The international equity asset class may be used to provide diversification for the Systems and may consist of both actively and passively managed international equity securities. In order to be eligible for purchase by the Systems, an international equity security must be issued by a company incorporated in a country whose debt securities are eligible for investment under Section B above, and the market value of the aggregate outstanding equity of the issuing company must be at least \$100 million. Furthermore, each System may not purchase or hold more than 5 percent of any class of the outstanding stock of a company. The Systems may hedge against the possible adverse effects of currency fluctuations on each System's portfolio of international equity securities when it is considered appropriate. The aggregate market value of international equities may not exceed 25% of the aggregate market value of each System's total portfolio.

E. Real Estate

The real estate portfolio of each System may consist of office, retail, industrial, commercial, and residential housing projects. The suggested range may not exceed 15% of the book value of each System's aggregate portfolio.

F. Alternative Investments

Alternative investments may consist of, but are not limited to, mezzanine financing, LBO's, venture capital, limited partnerships, futures, commodities, and derivative investments. The asset class may not exceed 10% of the book value of each System's aggregate portfolio.

G. Short-term Investments

Short-term investments may consist of money allocated to commercial paper, rated at least A-2 and/or P-2, repurchase agreements, short-term U.S. Treasury securities and other money market investments. The primary objective of short-term investments is to provide highly liquid, low risk methods of return on funds, which have not been committed to the other aforementioned asset classes. The asset class may not exceed 20% of the market value of each System's aggregate portfolio.

Asset allocation is a dynamic process, and as such, the allocation decision should be revisited as market conditions change. In order to recognize this dynamism, the allocation targets within the recommended ranges of each asset class for the prospective quarter should be included in the quarterly strategy report.

III. Procedures

1. The investment advisor will work with the staff to develop a quarterly strategy for investments, which will be disseminated to the Boards, as it is prepared each quarter.
2. The Investment Committee of each System shall approve all investments made within the prescribed investment policy. These Investment Committees, in their approval, are considered to be signing for the respective Board of Control. If any purchase or sale is questioned by a member of the respective Investment Committee as to whether it is within given Board policy, the Board shall decide and no purchase or sale shall take place until all parties are in clear agreement that said action is or is not covered by policy.
3. Each week the secretary-treasurer of each System will send to the investment advisor the list of actual activities for written confirmation, which will then be forwarded to the respective System's Board of Control members upon receipt.
4. The staff members of the investment advisor will meet at least quarterly with members of the RSA staff and interested Boards of Control members to cover subjects of mutual interest.
5. All investment security purchases will be documented with an individual worksheet setting out the reason for the purchase, rating, market history and other general data pertinent to the decision making process.
6. An annual survey will be made of all fixed income investments held with emphasis on credit quality. A holding that has been downgraded in rating will be examined as to the reason for the downgrade and a determination should be made as to whether the security should remain in the portfolio.
7. The rules of the Securities Exchange Commission, the general policies of the Boards of Control, and the Alabama Ethics Commission shall govern the ethical conduct of employees. The RSA staff will provide the Alabama Ethics Commission with a quarterly report of all purchases and sales of any and all securities for personal accounts occurring within each reported quarter. The staff will abide by the Alabama Ethics Commission Advisory Opinion No. 673.

CONSULTING, LLC

The experience and dedication you deserve

August 22, 2007

Board of Control
Teachers' Retirement System of Alabama
Montgomery, Alabama

Members of the Board:

In this report are submitted the results of the annual valuation of the assets and liabilities of the Teachers' Retirement System of Alabama, prepared as of September 30, 2006 in accordance with Section 367(15) of the act governing the operation of the System.

The purpose of this report is to provide a summary of the funded status of the system as of September 30, 2006, to recommend rates of contribution and to provide accounting information under Governmental Accounting Standards Board Statements No. 25 and 27 (GASB 25 and 27). While not verifying the data at source, the actuary performed tests for consistency and reasonability. Since the previous valuation, the assumed rates of withdrawal, disability, retirement and mortality have been revised to reflect the results of the experience investigation for the five-year period ending September 30, 2005. On the basis of this valuation, it is recommended that the State make contributions to the Retirement System at the rate of 12.07% of payroll for the fiscal year ending September 30, 2009, based on a 20-year funding period. The increase in the contribution rate from 11.06% to 12.07% of payroll is primarily due to a recognition of asset losses and the cost of the assumption changes.

The promised benefits of the System are included in the actuarially calculated contribution rates which are developed using the Entry Age Normal cost method. Five-year market related value of assets is used for actuarial valuation purposes. Gains and losses are reflected in the unfunded accrued liability that is being amortized by regular annual contributions as a level percentage of payroll, on the assumption that payroll will increase by 4.50% annually. The assumptions recommended by the actuary and adopted by the Board are in the aggregate reasonably related to the experience under the Fund and to reasonable expectations of anticipated experience under the Fund and meet the parameters for the disclosures under GASB 25 and 27.

We have prepared the Schedule of Funding Progress and Trend Information shown in the financial section of the Comprehensive Annual Financial Report, and all supporting schedules including the Schedule of Active Member Valuation Data, the Solvency Test and the Analysis of Financial Experience shown in the actuarial section of the Comprehensive Annual Financial Report. All historical information that references a valuation date prior to September 30, 2004 was prepared by the previous actuarial firm.

This is to certify that the independent consulting actuary is a member of the American Academy of Actuaries and has experience in performing valuations for public retirement systems, that the valuation was prepared in accordance with principles of practice prescribed by the Actuarial Standards Board, and that the actuarial calculations were performed by qualified actuaries in accordance with accepted actuarial procedures, based on the current provisions of the retirement system and on actuarial assumptions that are internally consistent and reasonably based on the actual experience of the System.

In our opinion the System is operating on an actuarially sound basis. Assuming that contributions to the System are made by the employer from year to year in the future at the rates recommended on the basis of the successive actuarial valuations, the continued sufficiency of the retirement fund to provide the benefits called for under the System may be safely anticipated.

The Table of Contents, which immediately follows, outlines the material contained in the report.

Summary of Actuarial Assumptions and Methods

Summary of Actuarial Assumptions and Methods

The assumptions and methods used in the valuation were based on the actuarial experience study prepared as of September 30, 2005, submitted to and adopted by the Board on May 21, 2007.

Investment Rate of Return: 8% per annum, compounded annually.

Salary Increases: Representative values of the assumed annual rates of future salary increases are as follows and include inflation at 4.50% per annum:

<u>Age</u>	<u>Annual Rate (%)</u>
20	7.25
25	7.25
30	7.75
35	7.00
40	6.50
45	6.25
50	6.00
55	5.50
60	5.00
65	5.00

Separations Before Service Retirement: Representative values of the assumed annual rates of death, disability, and withdrawal are as follows:

<u>Males</u>						
<u>Annual Rate (%)</u>						
<u>Withdrawal (Years of Service)</u>						
<u>Age</u>	<u>Death</u>	<u>Disability</u>	<u>0-4</u>	<u>5-9</u>	<u>10-20</u>	<u>20+</u>
20	0.05	0.05	30.00			
25	0.07	0.06	16.50	12.00		
30	0.08	0.07	15.00	5.50	5.50	
35	0.09	0.13	15.00	5.50	3.00	
40	0.11	0.20	14.50	5.50	3.00	1.25
45	0.16	0.21	14.50	5.25	3.00	1.00
50	0.26	0.64	12.00	4.50	3.00	1.00
55	0.44	1.20	11.50	4.00	2.25	1.00
60	0.80		10.00	4.00		
65	1.45		10.00	6.00		
69	2.17		10.00	6.00		

Females						
Annual Rate (%)						
Age	Death	Disability	Withdrawal (Years of Service)			
			0-4	5-9	10-20	20+
20	0.03	0.10	30.00			
25	0.03	0.10	14.50	8.00		
30	0.04	0.10	14.50	6.00	4.00	
35	0.05	0.15	13.50	6.00	3.50	
40	0.08	0.16	12.00	4.50	2.50	1.50
45	0.10	0.37	11.50	3.75	2.50	0.75
50	0.16	0.70	11.00	3.75	2.50	0.75
55	0.26	1.10	10.50	3.75	2.50	0.75
60	0.51		11.00	4.50		
65	0.97		14.00	6.00		
69	1.37		14.00	6.00		

Service Retirement: Representative values of the assumed annual rates of service retirement are as follows:

For members first eligible for unreduced benefits upon attaining 25 years of service but before age 65, rates are as follows:

Age	Annual Rate (%) *	
	Male	Female
45	30.0	30.0
50	15.0	16.0
55	48.0	53.0
60	40.0	49.0
62	50.0	55.0

*Retirement rates increase by 7% in year when member first becomes eligible for unreduced service retirement on or after age 50 but before age 60.

For members first eligible for unreduced benefits before attaining 25 years of service and all members age 65 and over, the rates are as follows:

Age	Annual Rate (%)	
	Male	Female
60	13.0	22.0
62	30.0	30.0
65	34.0	35.0
67	26.0	27.0
69	25.0	26.0
70	25.0	26.0
72	26.0	25.0
75	100.0	100.0

RETIREMENT SYSTEMS OF ALABAMA

Actuarial Section

Teachers' Retirement System

Summary of Actuarial Assumptions and Methods (Continued), Actuarial Cost Method and Summary of Plan Provisions

Deaths after Retirement: Rates of mortality for the period after service retirement are according to the 1994 Group Annuity Mortality Table set forward one year for females. Special tables are used for the period after disability retirement. Representative values of the assumed annual rates of death after service and disability retirement are as follows:

Age	Annual Rate (%) of Death After			
	Service Retirement		Disability Retirement	
	Male	Female	Male	Female
40	0.11	0.08	3.32	2.60
45	0.16	0.10	3.49	2.43
50	0.26	0.16	3.76	2.50
55	0.44	0.26	4.20	2.67
60	0.80	0.51	4.88	2.95
65	1.45	0.97	5.95	3.39
70	2.37	1.50	7.63	4.08
75	3.72	2.53	10.22	5.16
80	6.20	4.40	14.17	6.85
85	9.72	7.53	20.09	9.47
90	15.29	12.88	28.67	13.46

Spousal Benefits: For those eligible for spousal benefits, it is assumed that 75% will elect the lump sum death benefit and 25% will elect the spousal benefit.

Valuation Method: Entry age normal cost method. Actuarial gains and losses are reflected in the unfunded actuarial accrued liability.

Assets: Actuarial value. The actuarial value of assets recognizes a portion of the difference between the market value of assets and the expected actuarial value of assets, based on the assumed valuation rate of return. Each year 20% of the difference between market value and expected actuarial value is recognized.

Actuarial Cost Method

1. The valuation is prepared on the projected benefit basis, which is used to determine the present value of each member's expected benefit payable at retirement or death. The calculations are based on the member's age, years of service, sex, compensation, expected future salary increases, and an assumed future interest earnings rate (currently 8%). The calculations consider the probability of a member's death or termination of employment prior to becoming eligible for a benefit and the probability of the member terminating with a service, disability, or survivor's benefit. The present value of the expected benefits payable to active members is added to the present value of the expected future payments to retired members and beneficiaries to obtain the present value of all expected benefits payable to the present group of members and beneficiaries.
2. The employer contributions required to support the benefits of the System are determined following a level funding approach, and consist of a normal contribution and an accrued liability contribution.
3. The normal contribution is determined using the "entry age normal" method. Under this method, a calculation is made to determine the uniform and constant percentage rate of employer contributions which, if applied to the compensation of the average new member during the entire period of the member's anticipated covered service, would be required in addition to the contributions of the member to meet the cost of all benefits payable on the member's behalf.

-
4. The unfunded accrued liability contributions are determined by subtracting the current assets held by the System and the present value of prospective employer normal contributions and member contributions from the present value of expected benefits to be paid from the System.

Summary of Plan Provisions as Interpreted for Valuation Purposes

The Teachers' Retirement System of Alabama was established on September 15, 1939 and became effective September 30, 1941. The valuation considered amendments to the System through the valuation date. The following summary describes the main benefit and contribution provisions of the System as interpreted for the valuation.

Definitions

Average Final Compensation - the average compensation of a member for the 3 highest years in the last 10 years of creditable service.

Membership Service - all service rendered while a member of the retirement system and for which contributions are made.

Creditable Service - the sum of membership service, prior service, and any other service established as creditable in accordance with the provisions of the retirement law.

Annuity - payments for life derived from accumulated contributions of a member.

Pension - payments for life derived from employer contributions.

Retirement Allowance - the sum of the annuity and pension.

Benefits

Service Retirement Allowance

Condition for Allowance A retirement allowance is payable upon the request of any member who has completed 25 years of creditable service or who has attained age 60 and completed at least 10 years of creditable service.

Amount of Allowance Upon service retirement, a member receives a retirement allowance equal to 2.0125% of the member's average final compensation multiplied by the number of years of creditable service. At retirement, a member receives one additional year of creditable service in determining retirement allowance for each five years of service as a full-time certified firefighter, police officer, or correctional officer.

Members may elect to receive a reduced retirement allowance in order to provide an allowance to a designated beneficiary after the member's death (see "Special Privileges at Retirement" below).

Disability Retirement Allowance

Condition for Allowance A disability retirement allowance may be granted to a member who has 10 years or more of creditable service and becomes totally and permanently incapacitated for duty before reaching eligibility for a service retirement allowance.

Amount of Allowance Upon retirement for disability, a member receives a retirement allowance equal to 2.0125% of the member's average final compensation multiplied by the number of years of creditable service. At retirement, a member

RETIREMENT SYSTEMS OF ALABAMA

Actuarial Section

Teachers' Retirement System

Summary of Plan Provisions (Continued)

receives one additional year of creditable service in determining retirement allowance for each five years of service as a full-time certified firefighter, police officer, or correctional officer.

Members may elect to receive a reduced retirement allowance in order to provide an allowance to a designated beneficiary after the member's death (see "Special Privileges at Retirement" below).

Benefits Payable on Separation of Service

Any member who withdraws from service is entitled to receive his or her contributions with allowable interest. A member who has completed 10 years of creditable service may, after separation from service, continue in the membership of the System and file for service retirement after reaching age 60.

Benefits Payable upon Death In Active Service

In the event of the death of a member eligible for service retirement, the designated beneficiary may elect (1) to exercise Option 3 defined below under "Special Privileges at Retirement" or (2) to receive a return of member contributions and total earned interest plus a death benefit payable from the pre-retirement death benefit fund equal to the salary on which the member made retirement contributions for the previous scholastic year (July 1-June 30). *

In the event of the death of a member with more than one year of service who is not eligible to retire, the designated beneficiary shall receive the return of member contributions and total earned interest. Also, the designated beneficiary shall receive an additional death benefit payable from the pre-retirement death benefit fund equal to the salary on which member retirement contributions were made for the previous scholastic year (July 1-June 30). *

In the event of a job-related death of a member with less than one year of service, the designated beneficiary shall receive the return of member contributions and total earned interest plus a death benefit payable from the pre-retirement death benefit fund equal to the annual earnable compensation of the member at the time of death. *

In the event of a non-job related death of a member with less than one year of service, the designated beneficiary shall receive the return of member contributions and total earned interest plus a matching death benefit which is limited to a \$5,000 maximum.

*However, if the death occurred more than 180 calendar days after the member's last day in pay status, or if the deceased had applied for a refund of contributions or terminated employment, the lump sum will be the same as if the member had less than one year of service and the death was non-job related.

Special Privileges at Retirement

In lieu of the full retirement allowance, any member may, at retirement, elect to receive a reduced retirement allowance equal in value to the full allowance, with the provision that:

Option 1 – If a member dies before the annuity payments equal the present value of the annuity at the date of retirement, the balance is paid to a designated beneficiary or to the member's estate, or

Option 2 – After the member’s death, the member’s allowance is continued throughout the life of the designated beneficiary, or

Option 3 – After the member’s death, one-half of the member’s allowance is continued throughout the life of the designated beneficiary, or

Option 4 - Some other benefit is paid either to the member or to such other person as the member shall designate provided such benefit, together with the reduced retirement allowance, is of equivalent actuarial value to the member’s retirement allowance and is approved by the Board of Control.

Deferred Retirement Option Plan
(DROP)

A member may elect to participate in the Deferred Retirement Option Plan (DROP) upon completion of at least 25 years of creditable service (excluding sick leave) and attainment of at least 55 years of age. Under the DROP, the member may defer receipt of a retirement allowance and continue employment for a period not to exceed five years, nor to be less than three years. At the end of the period, the member may withdraw from active service and receive the retirement benefit based the retirement benefit calculated at the time of enrollment in the DROP, and also receive a payment for the deferred retirement benefits, employee contributions while participating in the DROP and interest earned on DROP deposits.

Member Contributions

Regular members contribute 5% of salary. Certified police officers and firefighters contribute 6% of salary. DROP participants continue to contribute during the DROP period, but receive a refund of these contributions and interest upon retirement.

CONSULTING, LLC

The experience and dedication you deserve

August 31, 2007

Board of Control
Employees' Retirement System of Alabama
State Capitol
Montgomery, AL 36104

Members of the Board:

In this report are submitted the results of the annual actuarial valuation of the Employees' Retirement System of Alabama, prepared as of September 30, 2006 in accordance with Section 36-27-23(p) of the act governing the operation of the System.

The purpose of this report is to provide a summary of the funded status of the system as of September 30, 2006, to recommend rates of contribution and to provide accounting information under Governmental Accounting Standards Board Statements No. 25 and 27 (GASB 25 and 27). While not verifying the data at source, the actuary performed tests for consistency and reasonability. Since the previous valuation, the assumed rates of withdrawal, disability, retirement and mortality have been revised to reflect the results of the experience investigation for the five-year period ending fiscal year September 30, 2005.

On the basis of this valuation, it is recommended that the State make contributions to the Retirement System for State employees (members other than State policemen) at the rate of 11.37% of payroll. It is also recommended that the State make contributions to the Retirement System for State policemen at the rate of 30.48% of payroll for the fiscal year ending September 30, 2009. The increases in the contribution rates since the previous valuation are primarily due to the recognition of asset losses and the cost of the assumption changes. The contribution rates for local employers for the fiscal year beginning October 1, 2008 will be submitted in a separate report and will include the impact of all employer-elected benefit improvements through September 30, 2007.

The promised benefits of the System are included in the actuarially calculated contribution rates which are developed using the entry age normal cost method. Five-year smoothed market value of assets is used for actuarial valuation purposes. Gains and losses are reflected in the unfunded accrued liability that is being amortized by regular annual contributions as a level percentage of payroll within a 20-year period for State Employees and State policemen, on the assumption that payroll will increase by 4.5% annually. The assumptions recommended by the actuary and adopted by the Board are in the aggregate reasonably related to the experience under the Fund and to reasonable expectations of anticipated experience under the Fund and meet the parameters for the disclosures under GASB 25 and 27.

We have prepared the Schedule of Funding Progress and Trend Information shown in the financial section of the Comprehensive Annual Financial Report, and all supporting schedules including the Schedule of Active Member Valuation Data, the Solvency Test and the Analysis of Financial Experience shown in the actuarial section of the Comprehensive Annual Financial Report. All historical information that references a valuation date prior to September 30, 2004 was prepared by the previous actuarial firm.

This is to certify that the independent consulting actuary is a member of the American Academy of Actuaries and has experience in performing valuations for public retirement systems, that the valuation was prepared in accordance with principles of practice prescribed by the Actuarial Standards Board, and that the actuarial calculations were performed by qualified actuaries in accordance with accepted actuarial procedures, based on the current provisions of the retirement system and on actuarial assumptions that are internally consistent and reasonably based on the actual experience of the System.

In our opinion the System is operating on an actuarially sound basis. Assuming that contributions to the System are made by the employer from year to year in the future at the rates recommended on the basis of the successive actuarial valuations, the continued sufficiency of the retirement fund to provide the benefits called for under the System may be safely anticipated.

The Table of Contents, which immediately follows, outlines the material contained in the report.

70			20.00	17.00
72			20.00	24.00
75			100.00	100.00

§ Rates are increased by 12% in year when member attains 25 years of service.

† Rates are increased in year when member attains 25 years of service by 10% for ages less than 55 and by 17% for ages 55 or older.

Death after Retirement: The rate of mortality for the period after service retirement are according to the 1994 Group Annuity Mortality Table set forward three years for males and set forward two years for females. Special tables are used for the period after disability retirement.

Spousal Benefit: For those eligible for spousal benefits, it is assumed that 75% will elect the lump sum death benefit and 25% will elect the spousal benefit.

Percent Married: 100% of employees are assumed to be married, with the wife 3 years younger than the husband.

Actuarial Method: Entry age normal cost method. Actuarial gains and losses are reflected in the unfunded actuarial accrued liability.

Assets: Actuarial value. The actuarial value of assets recognizes a portion of the difference between the market value of the assets and the expected value of the assets, based on the assumed valuation rate of return. Each year 20% of the difference between the market value and expected value is recognized.

Actuarial Cost Method

1. The valuation is prepared on the projected benefit basis, which is used to determine the present value of each member's expected benefit payable at retirement or death. The calculations are based on the member's age, years of service, sex, compensation, expected future salary increases, and an assumed future interest earnings rate (currently 8%). The calculations consider the probability of a member's death or termination of employment prior to becoming eligible for a benefit and the probability of the member terminating with a service, disability, or survivor's benefit. The present value of the expected benefits payable to active members is added to the present value of the expected future payments to retired members and beneficiaries to obtain the present value of all expected benefits payable to the present group of members and beneficiaries.
2. The employer contributions required to support the benefits of the System are determined following a level funding approach and consist of a normal contribution and an accrued liability contribution.
3. The normal contribution is determined using the "entry age normal" method. Under this method, a calculation is made to determine the uniform and constant percentage rate of employer contributions which, if applied to the compensation of the average new member during the entire period of the member's anticipated covered service, would be required in addition to the contributions of the member to meet the cost of all benefits payable on the member's behalf.
4. The unfunded accrued liability is determined by subtracting the current assets and the present value of prospective employer normal contributions and member contributions from the present value of expected benefits to be paid from the System. The accrued liability contribution amortizes the balance of the unfunded accrued liability over a period of years from the valuation date.

Summary of Plan Provisions as Interpreted for Valuation Purposes

The Employees' Retirement System of Alabama was established on October 1, 1945. The valuation considered amendments to the System effective through the valuation date. The following summary describes the main benefit and contribution provisions of the System as interpreted for the valuation.

Definitions

Average Final Compensation - the average compensation of a member for the 3 highest years in the last 10 years of creditable service.

Membership Service - all service rendered while a member of the Retirement System and for which contributions are made.

Creditable Service - the sum of membership service, prior service, and any other previous service established as creditable in accordance with the provisions of the retirement law.

Annuity - payments for life derived from accumulated contributions of a member.

Pension - payments for life derived from the accumulated contributions of an employer.

Retirement Allowance - the sum of the annuity and pension payments.

Benefits – Members Classified as Other Than State Policemen

Service Retirement Allowance

Condition for Allowance

A retirement allowance is payable upon the request of any member who has completed 25 years of creditable service (except for employees of local employers that maintained 30-year retirement by not electing 25-year

	retirement) or who has attained age 60 and completed at least 10 years of creditable service.
Amount of Allowance	<p>Upon service retirement, a member receives a retirement allowance equal to 2.0125% of the member's average final compensation multiplied by the number of years of creditable service. At retirement, a member receives one additional year of creditable service in determining the retirement allowance for each five years of service as a full-time certified firefighter, police officer, or correctional officer.</p> <p>The member may elect to receive a reduced retirement allowance in order to provide an allowance to a designated beneficiary after the member's death (see "Special Privileges at Retirement – All Employees" below).</p>
Disability Retirement Allowance	
Condition for Allowance	A disability retirement allowance may be granted to a member who has 10 or more years of creditable service and becomes permanently incapacitated for duty before reaching eligibility for service retirement.
Amount of Allowance	<p>Upon retirement for disability, a member receives a retirement allowance equal to 2.0125% of the member's average final compensation multiplied by the number of years of the member's creditable service. At retirement, a member receives one additional year of creditable service in determining the retirement allowance for each five years of service as a full-time certified firefighter, police officer, or correctional officer.</p> <p>The member may elect to receive a reduced retirement allowance in order to provide an allowance to a designated beneficiary after the member's death (see "Special Privileges at Retirement – All Employees" below).</p>
Benefits Payable on Separation of Service	Any member who withdraws from service is entitled to receive a return of member contributions with allowable interest. A member who has completed at least 10 years of creditable service may, after separation from service, continue membership in the System and file for service retirement after reaching age 60.
Benefits Payable upon Death in Active Service	<p>In the event of the death of a member eligible for service retirement, the designated beneficiary may elect: (1) to exercise option 3 as defined below under "Special Privileges at Retirement – All Employees" or (2) to receive a return of member contributions and total interest earned plus a death benefit payable from the pre-retirement death benefit fund equal to the salary on which the member made retirement contributions for the previous fiscal year (October 1 – September 30). *</p> <p>In the event of the death of a member with more than one year of service who is not eligible for retirement, the designated beneficiary shall receive a return of member contributions and total interest earned. Also, the designated beneficiary shall receive an additional death benefit payable from the pre-retirement death benefit fund equal to the salary on which the member retirement contributions were made for the previous fiscal year (October 1 – September 30). *</p>

RETIREMENT SYSTEMS OF ALABAMA

Actuarial Section

Employees' Retirement System

Summary of Plan Provisions (Continued)

In the event of a job-related death of a member at any age with less than 1 year of service, the designated beneficiary shall receive the return of member contributions and total earned interest plus a death benefit payable from the pre-retirement death benefit fund equal to the annual earnable compensation of the member at the time death occurs. *

In the event of a non job-related death of a member with less than 1 year of service, the beneficiary shall receive the return of member contributions and total interest earned plus a matching death benefit, which is limited to a maximum of \$5,000.

* However, if the death occurred more than 180 calendar days after the member's last day in pay status, or if the deceased had applied for a refund of contributions or terminated employment, the lump sum will be the same as if the member had less than one year of service and the death was not job-related.

Deferred Retirement Option Plan (DROP)

A member may elect to participate in the Deferred Retirement Option Plan (DROP) upon completion of at least 25 years (at least 30 years for units that did not elect 25 year retirement) of creditable service (excluding sick leave) and attainment of at least 55 years of age. Under the DROP, the member may defer receipt of a retirement allowance and continue employment for a period not to exceed five years, nor to be less than three years. At the end of the period, the member may withdraw from active service and receive the retirement benefit based the retirement benefit calculated at the time of enrollment in the DROP, and also receive a payment for the deferred retirement benefits, employee contributions while participating in the DROP and interest earned on DROP deposits.

Member Contributions

Regular members contribute 5% of salary. Certified firefighters, police officers and correctional officers contribute 6% of salary. DROP participants continue to contribute during the DROP period, but receive a refund of these contributions and interest upon retirement.

Benefits – Members Classified as State Policemen

Service Retirement Allowance

Condition of Allowance

A retirement allowance is payable upon the request of any member who has completed 25 years of creditable service or who has attained age 52 and completed at least 10 years of creditable service.

Amount of Allowance

Upon service retirement, a member receives a retirement allowance equal to 2.875% of the member's average final compensation multiplied by the number of years of their creditable service.

The member may elect to receive a reduced retirement allowance in order to provide an allowance to a designated beneficiary after the member's death (see "Special Privileges at Retirement – All Employees" below).

A member who has attained 20 or more years of creditable service and retires prior to age 60 is eligible to receive a "bonus service credit" up to 4 years as follows:

-Age 56 or older – bonus service of 4 years reduced by 1 month for each month over the age of 56.

-Age 52 to 56 – bonus service of 4 years.

-Age 52 or less (disability retirement only) – bonus service of 4 years.

-Age 52 or less with 25 or more years of service – bonus service of 4 years.

Disability Retirement Allowance

Condition for Allowance

A disability retirement allowance may be granted to a member who has 10 or more years of creditable service or who becomes disabled as a result of his or her employment in the line of duty without regard to his or her years of creditable service, and who becomes permanently incapacitated, mentally or physically, for the further performance of duty before reaching the minimum age for service retirement.

Amount of Allowance

Upon retirement for disability, a member receives a retirement allowance equal to 2.875% of the member's average final compensation multiplied by the number of years of the member's creditable service.

The member may elect to receive a reduced retirement allowance in order to provide an allowance to a designated beneficiary after the member's death (see "Special Privileges at Retirement – All Employees" below).

Benefits Payable upon Separation from Service

Any member who withdraws from service is entitled to receive a return of member contributions with allowable interest. A member who has completed 10 years or more of creditable service may, after separation from service, continue in the membership of the System and file for service retirement after the attainment of age 52.

Benefits Payable upon Death in Active Service

In the event of the death of a member who is eligible for service retirement, the designated beneficiary may elect: (1) to exercise option 3 as defined below under "Special Privileges at Retirement – All Employees" or (2) to receive a return of member contributions and total interest earned plus a death benefit payable from the pre-retirement death benefit equal to the salary on which the member made retirement contributions for the previous fiscal year (October 1 – September 30). *

In the event of the death of a member with one or more years of service who is not eligible for service retirement, the designated beneficiary shall receive a return of member contributions and total interest earned plus an additional death benefit payable from the pre-retirement death benefit fund equal to the salary on which member retirement contributions were made for the previous fiscal year (October 1 – September 30). *

Actuarial Section

Employees' Retirement System

Summary of Plan Provisions (Continued) and Supporting Schedules

In the event of a job-related death of a member at any age with less than 1 year of service, the designated beneficiary shall receive the return of member contributions and total earned interest plus a death benefit payable from the pre-retirement death benefit fund equal to the annual earnable compensation of the member at the time death occurs. *

In the event of a non job-related death of a member with less than 1 year of service, the designated beneficiary shall receive the return of member contributions and total interest earned plus a matching death benefit, which is limited to a maximum of \$5,000.

* However, if the death occurred more than 180 calendar days after the member's last day in pay status, or if the deceased had applied for a refund of contributions or terminated employment, the lump sum will be the same as if the member had less than one year of service and the death was not job-related.

Deferred Retirement Option Plan (DROP)

A member may elect to participate in the Deferred Retirement Option Plan (DROP) upon completion of at least 25 years of creditable service (excluding sick leave) and attainment of at least 52 years of age. Under the DROP, the member may defer receipt of a retirement allowance and continue employment for a period not to exceed five years, nor to be less than three years. At the end of the period, the member may withdraw from active service and receive the retirement benefit based the retirement benefit calculated at the time of enrollment in the DROP, and also receive a payment for the deferred retirement benefits, employee contributions while participating in the DROP and interest earned on DROP deposits.

Member Contributions

Members contribute 10% of salary. DROP participants continue to contribute during the DROP period, but receive a refund of these contributions with interest upon retirement.

Special Privileges at Retirement – All Members

In lieu of the full retirement allowance, any member may, at retirement, elect to receive a reduced retirement allowance equal in value to the full retirement allowance, with the provision that:

- Option 1: If a member dies before the annuity payments equal or exceed the present value of the member's annuity at the date of retirement, the balance is paid to a designated beneficiary or to the member's estate, or
- Option 2: After the member's death, the member's allowance is continued throughout the life of the designated beneficiary, or
- Option 3: After the member's death, one-half of the member's retirement allowance is continued throughout the life of the designated beneficiary, or
- Option 4: Some other benefit is paid either to the member or the designated beneficiary, provided such benefit, together with the reduced retirement allowance, is of equivalent actuarial value to the member's retirement allowance and is approved by the Board of Control.

Supporting Schedules

The following schedule provides a six-year history on active member valuation data:

EMPLOYEES' RETIREMENT SYSTEM SCHEDULE OF ACTIVE MEMBER VALUATION DATA

CONSULTING, LLC

The experience and dedication you deserve

September 5, 2007

Board of Control
Alabama Judicial Retirement Fund
Montgomery, Alabama

Members of the Board:

In this report are submitted the results of the annual valuation of the assets and liabilities of the Alabama Judicial Retirement Fund, prepared as of September 30, 2006 in accordance with Section 36-27-23(p) of the act governing the operation of the Fund.

The purpose of this report is to provide a summary of the funded status of the Fund as of September 30, 2006, to recommend rates of contribution and to provide accounting information under Governmental Accounting Standards Board Statements No. 25 and 27 (GASB 25 and 27). Data regarding the membership of the Fund for use as a basis of the valuation was furnished by the Retirement Fund office. While not verifying the data at source, the actuary performed tests for consistency and reasonability. On the basis of this valuation, it is recommended that the State make contributions to the Retirement Fund at the rate of 23.05% of payroll for the fiscal year ending September 30, 2009. The contribution remains at the same level as the previous actuarial valuation.

The financing objective of the Fund has been to have contribution rates remain relatively level over time as a percentage of payroll. The promised benefits of the Fund are included in the actuarially calculated contribution rates which are developed using the Projected Unit Credit cost method. Five-year smoothed market value of assets is used for actuarial valuation purposes. Gains and losses are reflected in the unfunded accrued liability that is being amortized by regular annual contributions as a level percentage of payroll within a 19-year period, on the assumption that payroll will increase by 4.50% annually. The assumptions recommended by the actuary and adopted by the Board are in the aggregate reasonably related to the experience under the Fund and to reasonable expectations of anticipated experience under the Fund and meet the parameters for the disclosures under GASB 25 and 27.

We have prepared the Schedule of Funding Progress and Trend Information shown in the financial section of the Annual Report, and all supporting schedules including the Schedule of Active Member Valuation Data, the Solvency Test and the Analysis of Financial Experience shown in the actuarial section of the Annual Report. All historical information that references a valuation date prior to September 30, 2004 was prepared by the previous actuarial firm.

September 5, 2007
Board of Control
Page 2

This is to certify that the independent consulting actuary is a member of the American Academy of Actuaries and has experience in performing valuations for public retirement systems, that the valuation was prepared in accordance with principles of practice prescribed by the Actuarial Standards Board, and that the actuarial calculations were performed by qualified actuaries in accordance with accepted actuarial procedures, based on the current provisions of the Retirement Fund and on actuarial assumptions that are internally consistent and reasonably based on the actual experience of the Fund.

In our opinion the Fund is operating on an actuarially sound basis. Assuming that contributions to the Fund are made by the employer from year to year in the future at the rates recommended on the basis of the successive actuarial valuations, the continued sufficiency of the retirement fund to provide the benefits called for under the Fund may be safely anticipated.

The Table of Contents, which immediately follows, outlines the material contained in the report.

Summary of Actuarial Assumptions and Methods

The assumptions and methods used in the valuation were selected by the prior actuarial firm based on the actuarial experience study prepared as of September 30, 2000, submitted May 23, 2002, and adopted by the Board on June 5, 2002.

Investment Rate of Return: 8% per annum, compounded annually.

Salary Increases: 5% per annum, compounded annually.

Separations Before Retirement: Representative values of the assumed annual rates of death and disability are as follows:

<u>Age</u>	<u>Annual Rate (%) of</u>		
	<u>Death</u>		<u>Disability</u>
	<u>Male</u>	<u>Female</u>	
30	0.08	0.03	0.08
35	0.08	0.04	0.16
40	0.09	0.06	0.27

Rates of Retirement: 30% of members are assumed to retire in the first year of eligibility and 5% in each year thereafter. All remaining members are assumed to retire at age 70.

Deaths after Retirement: The rate of mortality after service retirement are based on the George B. Buck 1979 Table for males rated forward one year and the George B. Buck 1979 Table for females. Special mortality tables are used for the period after disability retirement.

Percent Married: 90% of members are assumed to be married.

Actuarial Method: Projected unit credit method. Gains and losses are reflected in the unfunded accrued liability.

Assets: Actuarial Value. The actuarial value of assets recognizes 20% of the difference between the market value of assets and the expected actuarial value of assets.

Summary of Plan Provisions as Interpreted for Valuation Purposes

The Judicial Retirement Fund (JRF) was established on September 18, 1973. The valuation considered amendments to the JRF through the valuation date. The following summary describes the main benefit and contribution provisions of the JRF as interpreted for the valuation.

Membership

Any justice of the Supreme Court, judge of the Court of Civil Appeals, judge of the Court of Criminal Appeals, judge of the Circuit Court, or officeholder of any newly created judicial office receiving compensation from the State Treasury became a member of the JRF if the member was holding office on the effective date of the Act and elected to come under its provisions. Any such justice or judge elected or appointed to the office after the effective date of the Act or any district or probate judge elected or appointed to office after October 10, 1975 or October 1, 1976, respectively, automatically becomes a member. Certain other district and probate judges as well as certain former county court judges, district attorneys, or assistant district attorneys serving as circuit judges and certain supernumerary judges and justices may also elect to become a member.

Credited Service

Credited service is service as a member plus certain periods of previous service credited in accordance with the provisions of the Act.

Benefits

Service Retirement Benefit

Condition of Benefit

A retirement benefit is payable upon request of any member who has:

- Completed 12 years of credited service and has attained age 65, or
- Completed 15 years of credited service and whose age plus service equals or exceeds 77, or
- Completed at least 18 years of credited service or three full terms as a judge or justice, or
- Completed 10 years of credited service and has attained age 70

However, a judge who became a member on or after July 30, 1979 or who is a district or probate judge must meet the following age and service requirement combinations in order to be eligible to retire:

- Completed 12 years of credited service and attained age 65, or
- Completed at least 15 years of credited service and attained age 60, and whose age plus service equals or exceeds 77
- Completed 10 years of credited service and attained age 70
- Completed 25 years of service or 24 years of service provided the member purchases one year of service prior to retirement, regardless of age.

Amount of Benefit

The service retirement benefit for a member is equal to:

- (a) For circuit or appellate judges who were members prior to July 30, 1979, 75% of the salary prescribed by law for the position from which the member retires.

RETIREMENT SYSTEMS OF ALABAMA

Actuarial Section

Judicial Retirement Fund

Summary of Plan Provisions (Continued) and Supporting Schedules

- (b) For circuit and appellate judges who assumed office on or after July 30, 1979, 75% of the member's salary at the time of separation from service.
- (c) For district judges, 75% of the position's salary immediately prior to retirement.
- (d) For probate judges, 75% of the member's salary at the time of separation from service.

Disability Retirement Benefit

Condition of Benefit

A disability retirement benefit is payable to any member who becomes permanently unable, physically or mentally, to carry out their duties on a full-time basis, provided the member has completed five or more years of credited service.

Amount of Benefit

The disability retirement benefit for a judge is equal to 25% of the salary prescribed by law for the position at the time of retirement from which the member retires on disability plus 10% of such salary for each year of credited service in excess of five years. The disability retirement benefit is subject to a 30% minimum and a 75% maximum of such salary. The retirement benefit for a circuit judge and for an appellant judge who assumed office prior to July 30, 1979, is adjusted as current salaries are adjusted.

Spousal Benefits

Condition of Benefit

Upon the death of an active, inactive, or retired member with at least 5 years of credited service, a death benefit is payable to the member's spouse.

Amount of Benefit

The death benefit for the spouse of a judge other than a district or probate judge consists of a yearly benefit equivalent to 3% of the salary prescribed by law for the position for each year of service of the former member, not to exceed 30% of such salary.

The death benefit for the spouse of a district judge consists of a yearly benefit equal to 3% of the position's salary prescribed by law at the time of death for each year of service not to exceed 30% of such salary.

For the spouse of a probate judge, the yearly benefit is equal to the greater of \$480 for each year of credited service to a maximum of 10 year, or 3% of the judge's salary at the time of their separation from service for each year of credited service not to exceed 30% of such salary.

The benefit is payable for the spouse's life or until remarriage.

Benefit Payable on Separation from Service

If a member terminates service and elects not to withdraw his or her contributions and accrued interest from the JRF, the member is eligible to receive any of the above benefits for which the member has sufficient credited service upon reaching an eligible retirement age.

A member terminating service prior to reaching eligibility for retirement benefits may elect to receive a refund of their accumulated contributions

and interest (the amount of accrued interest refundable to a District or Probate Judge is based upon the same rules and regulations applicable to similar refunds under ERS).

Member Contributions

Each member contributes 6% of salary.

State Contributions

The State makes contributions, which, in addition to the members' contributions, are sufficient to carry out the provisions of the Act.

Supporting Schedules
