The Boards of Control
Teachers' Retirement System of Alabama
Employees' Retirement System of Alabama
201 South Union Street
Montgomery, AL 36130

Dear Board Members:

It is with great pleasure that we submit the Comprehensive Annual Financial Report (CAFR) of the Retirement Systems of Alabama (RSA or Systems) for the fiscal year ended September 30, 2013. The Retirement Systems of Alabama includes the Teachers' Retirement System of Alabama (TRS), the Employees' Retirement System of Alabama (ERS), and the Judicial Retirement Fund (JRF). Each system is considered a component unit of the State of Alabama for financial reporting purposes, and, as such, the financial statements contained in this report are also included in the State of Alabama Comprehensive Annual Financial Report.

Responsibility for both the accuracy of the data, and the completeness and fairness of the presentation, including all disclosures, rests with the management of the Systems. Sufficient internal controls exist to provide reasonable assurance regarding the safekeeping of assets and fair presentation of the financial statements, supporting schedules, and statistical tables. We trust that you and the members of the Systems will find this report helpful in understanding your retirement system.

Administration and Plan History

The TRS, ERS, and JRF operate under common management and are collectively referred to as the Retirement Systems of Alabama. In addition to executive management, the TRS, ERS, and JRF share investment management, accounting, and information system services, the costs of which are allocated to the funds on an equitable basis. The TRS was established under the provisions of Act 419 of the Legislature of 1939 to provide benefits to qualified persons employed by State-supported educational institutions. The ERS was established under the provisions of Act 515 of the Legislature of 1945 to provide benefits to State employees, State police, and, on an elective basis, to qualified persons of cities, towns, and quasi-public organizations. The JRF was established under the provisions of Act 1163 of the Legislature of 1973 to provide benefits to qualified judges and justices. Additional information regarding the administration and history of each system, including laws establishing each plan and services provided, can be found in the *Financial Section - Notes to the Combined Financial Statements* portion of this report.

Financial Information

Accounting Method - As required by Generally Accepted Accounting Principles (GAAP), the financial information of the TRS, ERS, and JRF is reported on the accrual basis of accounting. Revenues are recognized when earned and expenses are recognized when the corresponding liability is incurred. Investments are reported at fair value.

Internal Controls - The management of the RSA is responsible for maintaining the system of internal controls (system). The system provides management with reasonable, but not absolute, assurance regarding the safeguarding of assets against loss or unauthorized disposition and the reliability of the financial records from which the financial reports are prepared. The concept of reasonable assurance recognizes that the cost of a control should not exceed the resulting benefits.

Summary Comparative Data – Management’s Discussion and Analysis (MD&A) includes a narrative introduction, an overview of the financial statements, including the notes and required supplementary information, and summary comparative data for fiscal years 2013 and 2012. Also, an analysis of significant variances between fiscal years 2013 and 2012 is provided in the MD&A.

Plan Financial Condition

The funding objective of the RSA pension trust funds is to meet long-term benefit requirements through contributions, which remain relatively level as a percent of member payroll over time, and through investment earnings. Historical information concerning funding progress is presented in the *Required Supplementary Information* - “Schedule of Funding Progress” on page 46.

At the date of the latest actuarial valuations (9/30/2012), the number of participants in the TRS was 235,165, ERS participants totaled 137,820, and JRF participants totaled 729. The following table compares the funded status as of September 30, 2012 and 2011:

Funded Status (%)			
<u>System</u>	<u>9/30/2012</u>	<u>9/30/2011</u>	<u>% Increase/ (Decrease)</u>
TRS	66.5	67.5	(1.0)
ERS	65.7	65.8	(0.1)
JRF	61.6	59.9	1.7

Investment Activity

Total investments for the RSA increased in fiscal year 2013, primarily due to increases in the fair value of investments. Investment balances for the TRS, ERS, and JRF at September 30, 2013, were \$20.6 billion, \$10.0 billion, and \$253.0 million, respectively, compared to investment balances for the TRS, ERS, and JRF at September 30, 2012, of \$18.7 billion, \$9.1 billion, and \$233.1 million, respectively. Total pension fund investments managed by the RSA increased from \$28.0 billion at September 30, 2012, to \$31.2 billion at September 30, 2013, an 11.4% increase.

Interest and dividend income for the TRS, ERS, and JRF for the fiscal year ended September 30, 2013, was \$638.8 million, \$310.2 million, and \$6.9 million, respectively, compared to \$634.7 million, \$310.7 million, and \$6.7 million, respectively, for the fiscal year ended September 30, 2012. The increase in fair value of investments for the TRS, ERS, and JRF for the fiscal year ended September 30, 2013, was \$2.1 billion, \$984.7 million, and \$25.2 million, respectively, compared to the increase in fair value of investments of \$2.3 billion, \$1.1 billion, and \$32.1 million, respectively, for the fiscal year ended September 30, 2012. Additional information concerning investments, including investment policies and procedures, is located in the Investment Section.

Management’s Discussion and Analysis

GASB Statement No. 34 requires that management provide a narrative introduction, overview, and analysis to accompany the Financial Statements in the form of Management’s Discussion and Analysis (MD&A). This letter of transmittal is intended to complement the MD&A and should be read in conjunction with it. The MD&A can be found immediately following the Independent Auditors’ Report.

Professional Services

Professional consultants are appointed by the Boards of Control to perform professional services that are essential to the effective operation of the TRS, ERS, and JRF. The certification letters from the independent actuary are included in this report. The professional consultants appointed by the Boards of Control are listed on page 10 of this report.

Financial Statement Audit

Carr, Riggs and Ingram, LLC, Certified Public Accountants, issued an unqualified (“clean”) opinion on the RSA’s financial statements for the fiscal year ended September 30, 2013. The independent auditors’ report is located at the front of the financial section of this report.

Highlights and Initiatives

Market performance during fiscal year 2013 was fairly stable, with equity markets performing well over the course of the year; domestic and international equities returned over 21% during this time period. Fixed income markets did not experience the significant gains of the past three years as interest rates were somewhat volatile. Returns within this sector were essentially flat for the fiscal year. Markets have continued to be somewhat reactionary around macroeconomic events as they have been the last few years, but we continue to see fundamentals influencing performance as well as the improvement of company earnings and balance sheets.

Last fiscal year, the Robert Trent Jones Golf Trail celebrated its 20th anniversary. Now, this year, 55 Water Street, New York City’s largest office tower, will celebrate its 20th anniversary with the RSA. This anniversary is particularly meaningful as the effects of Hurricane Sandy and the flooding that ensued are still being felt throughout the area. The New York City staff worked tirelessly in the weeks after “Sandy” to get the building reopened.

Since 1993, 55 Water has been one of the RSA’s strongest performing assets. This investment is currently valued at \$1.4 billion and generated roughly \$70 million in net profit during 2012, prior to “Sandy.” There is no debt on the building and is currently 93.3% leased. 55 Water is the second largest private office building in America.

Renovation continues on the historic Van Antwerp Building in Mobile, which the RSA purchased early in the fiscal year. This building is ten stories high and over 58,000 square feet. BBVA Compass will relocate its Mobile headquarters to the 105-year-old building in mid-2014, occupying three floors. The Van Antwerp Building is one of Mobile’s oldest structures and joins RSA’s stable of Port City holdings that include the RSA Battle House Tower, the RSA Bank Trust Building, the Renaissance Mobile Riverview Plaza Hotel & Spa, and The Battle House Renaissance Mobile Hotel & Spa.

Lastly, several of the RSA’s properties were honored again this year by earning national recognition for guest satisfaction. Marriott International, *Travel + Leisure* magazine, and *U.S News and World Report* all ranked several of the RSA hotels and resorts at or near the top of the list in their respective annual surveys.

Awards

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the Retirement Systems of Alabama for its comprehensive annual financial report for the fiscal year ended September 30, 2012. The Certificate of Achievement is a prestigious national award, which recognizes conformance with the highest standards for preparation of state and local government financial reports.

In order to be awarded a Certificate of Achievement, a government unit must publish an easily readable and efficiently organized comprehensive financial report whose contents conform to program standards. Such reports must satisfy both generally accepted accounting principles and applicable legal requirements. A Certificate of Achievement is valid for a period of one year only. We believe our current report continues to conform to the Certificate of Achievement Program requirements, and we are submitting it to the GFOA.

The Retirement Systems received the Public Pension Coordinating Council (PPCC) Recognition Award for Funding 2013. The award recognizes organizations that meet professional standards for plan funding as set forth in the Public Pension Standards.

Acknowledgments

The compilation of this report reflects the combined effort of the staff under the leadership of the Boards of Control. It is intended to provide extensive and reliable information as a basis for making management decisions, determining compliance with legal provisions, and determining responsible stewardship of the funds of the TRS, ERS, and JRF.

We would like to take this opportunity to express our gratitude to the staff, the Boards of Control, the consultants, the Legislature, and to the many people who have worked so diligently through continued cooperative efforts to assure the successful operation and financial soundness of the TRS, ERS, and JRF.

Sincerely,

Diane E. Scott

Component Units of the State of Alabama
Comprehensive Annual Financial Report

FINANCIAL SECTION

INDEPENDENT AUDITORS' REPORT

Boards of Control
Teachers' Retirement System of Alabama
Employees' Retirement System of Alabama
Judicial Retirement Fund

Report on the Combined Financial Statements

We have audited the accompanying combined financial statements of the Retirement Systems of Alabama (consisting of the Teachers' Retirement System of Alabama, the Employees' Retirement System of Alabama, and the Judicial Retirement Fund, component units of the State of Alabama), as of and for the year ended September 30, 2013, and the related notes to the combined financial statements, which collectively comprise the Retirement System of Alabama's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these combined financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the combined financial statements referred to above present fairly, in all material respects, the net position of the Retirement System of Alabama, as of September 30, 2013, and the changes in net position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Prior-Year Comparative Information

The financial statements include partial prior-year comparative information. Such information does not include all of the information required to constitute a presentation in conformity with accounting principles generally accepted in the United States of America. Accordingly, such information should be read in conjunction with the Retirement System of Alabama's financial statements for the year ended September 30, 2012, from which such partial information was derived.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and the schedules of funding progress and employer contributions on pages 14 – 18 and 46 – 48 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplemental and Other Information

Our audit was conducted for the purpose of forming an opinion on the combined financial statements that collectively comprise the Retirement System of Alabama's basic financial statements. The introductory section, investment section, actuarial section, statistical section, and supplemental information included on pages 49 – 51 are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The supplemental information included on pages 49 – 51 are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the supplemental information included on pages 49 – 51 is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory, investment, actuarial, and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

Carri Riggs & Ingram, L.L.C.

January 15, 2014
Montgomery, Alabama

The Retirement Systems of Alabama (RSA) is comprised of the Teachers' Retirement System (TRS), Employees' Retirement System (ERS), and Judicial Retirement Fund (JRF). The following discussion provides an overview of the financial position and results of operation for the RSA as of and for the year ended September 30, 2013. For more detailed information, please refer to the financial statements, including the Notes to the Combined Financial Statements and the Required Supplementary Information.

Financial Statements and Required Supplementary Information

The financial statements (statements) include the Combining Statement of Fiduciary Net Position and the Combining Statement of Changes in Fiduciary Net Position. The Notes to the Combined Financial Statements are considered an integral part of the financial statements. The statements are prepared using the economic resources measurement focus and accrual basis of accounting. Revenues are recognized when earned, pursuant to plan requirements, and expenses are recognized when incurred, regardless of when cash is received or expended. Investments are reported at fair value.

Combining Statement of Fiduciary Net Position – Includes all assets and liabilities of the RSA and provides a snapshot of the financial position of the RSA as of the end of the fiscal year. Assets less liabilities results in the net position restricted for pension benefits at the end of the fiscal year.

Combining Statement of Changes in Fiduciary Net Position – Reports all additions and deductions of the RSA for the fiscal year. Additions primarily consist of employer contributions, employee contributions, and investment income. Deductions are principally made up of retirement allowance payments. Additions minus deductions provide the change in fiduciary net position for the fiscal year. The change in fiduciary net position plus the beginning fiduciary net position results in the fiduciary net position at the end of the fiscal year.

The Notes to the Combined Financial Statements include plan descriptions, a summary of significant accounting policies, a description of legally required reserves and corresponding reserve balances at year-end, credit risk disclosures for cash and investments, concentration of investments disclosures, securities lending disclosures, funded status, and additional actuarial information relevant to the latest actuarial valuations.

The Required Supplementary Information following the Notes to the Combined Financial Statements includes a Schedule of Funding Progress and a Schedule of Employer Contributions. The Schedule of Funding Progress provides trend data on the level of funding for the TRS, ERS, and JRF plans. The Schedule of Employer Contributions provides trend data on the annual required employer contributions and the percentage actually contributed.

Management's Discussion and Analysis (Continued)

Financial Analysis

- Primarily all cash on hand at September 30, 2013, was held for administrative expenses.
- In the Summary Combining Comparative Statement of Fiduciary Net Position, receivables consist of employee contributions, employer contributions, interest, dividends, and real estate receivables at September 30, 2013.
- Investment sales receivable and investment purchases payable occur as a result of trade date accounting. The decrease in the receivable and payable for fiscal year 2013 was due to the value of securities traded in the current fiscal year and settling in the following fiscal year being smaller than the value of the securities traded in the previous fiscal year but settled in the current fiscal year.
- The RSA's investment portfolio presented in percentages by investment type:

	<u>TRS</u>	<u>ERS</u>	<u>JRF</u>
Equity	65.46%	63.81%	72.76%
Fixed	24.99%	26.61%	26.03%
Real Estate	9.55%	9.58%	1.21%
Total	<u>100.00%</u>	<u>100.00%</u>	<u>100.00%</u>

- Employee contributions increased as a result of Act 2011-676 which increased employee contribution rates by an additional 0.25% of earnable compensation effective October 1, 2012. The employee contribution rate increased by a total of 2.50% of earnable compensation over the two year period ended September 30, 2013. ERS local participating employers have the option to adopt the new employee contribution rates.
- Employer contributions increased as a result of higher employer contribution rates for fiscal year 2013. The employer contribution rates for fiscal year 2013 are in the table below. ERS local participating employer contribution rates differ for each employer.

	<u>Tier 1</u>	<u>Tier 2</u>
TRS	10.08%	9.44%
ERS - State Employees	10.12%	10.04%
ERS - State Police	31.61%	25.32%
JRF	32.06%	-

- During fiscal year 2013, returns on investments of the TRS, ERS, and JRF were 14.93%, 14.60%, and 14.05%, respectively. The returns were calculated by State Street Bank.
- During fiscal year 2013, net securities lending income decreased by 9%. This was primarily driven by the lower yields on the collateral pools. Year over year the reinvestment spread on the collateral pools dropped approximately 15 basis points or 54%. Additionally, the loan balances for U.S. government and non-U.S. securities were lower by approximately \$308 million in fiscal year 2013. Also, in 2012 both Facebook and Groupon launched their Initial Public Offering (IPO) which created demand for securities lending; however, there were no large IPO's during fiscal 2013.
- Retirement allowance payments increased due to the addition of the members who retired in fiscal year 2013. There were no cost of living adjustments granted for fiscal year 2013.

Funding Status

The primary objective of a retirement system is to accumulate sufficient assets to pay benefits to participants when due. The principal sources of assets to fund benefits include investment income and member and employer contributions. A five-year smoothing method is used in actuarially valuing assets to limit fluctuations in the contributions from year to year. The actuarial value of assets was set equal to the market value of assets on September 30, 2012. Five-year smoothing will commence again in future years. Beginning with the actuarial valuations as of September 30, 2012, the valuation liabilities are calculated using a smoothed interest rate method. The Boards of Control adopted the valuation interest rate smoothing methodology in May 2013.

The ratio of actuarial assets to actuarial liabilities provides an excellent indication as to whether sufficient assets are being accumulated to pay benefits when due. The following bar graph provides comparisons of the funded ratio (actuarial assets to actuarial liabilities) as of the last two valuations for each System (September 30, 2012 and September 30, 2011). The funded ratios of TRS and ERS decreased slightly in the most recent valuations. The funded ratio of JRF increased. As reflected by the following graph, the TRS, ERS, and JRF continue to operate on an actuarially sound basis and accumulated funds are sufficient to continue to provide benefits as they become due.

Financial Highlights

- Net assets held in trust of \$31.2 billion at September 30, 2013, were available to meet future benefit payments.
- The funding level (actuarial value of assets as a percentage of actuarial accrued liabilities) as of the latest actuarial valuations was 66.5% for the TRS, 65.7% for the ERS, and 61.6% for the JRF.
- Act 2012-377 created a Tier 2 Defined Benefit plan for all TRS and ERS members hired on or after January 1, 2013. New members pay lower contribution rates, but will not be able to draw a retirement benefit until age 62. State Police, law enforcement, correctional officers, and firefighters will be able to draw a benefit at age 56. The Tier 2 Defined Benefit plan applies to all ERS local participating employers.

RETIREMENT SYSTEMS OF ALABAMA

Financial Section

Notes to the Combined Financial Statements For the Fiscal Year Ended September 30, 2013

(Dollar Amounts in Thousands)

1) PLAN DESCRIPTION

The Teachers' Retirement System (TRS), Employees' Retirement System (ERS), and Judicial Retirement Fund (JRF) operate under common management and are collectively referred to as the Retirement Systems of Alabama (RSA or Systems). In addition to executive management, the TRS, ERS, and JRF share investment management, accounting, and information system services, the costs of which are allocated to the funds on an equitable basis.

The TRS, a cost-sharing multiple-employer public employee retirement plan, was established as of September 15, 1939, under the provisions of Act 419 of the Legislature of 1939 for the purpose of providing retirement allowances and other specified benefits for qualified persons employed by State-supported educational institutions. The responsibility for the general administration and operation of the TRS is vested in its Board of Control.

The ERS, an agent multiple-employer public employee retirement plan, was established as of October 1, 1945, under the provisions of Act 515 of the Legislature of 1945. The purpose of the ERS is to provide retirement allowances and other specified benefits for state employees, State Police, and on an elective basis, to all cities, counties, towns, and quasi-public organizations. The responsibility for the general administration and operation of the ERS is vested in its Board of Control.

The JRF, a cost-sharing multiple-employer public employee retirement plan, was established as of September 18, 1973, under the provisions of Act 1163 of the Legislature of 1973 for the purpose of providing retirement allowances and other specified benefits for any Justice of the Supreme Court of Alabama, Judge of the Court of Civil Appeals, Judge of the Court of Criminal Appeals, Judge of the Circuit Court, or office holder of any newly created judicial office receiving compensation from the State Treasury. Act 1205 of the Legislature of 1975 supplemented the provisions of Act 1163 and enlarged the scope and coverage of the JRF to include District and Probate Judges. The responsibility for the general administration and operation of the JRF is vested in the Board of Control of the ERS.

At September 30, 2013, the number of participating units in each system was as follows:

	<u>TRS</u>	<u>ERS</u>	<u>JRF</u>
Cities	-	290	-
Counties	-	65	67
Other Public Entities	-	518	-
Universities	13	-	-
Post-Secondary Institutions	31	-	-
City and County Boards of Education	133	-	-
State Agencies & Other	<u>32</u>	<u>1</u>	<u>1</u>
Totals	<u>209</u>	<u>874</u>	<u>68</u>

At the date of the latest actuarial valuation as presented in the Notes to the Required Supplementary Information, membership consisted of:

	<u>TRS</u>	<u>ERS</u>	<u>JRF</u>
Retirees and beneficiaries currently receiving benefits:

Totals	<u>235,165</u>	<u>137,820</u>	<u>729</u>

State law establishes retirement benefits as well as death and disability benefits and any ad hoc increase in postretirement benefits for the TRS, ERS, and JRF. Benefits for TRS and ERS members vest after 10 years of credited service. Teachers and state employees who retire after age 60 (52 for State Police) with 10 years or more of credited service or with 25 years of service (regardless of age) are entitled to an annual retirement benefit, payable monthly for life. Local employees who retire after age 60 with 10 years or more of credited service or with 25 or 30 years of service (regardless of age), depending on the particular entity's election, are entitled to an annual retirement benefit, payable monthly for life. Service and disability retirement benefits are based on a guaranteed minimum or a formula method, with the member receiving payment under the method that yields the highest monthly benefit. Under the formula method, members of the TRS and ERS (except State Police) are allowed 2.0125% of their average final compensation (highest 3 of the last 10 years) for each year of service. State Police are allowed 2.875% for each year of State Police service in computing the formula method.

Act 377 of the Legislature of 2012 established a new tier of benefits (Tier 2) for members hired on or after January 1, 2013. Tier 2 TRS and ERS members are eligible for retirement after age 62 (56 for State Police) with 10 years or more of credited service and are entitled to an annual retirement benefit, payable monthly for life. Service and disability retirement benefits are based on a guaranteed minimum or a formula method, with the member receiving payment under the method that yields the highest monthly benefit. Under the formula method, Tier 2 members of the TRS and ERS (except State Police) are allowed 1.65% of their average final compensation (highest 5 of the last 10 years) for each year of service. State Police are allowed 2.375% for each year of state police service in computing the formula method.

The JRF benefits vest from five to eighteen years. Except for justices or judges who were either disabled, elected prior to July 30, 1979, or have at least 25 years of credited service, no justice or judge is eligible to receive judicial service retirement pay prior to attaining age 60. Service retirement benefits for justices and judges are dependent upon the particular office held in the judicial branch of government. A retirement benefit is payable upon the request of any member who has: (1) 25 years of credited service (regardless of age), (2) completed 12 years of credited service and has attained age 65, (3) completed 15 years of credited service and whose age plus service equals or exceeds 77, (4) completed 10 years of credited service and has attained age 70 or (5) been elected prior to July 30, 1979, and has 18 years of service (regardless of age). A member eligible to retire who has not requested his or her

RETIREMENT SYSTEMS OF ALABAMA

Financial Section

Notes to the Combined Financial Statements For the Fiscal Year Ended September 30, 2013

(Dollar Amounts in Thousands)

retirement benefit to commence at the end of the term in which the member's 70th birthday occurs is entitled only to the refund of his or her contributions (except for members with at least 25 years of credited service). The service retirement benefit for circuit, appellate, and probate judges is 75% of the member's salary at the time of separation from service. The service retirement benefit for a district judge is 75% of the position's salary immediately prior to retirement.

Covered members of the TRS and ERS (except State Police and certified law enforcement, correctional officers, and firefighters) contributed 5% of earnable compensation to the TRS and ERS as required by statute until September 30, 2011. From October 1, 2011, to September 30, 2012, covered members of the TRS and ERS (except State Police and certified law enforcement, correctional officers, and firefighters) were required by statute to contribute 7.25% of earnable compensation. Effective October 1, 2012, covered members of the TRS and ERS (except State Police and certified law enforcement, correctional officers, and firefighters) are required by statute to contribute 7.50% of earnable compensation. JRF members and certified law enforcement, correctional officers, and firefighters of the TRS and ERS contributed 6% of earnable compensation as required by statute until September 30, 2011. From October 1, 2011, to September 30, 2012, JRF members and certified law enforcement, correctional officers, and firefighters of the TRS and ERS were required by statute to contribute 8.25% of earnable compensation. Effective October 1, 2012, JRF members and certified law enforcement, correctional officers, and firefighters of the TRS and ERS are required by statute to contribute 8.50% of earnable compensation. State Police members of the ERS contribute 10% of earnable compensation. ERS local participating employers are not required by statute to increase contribution rates for their members.

Tier 2 covered members of the TRS and ERS (except State Police and certified law enforcement, correctional officers, and firefighters) contribute 6% of earnable compensation to the TRS and ERS as required by statute. Tier 2 certified law enforcement, correctional officers, and firefighters of the TRS and ERS are required by statute to contribute 7% of earnable compensation. Tier 2 State Police members of the ERS contribute 10% of earnable compensation. These contribution rates are the same for Tier 2 covered members of ERS local participating employers.

2) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Basis of Accounting

The TRS, ERS, and JRF financial statements are prepared using the economic resources measurement focus and accrual basis of accounting. Contributions are recognized as revenues when earned, pursuant to plan requirements. Benefits and refunds are recognized when due and payable in accordance with the terms of the plans. Expenses are recognized when the corresponding liability is incurred, regardless of when the payment is made. The accompanying financial statements are prepared in accordance with requirements of the Governmental Accounting Standards Board (GASB). Under these requirements, the TRS, ERS, and JRF are considered component units of the State of Alabama and are included in the State's Comprehensive Annual Financial Report. Subsequent events were evaluated by management through the date the financial statements were issued.

B. Investments

The Boards of Control of the Systems have the responsibility and authority to invest and reinvest available funds, through the Secretary-Treasurer (CEO) and Investment Committee, in bonds, mortgage-backed securities, common and preferred stock, and other investment vehicles with the care, skill, prudence, and diligence under the circumstances then prevailing that a prudent person acting in a like capacity and familiar with such matters would use. All plan assets are carried at fair value. Securities traded on national or international exchanges are valued at the

last reported sales price at current exchange rates. Short-term investments are reported at cost, which approximates fair value. Mortgage-backed securities are reported based on future principal and interest payments discounted at the prevailing interest rate for similar instruments. The fair value of real estate investments is based on independent appraisals or cost, when cost approximates fair value. Generally, private placements are valued based on the selling price of similar investments sold in the open market. In those instances where there are no similar investments sold in the open market, an independent appraisal is performed to determine the fair value of the private placements.

C. Comparative Combining Statements

The basic financial statements include the prior year Combining Statement of Fiduciary Net Position and Combining Statement of Changes in Fiduciary Net Position (Statements) for comparative purposes only. Prior year Note Disclosures are not included. Therefore, the prior year basic financial statement presentation does not meet the minimum level of detail required for a presentation in conformity with generally accepted accounting principles. Accordingly, the prior year Statements should be read in conjunction with the RSA's prior year financial report from which the prior year Statements were derived.

D. Interfund Transfers

Interfund transfers result from transfers of members between retirement systems.

E. Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts and disclosure in the financial statements. Actual results may differ from these estimates.

3) LEGALLY REQUIRED RESERVES

A. Annuity Savings

Member contributions are credited to the Annuity Savings account. Interest at 4% per annum is credited to the annuity savings account of each member on the basis of the average of the beginning and end of year balances (as of June 30 for the TRS and September 30 for the ERS and JRF).

When a member withdraws from service prior to becoming vested, the member's accumulated contributions and a portion of accumulated interest credited to the Annuity Savings account are returned to the member. The portion of accumulated interest that, by law, is not payable to the member is transferred to the Expense fund.

When a TRS or ERS member dies prior to becoming eligible for retirement, the member's accumulated contributions and accumulated interest credited to the Annuity Savings account are returned to the member's designated beneficiary. If the pre-retirement death benefit defined below is not payable, an additional death benefit equal to the member's accumulated contributions, up to five thousand dollars, is paid from the Pension Accumulation account to the member's beneficiary.

When a member retires or when a survivor allowance becomes payable, the amount of the member's accumulated contributions and accumulated interest is transferred from the Annuity Savings account to the Pension Accumulation account.

(Dollar Amounts in Thousands)

B. Pension Accumulation

The Pension Accumulation account is credited with contributions made by the employer and net investment income. The lump sum death benefit is paid from this account when a TRS or ERS member dies prior to becoming eligible for the pre-retirement death benefit or retirement. Periodic interest representing member's earnings is transferred from the Pension Accumulation account to the Annuity Savings account. When a TRS, ERS, or JRF member retires or when a survivor allowance becomes payable, the member's accumulated contributions and accumulated interest is credited to the Pension Accumulation account, and all monthly benefit payments are paid from this account.

C. Pre-retirement Death Benefit

The Pre-retirement Death Benefit (PRDB) account (established October 1, 1983, under the provisions of Act 616 of the Legislature of 1983) is credited with contributions made by TRS and ERS employers and investment income on such funds. The pre-retirement death benefit (in the form of group term life insurance) is paid in addition to the return of member contributions upon the death of an active TRS or ERS member who has completed at least one year of active membership in the system and whose date of death was within 180 days of such member's last date of actual service. However, a surviving spouse beneficiary of a deceased member who was eligible for service retirement may elect a survivor allowance in lieu of this benefit. The pre-retirement death benefit is equal to the annual earnable compensation of the member as reported to the System for the preceding year ending June 30 for the TRS and September 30 for the ERS. There is no PRDB available for JRF members.

D. Term Life Insurance

The Alabama Teacher's Group Term Life Insurance Plan (established October 1, 1987) is credited with a portion of the employer contributions. All active contributing members of the TRS are covered by this plan. Contingent on availability of funds, upon death, a benefit is paid to the designated beneficiary of an insured member of the TRS. Beneficiaries of full-time employees receive fifteen thousand dollars while beneficiaries of part-time employees receive a prorated amount of fifteen thousand dollars.

E. Expense

The Expense fund is used to pay the administrative expenses of the RSA. A portion of the employer contributions and the interest not payable upon member withdrawal provide the funding of the expense fund. The majority of expenses are directly identifiable as expenses of the TRS, ERS, or JRF. As discussed in Note 1, certain administrative salaries and other expenses are shared on an equitable basis between the TRS and ERS.

F. Deferred Retirement Option Plan (DROP)

The DROP was established for election to participate on or after June 1, 2002, under the provisions of Act 23 of the Legislature of 2002. Eligible members may elect to retire, and, in lieu of immediate withdrawal from service, continue employment for a period of three to five years. The retirement allowance, employee contributions, and interest earned are accumulated in an account for the benefit of the member. At the end of participation, the account balance is paid to the member. DROP participation is an option available to eligible members that have at least 25 years of service (exclusive of sick leave), are at least 55 years of age, and are eligible for retirement. See the actuarial section for additional information.

The DROP was repealed effective March 24, 2011, by Act 27 of the Legislature of 2011. Applications received by the RSA or postmarked by March 24, 2011, were accepted for DROP participation if the member was age and service eligible. The effect of Act 27 is that no new participants were allowed to enter the DROP with an effective participation date after June 1, 2011.

G. Reserves

The reserves of the RSA are included as part of the net position restricted for pension benefits in the accompanying Combining Statement of Fiduciary Net Position and are funded to the full extent required by statute. The reserve balances as of September 30, 2013, are as follows:

	<u>TRS</u>	<u>ERS</u>	<u>JRF</u>
Annuity Savings	\$ 4,261,269	\$ 2,363,600	\$ 37,366
Pension Accumulation	15,643,908	7,320,496	217,136
Pre-retirement Death Benefit	43,035	29,649	-
Term Life Insurance	14,453	-	-
Deferred Retirement Option Plan	736,562	328,871	-
Plant Fund	96,071	47,760	-
Expense	25,074	1,564	1,858
Net Position at 9/30/2013	<u>\$ 20,820,372</u>	<u>\$ 10,091,940</u>	<u>\$ 256,360</u>

4) CASH

Cash consists of deposits held by the State Treasurer in the respective retirement systems' name. Deposits are entirely insured by the Federal Deposit Insurance Corporation or protected under the Security for Alabama Funds Enhancement (SAFE) Program. The *Code of Alabama 1975*, as amended, requires all State organizations to participate in the SAFE Program. The SAFE Program is a multiple financial institution collateral pool. The SAFE Program requires all public funds to be deposited in a financial institution designated by the State Treasurer as a qualified public depository. Each qualified public depository is required to pledge collateral in accordance with the rules established by the SAFE Board of Directors. In the event that a qualified public depository defaults or becomes insolvent and the pledged collateral is insufficient to satisfy the claims of public depositors, the *Code of Alabama 1975, Section 41-14A-9(3)* authorizes the State Treasurer to make assessments against the other qualified public depositories in the pool so that there will be no loss of public funds. Virtually all cash on hand at September 30, 2013, was held for administrative expenses.

5) INVESTMENTS

A. Investment Risks

Investments are subject to certain types of risks, including interest rate risk, custodial credit risk, credit quality risk, foreign currency risk, and concentration of credit risk. The following describes those risks and the RSA's policies regarding those risks:

Interest Rate Risk – The fair value of fixed-maturity investments fluctuates in response to changes in market interest rates. Increases in prevailing interest rates generally translate into decreases in fair value of those instruments. There is no stated limitation on the duration level of the fixed income portfolio; however, this level is assessed on a regular basis to determine if adjustments are needed. The fair value of interest sensitive instruments may also be affected by the creditworthiness of the issuer, prepayment options, relative values of alternative investments, and other general

RETIREMENT SYSTEMS OF ALABAMA

Financial Section

Notes to the Combined Financial Statements For the Fiscal Year Ended September 30, 2013

(Dollar Amounts in Thousands)

market conditions. Certain fixed maturity investments have call provisions that could result in shorter maturity periods.

Custodial Credit Risk – For an investment, custodial credit risk is the risk that an entity will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party if the counterparty fails. The RSA's custodial credit risk policy requires the custodial agent to hold or direct its agents or sub custodians to hold, for the account of the RSA, all securities and other non-cash property other than securities in the Federal Reserve book-entry system, in a clearing agency which acts as a securities depository, or in another book-entry system. The RSA's safekeeping agent holds all investments of the RSA in the RSA's name with the exception of securities purchased with securities lending cash collateral.

Credit Quality Risk – Nationally recognized statistical rating organizations provide ratings of debt securities' quality based on a variety of factors, such as the financial condition of the issuers, which provide investors with some idea of the issuer's ability to meet its obligations. Domestic fixed-maturity investments may consist of rated or non-rated securities. There are no stated limitations on the credit quality of the fixed income portfolio; however, ratings are assessed on a regular basis. The Systems may hedge against the possible adverse effects of currency fluctuations on each System's portfolio of international fixed income obligations when it is considered appropriate. Short-term investments may consist of commercial paper rated at least A-2 and/or P-2, repurchase agreements, short-term U.S. securities, and other money market investments.

Foreign Currency Risk – The risk that changes in exchange rates will adversely affect the fair value of an investment. In order for an international security to be eligible for purchase by the Systems, the issuing company must be incorporated in a country whose debt securities are eligible for purchase and the fair value of the aggregate outstanding equity of the issuing company must be at least \$100 million.

Concentration of Credit Risk – The investment policies limit the aggregate amount that can be invested in each class of investments. The policy limits are as follows:

- Domestic Fixed Income – Limited to 50% of the fair value of the aggregate portfolio for each System.
- International Fixed Income – Limited to 10% of the fair value of each System's total portfolio.
- Domestic Equity – Limited to 65% of the fair value of each System's aggregate portfolio.
- International Equity – The aggregate fair value of international equities is limited to 25% of the aggregate fair value of each System's total portfolio. Also, each System may not purchase or hold more than 5% of any class of the outstanding stock of a company.
- Real Estate – The range may not exceed 15% of the book value of each System's portfolio.
- Alternative Investments (mezzanine financing, LBO's, venture capital, limited partnerships, futures, commodities and derivative investments) – Limited to 10% of the book value of each System's aggregate portfolio.
- Short-term Investments – Limited to 20% of the fair value of each System's aggregate portfolio.

The following tables provide information as of September 30, 2013, concerning the fair value of investments, interest rate risk, and foreign currency risk:

B. Concentration of Investments

As of September 30, 2013, the TRS and ERS owned debt and equity securities of Raycom Media Corporation which represented approximately 8.10% of the TRS investments and 8.91% of the ERS investments.

C. Securities Lending Program

The TRS, ERS, and JRF are authorized by the Boards of Control to participate in a securities lending program. The Systems' custodian, State Street Bank and Trust Company (State Street), administers the program. Certain securities from the TRS, ERS, and JRF are loaned to borrowers approved by the Systems for collateral that will be returned for the same type of securities. Approved borrowers of securities provide acceptable collateral in the form of cash (U. S. and foreign currency), any other assets permissible under Rule 15c3-3 under the Exchange Act of 1934, U. S. and non U.S. equities and such other collateral as the parties may agree to in writing from time to time. All security loans are open loans and can be terminated on demand by the TRS, ERS, JRF, or borrower. The initial collateral received shall have (depending on the nature of the loaned securities and the collateral received) a value of 102% or 105% of the fair value of the loaned securities, or such other value, but not less than 102% of the fair value of the loaned securities, as may be applicable in the jurisdiction in which such loaned securities are customarily traded. Pursuant to the terms of the applicable securities loan agreement, State Street shall, in accordance with State Street's reasonable and customary practices, mark loaned securities and collateral to their fair value each business day based upon the fair value of the collateral and the loaned securities at the close of the business day employing the most recently available pricing information and shall receive and deliver collateral in order to maintain the value of the collateral at no less than 100% of the fair value of the loaned securities.

The TRS, ERS, and JRF cannot pledge or sell collateral securities received unless the borrower defaults. Cash collateral is invested in the State Street Quality D Short-term Investments Fund (QDF). The collateral fund is separated into two pools, a liquidity pool and a duration pool. This split allows greater flexibility in managing the available liquidity in the investment in the fund and the outstanding balance of securities on loan.

The following describes the QDF's guidelines. The QDF's Investment Manager (State Street Bank) shall maintain the dollar-weighted average maturity of QDF in a manner that the Investment Manager believes is appropriate to the objective of QDF; provided, that (i) in no event shall any eligible security be acquired with a remaining legal final maturity (i.e., the date on which principal must be repaid) of greater than 18 months, (ii) the Investment Manager shall endeavor to maintain a dollar-weighted average maturity of the QDF not to exceed 75 calendar days, and (iii) the Investment Manager shall endeavor to maintain a dollar-weighted average maturity to final of the QDF not to exceed 180 calendar days. At the time of purchase (i) all eligible securities with maturities of 13 months or less shall (x) be rated at least A1, P1 or F1 by at least any two of the following nationally recognized statistical rating organizations: Standard & Poor's Corp. ("S&P"), Moody's Investor Services, Inc. ("Moody's"), or Fitch, Inc. ("Fitch"), or (y) be determined by the Investment Manager to be of comparable quality and (ii) all eligible securities with maturities in excess of 13 months shall (x) be rated at least A-, A3 or A- by at least any two of S & P, Moody's or Fitch, or (y) be determined by the Investment Manager to be of comparable quality. The QDF may invest up to 10% of its assets at a time of purchase in commingled vehicles managed by State Street Global Advisors or its affiliates that conform to the Investment Policy Guidelines. The QDF duration pool includes all asset-backed securities (regardless of maturity) and securities of any type with a remaining maturity of 91 days or greater. Each QDF investor owns a specified percentage interest in the duration pool which is redeemable only in kind, not in cash. The QDF duration pool will not make additional investments.

As of September 30, 2013, the average term of the loans secured by QDF was 24, 17, and 20 days, respectively for the TRS, ERS, and JRF. Cash collateral investments in the QDF are matured as needed to fulfill loan obligations. There is no direct matching of the maturities of the loans with the investments made with cash collateral.

RETIREMENT SYSTEMS OF ALABAMA

Financial Section

Notes to the Combined Financial Statements For the Fiscal Year Ended September 30, 2013

(Dollar Amounts in Thousands)

At September 30, 2013, the fair value of the securities on loan was \$2,525,183, \$1,170,527, and \$37,183 for the TRS, ERS, and JRF, respectively. The fair value of the collateral pledged by the borrowers was \$2,694,577, \$1,249,957, and \$38,754 for the TRS, ERS, and JRF, respectively. Since the amounts owed by the TRS, ERS, and JRF exceeded the amounts the borrowers owed to the TRS, ERS, and JRF, there was no credit risk exposure as of September 30, 2013. There were no significant violations of legal or contractual provisions, no borrower or lending agent default losses, and no recoveries of prior period losses during the year.

Investments purchased with cash collateral are held by the custodial agent, but not in the name of the Systems. Securities pledged as collateral are held by the custodial agent, but not in the name of the Systems. Letters of credit pledged as collateral are issued by the borrower's bank and are irrevocable. Tri Party Collateral is held by a third party bank in the name of the custodial agent. State Street, as custodial agent, is authorized to request a third party bank to undertake certain custodial functions in connection with holding of the collateral provided by a borrower. State Street may instruct the third party bank to establish and maintain a borrower's account and a State Street account wherein all collateral, including cash shall be maintained by the third party bank in accordance with the terms of the agreement. The following table provides information as of September 30, 2013, concerning securities lent:

SECURITIES LENDING - INVESTMENTS LENT AND COLLATERAL RECEIVED (at Fair Value in Thousands)

D. Mortgage-backed Securities

As of September 30, 2013, the TRS, ERS, and JRF had investments in mortgage-backed securities. Embedded prepayment options cause these investments to be highly sensitive to changes in interest rates. Prepayments of the underlying assets reduce the total interest payments to be received. Generally, when interest rates fall, obligees tend to prepay the mortgages thus eliminating the stream of interest payments that would have been received under the original amortization schedule. The resulting reduction in cash flow diminishes the fair value of the mortgage-backed securities.

E. Investment Derivatives

Derivative instruments are financial arrangements used by governments to manage specific risks or to make investments. From time to time, the RSA enters into certain derivative transactions, specifically call options and put options. The RSA uses these derivative instruments to make an investment, control risk with certain investment positions, or as a yield enhancement strategy. During the fiscal year, these investment derivative instruments were used exclusively within the RSA's domestic and international equity portfolios and are presented in the financial statements in their respective equity classifications. These derivative instruments are either listed options or executed in the over-the-counter (OTC) market using only credit worthy counterparties. The fair value of the investment derivative instruments is based on market prices. Investment risks related to investment derivatives have been considered and included in the Investment Risk note (Note 5A) in the preceding pages.

The following table presents the investment derivative instruments outstanding as of September 30, 2013, as reported in the System's Combining Statement of Fiduciary Net Position and Combining Statement of Changes in Fiduciary Net Position (dollar amounts in thousands):

INVESTMENT DERIVATIVE INSTRUMENTS

Financial Section

Notes to the Combined Financial Statements
For the Fiscal Year Ended September 30, 2013

(Dollar Amounts in Thousands)

6) FUNDED STATUS AND FUNDING PROGRESS

State law provides that the Boards of Control engage an actuary to prepare an annual valuation of the assets and liabilities of the various retirement plans. Under the provisions of GASB Statement No. 25, *Financial Reporting for Defined Benefit Plans and Note Disclosures for Defined Contribution Plans*, the actuary determines the “unfunded actuarial liability.” The “unfunded actuarial liability” is the difference between the actuarial value of assets and the actuarial accrued liability.

The funded status of each plan as of the latest actuarial valuation is as follows:

FUNDED STATUS							
	Actuarial Valuation Date	Actuarial Value of Assets	Actuarial Accrued Liability (AAL)	Unfunded AAL (UAAL)	Percentage Funded	Annual Covered Payroll	UAAL as a % of Covered Payroll
		(A)	(B)	(B-A)	(A/B)	(C)	((B-A)/C)
TRS	9/30/2012	\$18,786,008	\$28,251,367	\$9,465,359	66.5%	\$6,222,316	152.1%
ERS	9/30/2012	\$ 9,116,551	\$13,884,995	\$4,768,444	65.7%	\$3,252,003	146.6%
JRF	9/30/2012	\$ 234,300	\$ 380,470	\$ 146,170	61.6%	\$ 42,446	344.4%

The schedules of funding progress, presented as Required Supplementary Information (RSI) following the Notes to the Combined Financial Statements, present multi-year trend information about whether the actuarial values of plan assets are increasing or decreasing over time relative to the AALs for benefits.

Additional information as of the latest actuarial valuation follows:

	ACTUARIAL ASSUMPTIONS		
	TRS	ERS	JRF
Valuation date	September 30, 2012	September 30, 2012	September 30, 2012
Actuarial cost method	Entry Age Normal	Entry Age Normal	Entry Age Normal
Asset valuation method*	5-year market-related value	5-year market-related value	5-year market-related value
Amortization method	Level percent open	Level percent open	Level percent open
Remaining amortization period	30 years	Within 30 years - varies by employer	27 years
Actuarial assumptions:			
Investment rate of return ‡	8%	8%	8%
Projected salary increases ‡	3.50%-8.25%	3.75%-7.25%	4%
Cost of living adjustments	None	None	3.25% †

*Actuarial value of assets was set equal to the market value of assets on September, 30, 2012. Smoothing will commence again in future years.

‡ Includes inflation at 3.0%.

† Per year for certain members hired prior to July 30, 1979 and for spouses benefits subject to increase.

The RSA and its actuaries completed an investigation of the economic and demographic experience for the TRS, ERS, and JRF based upon participant data as of September 30, 2010. The purpose of the investigation was to assess the reasonableness of the actuarial assumptions and methods currently used by the RSA. This investigation resulted in changes to the following actuarial assumptions: reduced price inflation from 4.50% to 3.00%; increased the real rate of investment return from 3.50% to 5.00%; increased the real rate of wage inflation from 0.00% to 0.25%; decreased wage inflation from 4.50% to 3.25%; and reduced payroll growth from 4.50% to 3.25%. The demographic assumptions for rates of withdrawal, rates of disability retirement, rates of service retirement, rate of mortality, and rates of salary increase were updated based upon results for the previous 5 years.

The boards of control of the TRS, ERS, and JRF accepted and approved these changes on January 27, 2012, which became effective at the beginning of fiscal year 2012.

Beginning with the actuarial valuations as of September 30, 2012, the valuation liabilities are calculated using a smoothed interest rate method. The interest rate assumed during the look forward period (currently 25 years from the valuation date) is the investment rate of return expected to be earned during the look forward period based on the actual rate of return earned during the look back period (currently 5 years) such that the average assumed rate of return over the combined 30-year period is equivalent to the assumed ultimate investment rate of return (currently 8.00%). The interest rate after the 25-year look forward period is the ultimate investment rate of return of 8.00%. The smoothed interest rate used during the 25-year look forward period is limited to a corridor of 0.50% around the ultimate investment rate of return.

The board of control of the TRS adopted the valuation interest rate smoothing methodology on May 7, 2013. The board of control of the ERS and JRF adopted the methodology on May 9, 2013.

7) CONTRIBUTIONS REQUIRED AND MADE

The actuary has computed, as of the date of the latest available actuarial valuations, the estimated present value of benefits payable to retired members, beneficiaries, and active members. The actuarial valuations for the TRS, ERS, and JRF are prepared using the entry age method. The present value of all expected benefits payable from each system to the present group of members and beneficiaries is calculated by adding the present value of the expected benefits payable to the active members to the present value of the expected future payments to retired members and beneficiaries.

As required by statute, the TRS, ERS, and JRF provide for employer contributions at actuarially determined rates (expressed as percentages of annual covered payroll) that accumulate sufficient assets to pay benefits when due. The employer contributions required to support the benefits of each system are determined following a level funding approach and consist of a normal contribution, an accrued liability contribution, and a portion to finance administrative costs. Additionally, a portion of the TRS and ERS employer contributions fund a pre-retirement death benefit. Also, a portion of the TRS employer contributions fund a term-life benefit.

For the TRS, ERS, and JRF, the normal contribution is determined using the "entry age normal" method. Under this method, a calculation is made to determine the uniform and constant percentage rate of employer contributions which, if applied to the compensation of the average new member during the entire period of the member's anticipated covered service, would be required in addition to the contributions of the member to meet the cost of all benefits payable on the member's behalf.

The 2013 retirement contributions were made in accordance with actuarially determined contribution requirements.

RETIREMENT SYSTEMS OF ALABAMA

Financial Section

Notes to the Combined Financial Statements For the Fiscal Year Ended September 30, 2013

(Dollar Amounts in Thousands)

The RSA and its actuaries completed an investigation of the economic and demographic experience for the TRS, ERS, and JRF based upon participant data as of September 30, 2010. The purpose of the investigation was to assess the reasonableness of the actuarial assumptions and methods currently used by the RSA. This investigation resulted in changes to actuarial assumptions which are outlined in Note 6. The boards of control for each accepted and approved these changes on January 27, 2012, which became effective at the beginning of fiscal year 2012.

8) PROPERTY AND EQUIPMENT

Plan assets used in plan operations are reported at historical cost less accumulated depreciation. Depreciation is determined on the straight-line basis using estimated useful lives of 30 years for buildings and 3 to 10 years for furniture and equipment.

Property and equipment was comprised of the following amounts as of September 30, 2013:

	<u>TRS</u>	<u>ERS</u>
Land	\$ 5,085	\$ 2,535
Building and Improvements	107,535	53,767
Furniture and Equipment	5,879	2,212
Total Property and Equipment	118,499	58,514
Less Accumulated Depreciation	(22,428)	(10,754)
Net Property and Equipment	<u>\$ 96,071</u>	<u>\$ 47,760</u>

9) OTHER POSTEMPLOYMENT BENEFITS

In addition to the pension benefits described in Note 1, the TRS, ERS, and JRF (as agencies of the State of Alabama) participate in the State Employees' Health Insurance Plan (SEHIP) administered by the State Employees' Health Insurance Board (Board). The State Employees' Insurance Fund (SEIF) was established in 1965 under the provisions of Act 833 of the Legislature to provide health insurance benefits for employees and retired employees of the State of Alabama. In addition, the *Code of Alabama 1975, Section 36-36-1* established the Alabama Retired State Employees' Health Care Trust (Trust) for the purpose of accumulating assets to fund retiree benefits.

The Trust is a single-employer plan. The Trust issues financial statements that may be obtained by writing to:

State Employees' Insurance Board
P.O. Box 304900
Montgomery, AL 36130

The *Code of Alabama 1975, Section 36-29-7* authorizes the employer contributions to the plan. Each year, the Legislature sets the appropriation in the annual appropriation bill required to be paid by employers on behalf of each active member. A portion of the premium is used to assist in funding retiree benefits. The fiscal year 2013 rate set by the State Employees' Insurance Board was \$765 per active member per month (dollar amount not in thousands).

The *Code of Alabama 1975, Section 36-29-19.7* authorizes the retiree contributions to the plan. Required monthly contribution rates for fiscal year 2013 were as follows (the following dollar amounts are not in thousands):

Required Member Rates

- Individual Coverage/Non-Medicare Eligible – \$261
- Family Coverage/Non-Medicare Eligible Retired Member and Non-Medicare Eligible Dependents(s) – \$503
- Family Coverage/Non-Medicare Eligible Retired Member and Dependent Medicare Eligible – \$382

Required Member Rates (continued)

-Individual Coverage/Medicare Eligible Retired Member – \$45

-Family Coverage/Medicare Eligible Retired Member and Non-Medicare Eligible Dependents(s) – \$287

-Family Coverage/Medicare Eligible Retired Member and Dependent Medicare Eligible – \$166

-For employees that retire other than for disability, for each year under 25 years of service, the retiree pays two percent of the employer premium and for each year over 25 years of service, the retiree premium is reduced by two percent of the employer premium.

Surviving Spouse Rates (the following dollar amounts are not in thousands)

-Surviving Spouse Non-Medicare Eligible – \$377

-Surviving Spouse Non-Medicare Eligible and Dependent Non-Medicare Eligible – \$619

-Surviving Spouse Non-Medicare Eligible and Dependent Medicare Eligible – \$528

-Surviving Spouse Medicare Eligible – \$196

-Surviving Spouse Medicare Eligible and Dependent Non-Medicare Eligible – \$438

-Surviving Spouse Medicare Eligible and Dependent Medicare Eligible – \$347

RSA employees participate in the State Employees' Health Insurance Plan, which is a single employer health insurance plan for the State of Alabama. As a component unit, RSA employees participating in the ERS pension plan are valued with all other State of Alabama employees, and therefore, report under the requirements of a cost sharing unit. The following table details the annual required contributions and the percentage contributed (dollar amounts in thousands):

	Fiscal	Annual	Percentage
	Year	Required	Contributed
	Ended	Contributions	
TRS	2013	\$ 1,104	42.63%
	2012	\$ 1,052	38.84%
	2011	\$ 740	53.18%
ERS	2013	\$ 1,083	42.63%
	2012	\$ 1,123	38.84%
	2011	\$ 815	53.18%
JRF	2013	\$ 8	42.63%
	2012	\$ 8	38.84%
	2011	\$ 6	53.18%

RETIREMENT SYSTEMS OF ALABAMA

Financial Section

Notes to the Combined Financial Statements For the Fiscal Year Ended September 30, 2013

(Dollar Amounts in Thousands)

10) PENSION PLAN FOR RSA EMPLOYEES

A portion of the RSA employees participates in the TRS pension plan, which is a cost sharing plan, and a portion of the RSA employees participates in the ERS pension plan, which is an agent multiple-employer pension plan. As a component unit, RSA employees participating in the ERS pension plan are valued with all other State of Alabama employees, and therefore, report under the requirements of a cost sharing unit.

Contributions were made to each plan in accordance with actuarially determined contribution requirements. A schedule of Employer Contributions is shown below:

	Fiscal Year Ended	Annual Required Contributions	Percentage Contributed
TRS	2013	\$ 996	100%
	2012	\$ 930	100%
	2011	\$ 1,155	100%
ERS	2013	\$ 731	100%
	2012	\$ 719	100%
	2011	\$ 918	100%

11) RELATED PARTY TRANSACTIONS

The TRS and ERS jointly own office buildings in Montgomery and Mobile and lease office space to agencies of the State of Alabama. These agencies are obligated to the TRS and ERS to lease space for varying terms through the year 2029. Rental payments and other agreed upon payments (reported as investment income) from leases with state agencies totaled \$28,864,435 (dollar amount not in thousands) during the 2013 fiscal year.

12) FUTURE ACCOUNTING PRONOUNCEMENTS

GASB approved Statement No. 67, *Financial Reporting for Pension Plans*, an amendment of GASB Statement No. 25, and Statement No. 68, *Accounting and Financial Reporting for Pensions*, an amendment of GASB Statement No. 27. GASB Statement No. 67 addresses reporting by pension plans that administer benefits for governments, and is effective for financial statements for periods beginning after June 15, 2013. GASB Statement No. 68, which primarily relates to reporting by governments that provide pensions to their employees, is effective for fiscal years beginning after June 15, 2014. Key changes include:

- Incorporating ad hoc cost-of-living adjustments and other ad hoc postemployment benefit changes into projections of benefit payments, if an employer's past practice and future expectations of granting them indicate they are essentially automatic.
- Using a discount rate that applies to: (a) the expected long-term rate of return on pension plan investments to projected benefit payments for which plan assets are expected to be available to make projected benefit payments; and (b) the interest rate on a tax-exempt 20-year AA/Aa-or higher rated municipal bond index to projected benefit payments for which plan assets are not expected to be available for long-term investment in a qualified trust.
- Requiring more extensive note disclosures and required supplementary information.

The Systems will be subject to the provisions of GASB Statement No. 67 beginning with the fiscal year ending September 30, 2014. GASB Statement No. 67 replaces the requirements of GASB Statement No. 25, *Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans*, and GASB Statement No. 50, *Pension Disclosures*, as they relate to pension plans that are administered through trust or similar arrangements meeting certain criteria. GASB Statement No. 67 builds upon the existing framework for financial reports of defined benefit pension plans and enhances note disclosures and required supplementary information for both defined benefit and defined contribution pension plans. In addition, it requires the presentation of new information about the annual money-weighted rates of return on pension plan investments in the notes to the financial statements and in 10-year required supplementary information schedules.

(Dollar Amounts in Thousands)

1) CONTRIBUTIONS

Contributions were made in accordance with actuarially determined contribution requirements. The employer cost rate expressed as a percent of payroll is determined annually by reviewing a variety of factors including benefits promised, member contributions, investment earnings, mortality, and withdrawal experience.

The employer cost rates for the fiscal year 2012 - 2013 are 10.08% for the TRS Tier 1 employees, 9.44% for the TRS Tier 2 employees, 10.12% for the ERS – Tier 1 State Employees, 10.04% for the ERS – Tier 2 State Employees, 31.61% for the ERS – Tier 1 State Police, 25.32% for the ERS – Tier 2 State Police, and 32.06% for the JRF. Local agency rates differ for each agency.

2) ANALYSIS OF FUNDING PROGRESS

Analysis of the dollar amounts of the actuarial value of assets, the actuarial accrued liability, and the unfunded actuarial accrued liability in isolation may be misleading. Expressing the actuarial value of assets as a percentage of the actuarial accrued liability (assets to liabilities percentage) provides one indication of the respective retirement system's funding status on a going-concern basis. Analysis of this percentage over time indicates whether the respective system is becoming financially stronger or weaker. Generally, the strength of a retirement system is considered to increase as the assets to liabilities percentage increases. Trends in the actuarial accrued liability and the annual covered payroll are affected by inflation. Expressing the unfunded accrued liability as a percentage of annual covered payroll (liabilities to payroll percentage) approximately adjusts for the effects of inflation and aids analysis of the respective retirement system's progress made in accumulating sufficient assets to pay benefits when due. Generally, the strength of a retirement system is considered to increase as the liabilities to payroll percentage decreases.

The RSA and its actuaries completed an investigation of the economic and demographic experience for the TRS, ERS, and JRF based upon participant data as of September 30, 2010. The purpose of the investigation was to assess the reasonableness of the actuarial assumptions and methods currently used by the RSA. This investigation resulted in changes to actuarial assumptions which are outlined in Note 6. The boards of control for each accepted and approved these changes on January 27, 2012, which became effective at the beginning of fiscal year 2012.

Report on Investment Activity

For the Fiscal Year Ended September 30, 2013

Dear Members,

I am pleased to present the following report on investment activity for the fiscal year ended September 30, 2013. The report provides investment highlights in general as well as specific information on the Retirement Systems' investment activity for the fiscal year. The custodian calculated rates of return based on the standards set forth by the Global Investment Performance Standards (GIPS®).

The fiscal year just passed was similar to what we have seen most every year since the "great recession." Growth as measured by GDP was slow relative to history, macro developments were the short term driver of market trends, and investors for the most part remained skeptical that equity markets could move higher. The number one macro issue in 2012 was the European sovereign debt issue, and this year the award should probably go to "tapering." After several winks and nods, followed by a telegraphed message that a tapering of asset purchases was inevitable, the Fed reversed course after a series of disappointing economic data points convinced them that the economy was still weak kneed. Both bonds and stocks had wild swings as uncertainty was again introduced into what the markets thought was a done deal. The Fed is in the precarious position, along with many other central banks, of having pumped tons of liquidity into the system. One goal of this was to push up asset prices, and they have succeeded on that count. The problem they are dealing with is slower than expected economic growth and continued weak employment numbers. There remains a disconnect between main street and wall street and what changes that in the near future we are not sure of.

We have been slowly lowering the portfolio's allocation to fixed income as we have been expecting a backup in rates. All things being relative, we are still leaning on stocks to drive performance in the portfolio. Valuations are about average at this point, and barring a recession, war or some other exogenous shock, we see stocks returns at to slightly above long term run rates. Some of the dynamics that we think make this possible are: cash rich balance sheets, low current payout ratios, and managements getting the message that returning cash to shareholders has been a winning strategy for their share price. One of the consequences of the "great recession" is that it really scared corporate America. They have hoarded cash and have been delinquent in redeploying that cash back into capital expenditures. This has resulted in a lethargic but lengthy recovery, and we don't see the bust side of this cycle in the immediate future as we have not really seen the boom. Within equities, we think the biggest valuation disconnect is between large cap and small, with small being overvalued. We have been paring back our smallcap exposure into the relative outperformance they have displayed. Our real asset portfolio has again had another good performance year, and we have started to see some investments payoff as cheaper financing is available in the public markets. This is a two edged sword as it means the investments have worked out well, but we are being forced to redeploy cash when there is much uncertainty. Having said that, we have built a larger than normal cash position, and will look for opportunities as they arise. As always, we will continue to demand the best execution from all our counterparts, and will strive to produce results that strengthen the Retirement Systems of Alabama.

RSA Performance Summary

As of September 30, 2013, aggregate defined benefit assets under management totaled \$30.8 billion. During fiscal year 2013, annualized total returns of the Teachers' Retirement System, Employees' Retirement System, and the Judicial Retirement Fund were 14.93%, 14.60%, and 14.05% respectively.

Equities

Looking back at the stock market the past 12 months, one could conclude that investors have been pleasantly surprised by the returns. 2013 was not dissimilar to the past couple of years where there were a handful of macro events that kept investor sentiment in check. Global growth has cooled, with noticeable slowdowns in some of the emerging markets countries, and continued sluggishness in Europe. We had geopolitical issues (Syria, Iran), continued bipartisan feuding in Washington, not to mention the prospect of the Fed winding down QE3. Through all of this, the market continued to grind higher. We had a couple of growth scares, one in the spring and another in late summer, yet corporate profitability has continued to grow. One of the noticeable aspects of this has been the somewhat dour tone that managements have displayed around the quarterly earnings reports. It has become somewhat systematic of managements to reset the bar on forward guidance and then slightly beat numbers. This has been good as it has tempered Wall Street expectations, as well as it has weighed on investor sentiment.

What lies ahead is especially interesting at this point. Inflation remains below most central bank targets, and on the whole, we are still experiencing global central bank easing. Most recessions are caused or coincide with Fed tightening, and the prospect of Fed tightening in the near future is pretty remote. Valuations on stocks are not as attractive as this time last year, as P/E multiples have expanded a couple of points, but on a relative basis, stocks are attractive vs. bonds. We have continued to be a net seller and maintain roughly the same equity weighting, which is at the high end of our allocation range. We have also continued to put in place some hedges on parts of the portfolio to protect gains we have experienced. We have been underweight emerging markets for years, and that underweighting paid off this year as emerging markets on average severely lagged returns in developed markets. Recently, we have seen less correlation in stocks, which bodes well for stock picking. The past few years have definitely benefited indexing strategies, which we employ widely within the equity portfolio. Looking ahead, we look to shift some money from index to active strategies if correlations remain low.

For the year, the RSA domestic equity portfolios increased 21.46%, 21.38%, and 20.40% for TRS, ERS, and JRF funds, respectively. International equity returns were a mixed bag with developed markets doing very well and emerging markets lagging. Total international equity returns were positive with TRS up 21.54%, ERS up 21.33%, and JRF up 21.29%. The combined total return for the overall equity portfolios were 21.50%, 21.39%, and 20.61% for TRS, ERS, and JRF, respectively. Three-, five-, and ten-year annualized global equity returns were 14.21%, 9.36%, and 8.15% for TRS, 14.24%, 9.38%, and 8.15% for ERS, and 14.57%, 9.78%, and 7.72% for JRF, respectively.

Fixed Income

At the beginning of fiscal year 2013, the Federal Open Market Committee had recently announced its third round of quantitative easing (QE3), an open-ended commitment to purchase agency mortgage-backed securities until economic conditions warrant otherwise. Spreads within the mortgage-backed sector tightened dramatically and risk assets in general performed very well during this time. In October, the risk-taking trend continued with positive economic data and marked improvement within the housing sector. Mortgage investors did take some money off the table after the massive spread tightening in September, pushing mortgage-backed securities (MBS) spreads 30bps wider in the month. It appears these profits were reinvested into corporate debt as the asset class outperformed by approximately 150bps during the month.

During the first few weeks of November, market sentiment shifted and risk aversion prevailed. Political uncertainty in regards to the election and fiscal cliff, coupled with third quarter revenue misses encouraged investors to deploy capital into safer assets. However, the rally in government debt proved to be short-lived with the increasing probability of a fiscal cliff compromise. Policymakers also enacted a \$45 billion treasury program to go along with the \$40bn in mortgages being purchased on a monthly basis. Spread product across all sectors outperformed treasuries during the month of December.

Interest rates continued to increase into the new calendar year, with the 10yr treasury hitting 2% for the first time since last April. This move came on the heels of better economic data and a favorable solution to the major parts of the fiscal cliff. This environment produced solid returns in equities and sizable outperformance within the high-yield market. Corporate supply in January was fairly robust, reaching \$115 billion in high grade issuance. Financials, once again, outgained its industrial and utility counterparts within the corporate sector.

Rising political risks in Europe, magnified by the Italian election results, provided a brief pause in investor optimism in the following weeks. Investment grade debt marginally outperformed government securities during this period, but returns for the most part were rate-driven with little spread movement. Agency and mortgage-backed securities underperformed due to their smaller interest rate sensitivities.

In mid-March, after being downgraded by Moody's to junk status, the Cypriot Government agreed to a deal with European policymakers and the International Monetary Fund. This agreement allowed the country to restructure its much-maligned banking sector and save it from a disorderly bankruptcy. On the domestic front, a weak payroll report for the month of March and lower than expected growth for the first quarter provided a perfect storm for a dramatic drop in treasury yields. The intermediate and long-end of the curve rallied approximately 40bps in short order, resulting in April becoming the best performing month of the fiscal year.

Investment Section

Report on Investment Activity (Continued)

For the Fiscal Year Ended September 30, 2013

During the month of May, the Chairman of the Federal Reserve, Ben Bernanke, caught investors by surprise stating the “Fed could reduce bond purchases in the next few meetings if data supports it” in his testimony to Congress. This idea of tapering was interpreted as the first signal of a possible change in monetary policy. This action led to an abrupt increase in interest rates and a roughly 30bps backup in mortgage spreads as the largest player in the MBS market appeared to be stepping away from the table. The bearish trend continued in June as the head of the Federal Reserve reinforced this notion that if the data is consistent with policymakers’ forecasts then it “would be appropriate to moderate the monthly pace of purchases later this year”. Corporate supply volumes came to a halt as higher yields and elevated volatility kept issuers at bay. Agency and mortgage-backed investors fared better than corporate debt holders during this sell-off due to their lower duration profiles. Consensus had become that the 33yr bull market in fixed income that produced high-single digit returns annually was finally coming to an end.

By early September, the 10yr treasury yield had eclipsed 3% from the 1.60% area reached just four months earlier. It appears that the Federal Reserve took notice of the damage it had inflicted on the fixed income market over the last couple of months and opted to stay the course in its current easing program. The decision not to taper its purchases of treasury and mortgage-backed securities at the September meeting further confused economists and investors alike. The inaction by policymakers came in the midst of an uninspiring payroll report, coupled with uncertainties surrounding the debt ceiling and a potential government shutdown. At the end of the day, these concerns and a still fragile housing recovery carried more weight at the Fed than the market had anticipated. The bond market received the news favorably, resulting in positive returns across all asset classes. The mortgage market benefited the most unsurprisingly, posting an excess return of 70bps.

In actuality, none of the things that have transpired over the course of this fiscal year should come as a total surprise. The unwinding of the Fed’s multi-year quantitative easing programs will come to fruition at some point in time despite the delay. Regardless, short term rates will remain low for an extended amount of time to ensure that economic growth stays on a positive trajectory. If there is any doubt, there shouldn’t be, as one of the more dovish board members of the Federal Reserve, current Vice Chair Janet Yellen, is set to take the reins early next year.

For the fiscal year, the total annual returns for the public domestic fixed income portfolios were (.62%) for the TRS and (.65%) for the ERS and (.33%) for the JRF. The five-year annualized returns were 7.09% for the TRS and 7.09% for the ERS and 7.19% for the JRF. The ten-year annualized returns were 5.89% for the TRS and 5.89% for the ERS and 5.77% for the JRF.

Sincerely,

Marc Green
Director of Investments

I. Board Objectives

The Boards of Control, as Trustees of the Teachers' Retirement System and Employees' Retirement System (Systems), have full power, through each System's secretary-treasurer, to invest and reinvest System funds in accordance with the Prudent Person Rule: "with the care, skill, prudence, and diligence under the circumstances then prevailing that a prudent man acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with like aims." Other funds currently and hereafter under the management of the Systems will be governed by this Investment Policy Statement within each System's limitations and/or by other applicable legislated restrictions.

It is the objective of the Boards that funds be invested in such a manner as to maximize the total return of each System within prudent risk parameters. Also, the Systems recognize that a stronger Alabama equates to a stronger Retirement System, and as such, investments in Alabama businesses are encouraged to the extent the investment meets the criteria delineated by this policy statement.

The long term investment performance expectations of the Systems are to achieve a return on marketable securities in excess of the actuarial investment assumption and to exceed the rate of inflation (as measured by the CPI) by 3% through investments in a broadly diversified portfolio. The performance evaluation of each System will be submitted to the respective Board on a semi-annual basis.

II. Asset Allocation

The most important aspect of any investment strategy is the decision regarding allocation of investments among the various asset classes. The purpose of formulating asset allocation guidelines is to maximize investment returns within the standards of prudence established for the whole portfolio. Accordingly, the asset allocation decisions will be predicated on the following factors:

1. The actuarial projected liability stream of benefits and their cost,
2. The perception of the prospective risks and returns of eligible asset classes, and
3. Judgments regarding future economic and financial conditions.

The maximum permissible allocation of assets in the Systems to each eligible asset class is expressed below:

A. Domestic Fixed Income

The domestic fixed income portfolio of each System may consist of any rated or non-rated debt security including, but not limited to, the following: U.S. Treasury issues, agency issues, mortgage-backed securities, corporate bonds, and privately placed debt securities. This area of investments may not exceed 50% of the market value of the aggregate portfolio of each System.

B. International Fixed Income

The international fixed income asset class may be used to provide diversification for each System and may consist of U.S. dollar denominated or foreign currency denominated fixed income obligations of sovereign countries with a rating of at least A by one of the principal rating agencies at the time of purchase or acquisition, except that up to 2 percent of the market value of each System's total portfolio may be invested in the obligations of sovereign countries with a rating of BBB or BAA by one of such agencies at the time of purchase. The Systems may hedge against the possible adverse effects of currency fluctuations on each System's portfolio of international fixed income obligations when it is considered appropriate. The market value of this asset may not exceed 10% of the market value of each System's total portfolio.

Investment Section

Investment Policies and Procedures (Continued)

For the Fiscal Year Ended September 30, 2013

C. Domestic Equity

The domestic equity portfolio of each System may consist of both actively and passively managed equity securities. Also, covered call options may be utilized in order to add incremental value to each System's equity portfolio and may be written and repurchased as market conditions warrant. The asset class may not exceed 65% of the market value of each System's aggregate portfolio.

D. International Equity

The international equity asset class may be used to provide diversification for the Systems and may consist of both actively and passively managed international equity securities. In order to be eligible for purchase by the Systems, an international equity security must be issued by a company incorporated in a country whose debt securities are eligible for investment under Section B above, and the market value of the aggregate outstanding equity of the issuing company must be at least \$100 million. Furthermore, each System may not purchase or hold more than 5 percent of any class of the outstanding stock of a company. The Systems may hedge against the possible adverse effects of currency fluctuations on each System's portfolio of international equity securities when it is considered appropriate. The aggregate market value of international equities may not exceed 25% of the aggregate market value of each System's total portfolio.

E. Real Estate

The real estate portfolio of each System may consist of office, retail, industrial, commercial, and residential housing projects. The suggested range may not exceed 15% of the book value of each System's aggregate portfolio.

F. Alternative Investments

Alternative investments may consist of, but are not limited to, mezzanine financing, LBO's, venture capital, limited partnerships, futures, commodities, and derivative investments. The asset class may not exceed 10% of the book value of each System's aggregate portfolio.

G. Short-term Investments

Short-term investments may consist of money allocated to commercial paper, rated at least A-2 and/or P-2, repurchase agreements, short-term U.S. Treasury securities and other money market investments. The primary objective of short-term investments is to provide highly liquid, low risk methods of return on funds, which have not been committed to the other aforementioned asset classes. The asset class may not exceed 20% of the market value of each System's aggregate portfolio.

Asset allocation is a dynamic process, and as such, the allocation decision should be revisited as market conditions change. In order to recognize this dynamism, the allocation targets within the recommended ranges of each asset class for the prospective quarter should be included in the quarterly strategy report.

III. Procedures

1. The investment advisor will work with the staff to develop a quarterly strategy for investments, which will be disseminated to the Boards, as it is prepared each quarter.
2. The Investment Committee of each System shall approve all investments made within the prescribed investment policy. These Investment Committees, in their approval, are considered to be signing for the respective Board of Control. If any purchase or sale is questioned by a member of the respective Investment Committee as to whether it is within given Board policy, the Board shall decide and no purchase or sale shall take place until all parties are in clear agreement that said action is or is not covered by policy.
3. Each week the secretary-treasurer of each System will send to the investment advisor the list of actual activities for written confirmation, which will then be forwarded to the respective System's Board of Control members upon receipt.
4. The staff members of the investment advisor will meet at least quarterly with members of the RSA staff and interested Boards of Control members to cover subjects of mutual interest.
5. All investment security purchases will be documented with an individual worksheet setting out the reason for the purchase, rating, market history and other general data pertinent to the decision making process.
6. An annual survey will be made of all fixed income investments held with emphasis on credit quality. A holding that has been downgraded in rating will be examined as to the reason for the downgrade and a determination should be made as to whether the security should remain in the portfolio.
7. The rules of the Securities Exchange Commission, the general policies of the Boards of Control, and the Alabama Ethics Commission shall govern the ethical conduct of employees. The RSA staff will provide the Alabama Ethics Commission with a quarterly report of all purchases and sales of any and all securities for personal accounts occurring within each reported quarter. The staff will abide by the Alabama Ethics Commission Advisory Opinion No. 673.

Component Units of the State of Alabama
Comprehensive Annual Financial Report

ACTUARIAL SECTION

Cavanaugh Macdonald

CONSULTING, LLC

The experience and dedication you deserve

July 9, 2013

Board of Control
Teachers' Retirement System of Alabama
Montgomery, Alabama

Members of the Board:

In this report are submitted the results of the annual valuation of the assets and liabilities of the Teachers' Retirement System of Alabama, prepared as of September 30, 2012 in accordance with Section 367(15) of the act governing the operation of the System.

The purpose of this report is to provide a summary of the funded status of the System as of September 30, 2012, to recommend rates of State contribution and to provide accounting information under Governmental Accounting Standards Board Statements No. 25 and 27 (GASB 25 and 27). While not verifying the data at source, the actuary performed tests for consistency and reasonability. The System was amended to provide a new benefit structure for members initially joining the System on and after January 1, 2013 (Tier II). There are no Tier II members included in the valuation as of September 30, 2012. However, we have received data from the Retirement System for Tier II members who joined during the first four months of 2013 and have used this data to determine the Tier II employer contribution rates for the fiscal year ending September 30, 2015.

On the basis of the valuation, we have determined employer contribution rates of 11.71% of payroll for Tier I members and 11.05% of payroll for Tier II members for the fiscal year ending September 30, 2015.

The promised benefits of the System are included in the actuarially calculated contribution rates which are developed using the Entry Age Normal cost method. Since the previous valuation, the Board has adopted a valuation interest rate smoothing methodology. Five-year smoothed market value of assets is used for actuarial valuation purposes. However, the actuarial value of assets was set equal to the market value of assets on September 30, 2012; five-year smoothing will commence again in future years. Gains and losses are reflected in the unfunded accrued liability that is being amortized by regular annual contributions as a level percentage of payroll, on the assumption that payroll will increase by 3.25% annually. The assumptions recommended by the actuary and adopted by the Board are in the aggregate reasonably related to the experience under the Fund and to reasonable expectations of anticipated experience under the Fund and meet the parameters for the disclosures under GASB 25 and 27.

We have prepared the Schedule of Funding Progress and Trend Information shown in the financial section of the Comprehensive Annual Financial Report, and all supporting schedules including the Schedule of Active Member Valuation Data, the Solvency Test and the Analysis of Financial Experience shown in the actuarial section of the Comprehensive Annual Financial Report.

Board of Control
Page 2

This is to certify that the independent consulting actuary is a member of the American Academy of Actuaries and has experience in performing valuations for public retirement systems, that the valuation was prepared in accordance with principles of practice prescribed by the Actuarial Standards Board, and that the actuarial calculations were performed by qualified actuaries in accordance with accepted actuarial procedures, based on the current provisions of the retirement system and on actuarial assumptions that are internally consistent and reasonably based on the actual experience of the System.

Future actuarial results may differ significantly from the current results presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law. Since the potential impact of such factors is outside the scope of a normal annual actuarial valuation, an analysis of the range of results is not presented herein.

In our opinion the System is operating on an actuarially sound basis. Assuming that contributions to the System are made by the employer from year to year in the future at the rates recommended on the basis of the successive actuarial valuations, the continued sufficiency of the retirement fund to provide the benefits called for under the System may be safely anticipated.

The Table of Contents, which immediately follows, outlines the material contained in the report.

Summary of Actuarial Assumptions and Methods

Summary of Actuarial Assumptions and Methods

The assumptions and methods used in the valuation were selected based on the actuarial experience study prepared as of September 30, 2010, submitted to and adopted by the Board on January 27, 2012.

Ultimate Investment Rate of Return: 8.00% per annum, compounded annually, including price inflation at 3%.

Salary Increases: Representative values of the assumed annual rates of future salary increases are as follows and include wage inflation at 3.25% per annum:

Years of Service	Annual Rate (%)
0	8.25
1	6.50
2	5.75
3	5.50
4	5.25
5	5.00
6	5.00
7	4.75
8 to 13	4.50
14 to 18	4.00
19 & Over	3.50

Separations Before Service Retirement: Representative values of the assumed annual rates of death, disability, and withdrawal are as follows:

Male							
Annual Rate (%) of							
Age	Death †	Disability		Withdrawal			
		Years of Service		Years of Service			
		0-24	25+	0-4	5-9	10-20	20+
20	0.02	0.04		30.00			
25	0.02	0.05		15.68	10.00		
30	0.03	0.05		14.25	5.40	5.00

Service Retirement:

The assumed annual rates of service retirement for Tier I members are as follows:

For members first eligible for unreduced benefits upon attaining 25 years of service but before age 65, rates are as follows:

Age	Annual Rate (%)	
	Male §	Female *
47 & Under	20.0	25.0
48	20.0	17.0
49	20.0	16.0
50 to 52	15.0	16.0
53 to 54	14.0	16.0
55 to 59	15.0	20.0
60	15.0	15.0
61	20.0	25.0
62	35.0	35.0
63	30.0	25.0
64	25.0	30.0

§ Retirement rates are increased by 7% in the year first eligible for unreduced retirement from age 50 through age 54 and by 10% from age 55 through age 60.

* Retirement rates are increased by 7% in the year first eligible for unreduced retirement from age 50 through age 54 and by 20% from age 55 through age 60.

RETIREMENT SYSTEMS OF ALABAMA

Actuarial Section

Teachers' Retirement System

Summary of Actuarial Assumptions and Methods (Continued)

Spousal Benefits: For those eligible for spousal benefits, it is assumed that 75% will elect the lump sum death benefit payable from the death benefit fund and 25% will elect the spousal benefit payable from the pension accumulation fund and included in the liabilities of the System.

Benefits Payable Upon Separation from Service: For active members who separate from service prior to eligibility for a service retirement allowance, the liability is assumed to be the greater of the value of the refund of contributions and the value of the deferred annuity. Assumed refunds are reduced by 10% to account for interest accumulation adjustments which are less than the “regular” 4% rate adopted by the Board.

Unused Sick Leave: 3% load on service retirement liabilities for active members. (No load for Tier II members)

Percentage Married: 100% of active members are assumed to be married with the husband 3 years older than the wife.

Valuation Method: Individual entry age normal cost method. Actuarial gains and losses are reflected in the unfunded actuarial accrued liability.

Assets Method: Actuarial value. The actuarial value of assets recognizes a portion of the difference between the market value of assets and the expected value of assets, based on the assumed valuation rate of return. Each year, 20% of the difference between market value and expected actuarial value is recognized. The actuarial value of assets was set equal to the market value on September 30, 2012. Smoothing will commence again in future years.

Liability for Current Inactive Members: Member Contribution Balance is multiplied by a factor of 2.0.

Valuation Interest Rate Smoothing: The valuation liabilities are calculated using a smoothed interest rate method. The interest rate assumed during the look forward period (currently 25 years from the valuation date) is the investment rate of return expected to be earned during the look forward period based on the actual rate of return earned during the look back period (currently 5 years) such that the average assumed rate of return over the combined 30 year period is equivalent to the assumed ultimate investment rate of return (currently 8.00%). The interest rate after the 25 year look forward period is the ultimate investment rate of return of 8.00%.

Corridor Limit on Interest Smoothing: The smoothed interest rate used during the 25 year look forward period is limited to a corridor of 0.50% around the ultimate investment rate of return.

Actuarial Cost Method

1. The valuation is prepared on the projected benefit basis, which is used to determine the present value of each member's expected benefit payable at retirement or death. The calculations are based on the member's age, years of service, sex, compensation, expected future salary increases, and an assumed future interest earnings rate (currently 8%). The calculations consider the probability of a member's death or termination of employment prior to becoming eligible for a benefit and the probability of the member terminating with a service, disability or survivor's benefit. The present value of the expected benefits payable to active members is added to the present value of the expected future payments to retired members and beneficiaries to obtain the present value of all expected benefits payable to the present group of members and beneficiaries.
2. The employer contributions required to support the benefits of the System are determined following a level funding approach, and consist of a normal contribution and an accrued liability contribution.
3. The normal contribution is determined using the "individual entry age normal" method. Under this method, a calculation is made to determine the uniform and constant percentage rate of employer contributions which, if applied to the compensation of each new member during the entire period of the member's anticipated covered service, would be required in addition to the contributions of the member to meet the cost of all benefits payable on the member's behalf.
4. The unfunded accrued liability contributions are determined by subtracting the current assets held by the System and the present value of prospective employer normal contributions and member contributions from the present value of expected benefits to be paid from the System.

Summary of Plan Provisions as Interpreted for Valuation Purposes

The Teachers' Retirement System of Alabama (TRS) was established on September 15, 1939 and became effective September 30, 1941. The valuation considered amendments to the System through the valuation date. The following summary describes the main benefit and contribution provisions of the System as interpreted for the valuation.

Definitions

Average Final Compensation – The average compensation of a Tier I member is calculated using compensation for the 3 highest years in the last 10 years of creditable service. The average compensation of a Tier II member is calculated using compensation for the 5 highest years in the last 10 years of creditable service.

Membership Service – all service rendered while a member of the System and for which contributions are made.

Creditable Service – the sum of membership service, prior service, and any other service established as creditable in accordance with the provisions of the retirement law.

Annuity – payments for life derived from accumulated contributions of a member.

Pension – payments for life derived from employer contributions.

Retirement Allowance – the sum of the annuity and pension payments.

RETIREMENT SYSTEMS OF ALABAMA

Actuarial Section

Teachers' Retirement System

Summary of Plan Provisions (Continued)

Benefits

Service Retirement Allowance

Condition for Allowance

Tier I - The retirement allowance is payable upon the request of a member who has completed 25 years of creditable service or who has attained age 60 and completed at least 10 years of creditable service.

Tier II - The retirement allowance is payable upon the request of a member who has completed 10 years of creditable service and who has attained age 62 (age 56 with 10 years of creditable service for full-time certified firefighters, police officers, and correctional officers).

Amount of Allowance

Tier I - Upon service retirement, a member receives a retirement allowance equal to 2.0125% of the member's average final compensation multiplied by the number of years of creditable service. At retirement, a member receives one additional year of creditable service in determining the retirement allowance for each five years of service as a full-time certified firefighter, police officer, or correctional officer.

Tier II - Upon service retirement, a member receives a retirement allowance equal to 1.65% of their average final compensation multiplied by the number of years of creditable service. The benefit is capped at 80% of the member's average final compensation.

Tier I & II - Members may elect to receive a reduced retirement allowance in order to provide an allowance to a designated beneficiary after the member's death (see "Special Privileges at Retirement").

Disability Retirement Allowance

Condition for Allowance

A disability retirement allowance may be granted to a member who has 10 or more years of creditable service and becomes permanently incapacitated for duty before reaching eligibility for service retirement.

Amount of Allowance

Tier I - Upon disability retirement, a member receives a retirement allowance equal to 2.0125% of the member's average final compensation multiplied by the number of years of creditable service. At retirement, a member receives one additional year of creditable service in determining the retirement allowance for each five years of service as a full-time certified firefighter, police officer, or correctional officer.

Tier II - Upon disability retirement, a member receives a retirement allowance equal to 1.65% of the member's average final compensation multiplied by the number of years of creditable service. The benefit is capped at 80% of the member's average final compensation.

Tier I & II- Members may elect to receive a reduced retirement allowance in order to provide an allowance to a designated beneficiary after the member's death (see "Special Privileges at Retirement").

Benefits Payable on
Separation of Service

A member who withdraws from service is entitled to receive his or her contributions with allowable interest. A member who has completed 10 years of creditable service may, after separation from service, continue membership in the System and file for service retirement after reaching age 60 (age 62 for Tier II members).

Benefits Payable upon
Death In Active Service

In the event of the death of a member eligible for service retirement, the designated beneficiary may elect (1) to exercise Option 3 as defined under "Special Privileges at Retirement" or (2) to receive a return of member contributions and total earned interest plus a death benefit payable from the pre-retirement death benefit fund equal to the salary on which retirement contributions were made for the previous scholastic year (July 1-June 30).*

In the event of the death of a member with more than one year of service who is not eligible to retire, the designated beneficiary shall receive the return of member contributions and total earned interest. Also, the designated beneficiary shall receive an additional death benefit payable from the pre-retirement death benefit fund equal to the salary on which retirement contributions were made for the previous scholastic year (July 1-June 30).*

In the event of a job-related death of a member with less than one year of service, the designated beneficiary shall receive the return of member contributions and total earned interest plus a death benefit payable from the pre-retirement death benefit fund equal to the annual earnable compensation of the member at the time of death.*

In the event of a non –job-related death of a member with less than one year of service, the designated beneficiary shall receive the return of member contributions and total earned interest plus a matching death benefit, which is limited to a maximum of \$5,000.

* However, if the death occurred more than 180 calendar days after the member's last day in pay status, or if the deceased member had applied for a refund of member contributions or terminated employment, the lump sum will be the same as if the member had less than one year of service and the death was not job-related.

RETIREMENT SYSTEMS OF ALABAMA

Actuarial Section

Teachers' Retirement System

Summary of Plan Provisions (Continued)

Special Privileges at Retirement

In lieu of the full retirement allowance, a member may, at retirement, elect to receive a reduced retirement allowance equal in value to the full allowance, with the provision that:

Option 1 - If the member dies before the annuity payments equal the present value of the annuity at the date of retirement, the balance is paid to a designated beneficiary or to the member's estate, or

Option 2 - After the member's death, the member's allowance is continued throughout the life of the designated beneficiary, or

Option 3 - After the member's death, one-half of the member's allowance is continued throughout the life of the designated beneficiary, or

Option 4 - Some other benefit is paid either to the member or to such other person as the member shall designate provided such benefit, together with the reduced retirement allowance, is of equivalent actuarial value to the member's retirement allowance and is approved by the Board of Control.

Deferred Retirement Option Plan (DROP)

Prior to March 25, 2011, a member may elect to participate in the Deferred Retirement Option Plan (DROP) upon completion of at least 25 years of creditable service (excluding sick leave) and attainment of at least 55 years of age. Under the DROP, the member may defer receipt of a retirement allowance and continue employment for a period not to exceed five years, nor to be less than three years. At the end of the period, the member may withdraw from active service and receive the retirement benefit calculated at the time of enrollment in the DROP, and also receive a payment for the deferred retirement benefits and employee contributions while participating in the DROP and interest earned on DROP deposits.

The effect of Act 2011-27 is that no new participants will be allowed to enter DROP with an effective participation date after June 1, 2011.

Term Life Insurance

Upon the death of a contributing member, there is paid a term life insurance benefit of \$15,000 (pro-rated for part-time members).

Member Contributions

Tier I - Prior to October 1, 2011, regular members contributed 5.0% of salary and certified police officers, firefighters, and correctional officers contributed 6.0% of salary. DROP participants continue to contribute during the DROP period, but receive a refund of these contributions and regular interest upon retirement. Beginning October 1, 2011, the contribution rates were increased to 7.25% for regular members and 8.25% for certified police officers, firefighters, and correctional officers. Beginning October 1, 2012, the contribution rates were increased to 7.50% for regular members and 8.50% for certified police officers, firefighters, and correctional officers.

Tier II – Regular members contribute 6.00% of salary and full-time certified firefighters, police officers, and correctional officers contribute 7.00% of salary.

Tier I & II - If positive investment performance results in a decrease in the total contribution rate paid by employers and employees participating in the System, the Retirement System of Alabama shall first reduce the employee contribution rate. “Regular Interest” is 4.00% which is the rate adopted by the Board and applied to the balance in each member’s account every year; however, if a member receives a refund of contributions, the interest rate applied to the refund is lower than the 4% regular rate (Based on Section 16-25-14-(g)(1)).

CONSULTING, LLC

The experience and dedication you deserve

July 9, 2013

Board of Control
Employees' Retirement System of Alabama
Montgomery, Alabama

Members of the Board:

In this report are submitted the results of the annual actuarial valuation of the Employees' Retirement System of Alabama, prepared as of September 30, 2012 in accordance with Section 36-27-23(p) of the act governing the operation of the System.

The purpose of this report is to provide a summary of the funded status of the system as of September 30, 2012, to recommend rates of contribution and to provide accounting information under Governmental Accounting Standards Board Statements No. 25 and 27 (GASB 25 and 27). While not verifying the data at source, the actuary performed tests for consistency and reasonability. The System was amended to provide a new benefit structure for members initially joining the System on or after January 1, 2013 (Tier II). There are no Tier II members included in the valuation as of September 30, 2012. However, for State employees we have received data from the Retirement System for Tier II members who joined during the first four months of 2013 and have used this data to determine the Tier II employer contribution rate for fiscal year ending September 30, 2015. For State policemen the Tier II employer contribution rates shown in this report have been estimated based on recent hires in Tier I.

On the basis of the valuation, it is recommended that the State make contributions to the Retirement System for State employees (members other than State policemen) at the rate of 13.45% of payroll for Tier I members and 13.31% for Tier II members. It is also recommended that the State make contributions to the Retirement System for State policemen at the rate of 38.37% of payroll for Tier I members and 32.45% for Tier II members for the fiscal year ending September 30, 2015. The contribution rates for local employers for the fiscal year beginning October 1, 2014 will be submitted in a separate report and will include the impact of all assumption changes and employer-elected changes through September 30, 2012.

The promised benefits of the System are included in the actuarially calculated contribution rates which are developed using the entry age normal cost method. Since the previous valuation the Board has adopted a valuation interest smoothing methodology. Five-year smoothed market value of assets is used for actuarial valuation purposes. However, the actuarial value of assets was set equal to the market value of assets as of September 30, 2012; five-year smoothing will commence again in future years. Gains and losses are reflected in the unfunded accrued liability that is being amortized by regular annual contributions as a level percentage of payroll, on the assumption that payroll will increase by 3.25% annually. The assumptions recommended by the actuary and adopted by the Board are in the aggregate reasonably related to the experience under the Fund and to reasonable expectations of anticipated experience under the Fund and meet the parameters for the disclosures under GASB 25 and 27.

We have prepared the Schedule of Funding Progress and Trend Information shown in the financial section of the Comprehensive Annual Financial Report, and all supporting schedules including the Schedule of Active Member Valuation Data, the Solvency Test and the Analysis of Financial Experience shown in the actuarial section of the Comprehensive Annual Financial Report.

This is to certify that the independent consulting actuary is a member of the American Academy of Actuaries and has experience in performing valuations for public retirement systems, that the valuation was prepared in accordance with principles of practice prescribed by the Actuarial Standards Board, and that the actuarial calculations were performed by qualified actuaries in accordance with accepted actuarial procedures, based on the current provisions of the retirement system and on actuarial assumptions that are internally consistent and reasonably based on the actual experience of the System.

Future actuarial results may differ significantly from the current results presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law. Since the potential impact of such factors is outside the scope of a normal annual actuarial valuation, an analysis of the range of results is not presented herein.

In our opinion the System is operating on an actuarially sound basis. Assuming that contributions to the System are made by the employer from year to year in the future at the rates recommended on the basis of the successive actuarial valuations, the continued sufficiency of the retirement fund to provide the benefits called for under the System may be safely anticipated.

The Table of Contents, which immediately follows, outlines the material contained in the report.

Summary of Actuarial Assumptions and Methods

Summary of Actuarial Assumptions and Methods

The assumptions and methods used in the valuation were selected based on the actuarial experience study prepared as of September 30, 2010, submitted to and adopted by the Board on January 27, 2012.

Ultimate Investment Rate of Return: 8% per annum, compounded annually, including price inflation at 3%.

Salary Increases: Representative values of the assumed annual rates of future salary increases are as follows and include inflation at 3.25% per annum:

Years of Service	Annual Rate (%)
0	7.25
1	7.25
2	6.00
3	5.50
4	5.25
5	5.25
6	5.25
7	5.00
8	5.00
9 to 13	4.75
14 to 16	4.50
17	4.00
18 & Over	3.75

The assumed annual rate of future salary increases for State Policemen is 5% per year for all years of service.

Separations Before Service Retirement: Representative values of the assumed annual rates of death, disability and withdrawal are shown in the following tables:

State and Local Employees - Male							
Annual Rate (%) of							
Age	Death †	Disability		Withdrawal			
		Years of Service		Years of Service			
		0-24	25+	0-4	5-9	10-20	20+
20	0.03	0.04		28.00			
25	0.03	0.06		19.50	10.00		
30	0.05	0.08		17.50	7.00	5.00	
35	0.08	0.10		16.00	6.00	4.75

RETIREMENT SYSTEMS OF ALABAMA

Actuarial Section

Employees' Retirement System

Summary of Actuarial Assumptions and Methods (Continued)

Death after Retirement: The rates of mortality for the period after service retirement are according to the sex distinct RP-2000 Combined Mortality Table Projected with Scale AA to 2015 set forward three years for males and two years for females. The rates of mortality for the period after disability retirement are according to the sex distinct RP-2000 Disabled Mortality Table.

Death in Active Service Benefit: For those eligible for service retirement who die in active service, it is assumed that 75% of beneficiaries will elect the lump sum death benefit and 25% will elect the Option 3 allowance.

Benefits Payable Upon Separation from Service: For active members who separate from service prior to eligibility for a service retirement allowance, the liability is assumed to be the greater of the value of the refund of contributions and the value of the deferred annuity.

Unused Sick Leave: 2.25% load on service retirement liabilities for active members (No load for Tier II members).

Percent Married: 100% of employees are assumed to be married, with the wife 3 years younger than the husband.

Actuarial Method: Individual entry age normal cost method. Actuarial gains and losses are reflected in the unfunded actuarial accrued liability.

Asset Method: Actuarial value. The actuarial value of assets recognizes a portion of the difference between the market value of assets and the expected value of assets, based on the assumed valuation rate of return. Each year, 20% of the difference between market value and expected actuarial value is recognized. The actuarial value of assets was set equal to the market value on September 30, 2012. Smoothing will commence in future years.

Liability for Current Inactive Members: Member Contribution Balance is multiplied by a factor of 2.5 for State Employees and 3.0 for Local Employees and State Policemen.

Valuation Interest Rate Smoothing: The valuation liabilities are calculated using a smoothed interest rate method. The interest rate assumed during the look forward period (currently 25 years from the valuation date) is the investment rate of return expected to be earned during the look forward period based on the actual rate of return earned during the look back period (currently 5 years) such that the average assumed rate of return over the combined 30 year period is equivalent to the assumed ultimate investment rate of return (currently 8.00%). The interest rate after the 25 year look forward period is the ultimate investment rate of return of 8.00%.

Corridor Limit on Interest Smoothing: The smoothed interest rate used during the 25 year look forward period is limited to a corridor of 0.50% around the ultimate investment rate of return.

Actuarial Cost Method

1. The valuation is prepared on the projected benefit basis, which is used to determine the present value of each member's expected benefit payable at retirement or death. The calculations are based on the member's age, years of service, sex, compensation, expected future salary increases, and an assumed future interest earnings rate (currently 8%). The calculations consider the probability of a member's death or termination of employment prior to becoming eligible for a benefit and the probability of the member terminating with a service, disability, or survivor's benefit. The present value of the expected benefits payable to active members is added to the present value of the expected future payments to retired members and beneficiaries to obtain the present value of all expected benefits payable to the present group of members and beneficiaries.
2. The employer contributions required to support the benefits of the System are determined following a level funding approach and consist of a normal contribution and an accrued liability contribution.
3. The normal contribution is determined using the "individual entry age normal" method. Under this method, a calculation is made to determine the uniform and constant percentage rate of employer contributions which, if applied to the compensation of each new member during the entire period of the member's anticipated covered service, would be required in addition to the contributions of the member to meet the cost of all benefits payable on the member's behalf.
4. The unfunded accrued liability contributions are determined by subtracting the current assets held by the System and the present value of prospective employer normal contributions and member contributions from the present value of expected benefits to be paid from the System.

Summary of Plan Provisions as Interpreted for Valuation Purposes

The Employees' Retirement System of Alabama (ERS) was established on October 1, 1945. The valuation considered amendments to the System effective through the valuation date. The following summary describes the main benefit and contribution provisions of the System as interpreted for the valuation.

Definitions

Average Final Compensation – The average compensation of a Tier I member is calculated using compensation for the 3 highest years in the last 10 years of creditable service. The average compensation of a Tier II member is calculated using compensation for the 5 highest years in the last 10 years of creditable service.

Membership Service – all service rendered while a member of the System and for which contributions are made.

Creditable Service – the sum of membership service, prior service, and any other previous service established as creditable in accordance with the provisions of the retirement law.

Annuity – payments for life derived from accumulated contributions of a member.

Pension – payments for life derived from the accumulated contributions of an employer.

Retirement Allowance – the sum of the annuity and pension payments.

RETIREMENT SYSTEMS OF ALABAMA

Actuarial Section

Employees' Retirement System

Summary of Plan Provisions (Continued)

Benefits – Members Classified as Other Than State Policemen

Service Retirement Allowance

Condition for Allowance	<p>Tier I - The retirement allowance is payable upon the request of a member who has completed 25 years of creditable service or who has attained age 60 and completed at least 10 years of creditable service.</p> <p>Tier II - The retirement allowance is payable upon the request of a member who has completed 10 years of creditable service and who has attained age 62. (age 56 with 10 years of creditable service for full-time certified firefighters, police officers, and correctional officers).</p>
Amount of Allowance	<p>Tier I - Upon service retirement, a member receives a retirement allowance equal to 2.0125% of the member's average final compensation multiplied by the number of years of creditable service. At retirement, a member receives one additional year of creditable service in determining the retirement allowance for each five years of service as a full-time certified firefighter, police officer, or correctional officer.</p> <p>Tier II - Upon service retirement, a member receives a retirement allowance equal to 1.65% of their average final compensation multiplied by the number of years of creditable service. The benefit is capped at 80% of the member's average final compensation.</p> <p>Tier I & II- Members may elect to receive a reduced retirement allowance in order to provide an allowance to a designated beneficiary after the member's death (see "Special Privileges at Retirement").</p>

Disability Retirement Allowance

Condition for Allowance	<p>A disability retirement allowance may be granted to a member who has 10 or more years of creditable service and becomes permanently incapacitated for duty before reaching eligibility for service retirement.</p>
Amount of Allowance	<p>Tier I - Upon disability retirement, a member receives a retirement allowance equal to 2.0125% of the member's average final compensation multiplied by the number of years of creditable service. At retirement, a member receives one additional year of creditable service in determining the retirement allowance for each five years of service as a full-time certified firefighter, police officer, or correctional officer.</p> <p>Tier II - Upon disability retirement, a member receives a retirement allowance equal to 1.65% of the member's average final compensation multiplied by the number of years of creditable service. The benefit is capped at 80% of the member's average final compensation.</p> <p>Tier I & II - Members may elect to receive a reduced retirement allowance in order to provide an allowance to a designated beneficiary after the member's death (see "Special Privileges at Retirement").</p>

Benefits Payable on
Separation of Service

A member who withdraws from service is entitled to receive his or her contributions with allowable interest. A member who has completed 10 years of creditable service may, after separation from service, continue membership in the System and file for service retirement after reaching age 60 (age 62 for Tier II members).

Benefits Payable upon
Death in Active Service

In the event of the death of a member eligible for service retirement, the designated beneficiary may elect: (1) to exercise Option 3 as defined under “Special Privileges at Retirement – All Members” or (2) to receive a return of member contributions and total earned interest plus a death benefit payable from the pre-retirement death benefit fund equal to the salary on which retirement contributions were made for the previous fiscal year (October 1 – September 30).*

In the event of the death of a member with more than one year of service who is not eligible to retire, the designated beneficiary shall receive the return of member contributions and total earned interest. Also, the designated beneficiary shall receive an additional death benefit payable from the pre-retirement death benefit fund equal to the salary on which retirement contributions were made for the previous fiscal year (October 1 – September 30).*

In the event of a job-related death of a member at any age with less than 1 year of service, the designated beneficiary shall receive the return of member contributions and total earned interest plus a death benefit payable from the pre-retirement death benefit fund equal to the annual earnable compensation of the member at the time of death.*

In the event of a non- job-related death of a member with less than 1 year of service, the designated beneficiary shall receive the return of member contributions and total earned interest plus a matching death benefit, which is limited to a maximum of \$5,000.

* However, if the death occurred more than 180 calendar days after the member’s last day in pay status or if the deceased member had applied for a refund of member contributions or terminated employment, the lump sum will be the same as if the member had less than one year of service and the death was not job-related.

Deferred Retirement Option Plan
(DROP)

Prior to March 25, 2011, a member may elect to participate in the Deferred Retirement Option Plan (DROP) upon completion of at least 25 years of creditable service (excluding sick leave) and attainment of at least 55 years of age. Under the DROP, the member may defer receipt of a retirement allowance and continue employment for a period not to exceed five years, nor to be less than three years. At the end of the period, the member may withdraw from active service and receive the retirement benefit calculated at the time of enrollment in the DROP, and also receive a payment for the deferred retirement benefits and employee contributions while participating in the DROP and interest earned on DROP deposits. The effect of Act 2011-27 is that no new participants will be allowed to enter DROP with an effective participation date after June 1, 2011.

RETIREMENT SYSTEMS OF ALABAMA

Actuarial Section

Employees' Retirement System

Summary of Plan Provisions (Continued)

Member Contributions

Tier I - Prior to October 1, 2011, regular members contributed 5.0% of salary and certified police officers, firefighters, and correctional officers contributed 6.0% of salary. DROP participants continue to contribute during the DROP period, but receive a refund of these contributions and regular interest upon retirement. Beginning October 1, 2011, the contribution rates were increased to 7.25% for regular members and 8.25% for certified police officers, firefighters, and correctional officers, for all State employees, and for local employees whose employers elected to do so. Beginning October 1, 2012, the contribution rates were increased to 7.50% for regular members and 8.50% for certified police officers, firefighters, and correctional officers, for all State employees, and for local employees whose employers elected to do so.

Tier II – Regular members contribute 6.00% of salary and full-time certified firefighters, police officers, and correctional officers contribute 7.00% of salary.

Tier I & II - If positive investment performance results in a decrease in the total contribution rate paid by employers and employees participating in the System, the Retirement System of Alabama shall first reduce the employee contribution rate. "Regular Interest" is 4.00% which is the rate adopted by the Board and applied to the balance in each member's account every year; however, if a member receives a refund of contributions, the interest rate applied to the refund is lower than the 4% regular rate (Based on Section 36-27-16.3(c)(1)).

Benefits – Members Classified as State Policemen

Service Retirement Allowance

Condition of Allowance Tier I - A retirement allowance is payable upon the request of a member who has completed 25 years of creditable service or who has attained age 52 and completed at least 10 years of creditable service.

Tier II - A retirement allowance is payable upon the request of any member who has attained age 56 and completed at least 10 years of creditable service.

Amount of Allowance Tier I - Upon service retirement, a member receives a retirement allowance equal to 2.875% of the member's average final compensation multiplied by the number of years of creditable service.

A member who has attained 20 or more years of creditable service and retires prior to age 60 is eligible to receive a “bonus service credit” up to 4 years as follows:

- Age 56 or older – bonus service of 4 years reduced by 1 month for each month over the age of 56.
- Age 52 to 56 – bonus service of 4 years.
- Age 52 or less (disability retirement only) – bonus service of 4 years.
- Age 52 or less with 25 or more years of service – bonus service of 4 years.

Tier II - Upon service retirement, a member receives a retirement allowance equal to 2.375% of the member's average final compensation multiplied by the number of years of creditable service. The benefit is capped at 80.0% of the member's average final compensation.

Disability Retirement Allowance

Condition for Allowance A disability retirement allowance may be granted to a member who has 10 or more years of creditable service or who becomes disabled as a result of employment in the line of duty without regard to years of creditable service, and who becomes permanently incapacitated, mentally or physically, for the further performance of duty before reaching the minimum age for service retirement.

Amount of Allowance Tier I - Upon disability retirement, a member receives a retirement allowance equal to 2.875% of the member's average final compensation multiplied by the number of years of creditable service.

Tier II- Upon disability retirement, a member receives a retirement allowance equal to 2.375% of the member's average final compensation multiplied by the number of years of creditable service.

Benefits Payable upon Separation from Service

A member who withdraws from service is entitled to receive a return of member contributions with allowable interest. A member who has completed 10 years of creditable service may, after separation from service, continue in the membership of the System and file for service retirement after reaching age 52 (age 56 for Tier II members).

RETIREMENT SYSTEMS OF ALABAMA

Actuarial Section

Employees' Retirement System

Summary of Plan Provisions (Continued)

Benefits Payable upon Death in Active Service

In the event of the death of a member who is eligible for service retirement, the designated beneficiary may elect: (1) to exercise Option 3 as defined below under "Special Privileges at Retirement – All Members" or (2) to receive a return of member contributions and total earned interest plus a death benefit payable from the pre-retirement death benefit fund equal to the salary on which the member made retirement contributions for the previous fiscal year (October 1 – September 30).*

In the event of the death of a member with more than one year of service who is not eligible to retire, the designated beneficiary shall receive the return of member contributions and total earned interest. Also, the designated beneficiary shall receive an additional death benefit payable from the pre-retirement death benefit fund equal to the salary on which the member made retirement contributions for the previous fiscal year (October 1 – September 30).*

In the event of a job-related death of a member at any age with less than 1 year of service, the designated beneficiary shall receive the return of member contributions and total earned interest plus a death benefit payable from the pre-retirement death benefit fund equal to the annual earnable compensation of the member at the time of death.*

In the event of a non- job-related death of a member with less than 1 year of service, the designated beneficiary shall receive the return of member contributions and total earned interest plus a matching death benefit which is limited to a maximum of \$5,000.

*However, if the death occurred more than 180 calendar days after the member's last day in pay status, or if the deceased member had applied for a refund of member contributions or terminated employment, the lump sum will be the same as if the member had less than one year of service and the death was not job-related.

Deferred Retirement Option Plan (DROP)

A member may elect to participate in the Deferred Retirement Option Plan (DROP) upon completion of at least 25 years of creditable service (excluding sick leave) and attainment of at least 52 years of age. Under the DROP, the member may defer receipt of a retirement allowance and continue employment for a period not to exceed five years, nor to be less than three years. At the end of the period, the member may withdraw from active service and receive the retirement benefit based upon the retirement benefit calculated at the time of enrollment in the DROP, and also receive a payment for the deferred retirement benefits and employee contributions while participating in the DROP and interest earned on DROP deposits. The effect of Act 2011-27 is that no new participants will be allowed to enter DROP with an effective participation date after June 1, 2011.

Member Contributions

Each member contributes 10% of salary. DROP participants continue to contribute during the DROP period, but receive a refund of these contributions with interest upon retirement.

Special Privileges at Retirement – All Members

In lieu of the full retirement allowance, a member may, at retirement, elect to receive a reduced retirement allowance equal in value to the full retirement allowance, with the provision that:

- Option 1: If the member dies before the annuity payments equal or exceed the present value of the member's annuity at the date of retirement, the balance is paid to the designated beneficiary or to the member's estate, or
- Option 2: After the member's death, the member's allowance is continued throughout the life of the designated beneficiary, or
- Option 3: After the member's death, one-half of the member's retirement allowance is continued throughout the life of the designated beneficiary, or
- Option 4: Some other benefit is paid either to the member or the designated beneficiary, provided such benefit, together with the reduced retirement allowance, is of equivalent actuarial value to the member's retirement allowance and is approved by the Board of Control.

Board of Control
Alabama Judicial Retirement Fund
Montgomery, Alabama

Members of the Board:

In this report are submitted the results of the annual valuation of the assets and liabilities of the Alabama Judicial Retirement Fund, prepared as of September 30, 2012 in accordance with Section 36-27-23(p) of the act governing the operation of the Fund.

The purpose of this report is to provide a summary of the funded status of the Fund as of September 30, 2012, to recommend rates of contribution and to provide accounting information under Governmental Accounting Standards Board Statements No. 25 and 27 (GASB 25 and 27). Data regarding the membership of the Fund for use as a basis of the valuation was furnished by the Retirement Fund office. While not verifying the data at source, the actuary performed tests for consistency and reasonability.

On the basis of the valuation, we have determined an employer contribution rate of 35.24% of payroll based on a 27 year amortization period for the fiscal year ending September 30, 2015.

The promised benefits of the Fund are included in the actuarially calculated contribution rates which are developed using the Entry Age Normal cost method. Since the previous valuation, the Board has adopted a valuation interest rate smoothing methodology. Five-year smoothed market value of assets is used for actuarial valuation purposes. However, the actuarial value of assets was set equal to the market value of assets on September 30, 2012; five-year smoothing will commence again in future years. Gains and losses are reflected in the unfunded accrued liability that is being amortized by regular annual contributions as a level percentage of payroll, on the assumption that payroll will increase by 3.25% annually. The assumptions recommended by the actuary and adopted by the Board are in the aggregate reasonably related to the experience under the Fund and to reasonable expectations of anticipated experience under the Fund and meet the parameters for the disclosures under GASB 25 and 27.

We have prepared the Schedule of Funding Progress and Trend Information shown in the financial section of the Annual Report, and all supporting schedules including the Schedule of Active Member Valuation Data, the Solvency Test and the Analysis of Financial Experience shown in the actuarial section of the Annual Report.

This is to certify that the independent consulting actuary is a member of the American Academy of Actuaries and has experience in performing valuations for public retirement systems, that the valuation was prepared in accordance with principles of practice prescribed by the Actuarial Standards Board, and that the actuarial calculations were performed by qualified actuaries in accordance with accepted actuarial procedures, based on the current provisions of the Retirement Fund and on actuarial assumptions that are internally consistent and reasonably based on the actual experience of the Fund.

Future actuarial results may differ significantly from the current results presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law. Since the potential impact of such factors is outside the scope of a normal annual actuarial valuation, an analysis of the range of results is not presented herein.

In our opinion the Fund is operating on an actuarially sound basis. Assuming that contributions to the Fund are made by the employer from year to year in the future at the rates recommended on the basis of the successive actuarial valuations, the continued sufficiency of the retirement fund to provide the benefits called for under the Fund may be safely anticipated.

The Table of Contents, which immediately follows, outlines the material contained in the report.

Summary of Actuarial Assumptions and Methods

The assumptions and methods used in the valuation are based on the actuarial experience study prepared as of September 30, 2010, submitted to and adopted by the Board on January 27, 2012.

Ultimate Investment Rate of Return: 8% per annum, compounded annually, including inflation at 3%.

Salary Increases: 4% per annum, compounded annually, including wage inflation at 3.25%.

Separations Before Retirement: Representative values of the assumed annual rates of withdrawal, death and disability are as follows:

Age	Annual Rate (%) of			
	Withdrawal	Death †		Disability ‡
		Male	Female	
30	2.50	0.03	0.02	0.04
35	2.50	0.05	0.03	0.08
40	2.50	0.07	0.04	0.14
45	2.50	0.09	0.07	0.22
50	2.50	0.12	0.10	0.33
55	2.50	0.20	0.19	0.50
60	2.50	0.40	0.38	0.79
64	2.50	0.69	0.63	1.14

† Rates of pre-retirement mortality are according to the sex distinct RP-2000 Combined Mortality Table Projected with Scale AA to 2015 set forward one year for females with an adjustment factor of 0.75% for males and 0.70% for females.

‡ Disability rates turn off at retirement eligibility.

Rates of Retirement: Before age 70, 30% of members are assumed to retire in the first year of eligibility and 10% in each year thereafter. 50% of the remaining members are assumed to retire each year between age 70 and 74, and all remaining members are assumed to retire at age 75.

Deaths after Retirement: Rates of mortality for the period after service retirement are according to the RP-2000 Mortality Table with projection scale AA to 2015 set forward one year for females. The RP-2000 Disabled Mortality Table adjusted for males by a factor of 0.85 is used for the period after disability retirement. Representative values of assumed mortality are as follows:

Age	Annual Rate (%) of Death After			
	Service Retirement		Disability Retirement	
	Male	Female	Male	Female
55	0.27	0.27	3.01	1.65
60	0.53	0.54	3.57	2.18
65	1.03	1.02	4.27	2.80
70	1.77	1.72	5.32	3.76
75	3.06	2.75	6.98	5.22
80	5.54	4.57	9.30	7.23
85	9.97	7.89	12.04	10.02
90	17.27	13.82	15.59	14.01

Percent Married: 85% of active members are assumed to be married with the husband 4 years older than the wife.

Actuarial Method: Individual Entry age normal. Gains and losses are reflected in the unfunded accrued liability.

Assets: Actuarial Value. The actuarial value of assets recognizes a portion of the difference between the market value of assets and the expected value of assets, based on the assumed valuation rate of return. Each year 20% of the difference between market value and expected actuarial value is recognized.

Liability for Current Inactive Members: Member Contribution Balance is multiplied by a factor of 3.0.

Post Retirement Increases: Allowances of retired members and spouses who receive benefits based on the salaries prescribed by law for the position are assumed to increase by 3.25% per year. The members' actual salaries at retirement are assumed to be equal to the salary prescribed by law for their position.

For district judges, a factor of 1.5% is applied to the liability for prospective spouses benefits to account for salary increases expected to occur between the member's retirement and death.

Benefits Payable upon Separation from Service: Active members who terminated from service prior to becoming eligible for a benefit are assumed to receive a refund of contributions with interest assumed to be 4% per year.

Valuation Interest Rate Smoothing: The valuation liabilities are calculated using a smoothed interest rate method. The interest rate assumed during the look forward period (currently 25 year from the valuation date) is the investment rate of return expected to be earned during the look forward period based on the actual rate of return earned during the look back period (currently 5 years) such that the average assumed rate of return over the combined 30 year period is equivalent to the assumed ultimate investment rate of return (currently 8.00%). The interest rate after the 25 year look forward period is the ultimate investment rate of return of 8.00%.

Corridor Limit on Interest Smoothing: The smoothed interest rate used during the 25 year look forward period is limited to a corridor of 0.50% around the ultimate investment rate of return.

Summary of Plan Provisions as Interpreted for Valuation Purposes

The Judicial Retirement Fund (JRF) was established September 18, 1973. The valuation considered amendments to the JRF through the valuation date. The following summary describes the main benefit and contribution provisions of the JRF as interpreted for the valuation.

Membership

Any justice of the Supreme Court, judge of the Court of Civil Appeals, judge of the Court of Criminal Appeals, judge of the Circuit Court, or officeholder of any newly created judicial office receiving compensation from the State Treasury became a member of the JRF if the member was holding office on the effective date of the Act and elected to come under its provisions. Any such justice or judge elected or appointed to office after the effective date of the Act or any district or probate judge elected or appointed to office after October 10, 1975 or October 1, 1976, respectively, automatically becomes a member. Certain other district and probate judges as well as certain former county court judges, district attorneys, or assistant district attorneys serving as circuit judges and certain supernumerary judges and justices may also elect to become a member.

Credited Service

Credited service is service as a member plus certain periods of previous service credited in accordance with the provisions of the Act.

Benefits

Service Retirement Benefit

Condition of Benefit

A retirement benefit is payable upon request of a member who has:

- Completed 12 years of credited service and has attained age 65, or
- Completed 15 years of credited service and whose age plus service equals or exceeds 77, or
- Completed at least 18 years of credited service or three full terms as a judge or justice, or
- Completed 10 years of credited service and has attained age 70

However, a judge who became a member on or after July 30, 1979 or who is a district or probate judge must meet the following age and service requirement combinations in order to be eligible to retire:

- Completed 12 years of credited service and attained age 65, or
- Completed at least 15 years of credited service and attained age 60, and whose age plus service equals or exceeds 77, or
- Completed 10 years of credited service and attained age 70, or
- Completed 25 years of service or 24 years of service provided the member purchases one year of service prior to retirement, regardless of age.

Amount of Benefit	<p>The service retirement benefit for a member is equal to:</p> <ul style="list-style-type: none"> (a) For circuit or appellate judges who were members prior to July 30, 1979, 75% of the salary prescribed by law for the position from which the member retires. (b) For circuit and appellate judges who assumed office on or after July 30, 1979, 75% of the member's salary at the time of separation from service. (c) For district judges, 75% of the position's salary immediately prior to retirement. (d) For probate judges, 75% of the member's salary at the time of separation from service.
Disability Retirement Benefit	
Condition of Benefit	<p>A disability retirement benefit is payable to a member who becomes permanently, physically or mentally, unable to carry out his duties on a full-time basis, provided the member has completed five or more years of credited service.</p>
Amount of Benefit	<p>The disability retirement benefit for a member other than a district or probate judge who was a member prior to July 30, 1979 is equal to 25% of the salary prescribed by law for the position from which the member retires on disability plus 10% of such salary for each year of credited service in excess of five years. The disability retirement benefit is subject to a minimum of 30% and a maximum of 75% of such salary.</p> <p>The disability retirement benefit for a judge who became a member on or after July 30, 1979 or who is a district or probate judge is equal to 25% of his salary immediately prior to retirement plus 10% of such salary for each year of credited service in excess of five years. The disability retirement benefit is subject to a minimum of 30% and a maximum of 75% of such salary.</p>
Spousal Benefits	
Condition of Benefit	<p>Upon the death of an active, inactive or retired member with at least 5 years of creditable service, a death benefit is payable to the member's spouse.</p>
Amount of Benefit	<p>The death benefit for the spouse of a judge other than a district or probate judge consists of a yearly benefit equivalent to 3% of the salary prescribed by law for the position of the former member for each year of service, not to exceed 30% of such salary.</p> <p>The death benefit payable to the spouse of a district judge consists of a yearly benefit equal to 3% of the position's salary prescribed by law at the time of death for each year of service not to exceed 30% of such salary.</p> <p>The death benefit for the spouse of a probate judge is a yearly benefit equal to the greater of \$480 for each year of credited service to a maximum of 10 years, or 3% of the member's salary at the time of separation from service for each year of credited service not to exceed 30% of such salary.</p> <p>The benefit is payable for the spouse's life or until his or her remarriage.</p>

RETIREMENT SYSTEMS OF ALABAMA

Actuarial Section

Judicial Retirement Fund

Summary of Plan Provisions (Continued)

Benefit Payable on Separation from Service

If a member terminates service and elects not to withdraw his or her contributions and accrued interest from the JRF, the member is eligible to receive any of the benefits for which the member has sufficient creditable service upon reaching an eligible retirement age.

A member terminating service prior to reaching eligibility for retirement benefits may elect to receive a return of contributions and accrued interest. "Regular Interest" is 4% which is the rate adopted by the Board and applied to the balance in each member's account every year; however, if a member receives a refund of contributions, the interest rate applied to the refund is lower than the 4% regular rate (Based on Section 36-27-16.3(c)(1)).

Member Contributions

Prior to October 1, 2011, each member contributes 6% of salary.

Beginning October 1, 2011, each member will contribute 8.25% of salary.

Beginning October 1, 2012, each member will contribute 8.50% of salary.

If a positive investment performance results in a decrease in the total contribution rate paid by employers and employees participating in the System, the Retirement Systems of Alabama shall first reduce the employee contribution rate.

State Contributions

The State makes contributions, which, in addition to the members' contributions, are sufficient to carry out the provisions of the Act.
