## **INDEPENDENT AUDITOR'S REPORT**

To the Pension Board of the City of Birmingham Firemen's and Policemen's Supplemental Pension System Birmingham, Alabama

We have audited the accompanying financial statements of the City of Birmingham Firemen's and Policemen's Supplemental Pension System ("the Plan") which comprise the statement of fiduciary net position as of June 30, 2017, and the related statement of changes in fiduciary net position for the year ended, and the related notes to the financial statements, as listed in the table of contents.

## Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

### Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

To the Pension Board of the City of Birmingham Firemen's and Policemen's Supplemental Pension System Page 2

# Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the net position of the City of Birmingham Firemen's and Policemen's Supplemental Pension System, as of June 30, 2017, and the changes in net position thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

## **Other Matters**

Accounting principles generally accepted in the United States of America require that the schedules identified in the table of contents as required supplementary information be presented to supplement the financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during the audit of the basic financial statements. We do not express an opinion or provide assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide assurance.

Management has omitted management's discussion and analysis that accounting principles generally accepted in the United States of America require to be presented to supplement the basic financial statements. Such missing information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. Our opinion on the basic financial statements is not affected by this missing information.

December 9, 2017

Pauk, Fuley White 6.

Net Position Restricted for Pension Benefits	
End of the Year at Market Value	\$ 43,175,285

The notes are an integral part of the financial statements.

#### 1. <u>PLAN DESCRIPTION</u>

The City of Birmingham Firemen's and Policemen's Supplemental Pension System (the "Plan") - This system covers sworn firemen and policemen and provides retirement benefits for twenty years of service. Those hired on or subsequent to May 2, 1978, contribute 5.22% and the City contributes 5.24%. The plan is funded by contributions from employees, the City, and income from the investment of accumulated funds. The plan was established by state law and is administered by a board of managers.

#### 2. <u>SIGNIFICANT ACCOUNTING POLICIES</u>

**Basis of Accounting** – The Plan's financial statements are prepared using the accrual basis of accounting. Plan member contributions are recognized in the period in which the contributions are due. Employer contributions to each plan are recognized when due. Benefits and refunds are recognized when due and payable in accordance with the terms of the plan.

<u>**Reporting Entity**</u> - The financial statements presented are only for the City of Birmingham Firemen's and Policemen's Supplemental Pension System and are not intended to present the basic financial statements of the City of Birmingham, Alabama (the "City").

The City of Birmingham Firemen's and Policemen's Supplemental Pension System is included in the City's Comprehensive Annual Financial Report (CAFR) for the year ended June 30, 2017. Anyone wishing further information about the City is referred to the City's CAFR.

The City of Birmingham Firemen's and Policemen's Supplemental Pension System is a pension trust fund (fiduciary fund type) of the City which accounts for the single employer defined benefit pension plan for employees. The provisions of the Plan provide for retirement, disability and survivor benefits.

<u>Financial Statement Presentation</u> - The Plan adopted Governmental Accounting Standards Board (GASB) Statement No. 67 *Financial Reporting for Pension Plans* for the fiscal year ended June 30, 2014. In addition to other disclosures, GASB Statement No. 67 requires the following schedules be included in the Required Supplementary Information section of this report:

- A 10-year schedule of changes in the net pensionliability.
- A 10-year schedule of contributions.
- A 10-year schedule of the annual money-weighted rate of return on pension plan investments.

Until a full 10-year trend is compiled, the Plan will present information for those years for which information is available.

**Estimates** – The preparation of financial statements prepared in conformity with generally accepted accounting principles requires the plan administrator to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

#### 2. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

**Deposits & Investments** – Cash and cash equivalents include cash on hand, demand deposits, savings accounts, and short-term investments with maturities of three months or less at the time of purchase.

The Plan's investments are stated at fair value. Quoted market prices are used to value investments. Investment transactions are recorded on the trade date. Realized gains and losses from sales of securities are determined using the average cost basis. In accordance with the provisions of the Plan in order to state investments at market value, net unrealized appreciation or depreciation for the year is reflected in the statement of changes in pension net position.

Actuarial Present Value of Accumulated Plan Benefits – Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on employees' compensation during their last ten years of credited service. The accumulated plan benefits for active employees are based on their average compensation during the five years ending on the date as of which the benefit information is presented (the valuation date). Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included, to the extent they are deemed attributable to employee service rendered to the valuation date. Benefits to be provided via annuity contracts excluded from Plan assets are excluded from accumulated plan benefits.

The actuarial present value of accumulated plan benefits is determined by an actuary from The Segal Group, Inc. and it is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuations as of June 30, 2017 were (a) life expectancy of participants (using the RP-2014 Blue Collar Employee Mortality Table), (b) retirement age assumptions, and (c) investment return. The assumed average rate of return for the 2017 valuation was 7.50%. The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

#### 3. <u>FUNDING POLICY</u>

The contribution requirements of the plan members are established and may be amended by the State Legislature. Plan members were required to contribute 5.22% of their annual covered salary in 2017. The City was required to contribute at a rate of 5.24% of the employees annual covered salary for 2017. All contributions made during 2017 were cash contributions. Administrative costs of the Plan are financed through investment earnings.

#### 4. <u>BENEFITS</u>

A participant retiring after 20 years of credited service is entitled to a benefit which is calculated as 50% of final average salary.

The Plan also provides adjusted benefits, in the case of early retirement and death or disability of a participant. Benefit provisions are established and may be amended by the City.

#### 5. <u>VESTING</u>

Participants are at all times fully vested in their individual contributions to the Plan. Participants become fully vested in the retirement benefits attributable to them under the Plan, upon the completion of twenty years of continuous service with the City as a Public Safety employee.

#### 6. <u>INVESTMENTS</u>

The Plan categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The Plan has the following recurring fair value measurements as of June 30, 2017:

	Fair Value Measure Using				
			Quoted prices in		
			active markets	Significant other	Significant
		Fair	for identical assets	observable inputs	unobservable inputs
Investment type		Value	(Level I)	(Level II)	(Level III)
U.S. Treasury Bonds & Notes		578,047	578,047	-	-
U.S. Government Agency					
Obligations		1,472,971	-	1,472,971	-
U.S. Corporate Debt		7,806,629	-	7,806,629	-
Alternatives		5,734,839	-	-	5,734,839
U.S. Corporate Stock		26,523,231	26,523,231		
	\$	42,115,717	\$ 27,101,278	\$ 9,279,600	\$ 5,734,839

Debt and equity securities classified in Level 1 of the fair value hierarchy are valued using prices quoted in active markets for those securities. Debt securities classified in Level 2 of the fair value hierarchy are valued using a matrix pricing technique. Matrix pricing is used to value securities based on the securities' relationship to benchmark quoted prices. Alternative investments classified in Level 3 are valued using discounted cash flow techniques, comparable transactions, and publicly quoted companies methods.

The valuation method for investments measured at the net asset value (NAV) per share (or its equivalent) is presented on the following table.

Investments Measured at the NAV

	Fair Value	Redemption Frequency (if Currently Eligible)	Redemption Notice Period

#### 6. <u>INVESTMENTS (CONTINUED)</u>

# Strategy Overview

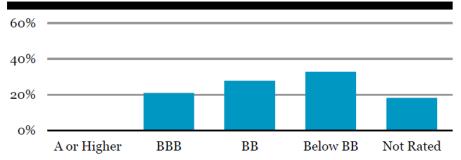

BREIF seeks to generate long-term total return, with an emphasis on current income, by primarily investing in a broad range of real estate debt investments. At least 80% of BREIF's Managed Assets will be invested in liquid investments in public and private real estate debt, including, but not limited to, commercial mortgage backed securities ("CMBS"), mortgages, loans, mezzanine and other forms of debt and equity interests in collateralized debt obligation vehicles ("CLOS"), collateralized loan obligation vehicles ("CLOS"), real estate investment trusts ("REITs"), listed vehicles and other entities that invest in real estate debt as one of their core businesses.

Avg Maturity	4.7 years	Non-US %	6.7%

#### Data as of July 31, 2017

# **Ratings Distribution**

<u>Interest Rate Risk</u> - is the risk that changes in interest rates will adversely affect the fair value of an investment. Duration (period of time to maturity or redemption) is the primary measure of the sensitivity of investment risk. The Plan has a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates.

<u>Credit Risk</u> - is the risk that an issuer or other counterparty to an investment will not fulfill its obligation. The Board of Managers recognizes that some risk is necessary to produce long-term investment results that are sufficient to meet the Plan's objectives. However, the investment managers are to make reasonable efforts to control risk, and will be evaluated regularly to ensure that the risk assumed is commensurate with the given investment style and objectives.

#### 6. **INVESTMENTS (CONTINUED)**

<u>*Custodial Credit Risk*</u> - is the risk that the party holding the funds might not be able to pay those funds to the Trust upon maturity or demand. Bank deposits are covered by federal depository insurance (FDIC) or are collateralized by a multiple financial institution collateral pool administered by the State Treasurer.

<u>Concentration of Investments</u> - the Plan did not hold investments in any one organization that represented 5 percent or more of the Pension Plan's fiduciary net position.

Fair Value of Investments - Investments are reported at fair value, based on quoted market prices.

#### 7. <u>NET PENSION LIABILITY:</u>

The components of the net pension liability of the Plan at June 30, 2017 were as follows:

Total Pension Liability	<u>\$ 99,890,669</u>
Plan Fiduciary Net Position	43,175,285
The Plan's Net Pension Liability	\$ 56,715,384
Plan Fiduciary Net Position as a percentage of Total Pension Liability	43.22%

Actuarial Assumptions:

The total pension liability was determined by an actuarial valuation as of July 1, 2016, using the following actuarial assumptions, applied to all periods included in the measurement, with the results rolled forward to June 30, 2017:

Inflation	2.50%
Salary increases	2.50%, plus age-related salary scale based on participant group
Investment rate of return	7.50%, including inflation, net of pension plan investment expense

Health Mortality rates were based on the sex distinct RP-2014 Blue Collar Employee Mortality Table, set forward two years for males and four years for females. Disabled Mortality rates were based on the sex distinct RP-2014 Disabled Retiree Mortality Table. All mortality tables are projected generationally with Scale MP-2015.

The actuarial assumptions used in the July 1, 2016 valuation were based on the results of an experience study for the period July 1, 2010 to June 30, 2015.

#### 7. <u>NET PENSION LIABILITY (CONTINUED):</u>

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the pension plan's target asset allocation as of June 30, 2017 are summarized in the following table:

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return
Large cap domestic		
equity	35%	6.9%
Small and mid-cap		
domestic equity	10%	7.8%
International equity	20%	6.7%
Intermediate fixed	10%	2.9%
income		
Short-term high yield		
fixed income	5%	4.9%
Alternative debt		
strategy	3%	2.9%
Hedge funds	<u>17%</u>	3.9%
Total	100%	

Discount rate: The blended discount rate used to measure the total pension liability was 7.50%. The projection of cash flows used to determine the discount rate assumed contributions of 5.22% of compensation from plan members, and 5.83% of compensation from the City effective July 1, 2017. For this purpose, only employer contributions that are intended to fund benefits of current plan members and their beneficiaries are included. Projected employer contributions that are intended to fund the service costs of future plan members. Based on these assumptions, the System's fiduciary net position was not projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on the System's investments was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the net pension liability to changes in the discount rate. The following presents the net pension liability of the County, calculated using the discount rate of 7.50%, as well as what the Plan's net pension liability would be if it were calculated using a discount rate that is one-percentage-point lower (6.50%) or one-percentage-point higher (8.50%) than the current rate:

	1% Decrease (6.50%)	Current Discount (7.50%)	1% Increase (8.50%)
Plan's net pension liability	\$61,787,411	\$56,715,384	\$51,978,111

#### 8. <u>MEMBERSHIP INFORMATION</u>

Membership of the Plan consisted of the following at July 1, 2016, the date of the latest actuarial valuation:

Active employees	1,439
Retired Participants and Beneficiaries	388
Inactive members due a refund of contributions_	12
	1,839

#### 9. DATE OF MANAGEMENT'S REVIEW

In preparing these financial statements, the Plan has evaluated events and transactions for potential recognition or disclosure through the date of this report.

the Total Pension Liability	43.22%	43.60%	40.99%	43.53%
Covered Employee Payroll	\$ 83,067,835	\$83,308,621	\$ 80,407,165	\$ 78,050,785
The Plan's Net Pension Liability as a				
Percentage of covered Employee Payroll	68.28%	68.68%	91.03%	88.20%
Schedule of Investment Returns Annual money-weighted rate of return, net of investment expense	10.51%	.19%	2.20%	

Notes to the above schedule:

*Benefit changes:* There were no plan changes reflected for the first time in the June 30, 2017 disclosure. In the June 30, 2016 disclosure, the Retirement and Relief contribution rate increased from 6.50% to 7.00%, which impacted the transfers from this System to the Retirement and Relief System.

*Change of assumptions:* There were no assumption changes reflected for the first time in the June 30, 2017 disclosure. The following assumptions changes were reflected for the first time in the June 30, 2016 disclosure:

- $\blacktriangleright$  The investment return assumption was increased from 7.00% to 7.50%.
- $\blacktriangleright$  The inflation assumption was lowered from 3.00% to 2.50%.
- > The payroll growth rate assumption (used for determining the amortization of the unfunded actuarial accrued liability) was lowered from 3.00% to 2.50%.
- > The salary scale assumption was restructured from an age-related to a service-related set of rates to reflect actual plan experience.
- The pre-retirement mortality assumption was changed from the sex-distinct RP-2000 Combined Healthy Mortality Table, with rates set forward two years for both males and females, to the sex-distinct RP-2014 Blue Collar Employee Mortality Table with rates set forward two years for males and four years for females. This table is projected generationally with Scale MP-2015.
- The post-retirement mortality assumption for healthy annuitants was changed from the sex-distinct RP-2000 Combined Healthy Mortality Table, with rates set forward two years for both males and females, to the sex-distinct RP-2014 Blue Collar Healthy Annuitant Mortality Table with rates set forward two years for males and four years for females. This table is projected generationally with Scale MP-2015.
- The mortality assumption for disable retires was changed from the sex-distinct RP-2000 Disabled Retiree Mortality Table, multiplied by 70%, to the sex-distinct RP-2014 Disabled Retiree Mortality Table. This table is projected generationally with Scale MP-2015
- Retirement rates were modified for all groups to better reflect actual experience and expected future patterns.
- > The BackDROP utilization assumption was lowered from 100% for both Fire and Police to 90% for Firefighters and 70% for Police Officers.
- The turnover assumption was modified from a five-year select-and ultimate assumption based on age to an assumption based on years of service. The rates reflect higher rates during earlier periods of employment. The ultimate rate was set to zero for Police and Fire employees with twenty or more years of service.
- The disability rates were modified to better reflect actual experiences and expected future patterns. The on-the-job disability assumption was lowered from 100% to 80% of all disabilities for Firefighters only.
- The percent married assumption was lowered from 80% to 75%.

## THE CITY OF BIRMINGHAM FIREMEN'S AND POLICEMEN'S SUPPLEMENTAL PENSION SYSTEM REQUIRED SUPPLEMENTARY INFORMATION FOR YEAR ENDED JUNE 30, 2017

#### **Schedule of the Employer's Contributions**

	2017	2016	2015	2014
Actuarially Determined Contributions*	\$5,092,012	\$4,960,548	\$ 6,038,436	\$ 5,839,810
Contributions in Relation to the				
Actuarially Determined Contributions	4,354,660	4,364,213	4,212,776	4,090,689
Contribution Deficiency (Excess)	737,352	596,335	1,825,660	1,749,121
Covered Employee Payroll**	83,067,835	83,308,621	80,407,165	78,050,785
Contributions as a Percentage of Covered Employee Payroll	5.24%	5.24%	5.24%	5.24%

Notes to Schedule:

\*The actuarially determined contribution is equal to the total calculated contribution in the most recent actuarial valuation, minus the portion expected to be covered by employee contributions.

\*\*Payroll is estimated based on the actual employee contributions received and a 5.22% contribution rate. Historical information prior to implementation of GASB 67/68 is not required.

## THE CITY OF BIRMINGHAM FIREMEN'S AND POLICEMEN'S SUPPLEMENTAL PENSION SYSTEM NOTES TO REQUIRED SUPPLEMENTARY INFORMATION

1. The information presented in the required supplementary schedules was determined as part of the actuarial valuations at the dates indicated. Additional information as of the latest actuarial valuation follows.

Valuation date	7/1/16
Actuarial cost method	Entry Age
Amortization method	Level percent of payroll, using 2.50% annual increases
Remaining amortization period	Rolling 30 years
Asset valuation method	Market value of assets less unrecognized returns in each of the last five years. Unrecognized return is equal to the difference between the actual market return and the expected return on the market value, and is recognized over a 5 year period, further adjusted, if necessary, to be within 20% of the market value.
Actuarial assumptions:	
Investment rate of return	7.50%, including inflation, net of pension plan investment expense
Projected salary increase participant group	2.50%, plus age-related salary scale based on
Inflation rate	2.50%
Cost of living adjustments	N/A
