The **Purpose** of the Public Safety Personnel Retirement System is to provide *uniform, consistent, and equitable* statewide retirement programs for those who have been entrusted to our care.

This is accomplished through our **Governing Principles** where

A spirit of **Gratitude** guides all our actions, thereby *fostering* a culture of unparalleled *service* to others through which *growth* is nurtured, *progress* is developed, and *results* are achieved.

**Trust** is engendered by *transparency* of our decisions and *accountability* for our actions as measured against sound *expectations*.

We recognize that **Respect** for the *individual* strengthens the *whole* and is only earned by genuinely *understanding* and *fulfilling* the needs of others through *appropriate, timely* and *clear communication* and *education*.

The Honorable Douglas A. Ducey  
Governor of the State of Arizona  
Executive Tower  
1700 W. Washington  
Phoenix, Arizona 85007

Dear Governor Ducey:

On behalf of the Board of the Public Safety Personnel Retirement System (PSPRS), I respectfully present this Comprehensive Annual Financial Report for the year ended June 30, 2017. While this report focuses on the financial and actuarial status of the plans administered by PSPRS, it also highlights other changes and accomplishments that occurred during the year. The Elected Officials' Retirement Plan (EORP) and Corrections Officer Retirement Plan (CORP) are included in this report.

We are proud to announce that our investment portfolio returned 11.85%, net of fees, in FY17, which was 100 basis points higher than our target fund benchmark and well above our assumed rate of return of 7.4%. Those gains, however, were offset when we adjusted the actuarial assumptions that are used to calculate pension liabilities. As a result of an actuarial experience study, the Board lowered the investment return assumption from 7.5% to 7.4%, decreased the wage inflation assumption from 4.0% to 3.5%, and updated mortality tables to reflect the fact that retirees are living longer and drawing benefits for a longer period of time than we anticipated when we set up their funding 20 years ago.

At every step, our Board of Trustees has sought to improve the long-term sustainability of our three pension plans. Our assets grew from a combined \$8.3 billion to \$9.3 billion in FY17, despite paying out benefits of \$1 billion during the year. As a board, we approved the implementation of a risk-adjusted investment strategy aimed at reducing year-to-year volatility and preventing economic disasters like the so-called "Dot.com" crash and housing industry collapse from again wreaking havoc on our trusts. Switching the trust from a risky stock-heavy plan to a much safer hybrid portfolio with many alternative investment classes took years and was no easy task.

We accomplished this by investing in people. We hired outstanding investment analysts and contracted with the best public portfolio consultants the industry has to offer. The results are noteworthy. The PSPRS portfolio outperformed two-thirds of peer portfolios over the past three-year period while taking less investment risk than 96 percent of our peers. Ryan Parham, chief investment officer for PSPRS, was named among the top 30 public pension chief investment officers in the nation for the second consecutive year by Trusted Insight, an investment industry publication.

Our investment allocation strategy will not make headlines. Our portfolio is not designed to produce elite level returns for the simple reason that our low funding level makes high-risk investment strategies irresponsible. The portfolio is structured to reduce the depth and duration of low or negative returns during poor investment markets. The asset diversification needed for this conservative strategy has proven to be more secure than and only half as risky as traditional conservative portfolios. This type of strategy continues to attract national interest and serious consideration by our peers, who have been reevaluating their risk levels.

2017 was a busy year in terms of legislation that affects our plans. Legislation was passed that will replace the PBI with a Cost of Living Adjustment in CORP, but that provision must be approved via voter referendum before it becomes law. That referendum is scheduled to be on the ballot in November 2018. The existing PBI mechanism is unsustainable, as we saw in the actuarial results this year. That same legislation closes CORP to most new hires effective July 1, 2018. While we are proponents of the traditional defined benefit plan, we also understand the financial need for pension reform, and acknowledge that approximately half of all new CORP members will leave employment within 5 years, and most will never qualify for a pension. Most new CORP members will become members of the defined contribution plan. We are developing what we believe will be a premiere defined contribution plan for our members.

In an attempt to help employers saddled with high pension costs, legislation was passed in 2017 allowing individual employers to increase their amortization period from 20 years to 30 years. 18 employers took advantage of this opportunity, lowering their contribution rates by 13% on average. While this measure will increase total pension costs for those employers over the long run, the costs are spread over a longer period of time, providing some short-term relief.

We are very proud that our members, most notably police and fire department employees across the state, have played and will continue to play active roles aimed at increasing the financial health of our pension system and decreasing the related expenses borne by local governments and hardworking taxpayers.

### **FUNDING**

During FY17, the Board's retained actuary, Gabriel Roeder Smith & Co., completed an experience study covering the time period from July 1, 2011 through June 30, 2016 for all three of the defined benefit plans. As a result, the Board adopted several revisions to the actuarial assumptions used to determine the actuarial liabilities for each of our plans. In particular, the Board adopted a new set of mortality tables, recognizing that members are living longer than had been expected. The Board also lowered the payroll growth assumption from 4.0 percent to 3.5 percent, and lowered the assumed rate of return on investments from 7.5 percent in FY16 to 7.4 percent in FY17 and FY18. Several other assumptions were adjusted as well.

Senate Bill 1609, which was passed in 2011, increased member contribution rates in PSPRS to 11.65% from 7.65% and in EORP to 13% from 7% over a four-year period. It also added conditions to future benefit increases for benefit recipients. However, those provisions faced a legal challenge in *Hall vs. EORP*. A Superior Court ruling declared both provisions to be unconstitutional, and that decision was upheld by the Arizona Supreme Court in November. Based on that opinion, member contribution rates for certain active members had to be reduced back to their pre-SB 1609 levels, and refunds for contributions made at the higher rates were made in FY17 (or early FY18 in some cases). Likewise, some retirees will be receiving additional increases in their pensions in FY18. The long-term cost of the court's ruling to the System is substantial.

As a result of the changes listed above, the funding status of PSPRS fell just slightly from 46.0 percent to 45.3 percent on an aggregate level. The funding level of CORP fell from 57.3 percent to 49.5 percent. The funding level of EORP fell from 37.6 percent to 30 percent, a dangerous level that without further intervention threatens the life of the trust for elected officials and judges. The current employer contribution rate for EORP is not an actuarially determined rate. When EORP was closed in 2014, the employer contribution rate was statutorily set at 23.5% for all employers over a 30-year period. The plan is unsustainable at the current statutory rate and is projected to run out of assets in 9 years. Because the EORP is a closed plan with a declining membership and payroll base, future actuarially determined contribution rates will continue to climb without additional funding. The PSPRS Board has held meetings with various EORP stakeholders to discuss this issue. It is vital for the legislature to act during the 2018 session to prevent this plan from becoming a pay-as-you-go plan.

### **CONCLUSION**

Our goal as the Board of Trustees is to bring every individual plan to at least 100% funded within a reasonable period of time. The closed amortization period, currently 19 years for most employers, is designed to pay off the unfunded liabilities over that time until employers are only paying each year's incremental portion (the normal cost). Some individual employer plans are already doing that and others are expected to follow at varying rates.

I express my gratitude to all of my fellow Trustees for their continued dedication and perseverance as we guide PSPRS through the challenges set before us. On behalf of the Board, I also want to extend my appreciation to PSPRS' members, employers, local boards and other constituencies for their continued support. As Trustees, we are dedicated and committed to securing the long-term financial integrity of the System and to faithfully serve the interests of the System's participants and beneficiaries. We appreciate the opportunity to serve the State of Arizona, its political subdivisions and System members.

Respectfully,

A handwritten signature in black ink, appearing to read "Brian Tobin". The signature is fluid and cursive, with the first name "Brian" and last name "Tobin" clearly distinguishable.

Chairman Brian Tobin

January 25, 2018

Dear Members, Benefit Recipients, Employers, and Members of the Board of Trustees:

I am pleased to present the forty-ninth Comprehensive Annual Financial Report (CAFR) for the Public Safety Personnel Retirement System (PSPRS), the thirty-sixth for the Elected Officials' Retirement Plan (EORP), and the thirty-first for the Corrections Officer Retirement Plan (CORP), (collectively the System) for the fiscal year ended June 30, 2017 (FY17), in accordance with the provisions of A.R.S. § 38-848. The information contained in this report is accurate in all material respects and is intended to present fairly the financial status and results of operations of the System.

Responsibility for the contents of this report, including the financial statements, rests solely with the management of the System. The Board of Trustees provides an oversight role. This transmittal letter is designed to complement Management's Discussion and Analysis and should be read in conjunction with it.

**Plan Overview**

PSPRS was created on July 1, 1968 by A.R.S. § 38-841, "for public safety personnel who are regularly assigned hazardous duty in the employ of the state of Arizona or a political subdivision thereof." It was joined by EORP on August 7, 1985, by A.R.S. § 38-802, when the Judge's Retirement Plan merged with the previous Elected Officials' Retirement Plan and is for eligible judges and state, county and local elected officials of participating governmental employer units. Finally, on July 1, 1986, CORP was added by A.R.S. § 38-882 for corrections officers, county, city or town detention officers, dispatchers and probation officers. Each plan was created "to provide a uniform, consistent and equitable" statewide program for their respective eligible members.

PSPRS and CORP are agent multiple-employer defined benefit plans and are administered at the local level by 231 (PSPRS) and 28 (CORP) individual local boards in accordance with A.R.S. §§ 38-847 and 38-893. As agent multiple-employer plans, the assets and liabilities of each individual local board are accounted for separately, thereby allowing for individual funding levels and employer contribution rates. EORP is a cost-sharing, multiple-employer defined benefit plan where the Board administers and manages the plan. As such, the assets and liabilities of EORP are pooled for all the employers who share the same funding level and employer contribution rate. EORP was closed to newly elected officials as of January 1, 2014. All the assets of PSPRS, EORP and CORP are pooled for investment purposes only and reside in the PSPRS Trust, a formal entity created for that express purpose.

Individual local boards for PSPRS and CORP determine eligibility for membership, normal retirement benefits based on years of service, the annual benefit accrual rate and final average compensation; they also determine eligibility for disability benefits, survivor benefits for spouses and children, post-retirement adjustments and health insurance premium subsidies. The Board of Trustees fulfills these functions for EORP.

The contributions received from and benefits distributed for each local board and EORP are accounted for by the Board through the administrative offices. However, in accordance with A.R.S. § 38-848, the Board is not responsible for nor has the duty to review the actions or omissions of the individual local boards, but does have the discretion to seek review or rehearing (and does so) to protect the System as a whole. Additionally, although not part of a defined benefit plan or the Trust, the Board also administers the separate Public Safety Cancer Insurance Policy Program for members of PSPRS and CORP.

**Financial Information Reporting**

Financial statements are prepared in conformity with accounting principles generally accepted in the United States of America and reporting guidelines set forth by the Governmental Accounting Standards Board. We have received a “clean” opinion from Heinfeld, Meech & Co., P.C., Certified Public Accountants and auditors for the System. This unmodified opinion can be found at the beginning of the Financial Section. Management believes that all other financial information included in this annual report is consistent with those financial statements.

It is the System’s policy to have and maintain an effective system of accounting controls. Internal controls are designed to provide reasonable, but not absolute, assurance regarding the safeguarding of assets against loss or unauthorized disposition and the reliability of the financial records from which the financial reports are prepared. The concept of reasonable assurance recognizes that the cost of a control should not exceed the benefits likely to be derived, and the valuation of costs and benefits requires estimates and judgment by management. Management believes that as of June 30, 2017, an adequate system of internal controls is in place and that the accompanying statements, schedules and tables are fairly presented.

**Investments**

Investment portfolio income is a significant source of revenue for the PSPRS plans. In FY17 our investment portfolio provided net investment income of almost \$1 billion. The rate of return over the fiscal year was 11.85 percent net of fees. Over the past five years, the portfolio has an annualized, net of fees rate of return of 7.95 percent, well above our assumed rate of return of 7.4 percent.

Our portfolio is a well-diversified portfolio. The portfolio is strategically allocated to provide appropriate diversification that limits the impact when markets experience losses. Both traditional and nontraditional assets are incorporated into the asset allocation mix. Because the portfolio is less risky and less volatile than the vast majority of our peers, we won’t likely be hitting homeruns when the stock market advances (like it has over the past few years), but we will likely outperform our peers when the markets correct or grow stagnant. You can read more about the portfolio and our returns in the CIO’s letter at the front of the Investment Section of this CAFR.

**The System’s Funding Status**

During FY17 the Board reviewed the set of actuarial assumptions used to determine pension liabilities. The System’s actuary prepared an experience study for the period 7/1/11 through 6/30/16. As a result, several actuarial assumptions were changed, including mortality rates, wage inflation, investment returns, and withdrawal, disability and retirement assumptions.

Due to the events listed above, the financial health of each plan worsened during fiscal year 2017. There are many factors that contribute to changes in the funding levels, some having a greater effect than others. Below is a reconciliation from June 30, 2016 to June 30, 2017 showing those contributing factors and their relative effect on the funded status of each plan, including both the pension and Other Post-Employment Benefit (OPEB) assets and liabilities, at the aggregate level:

Funded % as of	PSPRS	EORP	CORP
June 30, 2016	47.3%	39.8%	59.1%
Asset Losses	(0.2)%	(0.3)%	(0.2)%
Payroll Growth	0.1%	0.8%	0.2%
PBI Gain/(Loss)	(0.2)%	(0.8)%	0.1%
Benefit Changes	(0.4)%	(2.0)%	(7.7)%
Assumption Changes	(1.6)%	(5.2)%	(1.4)%
Other	1.6%	0.3%	1.4%
June 30, 2017	46.6%	32.6%	51.5%

*Asset Losses*

One of the potentially largest contributing factors to contribution rates and funded status are investment returns. In order to calculate appropriate contribution rates today to pay for future pension liabilities, assumptions must be made about future behavior and one of those assumptions is the long-term rate of return that will be made on the investments of the Trust. For June 30, 2017, the assumed rate of return was lowered from 7.5% to 7.4%. While the actual rate of return was 11.85% (net of fees), investment returns are actuarially spread over a seven-year smoothing period to soften the effects of volatility on the contribution rates and funding levels. Over that seven-year period the portfolio earned 6.6% (net of fees), below our assumed rate of 7.4%.

*Payroll Growth*

Actuaries also make assumptions about how quickly payroll will grow, allowing them to determine future salaries upon which benefits will be determined as members retire. Payroll growth includes salary and merit increases, inflation, overtime (for PSPRS only) and growth in the number of employees. The payroll growth assumption was lowered from 4.0% to 3.5% in FY17. The gain in this category tells us that salaries did not grow this past year as quickly as expected, thereby decreasing future liabilities and increasing the funding level.

*Permanent Benefit Increase (PBI) Gain/(Loss)*

When calculating actuarial liabilities, actuaries make assumptions about the probability of retirees receiving permanent benefit increases in future years. As a result of the Superior Court ruling, retroactive PBIs will need to be paid to many retirees, resulting in an actuarial loss for PSPRS and EORP.

*Benefit Changes*

Legislation passed in 2017 allows Tier 2 PSPRS members to retire with 15 years of experience (instead of 25), although at a reduced benefit. Employee contribution rates for most Tier 1 PSPRS and EORP members were lowered in response to the Superior Court ruling. The assumption about future PBIs for Tier 1 members in EORP and CORP was increased from 0.5% to 2.25%.

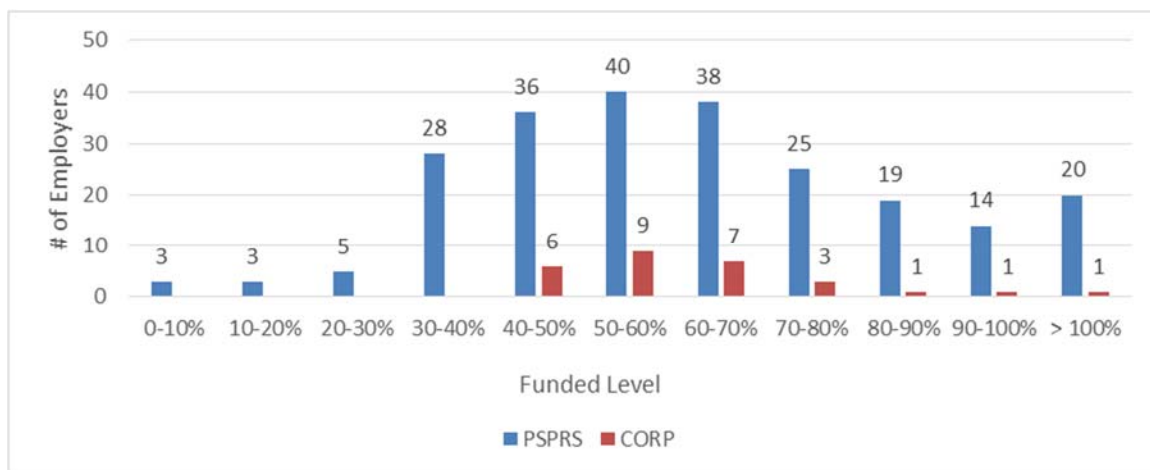

*Assumption Changes*

As noted earlier, several assumptions were changed in all three plans as a result of an experience study prepared by the System's actuary in 2016.

*Other*

This is the combination of all factors other than those listed above and primarily reflects demographic gains and losses due to experience that differs from actuarial assumptions.

While the numbers above are presented in the aggregate, it is important to remember that any aggregate number calculated for PSPRS and CORP is for comparison and overall general monitoring purposes only and does not necessarily reflect the most accurate picture of the System as a whole. Because PSPRS and CORP are agent multiple-employer plans, each individual employer has its own funding level. Therefore, another useful and appropriate representation for PSPRS and CORP is a distribution of those employers by their individual funding status as shown in the following chart:

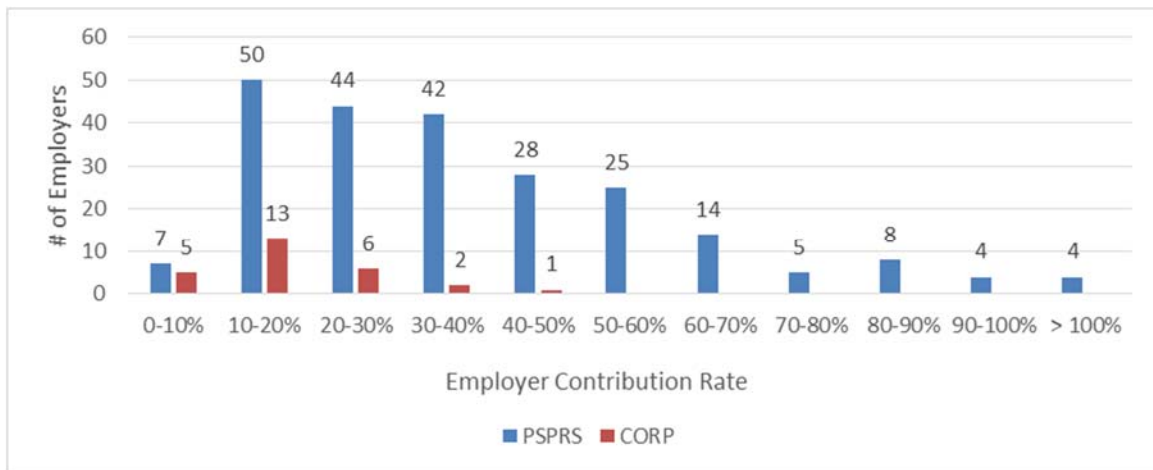

**Member and Employer Contribution Rates**

All three plans experienced an increase in actuarially determined employer contribution rates at the aggregate level, due to the following factors:

Contribution Rate Factors	PSPRS	EORP	CORP
Contribution Rate Last Valuation	52.09%	106.55%	20.98%
Asset Losses	0.25%	0.55%	0.16%
Payroll Growth	0.02%	14.76%	(0.03)%
PBI Gain/(Loss)	0.35%	1.50%	(0.08)%
Benefit Changes	(0.32)%	32.04%	7.41%
Assumption Changes	3.29%	8.08%	0.61%
Tier 2	(0.20)%	(0.19)%	(0.15)%
Amortization Method Changes	(3.93)%	NA	NA
Other	0.55%	(0.66)%	(0.12)%
Contribution Rate This Valuation	52.10%	162.63%	28.78%

In most cases, if a factor increased the funding level, it will decrease the actuarially determined contribution rate. The decrease in contribution rates the Tier 2 category is due to the fact that as current Tier 1 members retire, they are replaced by Tier 2 members (those hired on or after January 1, 2012) who have a less costly tier of benefits. The decrease related to Amortization Method Changes in PSPRS is a result of 18 employers extending their amortization period from 19 years to 29 years.

As with the funding level, the aggregate employer rate could be misinterpreted because each individual employer in PSPRS and CORP has its own employer contribution rate. A distribution graph representing those individual rates is also informative:

**New Developments and Management Initiatives**

Senate Bill 1428 restructured the Board of Trustees (effective January 1, 2017), increasing the size from 7 members to 9 members, and added a new Advisory Committee, made up of 10 members, to serve as a liaison between the Board and the members and employers of the System. A Defined Contribution (DC) Committee was also formed in FY17 to design and implement a new defined contribution plan for PSPRS members hired after June 30, 2017. That same defined contribution plan will be used for CORP members who are first hired after June 30, 2018.

The Committee also contracted with a third party administrator to be the record keeper for the new DC Plan, and contracted with a vendor to provide education to new PSPRS employees trying to decide which plan they will join, either the defined benefit plan or the defined contribution plan.

Senate Bill 1442, which passed in 2017, closes CORP to most new members effective July 1, 2018. New members, other than judiciary probation and surveillance officers, will become members of the defined contribution plan. The bill also replaces the PBI with a COLA for CORP retirees, although in order for that provision to become effective the Arizona Constitution must be amended. A referendum will be added to the ballot in November 2018.

Senate Bill 1063, which also passed in 2017, creates a Public Safety Employer Risk Pool for Tier 3 members (those hired after June 30, 2017) and includes employers that have 250 or fewer active members as of 7/1/17. The assets and liabilities of those in the risk pool will be combined when calculating contribution rates.

Pension reform measures passed by the Legislature in 2016 and 2017 brought about an incredible amount of change to the pension plans administered by PSPRS. As a result, PSPRS staff spent much of the fiscal year rewriting the pension system software used by staff, employers, local boards and members. We are excited about the efficiencies being built into the new software that will be beneficial for our members, employers and local boards. The web portals being built will offer more functionality, will be easier to use, and will be more secure. Employers will receive instant verification that the contribution files they send us are accurate, and they will receive invoices that can be paid electronically. They no longer need to send us paper forms to enroll or terminate members—that process will be handled electronically. That project will continue into FY18.

### National Recognition

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to PSPRS for its comprehensive annual financial report for the fiscal year ended June 30, 2016. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current comprehensive annual financial report continues to meet the Certificate of Achievement Program's requirements and we are submitting it to GFOA to determine its eligibility for another certificate.

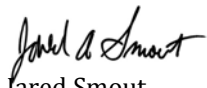

The Public Pension Coordinating Council (PPCC) presented PSPRS with its Recognition Award for Funding and Administration in recognition of meeting professional standards for plan funding and administration as set forth in the Public Pension Standards. The PPCC is a coalition of three national associations that represent public retirement systems and administrators—the National Association of State Retirement Administrators, the National Conference on Public Employee Retirement Systems, and the National Council on Teacher Retirement. These three associations represent more than 500 of the largest public pension plans in the U.S.

*Institutional Investor Magazine* named PSPRS "Allocator of the Year" in 645<sup>1</sup> for its use of highly diverse investments to tamp down portfolio risk. *Trusted Insight*, an investment industry publication, named Ryan Parham, our Chief Investment Officer, one of the top 30 public pension CIOs in the country.

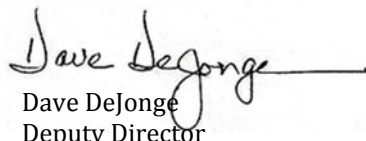

### Acknowledgements

The success of PSPRS requires the cooperation and support of our employers and local boards. We thank the staff and management of our employers along with those who serve on local boards for their encouragement and support. We also thank the staff and Board of Trustees for the commitment and efforts to ensure that PSPRS meets the needs of public servants who serve throughout the State of Arizona. We are honored and privileged to serve those who serve others.

Respectfully submitted,

Jared Smout  
Executive Director

## Independent Auditor's Report

Board of Trustees  
Public Safety Personnel Retirement System

### **Report on the Financial Statements**

We have audited the financial statements of Public Safety Personnel Retirement System (System), a component unit of the State of Arizona, which comprise the Combined Statement of Fiduciary Net Position as of June 30, 2017, and the related Combined Statement of Changes in Fiduciary Net Position for the year then ended, and the related notes to the financial statements.

### ***Management's Responsibility for the Financial Statements***

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

### ***Auditor's Responsibility***

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### ***Opinion***

In our opinion, the financial statements referred to above present fairly, in all material respects, the net position of the Public Safety Personnel Retirement System, as of June 30, 2017, and the respective changes in its net position, for the year then ended in accordance with accounting principles generally accepted in the United States of America.

### ***Change in Accounting Principle***

As described in Note 2, the Public Safety Personnel Retirement System implemented the provisions of the Governmental Accounting Standards Board (GASB) Statement No. 74, Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans, for the year ended June 30, 2017, which represents a change in accounting principle. Our opinion is not modified with respect to this matter.

**Other Matters****Required Supplementary Information**

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis and the Required Supplementary Information, as listed in the table of contents under the Financial Section, be presented to supplement the financial statements. Such information, although not a part of the financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the financial statements, and other knowledge we obtained during our audit of the financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

**Other Information**

Our audit was conducted for the purpose of forming an opinion on the System's financial statements. The Introductory Section, Supporting Schedules Information, Investment Section, Actuarial Section and Statistical Section, as listed in the table of contents, are presented for purposes of additional analysis and are not a required part of the financial statements.

The Supporting Schedules Information, as listed in the table of contents under the Financial Section, is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. Such information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the Supporting Schedules Information is fairly stated in all material respects in relation to the financial statements as a whole.

The Introductory Section, Investment Section, Actuarial Section and Statistical Section have not been subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

**Other Reporting Required by Government Auditing Standards**

In accordance with Government Auditing Standards, we have also issued our report dated January 25, 2018, on our consideration of the System's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards in considering the System's internal control over financial reporting and compliance.

Tucson, Arizona  
January 25, 2018

**MANAGEMENT DISCUSSION & ANALYSIS**

As management of Arizona's Public Safety Personnel Retirement System ("System"), we present this discussion and analysis of the financial activities for the year ended June 30, 2017 (FY17). This narrative is intended to supplement the financial statements which follow this discussion, and should be read in conjunction with the Transmittal Letter.

**OVERVIEW OF THE FINANCIAL STATEMENTS**

The basic financial statements consist of the Statement of Fiduciary Net Position, the Statement of Changes in Fiduciary Net Position, and the Notes to the Basic Financial Statements. These financial statements report information about the System's financial condition in an attempt to answer the question: "Is PSPRS better off or worse off as a result of this year's activities?" These statements are prepared in accordance with generally accepted accounting principles laid out in statements issued by the Governmental Accounting Standards Board (GASB).

The required supplementary information that appears after the Notes is not a required part of the basic financial statements, but is supplementary information required by the GASB. The other supplementary information following the required supplementary information is not required, but management has chosen to include such information to increase transparency.

**BASIC FINANCIAL STATEMENTS**

The *Statement of Fiduciary Net Position* provides a snapshot of account balances at year-end. It reports the assets available for future payments to benefit recipients, along with any liabilities that are owed as of the statement date. The difference between assets and liabilities, called "Net Position Restricted for Pensions and OPEB," represents the value of assets held in trust for future benefit payments. Over time, increases and decreases in Net Position can be one measurement of whether the System's financial position is increasing or decreasing.

The *Statement of Changes in Fiduciary Net Position*, on the other hand, shows additions to and deductions from Net Position that took place throughout the year.

The *Notes to the Financial Statements* are an integral part of the basic financial statements and provide additional information about the plans, policies and performance of the System. The financial system notes include a plan description of the various plans that make up the System, a summary of significant accounting policies, and information about the System's OPEB plans, contribution requirements, cash and investments, capital assets, net pension liability of participating employers, subsequent events, and other information required by GASB.

**FINANCIAL HIGHLIGHTS**

Key financial highlights for fiscal year 2017 (FY17) are as follows:

The System's total rate of return (net of fees) was 11.85 percent in FY17, beating the target fund benchmark by over 100 basis points and well above the assumed earnings rate of 7.4 percent.

The System's Net Position increased 12.4 percent during the year from \$8.3 billion to \$9.3 billion.

Total additions for FY17 were \$2 billion, comprised of contributions of \$1 billion and investment gains of \$1 billion.

Total deductions for the year decreased from \$1.1 billion in FY16 to \$1.0 billion in FY17, largely due to a decrease in the number of members exiting the DROP program.

Despite the excellent investment returns, the actuarially funded status of each plan decreased, mainly as a result of assumption changes (particularly mortality) and Permanent Benefit Increase recognition changes implemented in FY17.

**FINANCIAL ANALYSIS OF THE PLAN**

The schedules that follow present comparative summary financial statements of the individual plans that make up the System for FY17 in comparison with results for FY16. Following each schedule is a brief summary of the significant changes noted in the schedules and reasons for the changes.

**REQUEST FOR INFORMATION**

This report is designed to provide a general overview of the finances of the System and the individual plans within the System. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to: Public Safety Personnel Retirement System, 3010 E. Camelback Road, Suite 200, Phoenix, AZ 85016.

***Summary Comparative Statements of  
Fiduciary Net Position Analysis***

The total plan net assets held in trust for PSPRS benefits at June 30, 2017 were \$7.16 billion, a 12.95% increase from \$6.34 billion at June 30, 2016. The increase in net position is primarily due to favorable financial markets during the fiscal year. The changes in cash and receivables is attributable to normal fluctuations in investment income receivables during the year.

***Summary Comparative Statements of  
Fiduciary Net Position Analysis***

The total plan net assets held in trust for EORP benefits at June 30, 2017 were \$321.27 million, a 3.41% increase from \$310.66 million at June 30, 2016. The smaller increase in net position compared to other plans is primarily due to the contribution rate being set at 23.50% in statute, compared to the actuarial set rate of 95.56%. The changes in cash and receivables is attributable to normal fluctuations in investment income receivables during the year.

### ***Summary Comparative Statements of Changes in Plan Fiduciary Net Position Analysis***

Employer and employee contributions for FY2017 increased \$70.72 million due to increased employer contribution rates during fiscal year 2017. For FY2017, PSPRS recognized a net investment gain of \$762.45 million which compares to a \$37.40 million gain in the previous year. This 1938.69% increase was due to favorable returns in the financial markets during the fiscal year.

Deductions from the PSPRS net assets held in trust for benefits consist primarily of pension, disability, survivor benefits, member refunds and administrative expenses. For FY 2017, the benefit deductions totaled \$756.55 million, a decrease of 8.40% from the \$825.94 million paid during FY 2016. Refunds and service transfers slightly decreased over the prior year which equates to an decrease of 0.03%. Refunds represent a return of contributions held on account when a member leaves employment. Administrative expenses increased 24.42%.

***Summary Comparative Statements of Changes in Plan Fiduciary Net Position Analysis***

Employer and employee contributions for FY2017 increased \$1.68 million due to increased employer contribution rates during fiscal year 2017. For FY 2017, CORP-AOC recognized a net investment gain of \$42.05 million which compares to a \$2.11 million gain in the previous year. This 1894.78% increase was due to favorable returns in the financial markets during the fiscal year.

Deductions from the CORP-AOC net assets held in trust for benefits consist primarily of pension, disability, survivor benefits, member refunds and administrative expenses. For FY 2017, the benefit deductions totaled \$25.09 million, an increase of 11.37% from the \$22.52 million paid during FY 2016. Refunds and service transfers decreased \$994 thousand over the prior year which equates to 37.54%. Refunds represent a return of contributions held on account when a member leaves employment. Administrative expenses increased 22.48%.

## NOTES TO THE FINANCIAL STATEMENTS

## NOTE 1: PLAN DESCRIPTION

## ORGANIZATION

The Public Safety Personnel Retirement System ("System") is the administrator of three defined benefit plans, the Public Safety Personnel Retirement System (PSPRS), the Elected Officials' Retirement Plan (EORP), and the Corrections Officer Retirement Plan (CORP). The System is also the administrator of a defined contribution plan, the Elected Officials' Defined Contribution Retirement System (EODCRS). The EODCRS is not reported in the financial statements because its current size is immaterial. Effective July 1, 2017, the System will also administer a second defined contribution plan, the Public Safety Personnel Defined Contribution Retirement Plan. The plans, including benefit provisions and the obligation to make contributions, are established and administered in accordance with Title 38, Chapter 5 of the Arizona Revised Statutes. The plans are governmental plans tax qualified under Section 401(a) of the Internal Revenue Code.

Responsibility for the organization is vested in a Board of Trustees, which was restructured in fiscal year 2017 from a seven-member Board appointed by the Governor to a nine-member Board. Two Board members are appointed by the President of the Senate; two are appointed by the Speaker of the House of Representatives; and five are appointed by the Governor. The Board of Trustees is responsible for the investments of the Plan's assets, setting employer contribution rates in accordance with an annual actuarial valuation, adopting a budget, and the general protection and administration of the System.

## PUBLIC SAFETY PERSONNEL RETIREMENT SYSTEM

The PSPRS is an agent multiple-employer public employee retirement plan established by Title 38, Chapter 5, Article 4 of the Arizona Revised Statutes, to provide benefits for public safety employees of certain state and local governments. The Board of Trustees and 232 local boards jointly administer the System.

Each eligible group participating in the System has a five-member local board. The chief elected official of the governing body appoints three members to the local board, and two members are elected by the active members of the eligible group. In general, each member serves a fixed four-year term. Each local board is responsible for determining eligibility for membership, service credits, eligibility for benefits, the timing of benefit payments, and the amount of benefits for its eligible group of employees. The various governing bodies pay all costs associated with the administration of the local board.

At June 30, 2017 and 2016, the number of participating local government employer groups was:

GROUP	2017	2016
Municipalities	143	143
County Agencies	22	22
State Agencies	13	13
Special Districts	54	55
<b>Total Employers</b>	<b>232</b>	<b>233</b>

Any state agency, county, city or other political subdivision in the State of Arizona may elect to have its paid, full-time eligible employees (generally firefighters and police officers in hazardous duty positions) covered by PSPRS. Certain retirees are eligible to receive an insurance subsidy (see Note 3 for details). At June 30, 2017 and 2016, statewide PSPRS membership consisted of:

MEMBERSHIP TYPE	RETIREMENT PLAN		INSURANCE SUBSIDY	
	2017	2016	2017	2016
Retirees	12,399	11,863	7,613	7,440
Terminated Vested	2,114	1,996	-	-
DROP	1,409	1,365	-	-
Current Vested	10,944	10,352	-	-
Current Non-Vested	8,066	8,354	-	-
<b>Total Members</b>	<b>34,932</b>	<b>33,930</b>	<b>7,613</b>	<b>7,440</b>

*Employees who became a member on or before December 31, 2011:* Pursuant to A.R.S. §§ 38-842 and 38-844 and 38-845, retirement benefits will commence the first day of the month following termination of employment and based upon the following age and service requirements:

Age 62 with 15 years of service: 50% of the average monthly benefit compensation for the first 20 years of credited service. The pension is reduced by 4% per year for each year of credited service under 20 years.

20 years of service with less than 20 years of credited service: 50% of the average monthly benefit compensation for the first 20 years of credited service. The pension is reduced by 4% per year for each year of credited service under 20 years.

20 to 24.99 years of credited service: 50% of the average monthly benefit compensation for the first 20 years of credited service plus 2% of the average monthly benefit compensation for each year of credited service between 20 and 24.99.

25 or more years of credited service: 50% of the average monthly benefit compensation for the first 20 years of credited service plus 2.5% of the average monthly benefit compensation for each year of credited service above 20 years, up to a maximum of 80% of the average monthly benefit compensation.

**NOTES TO THE FINANCIAL STATEMENTS (Continued)**

The average monthly benefit compensation is equal to an average of the highest 36 consecutive months of pensionable compensation (salary) within the last 20 years of credited service.

Inactive members (not making contributions to the System) that have at least 10 years of credited service may elect to receive a Deferred Annuity at the age of sixty-two (62). This annuity is a lifetime monthly payment that is actuarially equivalent to the member's accumulated contributions in the System plus an equal amount paid by the employer. This annuity is not a retirement annuity and annuitants are not entitled to survivor benefits, benefit increases, or the group health insurance subsidy. A.R.S. § 38-846.01(A).

*Employees who became a member on or after January 1, 2012 and on or before June 30, 2017:* Pursuant to A.R.S. §§ 38-842 and 38-844 and 38-845, retirement benefits will commence the first day of the month following termination of employment and based upon the following age and service requirements:

Age 52.5 with 15 years of credited service but less than 25 years: average monthly benefit compensation times a multiplier that varies by years of service, from 1.5% to 2.5% per year of service, times the number of years of service.

Age 52.5 with 25 years of service: 62.5% of the average monthly benefit compensation. Benefits will be reduced by 4% for each year of credited service under 25 years; or

25 or more years of service: 62.5% of the average monthly benefit compensation for the first 25 years of credited service plus 2.5% of the average monthly benefit compensation for each year over 25 years of credited service - up to a maximum of 80% of the average monthly benefit compensation. The pension is reduced by 4% per year for each year of credited service under 25 years with a pro-rata reduction for any fractional years.

The average monthly benefit compensation is equal to an average of the highest 60 consecutive months of compensation (salary) within the last 20 years of credited service.

*Employees who become a member on or after July 1, 2017:* Legislation was passed in 2016 that created a new tier of benefits for those members who will become members on or after July 1, 2017. This group of members will have the choice of enrolling in the defined benefit plan or in a new defined contribution plan. Benefit provisions are available on the PSPRS website.

Compensation includes base wages, shift and military differential wage pay, compensatory time used by an employee in lieu of overtime not otherwise paid by an employer,

holiday and overtime pay that is paid to an employee by the employer for the employee's performance of services in an eligible group on a regular monthly, semi-monthly, or biweekly payroll basis as well as any longevity pay paid to an employee at least every six months for which contributions are made to the system. For the purposes of computing retirement benefits, compensation does not include unused sick leave, unused compensatory time, payment in lieu of vacation, "fringe" benefit pay (such as uniform allowance, cell phone or mileage reimbursement) and any payments made directly or indirectly by the employer to the employee for work performed for a third party on a contracted basis except for third party contracts in certain situations. A.R.S. § 38-842(12).

Employees who became a member on or before December 31, 2011 may voluntarily and irrevocably enter into a Deferred Retirement Option Plan (DROP) program with the employer for a period of up to 60 months. The member's monthly benefit is calculated based upon the years of credited service and average monthly compensation at the beginning of the DROP period and is paid into the DROP account, where it earns interest. During the DROP period, the employee will not earn any additional credited service. At the end of the sixty (60) months (or prior to that time), the member terminates employment and the monies accrued in DROP will be paid as a lump-sum either directly to the member (less mandated taxes), or as a rollover. The member will then begin receiving the monthly retirement benefit - which is the same amount that was calculated at the beginning of DROP.

At June 30, 2017, the DROP balance is \$1,598,171,348. The associated DROP liability is \$1,598,171,348.

Active members who have at least five (5) years of service with the System that have previous service with an agency of the U.S. Government, a state of the U.S., or a political subdivision of a state of the U.S. as a full-time paid fire fighter or full-time paid certified peace officer may elect to redeem up to sixty (60) months of any part of the prior service if the prior service is not on account with any other retirement system.

**ELECTED OFFICIALS' RETIREMENT PLAN**

The Elected Officials' Retirement Plan (EORP) is a cost sharing multiple-employer public employee retirement plan established by Title 38, Chapter 5, Article 3 of the Arizona Revised Statutes, to provide benefits for elected officials and judges of certain state, county and local governments. The Board of Trustees of the Public Safety Personnel Retirement System (PSPRS) administers the EORP Plan.

All state and county elected officials and judges are members of the Plan. Any city or town in the State of Arizona may elect to have its' elected officials covered by EORP.

**NOTES TO THE FINANCIAL STATEMENTS (Continued)**

Legislation passed in 2013 (HB 2608) effectively closed the EORP to new members and created the Elected Officials' Defined Contribution Retirement System (EODCRS). Elected officials and judges who were members of the EORP on December 31, 2013 remain in the Plan. Elected officials, justices of the Supreme Court, judges of the Court of Appeals and Superior Court, and commissioners that make a timely election of membership who were initially hired on or after January 1, 2014 will be required to participate in the EODCRS or in the Arizona State Retirement System.

At June 30, 2017 and 2016, the number of participating local government employer groups in EORP was:

GROUP	2017	2016
Municipalities	22	22
County Agencies	15	15
State Agencies	2	2
Special Districts	1	1
<b>Total Employers</b>	<b>40</b>	<b>40</b>

At June 30, 2017 and 2016, statewide EORP membership consisted of:

MEMBERSHIP TYPE	RETIREMENT PLAN		INSURANCE SUBSIDY	
	2017	2016	2017	2016
Retirees	1,196	1,123	720	668
Terminated Vested	162	163	-	-
Current Vested	494	541	-	-
Current Non-Vested	106	153	-	-
<b>Total Members</b>	<b>1,958</b>	<b>1,980</b>	<b>720</b>	<b>668</b>

The EORP provides retirement benefits as well as death and disability benefits. Generally, all benefits vest after five years of credited service.

*Employees who became a member on or before December 31, 2011:* Pursuant to A.R.S. §§ 38-801(5, 7 and 15), 38-805(A) and 38-808, normal retirement will commence the first day of the month following termination of employment to an elected official who ceases to hold office based the following age and service requirements:

- Age 65 years, with 5 or more years of credited service, or
- Age 62 years, with 10 or more years of credited service, or
- 20 or more years of credited service (regardless of age).

The amount of a normal retirement pension is 4% of the member's average yearly salary multiplied by the years of

the member's credited service, not to exceed 80% of the member's average yearly salary.

Members who have at least five (5) years of credited service and who cease to serve as an elected official may retire before meeting the age or service requirement for normal retirement. The amount of an early retirement pension is 4% of the member's average yearly salary multiplied by the years of the member's credited service, not to exceed 80% of the member's average yearly salary then reducing that amount by three-twelfths of one percent for each month early retirement precedes the member's normal retirement age. The maximum reduction is 30%.

The average monthly benefit compensation is equal to an average of the highest 36 consecutive months of compensation (salary) within the last 10 years of credited service. If an employee does not have three consecutive years of credited service as an elected official, the considered period is the employee's last consecutive period of employment with a Plan employer immediately before retirement.

*Employees who became a member on or after January 1, 2012:* Pursuant to A.R.S. §§ 38-801(5, 7 and 15), 38-805 (B) and 38-808, normal retirement benefits will commence the first day of the month following termination of employment and based upon the following:

- Age 65 years, with 5 or more years of credited service, or
- Age 62 years, with 10 or more years of credited service.

The amount of a normal retirement pension is 3% of the member's average yearly salary multiplied by the member's credited service, not to exceed 75% of the member's average yearly salary. Early retirement benefits are not available.

The average monthly benefit compensation is equal to an average of the highest 60 consecutive months of compensation (salary) within the last 10 years of credited service. If an employee does not have five consecutive years of credited service as an elected official, the considered period is the employee's last consecutive period of employment with a Plan employer immediately before retirement.

Active members who have at least five years of service with the System that have previous service with an agency of the U.S. Government, a state of the U.S., or a political subdivision of a state of the U.S. may elect to redeem up to 60 months of any part of the prior service if the prior service is not on account with any other retirement system.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

**CORRECTIONS OFFICER RETIREMENT PLAN**

The Corrections Officer Retirement Plan (CORP) is a multiple-employer public employee retirement plan established by Title 38, Chapter 5, Article 6 of the Arizona Revised Statutes, to provide benefits for prison and jail employees of certain state, county and local governments. CORP includes a cost-sharing, multiple-employer plan for Administrative Office of the Courts (CORP-AOC) probation officers and an agent, multiple-employer plan for all other members. The Board of Trustees of the Public Safety Personnel Retirement System and 27 local boards administer the plan.

CORP-AOC provides the same benefits as CORP. The significant accounting and investment policies used for CORP are also used for CORP-AOC.

Each eligible group participating in the Plan has a five-member local board. Each local board is responsible for determining eligibility for membership, service credits, eligibility for benefits, the timing of benefit payments, and the amount of benefits for its eligible group of employees. The various governing bodies pay all costs associated with the administration of the local boards.

Any county or city in the State of Arizona may elect to have its eligible employees (generally prison or jail personnel who have direct inmate contact) covered by CORP. At June 30, 2017 and 2016, the number of participating local government employer groups was:

GROUP	2017	2016
CORP AOC	15	15
Towns Dispatchers	3	3
Cities Dispatchers	1	1
Cities Detention	1	1
Counties Dispatchers	4	4
Counties Detention	14	13
State Agency Dispatchers	1	1
State Agency Detention	3	3
<b>Total Employers</b>	<b>42</b>	<b>41</b>

Designated positions for State and local government employers that elect to join the Plan are eligible to participate in the CORP if the employee's customary employment is for at least forty (40) hours per week, or as defined by statute. Those positions are specified in A.R.S. §38-881 and include (but not limited to) state, county, city or town detention officers, certain dispatchers, and specifically designated positions for Arizona Department of Corrections and the Department of Juvenile Corrections employees.

At June 30, 2017 and 2016, statewide CORP membership consisted of the following:

MEMBERSHIP TYPE	RETIREMENT PLAN					
	CORP	CORP-AOC	2017	CORP	CORP-AOC	2016
Retirees	4,445	646	5,091	4,215	570	4,785

<b>Total Members</b>	<b>2,613</b>	<b>262</b>	<b>2,875</b>	<b>2,447</b>	<b>228</b>	<b>2,675</b>

CORP provides retirement benefits as well as death and disability benefits. Generally, all benefits vest after five years of credited service.

*Employees who became a member on or before December 31, 2011:* Pursuant to A.R.S. §§ 38-881 and 38-885, retirement benefits will commence the first day of the month following termination of employment and based upon the following age and service requirements:

For retirement with 20 years of credited service but less than 25 years of credited service, or 80 points (age plus credited service) if membership date is on/after 8/9/01: 50% of the member's average monthly salary plus 2% of member's average monthly salary multiplied by each year of credited service over 20 (including fractional years).

For retirement with 25 or more years of credited service, or 80 points if membership date is on/after 8/9/01: 50% of the member's average monthly salary plus 2.5% of member's average monthly salary multiplied by each year of credited service over 20 (including fractional years) with a maximum of 80%.

For retirement with 20 years of service but less than 20 years of credited service, or 80 points if membership date is on/after 8/9/01: Member's average monthly salary multiplied by 2.5% for each year of credited service (include fractional years).

For retirement with 80 points if membership date is PRIOR to 8/9/01: Member's average monthly salary multiplied by 2.5% for each year of credited service (include fractional years) with a maximum of 75% of average monthly salary.

**NOTES TO THE FINANCIAL STATEMENTS (Continued)**

For retirement at age 62 with 10 years of service: Member's average monthly salary multiplied by 2.5% for each year of credited service (include fractional years).

Inactive members that have at least 10 years of credited service may elect to receive a "deferred annuity" at age 62. This annuity is a lifetime monthly payment that is actuarially equivalent to the member's accumulated contributions in the Plan plus an equal amount paid by the employer. This annuity is not a retirement benefit and annuitants are not entitled to survivor benefits, benefit increases, or the group health insurance subsidy.

The average monthly salary is equal to an average of the highest 36 consecutive months of compensation (salary) within the last 10 years of credited service.

*Employees who became a member after December 31, 2011:* Pursuant to A.R.S. §§ 38-881 and 38-885, retirement benefits will commence the first day of the month following termination of employment and based upon the following:

For retirement at age 62 with 10 years of service: Member's average monthly salary multiplied by 2.5% for each year of credited service (include fractional years).

For retirement at age 52.5 with 25 or more years of credited service: 62.5% of the member's average monthly salary plus 2.5% of the average monthly salary for each year of credited service over 25 (include fractional years) with a maximum of 80%.

For retirement at age 52.5 with 25 years of service but less than 25 years of credited service: average monthly salary multiplied by 2.5% for each year of credited service (include fractional years).

The average monthly salary is equal to an average of the highest 60 consecutive months of compensation (salary) within the last 10 years of credited service.

Employees who became a member on or after January 1, 2012 are not eligible for a "deferred annuity." However, a member who attains the service requirement for a normal retirement, but does not meet the age requirement, may elect to leave contributions on account until reaching the age requirement and then elect to receive a retirement benefit (which entitles them to survivor benefits, benefit increases, or the group health insurance subsidy).

Salary includes the base salary, shift differential pay, military differential wage pay and holiday pay paid a member for personal services rendered in a designated position to a participating employer on a regular monthly, semi-monthly or biweekly payroll basis. Salary includes amounts that are subject to deferred compensation or tax shelter agreements. "Base salary" means the amount of compensation each member is regularly paid for personal services rendered to an employer before the addition of

any extra monies, including overtime pay, shift differential pay, holiday pay, fringe benefit pay and similar extra payments.

Active members who have at least five (5) years of credited service with the System that have previous service with an agency of the U.S. Government, a state of the U.S., or a political subdivision of a state of the U.S. may elect to redeem up to 60 months of any part of the prior service if the prior service is not on account with any other retirement system. Those members may also purchase up to 60 months of credited service for periods of active military service performed before employment with their current employer.

CORP members who are eligible for a normal pension (based on service and age) may be eligible to participate in the Reverse DROP. Under the Reverse DROP, the member must voluntarily and irrevocably elect to terminate employment and receive a normal retirement upon participation in the Reverse DROP. If a member elects to participate in the Reverse DROP, the years of service credit cannot go below 24 (non-dispatcher), or 25 (dispatcher) years of service credit after the Reverse DROP months are applied. The maximum number of months that a member could elect to reverse is 60 months (5 years).

The member's pension will be calculated using the factors of credited service and average monthly benefit compensation in effect on the Reverse DROP Date. The lump sum distribution is credited as though it accrued monthly from the Reverse DROP date to the date the member elected to participate in the Reverse DROP (plus interest equal to the yield on a five (5) year Treasury note as of the first day of the month as published by the Federal Reserve Board).

**ELECTED OFFICIALS' DEFINED CONTRIBUTION RETIREMENT SYSTEM**

As part of 2013 legislation, House Bill 2608 effectively closed the Elected Officials' Retirement Plan (EORP) to new hires and created the Elected Officials' Defined Contribution Retirement System (EODCRS), with an effective date of January 1, 2014. All employers who are in EORP are required to also be in the EODCRS. This is to ensure that the legacy costs of EORP are continued to be funded by those employers whose members contribute to that liability. Elected Officials who are elected, appointed, or hired on or after January 1, 2014 have one of three different paths that are available to them.

*Path 1: Elected Officials' Retirement Plan.*

ARS § 38-801 restricts membership in EORP to elected officials defined therein who were members of the plan on December 31, 2013.

**NOTES TO THE FINANCIAL STATEMENTS (Continued)***Path 2: Arizona State Retirement System.*

As prescribed in ARS § 38-727, if a person is appointed, elected, or hired on or after January 1, 2014 and does not have prior EORP time, but has ASRS time, that person has the option to return to ASRS. If that person chooses ASRS, that choice must be made in writing and filed with ASRS within 30 days after that person's term begins. That decision is irrevocable during the term in which that election was made. Additionally, the member has the option to participate in either the EODCRS or ASRS Plan with each term. The elected official will contribute to and participate in the Long-Term Disability Program administered by ASRS.

*Path 3: Elected Officials' Defined Contribution Retirement System.* If a person is elected, appointed, or hired on or after January 1, 2014, does not have time on account with EORP, and does not timely opt out of EODCRS to return to ASRS, s/he is automatically enrolled in EODCRS, which is a defined contribution plan administered by Nationwide Retirement Solutions, a third party vendor. The elected official will contribute to and participate in the Elected Officials' Defined Contribution Retirement System Disability Program administered by EODCRS.

The EODCRS is a tax qualified plan under Section 401(a) of the Internal Revenue Code and all contributions by or on behalf of employees are tax deferred until time of withdrawal. There is no vesting period required to receive benefits in the EODCRS. At the time of retirement or termination, an amount equal to the fair value of a member's account is distributed to the member or transferred to another qualified plan or individual retirement account on the member's behalf. A disability pension is available to members who become disabled while in office.

**NOTE 2: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND PLAN ASSET MATTERS****REPORTING ENTITY**

The System functions as a separate statutory entity and maintains rights to sue or be sued in its own name and to hold property in its own name. For financial reporting purposes, the System is considered a pension trust fund of the State of Arizona and is included as a component unit in the State's Comprehensive Annual Financial Report. The System does not have any component units.

**BASIS OF ACCOUNTING**

The System's financial statements are prepared using the accrual basis of accounting. Member and employer contributions are recognized when due, pursuant to formal commitments, as well as statutory or contractual requirements. Pension and Health Insurance subsidy benefits are recognized when due and payable in accordance with the terms of the Plan. Refunds are due and payable by state

law within 20 days of receipt of a written application for a refund. Refunds are recorded when paid. Expenses are recorded when the corresponding liabilities are incurred, regardless of when payment is made.

Furniture, fixtures and equipment purchases costing \$50,000 or more, when acquired, are capitalized at cost. Improvements, which increase the useful life of the property, are also capitalized.

Investment income net of administrative and investment expenses are allocated to each employer group based on the average relative fund size for each employer group for that year. Administrative fees are paid from Investment returns and in cases where there is a loss, the fees are paid from contributions.

Investment-related costs are reported as investment expense if they are separable from investment income and administrative expense of the plan. In FY16 PSPRS reported carried interest, performance fees and other fees that were not readily separable from investment income as investment expenses. Investment expense in FY17 includes fees that were paid directly to external investment managers, but does not include fees that are not readily separable.

By state statute, the Plan is required to provide information in the financial statements used to calculate Net Effective Yield. Net Effective Yield includes only realized gains and losses. The Net Realized Gains (Losses) used in this calculation totaled \$384,708,372 for FYE 2017 and \$301,320,246 for FYE 2016. This calculation is independent of the calculation of the change in the fair value of investments and may include unrealized amounts from prior periods.

In June 2015, GASB issued Statement No. 74, "Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans." GASB 74 addresses reporting by other postemployment benefit (OPEB) plans that administer benefits on behalf of governments. The System implemented the new requirements this fiscal year. The System also implemented GASB Statement No. 82, "Pension Issues." GASB 82 addresses certain issues that were raised during the implementation of prior GASB Statements, including the presentation of payroll-related measures in required supplementary information.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of net assets held in trust for pension benefits at June 30, 2017. Actual results could differ from those estimates.

## NOTES TO THE FINANCIAL STATEMENTS (Continued)

**NOTE 3: HEALTH INSURANCE PREMIUM SUBSIDY**

The System provides health insurance premium subsidies in accordance with A.R.S. §38-857, §38-817 and §38-906 on behalf of eligible retired members who are receiving health benefits through the Arizona State Retirement System, Arizona Department of Administration, or the participating employer of the retired member. The System set up separate 401(h) healthcare plans (one for each pension plan) to receive contributions, invest assets, and pay subsidies in 2014. These plans qualify as OPEB plans and are administered by the PSPRS Board of Trustees. Contribution rates are determined annually by the actuary. The subsidy consists of a fixed dollar amount set by statute, capped at the following amounts:

SINGLE		FAMILY		
Not Medicare Eligible	Medicare Eligible	All Not Medicare Eligible	All Medicare Eligible	One With Medicare
\$150.00	\$100.00	\$260.00	\$170.00	\$215.00

The EORP and CORP-AOC healthcare plans are cost-sharing plans. The following disclosures are applicable to those cost-sharing plans. The summary of significant accounting policies and investment policies for the healthcare plans are the same as the corresponding retirement plans, as are the mortality tables. The healthcare plan assets are accounted for by employer, and are only available to pay health insurance benefits.

Since the only benefits paid are the subsidies paid to retirees defined in statute which seldom, if ever, change, the plan does not have assumptions about inflation, healthcare cost trend rates, salary changes, future COLAs, or the sharing of costs with inactive plan members. The discount rate is 7.4%, equal to the long-term expected rate of return on OPEB plan investments. Investments are pooled with retirement plan investments for investment purposes. The actuarial methods and assumptions used for the health insurance premium subsidy benefit are as follows:

INSURANCE SUBSIDY OPEB PLAN ACTUARIAL ASSUMPTIONS	
Valuation Date:	June 30, 2017
Actuarial Cost Method:	Entry Age Normal
Amortization Method:	Level % of Pay, Closed
Remaining Amortization Period:	19 years, Closed
Asset Valuation:	Plan Net Position
Investment ROR:	7.40%

The EORP health insurance subsidy plan has assets of \$23,149,855 as of June 30, 2017, and a total OPEB liability of \$14,043,713 for a funding ratio of 164.8%. The Net OPEB Liability is \$(9,106,142), equal to 17.90% of covered payroll, which is \$50,877,556. If the discount rate had been 6.4%, the Net OPEB Liability would have been \$(7,892,671) and if the discount rate had been 8.4%, the Net OPEB Liability would have been \$(10,153,036).

The CORP-AOC health insurance subsidy plan has assets of \$9,687,041 to cover the total OPEB liability of \$15,571,507 for a funding ratio of 62.2%. The Net OPEB Liability is \$5,884,466, equal to 5.18% of covered payroll, which is \$113,501,629. If the discount rate had been 6.4%, the Net OPEB Liability would have been \$7,778,551 and if the discount rate had been 8.4%, the Net OPEB Liability would have been \$4,301,751.

In accordance with GASB Statement No. 74, the value of assets used in this disclosure is the plan net position rather than a smoothed actuarial value of assets.

Actuarial valuations involve estimates of the value of reported amounts and assumptions about the probability of events far into the future, and the actuarially determined amounts are subject to continual revision as actual results are compared to past expectations and new estimates are made about the future. Actuarial calculations reflect a long-term perspective. Consistent with this perspective, actuarial methods and assumptions used include techniques that are designed to reduce short-term volatility in actuarial accrued liabilities and the actuarial value of assets.

**NOTE 4: CONTRIBUTION REQUIREMENTS**

Contribution rates for members and employers are defined in statute. The System's funding policy also provides for employer contributions set at actuarially determined rates that are designed to accumulate sufficient assets to pay benefits when due. Rates for PSPRS and CORP are recalculated annually based on annual actuarial valuation results. During the year ended June 30, 2017, contributions to PSPRS and CORP were made in accordance with contribution requirements determined by an actuarial valuation of the System as of June 30, 2015. Contributions to EORP were made in accordance with rates set in statute.

In November 2016, the Arizona Supreme Court overturned two provisions of state law passed by the legislature in 2011. The Court determined that an increase in employee contribution rates from 7.65% to 11.65% of pay for PSPRS active members, and an increase in employee contribution rates from 7% to 13% of pay for EORP active members were unconstitutional.

**NOTES TO THE FINANCIAL STATEMENTS (Continued)**

Contribution rates for employees who became PSPRS members prior to July 20, 2011 were reduced back to 7.65% and 7% in PSPRS and EORP respectively in the last quarter of the fiscal year.

**PSPRS**

PSPRS member contributions were 11.65% of covered payroll for most of fiscal year 2017, then reduced to 7.65% for employees who became members prior to July 20, 2011.

While each employer in PSPRS pays a separate contribution rate, actuarially determined contributions for PSPRS in the aggregate represented 42.61% of covered payroll [12.58% for normal costs (12.24% pension and 0.34% health insurance) and 30.03% for amortization of unfunded actuarial accrued liability in aggregate (30.12% pension and (0.09)% health insurance subsidy)]. In fiscal year 2017 employers were allowed to phase-in large increases in rates due to higher liabilities related to permanent benefit increases over three years.

Employer contribution rates in PSPRS shall not be less than 8% of compensation. For any employer whose actual contribution rate was less than 8% of compensation in fiscal year 2007, that employer's contribution rate is not subject to the 8% minimum but shall be at least 5%.

**EORP**

The member contribution rate for EORP members was 13% of gross compensation for most of the year, then reduced to 7% for those who became members prior to July 20, 2011.

As of January, 1 2014, the Arizona State Legislature closed the Elected Official's Retirement Plan and set the employer contribution rate to 23.50% of covered payroll with an additional five million dollars appropriated from the Arizona State Budget (Section 133 of Fiscal Year General Appropriation Act). The five million dollars from the State of Arizona is considered a contribution from a non-employer contributing entity and is listed separately on the Statement of Changes in Fiduciary Position. In addition, the EORP receives additional contributions from certain employers as specified in A.R.S. § 38-810.

**EODCRS**

Members of the Elected Officials Defined Contribution Retirement System contribute 8% of gross compensation to Nationwide Retirement Solutions, Inc. which is deposited into their own individual accounts. Employers contribute an additional 6% to Nationwide plus 17.5% to the EORP to help pay off EORP's unfunded liability.

**CORP**

The member contribution rate for CORP is 7.96% for dispatchers and 8.41% for non-dispatchers. While each employer in CORP pays a separate contribution rate, actuarially determined contributions for CORP (including CORP-AOC) in the aggregate for fiscal year 2017 represented 18.71% of covered payroll [6.71% for normal costs (6.40% pension and 0.31% health insurance) and 12.00% for amortization of unfunded actuarial accrued liability in aggregate (12.11% pension and (0.11)% health insurance)]. The actuarially determined contributions for CORP-AOC separately were 20.88% of covered payroll [6.67% for normal costs (6.40% pension and 0.27% health insurance) and 14.21% for amortization of unfunded actuarial accrued liability in aggregate (13.68% pension and 0.53% health insurance)]. In fiscal year 2017 employers were allowed to phase-in large increases in rates due to higher liabilities related to permanent benefit increases over three years. The minimum employer contribution rate is 6% (in accordance with A.R.S. § 38-891).

**NOTE 5: CASH AND INVESTMENTS**

**CASH**

Custodial credit risk for deposits is the risk that in the event of a bank failure, the System's deposits may not be returned. The deposits are held in two financial institutions with a balance of up to \$250,000 (permanently guaranteed as of July 21, 2010) insured by the Federal Deposit Insurance Corporation (FDIC). The System mitigates custodial credit risk for deposits by requiring the financial institutions to pledge securities from an acceptable list in an amount at least equal to 102% of the aggregate amount of the deposits on a daily basis.

All monies shall be secured by the depository in which they are deposited and held to the same extent and in the same manner as required by the general depository law of the state. Cash balances represent both operating and cash accounts held by the bank and investment cash on deposit with the investment custodian. All deposits are carried at cost plus accrued interest.

The following table is a schedule of the aggregate book and bank balances of all cash accounts as of June 30, 2017:

	REPORTED AMOUNT	BANK BALANCE
Pension Trust Fund	256,439,560	256,439,560
Operating Fund	11,242,636	23,158,757
<b>Total Deposits</b>	<b>267,682,196</b>	<b>279,598,317</b>

## NOTES TO THE FINANCIAL STATEMENTS (Continued)

**MONEY-WEIGHTED RATE OF RETURN**

The money-weighted rate of return on investments for FY 2017 was 12.248%, and 0.405% for FY 2016. The money-weighted rate of return expresses investment performance, net of investments expense, adjusted for the changing amounts actually invested.

**FAIR VALUE REPORTING**

Short-term investments are reported at cost plus accrued interest. The System categorizes its fair value measurements for investments within the hierarchy established by generally accepted accounting principles. The fair value hierarchy, which has three levels, is based on the valuation inputs used to measure an asset's fair value.

The categorization of investments within the hierarchy is based upon the pricing transparency of the instrument and should not be perceived as the particular investment's risk.

Level 1 – Unadjusted quoted prices for identical instruments in active markets.

Level 2 – Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs are observable.

Level 3 – Valuations derived from valuation techniques in which significant inputs are unobservable.

Investments that are measured at fair value using the net asset value per share (or its equivalent) as a practical expedient are not classified in the fair value hierarchy.

Level 1 debt and equity securities are valued based on prices quoted in active markets for those securities. Level 2 securities are valued using a matrix pricing technique that values securities based on their relationship to benchmark quoted prices. Level 3 securities, whose stated market prices are unobservable by the market place, are priced by the investment manager or General Partner using discounted cash flow techniques. The System has the following recurring fair value measurements as of June 30, 2017.

INVESTMENTS MEASURED AT FAIR VALUE (IN THOUSANDS)				
	Fair Value	Level 1	Level 2	Level 3
<b>Fixed Income</b>				
Domestic	497,094	-	7,868	489,226
International	9,016	-	9,016	-
<b>Total Fixed Income</b>	<b>506,110</b>	-	<b>16,884</b>	<b>489,226</b>
<b>Equity</b>				
US Equity	1,428,734	1,061,743	-	366,991
Non US Equity	1,336,204	1,189,775	-	146,429
<b>Total Equity</b>	<b>2,764,938</b>	<b>2,251,518</b>	-	<b>513,420</b>
<b>Total Fair Value</b>	<b>3,271,048</b>	<b>2,251,518</b>	<b>16,884</b>	<b>1,002,646</b>

The fair value of alternative investments is based on the investments' net asset value (NAV) per share.

These are investments for which exchange quotations are not readily available and are valued at estimated fair value, as determined in good faith by the General Partner of each fund or by the investment manager responsible for that sector.

Alternative investments are most often established as pooled private investment limited partnerships that are open to a limited group of accredited investors, require large minimum investments and are illiquid. Investors in such structures are Limited Partners.

**Absolute Return Funds** include investments in 7 funds that are designed to make a positive absolute return regardless of the underlying market condition in the asset class that they primarily are investing in.

**GTAA** (Global Tactical Asset Allocation) investments are held in 5 funds that are designed to offer risk reduction, uncorrelated returns and liquidity.

**Private Credit** investments are held in 32 funds that focus on debt instruments.

**Private Equity** investments are held in 73 funds. The types of partnership strategies included in this asset class include venture capital, growth equity, buyouts, and other special situations.

**Real Asset** investments are held in 34 funds that invest in assets like gas, oil, minerals and timber.

**Real Estate** investments are held in 44 funds that invest directly in real estate holdings.

**Risk Parity** investments are held in 3 funds which focus on allocation of risk or volatility to be more resistant to market downturns.

Redemptions (the ability to withdraw money from an investment) are allowed in most of the individual investments within the GTAA, Private Credit, Real Asset, Real Estate and Risk Parity asset classes. Redemptions are allowed monthly, quarterly or annually. Some individual investments allow for daily redemptions within the Private Credit, Real Asset and Real Estate asset classes. The redemption notice period is 5 days for Risk Parity investments.

**NOTES TO THE FINANCIAL STATEMENTS (Continued)**

Private Credit, Real Asset and Real Estate investments have redemption notice periods as short as 1 day and as long as annually. GTAA investments have redemption notice periods as short as 5 days and as long as annually.

The table below provides more information about the unfunded commitments for the System’s investments measured at the net asset value:

INVESTMENTS MEASURED AT NET ASSET VALUE (NAV) (IN THOUSANDS)		
Investment	Fair Value	Unfunded Commitments
Absolute Return	284,129	85,206
GTAA	777,603	-
Private Credit	1,185,233	561,306
Private Equity	1,288,391	628,467
Real Assets	937,158	412,022
Real Estate	860,554	680,745
Risk Parity	446,675	-
<b>TOTAL</b>	<b>5,779,743</b>	<b>2,367,746</b>

By statute, the Board of Trustees is to make investments in accordance with the "Prudent Man" rule. In making every investment, the board shall exercise the judgment and care under the circumstances then prevailing which men of ordinary prudence, discretion and intelligence exercise in the management of their own affairs, not in regard to speculation but in regard to the permanent disposition of their funds, considering the probable income from their funds as well as the probable safety of their capital, provided:

- 1) That not more than 80% of the combined assets of the system or other plans that the board manages shall be invested at any given time in corporate stocks, based on cost value of such stocks irrespective of capital appreciation.
- 2) That not more than 5% of the combined assets of the system or other plans that the board manages shall be invested in corporate stock issued by any one corporation, other than corporate stock issued by corporations chartered by the United States government or corporate stock issued by a bank or insurance company.
- 3) That not more than 5% of the voting stock of any one corporation shall be owned by the system and other plans that the board administers, except that this limitation does not apply to membership interests in limited liability companies.

- 4) That corporate stocks and exchange traded funds eligible for purchase shall be restricted to stocks and exchange traded funds that, except for bank stocks, insurance stocks and membership interests in limited liability companies, are either:
  - a) Listed or approved on issuance for listing on an exchange registered under the Securities Exchange Act of 1934, as amended (15 United States Code §78a through §78pp);
  - b) Designated or approved on notice of issuance for designation on the national market system of a national securities association registered under the Securities Exchange Act of 1934, as amended (15 United States Code §78a through §78pp).
  - c) Listed or approved on issuance for listing on an exchange registered under the laws of this [Arizona] state or any other state.
  - d) Listed or approved on issuance for listing on an exchange of a foreign country with which the United States is maintaining diplomatic relations at the time of purchase, except that no more than 20% of the combined assets of the system and other plans that the board manages shall be invested in foreign securities, based on the cost value of the stocks irrespective of capital appreciation.
  - e) An exchange traded fund that is recommended by the chief investment officer of the system, that is registered under the investment company act of 1940 (15 United States Code Section 80a-1 through 80a-64) and that is both traded on a public exchange and based on a publicly recognized index.

**CUSTODIAL CREDIT RISK**

Custodial Credit Risk is the risk that the System will not be able (a) to recover deposits if the depository financial institution fails or (b) to recover the value of the investment or collateral securities that are in the possession of an outside party if the counterparty to the investment or deposit transaction fails. As of June 30, 2017, the System has no fund or deposits that were not covered by depository insurance or collateralized with securities held by the System’s banks’ trust department or agent. Nor does the System have any investments that are not registered in the name of the System, and are either held by the counterparty or the counterparty’s trust department or agent. The system's cash is not collateralized by Wells Fargo, but is pooled with the State of Arizona Treasurer.

**CREDIT RISK**

Credit Risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligation to the System. Each portfolio is managed in accordance with investment guidelines that are specific as to permissible credit quality ranges, exposure levels within individual quality tiers, and the average credit quality of the overall portfolios.

**NOTES TO THE FINANCIAL STATEMENTS (Continued)**

According to those guidelines, the fixed income portfolio must have a minimum weighted average quality rating of A3/A-. Fixed income securities must have a minimum quality rating of Baa3/BBB- at the time of purchase.

The portion of the bond portfolio in securities rated Baa3/BBB- through Baa1/BBB+ must be 20% or less of the fair value of the fixed income portfolio.

Included in the fixed income portfolio are cash equivalents or commercial paper. Commercial Paper must have a minimum quality rating of A-1/P-1 at the time of purchase. Investments in derivatives are limited to collateralized mortgage obligations (CMO), collateralized bond obligations (CBO), collateralized debt obligations (CDO), and asset-backed securities (ABS).

In preparing this report, collateral for securities lending has been excluded because it is invested in a securities lending collateral investment pool. The following table summarizes the System's fixed income portfolio exposure levels and credit qualities as of June 30, 2017:

CREDIT QUALITY RATING	
CREDIT RATING	FAIR VALUE
AAA	-
AA	-
A	-
BBB	2,136,032
BB	-
B	-
CCC	64,090
CC	-
C	1,121,129
Not Rated	495,262,638
<b>Total</b>	<b>498,583,889</b>

**CONCENTRATION OF CREDIT RISK**

Concentration of credit risk is the risk of loss that may be attributed to the magnitude of a government's investment in a single issue. Other than bonds used as direct obligations of and fully guaranteed by the U.S. Government, not more than 5% of the Fund or its fixed income portfolio at fair value shall be invested in bonds issued by any one institution, agency or corporation.

**INTEREST RATE RISK**

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. This risk is managed within the portfolio using segmented time distributions.

It is widely used in the management of fixed income portfolios in that it quantifies the risk of interest rate changes. The System does invest in fixed income securities with floating rates that contain coupon adjustment mechanisms in a rising interest rate environment.

The following table quantifies, to the fullest extent possible, the interest rate risk of the System's fixed income assets using the specific identification method as of June 30, 2017:

SEGMENTED TIME DISTRIBUTION BY SECURITY TYPE (INCLUDING GOVERNMENT GUARANTEED SECURITIES) (IN THOUSANDS)						
FIXED INCOME SECURITY	<1	1-5	6-10	11-15	16-20	>20
Corporate	2,140	5,754	190	1,120	153	489,226
Agencies	-	-	-	-	547	6,979
Mortgages	-	-	-	-	-	-
CBO	-	-	-	-	-	-
<b>Total</b>	<b>2,140</b>	<b>5,754</b>	<b>190</b>	<b>1,120</b>	<b>699</b>	<b>496,206</b>

**DERIVATIVES**

Derivative instruments are financial contracts whose values depend on the values of one or more underlying assets, reference rates, or financial indexes. They include futures contracts, options contracts, and forward foreign currency exchange. The Board of Trustees has adopted a derivative policy that specifically authorizes external investment managers to enter into certain derivative contracts based on an analysis that the use of such derivatives will have a positive impact on the Trust's ability to manage its underlying assets and liabilities. The System Trust investment program, indirectly through its external managers, holds investments in futures contracts. The external money managers enter into these certain derivative instruments primarily to enhance the performance and reduce the volatility of the System portfolio, to gain or hedge exposure to certain markets, and to manage interest rate risk. The external managers are required to follow certain controls, documentation and risk management procedures when employing these financial instruments.

The fair value exposure associated with these derivative instruments was recorded on the financial statements as a portion of the unrealized gains and losses related to U.S. Equity and Fixed Income. The total of unrealized loss for the System was \$364,752 at June 30, 2017 consisting of U.S. Equity (loss of \$342,682) and Non U.S. Equity (loss of \$22,070). Interest risk associated with these investments are included in the tables above.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

**FOREIGN CURRENCY RISK**

Foreign currency risk is the risk that changes in the foreign exchange rate will adversely impact the fair value of an investment. The System is allowed to invest part of its assets in foreign investments.

The following table shows the System's exposure to foreign currency risk (U. S. dollars) as of June 30, 2017:

FOREIGN CURRENCY RISK (IN THOUSANDS)				
CURRENCY	SHORT TERM	EQUITY	OTHER	TOTAL
AUSTRALIAN DOLLAR	58	55,299	0	55,357

<b>TOTAL FAIR VALUE</b>	<b>4,381</b>	<b>1,068,787</b>	<b>153,474</b>	<b>1,226,642</b>

**SECURITY LENDING PROGRAM**

The System is party to a securities lending agreement with a bank. The bank, on behalf of the System, enters into agreements with brokers to loan securities and have the same securities returned at a later date. The loans are fully collateralized primarily by cash. Collateral is marked-to-market on a daily basis. Non-cash collateral can be sold only upon borrower default. The Plan requires collateral of at least 102% of the fair value of the loaned U.S. Government or corporate security. Securities on loan are carried at fair value.

As of June 30, 2017 the fair value of securities on loan was \$604,686,354 and the collateral was \$620,009,581 for the System. The System receives a negotiated fee for its loan activities and is indemnified for broker default by the securities lending agent. The System participates in a collateral investment pool. All security loans may be terminated on demand by either the lender or the borrower. All matched loans shall have matched collateral investments.

Cash collateral received shall be held and maintained by the lending agent in a separately managed cash collateral account. The weighted average life of investments in the collateral account shall not exceed 120 days. At June 30, 2017, the weighted average days to final maturity was 68. To maintain liquidity, a minimum of 10% of the loan portfolio must be invested in overnight instruments. The System has no credit risk because the amounts owed to the borrowers exceed the amounts the borrowers owe to the System.

SECURITIES LENDING			
ASSET CLASS	OUT ON LOAN	TOTAL AVAILABLE TO LOAN	% OF AVAILABLE TO LOAN
US Equities	264,081,099	1,241,892,264	21.26%

**NOTE 6: CAPITAL ASSETS**

Capital assets are stated at cost, and depreciable assets are depreciated using the straight-line method over the estimated life of the asset. Repairs and maintenance are charged to expense as incurred. Depreciation expense for June 30, 2017 was \$192,213.

## NOTES TO THE FINANCIAL STATEMENTS (Continued)

The following table is a schedule of the capital asset account balances as of June 30, 2017, and June 30, 2016, and changes to those account balances during the year ended June 30, 2017.

## NOTE 7: NET PENSION LIABILITY—EORP &amp; CORP-AOC

This note is only applicable to EORP and CORP-AOC. Only cost-sharing plans are required to report the net pension liability. PSPRS and CORP are agent-multiple plans so this note is not applicable to PSPRS and CORP.

The long-term expected rate of return on pension plan investments for both EORP and CORP-AOC was determined using a building-block method in which best estimate ranges of expected real rates of return (expected returns, net of pension plan investment expense) are developed for each major class. Based on the asset allocation, a real rate of return for the portfolio as a whole is determined. The expected nominal rate of return is determined by adding the expected inflation to the real rate of return. The System's independent investment advisor, NEPC, developed a 30-year return forecast which includes an inflation assumption of 2.75%. The following table shows the expected geometric nominal rate of return for pension plan investments.

EXPECTED RETURN - GEOMETRIC BASIS TARGET ASSET ALLOCATION			
ASSET CLASS	TARGET ALLOCATION	REAL RETURN GEOMETRIC BASIS	LONG-TERM EXPECTED PORTFOLIO REAL RATE OF RETURN
Short Term Investments	2.00%	0.25%	0.01%
Absolute Return	2.00%	3.75%	0.08%
Risk Parity	4.00%	5.00%	0.20%
Fixed Income	5.00%	1.25%	0.06%
Real Assets	9.00%	4.52%	0.41%
GTAA	10.00%	3.96%	0.40%
Private Credit	12.00%	6.75%	0.81%
Real Estate	10.00%	3.75%	0.38%
Credit Opportunities	16.00%	5.83%	0.93%
Non-U.S. Equity	14.00%	8.70%	1.22%
U.S. Equity	16.00%	7.60%	1.22%
<b>Total</b>	<b>100.00%</b>		<b>5.72%</b>
Inflation			2.75%
<b>Expected Geometric Nominal Return</b>			<b>8.47%</b>

## DETERMINATION OF PENSION LIABILITY

**EORP:** The total pension liability used to determine the net pension liability displayed on the financial statements of employers was \$1,516,677,798 as of June 30, 2017. A single discount rate of 3.91% was used to measure the total pension liability. This single discount rate was based on an expected rate of return on pension plan investments of 7.4% and a municipal bond rate of 3.56%. The municipal bond rate is derived from the Fidelity 20-Year Municipal GO AA Index as of June 30, 2017. The projection of cash flows used to determine this single discount rate assumes that plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates set by statute. The projection also assumes non-employer contributions will be made at historical rates. Based on these assumptions, the pension plan's fiduciary net position and future contributions were sufficient to finance the benefit payments through the year 2027. As a result, the long-term expected rate of return on pension plan investments was applied to projected benefit payments through the year 2026, and the municipal bond rate was applied to all benefit payments after that date.

The actuarial assumptions shown in the following table are used for calculating the total and net pension liability and may be different than those used for the calculation of funding and contribution rates.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

Actuarial assumptions used in the June 30, 2017 valuation were based on the results of an actuarial experience study for the 5-year period ended June 30, 2016.

Valuation Date:	June 30, 2017
Actuarial Cost Method:	Entry Age Normal
Amortization Method:	Level Dollar, Closed
Remaining Amort. Period:	19 years
Asset Valuation Method:	Fair Value
Actual Contrib. Amounts:	Amounts are according to Section 38-810, Arizona Revised Statutes: 23.50% of aggregate payroll for 30 years. Includes \$5 million appropriation from a non-employer contributing member, the State of Arizona
Investment Rate of Return:	7.4%
Wage Inflation:	3.5%
Price Inflation:	2.5%
Retirement Age:	Experience-based table of rates specific to the type of eligibility condition.
Mortality:	RP-2014 tables using MP-2016 improvement scale with adjustments to match current experience.
Assumed Future P.B.I.:	Members hired before 1/1/12: 3% of benefit. Members hired on or after 1/1/12: 0.5% of benefit.

Several actuarial assumptions were changed for all the defined benefit plans in fiscal year 2017 as a result of the experience study. The price inflation was lowered from 3% to 2.5%. Wage inflation was lowered from 4% to 3.5%. Mortality tables were strengthened as well.

The net pension liability is equal to the total pension liability minus the plan’s fiduciary net position. As of June 30, 2017, the net pension liability is \$1,218,559,654. If a single discount rate that is 1% lower was used, the net pension liability would have been \$1,439,440,797. Similarly, if a single discount rate that was 1% higher was used, the net pension liability would have been \$1,038,416,414. The total pension liability as of June 30, 2017 is \$1,516,677,798. The plan’s fiduciary net position is \$298,118,144 which is 19.7% of the total pension liability.

	1% DECREASE 2.91%	CURRENT SINGLE RATE ASSUMPTION 3.91%	1% INCREASE 4.91%
Total Pension Liability	1,737,559	1,516,678	1,336,535
Plan Fiduciary Net Position	298,118	298,118	298,118
<b>Net Pension Liability</b>	<b>1,439,441</b>	<b>1,218,560</b>	<b>1,038,416</b>

**CORP-AOC:** The total pension liability shown in this subsection is also shown as of the last date of the pension plan’s fiscal year, June 30, 2017. A single discount rate of 7.4% was used to measure the total pension liability. This single discount rate was based on the expected rate of return on pension plan investments of 7.4%. The projection of cash flows used to determine this single discount rate assumed that plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rate. Based on these assumptions, the pension plan’s fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability. The actuarial methods for CORP-AOC were the same as CORP aggregate.

The actuarial assumptions shown in the following table are used for calculating the total and net pension liability and may be different than those used for the calculation of funding and contribution rates. Actuarial assumptions used in the June 30, 2017 valuation were based on the results of an actuarial experience study for the 5-year period ended June 30, 2016.

**NOTES TO THE FINANCIAL STATEMENTS (Continued)**

Valuation Date:	June 30, 2017
Actuarial Cost Method:	Entry Age Normal
Amortization Method:	Level % of Payroll, Closed
Remaining Amort Period:	19 years
Asset Valuation Method:	Fair Value
Investment Rate of Return:	7.4%
Wage Inflation:	3.5%
Price Inflation:	2.5%
Retirement Age:	Experience-based table of rates specific to the type of eligibility condition.
Mortality Tables:	RP-2014 tables using MP-2016 improvement scale with adjustments to match current experience.
Assumed Future Permanent Benefit Increase:	Members hired before 1/1/12: 2.25% of benefit. Members hired on or after 1/1/12: 0.5% of benefit.

The net pension liability is equal to the total pension liability minus the plan's fiduciary net position. As of June 30, 2017, the net pension liability is \$401,219,216. If a single discount rate that is one percent lower was used, the net pension liability would have been \$518,623,714. Similarly, if a single discount rate that was one percent higher was used, the net pension liability would have been \$306,273,507. The plan's fiduciary net position is \$388,665,716 as of June 30, 2017, which is 49.2% of the total pension liability.

**CORP—AOC SENSITIVITY OF THE NET PENSION LIABILITY  
TO THE SINGLE DISCOUNT RATE ASSUMPTION  
(IN THOUSANDS)**

	1% DECREASE 6.40%	CURRENT SINGLE RATE ASSUMPTION 7.40%	1% INCREASE 8.40%
Total Pension Liability	907,289	789,885	694,939
Plan Fiduciary Net Position	388,666	388,666	388,666
<b>Net Pension Liability</b>	<b>518,624</b>	<b>401,219</b>	<b>306,274</b>

**NOTE 8: OTHER BENEFITS**

The System adopted a supplemental defined contribution plan available for all contributing members of an eligible group. An eligible group is defined as the employees of the Board of Trustees, PSPRS, the EORP and the CORP.

The employees of any of these eligible groups must make an election to participate within two years after the employee first meets the eligibility requirements to participate in the plan. The election to participate is irrevocable and continues for the remainder of the employee's employment with the employer. If an employee elects to participate, the employee must contribute at least 1% of the employee's gross compensation. The IRS maintains that the employers designate the amounts contributed by each employee. All amounts contributed are subject to the discretion and control of the employer. Employee contributions and earnings to the plan are immediately vested. Employer contributions, if any, are vested based on the following schedule:

Less than one year of service:	0%
One year but less than two:	20%
Two years but less than three:	40%
Three years but less than four:	60%
Four years but less than five:	80%
Five years or more:	100%

The supplemental defined contribution plan is administered by Nationwide Retirement Solutions, Inc. All contributions are sent directly to Nationwide Retirement Solutions, Inc. from the participating employer groups.

**NOTE 9: GASB 68 DISCLOSURES**

The employees of the System are covered under the Arizona State Retirement System (ASRS) for pension benefits after retirement.

**PLAN DESCRIPTION****ORGANIZATION**

The Arizona State Retirement System (ASRS) is a component unit of the State of Arizona. The ASRS is a cost-sharing, multiple-employer, pension plan established by the State of Arizona to provide pension benefits for employees of the State and employees of participating political subdivisions and school districts. The ASRS is administered in accordance with Title 38, Chapter 5, Article 2 of the Arizona Revised Statutes (A.R.S.). The Long Term Disability Program is administered in accordance with Title 38, Chapter 5, Article 2.1.

The operations and administration of the ASRS is vested with the ASRS Board of Trustees, which is comprised of nine members, whom are appointed by the Governor and confirmed by the Arizona Senate pursuant to A.R.S. §38-211. The ASRS Board of Trustees is responsible for establishing and maintaining the funding policy.

**NOTES TO THE FINANCIAL STATEMENTS (Continued)**

**BENEFITS**

The ASRS provides benefits under formulas and provisions described in Arizona State law. Benefits and administrative expenses are paid from funds contributed by members and employers and from earnings on investments. The ASRS provides for retirement, disability, health insurance premium supplemental benefits and survivor benefits.

Retirement benefits are calculated on the basis of age, total credited service and average monthly compensation, which is established on a fiscal year basis (July 1 to June 30).

Members with an initial membership date before July 1, 2011, are eligible for full retirement benefits upon the earliest of attaining:

- Age 65;
- Age 62 with 10 years of credited service; OR
- Age plus credited service equaling 80 or more

Members with initial membership dates on or after July 1, 2011, are eligible for full retirement benefits upon the earliest of attaining:

- Age 65;
- Age 62 with 10 years of credited service;
- Age 60 with 25 years of credited service; OR
- Age 55 with 30 years of credited service

Average monthly compensation is determined by a 60-month or 36-month calculation depending on when a member began contributing to the ASRS.

The 60-month calculation is an option for members who began contributing to the ASRS before January 1, 1984. To determine a member's benefit using this formula, the ASRS averages the highest 60 consecutive months of salary within the last 120 months of service. This calculation includes base salary, additional contracts, overtime and any other form of compensation. Termination payments may include sick pay (except for state and county employees), vacation pay, compensation time pay, retirement incentive pay (excludes payments made after retirement begins, such as VIP or ESP), or any other payments paid at the time of retirement. The average monthly compensation for members who began contributing before January 1, 1984 is automatically based on whichever calculation provides the greater benefit.

The 36-month calculation is required for members who began contributing to the ASRS on or after January 1, 1984. To determine a member's benefit using this formula, the ASRS averages the highest 36 consecutive months of salary within the last 120 months of service. This calculation excludes any termination payments the member received upon retirement.

For members who began contributing to the ASRS on or after July 1, 2011, the average monthly compensation used in a retiring member's retirement benefit calculation is the average of the highest consecutive 60 months in the last 120 months. Unlike the pre-1984 60 month calculation, the 60 month calculation enacted in 2011 does not include termination pay such as sick leave, annual leave etc.

The graded multiplier is a percentage set by Arizona State statute. It is the percentage of the average monthly compensation members will receive for each year of credited service they have accrued at retirement. This percentage is based on their total years of service at retirement based on the following graded multiplier schedule:

ASRS MULTIPLIER SCHEDULE	
YEARS OF SERVICE	MULTIPLIER
00.00 - 19.99 years	2.10%
20.00 - 24.99 years	2.15%
25.00 - 29.99 years	2.20%
30.00 or more years	2.30%

**PERMANENT BENEFIT INCREASE (PBI)**

Retired members who have been retired one year and members receiving LTD benefits are eligible for a benefit increase adjustment up to a maximum of 4%.

Retired members with at least 10 years of service who have been retired five or more years are eligible for an enhanced permanent benefit increase (EPBI). For each complete five-year period the member has been retired, an incremental benefit is paid if monies to pay the benefit are available. This benefit is funded by an interest credit of 8% of the reserve for future PBIs.

The PBI is paid from a reserve of excess investment earnings. Funds are reserved when total actuarial investment returns for each fiscal year are 8% or greater. If there are no excess investment earnings in the reserve, then no additional benefit increase is paid. As of June 30, 2016, there is a zero balance in the reserve for future PBIs.

Due to legislation enacted in the 2013 legislative session, PBIs and EPBIs will not be awarded to members hired after September 13, 2013.

**CONTRIBUTIONS**

Per Arizona Revised Statutes, contribution requirements for active plan members and their participating employers are established and may be amended by the ASRS Board.

**NOTES TO THE FINANCIAL STATEMENTS (Continued)**

Contribution rates are actuarially determined and are expected to finance the costs of benefits earned by plan members during the year and any unfunded accrued liability. Cost of administering the plan is financed through employer contributions, member contributions and investment earnings.

Employers are also required to pay an Alternate Contribution Rate (ACR), for retired members who return to work. ACR contributions totaling \$26.5 million were received in FY16 and are included in Employer Contributions on the Statement of Changes in Fiduciary Net Position in the June 30, 2016 CAFR.

Employers' contractually required contribution rates as a percentage of covered payroll and the employees' matching contributions were as follows for fiscal year 2017:

CONTRIBUTION RATES	EMPLOYEE	EMPLOYER
Retirement	11.34%	10.78%
Health Benefit Supplement	0.00%	0.56%
Long-Term Disability	0.14%	0.14%
<b>TOTAL REQUIRED</b>	<b>11.48%</b>	<b>11.48%</b>
Alternate Contribution Rate	9.47%	0.00%

The Arizona Revised Statutes allow the purchase of eligible service credit for which no benefit can be paid by another qualified plan. Purchasable services include leave of absence, military service, other public service employment and previously forfeited service under the ASRS. The Arizona Revised Statutes also allow purchase of military service regardless of whether a benefit may be paid.

**TERMINATION OF EMPLOYMENT**

Upon termination of employment, members may elect to receive their contributions made to the Plan, plus accrued interest. Members with an initial membership date before July 1, 2011, may receive a percentage of employer contributions to the Plan based on years of service as follows:

YEARS OF SERVICE	VESTING
5.00 - 5.99 years	25.00%
6.00 - 6.99 years	40.00%
7.00 - 7.99 years	55.00%
8.00 - 8.99 years	70.00%
9.00 - 9.99 years	85.00%
10.00 or more years	100.00%

Members with an initial membership date on or after July 1, 2011 will not receive any portion of the employer contributions if they withdraw their account balance prior to retirement. This does not apply to terminations due to an employer reduction in force or position elimination, in which case the above ASRS vesting schedule will apply. Withdrawal of accumulated contributions results in forfeiture of the member's accrued benefits in the Plan; however, state law provides for reinstatement of a member's forfeited service upon repayment of the accumulated contributions, plus interest if a former member returns to covered service.

**CONDENSED SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

Employers participating in the ASRS cost-sharing multiple-employer defined benefit plans are required to report pension information in their financial statements, for fiscal periods beginning on or after June 15, 2014, in accordance with Governmental Accounting Standards Board (GASB) Statement No. 68, Accounting and Financial Reporting for Pensions. The Schedule of Employer Allocations and Schedule of Pension Amounts by Employer (pension allocation schedules) provide employers with the required information for financial reporting. The underlying financial information used to prepare the pension allocation schedules is based on the ASRS financial statements. The ASRS financial statements are prepared using the accrual basis of accounting and are prepared in accordance with accounting principles generally accepted in the United States of America (GAAP) that apply to governmental accounting for fiduciary funds.

Contributions are recognized as revenues when due, pursuant to statutory and contractual requirements. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. For a complete description of significant accounting policies, please refer to the ASRS' June 30, 2016 CAFR.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

**ACTUARIAL ASSUMPTIONS**

The total pension liability was determined by an actuarial valuation as of June 30, 2015, and rolled forward using generally accepted actuarial procedures to June 30, 2016. The following actuarial assumptions pertain to assumptions utilized for financial reporting requirements and differ from the assumptions utilized for funding purposes. The principal differences between the actuarial assumptions for financial reporting purposes and those utilized for funding purposes are the actuarial cost methodology, amortization methodology, valuation of the Retirement Fund assets and the inclusion of the Permanent Benefit Increase.

Actuarial Valuation Date	June 30, 2015
Actuarial Roll Forward Date	June 30, 2016
Actuarial Cost Method	Entry Age Normal
Discount Rate	8.00%
Projected Salary Increase	3.00 - 6.75%
Inflation	3.00%
Permanent Benefit Increase	Included
Mortality Rates	1994 GAM Scale BB

The actuarial assumptions related to funding appear in the Notes to Required Supplementary Information and the Actuarial Section of the June 30, 2016 CAFR. The actuarial assumptions related to funding were selected on the basis of an experience study which was performed for the five-year period ending June 30, 2012. The ASRS Board adopted the experience study which recommended changes, and those changes were effective as of the June 30, 2013 actuarial valuation.

The net pension liability for ASRS at the aggregate level as of June 30, 2016 was reduced by \$1,242,164, due to a change in actuarial assumptions related to decreased loads for future potential Permanent Benefit Increases.

The long term expected rate of return on investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the asset allocation policy as of June 30, are summarized in the following table:

ASSET CLASS	EXPECTED RETURN ARITHMETIC BASIS		LONG-TERM EXPECTED REAL RATE OF RETURN
	TARGET ASSET ALLOCATION	REAL RETURN ARITHMETIC BASIS	
Equity	58.00%	6.73%	3.90%
Fixed Income	25.00%	3.70%	.93%
Commodities	2.00%	3.84%	.08%
Real Estate	10.00%	4.25%	.42%
Multi-Asset Class	5.00%	3.41%	.17%
<b>Total</b>	<b>100.00%</b>		<b>5.50%</b>
Inflation			3.25%
<b>Expected arithmetic nominal return</b>			<b>8.75%</b>

Actual returns may be different due to volatility of returns. The long term expected rate of return of 8.75% is higher than the 8% assumed rate of return used in the actuarial valuation. Details regarding the discount rate for actuarial purposes follows.

**DISCOUNT RATE**

The discount rate used to measure the total pension liability was 8%. The projection of cash flows used to determine the discount rate assumed that contributions from participating employers will be made based on the actuarially determined rates based on the funding policy of the ASRS Board, which establishes the contractually required rate under Arizona statute. Based on those assumptions, the Retirement Fund’s fiduciary net position was projected to be available to make all the projected future benefit payments of current members. Therefore, the long term expected rate of return on investments was applied to all periods of projected benefit payments to determine the total pension liability. The table below presents PSPRS’ share of the net pension liability of the participating employers calculated using the discount rate of 8%, as well as what the employers’ net pension liability would be if it were calculated using the discount rate that is 1.00% lower (7.00%) or 1.00% higher (9.00%) than the current rate at June 30, 2016:

SENSITIVITY ANALYSIS—NET PENSION LIABILITY PSPRS Proportionate Share		
1% DECREASE (7.00%)	CURRENT DISCOUNT RATE (8.00%)	1% INCREASE (9.00%)
9,030,946	7,082,674	5,520,584

## NOTES TO THE FINANCIAL STATEMENTS (Continued)

**BASIS FOR ALLOCATION**

PSPRS' proportionate share of the ASRS net pension liability is calculated using accrued retirement contributions for employers that were members of the ASRS on June 30, 2016. Accrued contributions for employers who entered the ASRS mid-year have been annualized. Adjustments have been made for employer contributions received that do not reflect an employer's projected long-term contribution effort. PSPRS' proportionate share of the ASRS' net pension liability was based on the ratio of the System's actual contributions of \$445,791 paid to ASRS for the year ended June 30, 2016 relative to the actual contributions of \$1,015,920,247 from all participating employers. At June 30, 2017 the System's proportionate share was 0.04388%, which is an increase of 0.00206% from the previous year.

Based on its proportionate share, for the year ended June 30, 2017, the System recognized a pension expense of \$535,898. At June 30, 2017, the System recognized a net pension liability of \$7,082,674. It also reported deferred outflows of resources and deferred inflows of resources from the following sources related to ASRS pension benefits:

BALANCE OF DEFERRED OUTFLOWS AND INFLOWS DUE TO:	RESOURCE DEFERRED OUTFLOWS	RESOURCE DEFERRED INFLOWS
Differences Between Expected and Actual Experience	43,041	487,235
Net Difference Between Projected and Actual Investment Earnings on Pension Plan Investments	767,526	0
Changes of Assumptions	0	374,730
Changes in Proportion and Differences Between Employer Contributions and Proportionate Share of Contributions	381,340	14,386
Employer contributions subsequent to the measurement date	492,337	0
<b>TOTAL</b>	<b>1,684,244</b>	<b>876,351</b>

\$492,337 reported as a deferred outflow from contributions paid subsequent to the measurement date will be recognized as a reduction to the net pension liability in the year ended June 30, 2018. Other amounts reported as collective deferred (inflows)/outflows of resources to be recognized in future pension expense include the following:

FYE JUNE 30,	(INFLOW) OUTFLOW
2018	(118,054)
2019	(115,500)
2020	333,896
2021	215,212
Thereafter	-

Additional financial and actuarial information is available at [www.azasrs.gov](http://www.azasrs.gov).

**NOTE 10: SUBSEQUENT EVENT**

In November, 2016, the Arizona Supreme Court overturned two provisions of state law passed by the legislature in 2011. The Court determined that an increase in employee contribution rates from 7.65% of pay to 11.65% of pay for PSPRS active members and from 7.00% to 13.00% of pay for EORP active members, along with modest reductions to pension benefit increases for all retirees instituted in 2011 were unconstitutional. Pension benefit increases were granted to all affected benefit recipients in fiscal year 2018. Since IRS regulations do not allow pension plans to send refunds directly to members or employers, PSPRS employers will refund the excess contributions plus interest equal to roughly \$228 million. For those employers that need to be reimbursed for the refunds, PSPRS will issue credits equal to the refund amounts for each employer in fiscal year 2018. Employers may use those credits to pay future contributions in lieu of cash.

**NOTE 11: INVESTMENT FEES**

Public market investment managers and some private market investment managers are paid directly by the Trust for their fees. A number of private market investment managers are not paid for their fees directly and report their investor account valuations on a net of fee basis. Over the past three years PSPRS attempted to determine manager fees that were deducted from the fund on a net basis, even if those "fees" were profit sharing costs, carried interest or reimbursable fees, and included those fees in investment expense. Those fees were not readily separable and consistency could not be achieved among all of the funds PSPRS invests in, however, so investment expense in FY17 includes management and performance fees that were paid directly but no longer includes amounts that are not readily separable from investment gains and losses netted by managers.

**REQUIRED SUPPLEMENTARY INFORMATION****NOTES TO THE REQUIRED SUPPLEMENTARY INFORMATION****NOTE 1: GENERAL ACTUARIAL METHODS AND ASSUMPTIONS**

The pension-related Required Supplementary Information schedules were prepared using the Entry Age Normal actuarial cost method.

The Net Pension/OPEB Liability schedules were prepared using the actuarial assumptions disclosed in financial statement footnotes 3 and 7. The “actuarially determined contribution” amounts found in the contribution schedules were prepared using actuarial assumptions as of the valuation date, which was June 30, 2015. Those assumptions vary by plan, and are as follows:

**EORP**

Amortization Method: Level dollar, closed  
 Remaining Amortization Period: 21 years  
 Investment Rate of Return: 7.85%  
 Projected Salary Increases: 4.25%  
 Payroll Growth: 4.00%  
 Cost of Living Adjustments: None

**CORP-AOC**

Amortization Method: Level percent of pay, closed  
 Remaining Amortization Period: 21 years for underfunded plans, 20 years for overfunded plans  
 Investment Rate of Return: 7.85%  
 Projected Salary Increases: 4.00% - 7.25%  
 Payroll Growth: 4.00%  
 Cost of Living Adjustments: None

**NOTE 2: FACTORS THAT AFFECT TRENDS**

The investment return assumption for all plans was lowered from 7.85% in 2015 to 7.5% in 2016 and 7.4% in 2017. The reverse DROP sunset provision was cancelled in CORP in fiscal year 2016, resulting in an increase in liabilities.

As a result of an actuarial experience study conducted in FY17 covering the period July 1, 2011 through June 30, 2016, several actuarial assumptions were adjusted in both plans. Wage inflation was lowered from 4.00% to 3.50%. Mortality tables were updated to the RP-2014 tables. Withdrawal, disability and retirement assumptions were updated, and the assumption regarding future cost of living increases for Tier 1 members was increased.

2015	419,503	419,503	0	3,452,000	12.15%
2016	475,910	475,910	0	3,852,000	12.35%
2017	492,337	492,337	0	3,886,000	12.67%

Notes to Required Supplementary Information

The schedules shown above are required by GASB Statement No. 68 since PSPRS employees belong to the Arizona State Retirement System, a cost-sharing multiple-employer plan. As such, PSPRS is an “employer” in that plan and is required to contribute to ASRS, and include a share of ASRS’ net pension liability on the face of the PSPRS financial statements.

During the measurement period, actuarial assumptions related to decreased loads for future potential Permanent Benefit Increases reduced the net pension liability for ASRS at the aggregate level by \$1,242,164. The employer contribution rate was lowered from 11.60% to 11.47%. There were no changes in actuarial assumptions during the period.

The Board of Trustees and  
The Administrator of the  
Arizona Public Safety Personnel Retirement System

Members:

As the Chief Investment Officer of the Public Safety Personnel Retirement System (PSPRS) during the fiscal year beginning July 1, 2016 and ending June 30, 2017, I submit the following comments and observations for your consideration and for the consideration of the respective parties in interest of the System.

### **INTRODUCTION**

On behalf of the PSPRS investment team, it is a pleasure to provide this annual update of the investment activities of the PSPRS Trust for the fiscal year ending June 30, 2017. We have completed the seventh year since we moved to a diversified portfolio. The return for fiscal year ending 6/30/2017 was 11.9% net of fees. That is above our assumed earnings rate of 7.4% and will help the system move toward a better funded status. (Over five years the trust has annually returned approximately 7.95%, also above our assumed earning rate.) The market value of the trust increased in 2017 by almost a billion dollars. We are pleased with these results; but if we had achieved them at the "roulette table" there would be cause for all of us to be concerned. I am happy to report that the PSPRS Trust ranked among the top five percent of our peers in return per unit of risk. If we can achieve solid gains in up markets with 90% less risk than our peers it is likely that we will be more protected from large losses in down markets. That is the strategy of this diversified portfolio. (Investment returns reported in this investment section were prepared using a time-weighted rate of return methodology based upon fair market values, net of investment expenses.)

### **ASSET ALLOCATION**

The assets of the Trust continue to be invested across ten global asset classes with the following asset allocation targets:

<b>Description</b>	<b>Target Allocation</b>
Public Equity	30%
Private Equity	12%
Fixed Income	5%
Private Credit	16%
Absolute Return	2%
GTA	10%
Real Assets	9%
Real Estate	10%
Risk Parity	4%
Cash	2%
<b>Total</b>	<b>100%</b>

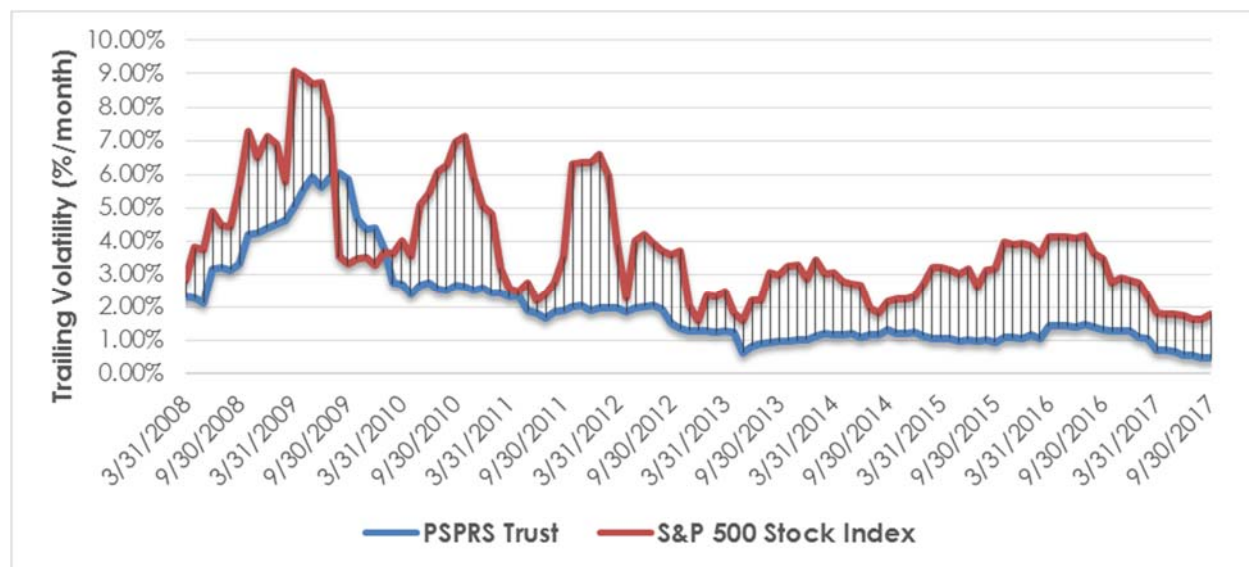

### ALTERNATIVE ASSET CLASSES - MANAGEMENT FEES

The use of alternative investments like those in Private Equity and Absolute Return are diversifying, but they have a base-line of fees higher than many public market instruments. We closely monitor all higher fee investments to ensure that our net of fee returns justify those exposures. The PSPRS Private Equity portfolio returned 13.57% and the PSPRS Absolute Return portfolio returned 14.51%, net of fees, for the FY 2017. We have also been successful in regularly using legal structures for investments where the fees collected in these investments are ultimately paid back to PSPRS with interest.

### RISK - PROTECTING THE DOWNSIDE

In a continuation from previous letters, the portfolio risk over time against a pure stock index, shows favorable results (the difference between the red line and the blue line):

### PORTFOLIO RESILIENCY DURING HISTORIC MARKET EVENTS

We are considerably less “risky” than a pure stock portfolio. We also expect that the total portfolio will be more resilient than it was in the past, during a major crisis. The table below shows actual investment returns during several historical market events compared to what the returns would have been had the portfolio been allocated as it is today.

Events	Today's Portfolio	PSPRS Trust Actual
Asian Crisis of 1997	3.20%	5.70%
Russian/LTCM Crisis 1998	-3.70%	-5.50%
WTC Attacks - Sept. 11	-1.20%	-11.70%
Stock Market Crash 2002	-2.50%	-21.10%
August Crisis 2007	3.60%	1.60%
January Crisis 2008	-0.60%	-2.70%
Credit Crunch 2008 (Aug to Nov)	-14.30%	-23.10%
Crisis 2009 (Jan-Feb)	-3.50%	-12.90%
Flash Crash 2010	-2.10%	-3.70%
Brexit (2016)	0.90%	-0.30%

### CONCLUSION

The long history of the PSPRS Trust portfolio has included times when the Trust had large outsized gains. But it also experienced large downside losses. Those losses hurt our funded status. The Trust had large exposures to Arizona Real Estate just prior to a collapse of the Arizona market, this also hurt our funded status. The PBI mechanism has had a major impact on funded status as well. The investment team has worked tirelessly with talented local and international partners, managers and consultants to address these issues. I want to acknowledge and express appreciation for the work of so many and the support of our board in these successful efforts.

Respectfully Submitted,

Ryan P. Parham  
Chief Investment Officer

**FUND INVESTMENT OBJECTIVES AND POLICIES**

The objective of the Fund is to ensure the integrity of the Elected Officials’ Retirement Plan, Public Safety Personnel Retirement Plan and the Corrections Officer Retirement Plan in order to adequately fund benefit levels for members as stated in Title 38, Chapter 5, Articles 3,4 and 6 of the Arizona Revised Statutes and as amended from time to time by the Legislature. To achieve the objective, the Fund will do the following:

- Maintain a goal for the Fund’s assets to be equal to the Fund’s liabilities within a twenty year period.
- Annually adjust the employer contribution rates based on the recommendations made by the annual actuarial evaluations.
- Determine a reasonable contribution rate necessary to fund benefits approved by the legislature and then reduce the variation in the employer contribution rate over time to the Fund.
- Preserve and enhance the capital of the Fund through effective management of the portfolio in order to take advantage of attractive opportunities various markets and market sectors have to offer.
- Provide the opportunity for increased benefits for retirees as the legislature may from time to time enact through systematic growth of the investment fund.

Consistent with the Fund objectives, the primary investment objective of the Fund is to maximize long-term real (after inflation) investment returns recognizing established risk (volatility) parameters and the need to preserve capital by:

- Deriving a reasonable asset allocation model that attempts to fully achieve the primary investment objective, over the long term.
- Consistent with these objectives and the direction of the Board of Trustees, strategically allocating within asset classes and investment styles in order to enhance investment returns.
- Regularly reviewing the status of investments.
- Regularly assessing the need to adjust the mix, type and composition of the investment classes within the allocation ranges.

The possibility of short-term declines in the fair value of the Fund or the Fund’s assets is a recognized consequence of achieving potentially higher long-term investment returns.

The time horizon for evaluating total Fund investment performance shall be long-term.

**ASSET ALLOCATION**

Board of Trustees

Arizona Public Safety Personnel Retirement System 3010 East Camelback Road, Suite 200  
Phoenix, Arizona 85016-4416

**Re: Arizona Public Safety Personnel Retirement System**

Attention: Jared A. Smout, Administrator

The purpose of the annual actuarial valuation of the Arizona Public Safety Personnel Retirement System as of June 30, 2017 is to:

- Compute the liabilities associated with benefits likely to be paid on behalf of current retired and non-retired members.
- Compare assets with accrued liabilities to assess the funded condition.
- Compute the recommended employers' contribution for the Fiscal Year beginning July 1, 2018.

The funding objective is stated in Article 4, Chapter 5, Title 38, Section 843B of the Arizona Revised Statutes. The valuation should not be relied upon for any other purpose.

The valuation process develops contribution rates that are sufficient to fund the plan's normal cost (i.e., the costs assigned by the valuation method to the year of service about to be rendered), as well as to fund unfunded actuarial accrued liabilities as a level percent of active member payroll over a finite period. The valuations were completed based upon population data, asset data, and plan provisions as of June 30, 2017.

The valuation was based upon information furnished by the plan's administrative staff concerning Retirement System benefits, financial transactions, and active members, terminated members, retirees and beneficiaries. We checked the data for internal and year-to-year consistency, but did not audit the data. As a result, we do not assume responsibility for the accuracy or completeness of the data provided. The actuary summarizes and tabulates population data in order to analyze longer-term trends. The following schedules were prepared by the actuary and provided to the administrative staff to be included in the "Actuarial Section" of the June 30, 2017 CAFR:

- Aggregate Actuarial Balance Sheet as of June 30, 2017
- Summary of Valuation Assumptions
- Solvency Test
- Summary of Active Member Data
- Summary of Retirees and Inactive Members
- Schedule of Experience Gain/(Loss) for year ended June 30, 2017

Board of Trustees  
December 11, 2017  
Page 2

GRS did not prepare any of the schedules included in the “Financial Section” of the June 30, 2017 CAFR. However, we did provide certain pieces of information that were used in that section, such as the Actuarial Accrued Liability and the Actuarial Value of Assets.

Assets are valued on a market related basis. This method recognizes the assumed return fully each year and spreads each year’s gain or loss above or below assumed return over a closed 7-year period. The continuing effect of prior asset losses was dampened by the 7-year smoothing period, and further offset by the effect of lower than assumed pay increases. There remains \$233.0 million (\$221.3 million for pension and \$11.7 million for health) of unrecognized investment losses that will in the absence of other gains, drive the contribution rate up over the next several years.

Actuarial valuations are based upon assumptions regarding future activity in specific risk areas including the rates of investment return and payroll growth, eligibility for the various classes of benefits, and longevity among retired lives. The Board of Trustees adopts these assumptions after considering the advice of the actuary and other professionals. The assumptions and the methods comply with the requirements of Statement No. 67 of the Governmental Accounting Standards Board. In addition, the assumptions and methods used for funding purposes are in accordance with the Actuarial Standards of Practice promulgated by the Actuarial Standards Board. Each actuarial valuation takes into account all prior differences between actual and assumed experience in each risk area and adjusts the contribution rates as needed. The June 30, 2017 valuations were based upon assumptions that were recommended in connection with a study of experience covering the 2011-2016 period. Future actuarial measurements may differ significantly from those presented in the valuations due to such factors as experience differing from that anticipated by the actuarial assumptions, changes in plan provisions, changes in actuarial assumptions or methods, or changes in applicable law.

Based upon the results of the June 30, 2017 valuations, the retired lives are less than fully funded on a funding value of assets basis and market value of asset basis. It is most important that this plan receive contributions at least equal to the actuarial rates.

The June 30, 2017 actuarial valuation reflected the following changes:

**Assumption Changes:**

- Decrease the investment return assumption from 7.5% to 7.4%.
- Decrease the wage inflation assumption from 4.0% to 3.5%.
- Updated mortality to the RP-2014 tables, with 75% of MP-2016 fully generational projection scales.
- Updated withdrawal, disability and retirement assumptions.

**Benefit Changes:**

- Change in Tier 2 benefit eligibility and multiplier, and
- Tier 1 Employee contribution rates were decreased in accordance with the court ruling on the Hall lawsuit.

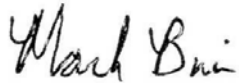

Board of Trustees  
December 11, 2017  
Page 3

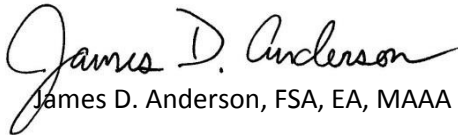

In order to gain a full understanding of the actuarial condition of the plan, it is important to read the full actuarial report that we have provided to the System.

Mark Buis, James D. Anderson and Francois Pieterse are Members of the American Academy of Actuaries (MAAA), and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein.

Respectfully submitted,

Mark Buis, FSA, EA, FCA, MAAA

James D. Anderson, FSA, EA, MAAA

Francois Pieterse, ASA, FCA, MAAA

**PSPRS SUMMARY OF VALUATION ASSUMPTIONS**

**ECONOMIC ASSUMPTIONS**

Investment Rate of Return: 7.40% (net of expenses)

Wage Inflation: 3.50%

**MORTALITY TABLES**

The mortality tables being utilized are based upon the RP-2014 tables, as extended, and include a margin for future mortality improvement using a fully generational improvement scale. The tables used were as follows:

*Healthy Pre-Retirement:* The RP-2014 Employee Mortality Tables, extended via cubic spline, projected backwards 1year to 2013 with mortality improvement scale MP-2014. Future mortality improvements are assumed each year using 75% of scale MP-2016.

*Healthy Post-Retirement:* The RP-2014 Healthy Annuitant Mortality Tables (110% for females), extended via cubic spline, projected backwards 1year to 2013 with mortality improvement scale MP-2014. Future mortality improvements are assumed each year using 75% of scale MP-2016.

*Disability Retirement:* The RP-2014 Disabled Mortality Tables, extended via cubic spline, projected backwards 1year to 2013 with mortality improvement scale MP-2014. Future mortality improvements are assumed each year using 75% of scale MP-2016.

Retirement benefits will commence the first day of the month following termination of employment and based upon completion of 20 years of service, or following 62nd birthday and completion of 15 years of service.

These rates adopted by the Board of Trustees, as recommended by the Plan's actuary, were first used for the June 30, 2017 valuation.

**PSPRS MISCELLANEOUS AND TECHNICAL ASSUMPTIONS****MARRIAGE ASSUMPTION**

85% of males and 60% of females are assumed to be married for purposes of death-in-service benefits. Male spouses are assumed to be three years older than female spouses for active member valuation purposes.

**PAY INCREASE TIMING**

Six months after the valuation date.

**DECREMENT TIMING**

Decrements of all types are assumed to occur mid-year.

**ELIGIBILITY TESTING**

Eligibility for benefits is determined based upon the age nearest birthday and service nearest whole year on the date the decrement is assumed to occur.

**DECREMENT RELATIVITY**

Decrement rates are used directly from the experience study, without adjustment for multiple decrement table effects.

**DECREMENT OPERATION**

Disability and turnover decrements do not operate during retirement eligibility.

**SERVICE CREDIT ACCRUALS**

It is assumed that members accrue one year of service credit per year.

**INCIDENCE OF CONTRIBUTIONS**

Contributions are assumed to be received continuously throughout the year based upon the computed percent of payroll shown in this report, and the actual payroll payable at the time contributions are made.

**NORMAL FORM OF BENEFIT**

A straight life payment is the assumed normal form of benefit for members who are not married, and the 80% Joint and Survivor form of payment with no reduction, for married members. 85% of males and 60% of females are assumed to be married at time of retirement.

**BENEFIT SERVICE**

Exact fractional service is used to determine the amount of benefit payable.

**HEALTH CARE UTILIZATION**

70% of future retirees are expected to utilize health care. 85% of males and 60% of females are assumed to be married at the time of retirement.

**FUTURE COST OF LIVING INCREASES**

The cost-of-living adjustment will be based on the average annual percentage change in the Metropolitan Phoenix-Mesa Consumer Price Index published by the United States Department of Labor, Bureau of Statistics. We have assumed that to be 1.75% for this valuation.

**PSPRS SUMMARY OF ACTIVE MEMBER DATA**

**AGE AND SERVICE DISTRIBUTION**

Listed below is a summary of Active Members by age group, years of service and annual compensation. The summary points out that there were 19,010 active members in the System as of June 30, 2017, compared to 18,706 for the prior year.

AGE	YEARS OF SERVICE TO VALUATION DATE							TOTALS	
	0-4	5-9	10-14	15-19	20-24	25-29	30+	NO.	AVG. SALARY

## PSPRS SUMMARY OF INACTIVE MEMBER DATA

As of June 30, 2017, there were 2,113 inactive members in the System who had not withdrawn their accumulated member contributions. It is assumed that these inactive members are waiting to meet the age requirements for a deferred annuity (A.R.S.§38-846.01). They are broken down by attained age and years of service as follows:

SUMMARY OF INACTIVE MEMBERS FOR THE YEAR ENDED JUNE 30, 2017						
ATTAINED AGE	YEARS OF SERVICE TO VALUATION DATE					TOTAL
	0-4	5-9	10-14	15-19	20+

Board of Trustees

Arizona Elected Officials' Retirement System 3010 East Camelback Road, Suite 200  
Phoenix, Arizona 85016-4416

**Re: Arizona Elected Officials' Retirement Plan**

Attention: Jared A. Smout, Administrator

The purpose of the annual actuarial valuation of the Arizona Elected Officials' Retirement Plan as of June 30, 2017 is to:

- Compute the liabilities associated with benefits likely to be paid on behalf of current retired and non-retired members.
- Compare assets with accrued liabilities to assess the funded condition.
- Compute the recommended employers' contribution for the Fiscal Year beginning July 1, 2018.

The funding objective is stated in Article 4, Chapter 5, Title 38, Sections 810C-D of the Arizona Revised Statutes. The valuation should not be relied upon for any other purpose.

The valuation process develops contribution rates that are sufficient to fund the Plan's normal cost (i.e., the costs assigned by the valuation method to the year of service about to be rendered), as well as to fund unfunded actuarial accrued liabilities as a dollar amount over a finite period. The valuations were completed based upon population data, asset data, and plan provisions as of June 30, 2017.

The valuation was based upon information furnished by the plan's administrative staff concerning Retirement Plan benefits, financial transactions, and active members, terminated members, retirees and beneficiaries. We checked the data for internal and year-to-year consistency, but did not audit the data. As a result, we do not assume responsibility for the accuracy or completeness of the data provided. The actuary summarizes and tabulates population data in order to analyze longer-term trends. The following schedules were prepared by the actuary and provided to the administrative staff to be included in the "Actuarial Section" of the June 30, 2017 CAFR:

- Aggregate Actuarial Balance Sheet as of June 30, 2017
- Summary of Valuation Assumptions
- Solvency Test
- Summary of Active Member Data
- Summary of Retirees and Inactive Members
- Schedule of Experience Gain/(Loss) for year ended June 30, 2017

Board of Trustees  
December 11, 2017  
Page 2

GRS did not prepare any of the schedules included in the “Financial Section” of the June 30, 2017 CAFR. However, we did provide certain pieces of information that were used in that section, such as the Actuarial Accrued Liability and the Actuarial Value of Assets.

Assets are valued on a market related basis. This method recognizes the assumed return fully each year and spreads each year’s gain or loss above or below assumed return over a closed 7-year period. The continuing effect of prior asset losses was dampened by the 7-year smoothing period, and further offset by the effect of lower than assumed pay increases. There remains \$13.4 million (\$12.6 million for pension and \$0.8 million for health) of unrecognized investment losses that will, in the absence of other gains, drive the contribution rate up over the next several years.

Actuarial valuations are based upon assumptions regarding future activity in specific risk areas including the rates of investment return and payroll growth, eligibility for the various classes of benefits, and longevity among retired lives. The Board of Trustees adopts these assumptions after considering the advice of the actuary and other professionals. The assumptions and the methods comply with the requirements of Statement No. 67 of the Governmental Accounting Standards Board. In addition, the assumptions and methods used for funding purposes are in accordance with the Actuarial Standards of Practice promulgated by the Actuarial Standards Board. Each actuarial valuation takes into account all prior differences between actual and assumed experience in each risk area and adjusts the contribution rates as needed. The June 30, 2017 valuations were based upon assumptions that were recommended in connection with a study of experience covering the 2011-2016 period. Future actuarial measurements may differ significantly from those presented in the valuations due to such factors as experience differing from that anticipated by the actuarial assumptions, changes in plan provisions, changes in actuarial assumptions or methods, or changes in applicable law.

Based upon the results of the June 30, 2017 valuations, the retired lives are less than fully funded on a funding value of assets basis and market value of assets basis. It is most important that this plan receive contributions at least equal to the actuarial rates. The Plan’s funded status as of June 30, 2017 is 30.7%, and the actuarially determined contribution has increased from 106.55% to 162.63% of payroll. The changes reflect continued investment loss phase-in, and are expected to be exacerbated going forward as statutorily required contributions that were set prior to the Fields and Hall cases will increasingly fall behind the Actuarially Determined Contribution. The statutorily required contribution of 23.5% of payroll plus court fees and a \$5 million appropriation is calculated to equal \$29 million for FY19, well short of the Actuarially Determined Contribution of \$82.7 million.

The June 30, 2017 actuarial valuation reflected the following changes:

**Assumption Changes:**

- Decrease the investment return assumption from 7.5% to 7.4%.
- Decrease the wage inflation assumption from 4.0% to 3.5%.
- Updated mortality to the RP-2014 tables, with MP-2016 fully generational projection scales.
- Updated withdrawal, disability and retirement assumptions.

Board of Trustees  
December 11, 2017  
Page 3

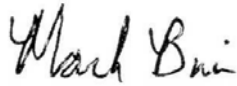

**Benefit Changes:**

- PBI increases paid in 2013, 2014 and 2015 have been as a result of the court ruling on the Hall lawsuit.
- The assumption regarding future PBI's for Tier 1 members was increased from 0.5% to 2.25%
- Tier 1 Employee contribution rates were decreased in accordance with the court ruling on the Hall lawsuit.

In order to gain a full understanding of the actuarial condition of the plan, it is important to read the full actuarial report that we have provided to the Plan.

Mark Buis, James D. Anderson and Francois Pieterse are Members of the American Academy of Actuaries (MAAA), and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein.

**EORP SUMMARY OF VALUATION ASSUMPTIONS**

**ECONOMIC ASSUMPTIONS**

Investment Rate of Return: 7.40% (net of expenses)  
 Wage Inflation: 3.50%

Active members are eligible to retire early at any age within 5 years of service, or normally at any age with 20 years of service, at age 62 with 10 years of service, or at age 65 with 5 years of service. Pensions were assumed to be decreased 3/12 of 1% for each month the age at early retirement precedes normal retirement age, with a maximum reduction of 30%.

**MORTALITY TABLES**

The mortality rates utilized are based upon the RP-2014 tables, as extended, and include a margin for future mortality improvements projected using a fully generational improvement scale. The tables used were as follows:

*Healthy Pre-Retirement:* The RP-2014 Employee Mortality Tables, extended via cubic spline, with future mortality improvements assumed each year using scale MP-2016.

These rates adopted by the Board of Trustees, as recommended by the Plan’s actuary, were first used for the June 30, 2017 valuation.

*Healthy Post-Retirement:* The RP-2014 Healthy Annuitant Mortality Tables, extended via cubic spline, with future mortality improvements assumed each year using scale MP-2016.

*Disability Retirement:* The RP-2014 Disabled Mortality Table, extended via cubic spline, with future mortality improvements assumed each year using scale MP-2016.

Board of Trustees  
Arizona Corrections Officer Retirement Plan 3010 East Camelback Road, Suite 200  
Phoenix, Arizona 85016-4416

**Re: Arizona Corrections Officer Retirement Plan**

Attention: Jared A. Smout, Administrator

The purpose of the annual actuarial valuation of the Arizona Corrections Officer Retirement Plan as of June 30, 2017 is to:

- Compute the liabilities associated with benefits likely to be paid on behalf of current retired and non-retired members.
- Compare assets with accrued liabilities to assess the funded condition.
- Compute the recommended employers' contribution for the Fiscal Year beginning July 1, 2018.

The funding objective is stated in Article 4, Chapter 5, Title 38, Section 891A of the Arizona Revised Statutes. The valuation should not be relied upon for any other purpose.

The valuation process develops contribution rates that are sufficient to fund the plan's normal cost (i.e., the costs assigned by the valuation method to the year of service about to be rendered), as well as to fund unfunded actuarial accrued liabilities as a level percent of active member payroll over a finite period. The valuations were completed based upon population data, asset data, and plan provisions as of June 30, 2017.

The valuation was based upon information furnished by the plan's administrative staff concerning Retirement Plan benefits, financial transactions, and active members, terminated members, retirees and beneficiaries. We checked the data for internal and year-to-year consistency, but did not audit the data. As a result, we do not assume responsibility for the accuracy or completeness of the data provided. The actuary summarizes and tabulates population data in order to analyze longer-term trends. The following schedules were prepared by the actuary and provided to the administrative staff to be included in the "Actuarial Section" of the June 30, 2017 CAFR:

- Aggregate Actuarial Balance Sheet as of June 30, 2017
- Summary of Valuation Assumptions
- Solvency Test
- Summary of Active Member Data
- Summary of Retirees and Inactive Members
- Schedule of Experience Gain/(Loss) for year ended June 30, 2017

Board of Trustees  
December 11, 2017  
Page 2

GRS did not prepare any of the schedules included in the “Financial Section” of the June 30, 2017 CAFR. However, we did provide certain pieces of information that were used in that section, such as the Actuarial Accrued Liability and the Actuarial Value of Assets.

Assets are valued on a market related basis. This method recognizes the assumed return fully each year and spreads each year’s gain or loss above or below assumed return over a closed 7-year period. The continuing effect of prior asset losses was dampened by the 7-year smoothing period, and further offset by the effect of lower than assumed pay increases. There remains \$57.5 million (\$53.7 million for pension and \$3.8 million for health) of unrecognized investment losses that will, in the absence of other gains, drive the contribution rate up over the next several years.

Actuarial valuations are based upon assumptions regarding future activity in specific risk areas including the rates of investment return and payroll growth, eligibility for the various classes of benefits, and longevity among retired lives. The Board of Trustees adopts these assumptions after considering the advice of the actuary and other professionals. The assumptions and the methods comply with the requirements of Statement No. 67 of the Governmental Accounting Standards Board. In addition, the assumptions and methods used for funding purposes are in accordance with the Actuarial Standards of Practice promulgated by the Actuarial Standards Board. Each actuarial valuation takes into account all prior differences between actual and assumed experience in each risk area and adjusts the contribution rates as needed. The June 30, 2017 valuations were based upon assumptions that were recommended in connection with a study of experience covering the 2011-2016 period. Future actuarial measurements may differ significantly from those presented in the valuations due to such factors as experience differing from that anticipated by the actuarial assumptions, changes in plan provisions, changes in actuarial assumptions or methods, or changes in applicable law.

It is most important that this plan receive contributions at least equal to the actuarial rates. The June 30, 2017 actuarial valuation reflected the following changes:

**Assumption Changes:**

- Decrease the investment return assumption from 7.5% to 7.4%.
- Decrease the wage inflation assumption from 4.0% to 3.5%.
- Updated mortality to the RP-2014 Tables, with 75% of MP-2016 fully generational projection scales.
- Updated withdrawal, disability and retirement assumptions.

**Benefit Changes:**

- PBI increases paid in 2013 and 2014 have been recalculated as a result of the court ruling on the Hall lawsuit.
- The assumption regarding future PBI’s for Tier 1 members was increased from 0.5% to 2.25%

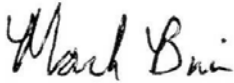

In order to gain a full understanding of the actuarial condition of the plan, it is important to read the full actuarial report that we have provided to the Plan.

**CORP SUMMARY OF VALUATION ASSUMPTIONS**

**ECONOMIC ASSUMPTIONS**

Investment Rate of Return: 7.40% (net of expenses)

Wage Inflation: 3.50%

**MORTALITY TABLES**

The mortality rates utilized are based upon the RP-2014 tables, as extended, and include a margin for future mortality improvements projected using a fully generational improvement scale. The tables used were as follows:

*Healthy Pre-Retirement:* The RP-2014 Employee Mortality Tables, extended via cubic spline, adjusted backward to 2006 using scale MP-2014, setting it as the 2017 base year, with future mortality improvements assumed each year using 75% of scale MP-2016.

*Healthy Post-Retirement:* The RP-2014 Healthy Annuitant Mortality Tables, extended via cubic spline, adjusted backward to 2006 using scale MP-2014, setting it as the 2017 base year,, with future mortality improvements assumed each year using 75% of scale MP-2016.

*Disability Retirement:* The RP-2014 Disabled Mortality Table, extended via cubic spline, extended via cubic spline, adjusted backward to 2006 using scale MP-2014, setting it as the 2017 base year, with future mortality improvements assumed each year using 75% of scale MP-2016.

Active members hired before January 1, 2012 are eligible to retire normally at any age with 20 years of service (25 years for dispatchers), at age 62 with 10 years of service, or when a combination of age and credited service is equal to or greater than 80 years.

Active members hired on or after January 1, 2012 are eligible to retire at age 62 with 10 years of service or at age 52.5 with 25 years of service.

These rates adopted by the Board of Trustees, as recommended by the Plan’s actuary, were first used for the June 30, 2017 valuation.

**CORP MISCELLANEOUS AND TECHNICAL ASSUMPTIONS****MARRIAGE ASSUMPTION**

75% of males and 50% of females are assumed to be married for purposes of death-in-service benefits. Male spouses are assumed to be three years older than female spouses for active member valuation purposes.

**PAY INCREASE TIMING**

Six months after the valuation date.

**DECREMENT TIMING**

Decrements of all types are assumed to occur mid-year.

**ELIGIBILITY TESTING**

Eligibility for benefits is determined based upon the age nearest birthday and service nearest whole year on the date the decrement is assumed to occur.

**DECREMENT RELATIVITY**

Decrement rates are used directly from the experience study, without adjustment for multiple decrement table effects.

**DECREMENT OPERATION**

Disability and turnover decrements do not operate during retirement eligibility.

**SERVICE CREDIT ACCRUALS**

It is assumed that members accrue one year of service credit per year.

**INCIDENCE OF CONTRIBUTIONS**

Contributions are assumed to be received continuously throughout the year based upon the computed percent of payroll shown in this report, and the actual payroll payable at the time contributions are made.

**NORMAL FORM OF BENEFIT**

A straight life payment is the assumed normal form of benefit for members who are not married, and the 80% Joint and Survivor form of payment with no reduction, for married members. 75% of males and 50% of females are assumed to be married at time of retirement.

**BENEFIT SERVICE**

Exact fractional service is used to determine the amount of benefit payable.

**HEALTH CARE UTILIZATION**

60% of future retirees are expected to utilize health care. 75% of males and 50% of females are assumed to be married at the time of retirement.

**FUTURE COST OF LIVING INCREASES**

Members hired on or before January 1, 2012: 2.25% of benefit. Members hired on or after January 1, 2012: 0.50% of benefit.

**CORP SUMMARY OF ACTIVE MEMBER DATA**

**AGE AND SERVICE DISTRIBUTION**

Listed below is a summary of Active Members by age group, years of service and annual compensation. The summary points out that there were 13,958 active members in the Plan as of June 30, 2017, compared to 13,846 for the prior year.

**SOLVENCY TEST**

Testing the financial solvency of a retirement plan can be done in several ways. The funding objective is to meet long-term benefit promises through contributions that remain approximately level from year to year as a percent of member payroll. If the contributions to the plan are level in concept and soundly executed, and if the plan continues its present operations pattern for the indefinite future, the plan will pay all promised benefits when due - the ultimate test of financial soundness.

In a plan that has been following the discipline of level percent of payroll financing, the liabilities for active member contributions on deposit (liability 1) and the liabilities for future benefits to present retired lives (liability 2) will be fully covered by present assets (except in rare circumstances). In addition, the liabilities for service already rendered by active members (liability 3) will be partially covered by the remainder of present assets. Generally, if the plan has been using level cost financing, the funded portion of liability 3 will increase over time. Liability 3 being fully funded is very rare. All amounts presented are in thousands.

A short term solvency test is one means of checking a plan's progress under its funding program. In a short term solvency test, the plan's present assets (cash and investments) are compared with:

1. Active member contributions on deposit.
2. The liabilities for future benefits to present re tired lives.
3. The liabilities for service already rendered by active members.

### SUMMARY

The Statistical Section provides additional historical perspective, context, and detail to assist the reader in using the information in the financial statements, notes to the financial statements and required supplemental information to understand and assess the economic condition of PSPRS.

Financial trend information is intended to assist users in understanding and assessing the changes in the financial position over time. Schedules and charts presenting financial trend information are Schedule of Changes in Net Position, Schedule of Revenue by Source, Schedule of Expenses by Type, Deductions from Net Position for Benefits and Refunds by Type, Valuation Assets vs. Pension Liabilities, and Contribution Rates.

Operating information is intended to provide contextual information about the operations and resources of PSPRS to assist readers in using financial statement information to understand and assess the economic condition. Schedules and charts presenting operating information are Membership in the Retirement System\*, Principal Participating Employers, Benefit Recipients by Location, Summary of the Growth of the System, Benefits Payable\*, Average Monthly Benefit Amounts\*, Summary of Benefit Increases\*, Schedule of Changes in Employers' Reserve Balances, Schedule of Changes in Refundable Member Reserve Balances, Schedule of Employers' Earnings Distribution, and Participating Employers.

CORP-AOC was first split out from CORP in 2014. In some financial schedules in this statistical section, especially when multiple years worth of data are shown, CORP-AOC has been reported separately from CORP. In the other financial schedules, CORP-AOC has been combined with CORP.

Schedules and information are derived from PSPRS internal sources unless otherwise indicated.

\* Schedules and data are provided by actuarial consultant Gabriel, Roeder & Smith.
