

ARIZONA PUBLIC SAFETY PERSONNEL RETIREMENT SYSTEM CONSOLIDATED REPORT

JUNE 30, 2011

November 4, 2011

The Board of Trustees Arizona Public Safety Personnel Retirement System Phoenix, Arizona

Re: Arizona Public Safety Personnel Retirement System Actuarial Valuation as of June 30, 2011

Ladies and Gentlemen:

The results of the June 30, 2011 annual actuarial valuation of members covered by the Arizona Public Safety Personnel Retirement System (PSPRS) are presented in this report. The purpose of the valuation was to measure the System's funding progress, provide actuarial information in connection with applicable Governmental Accounting Standards Board Statements and to determine the employer contribution for the 2012-2013 fiscal year. This report should not be relied upon for any other purpose. This report may be distributed to parties other than the System only in its entirety and only with the permission of the Board.

The valuation was based upon information, furnished by the State Retirement System, concerning Retirement System benefits, financial transactions, and individual members, terminated members, retirees and beneficiaries. Data was checked for internal and year to year consistency, but was not otherwise audited by us. As a result, we are unable to assume responsibility for the accuracy or completeness of the data provided.

Future actuarial measurements may differ significantly from those presented in this report due to such factors as experience differing from that anticipated by actuarial assumptions, changes in plan provisions, actuarial assumptions/methods or applicable law. Due to the limited scope of this assignment, we did not perform an analysis of the potential range of future measurements.

To the best of our knowledge, this report is complete and accurate and the valuation was conducted in accordance with standards of practice prescribed by the Actuarial Standards Board and in compliance with the applicable state statutes. The undersigned are independent of the plan sponsor and are members of the American Academy of Actuaries (MAAA) who meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein. It is our opinion that the actuarial assumptions used for the valuation produce results which are reasonable.

1. Required Employer Contributions to Support Retirement Benefits

The computed employer contribution and funded status for the fiscal year beginning July 1, 2012 is shown below.

	Contribution	Funded Status
Averages	27.18%	61.9%

2. Contribution Rate Comparison

The chart below compares the results of this valuation of the Retirement System with the results of the prior year's valuation:

Valuation Date	Contribution	Funded Status	
6/30/2010	22.68%	65.8%	
6/30/2011	27.18%	61.9%	

3. Reasons for Change

There are three general reasons why contribution rates change from one valuation to the next. The first is a change in the benefits or eligibility conditions of the plan. The second is a change in the valuation assumptions or methods used to predict future occurrences. The third is the difference during the year between the plan's actual experience and what the assumptions predicted.

The following benefit changes were reflected in the valuation:

Effective May 31, 2011 no more excess investment earnings will be transferred to the COLA
reserve. Any remaining balance in the COLA reserve will be used to pay future COLAs until
the reserve is exhausted.

• Member contributions are increased from 7.65% to 9.55% of pay for the fiscal year 2012-2013 with maintenance of effort provision. The entire schedule is shown in the Appendix.

The following method and assumption changes were reflected in the valuation:

- The actuarial funding method was changed from the Projected Unit Credit method (PUC) to the Entry Age Normal method (EAN).
- The investment return was decreased to 8.25% from 8.50%.
- The wage inflation assumption was decreased from 5.50% to 5.0%.

The contribution rate increased from 22.68% of payroll last year to 27.18% of payroll this year for the following reasons:

- Continued phase-in of asset losses from prior years.
- Cost-of-living increases granted for retirees.
- A decline in the expected payroll base.
- Changes in the actuarial cost method and assumptions.

4. Plan Experience

Experience during the year ended June 30, 2011 was overall unfavorable. During the year ended June 30, 2011, the actuarial return on fund assets was lower than expected. The market value smoothing techniques used in this valuation of the System recognize both past and present investment gains and losses. While on a market value basis, the Systems return was 17.5%, the resulting actuarial asset yield for the year ended June 30, 2011 was 4.4% (this is the rate of return on the actuarial value of assets before the COLA reserve is subtracted). The asset losses were partially offset by gains attributable to demographic experience. Detailed information related to System experience is shown on page B-2.

GRS -2-

5. Looking Ahead

If the Market Value of Assets were used as the basis of our calculations (instead of the smoothed value), the employer contribution would have been approximately 30% of payroll (instead of 27.18% of payroll) and the funded status would have been about 56% (instead of 61.9%). If equity markets do not improve significantly, the June 30, 2012 valuation will likely show yet another increase in the employer contribution amount (absent any liability gains). In addition, the experience study that will be completed during fiscal year 2012 will also have an impact on future actuarial valuations.

6. Other Comments

The ratio of the Funding Value of Assets to Market Value of Assets as shown on page C-1 has decreased from 128% in the June 30, 2010 valuation to 114% in the June 30, 2011 valuation. The Actuarial Standards of Practice require that the Funding Value of Assets fall within a reasonable range around the Market Value. Although some actuarial judgment is used to determine what is deemed 'reasonable', a ratio approaching 130% was on the high end. The asset smoothing method will be reviewed in the next experience study.

The Actuarial Standards of Practice with regard to the mortality assumption has recently been revised. ASOP No. 35 Disclosure Section 4.1.1. now states "The disclosure of the mortality assumption should contain sufficient detail to permit another qualified actuary to understand the provision made for future mortality improvement. If the actuary assumes zero mortality improvement after the measurement date, the actuary should state that no provision was made for future mortality improvement."

There is currently no margin for future mortality improvement in the current mortality assumption. The mortality assumption will be reviewed in conjunction with the experience study that will be completed in 2012.

7. Conclusion

The continuing effect of prior losses was dampened by the 7-year smoothing period, and further offset by the effect of lower than expected pay increases. There remains \$748 million of unrecognized investment losses that will, in the absence of other gains, drive the contribution rate up over the next several years.

After accounting for active member contributions, the retired lives are less than fully funded on a funding value of assets basis, and much less than fully funded based upon the market value of assets (please see page B-4). It is most important that this plan receive contributions <u>at least</u> equal to the rates shown in this report.

GRS -4-

SECTION AINTRODUCTION

FUNDING OBJECTIVE

The purpose of the annual actuarial valuation of the Arizona Public Safety Personnel Retirement System as of June 30, 2011 is to:

- Compute the liabilities associated with benefits likely to be paid on behalf of current retired and active members. This information is contained in Section B.
- Compare accrued assets with accrued liabilities to assess the funded condition. This information is contained in Section B.
- Compute the employers' recommended contribution rates for the Fiscal Year beginning July 1, 2012. This information is contained in Section A.

This objective is stated in Article 4, Chapter 5, Title 38, Sections 843B and 848N of the Arizona Revised Statutes.

CONTRIBUTION RATES

The Retirement System is supported by member contributions, employer contributions and investment income from Retirement System assets.

Contributions which satisfy the funding objective are determined by the annual actuarial valuation and are sufficient to:

- (1) Cover the actuarial present value of benefits allocated to the current year by the actuarial cost method described in Section E (the normal cost); and
- (2) Finance over a period of future years the actuarial present value of benefits not covered by valuation assets and anticipated future normal costs (the unfunded actuarial accrued liability).

Computed contribution rates for the fiscal year beginning July 1, 2012 are shown on page A-2.

GRS A-1

CONTRIBUTION REQUIREMENTS

Development of Employer Contributions for the Indicated Valuation Date

	June 30,			
	2010	2011		
Contribution for Fiscal Year	2012	2013		
Pension				
Normal cost requirement				
Service pensions	16.25%	15.68%		
Disability pensions	1.65	2.15		
Survivors of active members	0.82	1.02		
Refunds of members' accumulated contributions	0.53	1.03		
Total normal cost requirement	19.25%	19.88%		
Employee Contributions				
Total employee rate	7.65	9.55		
Less maintenance of effort	0.00	1.90		
Net employee rate	7.65%	7.65%		
Employer normal cost requirement	11.60%	12.23%		
Amortization of unfunded liabilities	9.66%	13.47%		
Total pension contribution requirement	21.26%	25.70%		
Health				
Normal cost requirement	0.57%	0.38%		
Amortization of unfunded liabilities	0.85%	_1.10%		
Total health contribution requirement	1.42%	1.48%		
Total contribution requirement	22.68%	27.18%		

Actuarial accrued liability, \$9,365,260,877, exceeded the funding value of assets, which was \$5,795,944,673. The resulting unfunded actuarial accrued liabilities were amortized as a level percent of payroll over a closed period of 25 years and added to the employer normal cost. The 25 year period is a one year decrease from last year. The results shown above are prior to the application of the statutory minimum of 8% of payroll (5% of payroll if the actual employer contribution rate is less than 5% for the 2006/2007 fiscal Year).

GRS A-2

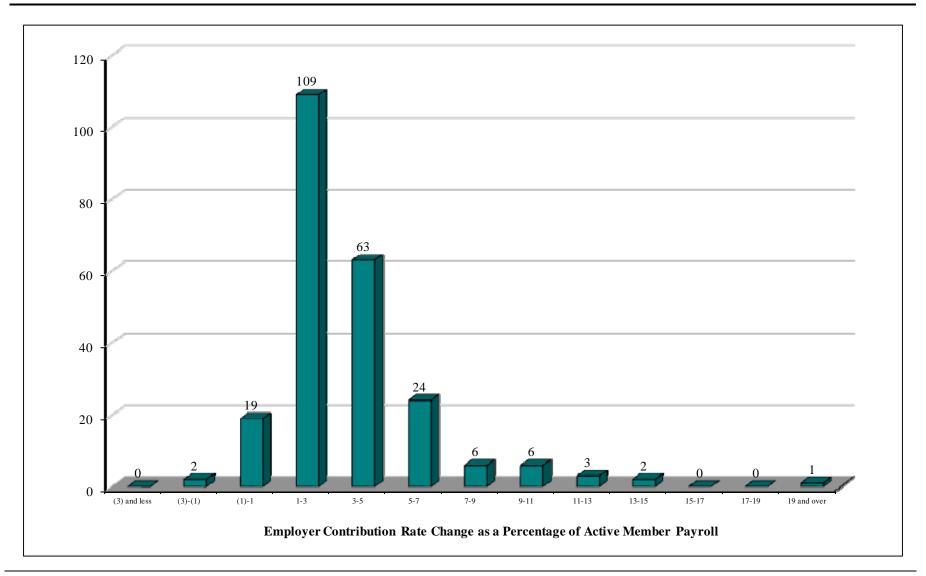

HISTORICAL SUMMARY OF EMPLOYER RATES

Valuation Date June 30	Fiscal Year Ending June 30	Normal Cost	Unfunded Actuarial Accrued Liability	Total
2002	2004	11.61%	(3.95)%	7.66%
2003	2005	10.32	(0.27)	10.05
2004	2006	10.29	2.51	12.80
2005	2007	10.71	6.38	17.09
2006	2008	10.08	6.44	16.52
2007	2009	12.33	9.38	21.71
2008	2010	11.80	8.97	20.77
2009	2011	12.08	8.81	20.89
2010	2012	12.17	10.51	22.68
2011	2013	12.61	14.57	27.18

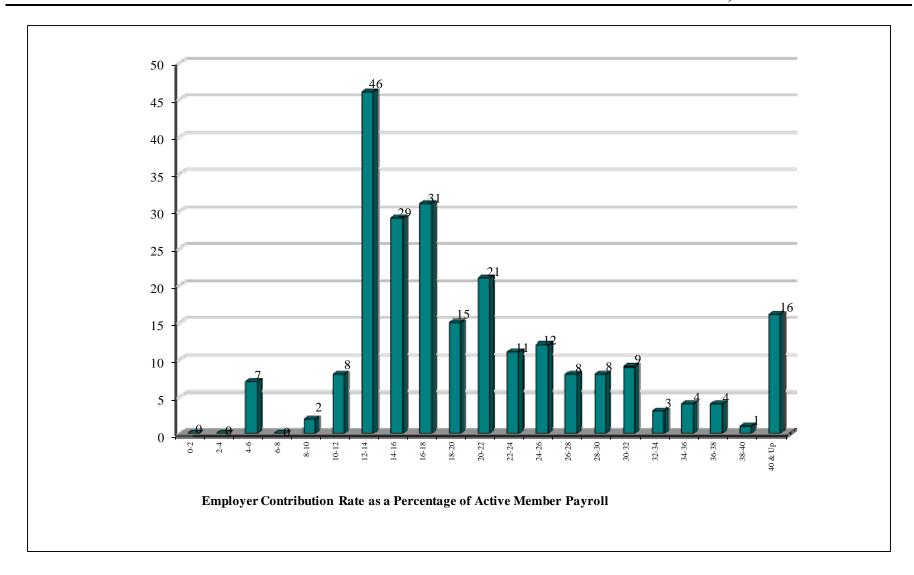

2005 results were revised pursuant to changes enacted by the 2006 Legislature and the PSPRS Board of Trustees.

Results prior to 2009 were calculated by the prior actuary.

E. Net Unfunded Accrued Liability: (C) + (D)	2,911,334,672	3,579,462,506	
F. Funding Ratio: (B) / (A.5)	65.8%	61.9%	

Present Assets exclude \$168,330,444 in reserves held for future pension increases pursuant to state statute.

DERIVATION OF EXPERIENCE GAIN/(LOSS)

Actual experience will never (except by coincidence) exactly match assumed experience. Gains and losses often cancel each other over a period of years, but sizable year-to-year fluctuations are common. Detail on the derivation of the experience gain (loss) is shown below, along with a year-by-year comparative schedule.

(Dollar amounts in \$'000s)

	June 30,

2005 Results revised pursuant to changes in assumptions and methods enacted by the 2006 Legislature and the PSPRS Board of Trustees. Results prior to 2009 were calculated by the prior actuary.

SHORT CONDITION TEST

If the contributions to PSPRS are soundly executed, the System will pay all promised benefits when due -- the ultimate test of financial soundness.

A short condition test is one means of checking a system's progress under its funding program. In a short condition test, the plan's present assets (cash and investments) are compared with:

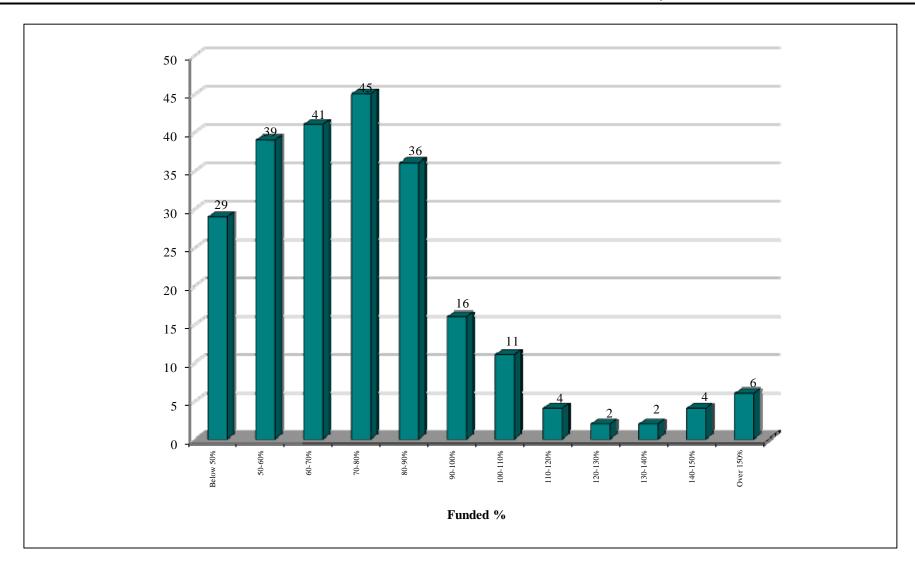

- 1) Member contributions on deposit;
- 2) The liabilities for future benefits to present retired lives;
- 3) The liabilities for service already rendered by active and inactive members.

In a system that has been following the discipline of pre-funding, the liabilities for member contributions on deposit (liability 1) and the liabilities for future benefits to present retired lives (liability 2) will be fully covered by present assets (except in rare circumstances). In addition, the liabilities for service already rendered by active and inactive members (liability 3) will be partially covered by the remainder of present assets. The larger the funded portion of liability 3, the stronger the condition of the system.

Short Condition Test (Including Heath Insurance Subsidy) (in \$'000s)

SECTION C

FUND ASSETS

DEVELOPMENT OF FUNDING VALUE OF ASSETS (7-YEAR SMOOTHING)

Year Ended June 30:	2011	2012	2013	2014	2015	2016	2017
A. Funding Value Beginning of Year (Including Future Benefit Increases)	\$ 5,866,593,317						
B. Market Value End of Year	5,216,642,852						
C. Market Value Beginning of Year	4,585,863,403						
D. Non Investment Net Cash Flow	(158,484,278)						
E. Investment Income							
E1. Total: B-C-D	789,263,727						
E2. Amount for Immediate Recognition (8.50%)	491,924,850						
E3. Amount for Phased in Recognition: E1-E2	297,338,877						
F. Phased in Recognition of Investment Income							
F1. Current Year: E3 / 7	42,476,982						
F2. First Prior Year	9,922,277	\$ 42,476,982					
F3. Second Prior Year	(192,391,612)	9,922,277	\$ 42,476,982				
F4. Third Prior Year	(124,481,914)	(192,391,612)	9,922,277	\$ 42,476,982			
F5. Fourth Prior Year	50,985,948	(124,481,914)	(192,391,612)	9,922,277	\$ 42,476,982		
F6. Fifth Prior Year	(11,159,896)	50,985,948	(124,481,914)	(192,391,612)	9,922,277	42,476,982	
F7. Sixth Prior Year	(11,110,557)	(11,159,895)	50,985,946	(124,481,913)	(192,296,967)	9,922,277	\$42,476,985
F8. Total Recognized Investment Gain	(235,758,772)	(224,648,214)	(213,488,321)	(264,474,266)	(139,897,708)	52,399,259	42,476,985
G. Funding Value End of Year							
G1. Preliminary Funding Value End of Year: (A+D+E2+F8)	5,964,275,117						
G2. Future Benefit Increases	168,330,444						
G3. End of Year: (G1-G2)	5,795,944,673						
H. Difference Between Market Value & Funding Value: (B-G1)	(747,632,265)	(522,984,051)	(309,495,730)	(45,021,464)	94,876,244	42,476,985	0
I. Market Rate of Return	17.5%						
J. Recognized Rate of Return	4.4%						
K. Ratio of Funding Value to Market Value	114.3%						

The funding value of assets recognizes assumed investment return (line E2) fully each year. Differences between actual and assumed investment return (line E3) are phased in over a closed 7-year period. During periods when investment performance exceeds the assumed rate, funding value of assets will tend to be less than market value. During periods when investment performance is less than the assumed rate, funding value of assets will tend to be greater than market value. The funding value of assets is **unbiased** with respect to market value. At any time it may be either greater or less than market value. If actual and assumed rates of investment return are exactly equal for 7 consecutive years, the funding value will become equal to market value.

REVENUES AND DISBURSEMENTS

	2010	2011
Market Value at the Beginning of Year:	\$ 4,115,701,122	\$ 4,585,863,403

Results prior to 2009 were calculated by the prior actuary.

GRS D-5

VALUATION METHODS

Actuarial Cost Method - Normal cost and the allocation of benefit values between service rendered before and after the valuation date were determined using an individual entry-age actuarial cost method having the following characteristics:

- (i) the annual normal costs for each individual active member, payable from the date of hire to the date of retirement, are sufficient to accumulate to the value of the member's benefits.
- (ii) each annual normal cost is a constant percentage of the member's year-by-year projected covered pay.

The entry-age actuarial cost method allocates the actuarial present value of each member's projected benefits on a level basis over the member's compensation between the entry age of the member and the assumed exit ages.

Actuarial Accrued Liability - The actuarial accrued liability is the portion of actuarial present value allocated to service rendered prior to the valuation date, including experience gains and losses. The actuarial accrued liability was computed using the assumptions summarized in this report.

Actuarial Value of System Assets - The actuarial value of assets recognizes assumed investment income fully each year. Differences between actual and assumed investment income are phased in over a closed seven year period. During periods when investment performance exceeds the assumed rate, actuarial value of assets will tend to be less than market value. During periods when investment performance is less than the assumed rate, the actuarial value of assets will tend to be greater than market value.

Financing of Unfunded Actuarial Accrued Liabilities – The actuarial value of assets were subtracted from the computed actuarial accrued liability. Any unfunded amount would be amortized as level percent of payroll over a closed period of 25 years. If the actuarial value of assets exceeded the actuarial accrued liability, the excess was amortized over an open period of 20 years and applied as a credit to reduce the normal cost which otherwise would be payable.

Active member payroll was assumed to increase 5.0% annually for the purpose of computing the amortization payment (credit) as a level percent of payroll.

VALUATION ASSUMPTIONS

Beginning with the June 30, 2007 valuation and with each subsequent valuation, if the actuarial value of assets exceeds the actuarial accrued liabilities, one half of this excees in each year is allocated to a Stabilization Reserve. The Stabilization Reserve is excluded from the calculation of the employer contribution rates. The Stabilization Reserve continues to accumulate as long as the plan is overfunded. Once the plan becomes under-funded, the Stabilization Reserve will be used to dampen increases in the employer contribution rates.

The rate of investment return was 8.25% a year, compounded annually net of investment and administrative expenses.

The assumed real return is the rate of return in excess of wage growth. Considering other assumptions used in the valuation, the 8.25% nominal rate translates to a net real return over wage growth of 3.25% a year.

The rates of pay increase used for individual members are shown below. This assumption is used to project a member's current pay to the pay upon which System benefits will be based.

	Salary Increase Assumptions For an Individual Member					
Sample	Merit &	Base	Increase			
Ages	Seniority	(Economy)	Next Year			
20	3.0%	5.0%	8.0%			
25	3.0%	5.0%	8.0%			
30	2.6%	5.0%	7.6%			
35	1.1%	5.0%	6.1%			
40	0.2%	5.0%	5.2%

45	0.2%	5.0%	5.2%			
50	0.2%	5.0%	5.2%			
55	0.1%	5.0%	5.1%			
60	0.0%	5.0%	5.0%			
Ref:			319			

Active Member Payroll is assumed to grow at 5.0% per year. There is no specific price inflation assumption used for this valuation since no benefits are linked to prices.

The healthy mortality table used to evaluate death after retirement in this valuation of the System was the RP 2000 Healthy Annuity Mortality table for males with no adjustment, and the female table with one year set forward. No provision is currently made for future improvements in mortality after the measurement date. Please see Comment 6 on page 3 for additional information. This assumption was first used for the June 30, 2007 valuation of the System. Sample rates of mortality and years of life expectancy are shown below:

Sample	Probab	ility of	Futur	e Life
Attained	Dying N	ext Year	Expectan	cy (years)
Ages	Men	Women	Men	Women
50	0.53%	0.25%	30.07	32.35
55	0.59	0.39	25.86	27.79
60	0.82	0.69	21.64	23.42
65	1.34	1.14	17.62	19.33
70	2.22	1.86	13.92	15.54
75	3.78	3.10	10.61	12.13
80	6.44	5.08	7.79	9.16
Ref:	702 x 1.00	703 x 1.00		
	0 year set forward	1 year set forward		

This assumption is used to measure the probabilities of each benefit payment being made after retirement. For disabled members, non-disability rates with a five year set forward were used.

For actives, the sample rates of mortality for death-in-service are shown below, and were first used for the June 30, 2007 valuation of the System.

Sample Attained	Probability of Dying Next Year				
Ages	Men	Women			
50	0.20%	0.20%			
55	0.28	0.30			
60	0.44	0.47			
65	0.70	0.66			
Ref:	663 x 1.00 1 year set back	664 x 1.00 2 year set forward			

VALUATION ASSUMPTIONS

The rates of regular retirement used to measure the probability of eligible members retiring during the next year are shown below. This assumption was first used for the June 30, 2007 valuation of the System.

Retirement/DROP Rates: Service-related rates based in the following schedule:

Service at		Ra	tes	
Retirement	Police Large	Police Small	Fire Large	Fire Small
20	30%	45%	15%	20%
21	20%	35%	10%	20%
22	20%	25%	10%	10%
23	10%	15%	10%	10%
24	10%	10%	10%	10%
25	45%	40%	30%	20%
26	45%	40%	45%	30%
27	45%	30%	30%	30%
28	45%	30%	45%	30%
29	45%	30%	45%	30%
30	50%	30%	45%	45%
31	50%	30%	50%	45%
32	80%	65%	50%	45%
33	80%	65%	50%	45%
34	100%	100%	100%	100%
Ref.	1737	1738	1739	1740

Active members with at least 34 years of service are assumed to retire within the year. Members who do not acquire 20 years of service prior to age 62 are assumed to retire upon first eligibility following attainment of age 62.

VALUATION ASSUMPTIONS

Rates of separation from active membership used in the valuation are shown below (rates do not apply to members eligible to retire and do not include separation on account of death or disability). This assumption measures the probabilities of members remaining in employment. This assumption was first used for the June 30, 2007 valuation of the System.

Sample	Years of	% of Activ	% of Active Members Separating Within Next Year				
Ages	Service	Police Large	Police Small	Fire Large	Fire Small		
All	0	12.00%	15.00%	7.00%	7.50%		
	1	4.50%	10.00%	1.50%	6.00%		
	2	3.50%	9.00%	1.00%	5.00%

Ref	588	589	590	591		

SUMMARY OF ASSUMPTIONS USED JUNE 30, 2011

MISCELLANEOUS AND TECHNICAL ASSUMPTIONS

Marriage Assumption: 90% of males and females are assumed to be married for

purposes of death-in-service benefits. Male spouses are assumed to be three years older than female spouses for active member

valuation purposes.

Pay Increase Timing: Six months after the valuation date.

Decrement Timing: Decrements of all types are assumed to occur mid-year.

Eligibility Testing: Eligibility for benefits is determined based upon the age nearest

birthday and service nearest whole year on the date the

decrement is assumed to occur.

Decrement Relativity: Decrement rates are used directly from the experience study,

without adjustment for multiple decrement table effects.

Decrement Operation: Disability and turnover decrements do not operate during

retirement eligibility.

Service Credit Accruals: It is assumed that members accrue one year of service credit per

year.

Incidence of Contributions: Contributions are assumed to be received continuously

throughout the year based upon the computed percent of payroll shown in this report, and the actual payroll payable at the time

contributions are made.

Normal Form of Benefit: A straight life payment is the assumed normal form of benefit

for members who are not married, and the 80% Joint and Survivor form of payment with no reduction, for married members. 90% of members are assumed to be married at time of

retirement.

Benefit Service: Exact fractional service is used to determine the amount of

benefit payable.

Health Care Utilization: 80% of future retirees are expected to utilize retiree health care.

90% of those are assumed to be married.

Future Cost of Living

Increases:

Future cost of living increases are not reflected in the liabilities. The experience study that will be prepared in fiscal year 2012 will analyze this assumption and will recommend a load to

will analyze this assumption and will recommend a los

reflect future cost of living increases, if necessary.

GRS E-7

PLAN PROVISIONS

Summary of Plan Provisions Valued and/or Considered

Membership: Persons who are employed in an eligible group, prior to attaining age 50 years, for at least 40 hours a week for more than six months per year.

Average Monthly Compensation: One-thirty-sixth of total compensation paid to member during the three years, out of the last 20 years of credited service, in which the amount paid was highest. Compensation is the amount including base salary, overtime pay, shift differential pay and holiday pay, paid to an employee on a regular payroll basis and longevity pay paid at least every six months for which contributions are made to the System.

Normal Retirement: First day of month following completion of 20 years of service or following 62nd birthday and completion of 15 years of service.

The amount of monthly normal pension is based on credited service and average monthly compensation as follows:

- For retirement with 25 or more years of credited service, 50% of average monthly compensation for the first 20 years of credited service, plus 2-1/2% of average monthly compensation for each year of credited service above 20 years.
- For retirement with 20 years of credited service but less than 25 years of credited service, 50% of average monthly compensation for the first 20 years of credited service, plus 2% of average monthly compensation for each year of credited service between 20 and 25 years.
- For retirement with less than 20 years of credited service, the percent of average monthly compensation is reduced at a rate of 4% for each year less than 20 years.

The maximum amount payable as a normal retirement pension is 80% of the average monthly compensation.

Vested Termination (**deferred retirement**): Termination of covered position employment with 10 or more years of credited service. Pension is equal to twice the amount of pension based on the member's accumulated contributions with payments commencing at age 62. Benefit is forfeited if accumulated contributions are refunded. The following schedule shows additional money which would be payable to members who receive a refund of their accumulated member contributions.

Additional Monies (% of Contributions)
0%
25-40
55-70
85-100

Ordinary Disability Retirement (not duty-related): Physical condition which totally and permanently prevents performance of a reasonable range of duties or a mental condition which totally and permanently prevents any substantial gainful employment. The amount of pension is a percentage of normal pension, as follows:

Credited Service	Additional Monies (% of Contributions)
Less than 7 years	25%
7-13 years	50%
14-19 years	75%

Accidental Disability Retirement (duty-related): Total and presumably permanent disability, incurred in performance of duty, preventing performance of a reasonable range of duties within the employee's job classification. No credited service requirement. Pension is computed in the same manner as normal pension based on credited service and average monthly compensation at time of termination of employment. Pension is 50% of average monthly compensation, or normal pension amount, whichever is greater.

Offset of Ordinary Disability Retirement before the member's normal retirement date: The pension is reduced if the retiree engages in any employment and the income from this employment is greater than the retiree's pension. The reduction is equal to the difference between the retiree's income from employment and the retiree's pension.

Temporary Disability: Termination of employment prior to normal retirement eligibility by reason of temporary disability. Pension is 1/12 of 50% of compensation during the year preceding the date disability was incurred. Payments terminate after 12 months of prior recovery.

Catastrophic Disability: Pension is 90% of average monthly compensation. After 60 months, the pension is the greater of 62.5% of average monthly compensation or the member's accrued normal pension.

Survivor Pension: Death while a member is employed by an employer, or death after retirement. No credited service requirement.

Spouse Pension: 80% of pension deceased active member would have been paid for accidental disability retirement or, in the case of retired member, 80% of the retired member's pension. Requires two years of marriage. Terminates upon death. For member killed in line of duty, 100% of average compensation, reduced by child's pension.

Child's Pension: 20% of the pension each month based on the calculation for an accidental disability retirement. Payable to a dependent child under age 18 (age 23 if a full-time student).

Guardian's Pension: Same amount as spouse's pension. Payable only during periods no spouse is being paid and there is at least one child under age 18 (age 23 if a full time student). 80% of the member's pension and the Child's Pension will be paid to the guardian.

Other Termination of Employment: Member is paid his/her accumulated contributions.

Post-Retirement Adjustments: Effective July 1 of each year, each retired member or survivor of a retired member may be entitled to a permanent benefit increase in his base benefit. The maximum amount of the increase is four percent (4%) of the average normal PSPRS benefit being received on the preceding June 30 and is contingent upon sufficient excess investment earnings for the fund. To be eligible for the increase the member or survivor must be age 55 or older on July 1 of the current year and began receiving benefits on or before July 31 of the previous year. A member or survivor is also eligible if he began receiving benefits on or before July 31 of the two previous years regardless of age.

A COLA reserve is maintained and used to pay for the post-retirement adjustment. The investment return on the COLA reserve is the same as the return on the market value of assets (whether the return is positive or negative). Additional amounts are added to the COLA reserve in years when the investment return on the market value of assets exceeds 9.0%. Each year the present value of that year's post-retirement adjustment is subtracted from the COLA reserve. A post-retirement adjustment is paid as long as there is a positive balance in the COLA reserve.

Post-Retirement Health Insurance Subsidy: Payable on behalf of retired members and survivors who elect coverage provided by the state or participating employer. The amounts cannot exceed:

Member	Only	With Dependents						
Not Medicare Eligible			All Medicare Eligible	One With Medicare				
\$150	\$100	\$260	\$170	\$215				

Deferred Retirement Option Plan (DROP): A member with 20 or more years of credited service under the System may enter into the DROP program with his employer. Under the DROP program, the member must voluntarily and irrevocably elect to enter into the program with his employer for a period of up to 60 months. During the DROP period, the member remains in the employ of the employer as a full-time paid firefighter or full-time paid certified peace officer but no member or employer contributions are made to the System, therefore no additional years of credited service are accrued on the member's behalf. The member's monthly pension is calculated based upon the years of credited service and average monthly compensation at the beginning of the DROP period. This monthly pension amount is credited to a DROP participation account with interest at the rate of 8.5% annually, but credited monthly to the account. The interest rate credited to the DROP account is 8.25% for the fiscal year beginning July 1, 2010 and 8.0% for the fiscal year beginning July 1, 2011.

At the end of the DROP period or prior to that time if the member terminates employment, the monies in the DROP participation account will be either paid to the member in a lump-sum amount or paid in a lump-sum distribution to an eligible retirement plan or individual retirement account. The member will then begin receiving the monthly pension amount directly from the System in the same amount as was being credited to the DROP participation account.

Reverse DROP: Expired effective July 1, 2010.

Member Contributions: Members contribute 7.65% of compensation.

Employer Contributions: Percent of payroll normal cost plus 30 year (25 years remaining as of June 30, 2011) amortization of unfunded actuarial accrued liability (20 year amortization for credit). The statutory minimum is 8% of payroll (5% of payroll if the actual employer contribution rate is less than 5% for the 2006/2007 fiscal year).

Changes in Plan Provisions for Existing Members and New Hires

Existing Members

- Member contribution rates are shown in the schedule below. Additional member contributions DO NOT reduce the employer contribution, this means there is a "maintenance of effort" provision
 - 1. FY 2010-2011 7.65%
 - 2. FY 2011-2012 8.65%
 - 3. FY 2012-2013 9.55%
 - 4. FY 2013-2014 10.35%
 - 5. FY 2014-2015 11.05%
 - 6. FY 2015-2016 and after: 11.65% or a 33.3%/66.7% split between the employee and the employer, whichever is lower; minimum employee contribution rate is 7.65%.
- Employer will contribute to System when members retire and return to work.
- DROP
 - 1. Members who have at least 20 years of service on or after January 1, 2012 no change in the DROP
 - 2. Members with less than 20 years of service on or after January 1, 2012
 - 1. Can still elect DROP
 - 2. Interest credited on DROP account is the average return on the actuarial value of assets, with a minimum of 2% and a maximum equal to the actuarial assumed earnings rate
 - 3. Members in the DROP contributed to the Retirement System; contributions are not refundable

New Hires on or after January 1, 2012

- High 5 FAC
- Normal retirement at age 52.5 and 25 years of service

- 25 years of service: Receive a monthly amount that equals 62.5% of member's average monthly compensation; less than 25 years of service benefit is reduced 4% for each credited year under 25 yrs; more than 25 years increase monthly base benefit by 2.5% of the average monthly compensation multiplied by number of years over 25; maximum benefit of 80% of the average monthly compensation
- If ceases to hold office for any reason other than death or retirement, member can withdraw their accumulated contributions less any benefit payments already received or any amount the member owes the plan (no employer match of refund contributions) with interest at rate set by Board
- Member contribution rates are shown in the schedule below. Additional member contributions DO NOT reduce the employer contribution, this means there is a "maintenance of effort" provision
 - 1. FY 2011-2012 8.65%
 - 2. FY 2012-2013 9.55%
 - 3. FY 2013-2014 10.35%
 - 4. FY 2014-2015 11.05%
 - 5. FY 2015-2016 and after: 11.65% or a 33.3%/66.7% split between the employee and the employer, whichever is lower; minimum employee contribution rate is 7.65%
- Employer will contribute to System when members retire and return to work
- No DROP

Existing Members and New Hires

- COLA provision effective July 1, 2013
 - Effective May 31, 2011 no more excess investment earnings will be transferred to the current COLA reserve. Any remaining COLA reserve will be used to pay future COLA increases until the COLA reserve is depleted
 - o A COLA is only paid in a year when the return on the market value of assets exceeds 10.5% and the plan is at least 60% funded. 100% of the excess earnings is used to determine whether a COLA can be paid and the size of the COLA for that year.
 - O No COLA reserve accumulates. The present value of that year's COLA for eligible retirees cannot exceed 100% of the earnings in excess of 10.5%. If the excess earnings is high enough to exceed the present value of that year's COLA, the excess stays in the fund.
 - o To be eligible for an increase the retiree or the survivor must be:
 - In the case of a retired member who became a member of the plan before January 1, 2012, the retired member or survivor was receiving benefits on or before July 31 of the two previous years or
 - In the case of a retired member who became a member of the plan before January 1, 2012, the retired member or survivor was 55 or older on July 1 of the current year and was receiving benefits on or before July 31 of the previous year
 - In the case of a retired member who became a member of the plan on or after January 1, 2012, the retired member or survivor was at least 55 or older on July 1 and receiving benefits

- In the case of a retired member who became a member of the plan on or after January 1, 2012, if under 55 on July 1, was receiving accidental disability benefits for the preceding 2 years
- In the case of a member who became a member of the plan on or after January 1, 2012, if the survivor is under 55 on July 1, is the survivor of the member who was killed in the line of duty, and has been receiving a survivor benefits for the preceding 2 years
- o The amount of the COLA to be paid is determined as follows:
 - Funded ratio is 60-64%, COLA is 2%
 - Funded ratio is 65-69%, COLA is 2.5%
 - Funded ratio is 70-74%, COLA is 3%
 - Funded ratio is 75-79%, COLA is 3.5%
 - Funded ratio is 80% or more, COLA is 4%

SECTION G

GLOSSARY

Actuarial Accrued Liability

The difference between (i) the actuarial present value of future plan benefits, and (ii) the actuarial present value of future normal cost. Sometimes referred to as "accrued liability" or "past service liability."

Accrued Service

The service credited under the plan which was rendered before the date of the actuarial valuation.

Actuarial Assumptions

Estimates of future plan experience with respect to rates of mortality, disability, turnover, retirement, rate or rates of investment income and salary increases. Decrement assumptions (rates of mortality, disability, turnover and retirement) are generally based on past experience, often modified for projected changes in conditions. Economic assumptions (salary increases and investment income) consist of an underlying rate in an inflation-free environment plus a provision for a long-term average rate of inflation.

Actuarial Cost Method

A mathematical budgeting procedure for allocating the dollar amount of the "actuarial present value of future plan benefits" between the actuarial present value of future normal cost and the actuarial accrued liability. Sometimes referred to as the "actuarial funding method."

Actuarial Equivalent

A single amount or series of amounts of equal value to another single amount or series of amounts, computed on the basis of the rate(s) of interest and mortality tables used by the plan.

Actuarial Present Value

The amount of funds presently required to provide a payment or series of payments in the future. It is determined by discounting the future payments at a predetermined rate of interest, taking into account the probability of payment.

Amortization

Paying off an interest-bearing liability by means of periodic payments of interest and principal, as opposed to paying it off with a lump sum payment.

Experience Gain (Loss)

A measure of the difference between actual experience and that expected based upon a set of actuarial assumptions during the period between two actuarial valuation dates, in accordance with the actuarial cost method being used.

Normal Cost

The annual cost assigned, under the actuarial funding method, to current and subsequent plan years. Sometimes referred to as "current service cost." Any payment toward the unfunded actuarial accrued liability is not part of the normal cost.

GRS G-1

Reserve Account An account used to indicate that funds have been set aside for a

specific purpose and is not generally available for other uses.

Unfunded Actuarial Accrued Liability

The difference between the actuarial accrued liability and valuation

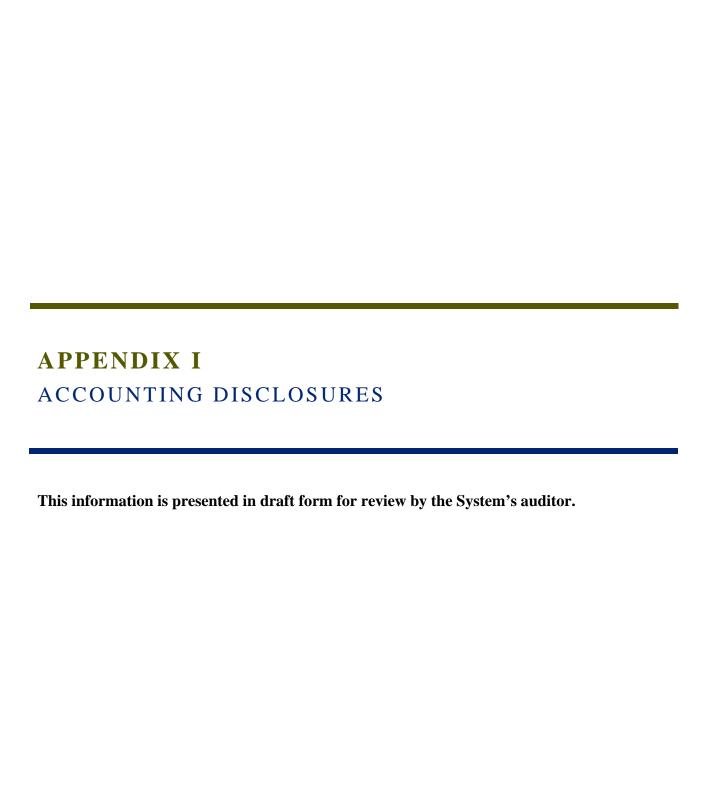

assets. Sometimes referred to as "unfunded accrued liability."

Valuation Assets The value of current plan assets recognized for valuation purposes.

Generally based on market value plus a portion of unrealized

appreciation or depreciation.

GRS G-2

2003	50,800,669
2004	79,000,130
2005	104,497,150
2006	127,218,686
2007	177,587,507
2008	233,556,049
2009	328,436,309
2010	300,707,126
2011	308,826,519 (est.)
2012	331,409,431 (est.)
2013	375,527,931 (est.)

Fiscal Years prior to 2011 provided by the prior actuary.

Beginning with the 2011 fiscal year, this schedule shows the estimated annual required contribution (calculated based on recommended contribution rate and the projected payroll for the fiscal year). Actual amounts reported in the employer's financial statements may be different, due to differences between the projected payroll and the actual payroll during the fiscal year.

GASB STATEMENT NO. 25 SUPPLEMENTARY INFORMATION

SUMMARY OF ACTUARIAL METHODS AND ASSUMPTIONS

The information presented in the required supplementary schedules was determined as part of the actuarial valuations at the dates indicated. Additional information as of the latest actuarial valuation follows:

Valuation date June 30, 2011

Actuarial cost method Entry Age Normal

Amortization method Level percent-of-pay closed

Remaining amortization period 25 years

Asset valuation method 7-year smoothed market

Actuarial assumptions:

Investment rate of return 8.25%

Projected salary increases 5.0% - 8.0%

Payroll Growth 5.0%

Cost-of-living adjustments None.

GASB STATEMENT NO. 45 SUPPLEMENTARY INFORMATION

The following information is presented concerning the post-retirement health insurance subsidy. The liabilities and computed contribution for the post-retirement health insurance subsidy were based on the same assumptions and actuarial cost methods as indicated for GASB Statement No. 25.

Please note the liabilities in the schedules below were calculated based on the 8.5% interest rate assumption. Beginning with the June 30, 2011 valuation an 8.25% interest rate assumption was used. It is our understanding that currently assets are not segregated to fund these liabilities. As a result, according to GASB Statement No. 45, these benefits may not be considered to be prefunded. In that case the 8.25% interest rate assumption may not be appropriate. This issue should be discussed with the auditors and with legal counsel.

SCHEDULE OF FUNDING PROGRESS

Valuation Date June 30	Actuarial Value of Assets (a)	Actuarial Accrued Liability (AAL) (b)	Unfunded AAL (UAAL) (b-a)	Funded Ratio (a/b)	Annual Covered Payroll (c)	UAAL as a % of Covered Payroll ((b-a)/c)
