# PUBLIC SAFETY PERSONNEL RETIREMENT SYSTEM 

## COMPREHENSIVE ANNUAL FINANCIAL REPORT

A PENSION TRUST FUND OF THE STATE OF ARTZONA

## Our Vision, Mission \& Values

## Vision

Invest, secure and manage responsibly the retirement funds of its members in accordance with all legal, investment and financial requirements and in a manner consistent with the quality to which its members have become accustomed.

## Mission

- To be a low cost, highly personalized quality service provider of funds management and benefit services.
- To manage long-term investments with the goal of consistently outperforming over time the composite weighted market return benchmark net of all investment-related costs so as to assure the financial integrity of the funds and the security of the benefits these funds provide.

## Values

- Do what's best for our members and financial health and integrity of the System.
- Proactive
- Committed to high quality, uniform, sustainable service.
- Innovative and cost effective in Plan administration and services.
- Use best practices in Human Resource management.

December 14, 2006

The Honorable Janet Napolitano<br>Governor of the State of Arizona<br>State Capitol<br>Phoenix, Arizona 85007

Dear Governor Napolitano:
The Fund Manager of the Public Safety Personnel Retirement System (PSPRS) respectfully submits the ThirtyEighth Comprehensive Annual Financial Report for the fiscal year ended June 30, 2006 (FY'06), in accordance with the provisions of A.R.S. Section 38-848.

As of June $30^{\text {t }}$, we can report that significant progress has been made in terms of our efforts to manage the funding challenges of the PSPRS Plan. But before summarizing the Plan's fiscal year-end funding situation and the consequences and prospects for the future, it is first necessary to provide some historical perspective and describe the developments that occurred during the fiscal year that contributed to the year-end results.

As you recall, during the 1990s, PSPRS annually generated investment returns well in excess of the System's actuarially assumed rate of $9 \%$. As a result, throughout the decade and through FY'03, the System was more than $100 \%$ funded. Consequently, the PSPRS employers' contribution rates were abnormally low. For example, based on the PSPRS FY'01 results, the computed aggregate FY'03 employer contribution was only $3.75 \%$ ( $4.46 \%$ when the statutory minimum rate per employer was factored in). However, the employer "normal cost" (i.e., the employer share of the cost, expressed as a level percent of payroll, of the addition to liability that resulted from the covered participant group's service credit accruing during FY'01) for that year was $11.21 \%$. The amortization of the excess assets that year had the effect of reducing the employer normal cost required contribution by $7.46 \%$ of payroll.

But as a result of the 2001 and 2002 financial market contractions and the gradual reduction in the PSPRS rate of return assumption to the current level of $8.5 \%$, the funding ratio/employer contribution requirement situation has reversed. The PSPRS Plan now has an unfunded liability and that liability (expressed as a level percent of pay roll and amortized over a period of years) must be added to employer normal cost. This makes the required employer contribution abnormally high. This situation is further exacerbated by the fact that the cost of the Plan is spread over less than $100 \%$ of participant payroll because compensation paid to participants in the Deferred Retirement Option Plan (DROP) is not subject to pension contributions.

In addition, for the next several years, the PSPRS Plan's financial condition will most likely deteriorate further and, as it does, employer contribution rates will continue to rise. In large part, this is because the effects of the

## Fund Manager Report

2001-2002 financial market contractions are not yet fully reflected in the System's actuarial value of assets, since those values are determined annually based on a rolling seven-year average.

Last year at this time, the members of the PSPRS Fund Manager, the System's governing board, were told that the FY'07 aggregate PSPRS employer contribution rate was going to increase to $17.1 \%$-- up from $12.8 \%$ the year before. In recognition that very large year-over-year employer contribution rate increases were having severe budgetary impacts and crowding out other personnel-related spending priorities, the Board determined that prudence required a review of certain actuarial factors that seemed to be aggravating the contribution rate escalation problem.

Having developed a consensus among the PSPRS constituency groups and the contributing employers as to a needed set of actuarial changes that would improve the Plan's funding condition and thus reduce the required aggregate employer contribution rate, the System developed a legislative proposal (SB 1357) to authorize those changes. Once SB 1357 was signed into law (Laws 2006, Chapter 251), the PSPRS Board acted promptly to extend the time period for paying off unfunded liabilities to the thirty-year maximum permitted by the new law. All PSPRS contributing employers that had an unfunded liability as of June 30, 2005 were affected by the Board's action.

That action was coupled with other actuarial changes already approved by the PSPRS goverming Board. Those other changes were: 1) a reduction in the Plan's actuarial salary growth assumption from an annual $6 \%$ to $5.5 \%$ to more accurately reflect actual covered group experience; and 2) a change from the Entry Age Normal actuarial methodology to the Projected Unit Credit methodology to make the actuarial method of choice consistent among all four Arizona state retirement plans. These combined changes improved the Plan's funding ratio from $82.1 \%$ to $83.2 \%$ and reduced the FY'07 aggregate employer contribution rate from the scheduled $17.1 \%$ to $13.8 \%$-- only a $1 \%$ increase over the preceding year.

Unfortunately, the actuarial changes approved by the PSPRS Board provide only short-term relief from the pattern of Plan funding ratio erosion and escalating employer contribution rates. If the Plan had been able to generate a rate of return on invested assets that was significantly better than the $8.5 \%$ actuarial assumed rate of return in FY'06, then the rate of escalation in employer contributions in the future would have moderated. Unfortunately, that did not turn out to be the case (See the discussion below and the report from the System's Chief Investment Officer on page 44). The actual rate of return was $8.30 \%$.

It should come as no surprise, therefore, that, as of June 30, 2006, the PSPRS Plan's funding ratio has declined to 77.0 \% and the aggregate employer contribution rate scheduled to take effect on July 1, 2007 will be $16.53 \%$. However, this aggregate rate is still less than the $17.1 \%$ that was originally scheduled to take effect on July 1, 2006.

We have directed the System's Administrator to consult with representatives of the PSPRS constituency groups to determine whether or not a new legislative initiative seems warranted and, if so, what such an initiative should contain. The PSPRS Administrator will keep the Governor's Office fully informed as to the outcome of those consultations.

## FY'06 Investment Results

As indicated above, the PSPRS Plan's FY'06 return was $8.30 \%$. While this investment return compares favorably with the $3.57 \%$ benchmark (i.e., $45 \%$ S\&P 500 index; $45 \%$ Lehman Government/Credit index; $10 \% 91$ Day T -Bill) return at the total fund level, it is still less than the $8.5 \%$ actuarially assumed rate of return. Does this pose a problem and could the Plan have done better?

## Fund Manager Report

According to the System's actuary, this slight under-performance of the actuarial rate of return assumption does not pose a problem, since the assumption is long-term and there will be years when the Plan out-performs and under-performs the actuarial assumption. The issue is whether the assumption is reasonable when compared with actual rate-of-return experience over a period of years. The System's actuary will be conducting an experience study this fiscal year and will make recommendations for any changes in assumptions that appear warranted because of significant variance with Plan and covered group experience.

More troubling, however, is the realization that the PSPRS Plan's $8.3 \%$ return was less than the better-than- $9 \%$ return needed to allocate new assets to the Plan's Reserve for Future Benefit Increases - the Reserve that funds the annual post-retirement benefit increases for eligible retirees and survivors. While the Plan's Reserve still has assets sufficient to continue funding annual adjustments for the next few years, even in the absence of inflows of new assets, the failure to generate a better-than-9\% return is a cause for some concern that the Fund Manager will undertake to address.

The PSPRS Plan could have generated a much higher rate of return this past fiscal year if the Plan had had the means to get significant exposure to the higher return financial markets. As it turned out, the best places to be in terms of investment return for the twelve months ending June 30, 2006 were emerging market stocks ( $35.9 \%$ market return), international stocks ( $28.4 \%$ market return), small and mid-capitalization U.S. stocks ( $13.9 \%$ and $13.2 \%$ market returns), Real Estate Investment Trust (REIT) stocks ( $19.7 \%$ market return) and real estate generally ( $18.7 \%$ market return).

However, because of current PSPRS investment constraints that include the relatively small number of investment professional staff and the historical preference for low cost internal asset management, the PSPRS Plan was largely under-exposed or not exposed at all to most of these relatively better-performing financial markets during the past fiscal year. Instead, nearly $57 \%$ of the Plan's assets were invested in large capitalization U.S. stocks ( $8.6 \%$ market return); $20 \%$ of the assets were in U.S. fixed income securities ( $-1.5 \%$ market return) and nearly $5 \%$ were in cash equivalents ( $4.0 \%$ market return).

In recognition that the Plan must be positioned to take advantage of higher returning financial markets in order to avoid missed opportunities, this year the System included in its administrative and technical corrections legislation (SB 1359) certain provisions that will give the PSPRS Fund Manager additional investment authority. SB 1359, which went into effect on September 21, gives the PSPRS Board the authority to use new investment vehicles (i.e., Exchange Traded Funds, [ETFs]) that will enable further diversification of invested assets and reduction in risk and provide the potential for enhanced returns.

In addition, the System's Investment Department's staff is being augmented in order to increase "due diligence" and internal portfolio management capability and thereby increase the Plan's exposure to real estate, private equity and other asset classes or sub-classes where the Plan is currently lacking.

In conjunction with this, the System has undertaken a search process for an independent investment consultant to advise the PSPRS Board as to the most appropriate mix of asset classes (given the Board's risk and return objectives) along with realistic and achievable invested asset target percentages.

## System Governance, Administrative and Internal Operations Changes

With respect to governance, administrative and internal operations changes, the following should be noted First, the PSPRS Fund Manager implemented new sub-committees to stream-line the review and decisionmaking process for the Board.

Second, the Board completed the development of a comprehensive set of govemance policies and procedures.
Third, the Board completed the search, interview and hiring process for a new permanent System Administrator.

Fourth, the PSPRS' internal administrative structure was reorganized to improve efficiency and communications, eliminate internal control problems, decentralize decision-making, empower department managers and increase their accountability to the Administrator. This reorganization resulted in the creation of an Executive Team that is responsible for the organization's day-to-day asset management and administrative operations.

Fifth, the organization successfully completed its first strategic planning and administrative and capital expenditure budget-building process.

Sixth, in terms of information technology (IT), PSPRS has implemented a data base conversion project to enhance response time, further improve efficiency, build in additional capabilities and establish an improved base for internal control improvements.

Seventh, during this new fiscal year, PSPRS will improve and/or develop web sites that will provide more and improved data exchange capabilities, services and information, (including a web accessible member handbook), for the PSPRS active and retired members and the Local Board network that makes determinations as to Plan eligibility, benefit entitlement and benefit amounts.

Finally, the System is: 1) undertaking phase one of a business continuity/disaster recovery project; 2) experimenting with electronic means for conducting training/education sessions for members of PSPRS Local Boards; 3 ) completing document imaging so that all member/beneficiary files will be readily accessible electronically; and 4) renovating the existing office space and occupying some additional space (within the existing building which the System owns) to accommodate the increased staff complement.

We appreciate having the opportunity to serve the State of Arizona, its political subdivisions and its PSPRS participants and beneficiaries and we look forward to continuing to serve as members of the Fund Manager for this System.

Respectfully submitted,

## Letter of Transmittal

The Fund Manager<br>Public Safety Personnel Retirement System<br>State of Arizona<br>Phoenix, Arizona

## Gentlemen:

There is presented, herewith, the Thirty-Eighth Comprehensive Annual Financial Report of the operations and financial conditions of the Public Safety Personnel Retirement System (PSPRS or the System), State of Arizona, for the fiscal year ended June 30, 2006. The System was created on July 1, 1968 to provide a uniform statewide retirement system for public safety persomnel. The System has experienced great change during the past thirty-eight years, providing a normal twenty year retirement and offering disability benefits, survivor benefits for spouses and children, post-retirement increases and health insurance subsidies.

Arizona Revised Statutes Title 38 requires the Fund Manager to transmit to the Governor and the Legislature this annual report within six months of the close of each fiscal year. Incorporated in this report are the audited financial statements, management's discussion and analysis, and other financial data from the June 30, 2006 report of Barrows \& Schatza, P.L.C., Certified Public Accountants and auditors for the System. Also included are the actuarial certification statement and the actuarial balance sheet from the June 30, 2006 actuarial valuation prepared by the System's actuary, Rodwan Consulting Company.

This report has been organized into five sections as follows:

- Introductory Section - containing general information regarding the operations of the PSPRS;
- Financial Section - presenting the independent auditor's report on the System's basic financial statements, management's discussion and analysis, and schedules of the funds administered by the PSPRS;
- Investment Section - reporting detailed lists of the investment transactions and portfolios of the System, along with investment performance including a report from the System's Chief Investment Officer;
- Actuarial Section - containing actuarial information regarding the funding of the System; and
- Statistical Section - containing statistical data pertaining to the benefits paid by the PSPRS and growth of the System.

## FINANCIAL INFORMATION

The primary responsibility for the integrity and objectivity of the financial statements and related financial data rests with the management of the System. The financial statements were prepared in conformity with generally accepted accounting principles appropriate for government-sponsored defined benefit pension plans. Management believes that all other financial information included in this annual report is consistent with those financial statements.

## Letter of Transmittal

#### Abstract

It is the System's policy to maintain a control-conscious environment through an effective system of accounting controls. These controls are adequate to provide reasonable assurance that assets are safeguarded against loss or unauthorized use and to produce the records necessary for the preparation of financial information. There are limits inherent in all systems of internal control based on the recognition that the costs of such systems should be related to the benefits to be derived. Management believes the System's controls provide this appropriate balance.

The System uses the accrual basis of accounting for both revenues and expenses. Contributions to the System are based on principles of level-cost financing with current service financed as a level percent of payroll on a current basis and prior service amorized as a level percent of payroll over a period of at least twenty but not more than thirty years.

## REVENUES

Revenues to the System are derived from three sources: member contributions, employer contributions and investment income. As shown by the Schedule of Revenues by Source included in the Statistical Section later in this report, the System had a positive investment return this fiscal year that was further enhanced by member contributions, direct employer contributions, and insurance premium taxes. Please refer to the Statistical Section for a ten-year history of revenues and expenses.

## ADMINISTRATIVE AND INVESTMENT EXPENSES

14 The 2005/2006 administrative and investment expenses of the administrative office totaled $\$ 3,793,593$ compared to $\$ 2,292,065$ for the prior year. Our administrative and investment expenses are approximately 8 basis points of the total assets managed. This is very low compared with other retirement systems. A dedicated staff and constantly improving internal expertise has allowed management to keep costs low even though assets managed have increased substantially over the years and service needs have escalated due to increasing numbers of participants and beneficiaries.

## INVESTMENTS

The System invests primarily in bonds rated A or better and blue chip common stock and had a total rate of return for the fiscal year of $8.30 \%$. The Investment Section of this Report contains the report of the Chief Investment Officer along with graphs depicting the funds performance, a detailed summary of the investment portfolio, all investment transactions, and commissions paid to investment professionals who provide services to PSPRS. All investments are held in trust at Wells Fargo, one of the largest banks in the world.

## SYSTEM FINANCIAL OUTLOOK

PSPRS is in an investment environment far different from that of the late 1990s. In order to maintain a prudent funding level, the Fund Manager reduced the assumed earnings rate from $8.75 \%$ to a more realistic and more sustainable rate of $8.50 \%$, effective July 1, 2005. In addition, a number of meetings were held with constituent group representatives during the first half of the fiscal year. As a result of those meetings, the following actions were recommended:

- Reduce the Actuarial Salary Growth Assumption to reflect the actual salary growth experience of the covered group;
- Change the Actuarial Methodology to "Projected Unit Credit;"
- Increase the Length of the Period for Amortizing Unfunded Actuarial Accrued Liability (UAAL) for those contributing employers that had unfunded liabilities as of June 30, 2005;
- Clarify that the interest rate to be credited to participant DROP Accounts would vary, depending on the assumed earnings rate as set by the PSPRS Fund Manager from time-to-time;
- Increase the Minimum Employer Contribution rate from 5\% to 8\% for those employers with current contribution rates in excess of the new minimum; and
atile

## Letter of Transmittal

- Create a Contingent "Rainy Day" Reserve for each employer group within the PSPRS to hold a portion of any excess assets that any contributing employer's account may acquire in the future.

All the recommended actions were implemented prior to fiscal year-end. The PSPRS actuary recalculated each employer's June 30,2005 valuation and each employer's July 1, 2006 required contribution rate. In the aggregate, the PSPRS employers' contribution rate declined from $17.1 \%$ to $13.8 \%$-making the aggregate rate just $1 \%$ higher than the aggregate $12.8 \%$ rate in effect for the employers during FY'06.

## ENACTED LEGISLATION

Some of the aforementioned recommended actions required legislative approval before they could be implemented. The following is a summary of the enacted legislation that authorized those actions or otherwise affected the operations and benefits of the PSPRS Plan:
a. HB 2113 Retirement Plans; Continuation - Continues PSPRS as the administrative entity for the PSPRS Plan for ten years through December 31, 2016.
b. SB 1357 PSPRS Employer Contribution Rate Stabilization Act - Authorized the PSPRS Fund Manager to set the actuarial unfunded liability amortization period for each contributing employer within a range of twenty to thirty years taking into account the recommendation of the actuary. It also raised the employer contribution minimum rate from $5 \%$ to $8 \%$ and established a stabilization reserve for each contributing employer's account to hold a portion of any excess assets that may be accumulated in the future.
c. SB 1359 Public Retirement Plans; Administrative Amendments - Amended a number of existing statutes to include, among other things, a definition of salary, catastrophic disability, killed in the line of duty, same position transfers, "cherry-picking" and disabilities and authorization for the System's Fund Manager to utilize Exchange Traded Funds (ETFs).

## ACTUARIAL AND FUNDING INFORMATION

Funding a retirement system on a sound actuarial reserve basis involves the accumulation of substantial reserves to guarantec the payment of promised bencfits. These reserves are invested and the rate of investment earnings, over time, is a major factor in determining the employer contribution requirement to meet the calculated level cost of the System.

There is no single all-encompassing test to measure a retirement system's funding progress and current status. A traditional measure is the ratio of assets to actuarial accrued liability, often referred to as the "percent funded." The percent funded for the PSPRS Plan at June 30, 2006, was $77.0 \%$.

The System is finded through a member contribution of $7.65 \%$ of gross payroll, an employer contribution set by an actuarial valuation expressed as a percent of gross payroll and a distribution of the net earnings of the System. While each employer has a different contribution rate, the aggregate rate for the contributing employers as a group for the 2006/2007 fiscal year is $13.83 \%$ of gross payroll. The firefighter groups and the Department of Public Safety receive a percentage of the Insurance premium tax, which underwrites a large portion of their employer contributions.

## POST RETIREMENT BENEFIT INCREASES

State law provides for an annual benefit increase for retirees or their survivors two years after retirement, regardless of age, or when the retiree or survivor attains age 55 and has been retired for a year. These increases are dependent upon the production of excess earnings on a portion of the System's assets and are limited to four

# Letter of Transmittal 

percent of the average benefit being paid. A benefit increase schedule can be found in the Statistical Section.

## CERTIFICATE OF ACHIEVEMENT

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the System for the PSPRS Plan's comprehensive annual financial report (CAFR) for the fiscal year ended June 30, 2005. This was the fifteenth consecutive year that the System has achieved this prestigious award. In order to be awarded a Certificate of Achievement, a government unit must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe our current comprehensive annual financial report continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for a certificate.

## STRATEGIC INITIATIVES

During this past fiscal year, the System underwent a thorough analysis of where it currently stands in terms of the level of service and resources available to meet the growing needs of its stakeholders. From that analysis, a number of strategic initiatives were implemented to move the System in the direction of greater customer service, and sound administrative and investment policies and practices. Those initiatives fall into the following four categories:

- Financial Performance: Initiatives in this category may enable the Plan to outperform consistently its investment benchmarks; use strategically chosen investment strategies; and use appropriate external advisors.
- Customer Service: Initiatives in this category address education, training and communication to stakeholders and consistent, accurate and timely service.
- Product, Process and Service Improvement: Initiatives in this category address cost-effective efficiency in our internal and external administrative processes through the use of technology while ensuring data quality, data security, high productivity and employee satisfaction.
- Learning and Growth: Initiatives in this category address the need to attract and retain highly qualified employees who are committed to continuously increasing their ability and desire to produce required results; developing and sustaining effective leadership, and fostering a capable and motivated workforce.

## SUMMARY

This report is a product of the collective efforts of PSPRS' staff, under the direction of the PSPRS Fund Manager. It is intended to provide complete and reliable information that will facilitate the management decision process and serves as a means for determining compliance with our governance and investment policies and legal requirements. Copies of this report are provided to the Governor, State Auditor, Legislature and all our member constituency groups. We hope all recipients of this report find it informative and useful.

I would like to take this opportunity to express my gratitude to the members of the Fund Manager, the staff, the System's advisors, and all others who have worked so diligently to assure the continued successful operation of the System. I am grateful to be a part of the System's leadership and I look forward to the System's continued success in the future.

## Respectfully submitted,

Administrator

# Independent Auditor's Report 

INDEPENDENT AUDITOR'S REPORT

FUND MANAGER<br>STATE OF ARIZONA PUBLIC SAFETY<br>PERSONNEL RETIREMENT SYSTEM<br>PHOENIX, ARIZONA

We have audited the accompanying statements of system net assets of the STATE OF ARIZONA PUBLIC SAFETY PERSONNEL RETIREMENT SYSTEM as of June 30, 2006 and 2005, and the related statements of changes in system net assets for the years then ended, appearing on pages 26 and 27 , respectively. These financial statements are the responsibility of the System's managements. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial status of STATE OF ARIZONA PUBLIC SAFETY PERSONNEL RETIREMENT SYSTEM as of June 30, 2006 and 2005, and the results of its operations and changes in system net assets for the years then ended in conformity with generally accepted accounting principles.

Our audit was made for the purpose of forming an opinion on the financial statements taken as a whole. The accompanying supplementary information, Management's Discussion and Analysis, Schedule of Funding Progress and Schedule of Employer Contributions are required by the Govermmental Accounting Standards Board and are not a required part of the basic financial statements. Also, the accompanying additional information, contained on pages 39 and 40, are not required disclosures under Governmental Accounting Standards Board (GASB) statement No. 25 and are not a required part of the basic financial statements. The additional information schedules have been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, are fairly presented in all material respects in relation to the basic financial statements taken as a whole.

## Management Discussion and Analysis

The Public Safety Personnel Retirement System's management prepared this discussion and analysis to assist the reader in focusing on significant financial issues, and to provide an overview of the System's financial activity, identify changes in the System's financial position and identify any issues or concerns.

Since the Management's Discussion and Analysis (MD\&A) is designed to focus on the current year's activities, resulting changes and currently known facts, it is intended to be read in conjunction with the Transmittal Letter, Financial Statements and Notes to the Financial Statements.

## Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the PSPRS financial reporting which is comprised of the following components: 1) basic financial statements. 2) notes to the financial statements, 3) required supplementary information and 4) other supplementary schedules.

## 1. Basic Financial Statement.

The Statement of Net Assets is presented as of June 30, 2006 with total comparative information as of June 30. 2005. This statement reflects the resources available to pay benefits to members, including retirees and beneficiaries, at the end of the years reported. The Statement of Changes in Plan Net Assets comparatively reports the changes in revenues and expenses for the fiscal years ended June 30, 2006 and 2005.
2. Notes to the Financial Statement.

An integral part of the financial statements, the notes provide facts and additional information that are essential to a full understanding of the statements. Disclosures include significant accounting policies, plan description, plan benefits and detailed presentation of major assets.
3. Required Supplementary Information.

Presents schedules related to employer contributions and the funding of the plan.
4. Other Supplementary Schedules.

Consists of detailed information supporting administrative and investment expense.

## Financial Analysis of the System

As of 6/30/2006, net assets were $\$ 4.9$ billion. The average Increase in net assets and investments over the last 3 years has been 6.7\%. At fiscal year end the asset allocation was 70\% Equity, 12\% Bonds, 9\% US Government Securities, 5\% Cash and Cash Equivalents, 4\% Real Estate, Real Estate Debt and Venture Capital.

*Includes Security Lending Collateral

|  | Additions |  |  |
| :--- | ---: | ---: | ---: |
|  | 20006 | 2005 | 20,04 |
| Member Contributions | $75,616,322$ | $67,947,506$ | $63,978,505$ |
| Employer Contributions | $127,218,686$ | $104,497,150$ | $79,000,130$ |
| Service Purchase/ Transfers | $10,533,585$ | $9,156,465$ | $9,177,386$ |
| Investment Income, net | $379,512,078$ | $\mathbf{3 8 3 , 5 3 0 , 4 1 2}$ | $\mathbf{5 6 2 , 6 1 3 , 2 5 9}$ |
| Total Additions | $592,880,671$ | $565,131,533$ | $\mathbf{7 1 4 , 7 6 9 , 2 8 0}$ |

Employer contributions increased 22\% in 2006 and $\mathbf{3 2 \%}$ in 2005 compared to member contributions which increased $11 \%$ and $6 \%$, respectively. The employee contribution rate remained at the statutory rate of $\mathbf{7 . 6 5 \%}$ and the average employer rate increase was $\mathbf{2 . 6 9 \%}$ in 2006. Active membership at year end was 17,324 an increase of $6 \%$ over the prior year. Service purchases increased 15\% over last year. Net investment income has decreased over the past three years about $32 \%$. High investment income in 2004 was due to a strong stock and bond market. This years rate of return was $8.3 \%$ compared to $14.97 \%$ in 2004.

## Management's Discussion and Analysis

|  | Deductions |  |  |
| :---: | :---: | :---: | :---: |
|  | 2006 | 2005 | 2004 |
| Pension Benefits | 250,984,602 | 230,766,004 | 212,935,295 |
| Insurance Benefits | 10,203,920 | 11,417,919 | 10,774,433 |
| Refunds | 7,225,720 | 7,647,443 | 6,390,643 |
| Drop Benefits | 22,839,120 | 15,265,160 | 6,175,715 |
| Administrative Expense | 2,979,511 | 1,599,784 | 1,099,932 |
| Transfers out | 291,161 | 128,407 | 196,2:7 |
| Total Deduction | 294,524,034 | 266,824,717 | 237,572,305 |

Pension payment increases are averaging 8.6\% over the three year period. At year end retired members totaled 6,974. Retiree increases are averaging 4\%. The 10\% decrease in insurance was primarily due to a change in the eligibility criteria for Rural Subsidy. The deferred Retirement Option Plan (DROP) was implemented in 2001 with a maximum eligibility period of 5 years (See Notes to the Financial Statements, for more information on DROP). In June 2006, some members began to reach the end of the five year period, accordingly, benefits increased 50\% over last year. Administrative expenses increased from 3 basis points in 2004 to 6 basis points of assets under management in 2006. The increase was due to an increase in staffing in all departments. Total deductions increased 10\% in 2006 and 12\% in 2005.

|  | Change in Net Assets |  |  |

# Notes to the Financial Statements Note 1 Summary of Significant Accounting Policies 

## BASES OF ACCOUNTING

PSPRS financial statements are prepared using the accrual basis of accounting. Member and employer contributions are recognized when due, pursuant to formal commitments, as well as statutory or contractual requirements. Benefits are recognized when due and payable in accordance with the terms of the System. Refunds are due and payable by state law within 20 days of receipt of a written application for a refund. Refunds are recorded when paid. System reports assets on a Fair Value Basis. Certain cost information may be provided for reference only and to comply with state law. Furniture and equipment purchases less than $\$ 5,000$, are expensed in the year of purchase. Purchases more than $\$ 5,000$ are depreciated over the estimated useful life of each asset using the straight line method. Investment income net of administrative and investment expenses is allocated to each employer group based on the average relative fund size for each employer group for that year.

## NEW ACCOUNTING PRONOUNCEMENT

Governmental Accounting Standards Board (GASB) Statement 44 is effective for all reporting periods beginning after June 15, 2005. To assist the user in understanding the financial and economic condition of the entity, the statistical section will be separated into five categories; financial trends, revenue capacity, debt capacity, demographics, economic and operating information.

By state statute, this System is required to provide information in the financial statements used to calculate Net Effective Yield. Net Effective Yield includes only realized gains and losses. The Net Realized Gains (Losses) used in this calculation totaled \$143,087,585 for FYE 2006 and \$134,385,810 for FYE 2005.

## Note 2 <br> Plan Description

## ORGANIZATION

The Public Safety Personnel Retirement System (PSPRS), a pension trust fund of the State of Arizona, is an agent multiple-employer public employee retirement system established by Title 38, Chapter 5, Article 4 of the Arizona Revised Statutes, to provide benefits for public safety employees of certain state and local governments. The Fund Manager and 213 Local Boards jointly administer the System.

The Fund Manager is a five-member board. Effective August 6, 1999, it became the Governor's responsibility to appoint all members of the Fund Manager, who serve a fixed three-year term. In 2005, Senate Bill 1378 requires that appointees representing the state as an employer and the public, must have substantial investment experience.

The Fund Manager is responsible for the investment of the System's assets, setting employer contribution rates in accordance with an actuarial study, adopting a budget, hiring personnel to administer the System, setting up records, setting up accounts for each member and each Local Board, paying benefits and the general protection and administration of the System.

Each eligible group participating in the System has a five-member Local Board. The chief elected official of the organization appoints three members and two members are elected by the active members of the eligible group. In general, each member serves a fixed four-year term. Each Local Board is responsible for determining eligibility for membership, service credits, eligibility for benefits, timing of benefit payments, and the amount of benefits for its eligible group of employees. The various governing bodies pay all costs associated with the administration of the Local Boards.

## Notes to the Financial Statements

The addition or deletion of eligible groups does not require the approval of the other participating employers. The Fund Manager approves new eligible groups for participation. The PSPRS is not reported as a component unit of any other organization. The Local Boards are reported as component units of their respective sponsoring organization.

The Fund Manager of the PSPRS is also responsible for the investment and general administration of two other statewide retirement plans-the Corrections Officer Retirement Plan and the Elected Officials' Retirement Plan. The investments and expenses of these plans are held and accounted for separately from those of the PSPRS. Since none of the plans have the authority to impose their will on any of the other plans, each plan is reported as its own stand-alone governmental entity.

Any state or local government in the State of Arizona may elect to have its paid, full-time eligible employees (generally, fire fighters and police officers in full-time hazardous duty positions) covered by the PSPRS. As of June 30, 2006, PSPRS has 212 employers and 26,137 members of which 17,324 are active members, 1,746 are DROP members, 4,935 are retired members, 978 are beneficiaries, 1,061 are disability members.

PSPRS provides retirement benefits as well as death and disability benefits. A member of the System does not have vested rights to benefits under the System until he files an application for benefits and is found eligible for those benefits.

An eligible claimant's rights to benefits vest on the date of his application for those benefits or his last day of employment under the System, whichever occurs first. A summary of benefits and plan provisions follows:

## SUMMARY OF BENEFITS

Purpose (A.R.S. $\S 38-841$ ) To provide a uniform, consistent and equitable statewide program for public safety personnel who are regularly assigned hazardous duty in the employ of the State of Arizona, or a political subdivision of the State. Membership consists of those eligible employees who are employed by an employer who entered the system in 1968 or who has entered into an agreement to join the System on behalf of an eligible group.

Eligibility (A.R.S. §38-842.14) Full-time paid firefighters of a participating employer, whose customary employment is at least forty hours per week and who is or was regularly assigned to hazardous duty of the type normally expected of a firefighter and full-time paid certified peace officers of a participating employer, whose customary employment is at least forty hours per week and who is or was regularly assigned to hazardous duty of the type normally expected of a certified peace officer.

Contributions (A.R.S. §38-843) Each member shall contribute $7.65 \%$ of compensation to the system on a pre-tax basis by payroll deduction (A.R.S. §38-843.C). Each employer shall contribute a level percent of compensation as determined by actuarial valuation to ensure proper funding for the system but not less than $2 \%$ of compensation (A.R.S. §38-843.B).

Credited Service (A.R.S. §38-842.9) The member's total period of service before the member's effective date of participation, plus those compensated periods of the member's service thereafter for which the member made contributions to the fund.

Average Monthly Compensation (A.R.S. §38-842.4) One thirty-sixth of total compensation paid a member during the highest three consecutive years out of the last twenty years of credited service.

Compensation (A.R.S. §38-842.8) For purposes of computing retirement benefits, base salary, overtime pay, shift differential pay and holiday pay paid to an employee by the employer on a regular monthly, semimonthly or biweekly payroll basis and longevity pay paid to an employee at least every six months for which contributions are made to the System. Compensation does not include payments for unused sick leave, payment in lieu of vacation, payment for compensatory time or any other payment for fringe benefits.

## Notes to the Financial Statements

Normal Retirement Date (A.R.S. §38-842.21) First day of month immediately following completion of twenty years of service, or following sixty-second birthday and completion of fifteen years of service.
The amount of monthly normal pension is based on credited service and average monthly compensation as follows:

For retirement with twenty years of credited service but less than twenty-five years of credited_ service, $50 \%$ of average monthly compensation for the first twenty years of credited service, plus $2 \%$ of average monthly compensation for each year of credited service between twenty and twenty-five. (A.R.S. §38-845.A.2)

For retirement with twenty years of service, but less than twenty years of credited service, the pension is reduced by a rate of $4 \%$ per year for each year of credited service under twenty years. (A.R.S. §38-845.A.1)

For retirement with twenty-five or more years of credited service, $50 \%$ of average monthly compensation for the first twenty years of credited service, plus $2-1 / 2 \%$ of average monthly compensation for each year of credited service above twenty years, up to a maximum of $80 \%$ of average monthly compensation. (A.R.S. §38-845.A.2)

Deferred Retirement Option Plan (DROP) (A.R.S. §38-844.02 through 38-844.09) A member with 20 or more years of credited service under the System may enter into a DROP program with his employer. Under the DROP program, the member must voluntarily and irrevocably elect to enter into the program with his employer for a period of up to 60 months. During the DROP period, the member remains in the employ of the employer as a full-time paid firefighter or full-time paid certified peace officer but no member or employer contributions are made to the System; therefore no additional years of credited service are accrued on the member's behalf. The member's monthly pension is calculated based upon the years of credited service and average monthly compensation at the beginning of the DROP period. This monthly pension amount and interest is credited to a DROP participation account monthly. The interest rate will depend on drop entry year and will be between 8.5 to $9 \%$. At the end of the DROP period or prior to that time if the member terminates employment, the monies in the DROP participation account will be either paid to the member in a lump-sum amount or paid in a lumpsum distribution to an eligible retirement plan or individual retirement account. The member will then begin receiving the monthly pension amount directly from the System in the same amount as was being credited to the DROP participation account.

Deferred Retirement (A.R.S. §38-846.01) A member with at least ten years of credited service, who terminates employment, may elect to leave their contributions in the System and receive a deferred retirement allowance, commencing at age sixty-two. Pension is a lifetime monthly annuity, based on twice the amount of the member's contributions. Under this option, there is no survivor benefit payable. The benefit is forfeited if the member elects a refund of contributions.

Accidental Disability Retirement (Service Connected) (A.R.S. §38-842.1, A.R.S. §38-845.B and A.R.S. §38-844. B) Total and permanent disability incurred in performance of duty, preventing performance of a reasonable range of duties within the employee's job classification. No credited service requirement. The pension is $50 \%$ of average monthly compensation or normal pension amount, whichever is greater.

Catastrophic Disability Retirement (Service Connected) (A.R.S. §38-842.5, A.R.S. §38-845.E, A.R.S. §38-844.C and A.R.S. §38-844.F) Physical condition incurred in performance of duty, which totally and permanently prevents engaging in any gainful employment. No credited service requirement. The pension is $90 \%$ of average monthly compensation for first 60 months, and then reduced to either $62.5 \%$ of average monthly compensation or normal pension amount, whichever is greater.

Ordinary Disability Retirement (Not Service Connected) (A.R.S. §38-842.22 and §38-845.C and §38-844.B) Physical condition: Total and permanent disability preventing performance of a reasonable range of duties

## Notes to the Financial Statements

within the employee's department, prior to normal retirement date. Mental condition: Total and permanent disability preventing any substantial gainful activity, prior to normal retirement date. Benefit is a percentage of normal retirement. The percentage is computed based on the employee's years of credited service divided by twenty.

Offset Of Ordinary Disability Pension (A.R.S. $\S 38-844 . H$ ) Before the member's normal retirement date, an ordinary disability pension will be reduced if the retiree engages in any employment and the income from this employment is greater than the retiree's pension. The reduction is equal to the difference between the retiree's income from employment and the retiree's pension.

Temporary Disability (Service Connected) (A.R.S. §38-844.J and §38-842.29) Total and presumably temporary disability, incurred in performance of duty, prior to normal retirement, preventing performance of a reasonable range of duties within the employee's department. No credited service requirement. Monthly pension is onetwelfth of $50 \%$ of annual compensation at time of disability. Payments terminate after twelve months or return to work. Member must terminate employment to receive this benefit.

Survivor Pension (A.R.S. §38-846) The survivors of members, who die in service, or after retirement, are eligible for benefits as follows: No credited service requirement.

Spouse's Pension - Four-fifths ( $80 \%$ ) of the pension the deceased active member would have been paid for accidental disability retirement, or in the case of retired member, four-fifths ( $80 \%$ ) of retired member's pension. Requires two years of marriage for a retired member's spouse. Terminates on death. For a member killed in the line of duty, the spouse's pension is $100 \%$ of deceased member's average monthly benefit compensation, less any amount payable for an eligible child. (A.R.S. $\S 38-846 . A$ and $\S 38-846 . B$ )

Child's Pension - One-tenth of pension deceased active member would have been paid for accidental disability retirement (equal shares of two-tenths if more than two children), or, in the case of a retired member, one-tenth of the retired member's pension (equal shares of two-tenths if more than two children). Eligible child must be unmarried, a dependent of the surviving spouse or guardian and either under the age of 18 or a full-time student under the age of 23 or under a disability which began before the age of 23. (A.R.S. $\S 38-842.13$ and 38-846.E)

Guardian's Pension - Same amount as spouse's pension. Payable only during periods no spouse is being paid and there is at least one eligible child. (A.R.S. $\S 38-846 . \mathrm{C}$ and $\S 38-846 . D$ )

Death Benefit (A.R.S. §38-846.F) If a member has accumulated contributions remaining in the System at the date of death of the last pension recipient the remaining accumulated contributions are payable to the beneficiary named by the member.

Termination Refund (A.R.S. §38-846.02) Upon termination of employment, for any reason other than death or retirement, a member shall, within twenty days after filing an application with the Fund Manager, receive a lump-sum payment, equal to his accumulated contributions, as of the date of termination, less any benefits paid or any amounts owed to the System. A member forfeits all membership rights and credited service in the System upon receipt of refund of contributions. If the member has 5 or more years of credited service upon termination, the member shall receive an additional amount according to the following schedule: 5 to $5.9-25 \%$ of member contributions, 6 to $6.9-40 \%, 7$ to $7.9-55 \%, 8$ to $8.9-70 \%, 9$ to $9.9-85 \%, 10$ or more- $100 \%$ of member contributions deducted from the member's salary pursuant to ARS 38-843.C plus interest at $3 \%$ if left on deposit after 30 days.

Transfer Of Contributions To Another Employer (A.R.S. §38-853) A member who terminates employment with an employer and accepts, within two years, a position with the same, or another employer participating in the System, shall have the credited service transferred to the member's record with the new employer, provided

## Notes to the Financial Statements

the member leaves the accumulated contributions on deposit with the Fund. The termination of employment shall not constitute a break in service; however, the period not employed shall not be considered as service.

Reemployment And Repayment Of Contributions (A.R.S. §38-849.C) Members who terminate and take a refund of their contributions may elect, only upon reemployment with the same employer, to recover their prior service. To recover this prior service, their re-employment must be within two years from date of termination and they sign a written election within ninety days after re-employment to reimburse the Fund within one year the amount of monies refunded plus interest at the rate of $9 \%$.

Reemployment After Retirement (A.R.S. §38-849.D) A retired member who is reemployed by an employer shall not make contributions nor accrue credited service during the period of reemployment. However, if the employer from which the member retired reemploys the retired member in the same position, the retired member's pension is suspended during the period of reemployment.

Transfer Into Or Out Of System (A.R.S. §38-855) A member who changes employment or transfers or is assigned to a non-eligible position because of a change in duties or otherwise may elect one of the following options:

1. Leave service credits and contributions on account with the PSPRS, except that after two years, the member must request a refund of his accumulated contributions or transfer his credited service to another state retirement plan or system.
2. Apply for refund of accumulated member contributions (forfeiting all service credits and membership rights).
3. Transfer all service credits to the Arizona retirement system or plan applicable to the new position pursuant to the requirements for transfer between Arizona state retirement systems.

A member who begins employment with a participating employer in this System and who has credited service from a different Arizona state retirement system may transfer or redeem his prior service to this System pursuant to the requirements for transfer between Arizona state retirement systems.

Redemption Of Prior Service (A.R.S. $\S 38-853.01 . A$ ) Active members who had previous service in this state in a covered position with an employer now participating in the system or had previous service as a full-time paid fire-fighter or full-time paid certified peace officer with an agency of the U.S. Government, a state of the U.S. or a political subdivision of a state of the U.S., may elect to redeem any part of the prior service by paying into the system the amounts required in A.R.S. $\S 38-853.01$. . ., if the prior service is not on account with any other retirement system.

Benefit Increases (A.R.S. §38-856) Effective July 1 of each year, retired members or survivors of retired members may be entitled to a permanent benefit increase in their base benefit. The maximum amount of the increase is four percent (4\%) of the average normal PSPRS benefit being received on the preceding June 30 and is contingent upon sufficient excess investment earnings for the fund. To be eligible for the increase the retiree or survivor must be age 55 or older on July 1 of the current year and must have been receiving benefits on or before July 31 of the previous year. Retirees or survivors are also eligible if they were receiving benefits on or before July 31 of the two previous years regardless of age.

Health Insurance Premium Subsidy (A.R.S. §38-857) For PSPRS retirees or survivors who have elected group health and accident insurance coverage provided and administered by the State of Arizona another PSPRS employer, the PSPRS will pay up to the following amounts:

Single coverage: $\$ 150.00$; Medicare eligible $\$ 100.00$
Family coverage: $\$ 260.00$; one Medicare eligible $\$ 215.00$; all Medicare eligible $\$ 170.00$

## Notes to the Financial Statements

#### Abstract

Effective July 1, 2005 through June 30, 2007, retirees or survivors who live in a non-service area and are eligible for Medicare receive up to the following amounts in addition to the subsidy listed above after they have paid an out-of-pocket expense as set forth below. A non-service area is defined as an area in the State of Arizona where the state retiree group insurance program or employer's retiree health insurance program does not provide or administer a health maintenance organization (HMO) for which the retireer or survivor is eligible. The subsidy consists of up to the following amounts:

> Single coverage Medicare eligible: $\$ 170.00$ after $\$ 100.00$ paid out-of-pocket.
> Family coverage Medicare eligible with one dependent Medicare eligible: $\$ 350.00$ after $\$ 200.00$ paid out-of-pocket.
> Family coverage member Medicare eligible: $\$ 470.00$ after $\$ 400.00$ paid out-of-pocket.

State Taxation Of PSPRS Benefits (A.R.S. §38-852 and §43-1022) Effective tax year commencing January 1, 1989, all PSPRS retirement benefits in excess of $\$ 2500$ annually will be subject to Arizona state tax.

Purchase Of Handgun Or Shotgun (A.R.S. §38-845) A PSPRS retiree has the ability to purchase the handgun or shotgun issued by the employer to the member at less than fair market value, subject to approval of the employer.

## Note 3 <br> Investments and Cash

Investments are reported at fair value. Marketable securities (stocks \& bonds), traded on public exchanges are priced by PSPRS's custodian Wells Fargo Bank N.A. using third party pricing- services. Equity securities are valued at the last reported sales price. Fixed-income securities are generally valued using the last reported sales price or thinly traded bonds are reported at fair market using estimates. Short term and alternative investments are generally reported at cost. Investment income is recognized as earned.

Cash deposits are subject to the general depository laws of the State of Arizona, which require cash to be either insured by the Federal Deposit Insurance Corporation or collateralized by certain securities including U.S. Government obligations and first mortgages.

Statutes enacted by the Arizona Legislature authorize the Fund Manager to make investments in accordance with the "Prudent Man" rule. The Fund Manager is not limited to the so-called "Legal Investments for Trustees."

In making every investment, the Fund Manager shall exercise the judgment and care under the circumstance then prevailing which men of ordinary prudence, discretion and intelligence exercise in the management of their own affairs, not in regard to speculation but in regard to the permanent disposition of their funds, considering the probable income from their funds as well as the probable safety of their capital, provided:

1) That not more than seventy percent of the pension fund is invested at any given time in corporate stocks, based on cost value of such stocks irrespective of capital appreciation.
2) That not more than five percent of the pension fund is invested in securities issued by any one institution, agency or corporation, other than securities issued as direct obligations of, and fully guaranteed by, the United States Government.
3) That not more than five percent of the voting stock of any one corporation shall be owned.

## Notes to the Financial Statements

4) That corporate stocks eligible for purchase shall be restricted to stocks that, except for bank stocks and insurance stocks, are either:
A) Listed or approved on issuance for listing on an exchange registered under the Securities Exchange Act of 1934, as amended ( 15 United States Code §78a through §7811);
(B) Designated or approved on notice of issuance for designation on the national market system of a national securities association registered under the Securities Exchange Act of 1934, as amended (15 United States Code §78a through §7811)
C) Listed or approved on issuance for listing on an exchange registered under the laws of this [Arizona] state or any other state; or
D) Listed or approved on issuance for listing on an exchange registered by a foreign country with which the United States is maintaining diplomatic relations at the time of purchase, except that no more than ten percent of the pension fund shall be invested in foreign equity securities based on the cost of the stock irrespective of capital appreciation. A.R.S. §38-848.D

The System's investment portfolio is in compliance with state law.

## 34 Custodial Credit Risk

Custodial Credit Risk is the risk that PSPRS will not be able (a) to recover deposits if the depository financial institution fails or (b) to recover value of investment or collateral securities that are in the possession of an outside party if the counterpart to the investment or deposit transaction fails. As of June 30, 2006, PSPRS had no fund or deposits that were not covered by depository insurance or collateralized with securities held by Wells Fargo Bank's trust department or agent. Nor does PSPRS have any investments that are not registered in the name of PSPRS and are either held by the counterpart or the counterparty's trust department or agent.

## Concentration of Credit Risk

Concentration of credit risk is the risk of loss that may be attributed to the magnitude of a government's investment in a single issue. Other than bonds used as direct obligations of, and fully guaranteed by, the U.S. Government, not more than $5 \%$ of the Fund or its fixed income portfolio at fair value shall be invested in bonds issued by any one institution, agency or corporation.

## Interest rate risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. This risk is managed within the portfolio using segmented time distributions. It is widely used in the management of fixed income portfolios in that it quantifies the risk of interest rate changes. The System does invest in fixed income securities with floating rates that contain coupon adjustment mechanisms in a rising interest rate environment. The previous and following tables quantify, the interest rate risk of the System's fixed income assets.

## Callable Bonds By Security Type

Each portfolio is managed in accordance with investment guidelines that are specific as to permissible credit quality ranges, exposure levels within individual quality tiers, and the average credit quality of the overall portfolios. According to those guidelines, the fixed income portfolio must have a minimum weighted average quality rating of $\mathrm{A} 3 / \mathrm{A}$. Fixed income securities must have a minimum quality rating of Baa3/BBB- at the time purchase. The portion of the bond portfolio in securities rated Baa3/BBB- through Baa1/BBB+ must be $20 \%$ or less of the fair value of the fixed income portfolio.

Included in the fixed income portfolio is cash equivalents or commercial paper. Commercial Paper must have a minimum quality rating of $\mathrm{A}-1 / \mathrm{P}-1$ at the time of purchase. Investments in derivatives are limited to collateralized mortgage obligations (CMO), collateralized bond obligations (CBO), collateralized debt obligations (CDO), and asset-backed securities (ABS).

## Securities Lending

The System is party to a securities lending agreement with a bank. The bank, on behalf of the System, enters into agreements with brokers to loan securities and have the same securities returned at a later date. The loans are fully collateralized primarily by cash. Collateral is marked-to-market on a daily basis. Non-cash collateral can be sold only upon borrower default. The System requires collateral of at least $102 \%$ of the fair value of the loaned U.S. Government or corporate security. Securities on loan are carried at fair value. As of June 30, 2006 the fair value of securities on loan was $\$ 891,374,588$ and the collateral was $\$ 912,038,799$.

| Asset Class | Out On Loan | TotalAvallable to Loan | \% of Avallable on Loan |
| :--- | ---: | ---: | ---: |
| Stocks | $\mathbf{4 8 6 , 5 7 5 , 2 4 0}$ | $3,436,622,445$ | $14.2 \%$ |

| Treasuries | $67,364,131$ | $67,364,131$ | $100.0 \%$ |
| Corporate Bonds | $23,537,958$ | $592,358,170$ | $4.0 \%$ |
| Total | $891,374,588$ | $4,478,148,129$ | $19.9 \%$ |

## Capital Assets

These assets are stated at cost, and depreciable assets are depreciated using the straight-line method over the estimated life of the asset.

## Note 4 Contributions Required and Contributions Made

The Retirement System's funding policy provides for periodic employer contributions at actuarially determined rates that, expressed as percentages of annual covered payroll, are designed to accumulate sufficient assets to pay benefits when due. The normal cost and actuarial accrued liability are determined using the projected unit credit actuarial funding method. Unfunded actuarial accrued liabilities and assets in excess of actuarial accrued liabilities are being amortized as a level percent of payroll over a rolling thirty (30) year period, unless the employer's account had an excess assets as of June 30, 2005. In that case the amortization period is twenty (20) years. Beginning July 1, 2006, the minimum employer contribution rate increased from $2 \%$ to $5 \%$ or to $8 \%$ in the case of employers whose contribution rate was in excess of $8 \%$ as of June 30, 2005.

## Notes to the Financial Statements

During the year ended June 30, 2006, contributions totaling \$202,835,008 (\$127,218,686 employer and $\$ 75,616,322$ member) were made in accordance with contribution requirements determined by an actuarial valuation of the System as of June 30, 2005. The employer contributions consisted of approximately $\$ 102,271,897$ for normal cost and $\$ 24,946,789$ for amortization of unfunded actuarial accrued liability in aggregate. Employer contributions represented $12.8 \%$ of covered payroll ( $10.29 \%$ for normal costs and $2.51 \%$ for amortization of unfunded actuarial accrued liability.) Member contributions represented $7.65 \%$ of covered payroll and are attributable to normal costs.

## Note 5 <br> Staff and OtherBenefits

In addition to the retirement benefits provided through the PSPRS, the System also administers a Fire Fighter Cancer Insurance Policy Program. Participating employers that employ fire fighters shall participate in the program. The program is a welfare benefit plan or trust intended to pay expenses incurred in the treatment of cancer as provided in the policy of insurance secured or established by the Fund Manager pursuant to A.R.S. $38-642$. The participating employers fund the program by paying annual premiums. The Fund Manager sets the premium, not to exceed $\$ 180$, for every active fire fighter on record. By statute, benefits are limited to the assets in the program and those benefits may be reduced or eliminated at any time.

PSPRS also adopted a supplemental defined contribution plan for all contributing members of an eligible group.
An eligible group is defined as the employees of the Fund Manager, PSPRS, the Elected Officials' Retirement Plan and the Corrections Officer Retirement Plan. The employees of any of these eligible groups must make an election to participate within two years after the employee first meets the eligibility requirements to participate in the Plan. The election to participate is irrevocable and continues for the remainder of the employee's employment with the employer. If an employee elects to participate, the employee must contribute at least $1 \%$ of the employee's gross compensation. Employers designate the amounts contributed by each employee. All amounts contributed are subject to the discretion and control of the Employer. Employee contributions and earnings to the plan are immediately vested. PSPRS administers the supplemental defined contribution plan through a third party administrator. All contributions are sent directly to the third administrator from the participating employer groups.

PSPRS staff are members of Arizona State Retirement System (ASRS). The ASRS is a cost sharing, multiple employer, defined benefit pension plan established by the State of Arizona (Title 38 Chapter 5 of the Arizona Revised Statutes.) Employees and the PSPRS paid a matching contribution of $6.9 \%$ of gross salary. Retirement benefits are calculated on the basis of age, average monthly compensation and service credit. Staff is eligible for full retirement benefits on a) their 65th birthday , b) their 62nd birthday and completion of at least 10 years of credited service or c ) the first day that the sum of their age plus total credited service equals 80 . Retired staff with over 5 years of service will be entitled to a supplemental payment between $\$ 30$ to $\$ 600$ per month for employer or ASRS health insurance premiums.

Employees and employer also paid .5\% of gross salary to ASRS for Long Term Disability (LTD). After 6 months of disability LTD will pay $662 / 3$ of average salary to staff members.

# Required Supplementary Information 

## Schedule of Funding Progress

While not any one or two numeric indices can fully describe the financial condition of a retirement system, the ratio of unfunded actuarial accrued liabilities (UAAL) to active member payroll is significant. The ratio of unfunded actuarial accrued liabilities to member payroll is a relative index of condition where inflation is present in both items. Observation of the ratio over a period of years gives an indication of funding achievement. The smaller the index, the stronger the system's condition. Unfunded (Excess) Actuarial Accrued Liabilities are being amortized on a level percent method over a rolling twenty (20) to thirty (30) year period. Those employers whose account had an unfunded accrued liability as of June 30, 2005 have a thirty year amortization period. All others have a twenty year period.

|  | Actuarlal Valuation Dabe | Actuartal Value of Assebs | (AAL) <br> Projected Unit Credlt | $\begin{aligned} & \text { UAAL } \\ & \text { (excess) } \end{aligned}$ | Funded Ratlo | Covered Payroll | UAAL \% of Covered Payroll |

|  | 6-30-00 | \$4,260,168 | \$3,415,157 | \$(845,011) | 124.7\% | \$751,280 | -112.5\% |
|  | 6-30-01 | \$4,661,941 | \$3,674,758 | \$ $(987,183)$ | 126.9\% | \$826,740 | -119.4\% |
|  | 6-30-02 | \$4,684,386 | \$4,144,211 | \$ $(540,175)$ | 113.0\% | \$854,249 | -63.2\% |
|  | 6-30-03 | \$4,781,377 | \$4,739,613 | \$(41,764) | 100.9\% | \$881,285 | -4.7\% |
|  | 6-30-04 | \$4,774,313 | \$5,167,333 | \$393,020 | 92.4\% | \$911,718 | 43.1\% |
|  | 6-30-05 | \$4,886,963 | \$5,872,735 | \$985,773 | 83.2\% | \$974,863 | 101.1\% |
|  | 6-30-06 | \$4,999,911 | \$6,495,012 | \$1,495,101 | 77.0\% | \$1,073,685 | 139.2\% |

As of $6 / 30 / 05$, AAL is calculated using the projected unit credit method. Significant assumptions used in determining AAL include: (a) a rate of return on the investment of present and future assets of $8.50 \%$ per year compounded annually; (b) projected salary increases of $5.50 \%$ per year compounded annually, attributable to an assumed inflation rate of $5.50 \%$ and (c) additional projected salary increases ranging from $1.0 \%$ to $3.0 \%$ per year, depending on age, attributable to seniority/merit.

The Fund Manager and Administrator
Public Safety Personnel Retirement System
It is a privilege for me to once again present this year's Investment Section of the Public Safety Personnel Retirement System's (PSPRS) Comprehensive Annual Financial Report for the fiscal year ending June 30, 2006. This data was compiled by our Accoumting Department staff and reviewed by our investment consultant Standard \& Poor's. The PSPRS investment portfolio posted a total fund return of $8.30 \%$ for the recently completed fiscal year. In a period of significant market volatility, the portfolio produced favorable investment results and outperformed its balanced benchmark index goal for the fiscal year (the Balanced Index is calculated using the following formula: $45 \%$ Stock Benchmark $+45 \%$ Lehman Govmnt/Credit + 10\% 91 Day T-bill ). These positive results contimue even as we maintain our control over our administrative investment costs, which are approximately 2 basis points (two one hundredths of one percent $-0.02 \%$ ) of the assets managed. The average mutual fund expense is approximately $100-150$ basis points or $1 \%$ to $1.5 \%$ of the assets managed. PSPRS' assets are managed in-house, saving the System and thereby its stakeholders millions of dollars annually.

A number of significant factors occurred during the year, as referenced below. The Investment Section of this Report provides a more detailed review of these items.

- As of June 30, 2006, PSPRS had total investment assets of $\$ 4,876,627,387$.
- The total fund returned $8.30 \%$ (net of all fees, including trading costs of approximately 2 basis points) for the fiscal year 2006 and has a $9.17 \%$ return over the last twenty years. In the long term, the fund has produced returns in excess of our actuarial target return of $8.5 \%$.
- Over the last three years the total portfolio has returned $10.74 \%$ adding $\$ 1.359$ billion to the total fund.
- Over the last three years the equity portfolio returned $12.00 \%$, surpassing the $\mathrm{S} \& \mathrm{P} 500$ return of $11.21 \%$ over that same time period.

As fiscal year 2006 came to a close, one of the major economic concerns was the housing market. Fortunately, we were able to capitalize on the market with some liquidity events. A retreat in the housing market may have a significant impact on consumer spending and the economy as a whole.

## Chief |nvestment Officer's Report

Page 2
Energy prices rose to record levels and the Federal Reserve continued to raise interest rates. In spite of these events, it may be likely that the Federal Reserve Board can continue to engineer the proverbial "soft landing" for the U.S. economy.

At PSPRS, we understand that investing is a combination of art and science. It is a process that requires discipline, focus and conviction, even when it is contrary to what others in the herd are doing. Consequently, we continue to base our decisions on a few guiding principles fundamental to prudent investment management:

- Meaningful enhanced diversification among asset classes when entry points appear reasonable
- Rebalancing the portfolio to target allocations
- Seeking appropriate investment risk/return tradeoffs

While it may appear that there is safety in being in the herd, the herd, by definition, is destined to be average at best. Being average will not meet the needs or desires of PSPRS stakeholders. Through our disciplined investment process, PSPRS has developed and implemented a strategy to prudently invest the assets of our members to provide for current and future retirement benefits. As with any strategy, there will be periods of absolute and/or relative underperformance in the short-term. It is easy for short-term oriented investors to forget that markets overshoot, both on the upside and downside. Given the long time horizon of PSPRS, we shall continue to avoid giving in to the short-term investment mentality that drives markets and most of their participants.

With the long-term needs of the System in mind, we continue to judiciously diversify and look for opportunities in less efficient asset classes. Such investments should dampen overall portfolio volatility and improve performance over the long run. While PSPRS currently has a diversified investment portfolio that ranges from conventional stock and bond investments to real estate and venture capital, we continue to look for meaningful tactical opportunities to invest in asset classes that are under represented or not currently represented in the portfolio. Legislation enacted this year that authorizes PSPRS to purchase and hold Exchange Traded Funds (ETFs) should help in this regard.

Going forward, the System will continue to face numerous challenges, but we will strive to seek opportunities as they arise. While we cannot guarantee future results, our disciplined investment process should allow us to maintain consistent performance over the long-run. Our patience and discipline has paid off in the past, and we shall continue to strive to produce the investment results necessary to meet the long-term needs of our members. Our goal is to protect and strengthen our investments and our members' financial future.

## Sincerely,

James A Nielsen

The Fund Manager
Public Safety Personnel Retirement System of the State of Arizona
3010 E. Camelback Road Ste. 200
Phoenix, Arizona 85016

Dear Sirs:
The attached charts and tables depict the investment performance for the Public Safety Personnel Retirement System of the State of Arizona. The performance results shown are based entirely on data provided by the plan's staff and does not constitute an audit on Standard \& Poor's part. We note that Standard \& Poor's has assumed that all data that has been supplied by the staff is accurate and complete and that Standard \& Poor's has not taken steps to verify same. We also note that the performance was calculated under the assumption that cash inflows and outflows take place uniformly throughout each month.

The performance data include realized and unrealized capital gains and losses, as well as interest and dividend income earned by the fund. We believe these computations were performed in accordance with accepted CFA Institute procedures.

Based on the foregoing, during the past fiscal year, the stock portfolio underperformed the NYSE and S\&P 500 indices, while the bond portfolio outperformed the Lehman Government/Credit Index. The overall fund, which also includes real estate, private equity and venture capital holdings (totaling less than 5\% of the fund), outperformed a custom benchmark, using bond and stock indices weighted in a fixed proportion. The overall fund has attained a rate of return over the past ten years that compares favorably with this custom index.

Sincerely,

David J. Braverman
Vice President

## Investment Objectives

## Fund Investment Objectives

The objective of the Fund is to ensure the integrity of the Public Safety Personnel Retirement System in order to adequately fund benefit levels for members as stated in Title 38, Chapter 5, articles 3, 4 and 6 of the Arizona Revised Statutes and as amended from time to time by the Legislature. To achieve the objective, the Fund will do the following:

1. Maintain a goal for the Fund's assets to be equal to the Fund's liabilities within any twentyyear period;
2. Annually adjust the employer contribution rates based on the recommendations made by the annual actuarial valuations;
3. Determine a reasonable contribution rate necessary to fund benefits approved by the legislature and then reduce the variation in the employer contribution rate over time to the Fund;
4. Preserve and enhance the capital of the Fund through effective management of the portfolio in order to take advantage of attractive opportunities various markets and market sectors have to offer;
5. Provide the opportunity for increased benefits for retirees as the legislature may from time to time enact through systematic growth of the investments of the fund.

Consistent with the Fund objectives, the primary investment objective of the Fund is to maximize long-term real (after inflation) investment returns recognizing established risk (volatility) parameters and the need to preserve capital by:

1. Deriving a reasonable asset allocation model that attempts to fully achieve the primary investment objective, over the long term,
2. Consistent with these policies and the direction of the Fund Manager, strategically allocating within asset classes and investment styles in order to enhance investment returns. This strategic allocation must at all times be within ranges set forth in these Policies.
3. Regularly reviewing the status of investments,
4. Regularly assessing the need to adjust the mix, type and composition of the investment classes within the allocation ranges.

The possibility of short-term declines in the market value of the Fund or the Fund's assets is a recognized consequence of achieving potentially higher long-term investment returns.

The time horizon for evaluating total fund investment performance is long-term.

# Actuary's Certification Letter 

November 10, 2006

The Fund Manager<br>Arizona Public Safety Personnel Retirement System<br>3010 East Camelback Road, Suite 200<br>Phoenix, Arizona 85016-4416

Attention: James Hacking, Administrator
The purpose of the annual actuarial valuations of the Arizona Public Safety Personnel Retirement System is to determine the liabilities and funding requirements for the participating groups. We certify that the June 30,2006 annual actuarial valuations were made in accordance with recognized actuarial methods.

Data for the annual valuations was furnished by the Administrator and was checked by us for internal completeness and year-to-year consistency, but was not otherwise audited. The actuary prepared all of the schedules in the Actuarial Section and the Schedule of Funding Progress in the Financial Section of the Comprehensive Annual Financial Report.

The actuarial assumptions were adopted by the Fund Manager based upon the recommendations of the actuary and the results of experience studies, the most recent of which covered the 5 year period ended June 30, 2003. The assumptions and methods conform to the parameters established in Governmental Accounting Standards Board Statement 25. Actuarial gains (losses) are amortized as level percents of payroll over 30 years.

The funding value of assets is a smoothed market value which spreads differences between the actual and assumed investment return over a seven year period.

On the basis of the June 30, 2006 valuation, it is our opinion that the liabilities of the Retirement System are being funded as incurred in accordance with sound actuarial principles.

Respectfully submitted,

Sandra W. Rodwan
Member, American Academy of Actuaries

## Actuarial Balance Sheet

| Stabilization reserve account |  | 768,190 |
| Total Actuarial Present Values (Liability) |  | \$9,174,964,606 |

## Actuarial Assumptions

## SUMMARY OF VALUATION METHODS

The actuarial cost method used for the valuation was the projected unit credit method. Normal cost contributions were computed as follows:

The series of contributions, payable from date of employment, sufficient to accumulate at time of retirement the discounted value of each member's projected pension and potential survivors pension was computed, using the assumptions summarized on the following pages, so that each contribution in the series is the portion of the actuarial present value allocated to the current year. The normal cost is expected to increase as accrued service increases..

## Actuarlal accrued Hab/Ity was computed and financed as follows:

(1) Retirants and beneficiaries. The discounted value of pensions likely to be paid retired members and their potential survivors were computed using the investment return and mortality assumptions. The computed amount was reduced by applicable valuation assets and the unfunded amount, if any, was amortized over an open period of 30 years.
(2) Active members and former members. The actuarial accrued liability associated with service rendered prior to the valuation date, including experience gains and losses, was computed using the investment retum, mortality and other factors outlined on the following pages. The computed amount was reduced by applicable valuation assets and the unfunded amount, if any, was amortized over an open period of 30 years. If valuation assets exceed the actuarial accrued liability, the excess was amortized over an open period of 20 years and applied as a credit toward the computed normal cost.

## SUMMARY OF PLAN PROVISIONS

See Note 2 in the Notes to the Financial Statements.

## SUMMARY OF VALUATION ASSUMPTIONS

## Economic Assumptions

The rate of Investment retum used was 8.50 percent a year, compounded annually. This assumption was first used for the June 30, 2005 valuations. The assumption consists of $3.5 \%$ for assuming maturty and principal risks and $5.00 \%$ In recognition of inflation. These components, adopted by the Fund Manager, as recommended by the system's actuary, were revised for the June 30, 2005 annual valuations. This assumption is used to discount the value of future payments.

The rates of salary increase used are in accordance with the following graded table. These assumptions, adopted by the Fund Manager, as recommended by the System's actuary, were first used for the June 30, 2006 valuations. The assumption consists of $5.00 \%$ in recognition of inflation, a graded allowance for promotion and longevity, and $.5 \%$ for other across-the-board factors.

## Sample Annual Rates of Salary Increase

| Age | Across-the-Board | Merit and Longevity | Other | Total |
| :---: | :---: | :---: | :---: | :---: |

Rates first used for June 30, 1999 valuation.
Retirement Rates: Age-related rates based on the following schedule:

Active members with at least 40 years of service are assumed to retire within the year. Members who do not acquire 20 years of service prior to age 62 are assumed to retire upon first eligibility following attainment of age 62.

These rates adopted by the Fund Manager, as recommended by the System's actuary, were first used for the June 30, 1999 valuations.

## Solvency Test

SOLVENCY TEST - Testing the financial solvency of a retirement system can be done In several ways. The funding objective is to meet long-term benefit promises through contributions that remain approximately level from year to year as a percent of member payroll. If the contributions to the system are level in concept and soundly executed, and if the system continues its present operations pattern for the indefinite future, the system will pay all promised benefits when due-the ultimate test of financial soundness.

A short term solvency test is one means of checking a system's progress under its funding program. In a short term solvency test, the system's present assets (cash and Investments) are compared with:

1. Active member contributions on deposit;
2. The liabilities for future benefits to present retired lives;
3. The liabilities for service already rendered by active members.

In a system that has been following the discipline of level percent of payroll financing, the liabilities for active member contributions on deposit (liability 1) and the liabilitles for future benefits to present retired Ilves (llability 2) will be fully covered by present assets (except in rare clrcumstances). In addition, the liabilitles for service already rendered by active members (liability 3) will be partially covered by the remainder of present assets. Generally, If the system has been using level cost financing, the funded portion of llability 3 will Increase over time. Liability 3 being fully funded is very rare. All amounts presented are in thousands.

## Operating /nformation

## Summary of Benefit |ncreases

State law provides for an annual benefit increase for retirees or their survivors who are over age fifty-five on the effective day of the increase and for disability retirees regardless of age. These increases are dependent upon the production of excess eamings on part of the assets of the Fund and are limited to four percent of the average benefit being paid to retirees and their survivors. The following schedule summartzes the statutorly-designed process of calculating the monthly benefit increases effective each July 1st.

| Fiscal <br> Year <br> Ended | Excess <br> Yield per <br> Statute* | Excess <br> Earnings <br> Assets** | Excess <br> Earnings | Monthly <br> Benefit <br> Increase <br> Fundable | Maximum <br> per <br> Staturory <br> 4\% Cap | Lesser <br> of Two <br> Increase <br> Awarded |
