*Board of Retirement
Alameda County Employees' Retirement Association
475 14th Street, Suite 1000
Oakland, CA 94612*

Dear Board Members:

We are pleased to submit this Actuarial Valuation and Review as of December 31, 2010. It summarizes the actuarial data used in the valuation, establishes the funding requirements for fiscal 2011-2012 and analyzes the preceding year's experience.

The census and financial information were prepared by ACERA. That assistance is gratefully acknowledged. The actuarial calculations were completed under the supervision of Andy Yeung, ASA, MAAA, FCA, Enrolled Actuary.

This actuarial valuation has been completed in accordance with generally accepted actuarial principles and practices, including Actuarial Standards of Practice (ASOPs) Nos. 4, 27, 35, 44, and all other relevant ASOPs. In our opinion, the combined operation of the assumptions and the methods applied in this valuation fairly represent past and anticipated future experience of the Association and meet the parameters required by GASB Statement 25. To the best of our knowledge, the information supplied in this actuarial valuation is complete and accurate.

We are Members of the American Academy of Actuaries and we meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion herein.

We look forward to reviewing this report at your next meeting and to answering any questions.

Sincerely,

THE SEGAL COMPANY

SECTION 1: Valuation Summary for the Alameda County Employees' Retirement Association

Purpose

This report has been prepared by The Segal Company to present a valuation of the Alameda County Employees' Retirement Association as of December 31, 2010. The valuation was performed to determine whether the assets and contributions are sufficient to provide the prescribed benefits. The contribution requirements presented in this report are based on:

- The benefit provisions of the Retirement Association, as administered by the Board of Retirement;
- The characteristics of covered active members, inactive vested members, retired members and beneficiaries as of November 30, 2010, provided by the Retirement Association;
- The assets of the Plan as of December 31, 2010, provided by the Retirement Association;
- Economic assumptions regarding future salary increases and investment earnings; and
- Other actuarial assumptions, regarding employee terminations, retirement, death, etc. that the Board has adopted for the December 31, 2010 valuation.

One of the general goals of an actuarial valuation is to establish contributions that fully fund the Association's liabilities, and that, as a percentage of payroll, remain as level as possible for each generation of active members. Annual actuarial valuations measure the progress toward this goal, as well as test the adequacy of the contribution rates.

In preparing this valuation, we have employed generally accepted actuarial methods and assumptions to evaluate the Association's assets, liabilities and future contribution requirements. Our calculations are based upon member data and financial information provided to us by the Association's staff. This information has not been audited by us, but it has been reviewed and found to be consistent, both internally and with prior year's information.

The contribution requirements are determined as a percentage of payroll. The Association's employer rates provide for both normal cost and a payment or credit to amortize any unfunded or overfunded actuarial accrued liabilities. In this valuation, we have continued with the Board's funding policy to amortize the Association's entire unfunded actuarial accrued liability as of December 31, 2010 over a declining 22-year period. The aggregate employer contribution rate calculated using the declining 22-year amortization period is 20.84% of payroll. In this valuation, we have applied the 7.90% net investment earnings, 3.50% inflation, and 0.50% across-the-board salary increase assumptions adopted by the Board. The 7.90% investment return assumption has been developed without taking into consideration the impact of the "excess earnings" sharing mechanism between the SRBR and the Retirement Plan. The rates calculated in this report may be adopted by the Board for the fiscal year that extends from July 1, 2011 through June 30, 2012.

SECTION 1: Valuation Summary for the Alameda County Employees' Retirement Association

Significant Issues in Valuation Year

The following key findings were the result of this actuarial valuation:

- Ref: Pg. 50*

 - In the December 31, 2009 valuation, the ratio of the valuation value of assets to actuarial accrued liabilities was 81.2%. In this December 31, 2010 valuation, the funding ratio has declined to 77.5%.
 - The Association's unfunded actuarial accrued liability (UAAL) as of December 31, 2009 was \$1,110.3 million. In this year's valuation, the UAAL has increased to \$1,386.6 million.
- Ref: Pg. 8 and Pg. 45*

 - The Plan has a net actuarial experience loss of about \$245.9 million. A reconciliation of the Association's UAAL is provided in Section 3, Exhibit H.
 - Employer rates for APMC/Court/First 5 are higher than the County's rates to reflect that only the County has received a reimbursement of \$4.5 million for the implicit retiree health benefit subsidy paid by the County for 2010 (note that this amount is an estimated amount provided by ACERA). The \$4.5 million together with the unused credit from prior years' transfer have been amortized over 22 years.
- Ref: Pg. 22 and Pg. 83*

 - The aggregate employer rate calculated in this valuation has increased from 18.57% of payroll to 20.84% of payroll. The reason for this change is lower than expected return on investments (after smoothing) and amortizing the prior year's UAAL over a smaller than expected projected total payroll. These losses were partially offset by gains from: (i) lower than expected salary increases for active members and (ii) lower than expected COLA increases for retired members. A reconciliation of the Association's aggregate employer rate is provided in Section 2, Subsection D (see Chart 15). A schedule of the projected contributions by each participating employer is provided in Appendix B.
- Ref: Pg. 23 and Pg. 68*

 - The aggregate member rate calculated in this valuation has increased slightly from 8.67% of payroll to 8.68% of payroll as a result of change in membership demographics. A reconciliation of the Association's aggregate member rate is provided in Section 2, Subsection D (see Chart 16). The member rates have been updated to reflect the valuation as of December 31, 2010. These rates are provided in Appendix A of this report.
- Ref: Pg. 6*

 - As indicated in Section 2, Subsection B (see Chart 7) of this report, the total unrecognized investment losses as of December 31, 2010 is \$263.4 million (in the previous valuation, this amount was \$776.9 million). These investment losses will be recognized in the determination of the actuarial value of assets for funding purposes in the next few years, and will offset any investment gains that may occur after December 31, 2010. This implies that if the Association earns the assumed net rate of investment return of 7.90% per year on a **market value** basis, it will result in investment losses on the actuarial value of assets in the next few years. So, if the actual market return is equal to the assumed 7.90% rate and all other actuarial assumptions are met, the contribution requirements would increase in each of the next few years.

SECTION 1: Valuation Summary for the Alameda County Employees' Retirement Association

The deferred losses of \$263.4 million represent 5.0% of the market value of assets as of December 31, 2010. Unless offset by future investment gains or other favorable experience, the recognition of the \$263.4 million market losses is expected to have a significant impact on the Association's future funded percentage and contribution rate requirements. Under a simplified approach, this potential impact may be illustrated as follows:

- If the deferred losses were recognized immediately and entirely in the valuation value of assets, the funded percentage would decrease from 77.5% to 73.2%.
 - If the deferred losses were recognized immediately and entirely in the valuation value of assets, the aggregate employer rate would increase from 20.84% to about 22.8% of payroll.
- The actuarial valuation report as of December 31, 2010 is based on financial information as of that date. Changes in the value of assets subsequent to that date, to the extent that they exist, are not reflected. Declines in asset values will increase the actuarial cost of the plan, while increases will decrease the actuarial cost of the plan.
- Effective October 17, 2010, all new members hired in the Sheriff's Department (excluding Probation Officers) can elect to enter either Safety Tier 2C (2% @ 50 formula) or Safety Tier 2D (3% @ 55 formula). In our special study report dated July 28, 2010, we estimated the contribution rates for these new tiers before we had data on actual members who would be covered by the two tiers. As part of the December 31, 2010 valuation, ACERA reported four active members enrolled in each of Tiers 2C and 2D as of November 30, 2010. We also understand that new members hired in the Probation Department can elect to enter either Tier 2C or 2D effective retroactively on October 17, 2010. As directed by ACERA, we have calculated the Entry Age Normal Cost rates for these two tiers based not only on the active members reported by ACERA (based only on the employees of the Sheriff's Department), but also by augmenting the membership profile to anticipate the future members from employees of the Probation Department. The profile of future Probation members is based on employees hired in that Department on or after October 17, 2010. The increase in the employer and member rates between the estimates we provided in our July 28, 2010 study and this valuation is primarily due to the inclusion of Probation members who were anticipated to enter the two tiers at a higher average entry age than Sheriff members.

Impact of Future Experience on Contribution Rates

Future contribution requirements may differ from those determined in the valuation because of:

- 1) difference between actual experience and anticipated experience;
- 2) changes in actuarial assumptions or methods;
- 3) changes in statutory provisions; and
- 4) difference between the contribution rates determined by the valuation and those adopted by the Board.

Average age	70.4	70.5	N/A
Average monthly benefit ⁽¹⁾	\$3,067	\$2,914	5.3%
Vested Terminated Members:			
Number of vested terminated members ⁽²⁾	1,785	1,816	-1.7%
Average age	48.2	47.8	N/A
Summary of Financial Data (dollar amounts in thousands):			
Market value of assets	\$5,224,495	\$4,676,880	11.7%
Return on market value of assets	13.72%	25.33%	N/A
Actuarial value of assets	\$5,487,858	\$5,453,769	0.6%
Return on actuarial value of assets	2.26%	3.94%	N/A
Valuation value of assets	\$4,776,128	\$4,789,000	-0.3%
Return on valuation value of assets	0.77%	4.12%	N/A

⁽¹⁾ Excludes monthly benefits payable from the SRBR.

⁽²⁾ Includes members who left their contributions on deposit even though they have less than five years of service.

SECTION 2: Valuation Results for the Alameda County Employees' Retirement Association

A. MEMBER DATA

The Actuarial Valuation and Review considers the number and demographic characteristics of covered members, including active members, vested terminated members, retired members and beneficiaries.

This section presents a summary of significant statistical data on these member groups.

More detailed information for this valuation year and the preceding valuation can be found in Section 3, Exhibits A, B, and C.

A historical perspective of how the member population has changed over the past ten valuations can be seen in this chart.

CHART 1
Member Population: 2001 – 2010

Year Ended December 31	Active Members	Vested Terminated Members*	Retired Members and Beneficiaries	Ratio of Non-Actives to Actives
2001	10,974	1,025	5,867	0.63
2002	11,338	1,141	5,996	0.63
2003	11,220	1,224	6,287	0.67
2004	10,556	1,361	6,475	0.74
2005	10,503	1,522	6,718	0.78
2006	10,662	1,722	6,936	0.81
2007	10,912	1,730	7,183	0.82
2008	11,173	1,773	7,246	0.81
2009	10,927	1,816	7,333	0.84
2010	10,879	1,785	7,558	0.86

**Includes terminated members due a refund of member contributions*

SECTION 2: Valuation Results for the Alameda County Employees' Retirement Association

Active Members

Plan costs are affected by the age, years of service and compensation of active members. In this year's valuation, there were 10,879 active members with an average age of 47.4 years, average years of service of 11.6 and average compensation of \$82,576. The 10,927 active members in the prior valuation had an average age of 47.2 years, average service of 11.5 and average compensation of \$80,773.

Inactive Members

In this year's valuation, there were 1,785 members with a vested right to a deferred or immediate vested benefit or entitled to a return of their member contributions versus 1,816 in the prior valuation

These graphs show a distribution of active members by age and by years of service. Age and years of service have been projected to December 31, 2010 based on census data collected as of November 30, 2010.

CHART 2
Distribution of Active Members by Age as of December 31, 2010

CHART 3
Distribution of Active Members by Years of Service as of December 31, 2010

SECTION 2: Valuation Results for the Alameda County Employees' Retirement Association

Retired Members and Beneficiaries

As of December 31, 2010, 6,496 retired members and 1,062 beneficiaries were receiving total monthly benefits of \$23,181,626. For comparison, in the previous valuation, there were 6,268 retired members and 1,065 beneficiaries receiving monthly benefits of \$21,369,663. These monthly benefits exclude supplemental COLA benefits payable from the Supplemental Retirees Benefit Reserve (SRBR).

These graphs show a distribution of the current retired members based on their monthly amount and age, by type of pension. Age has been projected to December 31, 2010 based on census data collected as of November 30, 2010.

CHART 5
Distribution of Retired Members (Excl. Beneficiaries) by Type and by Age as of December 31, 2010

SECTION 2: Valuation Results for the Alameda County Employees' Retirement Association

B. FINANCIAL INFORMATION

Retirement plan funding anticipates that, over the long term, both contributions and net investment earnings (less investment fees and administrative expenses) will be needed to cover benefit payments.

Retirement plan assets change as a result of the net impact of these income and expense components. The adjustment toward market value shown in the chart is the “non-cash” earnings on investments implicitly included in the actuarial value of assets. Additional financial information, including a summary of these transactions for the valuation year, is presented in Section 3, Exhibits D and E.

The chart depicts the components of changes in the actuarial value of assets over the last nine years. Note: The first bar represents increases in assets during each year while the second bar details the decreases.

CHART 6
Comparison of Increases and Decreases in the Actuarial Value of Assets for Years Ended December 31, 2002 through 2010

SECTION 2: Valuation Results for the Alameda County Employees' Retirement Association

It is desirable to have level and predictable plan costs from one year to the next. For this reason, the Board of Retirement has approved an asset valuation method that gradually adjusts to market value. Under this valuation method, the full value of market fluctuations is not recognized in a single year and, as a result, the asset value and the plan costs are more stable.

The amount of the adjustment to recognize market value is treated as income, which may be positive or negative. Realized and unrealized gains and losses are treated equally and, therefore, the sale of assets has no immediate effect on the actuarial value of assets.

The determination of the Actuarial Value of Assets is provided on the following page.

SECTION 2: Valuation Results for the Alameda County Employees' Retirement Association

CHART 7

Determination of Actuarial Value of Assets for Year Ended December 31, 2010

Six Month Period		Total Actual Market	Expected Market	Investment	Deferred	Deferred
From	To	Return (net)	Return (net)	Gain (Loss)	Factor	Return
01/01/2006	06/30/2006	\$156,835,279	\$179,867,988	\$(23,032,709)	0.0	\$0

1. Total Deferred Return						\$(263,363,379)
2. Net Market Value						5,224,494,880
3. Actuarial Value of Assets (Item 2 – Item 1)						5,487,858,259
4. Actuarial Value as a Percentage of Market Value (Before Corridor; Item 3 / Item 2)						105.0%
5. Actuarial Value of Assets – Corridor Limits:						
a. Lower Limit – 60% of Net Market Value						3,134,696,928
b. Upper Limit – 140% of Net Market Value						7,314,292,832
6. Actuarial Value of Assets (within corridor)						5,487,858,259
7. Non-valuation reserves and designations:						
a. Reserve for Interest Fluctuations (Contingency Reserve), but no less than \$0						81,117,680
b. Supplemental Retirees Benefit Reserve (SRBR)						624,166,664
c. Other Non-Valuation Reserves (Death Benefit-Burial & 401(h) Reserves)						10,945,448
d. SRBR Transfer to Employer Advance Reserve*						(4,500,000)
e. Subtotal						\$711,729,792
8. Valuation Value of Assets (Item 6 – Item 7e)						\$4,776,128,467

The chart shows the determination of the actuarial value of assets as of the valuation date.

Note: Results may not add due to rounding.

** Estimate provided by ACERA.*

SECTION 2: Valuation Results for the Alameda County Employees' Retirement Association

The market value, actuarial value, and valuation value of assets are representations of ACERA's financial status. As investment gains and losses are gradually taken into account, the actuarial value of assets tracks the market value of assets, but with less volatility. The valuation value of assets is the actuarial value, excluding any non-valuation reserves. The valuation asset value is significant because ACERA's liabilities are compared to these assets to determine what portion, if any, remains unfunded. Amortization of the unfunded actuarial accrued liability is an important element in determining the contribution requirement.

This chart shows the change in market value, actuarial value and valuation value over the past nine years.

CHART 8

Market Value, Actuarial Value and Valuation Value of Assets as of December 31, 2002 – 2010

SECTION 2: Valuation Results for the Alameda County Employees' Retirement Association

C. ACTUARIAL EXPERIENCE

To calculate the required contribution, assumptions are made about future events that affect the amount and timing of benefits to be paid and assets to be accumulated. Each year actual experience is measured against the assumptions. If overall experience is more favorable than anticipated (an actuarial gain), the contribution requirement will decrease from the previous year. On the other hand, the contribution requirement will increase if overall actuarial experience is less favorable than expected (an actuarial loss).

Taking account of experience gains or losses in one year without making a change in assumptions reflects the belief that the single year's experience was a short-term development and that, over the long term, experience will return to the original assumptions. For contribution

requirements to remain stable, assumptions should approximate experience.

If assumptions are changed, the contribution requirement is adjusted to take into account a change in experience anticipated for all future years.

The total experience loss was \$245.9 million, a net loss of \$339.3 million from investments and a gain of \$93.4 million from all other sources. The net experience variation from individual sources other than investments was 1.5% of the actuarial accrued liability. A discussion of the major components of the actuarial experience is on the following pages.

This chart provides a summary of the actuarial experience during the past year.

CHART 9
Actuarial Experience for Year Ended December 31, 2010

1. Net loss from investments ⁽¹⁾	\$339,297,000
2. Net gain from other experience ⁽²⁾	<u>(93,374,000)</u>
3. Net experience loss: (1) + (2)	\$245,923,000

⁽¹⁾ Details in Chart 10.

⁽²⁾ See Section 3, Exhibit H.

SECTION 2: Valuation Results for the Alameda County Employees' Retirement Association

Investment Rate of Return

A major component of projected asset growth is the assumed rate of return. The assumed return should represent the expected long-term rate of return, based on ACERA's investment policy. For valuation purposes, the assumed rate of return on the valuation value of assets was 7.90%. The actual rate of return on a valuation basis for the 2010 plan year was 0.77%.

Since the actual return for the year was less than the assumed return, ACERA experienced an actuarial loss during the year ended December 31, 2010 with regard to its investments.

This chart shows the gain/(loss) due to investment experience.

CHART 10
Investment Experience for Year Ended December 31, 2010 –
Valuation Value, Actuarial Value, and Market Value of Assets

	Valuation Value	Actuarial Value	Market Value
1. Actual return	\$36,890,575	\$122,091,092	\$635,617,239
2. Average value of assets	4,761,868,689	5,409,768,143	4,632,878,618
3. Actual rate of return: (1) ÷ (2)	0.77%	2.26%	13.72%
4. Assumed rate of return	7.90%	7.90%	7.90%
5. Expected return: (2) x (4)	376,187,626	427,371,683	365,997,411
6. Actuarial gain/(loss): (1) – (5)	<u>\$(339,297,051)</u>	<u>\$(305,280,591)</u>	<u>\$269,619,828</u>

SECTION 2: Valuation Results for the Alameda County Employees' Retirement Association

Because actuarial planning is long term, it is useful to see how the assumed investment rate of return has followed actual experience over time. The chart below shows the rate of return on an actuarial, valuation, and market basis for the last nine years.

Based on the assumptions adopted by the Board for the December 31, 2010 valuation, the investment return assumption remained at 7.90%.

CHART 11

Investment Return – Valuation Value, Actuarial Value and Market Value: 2002 - 2010

Year Ended December 31	Valuation Value Investment Return		Actuarial Value Investment Return		Market Value Investment Return	
	Amount	Percent	Amount	Percent	Amount	Percent
2002	\$ 35,537,359	1.08%	-\$47,643,106	-1.22%	-\$252,420,614	-7.26%
2003	128,596,301	3.93%	173,434,404	4.58%	802,017,260	25.46%

2009	190,184,291	4.12%	208,175,576	3.94%	953,666,087	25.33%
2010	36,890,575	0.77%	122,091,092	2.26%	635,617,239	13.72%
Nine-Year Average Return		5.02%		5.17%		6.09%

SECTION 2: Valuation Results for the Alameda County Employees' Retirement Association

Subsection B described the actuarial asset valuation method that gradually takes into account fluctuations in the market value rate of return. The effect of this is to stabilize the actuarial rate of return, which contributes to leveling pension plan costs.

CHART 12
Market, Actuarial and Valuation Rates of Return for Years Ended December 31, 2002 - 2010

SECTION 2: Valuation Results for the Alameda County Employees' Retirement Association

Other Experience

There are other differences between the expected and the actual experience that appear when the new valuation is compared with the projections from the previous valuation. These include:

- actual turnover among the participants,
- retirement experience (earlier or later than expected),
- mortality (more or fewer deaths than expected),

- the number of disability retirements, and
- salary increases different than assumed.

The net gain from this other experience for the year ended December 31, 2010 amounted to \$93.4 million which is 1.5% of the actuarial accrued liability. See Exhibit H for a detailed development of the Unfunded Actuarial Accrued Liability.

SECTION 2: Valuation Results for the Alameda County Employees' Retirement Association

D. EMPLOYER AND MEMBER CONTRIBUTIONS

Employer contributions consist of two components:

Normal Cost

The annual contribution rate that, if paid annually from a member's first year of membership through the year of retirement, would accumulate to the amount necessary to fully fund the member's retirement-related benefits. Accumulation includes annual crediting of interest at the assumed investment earning rate. The contribution rate is expressed as a level percentage of the member's compensation.

Contribution to the Unfunded

Actuarial Accrued Liability (UAAL)

The annual contribution rate that, if paid annually over the UAAL amortization period, would accumulate to the amount necessary to fully fund the UAAL. Accumulation includes annual crediting of interest at the assumed investment earning rate. The contribution (or rate credit in the case of a negative UAAL) is calculated to remain as a level percentage of future active member payroll (including payroll for new members as they enter the Association) assuming a constant number of active members. In order to remain as a level percentage of payroll, amortization payments (credits) are scheduled to increase at the annual rate of 4.00% (i.e., 3.50% inflation plus 0.50% across-the-board salary increase). The current UAAL is being recognized over a declining 22-year period.

The recommended employer contributions are provided on Chart 13.

SECTION 2: Valuation Results for the Alameda County Employees' Retirement Association

Member Contributions

Articles 6 and 6.8 of the 1937 Act define the methodology to be used in the calculation of member basic contribution rates for General members and Safety members, respectively. The basic contribution rate is determined so that the accumulation of a member's basic contributions made in a given year until a certain age will be sufficient to fund an annuity at that age that is equal to 1/100 of Final Average Salary for General Tier 1, General Tier 3, and all Safety members and 1/120 of Final Average Salary for General Tier 2 members. That age is 60 for General Tier 1 and Tier 2, 55 for General Tier 3, and 50 for all Safety members. It is assumed that contributions are made annually at the same rate, starting at entry age. In addition to the basic contributions, members pay one-half of the total normal cost necessary to fund cost-of-living benefits. As instructed by ACERA, we have also included a 3% cost-sharing contribution that we understand will be paid by Safety Tier 1 and Tier 2 members even after they attain 30 years of service. For Safety Tier 2C members, there are no cost-sharing contributions. For Safety Tier 2D members, the cost-sharing contribution rate is 5% of salary for the first 5 years of employment and 3% of salary for each subsequent year of employment (even after the member attains 30 years of service).

Accumulation includes semi-annual crediting of interest at the assumed investment earnings rate. Following the procedure established by the Board, basic member rates have been adjusted to anticipate conversion of terminal pay at retirement.

The member contribution rates provided in Appendix A.

SECTION 2: Valuation Results for the Alameda County Employees' Retirement Association

CHART 14

Breakdown of Employer Contribution Rate by Types of Benefit (For information purposes only)

A breakdown of the approximate portion of the employer contribution rate by the various types of benefit is as follows:

	General	Safety
Service and non-service connected disability benefits	17%	21%
Service retirement and other benefits	<u>83%</u>	<u>79%</u>
	100%	100%

Note: In developing these percentages, we made the simplifying assumption that the liability for active and inactive members (including members who have already retired) can be approximated by the proportion of the normal cost required to fund disability and non-disability benefits.

SECTION 2: Valuation Results for the Alameda County Employees' Retirement Association

The employer contribution rates as of December 31, 2010 are based on all of the data described in the previous sections, the actuarial assumptions described in Section 4, and the Plan provisions adopted at the time of preparation of the Actuarial Valuation. They include all changes affecting future costs, adopted benefit changes, actuarial gains and losses and changes in the actuarial assumptions.

Reconciliation of Recommended Employer Contribution

The chart below details the changes in the recommended employer contribution from the prior valuation to the current year's valuation.

The chart reconciles the employer contribution from the prior valuation to the amount determined in this valuation.

CHART 15

Reconciliation of Recommended Employer Contribution from December 31, 2009 to December 31, 2010 (Dollars in Thousands)

	Contribution Rate	Estimated Amount*
Recommended Contribution Rate as of December 31, 2009	18.57%	\$166,817
Effect of actuarial experience during 2010:		
1. Effect of investment loss	2.56%	\$22,998
2. Effect of lower than expected salary increases for actives	-0.61	-5,480
3. Effect of amortizing prior year's UAAL over a smaller than expected projected total payroll	0.18	1,617
4. Effect of lower than expected COLA increases for retirees and beneficiaries	-0.05	-449
5. Effect of other experience (gain)/loss (primarily due to scheduled delay in implementing contribution rate after date of valuation)	0.19	1,780
Subtotal	2.27%	\$20,466
Recommended Contribution Rate as of December 31, 2010	20.84%	\$187,283

* Based on December 31, 2010 projected compensation.

SECTION 2: Valuation Results for the Alameda County Employees' Retirement Association

The member contribution rates as of December 31, 2010 are based on all of the data described in the previous sections, the actuarial assumptions described in Section 4, and the Plan provisions adopted at the time of preparation of the Actuarial Valuation. They include all changes affecting future costs, adopted benefit changes, actuarial gains and losses and changes in the actuarial assumptions.

Reconciliation of Recommended Member Contribution Rate

The chart below details the changes in the recommended member contribution rate from the prior valuation to the current year's valuation.

CHART 16
Reconciliation of Recommended Member Contribution from December 31, 2009 to December 31, 2010
(Dollar Amounts in Thousands)

The chart reconciles the member contribution from the prior valuation to the amount determined in this valuation.

	Contribution Rate	Estimated Amount*
Average Contribution Rate as of December 31, 2009	8.67%	\$77,852
1. Effect of change in membership demographics	0.01%	87
Average Contribution Rate as of December 31, 2010	8.68%	\$77,939

** Based on December 31, 2010 projected compensation.*

E. INFORMATION REQUIRED BY GASB

Governmental Accounting Standards Board (GASB) reporting information provides standardized information for comparative purposes of governmental pension plans. This information allows a reader of the financial statements to compare the funding status of one governmental plan to another on relatively equal terms.

Critical information to the GASB is the historical comparison of the GASB required contributions to the actual contributions. This comparison demonstrates whether a plan is being funded on an actuarially sound basis and in accordance with GASB funding requirements. Chart 17 below presents a graphical representation of this information for the Plan.

The other critical piece of information regarding the Plan's financial status is the funded ratio. This ratio compares the valuation value of assets to the actuarial accrued liabilities of the plan as calculated under the GASB. High ratios indicate a well-funded plan with assets sufficient to pay most benefits. Lower ratios may indicate recent changes to benefit structures, funding of the plan below actuarial requirements, poor asset performance, or a variety of other changes. The funded ratio as of December 31, 2009 was 81.2%. This year's funded ratio decreased to 77.5%.

The details regarding the calculations of these values and other GASB numbers may be found in Section 4, Exhibits I, II, and III.

These graphs show key GASB factors.

EXHIBIT F

Actuarial Balance Sheet

An overview of the Plan's funding is given by an Actuarial Balance Sheet. In this approach, we first determine the amount and timing of all future payments that will be made by the Plan for current participants. We then discount these payments at the valuation interest rate to the date of the valuation, thereby determining their present value. We refer to this present value as the "liability" of the Plan.

Second, we determine how this liability will be met. These actuarial "assets" include the net amount of assets already accumulated by the Plan, the present value of future member contributions, the present value of future employer normal cost contributions, and the present value of future employer amortization payments.

Actuarial Balance Sheet (Dollar Amounts in Thousands)			
Assets	Basic	COLA	Total
1. Total valuation assets	\$3,189,077	\$1,587,052	\$4,776,128
2. Present value of future contributions by members	570,613	133,825	704,438
3. Present value of future employer contributions for:			
a. entry age normal cost	649,414	131,010	780,424
b. unfunded actuarial accrued liability	1,218,788	167,824	1,386,612
4. Total current and future assets	\$5,627,892	\$2,019,711	\$7,647,603
Liabilities			
5. Present value of benefits already granted	\$2,096,055	\$1,219,408	\$3,315,463
6. Present value of benefits to be granted to present non-retired members	3,531,837	800,303	4,332,140
7. Total liabilities	\$5,627,892	\$2,019,711	\$7,647,603

Development of Unfunded Actuarial Accrued Liability as of December 31, 2010

	(Dollar Amounts in Thousands)
1. Unfunded actuarial accrued liability at beginning of year	\$1,110,331
2. Gross Normal Cost at middle of year	169,969
3. Actual employer and member contributions	-225,148
4. Interest (whole year on (1) plus half year on (2) + (3))	<u>85,537</u>
5. Expected unfunded actuarial accrued liability at end of year	\$1,140,689
6. Actuarial (gain)/loss due to all changes*:	
a. Loss from investments as recognized on December 31, 2010	\$339,297
b. Gain from lower than expected salary increases for actives	-80,420
c. Gain from lower than expected COLA increases for retirees and beneficiaries	-7,021
d. Other experience (gain)/loss	<u>-5,933</u>
e. Subtotal	\$245,923
7. Actual unfunded actuarial accrued liability at end of year (5) + (6e)	\$1,386,612

* The "net gain from other experience" of \$93,374,000 from Chart 9 is equal to the sum of items 6b through 6d.

SECTION 3: Supplemental Information for the Alameda County Employees' Retirement Association

EXHIBIT I

Section 415 Limitations

Section 415 of the Internal Revenue Code (IRC) specifies the maximum benefits that may be paid to an individual from a defined benefit plan and the maximum amounts that may be allocated each year to an individual's account in a defined contribution plan.

A qualified pension plan may not pay benefits in excess of the Section 415 limits. The ultimate penalty for non-compliance is disqualification: active participants could be taxed on their vested benefits and the IRS may seek to tax the income earned on the plan's assets.

In particular, Section 415(b) of the IRC limits the maximum annual benefit payable at the Normal Retirement Age to a dollar indexed for inflation. That limit is \$195,000 for both 2010 and 2011. Normal Retirement Age for these purposes is age 62. These are the limits in simplified terms. They must generally be adjusted based on each participant's circumstances, for such things as age at retirement, form of benefits chosen and after tax contributions.

Benefits in excess of the limits may be paid through a qualified governmental excess plan that meets the requirements of Section 415(m).

Legal Counsel's review and interpretation of the law and regulations should be sought on any questions in this regard.

Contributions rates determined in this valuation have not been reduced for the Section 415 limitations. Actual limitations will result in gains as they occur.

SECTION 3: Supplemental Information for the Alameda County Employees' Retirement Association

EXHIBIT J

Definitions of Pension Terms

The following list defines certain technical terms for the convenience of the reader:

Assumptions or Actuarial Assumptions:

The estimates on which the cost of the Plan is calculated including:

- (a) Investment return — the rate of investment yield that the Plan will earn over the long-term future net, in this case, of investment and administrative expenses.
- (b) Mortality rates — the death rates of employees and pensioners; life expectancy is based on these rates;
- (c) Retirement rates — the rate or probability of retirement at a given age; and
- (d) Turnover rates — the rates at which employees of various ages are expected to leave employment for reasons other than death, disability, or retirement.

Normal Cost:

The amount of contributions required to fund the level cost allocated to the current year of service.

Actuarial Accrued Liability For Actives:

The equivalent of the accumulated normal costs allocated to the years before the valuation date.

Actuarial Accrued Liability For Pensioners:

The single sum value of lifetime benefits to existing pensioners. This sum takes account of life expectancies appropriate to the ages of the pensioners and the interest that the sum is expected to earn before it is entirely paid out in benefits.

Unfunded (Overfunded) Actuarial Accrued Liability:

The extent to which the actuarial accrued liability of the Plan exceeds (or is exceeded by) the assets of the Plan. There are many approaches to paying off the unfunded or overfunded actuarial accrued liability, from meeting the interest accrual only to amortizing it over a specific period of time.

SECTION 3: Supplemental Information for the Alameda County Employees' Retirement Association

**Amortization of the Unfunded
(Overfunded) Actuarial
Accrued Liability:**

Payments made over a period of years equal in value to the Plan's unfunded or overfunded actuarial accrued liability.

Investment Return:

The rate of earnings of the Plan from its investments, including interest, dividends and capital gain and loss adjustments, computed as a percentage of the average value of the fund. For actuarial purposes, the investment return often reflects a smoothing of the capital gains and losses to avoid significant swings in the value of assets from one year to the next.

⁽⁴⁾ Includes \$3,091,493 in reimbursement of implicit retiree health benefit subsidy paid by the County for 2007.

⁽⁵⁾ Includes \$4,149,463 in reimbursement of implicit retiree health benefit subsidy paid by the County for 2008.

⁽⁶⁾ Includes \$5,287,767 in reimbursement of implicit retiree health benefit subsidy paid by the County for 2009.

⁽⁷⁾ Includes \$4,500,000 in reimbursement of implicit retiree health benefit subsidy paid by the County for 2010 (estimate, provided by ACERA).

SECTION 4: Reporting Information for the Alameda County Employees' Retirement Association

EXHIBIT III

Supplementary Information Required by GASB

Valuation date	December 31, 2010
Actuarial cost method	Entry Age Normal Cost Method
Amortization method	Level percent of payroll for total unfunded liability
Remaining amortization period	22 years (declining) for all UAAL
Asset valuation method	The Actuarial Value of Assets is determined by phasing in any difference between actual and expected market return over 10 six-month interest crediting periods. The Valuation Value of Assets is the Actuarial Value of Assets reduced by the value of the non-valuation reserves.
Actuarial assumptions:	
Investment rate of return	7.90%
Inflation rate	3.50%
Real across-the-board salary increase	0.50%
Projected salary increases*	General: 4.70% to 8.00% and Safety: 5.30% to 9.10%
Cost of living adjustments	3.00% of Tier 1 and Tier 3 retirement income and 2.00% of Tier 2 retirement income
Plan membership:	
Retired members and beneficiaries receiving benefits	7,558
Terminated members entitled to, but not yet receiving benefits	1,785
Active members	<u>10,879</u>
Total	20,222

* Includes inflation at 3.50% plus real across-the-board salary increase of 0.50% plus merit and longevity increases. See Exhibit IV for these increases.

⁽¹⁾ Retirement rate is 100% after a member accrues a benefit of 100% of final average earnings.

SECTION 4: Reporting Information for the Alameda County Employees' Retirement Association

Retirement Age and Benefit for Deferred Vested Members:

For deferred vested members, retirement age assumptions are as follows:

General Age:	58
Safety Age:	55

For future deferred vested members who terminate with less than five years of service and are not vested, we assume that they will retire at age 70 for both General and Safety if they decide to leave their contributions on deposit.

We assume that 35% of future General and 45% of future Safety deferred vested members will continue to work for a reciprocal employer. For reciprocals, we assume 5.10% and 5.40% compensation increases per annum for General and Safety, respectively.

Future Benefit Accruals:

1.0 year of service per year of employment plus 0.008 year of additional service to anticipate conversion of unused sick leave for each year of employment.

Unknown Data for Members:

Same as those exhibited by members with similar known characteristics. If not specified, members are assumed to be male.

Inclusion of Deferred Vested Members:

All deferred vested members are included in the valuation.

Percent Married:

75% of male members; 55% of female members.

Age of Spouse:

Female (or male) spouses are 3 years younger (or older) than their spouses.

Net Investment Return:

7.90%, net of administration and investment expenses (approximately 1% of assets)

Employee Contribution Crediting Rate:

7.90%, compounded semi-annually.

Consumer Price Index:

Increase of 3.50% per year, retiree COLA increases due to CPI subject to a 3% maximum change per year for General Tier 1, General Tier 3 and Safety Tier 1 and 2% maximum change per year for General Tier 2, Safety Tier 2, Safety Tier 2C, and Safety Tier 2D.

SECTION 4: Reporting Information for the Alameda County Employees' Retirement Association

Salary Increases:

Annual Rate of Compensation Increase (%)		
Inflation: 3.50%; an additional 0.50% “across the board” salary increases (other than inflation); plus the following Merit and Promotional increases based on age.		
Age	General	Safety
25	4.00%	5.10%
30	3.00%	3.50%
35	2.40%	2.20%
40	1.80%	1.50%
45	1.50%	1.50%
50	1.10%	1.40%
55	1.00%	1.30%
60	0.80%	0.00%
65	0.70%	0.00%

Actuarial Value of Assets:

The Actuarial Value of Assets is determined by phasing in any difference between actual and expected market return over 10 six-month interest crediting periods.

Valuation Value of Assets:

The Actuarial Value of Assets reduced by the value of the non-valuation reserves.

Actuarial Cost Method:

Entry Age Normal Actuarial Cost Method. Entry Age is the age at the member’s hire date. Actuarial Accrued Liability is calculated on an individual basis and is based on costs allocated as a level percentage of compensation. The Normal Cost is calculated on an aggregate basis by taking the Present Value of Future Normal Costs divided by the Present Value of Future Salaries to obtain in a normal cost rate. This normal cost rate is then multiplied by the total of current salaries.

SECTION 4: Reporting Information for the Alameda County Employees' Retirement Association

Terminal Pay Assumptions:

Additional pay elements are expected to be received during a member's final average earnings period. The percentages, added to the final year salary, used in this valuation are:

	<u>Service Retirement</u>	<u>Disability Retirement</u>
General Tier 1	8.0%	7.0%
General Tier 2	3.0%	2.8%
General Tier 3	8.0%	7.0%
Safety Tier 1	9.5%	8.5%
Safety Tier 2	4.0%	2.8%
Safety Tier 2C	4.0%	2.8%
Safety Tier 2D	4.0%	2.8%

Changes in Actuarial Assumptions: There were no changes in assumptions from the December 31, 2009 valuation.

SECTION 4: Reporting Information for the Alameda County Employees' Retirement Association

EXHIBIT V

Summary of Plan Provisions

This exhibit summarizes the major provisions of ACERA included in the valuation. It is not intended to be, nor should it be interpreted as, a complete statement of all plan provisions.

Membership Eligibility:

	Membership with ACERA usually begins with the second pay period following appointment to a full time County or member District position. ACERA members who change from full time to part time may elect to continue membership at ACERA.
<i>General and Safety Tier 1</i>	All General and Safety members hired on or before June 30, 1983.
<i>General and Safety Tier 2</i>	All General and Safety members hired after June 30, 1983.
<i>General Tier 3</i>	Only General LARPD members hired before October 1, 2008 who elected the 2.5% at 55 formula and all General LARPD members hired after that date.
<i>Safety Tier 2C</i>	All Safety members in the Sheriff's Department (excluding Probation Officers) hired on or after October 17, 2010 who elected the 2% at 50 formula.
<i>Safety Tier 2D</i>	All Safety members in the Sheriff's Department (excluding Probation Officers) hired on or after October 17, 2010 who elected the 3% at 55 formula.

**Final Compensation for
Benefit Determination:**

<i>General Tier 1, General Tier 3 and Safety Tier 1</i>	Highest consecutive twelve months of compensation earnable (§31462.1) (FAS1).
<i>General Tier 2, Safety Tier 2, Safety Tier 2C, and Safety Tier 2D</i>	Highest consecutive thirty-six months of compensation earnable (§31462) (FAS3).

SECTION 4: Reporting Information for the Alameda County Employees' Retirement Association

Service: Years of service (Yrs).

Service Retirement Eligibility:

General Age 50 with 10 years of service, or age 70 regardless of service, or after 30 years, regardless of age (§31672).

Safety Age 50 with 10 years of service, or after 20 years, regardless of age (§31663.25).

Benefit Formula:

	Retirement Age	Benefit Formula
<i>General Tier 1</i> (§31676.12)	50	$(1.34\% \times \text{FAS1} - 1/3 \times 1.34\% \times \$350 \times 12) \times \text{Yrs}$
	55	$(1.77\% \times \text{FAS1} - 1/3 \times 1.77\% \times \$350 \times 12) \times \text{Yrs}$
	60	$(2.34\% \times \text{FAS1} - 1/3 \times 2.34\% \times \$350 \times 12) \times \text{Yrs}$
	62 or later	$(2.62\% \times \text{FAS1} - 1/3 \times 2.62\% \times \$350 \times 12) \times \text{Yrs}$

	Retirement Age	Benefit Formula
<i>General Tier 2</i> (§31676.1)	50	$(1.18\% \times \text{FAS3} - 1/3 \times 1.18\% \times \$350 \times 12) \times \text{Yrs}$
	55	$(1.49\% \times \text{FAS3} - 1/3 \times 1.49\% \times \$350 \times 12) \times \text{Yrs}$
	60	$(1.92\% \times \text{FAS3} - 1/3 \times 1.92\% \times \$350 \times 12) \times \text{Yrs}$
	62	$(2.09\% \times \text{FAS3} - 1/3 \times 2.09\% \times \$350 \times 12) \times \text{Yrs}$
	65	$(2.43\% \times \text{FAS3} - 1/3 \times 2.43\% \times \$350 \times 12) \times \text{Yrs}$

	Retirement Age	Benefit Formula
<i>General Tier 3</i> (§31676.18)	50	$(2.00\% \times \text{FAS1} \times \text{Yrs})$
	55 or later	$(2.50\% \times \text{FAS1} \times \text{Yrs})$

SECTION 4: Reporting Information for the Alameda County Employees' Retirement Association

	Retirement Age	Benefit Formula
<i>Safety Tier 1 (Non-Integrated)</i> (§31664.1)	50	(3.00% x FAS1 x Yrs)
	55 or later	(3.00% x FAS1 x Yrs)
<i>Safety Tier 2 (Non-Integrated)</i> (§31664.1)	50	(3.00% x FAS3 x Yrs)
	55 or later	(3.00% x FAS3 x Yrs)
<i>Safety Tier 2C (Non-Integrated)</i> (§31664)	50	(2.00% x FAS3 x Yrs)
	55 or later	(2.62% x FAS3 x Yrs)
<i>Safety Tier 2D (Non-Integrated)</i> (§31664.2)	50	(2.29% x FAS3 x Yrs)
	55 or later	(3.00% x FAS3 x Yrs)
Maximum Benefit:	100% of Highest Average Compensation (§31676.1, §31676.12, §31676.18, §31664, §31664.1, and §31664.2).	

Ordinary Disability:

General Tier 1, Tier 2 and Tier 3

Eligibility

Five years of service (§31720).

Benefit Formula

1.8% per year of service for General Tier 1 and Tier 3 and 1.5% per year of service for General Tier 2. If the benefit does not exceed one-third of Final Compensation, the service is projected to 62 for General Tier 1 and Tier 3, and to age 65 for General Tier 2, but the total benefit cannot be more than one-third of Final Compensation (§31727 and §31727.2).

SECTION 4: Reporting Information for the Alameda County Employees' Retirement Association

Safety Tier 1, Tier 2, Tier 2C, and Tier 2D

<i>Eligibility</i>	Five years of service (§31720).
<i>Benefit Formula</i>	1.8% per year of service. If the benefit does not exceed one-third of Final Compensation, the service is projected to 55, but the total benefit cannot be more than one-third of Final Compensation (§31727.2).

Line-of-Duty Disability:

All Members

<i>Eligibility</i>	No age or service requirements (§31720).
<i>Benefit Formula</i>	50% of the Final Compensation or 100% of Service Retirement benefit, if greater (§31727.4).

Pre-Retirement Death:

All Members

<i>Eligibility</i>	None.
<i>Basic lump sum benefit</i>	Refund of employee contributions with interest, plus one month's compensation for each year of service, to a maximum of six month's compensation (§31781).
<i>Death in line of duty</i>	50% of Final Compensation or 100% of Service Retirement benefit, if greater, payable to spouse or minor children (§31787).

OR

Vested Members

<i>Eligibility</i>	Five years of service.
<i>Basic benefit</i>	60% ⁽¹⁾ of the greater of Service or Ordinary Disability Retirement benefit payable to surviving eligible spouse (§31765.1, §31781.1), in lieu of the basic lump sum benefit above.
<i>Death in line of duty</i>	50% of Final compensation or 100% of Service Retirement benefit, if greater, payable to spouse or minor children (§31787).

⁽¹⁾ The Retirement Board also provides an Active Death Equity Benefit (ADEB) that increases the 60% continuance to 100% continuance. The ADEB benefit is funded by the Supplemental Retirees Benefit Reserve (SRBR) and the cost associated with the ADEB is excluded from this valuation.

SECTION 4: Reporting Information for the Alameda County Employees' Retirement Association

Death After Retirement:

All Members

Service or

Ordinary Disability Retirement

60% of member's unmodified allowance continued to eligible spouse (§31760.1) and \$5,000⁽¹⁾ lump sum benefit payable to member's beneficiary (§31789.3). An eligible spouse is a surviving spouse who was married to the member at least one year prior to the date of retirement (§31760.1).

Line-of-Duty Disability

100% of member's allowance continued to eligible spouse (§31786).

Withdrawal Benefits:

Less than Five Years of Service

Refund of accumulated employee contributions with interest, or earned benefit at age 70 (§31628). Effective January 1, 2003, a member may also elect to leave contributions on deposit in the retirement fund (§31629.5).

Five or More Years of Service

If contributions left on deposit, entitled to earned benefits commencing at any time after eligible to retire (§31700).

Post-retirement

Cost-of-Living Benefits:

General Tier 1, General Tier 3 and Safety Tier 1

Future changes based on Consumer Price Index to a maximum of 3% per year; excess "banked" (§31870.1).

General Tier 2, Safety Tier 2, Safety Tier 2C, and Safety Tier 2D

Future changes based on Consumer Price Index to a maximum of 2% per year; excess "banked" (§31870).

County Contributions:

The amortization period for Unfunded Actuarial Accrued Liability is amortized over a declining 22-year period.

⁽¹⁾ \$750 is funded by the employer. \$4,250 is funded by the Supplement Retirees Benefit Reserve. These benefits are excluded from the valuation.

SECTION 4: Reporting Information for the Alameda County Employees' Retirement Association

Supplemental Benefit:	Non-vested supplemental COLA and medical benefits are also paid from the Supplemental Retirees Benefit Reserve to eligible retirees and survivors. These benefits have been excluded from this valuation.
Member Contributions:	Please refer to Appendix A for specific rates.
<i>General Tier 1</i>	
<i>Basic</i>	Provide for an average annuity at age 60 equal to 1/100 of FAS1 (§31621.2).
<i>Cost-of-Living</i>	Provide for one-half of future Cost-of-Living costs.
<i>General Tier 2</i>	
<i>Basic</i>	Provide for an average annuity at age 60 equal to 1/120 of FAS3 (§31621).
<i>Cost-of-Living</i>	Provide for one-half of future Cost-of-Living costs.
<i>General Tier 3</i>	
<i>Basic</i>	Provide for an average annuity at age 55 equal to 1/100 of FAS1 (§31621.8).
<i>Cost-of-Living</i>	Provide for one-half of future Cost-of-Living costs.
<i>Safety</i>	
<i>Basic</i>	Provide for an average annuity at age 50 equal to 1/100 of FAS1 (FAS3 for Tier 2, Tier 2C, and Tier 2D) (§31639.25). As instructed by ACERA, we have also included a 3% cost sharing contribution that we understand will be paid by Safety Tier 1 and Tier 2 members even after they attain 30 years of service. For Safety Tier 2C members, there are no cost-sharing contributions. For Safety Tier 2D members, the cost-sharing contribution rate is 5% of salary for the first 5 years of employment and 3% of salary for each subsequent year of employment (even after the member attains 30 years of service).
<i>Cost-of-Living</i>	Provide for one-half of future Cost-of-Living costs.

SECTION 4: Reporting Information for the Alameda County Employees' Retirement Association

Other Information: Safety members with 30 or more years of service are exempt from paying member contributions. This also applies for General members hired on or before March 7, 1973.

Plan Amendment: Effective October 17, 2010, all new members hired in the Sheriff's Department (excluding Probation Officers) can elect to enter either Safety Tier 2C (2% @ 50 formula) or Safety Tier 2D (3% @ 55 formula).

NOTE: *The summary of major plan provisions is designed to outline principal plan benefits as interpreted for purposes of the actuarial valuation. If the Association should find the plan summary not in accordance with the actual provisions, the Association should alert the actuary so they can both be sure the proper provisions are valued.*
