• Average service credit at retirement –		
Faculty	26	years
Management/Senior Professional	22	years
Professional/Support Staff	15	years
• Average annual UCRP income –		
Faculty	\$55,000	
Management/Senior Professional	\$28,020	
Professional/Support Staff	\$13,196	
Survivor/Reneficiary	5.003	recipients
Survivor/Beneficiary Disabled	5,083 2,129	recipients recipients

The University of California Retirement Plan (UCRP or the Plan) is a valuable component of the comprehensive benefits package offered to employees of the University of California (the University), its affiliate, Hastings College of the Law, and Associated Students of UCLA (ASUCLA). The Plan is a governmental defined benefit pension plan qualified under §401(a) of the Internal Revenue Code (IRC).

The University's pension program dates back to 1904, with a plan that provided for the purchase of commercial annuities for retiring professors at UC Berkeley and UC San Francisco. The current Plan was designed in 1961, before the University's participation in Social Security and before the introduction of employee life and disability insurance coverage. Over the years, the Plan has evolved to include provisions for:

- basic retirement income with four payment options;
- · disability benefits;
- · death benefits;
- preretirement survivor benefits; and
- annual, automatic adjustments for increases in the cost of living for retirees and inactive members.

Further, in lieu of lifetime retirement benefits, members may choose a refund of their accumulated Plan contributions and earnings or, if eligible to retire, they may elect a lump sum payment equal to the present value of their accrued retirement benefit.

At June 30, 2003, active UCRP members included 121,351 employees at the University's 10 campuses, five medical centers, three Department of Energy laboratories, Hastings College of the Law, and ASUCLA.

The President of the University of California is the Plan Administrator and delegates the responsibility for the day-to-day management and operation of the Plan to the Human Resources and Benefits department. This department conducts policy research, implements regulations to preserve the Plan's qualification with the Internal Revenue Service, and provides member recordkeeping, accounting and reporting, and receipt and disbursement of Plan assets to eligible members.

PLAN PROGRESSION

1904	Commercial annuities equal to two-thirds salary for faculty aged 70 or older with 20 years of service.
1924	Pension and Retiring Annuities System (PRAS) pension plan introduced for faculty and high-ranking administrators.
1937	Pension plan coverage established for nonacademic employees through CalPERS.
1961	PRAS terminated due to insolvency and UCRP established to provide retirement, disability, and preretirement survivor benefits to all University career employees.
1971	Annual 2 percent (maximum) COLAs applied to retirement, survivor and disability benefits.
1976	Social Security coverage offered to UCRP members.
1990	Employer/employee UCRP contributions suspended.
1991-94	Offered a total of three early retirement incentive programs to UCRP members and one to members of CalPERS.
1992-94	Made a total of five Capital Accumulation Provision (CAP) allocations in behalf of eligible members.
2001	Modified membership eligibility to include employees who work 1,000 hours in a 12-month period and increased UCRP age factors to enhance retirement benefits.
2002-03	Made two additional Capital Accumulation Provision (CAP II) allocations in behalf of eligible members.

The following Plan changes occurred during fiscal year 2002–2003. These changes were mandated by legislation or recommended by the President of the University and approved by The Regents.

All currently effective Plan provisions are contained in the University of California Retirement Plan document.

DATE CHANGE

July 2002	Amended the Plan to provide preretirement survivor income, the death-while-eligible-to-retire benefit, and the postretirement survivor continuance to eligible same sex and opposite sex domestic partners of Plan members. The provisions apply to eligible active, disabled and inactive Plan members; they do not apply to retirees with retirement dates of June 30, 2002, or earlier.
	Added concurrent retirement provisions for members of the California State Teachers' Retirement System (CalSTRS). The provision enables qualified members to have STRS compensation used to calculate UCRP benefits if it is higher than their UCRP covered compensation. The provision also enables them to qualify for UCRP retirement benefits with less than five years of UCRP service credit if they are eligible to retire under CalSTRS. The UCRP concurrent retirement provisions apply to UCRP members who retire after July 1, 2002, provided they are active Plan members on or after July 1, 2002.
	Amended the Plan to comply with IRC §401(a)(17) dollar limits for annual earnings on which retirement benefits (and contributions, if any) may be based. The earnings limit is \$200,000 for employees who became Plan members on July 1, 1994, or later. Also, in accordance with the Economic Growth and Tax Relief Reconciliation Act of 2001, the \$200,000 annual limit can apply retroactively to covered compensation received before 2002 for use in the Highest Average Plan Compensation (HAPC) calculation, as long as these members earn UCRP service credit on or after July 1, 2002.
November 2002	Amended the Plan to provide UCRP service credit and benefits to former UCSF Stanford Health Care employees covered by that institution's defined benefit plan, the Staff Pension Plan.
April 2003	Provided a CAP II allocation equal to 5 percent of active members' covered compensation received during the previous 12 months.
June 2003	Amended the definitions of HAPC and final salary and changed service credit accrual provisions to accommodate members participating in the Staff and Academic Reduction in Time program.
	Changed the definition of the normal retirement date for Plan members to age 60 with five years or more of service credit.
	Amended service credit buyback provisions for members with a monthly installment buyback in progress to allow them to pay off their buyback balance in an after-tax lump sum when they leave UC employment. To be eligible for this option, the member must have completed at least one year of payments.

Employees participate in the Plan in one of four membership classifications:

- Members with Social Security coverage
- Members without Social Security coverage
- Safety Members (police and firefighters)
- Tier Two

The following table reflects Plan membership by classification over the past 10 years.

PLAN MEMBERSHIP

Active Membership

Year Ended June 30	With Social Security	Without Social Security	Safety Members	Tier Two Members	Total Active	Inactive Members/ Other*	Total**
2003	113,913	6,982	400	56	121,351	31,262	152,613
2002	109,708	7,614	398	56	117,776	25,198	142,974
2001	101,261	8,127	396	64	109,848	23,278	133,126
2000	94,361	8,558	393	70	103,382	21,950	125,332
1999	88,723	8,923	395	82	98,123	22,109	120,232
1998	83,490	9,388	401	84	93,363	21,998***	115,361
1997	83,100	9,820	395	89	93,404	28,778	122,182
1996	81,510	10,197	392	95	92,194	25,422	117,616
1995	80,246	10,584	390	98	91,318	21,913	113,231
1994	77,421	11,164	391	101	89,077	18,734	107,811

^{*} Includes terminated nonvested employees eligible for a refund of Plan accumulations or Capital Accumulation Provision payment.

^{**} Excludes UCRP benefit recipients, as accounted for in the table on page 7.

^{***} The decrease in inactive membership since fiscal year 1997-98 is attributable to a change in the definition of inactive membership; i.e., inactive members are separated University employees with less than 5 years service credit and no UCRP account balance.

The Regents' funding policy has been to establish annual contributions as a percentage of payroll by using the entry age normal actuarial funding method. In fiscal year 1990–91, The Regents adopted a full funding policy. Under that policy, The Regents suspend contributions to the Plan

when the market value or the actuarial value of Plan assets (whichever is smaller) exceeds the lesser of the actuarial accrued liability plus normal cost or 150 percent of current liability plus normal cost.

UCRP FUNDING STATUS

10	in	mil	lions

Plan Year Beginning July 1	(a) Actuarial Value of Assets in Excess of Actuarial Accrued Liability	(b) Assets in Excess of Full Funding Liability	(c) Market Value of Assets in Excess of Actuarial Accrued Liability
2003	\$ 8,474.5	\$ 1,195.0	\$ 2,372.0
2002	11,549.2	3,247.3	4,342.2
2001	13,103.3	10,443.6	11,418.7
2000	12,959.0	12,110.3	18,003.7
1999	9,929.8	9,168.6	15,942.3
1998	6,515.7	5,816.8	14,105.3
1997	3,593.9	2,932.1	9,871.8
1996	1,810.6	1,186.8	5,816.9
1995	1,091.5	508.0	3,513.3
1994	1,241.4	719.8	1,001.5

⁽a) The Actuarial Value of Assets (AVA) is determined using the Adjusted Market Value Method. The AVA is calculated using the Moving Average Market Value Method. The Actuarial Accrued Liability (AAL) is based on the funding method used to value the Plan. The AAL is equal to the present value of benefits to be paid less the present value of all future contributions required to finance the Plan.

⁽b) Assets: The lesser of the AVA or the Market Value of Assets. Full Funding Liability: IRC §412, the full funding limitation applied to the Plan, is the lesser of (a) the actuarial accrued liability plus normal cost, or (b) 150 percent of the current liability plus normal cost.

⁽c) Market Value of Assets is the June 30, 2003, net asset value.

The Plan paid approximately \$853 million in retirement, disability, and preretirement survivor benefits to 37,867 members and their beneficiaries during fiscal year 2002-2003.

Retirement payments include cost-of-living adjustments, and payments to survivors include basic death payments. The table below reflects total benefits paid in each category over the past 10 years.

UCRP BENEFIT PAYMENTS

(\$ in thousands)

Year Ended			Death &	
June 30	Retirement	Disability	Survivor	Total*
2003	\$794,861	\$29,311	\$28,534	\$852,706

INVESTMENT MANAGEMENT

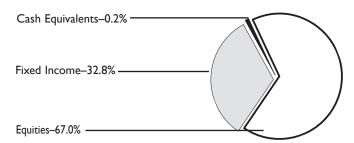

In a defined benefit plan such as UCRP, the employer/plan sponsor has a contractual obligation to pay promised benefits, with or without the necessary assets segregated in a trust fund. The employer bears the mortality and investment risk because members' benefits are not based on contributions or Plan assets.

As Plan Trustees, the Board of Regents is responsible for the investment of the Plan's assets, consistent with fiduciary laws of the State of California. The Treasurer of the Regents is the investment manager and custodian for the Plan's assets. The Treasurer's function is executed under the policies established by The Regents' Committee on Investments to protect the interests of all Plan members and their beneficiaries.

The assets of the Plan are held separately under a custodial agreement with State Street Bank & Trust Co. The bank carries insurance against loss of property caused by employee dishonesty, theft, misplacement, damage, distribution or mysterious disappearance.

ASSET ALLOCATION

Total Fund. UCRP is a balanced fund, with the majority of the \$35.2 billion investment portfolio invested in domestic and foreign common stocks and fixed income securities. The balance includes high-quality government, corporate, foreign, and mortgage-backed bonds, and a modest allocation to private equity securities

PROXY VOTING POLICY

The Regents, as shareholder, has instructed the Treasurer to vote with management recommendations on most proxy issues that are of a routine business management nature. Proxy issues of a more controversial nature or relating to social matters are examined on a case-by-case basis and voted by the Treasurer according to the Regents' guidelines.

TOTAL INVESTMENT RETURN

The Board of Regents is committed to achieving a longterm total return that meets the Plan's benefit obligations to its members and beneficiaries. In executing investment policy, the Treasurer looks to maximize real, long-term total returns (income plus capital appreciation, adjusted for inflation), while assuming appropriate levels of risk.

ANNUALIZED RATES OF RETURN AT JUNE 30, 2003

	1-Year	5-Year	10-Year	
UCRP Total Fund	5.6%	2.8%	10.1%

Current Policy Benchmarks

- The UCRP Total Fund Policy Benchmark consists of 58% (less the actual Private Equity weight from the prior month end) times the Russell 3000 Tobacco-Free Index, 7% Morgan Stanley Capital International All Country World Index (MSCI ACWI) ex U.S. Index, 5% Lehman Brothers Treasury Inflation Protected Securities (TIPS) Index, the actual Private Equity weight of the previous month end times the Russell 3000 TF Index +3% (lagged by 3 months) and 30% Citigroup Large Pension Fund Index, linked to 65% the S&P 500 Index and 35% the Lehman Brothers Long-Term Gov't/Corp Index.
- The Domestic Equity Portfolio Policy Benchmark consists of the Russell 3000 TF Index linked to the S&P 500 Index.
- The Fixed Income Portfolio Policy Benchmark consists of the Citigroup Large Pension Fund Index linked to the Lehman Brothers Long-Term Gov't/Corp Index.
- The TIPS Portfolio Policy Benchmark consists of the Lehman Brothers TIPS Index.
- The Foreign Equity Policy Benchmark consists of the MSCI ACWI ex-U.S. Index linked to the MSCI EMF Index. 5.
- The Private Equity Policy Benchmark consists of the Russell 3000 TF Index + 3% (lagged by three months) linked to the S&P 500 Index + 5%.

QUALITY AND DIVERSIFICATION

The equity portfolio is diversified among multiple strategic economic sectors as illustrated below.

The Equity Portfolio represents 67.0 percent (or \$23.6 billion) of the total Fund and is diversified among domestic, foreign, and private equity securities. The asset mix within the equity portfolio as of June 30, 2003 is 86.8 percent domestic equity, 11.4 percent foreign equity, and 1.8 percent private equity.

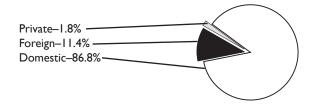

The domestic equity sector (\$20.5 billion) is invested entirely in two index fund portfolios. These two portfolios consist of a core index portfolio (\$6.3 billion) and a transitional index portfolio (\$14.2 billion). The transitional index portfolio was formerly the actively managed sector of the equity portfolio. The core and transitional index portfolios, which comprise the domestic equity sector, are diversified according to the following economic sectors.

EAFE-based index fund portfolio (\$2.3 billion) and emerging market funds portfolio (\$350 million) and private foreign equity (\$102 million). The emerging market funds portfolio is invested in the CGI Emerging Markets Fund, the Genesis Emerging Markets Fund and the Templeton Emerging Markets Fund.

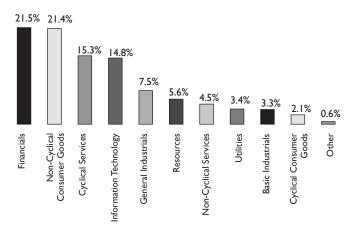

The foreign equity sector (\$2.7 billion) is invested in an

The private equity sector (\$430 million) is invested in venture capital partnerships (\$186 million) and buyout funds (\$244 million).

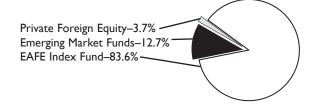

EQUITY PORTFOLIO ASSET ALLOCATION

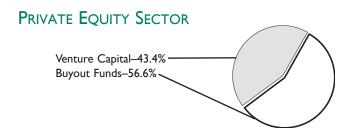

Domestic Portfolio Diversification by Economic Sector

FOREIGN EQUITY SECTOR ALLOCATION

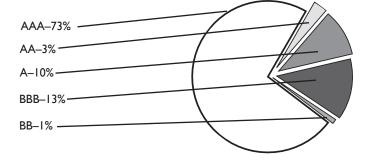

The fixed income portfolio accounts for 33 percent of the total Fund (excluding investments of cash collateral) and is invested primarily in high-quality, call-protected, global bonds.

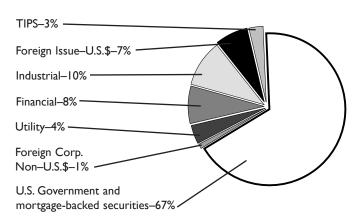

OUALITY

Approximately 70 percent of the fixed income portfolio consists of U.S. government-guaranteed securities, and 76 percent of the portfolio is rated AAA or AA, the two highest rankings assigned by Standard and Poor's.

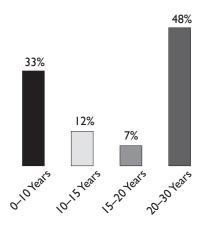

DIVERSIFICATION

Fixed income investments are well diversified among the sectors illustrated at right.

MATURITY STRUCTURE

The weighted duration of the fixed income portfolio is approximately 7 years and the weighted average maturity is approximately 14 years.

U.S. TREASURY OBLIGATIONS:

Guaranteed by the full faith and credit of the United States and rated AAA by Standard & Poor's.

STANDARD & POOR'S BOND RATINGS

AAA: Prime, maximum safety. Extremely strong capacity to pay principal and interest.

AA: High grade, high quality. Very strong capacity to pay principal and interest.

Upper medium investment grade. Strong capacity to pay principal and interest.

BBB: Medium investment grade. Adequate capacity to pay principal and interest.

BB: Speculative characteristics. Exposure to adverse conditions could impair current ability to pay principal and interest.

UCRP MANAGEMENT'S DISCUSSION & ANALYSIS (UNAUDITED)

The objective of Management's Discussion and Analysis is to help readers of the University of California Retirement Plan (the Plan) financial statements better understand the Plan's financial position and operating activities for the fiscal year ended June 30, 2003, with selected comparative information for the year ended June 30, 2002. This discussion should be read in conjunction with the financial statements and the notes to the financial statements.

FINANCIAL HIGHLIGHTS

- The net assets held in trust for pension benefits at June 30, 2003, are \$35.3 billion. The net assets are available to meet the Plan's ongoing obligations to Plan members, retirees and their beneficiaries.
- The net assets of the Plan increased by \$885 million.
- The Plan's total investment rate of return was 5.6 percent in fiscal 2003 compared to (9.2) percent in fiscal 2002.
- As of June 30, 2003, the date of the most recent actuarial valuation, the Plan's funded ratio was 125.7 percent, compared to 138.4 percent as of June 30, 2002. For June 30, 2003, this indicates that for every dollar of benefits due to the Plan's members, assets of \$1.26 are available to cover benefit obligations.

OVERVIEW OF THE FINANCIAL STATEMENTS

This discussion and analysis is intended to serve as an introduction to the Plan's financial statements, which are comprised of the following:

- Statements of Fiduciary Net Assets
- Statements of Changes in Fiduciary Net Assets
- Notes to Financial Statements
- Required Supplementary Information and Note to Required Supplementary Information
- Other Supplementary Information

The Statements of Fiduciary Net Assets presents information on the Plan's assets and liabilities and the resulting net assets held in trust for pension benefits. This statement reflects the Plan's investments at fair value, along with cash and short-term investments, receivables and other assets and liabilities.

The Statements of Changes in Fiduciary Net Assets presents information showing how the Plan's net assets held in trust for pension benefits changed during the years ended June 30, 2003, and 2002. It reflects contributions along with investment income (or losses) during the period from investing and securities lending activities. Deductions for retirement benefits, withdrawals, cost-of-living adjustments, lump sum cashouts, survivor, disability, death benefits and administrative expenses are also presented.

The *Notes to Financial Statements* provides additional information that is essential to a full understanding of the data provided in the financial statements.

The Required Supplementary Information consists of two schedules and a related note concerning the funded status of the Plan. The Note to Required Supplementary Information provides additional trend information as of the valuation date. This information includes actuarial cost method, amortization method, remaining amortization period, asset valuation period and actuarial assumptions.

The *Other Supplementary Information* consists of two schedules concerning the actuarial accrued liability of the Plan and the revenues by source and expenses by type for the past 10 years of the Plan.

FINANCIAL ANALYSIS

The Plan provides retirement benefits to University of California employees. Plan benefits are funded by member and employer contributions and by investment income. The Plan's net assets held in trust for benefits as of June 30, 2003, amounted to \$35.3 billion, an increase of \$885 million or 2.6 percent from \$34.4 billion as of June 30, 2002.

Additions to the Plan's net assets held in trust for benefits include contributions and investment income. Member and employer contributions during the fiscal year ended June 30, 2003, amounted to \$7.9 million primarily for a transfer of plan assets from the UCSF Stanford Health Care Staff Pension Plan and service credit buybacks. The Plan recognized net investment income of \$1.9 billion for the 2003 fiscal year, compared with a net investment loss of \$3.5 billion for the 2002 fiscal year. The investment gain was due primarily to a recovery in the domestic and foreign equity markets and the decline in interest rates during the 2002-2003 fiscal year.

Deductions from the Plan's net assets held in trust for benefits include retirement benefit payments, member withdrawals, cost-of-living adjustments, lump sum cashouts, preretirement survivor benefits, disability and death benefits and administrative expenses. For the 2003 fiscal year, deductions amounted to \$1,015.2 million, compared to \$970.5 million in fiscal 2002. The increase in deductions was primarily due to an increase in retirement benefit payments and cost-of-living adjustments.

FIDUCIARY NET ASSETS	(\$ in t	(\$ in thousands)

INVESTMENTS

At June 30, 2003, the Plan held \$23.6 billion in domestic, foreign and private equity securities, a increase of \$2.2 billion from the 2002 fiscal year. The domestic equity securities component return was 0.3 percent for the 2003 fiscal year, compared to the policy benchmark return of 0.7 percent. The foreign equity securities component return was (4.0) percent for the 2003 fiscal year, compared to the Plan's policy benchmark return of (4.2) percent. The private equity securities component return was (21.5) percent for the 2003 fiscal year, compared to the policy benchmark return of (22.3) percent. The Plan held \$11.5 billion in U.S. government, other U.S. dollardenominated and foreign fixed income securities—a decrease of \$1.1 billion from the 2002 fiscal year. The fixed income securities component earned a total return of 16.0 percent, compared to the Plan's policy benchmark return of 15.1 percent. The Plan's total fund investment rate of return was 5.6 percent in fiscal 2003, compared to the Plan's total fund policy benchmark return of 5.4 percent.

FUNDED STATUS

The Plan's actuarial value of assets available for benefits was \$41.4 billion as of June 30, 2003— a decrease of \$0.2 billion (0.5 percent) from the 2002 fiscal year. The actuarial accrued liability was \$32.9 billion—an increase of \$2.8 billion (9.5 percent) from the 2002 fiscal year.

The Plan's actuarial surplus was \$8.5 billion—a decrease of \$3.0 billion (26.6 percent) from the 2002 fiscal year. The funded percentage at June 30, 2003, was 125.7 percent compared to 138.4 percent for the 2002 fiscal year.

An analysis of the funding progress, employer contributions, and a discussion of actuarial assumptions and methods is set forth in the required supplementary information section of the financial statements.

FIDUCIARY RESPONSIBILITIES

The Board of Regents of the University of California (the Regents) is fiduciary of the Plan. Under law, the assets can only be used for the exclusive benefit of Plan members, retirees, beneficiaries and administration expenses.

REQUESTS FOR INFORMATION

This financial report is designed to provide the Regents, the UCRS Advisory Board, members, retirees and others with a general overview of the Plan's financial posture and to account for the money it receives. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to:

Report of Independent Auditors

To The Regents of the University of California:

In our opinion, the accompanying statements of fiduciary net assets and the related statements of changes in fiduciary net assets (presented on pages 16 through 25) present fairly, in all material respects, the financial position of the University of California Retirement Plan (the Plan) at June 30, 2003 and 2002, and the changes in fiduciary net assets for the years then ended in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Plan's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America, which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Note 1, the financial statements of the Plan are intended to present the fiduciary net assets and the changes in fiduciary net assets of only that portion of activities that are attributable to the Plan. They do not purport to, and do not, present fairly the financial position of the University of California as of June 30, 2003 and 2002, and the results of its operations for the years then ended in conformity with accounting principles generally accepted in the United States of America.

Years Ended June 30, 2003, and 2002

NOTE I—DESCRIPTION OF THE PLAN AND SIGNIFICANT ACCOUNTING POLICIES GENERAL INTRODUCTION—

The University of California Retirement Plan (the Plan) is a defined benefit plan providing lifetime retirement income, disability protection, death benefits, and preretirement survivor benefits to eligible employees of the University of California (the University) and its affiliate. Established in 1961, membership in the Plan is required for all employees appointed to work at least 50% time for a year or more. Effective January 1, 2001, employees with with limited appointments, employees in contract positions, employees in "noncareer" positions at the Department of Energy laboratories, and certain academic employees may become eligible for UCRP membership after working 1,000 hours in a rolling, continuous 12-month period. Generally, five years of service are required for entitlement to Plan benefits. The amount of the pension benefit is determined by salary rate, age and years of service credit. An offset formula is used for Social Security members. The maximum monthly benefit is 100 percent of the employee's highest average compensation over a 36-month period, adjusted for annual Internal Revenue Code (IRC) §401(a)(17) and §415 limitations. Cost-of-living adjustments (COLAs) are tied to the Consumer Price Index (CPI), according to and limited by a specified formula. Ad hoc COLAs are subject to funding availability. The Plan also offered three Voluntary Early Retirement Incentive Programs (VERIPs) adopted by The Regents of the University of California (The Regents), which granted enhanced benefits to certain eligible members upon electing early retirement. The VERIPs are known as Plus 5 (fiscal year 1991-1992), Take 5 (fiscal year 1992-1993) and VERIP III (fiscal year 1993-1994).

The Plan includes four membership classifications: members with Social Security, members without Social Security, Safety members (police and firefighters), and Tier Two members. At June 30, 2003, there were 113,913 active members with Social Security, 6,982 active members without Social Security, 400 active Safety members and 56 active Tier Two members.

Members' contributions are recorded separately and accrue interest at an annual compounded rate of 6 percent, credited monthly. Upon termination, members may elect a refund of their contributions plus accumulated interest; vested terminated members who are eligible to retire may

also elect a lump sum payment equal to the present value of their accrued benefits. Both actions thereby forfeit the member's rights to further accrued benefits.

From July 1, 1966, to June 30, 1971, the Plan maintained a noncontributory period for most members; contributions were required only from members who had reached age 30 and had at least one year of service. Plan 02 accounts were established to keep track of contributions that would have been deducted had a member been contributing during this period. Future retirement benefits for members with Plan 02 accounts are reduced to account for the contributions that were not made, unless the member repays the Plan 02 balance.

For the period from July 1, 1987, to July 1, 1990, qualifying Plan members could elect to participate in noncontributory Plan membership known as Tier Two. Tier Two provides a lower level of retirement income, disability protection and survivor benefits, calculated using specific Tier Two formulas based on the member's salary rate, age and years of service credit.

Plan members may also have a balance in the Plan consisting of Capital Accumulation Provision (CAP) allocations, which were credited in behalf of eligible members on various dates in 1992, 1993, 1994, 2002 and 2003. Provided to supplement basic Plan benefits, the allocations were equal to a percentage of the eligible member's covered compensation paid during the specified period. The CAP balance is generally payable in a lump sum at retirement or separation from service and includes interest credited monthly equal to an annual percentage yield of 8.5 percent for allocations 1992, 1993, and 1994. For allocations made in 2002 and 2003, the interest credited monthly is equal to the actuarial investment rate of return assumption of the Plan, which equates to an annual percentage yield (APY) of 7.5 percent. The APY applied to the 2002 and 2003 allocation will vary according to changes in the investment rate of return assumption.

At June 30, 2003, Plan membership consisted of 37,867 retirees and beneficiaries currently receiving benefits, 20,418 terminated vested employees entitled to benefits but not yet receiving them and 10,844 terminated non-vested employees entitled to a refund of their Plan accumulations or Capital Accumulation Provision payment. Of current employees, 66,268 are fully vested and 55,083 are nonvested active employees covered by the Plan.

Employer contributions are made to the Plan in behalf of all members. The rate of employer contributions is established annually pursuant to The Regents' funding policy (see Note 4) as a percentage of covered wages, recommended and certified by an enrolled, independent actuary, and approved by the Regents, the Plan's Trustees.

BASIS OF ACCOUNTING—

The financial statements have been prepared in accordance with generally accepted accounting principles, including all applicable effective statements of the Governmental Accounting Standards Board (GASB) and the accrual basis of accounting.

VALUATION OF INVESTMENTS-

Investments are primarily stated at fair value. Generally, securities are valued at the last sale price on the last business day of the fiscal year, as quoted on a recognized exchange or an industry standard pricing service. Securities for which no sale was reported as of the close of the last business day of the fiscal year are valued at the bid market price of a dealer who regularly trades in the security being valued. The fair value of interests in venture capital partnerships is estimated based upon valuations provided by the general partners of the respective partnerships as of March 31, adjusted for cash receipts and cash and securities disbursements through June 30. Because the venture capital partnerships are not readily marketable, their estimated value is subject to uncertainty and, therefore, may differ significantly from the value that would have been used had a ready market for such investments existed. Investments in registered investment companies are valued based upon the net asset value of those companies. Mortgage loans, held as investments, are valued on the basis of their future principal and interest payments discounted at prevailing interest rates for similar instruments.

ACCOUNTING FOR INVESTMENTS—

Investment transactions are recorded on the date the securities are purchased or sold (trade date). Realized gains or losses are recorded as the difference beween the proceeds from the sale and the average cost of the investment sold. Dividend income is recorded on the ex-dividend date, and interest income is accrued as earned.

Investments denominated in foreign currencies are translated into U.S. dollar equivalents using year-end spot foreign currency exchange rates. Purchases and sales of investments and their related income are translated at the rate of exchange on the respective transaction dates. Realized and unrealized gains and losses resulting from foreign currency changes are included in the Plan's Statement of Changes in Net Assets.

ADMINISTRATIVE EXPENSES—

Administrative expenses are incurred in connection with the operation of the Plan for items such as staff salaries and benefits, investment management, information systems, leased space, supplies and equipment, and professional services rendered by the Plan actuary, legal counsel, and independent auditor. Total Plan administrative expenses, which are paid from Plan assets, represent approximately \$25.6 million or 0.07 percent and \$25.4 million or 0.07 percent, respectively, of the net assets held in trust for pension benefits for fiscal years 2003 and 2002.

INCOME TAX STATUS—

The Internal Revenue Service has determined and informed the University by letter dated January 9, 1997, that the Plan and related trust are designed and operated in accordance with applicable sections of the IRC of 1986, as amended, applicable to governmental defined benefit pension plans. The Plan has been amended since receiving the determination letter. The Plan's tax counsel believes that the form of the Plan as currently designed is in material compliance with the applicable requirements of IRC §401(a) and the related trust tax exemption under IRC §501(a).

USE OF ESTIMATES IN THE PREPARATION OF FINANCIAL STATEMENTS-

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of net assets held in trust for pension benefits at the date of the financial statements and the reported amounts of changes in net assets held in trust for pension benefits during the reporting period. Actual results could differ from those estimates.

NOTE 2—INVESTMENTS

The Regents, as the governing Board, is responsible for the management of the Plan's investments and establishes investment policy, which is carried out by the Treasurer.

Investments authorized by the Regents for the Plan include equity securities, fixed-income securities, domestic and foreign index funds and real estate. The equity portion of the investment portfolio may include both domestic and foreign common stocks and preferred stocks, actively managed and passive (index) strategies, along with a modest exposure to private equities. Private equities include venture capital partnerships, buy-out and international funds. The fixed income portion of the investment portfolio may include both domestic and foreign securities, along with certain securitized investments, including mortgage-backed and asset-backed securities.

The Plan's investment portfolio also includes certain foreign denominated securities. To reduce the exposure to foreign currency fluctuations inherent in such investments, the Treasurer may enter into foreign currency forward contracts and options. Under the investment policies, such instruments are not permitted for speculative use or to create leverage.

The Plan participates in the University's Short-Term Investment Pool (STIP). Investments authorized by the Regents for the STIP include fixed income securities with a maximum maturity of five years. Current funds for benefits and administrative expenses are invested in the STIP until expended.

The investments that are owned and not lent, or owned and lent for securities collateral, are insured, registered or held in the Plan's name by the custodial bank as an agent for the Plan. Investments that are owned and lent for cash collateral are held by the custodian and designated as Plan investments in the records of the custodian. Investments that are not categorized include venture capital/private equity funds, mortgage loans, other investments and investments owned and lent for cash collateral.

The total investment return, representing income plus net appreciation (depreciation) on investments, was 5.6 percent and (9.2) percent, respectively, for the years ended June 30, 2003, and 2002.

Net appreciation in the fair value of investments during the year ended June 30, 2003, was \$938.1 million. This amount includes all changes in fair value, including both realized and unrealized gains and losses that occurred during the year. The calculation of realized gains and losses is independent of the net unrealized appreciation or depreciation in the fair value of investments held at year end.

During the year ended June 30, 2003, the Plan realized a net gain of \$2.027 billion (on an average cost basis) from the sale of investments. The unrealized depreciation during the year on investments held at year end by the Plan was \$1.089 billion.

The components of the net depreciation of investments are as follows:

NET APPRECIATION (DEPRECIATION) IN FAIR VALUE OF INVESTMENTS

(\$ in thousands)

	2003	2002
Unrealized Appreciation (Depreciation)		
Equity and private equity securities*	\$(1,537,507)	\$(5,629,676)
Fixed income securities	451,190	(121,773)
Short-Term Investment Pool		(6,195)
Investment of cash collateral	(2,427)	2,531
Net Unrealized Depreciation	(1,088,744)	(5,755,113)
Realized Gains		
Sales of securities	2,026,860	1,193,911
Net Appreciation (Depreciation)	\$ 938,116	\$(4,561,202)

^{*}Includes \$25.7 million and \$315.7 million of net depreciation in estimated fair value of investments related to private equity securities for the years ended June 30, 2003, and 2002, respectively.

NOTE 3—SECURITIES LENDING

The Plan participates in a securities lending program as a means to augment income. Securities are lent to select brokerage firms for which collateral is received in excess of the fair value of such investments during the period of the loan. Collateral may be cash or securities issued by the U.S. government or its agencies, or the sovereign or provincial debt of foreign countries. Any collateral securities cannot be pledged or sold by the Plan unless the borrower defaults.

Loans of domestic equities and all fixed income securities are initially collateralized at 102 percent of the fair value of securities lent. Loans of foreign equities are initially collateralized at 105 percent. All borrowers are required to provide additional collateral by the next business day if the value falls to less than 100 percent of the fair value of securities lent.

Securities loans immediately terminate upon notice by either the Plan or the borrower. Cash collateral received from the borrower, shown as "Collateral held for securities lending" in the financial statements, is invested by the lending agent, as an agent for the University, in a short-term investment fund in the name of the Plan, with guidelines approved by the Treasurer. These short-term investments are shown as investment of cash collateral in the financial statements. At June 30, 2003, and 2002, the securities in this pool had weighted average maturity of 248 and 172 days, respectively.

(\$ in thousands)

Securities lending transactions at June 30, 2003, and 2002 are as follows:

(ψ 111 1	tnousanas)	
2003	2002	
\$ 509,339	\$ 432,380	
431,650	366,098	
4,170,014	4,464,881	
56,332	73,767	
5,167,335	5,337,126	
5,051	19	
713,228	325,992	
718,279	326,011	
\$5,885,614	\$5,663,137	
\$6,167,341	\$5,800,880	
\$5,413,706	\$5,468,665	
	\$ 509,339 431,650 4,170,014 56,332 5,167,335 5,051 713,228 718,279 \$5,885,614	\$ 509,339 \$ 432,380 431,650 366,098 4,170,014 56,332 73,767 5,167,335 5,337,126 \$ 5,051 19 713,228 325,992 718,279 326,011 \$5,885,614 \$5,663,137 \$6,167,341 \$5,800,880

Securities on loan for cash collateral are not required to be categorized. At June 30, 2003, the Plan had no credit risk exposure to borrowers because the amounts the Plan owes the borrowers exceed the amounts the borrowers owe the Plan. The Plan is fully indemnified by its custodial bank against any losses incurred as a result of borrower default.

The Plan receives interest and dividends on the collateral held during the loan period, as well as a fee from the brokerage firm, and is obligated to provide a fee and rebate to the borrower.

NOTE 4—CONTRIBUTIONS AND RESERVES ACTUARIALLY DETERMINED CONTRIBUTION REQUIREMENTS AND CONTRIBUTIONS MADE—

The Regents' funding policy provides for actuarially determined periodic contributions at rates that provide for sufficient assets to be available when benefits are due, measured in line with the minimum contribution requirements set forth in IRC §412. The contribution rate is determined using the entry age normal actuarial funding method. The entry age normal funding method has been utilized since 1975 as the fundamental basis for the valuation of retirement benefits. Under this method, the actuarial present value of the projected benefits of each individual included in an actuarial valuation is allocated on a level basis over the earnings of the individual between entry age and assumed exit age(s). The portion of this actuarial present value allocated to a valuation year is called the normal cost. The portion of this actuarial present value not provided for at a valuation date by the actuarial present value of future normal costs is called the actuarial accrued liability. Under this method, the actuarial gains (losses), as they occur, reduce (increase) the unfunded actuarial accrued liability. Under the current funding policy, the Plan is fully funded at June 30, 2003, and 2002. As of June 30, 2003, and 2002, the difference between the net assets held in trust for pension benefits presented in the Statements of Fiduciary Net Assets and the net assets allocated to fund the actuarial accrued liability (shown on page 28) was as follows:

(\$ in millions)

	2003	2002	
Net Assets Held in Trust for Pension Benefits	\$35,326.8	\$34,441.8	
Difference between smoothed market value, used for the actuarial valuation,			
and fair value, used for financial statement presentation	6,102.5	7,207.0	
Net assets allocated to fund the actuarial accrued liability	\$41,429.3	\$41,648.8	

The difference between smoothed market value and fair value is not considered available by Plan management for purposes of calculating the net assets allocated to fund the actuarially determined accrued liability.

The effect of the Voluntary Early Retirement Incentive Programs on the actuarial accrued liability at June 30, 2003, and 2002, was as follows:

(\$ in millions)

	2003	2002
Actuarial value of assets in excess of actuarial accrued liability		
without VERIPs	\$9,448.7	\$12,537.1
Less unfunded actuarial liability of the VERIPs:		
Plus 5 (fiscal year 1991-1992)	182.7	189.1
Take 5 (fiscal year 1992-1993)	125.7	128.4
VERIP III (fiscal year 1993-1994)	665.8	670.4
Actuarial value of assets in excess of actuarial accrued liability		
with VERIPs - entry age normal cost basis	\$8,474.5	\$11,549.2

Mandatory employee contributions, made as a condition of employment, are based upon covered University wages less a specified monthly reduction, determined periodically by the Regents, as shown below:

MEMBER ASSESSMENT*

	Members Without Social Security		ers With Security	Safety Members	
Effective:		Below Wage Base	Above Wage Base		Monthly Reduction
07/01/93	3.0%	2.0%	4.0%	3.0%	\$19
11/01/90	4.5%	2.0%	4.0%	8.0%	\$19
06/30/90	6.0%	2.0%	4.0%	8.0%	\$19

^{*} The entire member assessment was directed to the Defined Contribution Plan during fiscal year 2002-2003.

At June 30, 2003, and 2002, member accumulations of current employees, including allocated investment income, in the Plan amounted to approximately \$707.3 million and \$734.6 million, respectively. The annually determined rates for employer contributions as a percentage of payroll are based on recommendations of the consulting actuary and in conformance with the full funding definitions set forth in IRC §412. Employer contributions, if any, are credited as a percentage of covered University pay. The recommended employer contributions when combined with member contributions are intended to accumulate sufficient assets to fund the actuarial accrued liability under the entry age normal cost method in order to pay accumulated the Plan benefits to vested members.

EMPLOYER ASSESSMENT

members or their beneficiaries.

Effective:	Members Without Social Security and Tier Two Members	Safety Members
11/01/90	0.00%	0.00%
01/01/90	4.03	3.77

Accumulated Plan benefits are those future benefit payments that are attributable under the Plan's provisions to the service employees have rendered. Accumulated Plan benefits include benefits expected to be paid to (a) retired or terminated members or their beneficiaries, (b) beneficiaries of deceased members and (c) present

Accumulated Plan benefits are based on members' compensation histories and years of service rendered as of the valuation date of June 30, 2003, and 2002.

NOTE 5—CONTRIBUTIONS RECEIVABLE

Contributions receivable includes \$87.2 million and \$91.0 million at June 30, 2003, and 2002, respectively, related to agreements with the State of California (the State) and the University in behalf of the Plan. In 1984, the State agreed to pay the University for contributions due to the Plan of \$66.5 million in 30 annual installments of approximately \$5.9 million, including interest at 8 percent, based on the discount rate used in the 1984 actuarial valuation. Similarly, in fiscal year 1990, the State agreed to pay the University for contributions due to the Plan of \$57.2 million in 30 annual installments of approximately \$5.3 million, including interest at 8.46 percent, based on the discount rate used in the 1990 actuarial valuation.

NOTE 6—PLAN TERMINATION

The Regents intend and expect to continue the Plan indefinitely, but reserve the right to amend or discontinue the Plan at any time provided that any such action shall not lessen accrued benefits. In the event that the Plan is terminated, its assets shall be applied solely for the benefit of retired, vested or active participants and beneficiaries, until all liabilities of the Plan have been satisfied.

Once all liabilities have been satisfied, any excess assets shall revert to the Regents as the Plan's Trustees. Neither the Regents as Trustees nor the University carry termination insurance for the Plan, as the Plan is not subject to ERISA Title IV provisions, nor is it overseen by the Pension Benefit Guaranty Corporation.

ACTUARIAL INFORMATION

Analysis of dollar amounts of the actuarial value of assets available for benefits, actuarial accrued liability, and actuarial value of assets in excess of the actuarial accrued liability in isolation can be misleading. Expressing the actuarial value of assets available for benefits as a percentage of the actuarial accrued liability provides one indication of the funding status on a going-concern basis. Analysis of this percentage over time indicates whether a plan is becoming financially stronger or weaker. Generally, the greater this percentage, the stronger the plan. Trends in

the unfunded actuarial accrued liability or assets in excess of the actuarial accrued liability and annual covered payroll are both affected by inflation. Expressing the unfunded actuarial accrued liability or surplus as a percentage of annual covered payroll generally adjusts for the effects of inflation and aids in the analysis of progress made in accumulating sufficient assets to pay benefits when due. Generally, the greater this percentage, the stronger the plan.

REQUIRED SUPPLEMENTARY SCHEDULE OF FUNDING PROGRESS FOR THE PAST SIX YEARS

REQUIRED SCHEDULE OF EMPLOYER CONTRIBUTIONS

Since 1991, the University has not been required to make employer contributions to the Plan due to the fully funded status of the Plan.

ACTUARIAL INFORMATION

The required supplementary information was determined as part of the actuarial valuation as of the date indicated. Additional information as of the most recent actuarial valuations is as follows:

ADDITIONAL TREND INFORMATION

Valuation Date

As of June 30	2003	2002
Actuarial cost method	Entry Age	Entry Age
Amortization method	Level percent open	Level percent open
Remaining amortization period	8.38 Years	13.25 Years
Asset valuation method	5-Year smoothed market	5-Year smoothed market
Actuarial assumptions:		
Investment rate of return*	7.50%	7.50%
Projected salary increases*	4.5-6.5%	4.5-6.5%
Cost-of-living adjustments	2.00%	2.00%

^{*}Includes inflation assumption at 4% for fiscal year 2002-2003.

The actuarial assumptions are based on the presumption that the Plan will continue in operation. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated Plan benefits.

OTHER SUPPLEMENTARY INFORMATION

The total actuarial accrued liability of the Plan, calculated using the entry age normal cost method, was \$32,954.8 million and \$30,099.6 million at June 30, 2003,

and 2002, respectively. This liability is then compared against the actuarial value of Plan assets to determine the annual required contribution to fund the Plan.

^{*} This includes investment income, net realized gains or losses on the sales of investments, and miscellaneous income net of investment expenses. It does not include unrealized gains or losses in the value of assets.

^{**}Does not include member withdrawals.

^{***}The increase in member withdrawals reflects Capital Accumulation Provision (CAP) payments to members who elected early retirement under the VERIPs.

The objective of Management's Discussion and Analysis is to help readers of the University of California PERS Voluntary Early Retirement Incentive Program (the Plan) financial statements better understand the Plan's financial position and operating activities for the fiscal year ended June 30, 2003, with selected comparative information for the year ended June 30, 2002. This discussion should be read in conjunction with the financial statements and the notes to the financial statements.

FINANCIAL HIGHLIGHTS

- The net assets of the Plan at June 30, 2003, are \$71.5 million. The net assets are available to meet the Plan's ongoing obligations to Plan retirees and their beneficiaries.
- The net assets of the Plan decreased by \$1.3 million, or 1.8 percent from the prior fiscal year.
- The Plan's total investment rate of return of 5.6 percent in fiscal 2003 compared to (9.2) percent in fiscal 2002.
- As of June 30, 2003, the date of the most recent actuarial valuation, the Plan's funded ratio was 144.9 percent compared to 142.6 percent as of June 30, 2002. For June 30, 2003, this indicates that for every dollar of benefits due to the Plan's members, assets of \$1.45 are available to cover benefit obligations.

OVERVIEW OF THE FINANCIAL STATEMENTS

This discussion and analysis is intended to serve as an introduction to the Plan's basic financial statements, which are comprised of the following:

- Statements of Fiduciary Net Assets
- Statements of Changes in Fiduciary Net Assets
- Notes to Financial Statements
- Required Supplementary Information and Note to Required Supplementary Information
- Other Supplementary Information

The Statements of Fiduciary Net Assets presents information on the Plan's assets and liabilities and the resulting net assets held in trust for pension benefits. This statement reflects the Plan's investments at fair value, along with cash and short-term investments, receivables, and other assets and liabilities.

The Statements of Changes in Fiduciary Net Assets presents information showing how the Plan's net assets held in trust for pension benefits changed during the years ended

June 30, 2003, and 2002. It reflects investment income (or losses) during the period from investing and securities lending activities. Deductions for retirement benefits are also presented.

The *Notes to Financial Statements* provides additional information that is essential to a full understanding of the data provided in the financial statements.

The Required Supplementary Information consists of two schedules and a related note concerning the funded status of the Plan. The Note to Required Supplementary Information provides additional trend information as of the valuation date. This information includes actuarial cost method, amortization method, remaining amortization period, asset valuation period, and actuarial assumptions.

The *Other Supplementary Information* consists of a schedule concerning the actuarial accrued liability of the Plan.

FINANCIAL ANALYSIS

The Plan provides retirement benefits to UC-PERS members who elected early retirement under the provisions of the Plan. Plan benefits are funded by employer contributions and by investment income. The Plan's net assets held in trust for benefits as of June 30, 2003, amounted to \$71.5 million, a decrease of \$1.3 million from \$72.8 million as of June 30, 2002.

Additions to the Plan's net assets held in trust for benefits include investment income or loss. There were no employer contributions during the 2003 fiscal year. The Plan recognized a net investment income of \$4.3 million for the 2003 fiscal year, compared with a net investment loss of \$7.3 million for the 2002 fiscal year. The investment income was due primarily to a recovery in the domestic and foreign equity markets and decline in interest rates during the 2002-2003 fiscal year.

Retirement benefit payments and other expenses were the only deductions from the Plan's net assets held in trust for benefits. For the 2003 fiscal year, deductions amounted to \$5.6 million, compared to \$4.6 million in fiscal 2002. The increase was due to a one–time cost–of–living increase of 25 percent effective July 1, 2002.

INVESTMENTS

The assets of the Plan are combined for investment purposes with the assets of the University of California Retirement Plan (UCRP).

FUNDED STATUS

The Plan's actuarial value of assets available for benefits was \$71.5 million as of June 30, 2003, a decrease of \$1.3 million (1.8 percent) from the 2002 fiscal year. The actuarial accrued liability was \$49.3 million, an decrease of \$1.7 million (3.3 percent), from the 2002 fiscal year. The Plan's total surplus was \$22.1 million—an increase of \$0.4 million (1.8 percent) from the 2002 fiscal year.

FIDUCIARY RESPONSIBILITIES

The Board of Regents of the University of California (the Regents) is fiduciary of the Plan. Under law, the assets can only be used for the exclusive benefit of Plan retirees and beneficiaries.

REQUESTS FOR INFORMATION

This financial report is designed to provide the Regents, the UCRS Advisory Board, retirees and others with a general overview of the Plan's financial posture. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to:

University of California Office of the President-HR/Benefits Department Financial Services and Plan Disbursements 300 Lakeside Drive, Suite 400 Oakland, CA 94612 website address: http://atyourservice.ucop.edu

Report of Independent Auditors

To The Regents of the University of California:

In our opinion, the accompanying statements of fiduciary net assets and the related statements of changes in fiduciary net assets (presented on pages 33 through 35) present fairly, in all material respects, the financial position of the University of California PERS Voluntary Early Retirement Incentive Program Plan (the Plan) at June 30, 2003 and 2002, and the changes in fiduciary net assets for the years then ended in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Plan's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America, which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Note 1, the financial statements of the Plan are intended to present the fiduciary net assets and the changes in fiduciary net assets of only that portion of activities that are attributable to the Plan. They do not purport to, and do not, present fairly the financial position of the University of California as of June 30, 2003 and 2002, and the results of its operations for the years then ended in conformity with accounting principles generally accepted in the United States of America.

NOTE I—DESCRIPTION OF THE PLAN AND SIGNIFICANT ACCOUNTING POLICIES GENERAL INTRODUCTION—

The University of California PERS Voluntary Early Retirement Incentive Program (the Plan) is a defined benefit pension plan providing lifetime supplemental retirement income and survivor benefits to UC-PERS members who elected early retirement under the provisions of the Plan. The University of California contributed to the California Public Employees' Retirement System (PERS) in behalf of these UC-PERS members.

Generally, to participate in the Plan, an eligible employee was required to elect concurrent retirement under PERS and the Plan effective October 1, 1991; must have had Plan Age plus Plan Service Credit equal to 80 years as of September 30, 1991, if classified as a Qualified Academic Senate Faculty Member, or equal to 75 years if not classified as a Qualified Academic Senate Faculty Member. Of 1,579 eligible employees, 879 elected to retire under this voluntary early retirement incentive program.

The cost of contributions made to the Plan is borne entirely by the University and the Department of Energy (DOE) laboratories. Over the five-year period ended June 30, 1996, the University and DOE laboratories were required to make contributions to the Plan as determined by the Plan actuary sufficient to maintain the promised benefits and the qualified status of the Plan under the regulations of the Internal Revenue Code of 1986 (IRC). No additional contributions are required as long as the Plan remains fully funded under the actuarial basis used by the Plan.

BASIS OF ACCOUNTING-

The financial statements have been prepared in accordance with generally accepted accounting principles, including all applicable effective statements of the Governmental Accounting Standards Board (GASB) and on the accrual basis of accounting.

VALUATION OF INVESTMENTS-

The assets of the Plan are combined for investment purposes with the assets of the University of California Retirement Plan (UCRP). Accordingly, the assets of the Plan are valued based on a pooled interest of the

combined investments. The two plans are separate trusts, and each Plan is accounted for on a separate basis.

Investments are primarily stated at fair value. Generally, securities are valued at the last sale price on the last business day of the fiscal year, as quoted on a recognized exchange or an industry standard pricing service. Securities for which no sale was reported as of the close of the last business day of the fiscal year are valued at the bid market price of a dealer who regularly trades in the security being valued. The fair value of interests in venture capital partnerships is estimated based upon valuations provided by the general partners of the respective partnerships as of March 31, adjusted for cash receipts and cash and securities disbursements through June 30. Because the venture capital partnerships are not readily marketable, their estimated value is subject to uncertainty and, therefore, may differ significantly from the value that would have been used had a ready market for such investments existed. Investments in registered investment companies are valued based upon the net asset value of those companies. Mortgage loans, held as investments, are valued on the basis of their future principal and interest payments discounted at prevailing interest rates for similar instruments.

ACCOUNTING FOR INVESTMENTS—

Investment transactions are recorded on the date the securities are purchased or sold (trade date). Realized gains or losses are recorded as the difference between the proceeds from the sale and the average cost of the investment sold. Dividend income is recorded on the ex-dividend date, and interest income is accrued as earned.

Investments denominated in foreign currencies are translated into U.S. dollar equivalents using year-end spot foreign currency exchange rates. Purchases and sales of investments and their related income are translated at the rate of exchange on the respective transaction dates. Realized and unrealized gains and losses resulting from foreign currency changes are included in the Plan's *Statement of Changes in Net Assets*.

ADMINISTRATIVE EXPENSES—

Administrative expenses of the Plan are paid by an annual account servicing charge of \$10 per participant.

INCOME TAX STATUS-

The Plan is intended to qualify under the statutory requirements of the Internal Revenue Code of 1986, as amended, applicable to governmental defined benefit pension plans. The Plan's tax counsel believes that the form of the Plan as currently designed is in material compliance with the applicable requirements of IRS §401(a) and the related trust tax exemption under IRC §501(a).

USE OF ESTIMATES IN THE PREPARATION OF FINANCIAL STATEMENTS-

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of net assets held in trust for pension benefits at the date of the financial statements and the reported amounts of changes in net assets held in trust for pension benefits during the reporting period. Actual results could differ from those estimates.

NOTE 2-INVESTMENTS

The Plan's investments of \$71.5 million are included within the UCRP investment pool. These monies are pooled with the monies of the University of California and invested by the Treasurer of the Regents.

The total investment return, representing income (loss) plus appreciation (depreciation) on investments, was 5.6 percent and (9.2) percent, respectively, for the years ended June 30, 2003, and 2002.

NOTE 3-CONTRIBUTIONS AND RESERVES ACTUARIALLY DETERMINED CONTRIBUTION REQUIREMENTS AND CONTRIBUTIONS—

The Regents' funding policy provides for actuarially determined lump sum or periodic contributions to be made by the Office of the President, campuses and DOE laboratories in behalf of Plan members at rates that provide for sufficient assets to be available when benefits are due. As of June 30, 2003, and 2002, the Plan was fully funded and no annual contributions were required.

Accumulated Plan benefits are those future benefit payments that are attributable under the Plan's provisions to the service employees have rendered. Accumulated Plan benefits include benefits expected to be paid to (a) retired or terminated members or their beneficiaries and (b) beneficiaries of deceased members.

NOTE 4—PLAN TERMINATION

The Regents intend and expect to continue the Plan indefinitely, but reserve the right to amend the Plan at any time provided that any such action shall not lessen accrued benefits. In the event that the Plan is terminated, Plan assets shall be applied solely for the benefit of retired members and their beneficiaries until all liabilities of the Plan have been satisfied.

In the event Plan assets available for benefits are insufficient to meet its obligations, the Regents' funding policy provides for additional contributions to be made in behalf of Plan members by the Office of the President, campuses and DOE laboratories.

Once all liabilities have been satisfied, any excess assets shall revert to the Regents as the Plan's Trustees. Neither the Regents as Trustees nor the University carry termination insurance for the Plan, as the Plan is not subject to ERISA Title IV provisions, nor is it overseen by the Pension Benefit Guaranty Corporation.

ACTUARIAL INFORMATION

Analysis of dollar amounts of the actuarial value of assets available for benefits, actuarial accrued liability, and actuarial value of assets in excess of the actuarial accrued liability in isolation can be misleading. Expressing the actuarial value of assets available for benefits as a

percentage of the actuarial accrued liability provides one indication of the funding status on a going-concern basis. Analysis of this percentage over time indicates whether a plan is becoming financially stronger or weaker. Generally, the greater this percentage, the stronger the plan.

REQUIRED SUPPLEMENTARY SCHEDULE OF FUNDING PROGRESS FOR THE PAST SIX YEARS

Years Ended June 30 (\$ in thousands)

	(1)	(2)	(3)	(4)
	Actuarial Value			Total
Actuarial	of Assets	Actuarial		Funded
Valuation	Available for	Accrued	Actuarial	Ratio
Date	Benefits*	Liability	Surplus	(1)÷(2)
