Re: June 30, 2016 Actuarial Valuations

Dear Board Members:

Enclosed please find the June 30, 2016 actuarial valuations for the retirement and health plans.

As requested by the System, we have attached the following supplemental schedules:

- Exhibit A - Summary of significant results for the retirement and health plans.
- Exhibit B - History of computed contribution rates for the retirement and health plans.
- Exhibit C - Solvency test for the retirement plan.¹
- Exhibit D - Schedule of retirees and beneficiaries added to and removed from the rolls for the retirement plan.²

We look forward to discussing the reports and the enclosed schedules with the Board.

Sincerely,

A handwritten signature in black ink, appearing to read "Paul Angelo", written over a horizontal line.

Paul Angelo, FSA, MAAA, FCA, EA
Senior Vice President and Actuary

A handwritten signature in black ink, appearing to read "Andy Yeung", written over a horizontal line.

Andy Yeung, ASA, MAAA, FCA, EA
Vice President and Actuary

JRC/hy

5454376v3/05806.002

¹ For the health plan, a similar schedule is provided in Exhibit I of the health valuation report.

² For the health plan, a similar schedule is provided in Exhibit C of the health valuation report.

06/30/2008	14.65%	5.48%	20.13%	1,977,645
06/30/2009	18.73%	6.62%	25.35%	1,816,171
06/30/2010				
Before Additional Employee Contributions	21.19%	7.45%	28.64%	1,817,662
After Additional Employee Contributions	18.67%	6.94%	25.61%	1,817,662
06/30/2011 ⁽²⁾				
Before Additional Employee Contributions	24.31%	4.49%	28.80%	1,833,392
After Additional Employee Contributions	21.64%	4.49%	26.13%	1,833,392
06/30/2012 ⁽³⁾	21.34%	5.74%	27.08%	1,819,270
06/30/2013	22.24%	5.80%	28.04%	1,846,970
06/30/2014	24.05%	5.81%	29.86%	1,898,064
06/30/2015	23.65%	4.90%	28.55%	1,907,665
06/30/2016	22.96%	5.09%	28.05%	1,968,703

⁽¹⁾ Contributions are assumed to be made at the end of the pay period. For the 6/30/2014 and 6/30/2015 valuations, the contribution rates are the combined rates for Tiers 1 and 2. Beginning with the 6/30/2016 valuation, the contribution rates are the combined rates for Tiers 1 and 3 (Tier 2 was rescinded effective February 21, 2016).

⁽²⁾ Beginning with the 6/30/2011 valuation date, the contribution rates are before adjustments to phase in over five years the impact of new actuarial assumptions (as a result of the June 30, 2011 Triennial Experience Study) on the City's contributions. Those adjustments no longer apply after the June 30, 2014 valuation.

⁽³⁾ Beginning with the 6/30/2012 valuation date, the contribution rates are after additional employee contributions.

*Board of Administration
Los Angeles City Employees' Retirement System
202 W. 1st Street, Suite 500
Los Angeles, CA 90012-4401*

Dear Board Members:

We are pleased to submit this Actuarial Valuation and Review as of June 30, 2016. It summarizes the actuarial data used in the valuation, establishes the funding requirements for fiscal 2017/2018 and analyzes the preceding year's experience.

This report was prepared in accordance with generally accepted actuarial principles and practices at the request of the Board to assist in administering the Plan. The census and unaudited financial information on which our calculations were based were prepared by LACERS. That assistance is gratefully acknowledged.

The measurements shown in this actuarial valuation may not be applicable for other purposes. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period); and changes in plan provisions or applicable law.

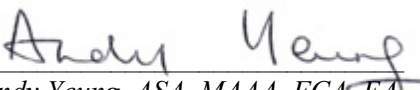

The actuarial calculations were completed under the supervision of Andy Yeung, ASA, MAAA, FCA, Enrolled Actuary. We are members of the American Academy of Actuaries and we meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion herein. To the best of our knowledge, the information supplied in this actuarial valuation is complete and accurate. Further, in our opinion, the assumptions as approved by the Board are reasonably related to the experience of and the expectations for the Plan.

We look forward to reviewing this report at your next meeting and to answering any questions.

Sincerely,

Segal Consulting, a Member of the Segal Group, Inc.

SECTION 1: Valuation Summary for the Los Angeles City Employees' Retirement System

Purpose

This report has been prepared by Segal Consulting to present an actuarial valuation of the Los Angeles City Employees' Retirement System as of June 30, 2016. The valuation was performed to determine whether the assets and contributions are sufficient to provide the prescribed benefits. The contribution requirements presented in this report are based on:

- The benefit provisions of the Pension Plan, as administered by the Board of Administration;
- The characteristics of covered active members, inactive members, and retired members and beneficiaries as of June 30, 2016, provided by LACERS;
- The assets of the Plan as of June 30, 2016, provided by LACERS;
- Economic assumptions regarding future salary increases and investment earnings; and
- Other actuarial assumptions, regarding employee terminations, retirement, death, etc.

Significant Issues in Valuation Year

The following key findings were the result of this actuarial valuation:

- In the June 30, 2015 actuarial valuation report we noted that Tier 2 had been rescinded, that all Tier 2 members would be transferred to Tier 1, and new hires would be enrolled in a new Tier 3. However, as of the date of issuance of the June 30, 2015 valuation report, the provisions of Tier 3 were not yet determined and Tier 2 employees had not yet transferred to Tier 1. For those reasons, we continued to calculate a Normal Cost rate in the June 30, 2015 valuation for Tier 2 employees based on the Tier 2 plan provisions in effect at that time.

Subsequent to the issuance of the June 30, 2015 valuation report, Ordinance No. 184134 (“the Ordinance”) was adopted by the City Council on January 12, 2016, and Tier 2 was rescinded. Section 4.1002.1 of the Ordinance stated that “effective February 21, 2016, all persons who entered LACERS membership between July 1, 2013 and February 21, 2016, as members of Tier 2 of the Retirement System shall be members of Tier 1 of the Retirement System”. Regarding past service under Tier 2 for these transferring members, the Ordinance stated that “the City shall contribute to the Retirement System the funds necessary, as determined by the actuary for the Retirement System, to make the Retirement Fund whole for any contributions that would have been made by the City and Tier 2 members had those members been members of Tier 1 from their respective initial dates of membership in LACERS. Such contributions will reflect the difference between the Tier 1 and Tier 2 Normal Cost rates calculated for the affected Tier 2 members adjusted with interest at the assumed earnings rate.”

SECTION 1: Valuation Summary for the Los Angeles City Employees' Retirement System

On March 14, 2016, we issued our Tier 3 report which determined (1) the funds necessary to make the Retirement Fund whole due to this reclassification of Tier 2 members and (2) the contribution rates for Tier 3 for fiscal years 2015/2016 (at least for the remainder of that fiscal year) and 2016/2017. In that report we noted that any difference in the Tier 1 employer Normal Cost rate that would result from the transfer of Tier 2 members to Tier 1 would be reflected in this valuation as of June 30, 2016. We understand that the City made the contributions for the reclassification of past Tier 2 service as Tier 1 service for the transferring members on July 15, 2016, and that transfer is reflected in the results of this valuation.

Section 4.1080.2(a) of the Ordinance stated that “effective February 21, 2016, and ongoing, every employee shall become a member of Tier 3 of the Retirement System on the first day of employment in a position with the City in which he or she is not excluded from membership pursuant to the provisions of Subsection (c) of this section, unless he or she qualifies for Tier 1 membership pursuant to the exceptions to Tier 1 membership set forth in Subsection (b).” For this June 30, 2016 valuation, LACERS has provided us with census data that reflects the reclassification of prior Tier 2 members as Tier 1 members, and the addition of new Tier 3 employees who entered the System after the effective date of the Ordinance (i.e., February 21, 2016). The employer contribution rates calculated herein as of June 30, 2016 are payable for fiscal year 2017/2018 and reflect the information provided above.

Ref: Pgs. 17 and 27

- The ratio of the valuation value of assets to actuarial accrued liabilities increased from 69.35% to 71.39%. On a market value of assets basis, the funded ratio decreased from 70.49% to 67.77%. The unfunded actuarial accrued liability decreased from \$5.183 billion to \$4.986 billion. The decrease was due to: (i) actual contributions more than expected as a result of the anticipated one-year delay in implementing the lower contribution rate in the prior valuation, (ii) lower than expected salary increases for continuing active members, (iii) lower than expected COLAs granted to retirees and beneficiaries and (iv) other actuarial gains, offset somewhat by (v) lower than expected return on the valuation value of assets (after smoothing). A complete reconciliation of the System’s unfunded actuarial accrued liability is provided in Section 3, Exhibit G.

Ref: Pg. 15

- The aggregate employer rate (payable at the end of each pay period) calculated in this valuation has decreased from 23.65% of payroll to 22.96% of payroll. The annual dollar employer contributions calculated in this valuation increased, however, from about \$451.2 million to \$452.0 million. The decrease in the employer rate was due to: (i) actual contributions more than expected as a result of the anticipated one-year delay in implementing the lower contribution rate calculated in the prior valuation, (ii) lower than expected salary increases for continuing active members, (iii) lower than expected COLAs granted to retirees and beneficiaries, and (iv) other actuarial gains, offset somewhat by (v) an increase in the normal cost rate due, in part, to the enrollment of new employees in Tier 3¹, (vi) lower than expected return on the

¹ *In estimating the normal cost for Tier 3 members in our report dated March 14, 2016, we assumed that the demographic profile of future Tier 3 members would be approximated by the demographic profile of the then Tier 2 members hired in the two years prior to the June 30, 2015 valuation. In particular, we projected the entry age of Tier 3 members to be about age 34.8 (based on the entry age of the Tier 2 members). With the data provided for the Tier 3 members, the actual entry age is 36.5.*

SECTION 1: Valuation Summary for the Los Angeles City Employees' Retirement System

valuation value of assets (after smoothing), and (vii) amortizing the prior year's UAAL over a smaller than expected projected total payroll. A complete reconciliation of the aggregate employer contribution is provided in Section 2, Chart 15.

Ref: Pgs. 5

- As indicated in Section 2, Subsection B of this report, the total unrecognized investment loss as of June 30, 2016 is \$747,043,110² for the assets for Retirement, Health, Family Death, and Larger Annuity Benefits. This investment loss will be recognized in the determination of the actuarial value of assets for funding purposes in the next several years. This implies that earning the assumed rate of investment return of 7.50% per year (net of investment and administrative expenses) on a market value basis will result in net investment losses on the actuarial value of assets after June 30, 2016. Item 9 in Chart 7 shows how, under the asset smoothing method, the \$747.0 million in unrecognized losses will be recognized in the next six years.

The deferred losses of \$747.0 million represent 5.3% of the market value of assets as of June 30, 2016. Unless offset by future investment gains or other favorable experience, the recognition of the \$747.0 million market loss is expected to have an impact on the System's future funded percentage and contribution rate requirements. This potential impact may be illustrated as follows:

- If the retirement plan component of the deferred losses were recognized immediately in the valuation value of assets, the funded percentage would decrease from 71.39% to 67.77%.
 - If the retirement plan component of the deferred losses were recognized immediately in the valuation value of assets, the aggregate employer rate (payable at the end of each pay period) would increase from 22.96% to about 25.7% of payroll.
- As in prior years, the employer contribution rates provided in this report have been developed assuming they will be paid by the City on any of the following dates:
 - (1) The beginning of the fiscal year, or
 - (2) On July 15, 2017, or
 - (3) Throughout the year (i.e., the City will pay contributions at the end of every pay period).
 - Carrying over the prior instructions from the Board of Administration, the recommended contribution is set equal to the greater of the current funding policy or the minimum Annual Required Contribution (ARC) as determined by the then current GASB Statements 25 and 27. In particular, we have also continued to include in the calculation of the

Ref: Pg. 28

² For comparison purposes, the total unrecognized investment gain as of June 30, 2015 was \$229,171,148.

SECTION 1: Valuation Summary for the Los Angeles City Employees' Retirement System

recommended contribution an additional contribution due to the application of the 40-year minimum amortization requirement for both fiscal year 2003/2004 and fiscal year 2004/2005.

- The actuarial valuation report as of June 30, 2016 is based on financial information as of that date. Changes in the value of assets subsequent to that date are not reflected. Declines in asset values will increase the actuarial cost of the Plan, while increases will decrease the actuarial cost of the Plan.

Summary of Key Valuation Results

	2016	2015
Employer contributions calculated as of June 30:		
Recommended as a percentage of pay (there is a 12-month delay until the rate is effective)		
<u>Tier 1</u>		
At the beginning of the year	22.18%	23.14%
On July 15	22.25%	23.21%
At the end of each pay period	23.00%	23.99%
<u>Tier 2</u>		
At the beginning of the year	N/A ⁽¹⁾	17.90%
On July 15	N/A ⁽¹⁾	17.96%
At the end of each pay period	N/A ⁽¹⁾	18.57%
<u>Tier 3</u>		
At the beginning of the year	19.29%	19.89% ⁽²⁾
On July 15	19.34%	19.95% ⁽²⁾
At the end of each pay period	19.99%	20.61% ⁽²⁾
<u>Combined</u>		
At the beginning of the year	22.14%	22.81% ⁽³⁾
On July 15	22.21%	22.88% ⁽³⁾
At the end of each pay period	22.96%	23.65% ^{(3), (4)}
Funding elements for plan year ended June 30:		
Normal cost	\$340,758,622	\$322,574,274
Market value of assets (MVA) ⁽⁵⁾	14,005,059,515	14,124,760,375
Actuarial value of assets (AVA) ⁽⁵⁾	14,752,102,625	13,895,589,227
Valuation value of retirement assets (VVA)	12,439,250,206	11,727,161,378
Market value of retirement assets (MVA)	11,809,329,415	11,920,570,019
Actuarial accrued liability (AAL)	17,424,996,329	16,909,996,380
Unfunded actuarial accrued liability (UAAL) on VVA basis	4,985,746,123	5,182,835,002
Unfunded actuarial accrued liability (UAAL) on MVA basis	5,615,666,914	4,989,426,361
Funded ratio on VVA basis for retirement (VVA/AAL)	71.39%	69.35%
Funded ratio on MVA basis for retirement (MVA/AAL)	67.77%	70.49%

⁽¹⁾ Tier 2 was rescinded effective February 21, 2016.

⁽²⁾ The June 30, 2015 valuation rates for Tier 3 were determined in our Tier 3 study report dated March 14, 2016. These rates became effective February 21, 2016.

⁽³⁾ The June 30, 2015 combined rates were determined in our June 30, 2015 valuation report dated October 30, 2015 and have not been restated herein to reflect any events after June 30, 2015.

⁽⁴⁾ For illustrative purposes, if we were to apply the Tier 1 and Tier 3 payroll used in the current June 30, 2016 valuation to the Tier 1 and Tier 3 contribution rates determined in the June 30, 2015 valuation, the combined contribution rate as determined in the 2015 valuation assuming contributions would be paid at the end of each pay period would change from 23.65% to 23.94%.

⁽⁵⁾ Includes assets for Retirement, Health, Family Death, and Larger Annuity Benefits.

Projected average payroll ⁽⁶⁾	\$80,533	\$79,835

⁽⁶⁾ Reflects annualized salaries for part-time members.

SECTION 1: Valuation Summary for the Los Angeles City Employees' Retirement System

Important Information about Actuarial Valuations

In order to prepare an actuarial valuation, Segal Consulting (“Segal”) relies on a number of input items. These include:

- **Plan of benefits** Plan provisions define the rules that will be used to determine benefit payments, and those rules, or the interpretation of them, may change over time. It is important to keep Segal informed with respect to plan provisions and administrative procedures, and to review the plan description in this report to confirm that Segal has correctly interpreted the plan of benefits.
- **Participant data** An actuarial valuation for a plan is based on data provided to the actuary by the Retirement Office. Segal does not audit such data for completeness or accuracy, other than reviewing it for obvious inconsistencies compared to prior data and other information that appears unreasonable. It is important for Segal to receive the best possible data and to be informed about any known incomplete or inaccurate data.
- **Assets** This valuation is based on the market value of assets as of the valuation date, as provided by the Retirement Office.
- **Actuarial assumptions** In preparing an actuarial valuation, Segal projects the benefits to be paid to existing plan participants for the rest of their lives and the lives of their beneficiaries. This projection requires actuarial assumptions as to the probability of death, disability, withdrawal, and retirement of each participant for each year. In addition, the benefits projected to be paid for each of those events in each future year reflect actuarial assumptions as to salary increases and cost-of-living adjustments. The projected benefits are then discounted to a present value, based on the assumed rate of return that is expected to be achieved on the plan’s assets. There is a reasonable range for each assumption used in the projection and the results may vary materially based on which assumptions are selected. It is important for any user of an actuarial valuation to understand this concept. Actuarial assumptions are periodically reviewed to ensure that future valuations reflect emerging plan experience. While future changes in actuarial assumptions may have a significant impact on the reported results, that does not mean that the previous assumptions were unreasonable.

The user of Segal’s actuarial valuation (or other actuarial calculations) should keep the following in mind:

- The valuation is prepared at the request of LACERS. Segal is not responsible for the use or misuse of its report, particularly by any other party.
- An actuarial valuation is a measurement of the plan’s assets and liabilities at a specific date. Accordingly, except where otherwise noted, Segal did not perform an analysis of the potential range of future financial measures. The actual long-term cost of the plan will be determined by the actual benefits and expenses paid and the actual investment experience of the plan.
- If LACERS is aware of any event or trend that was not considered in this valuation that may materially change the results of the valuation, Segal should be advised, so that we can evaluate it.

SECTION 1: Valuation Summary for the Los Angeles City Employees' Retirement System

- Segal does not provide investment, legal, accounting, or tax advice. Segal's valuation is based on our understanding of applicable guidance in these areas and of the plan's provisions, but they may be subject to alternative interpretations. LACERS should look to their other advisors for expertise in these areas.

As Segal Consulting has no discretionary authority with respect to the management or assets of LACERS, it is not a fiduciary in its capacity as actuaries and consultants with respect to LACERS.

SECTION 1: Valuation Summary for the Los Angeles City Employees' Retirement System

Actuarial Certification

November 9, 2016

This is to certify that Segal Consulting (Segal) has conducted an actuarial valuation of the Los Angeles City Employees' Retirement System (LACERS or the "System") retirement program as of June 30, 2016, in accordance with generally accepted actuarial principles and practices. In particular, it is our understanding that the assumptions and methods used for funding purposes meet the parameters set by the Actuarial Standards of Practice (ASOPs). Actuarial valuations are performed annually for this retirement program with the last valuation completed on June 30, 2015. The actuarial calculations presented in this report have been made on a basis consistent with our understanding of the historical funding methods used in determination of the liability for retirement benefits.

The actuarial valuation is based on the plan of benefits verified by LACERS and on participant and financial data provided by LACERS. Segal did not audit LACERS' financial statements, but we conducted an examination of all participant data for reasonableness and we concluded that it was reasonable and consistent with the prior year's data.

One of the general goals of an actuarial valuation is to establish contributions that fully fund the Retirement System's liabilities, and that, as a percentage of payroll, remain as level as possible for each generation of active members. Both the Normal Cost and the Actuarial Accrued Liability are determined under the Entry Age cost method.

The actuarial computations made are for funding plan benefits. Accordingly, additional determinations will be needed for other purposes, such as satisfying financial accounting requirements under Governmental Accounting Standards Board (GASB) Statements No. 67 and No. 68 and judging benefit security at termination of the plan.

Segal prepared all of the supporting schedules in the Actuarial Section of the Comprehensive Annual Financial Report (CAFR) and certain supporting schedules in the Financial Section, based on the results of the June 30, 2016 actuarial valuation. A listing of the supporting schedules Segal prepared for inclusion in the Financial Section as Required Supplementary Information prescribed by GASB, and in the Actuarial Section, is provided below:

SECTION 2: Valuation Summary for the Los Angeles City Employees' Retirement System

A. MEMBER DATA

The Actuarial Valuation and Review considers the number and demographic characteristics of covered members, including active members, inactive non-vested members (entitled to a refund of member contributions), inactive vested members, retired members and beneficiaries.

This section presents a summary of significant statistical data on these member groups.

More detailed information for this valuation year and the preceding valuation can be found in Section 3, Exhibits A, B, and C.

A historical perspective of how the member population has changed over the past ten valuations can be seen in this chart.

CHART 1
Member Population: June 30, 2007 – 2016

Year Ended June 30	Active Members	Inactive Members*	Retired Members and Beneficiaries	Ratio of Non-Actives to Actives
2007	30,175	3,303	14,836	0.60
2008	30,236	4,273	14,975	0.64
2009	30,065	4,554	14,991	0.65
2010	26,245	5,344	17,264	0.86**
2011	25,449	5,623	17,197	0.90
2012	24,917	5,808	17,223	0.92
2013	24,441	5,799	17,362	0.95
2014	24,009	6,031	17,532	0.98
2015	23,895	6,507	17,932	1.02
2016	24,446	6,895	18,357	1.03

* Includes terminated members due a refund of employee contributions.

** Reflects 2009 Early Retirement Incentive Program.

SECTION 2: Valuation Summary for the Los Angeles City Employees' Retirement System

Active Members

Plan costs are affected by the age, years of service and payroll of active members. In this year's valuation, there were 24,446 active members with an average age of 48.6, average years of service of 14.7 years and average payroll of \$80,533.

The 23,895 active members in the prior valuation had an average age of 48.8, average service of 15.0 years and average payroll of \$79,835.

Inactive Members

In this year's valuation, there were 6,895 members who were either non-vested and entitled to a refund of member contributions or vested with a right to a deferred or immediate benefit, versus 6,507 in the prior valuation.

These graphs show a distribution of active members by age and by years of service.

CHART 2
Distribution of Active Members by Age as of June 30, 2016

CHART 3
Distribution of Active Members by Years of Service as of June 30, 2016

SECTION 2: Valuation Summary for the Los Angeles City Employees' Retirement System

Retired Members and Beneficiaries

As of June 30, 2016, 14,494 retired members and 3,863 beneficiaries were receiving total monthly benefits of \$64,862,952. For comparison, in the previous valuation, there were 14,127 retired members and 3,805 beneficiaries receiving monthly benefits of \$62,532,646. These monthly benefits have been adjusted for the COLA granted effective for the month of July.

These graphs show a distribution of the current retired members based on their monthly amount and age, by type of pension.

SECTION 2: Valuation Summary for the Los Angeles City Employees' Retirement System

B. FINANCIAL INFORMATION

Retirement plan funding anticipates that, over the long term, both contributions and net investment earnings (less investment fees and administrative expenses) will be needed to cover benefit payments.

Retirement plan assets change as a result of the net impact of these income and expense components. Additional financial information, including a summary of these transactions for the valuation year, is presented in Section 3, Exhibits D, E and F.

The chart depicts the components of changes in the actuarial value of assets over the last ten years. Note: The first bar represents increases in assets during each year while the second bar details the decreases.

CHART 6
Comparison of Increases and Decreases in the Actuarial Value of Assets for Years Ended June 30, 2007 – 2016

SECTION 2: Valuation Summary for the Los Angeles City Employees' Retirement System

It is desirable to have level and predictable plan costs from one year to the next. For this reason, the Board of Administration has approved an asset valuation method that gradually adjusts to market value. Under this valuation method, the full value of market fluctuations is not recognized in a single year and, as a result, the asset value and the plan costs are more stable.

The amount of the adjustment to recognize market value is treated as income, which may be positive or negative. Realized and unrealized gains and losses are treated equally and, therefore, the sale of assets has no immediate effect on the actuarial value.

The chart shows the determination of the actuarial value of assets as of the valuation date.

CHART 7

Determination of Actuarial Value of Assets as of June 30, 2016

1. Market value of assets				\$14,005,059,515
2. Calculation of unrecognized return ⁽¹⁾				
		Original	Portion Not	Amount Not
		Amount	Recognized	Recognized
(a) Year ended June 30, 2016	-\$1,065,023,569		6/7	-\$912,877,345
(b) Year ended June 30, 2015	-707,760,540		5/7	-505,543,243
(c) Year ended June 30, 2014	1,246,285,581		4/7	712,163,189
(d) Combined net deferred loss as of June 30, 2013 ⁽²⁾	-81,571,421		3/6	<u>-40,785,711</u>
(e) Total unrecognized return				-\$747,043,110
3. Preliminary actuarial value: (1) - (2e)				\$14,752,102,625
4. Adjustment to be within 40% corridor				0
5. Final actuarial value of assets: (3) + (4)				<u>\$14,752,102,625</u>
6. Actuarial value as a percentage of market value: (5) ÷ (1)				105.3%
7. Market value of retirement assets				\$11,809,329,415
8. Valuation value of retirement assets (5) ÷ (1) x (7)				\$12,439,250,206
9. Deferred return recognized in each of the next 6 years:				
(a) Amount recognized on 6/30/2017				-\$88,809,313
(b) Amount recognized on 6/30/2018				-88,809,313
(c) Amount recognized on 6/30/2019				-88,809,313
(d) Amount recognized on 6/30/2020				-75,214,076
(e) Amount recognized on 6/30/2021				-253,254,873
(f) Amount recognized on 6/30/2022				<u>-152,146,224</u>
(g) Subtotal (may not total exactly due to rounding)				-\$747,043,110

⁽¹⁾ Total return minus expected return on a market value basis.

⁽²⁾ Based on action taken by the Board on September 9, 2014, the net unrecognized loss as of June 30, 2013 (i.e., \$81,571,421) has been recognized in six level amounts, with three years of recognition remaining after the June 30, 2016 valuation.

SECTION 2: Valuation Summary for the Los Angeles City Employees' Retirement System

The actuarial value, market value and valuation value of assets are representations of LACERS' financial status. As investment gains and losses are gradually taken into account, the actuarial value of assets tracks the market value of assets. The portion of the total actuarial value of assets allocated for retirement benefits, based on a prorated share of market value, is shown as the valuation value of assets. The valuation value of assets is significant because LACERS' liabilities are compared to these assets to determine what portion, if any, remains unfunded. Amortization of the unfunded actuarial accrued liability is an important element in determining the contribution requirement.

This chart shows the change in the assets over the past ten years.

CHART 8
Market Value, Actuarial Value, and Valuation Value (Retirement Only) of Assets as of June 30, 2007 – 2016

SECTION 2: Valuation Summary for the Los Angeles City Employees' Retirement System

C. ACTUARIAL EXPERIENCE

To calculate the required contribution, assumptions are made about future events that affect the amount and timing of benefits to be paid and assets to be accumulated. Each year actual experience is measured against the assumptions. If overall experience is more favorable than anticipated (an actuarial gain), the contribution requirement will decrease from the previous year. On the other hand, the contribution requirement will increase if overall actuarial experience is less favorable than expected (an actuarial loss).

Taking account of experience gains or losses in one year without making a change in assumptions reflects the belief that the single year's experience was a short-term development and that, over the long term, experience will return to the original assumptions. For contribution

requirements to remain stable, assumptions should approximate experience.

If assumptions are changed, the contribution requirement is adjusted to take into account a change in experience anticipated for all future years.

The total gain of \$255,444,007 was due to an investment loss of \$53,562,466 (after smoothing), and a gain of \$309,006,473 from all other sources. The net experience variation from all other sources was 1.77% of the actuarial accrued liability. A discussion of the major components of the actuarial experience is on the following pages.

This chart provides a summary of the actuarial experience during the past year.

CHART 9

Actuarial Experience for Year Ended June 30, 2016

1. Net loss from investments*	-\$53,562,466
2. Net gain from other experience**	300,812,751
3. Net gain from scheduled one-year delay in implementing the lower contribution rate calculated in the June 30, 2015 valuation until fiscal year 2016/2017	<u>8,193,722</u>
4. Net experience gain: (1) + (2) + (3)	\$255,444,007

* *Details in Chart 10.*

** *Details in Chart 13. The net gain is attributed to actual liability experience from July 1, 2015 through June 30, 2016 compared to the projected experience based on the actuarial assumptions as of June 30, 2015.*

SECTION 2: Valuation Summary for the Los Angeles City Employees' Retirement System

Investment Rate of Return

A major component of projected asset growth is the assumed rate of return. The assumed return should represent the expected long-term rate of return, based on LACERS' investment policy. For valuation purposes, the assumed rate of return on the valuation value of assets is 7.50% (for the June 30, 2015 valuation). The actual rate of return on the valuation value of assets basis for the 2016 plan year was 7.05%.

Since the actual return for the year was less than the assumed return, LACERS experienced an actuarial loss during the year ended June 30, 2016 with regard to its investments.

CHART 10

Investment Experience for Year Ended June 30, 2016

This chart shows the gain/(loss) due to investment experience.

	Market Value (Includes assets for Retirement, Health, Family Death, and Larger Annuity Benefits)	Actuarial Value (Includes assets for Retirement, Health, Family Death, and Larger Annuity Benefits)	Valuation Value (Includes assets for Retirement Only)
1. Actual return	\$7,190,895	\$983,405,153	\$835,483,033
2. Average value of assets	\$14,296,192,849	\$14,067,021,701	\$11,853,939,989
3. Actual rate of return: (1) ÷ (2)	0.05%	6.99%	7.05%
4. Assumed rate of return	7.50%	7.50%	7.50%
5. Expected return: (2) x (4)	\$1,072,214,464	\$1,055,026,628	\$889,045,499
6. Actuarial gain/(loss): (1) – (5)	<u>-\$1,065,023,569</u>	<u>-\$71,621,475</u>	<u>-\$53,562,466</u>

SECTION 2: Valuation Summary for the Los Angeles City Employees' Retirement System

Because actuarial planning is long term, it is useful to see how the assumed investment rate of return has followed actual experience over time. The chart below shows the rate of return on an actuarial basis compared to the market value investment return for the Retirement, Health, Family Death and Larger Annuity Benefits for the last ten years, including the five-year average.

CHART 11

Investment Return – Actuarial Value vs. Market Value: Years Ended June 30, 2007 – 2016

Year Ended June 30	Net Interest and Dividend Income		Recognition of Capital Appreciation		Actuarial Value Investment Return		Market Value Investment Return	
	Amount	Percent	Amount	Percent	Amount	Percent	Amount	Percent
2007	\$261,677,229	2.95%	\$890,907,654	10.04%	\$1,152,584,883	12.99%	\$1,811,903,293	19.13%

					Five-year average return:	6.76%		6.82%
					Ten-year average return:	6.60%		5.47%

SECTION 2: Valuation Summary for the Los Angeles City Employees' Retirement System

Subsection B described the actuarial asset valuation method that gradually takes into account fluctuations in the market value rate of return. The effect of this is to stabilize the actuarial rate of return, which contributes to leveling pension plan costs.

This chart illustrates how this leveling effect has actually worked over the years 2007 - 2016.

CHART 12

Market Value, Actuarial Value, and Valuation Value (Retirement Only) Rates of Return for Years Ended June 30, 2007 – 2016

SECTION 2: Valuation Summary for the Los Angeles City Employees' Retirement System

Other Experience

There are other differences between the expected and the actual experience that appear when the new valuation is compared with the projections from the previous valuation. These include:

- the extent of turnover among the participants,
- retirement experience (earlier or later than expected),
- mortality (more or fewer deaths than expected),
- the number of disability retirements, and
- salary increases different than assumed.

The net gain from this other experience for the year ended June 30, 2016 amounted to \$300,812,751 which is 1.73% of the actuarial accrued liability.

A brief summary of the demographic gain experience of LACERS for the year ended June 30, 2016 is shown in the chart below.

The chart shows elements of the experience gain/(loss) for the most recent year.

CHART 13

Experience Due to Changes in Demographics for Year Ended June 30, 2016

1. Gain due to lower than expected salary increases for continuing actives	\$115,585,774
2. Gain due to lower than expected COLA granted to retirees and beneficiaries	183,080,033
3. Miscellaneous gain	<u>2,146,944</u>
4. Total gain	<u>\$300,812,751</u>

SECTION 2: Valuation Summary for the Los Angeles City Employees' Retirement System

D. RECOMMENDED CONTRIBUTION

The amount of annual contribution required to fund the Plan is comprised of an employer normal cost payment and a payment on the unfunded actuarial accrued liability. This total amount is then divided by the projected payroll for active members to determine the funding rate of 22.96% of payroll, if paid by the City at the end of each pay period. We have continued to follow the method used in the June 30, 2005 valuation to adjust the contribution requirement if the GASB ARC minimum contribution under the old GASB Statements No. 25 and 27 is greater than the amount prescribed below. For 2016, the beginning

of year minimum GASB ARC is \$389.8 million, so no additional adjustment has been made to the recommended contributions.

As shown on line item 1 on the next page for the combined results, the total normal cost rate increased from 16.91% on June 30, 2015 to 17.31% on June 30, 2016.

The chart compares this valuation's recommended contribution with the prior valuation.

CHART 14
Recommended Contribution

	Year Ended June 30			
	2016		2015	
Tier 1	Amount	% of Payroll	Amount	% of Payroll
1. Total normal cost	\$336,566,728	17.35%	\$309,311,393	17.29%
2. Expected employee contributions ⁽¹⁾	<u>-205,768,747</u>	<u>-10.61%</u>	<u>-188,661,682</u>	<u>-10.54%</u>
3. Employer normal cost: (1) + (2)	\$130,797,981	6.74%	\$120,649,711	6.75%
4. Actuarial accrued liability	17,424,360,500		16,897,676,431	
5. Valuation value of assets	<u>-12,438,532,553</u>		<u>-11,715,446,106</u>	
6. Unfunded actuarial accrued liability	\$4,985,827,947		\$5,182,230,325	
7. Amortization of unfunded accrued liability	299,521,454	15.44% ^{(2),(3)}	293,248,621	16.39%
8. Total recommended contribution, beginning of year: (3) + (7)	<u>\$430,319,435</u>	<u>22.18%</u>	<u>\$413,898,332</u>	<u>23.14%</u>
9. Total recommended contribution, July 15	<u>\$431,600,282</u>	<u>22.25%</u>	<u>\$415,130,302</u>	<u>23.21%</u>
10. Total recommended contribution, end of pay periods	<u>\$446,164,686</u>	<u>23.00%</u>	<u>\$429,138,924</u>	<u>23.99%</u>
11. Projected payroll	\$1,939,683,049		\$1,788,743,164	

⁽¹⁾ Discounted to beginning of year. The average employee rate for contributions made at the end of each pay period is actually 10.94% for the June 30, 2015 valuation and 11.01% for the June 30, 2016 valuation. As of June 30, 2016, all active Tier 1 members are now paying an additional contribution rate of either 4.00% or 4.50%.

⁽²⁾ In developing the UAAL contribution rate, we have combined the UAAL for Tiers 1 and 3 and amortized that total UAAL over the total payroll for Tiers 1 and 3.

⁽³⁾ For purposes of purchasing service with the Water and Power Employees' Retirement Plan (WPERP) for Tier 1, the UAAL rate as of June 30, 2016 is 15.44% if paid at the beginning of the year. If paid on July 15, the UAAL rate increases to 15.49%.

SECTION 2: Valuation Summary for the Los Angeles City Employees' Retirement System

9. Total recommended contribution, July 15			<u>\$21,360,080</u>	<u>17.96%</u>
10. Total recommended contribution, end of pay periods			<u>\$22,080,880</u>	<u>18.57%</u>
11. Projected payroll			\$118,921,434	
Tier 3				
1. Total normal cost	\$4,191,894	14.45%	N/A ⁽⁶⁾	14.10%
2. Expected employee contributions ⁽³⁾	<u>-3,076,775</u>	<u>-10.60%</u>		<u>-10.60%</u>
3. Employer normal cost: (1) + (2)	\$1,115,119	3.85%		3.50%
4. Actuarial accrued liability	635,829			
5. Valuation value of assets	<u>-717,653</u>			
6. Unfunded actuarial accrued liability	<u>-\$81,824</u>			
7. Amortization of unfunded accrued liability	4,481,138	15.44% ^{(4),(5)}		16.39%
8. Total recommended contribution, beginning of year: (3) + (7)	<u>\$5,596,257</u>	<u>19.29%</u>		<u>19.89%</u>
9. Total recommended contribution, July 15	<u>\$5,612,914</u>	<u>19.34%</u>		<u>19.95%</u>
10. Total recommended contribution, end of pay periods	<u>\$5,802,323</u>	<u>19.99%</u>		<u>20.61%</u>
11. Projected payroll	\$29,019,581			

⁽¹⁾ Effective February 21, 2016, all Tier 2 employees were transferred to Tier 1.

⁽²⁾ Discounted to beginning of year. The average employee rate for contributions made at the end of each pay period is actually 10.00% for the June 30, 2015 valuation.

⁽³⁾ Discounted to beginning of year. The average employee rate for contributions made at the end of each pay period is actually 11.00% for the June 30, 2016 and June 30, 2015 valuations.

⁽⁴⁾ In developing the UAAL contribution rate, we have combined the UAAL for Tiers 1 and 3 and amortized that total UAAL over the total payroll for Tiers 1 and 3.

⁽⁵⁾ For purposes of Government Service Buybacks for Tier 3, the UAAL rate as of June 30, 2016 is -0.02% if paid at the beginning of the year. It is calculated by: (i) amortizing -\$81,824 over 15 years (or a credit of \$6,807) and (ii) dividing that credit over Tier 3 payroll (or \$29,019,581). If paid on July 15, the UAAL rate remains at -0.02% even though the credit increases to \$6,827.

⁽⁶⁾ As of June 30, 2015, Tier 3 was not yet effective (it became effective February 21, 2016), so there were no members in this tier at that time.

SECTION 2: Valuation Summary for the Los Angeles City Employees' Retirement System

**CHART 14 (continued)
Recommended Contribution**

	2016		2015	
	Amount	% of Payroll	Amount	% of Payroll
Combined				
1. Total normal cost	\$340,758,622	17.31%	\$322,574,274	16.91%
2. Expected employee contributions	<u>-208,845,522</u>	<u>-10.61%</u>	<u>-200,123,989</u>	<u>-10.49%</u>
3. Employer normal cost: (1) + (2)	\$131,913,100	6.70%	\$122,450,285	6.42%
4. Actuarial accrued liability	17,424,996,329		16,909,996,380	
5. Valuation value of assets	<u>-12,439,250,206</u>		<u>-11,727,161,378</u>	
6. Unfunded actuarial accrued liability	\$4,985,746,123		\$5,182,835,002	
7. Amortization of unfunded accrued liability	304,002,592	15.44%	312,744,738	16.39%
8. Total recommended contribution, beginning of year: (3) + (7)	<u>\$435,915,692</u>	<u>22.14%</u>	<u>\$435,195,023</u>	<u>22.81%</u> ⁽¹⁾
9. Total recommended contribution, July 15	<u>\$437,213,196</u>	<u>22.21%</u>	<u>\$436,490,382</u>	<u>22.88%</u> ⁽¹⁾
10. Total recommended contribution, end of pay periods	<u>\$451,967,009</u>	<u>22.96%</u>	<u>\$451,219,804</u>	<u>23.65%</u> ^{(1),(2)}
11. Projected payroll	\$1,968,702,630		\$1,907,664,598	

⁽¹⁾ The June 30, 2015 combined rates were determined in our June 30, 2015 valuation report dated October 30, 2015 and have not been restated herein to reflect any events after June 30, 2015.

⁽²⁾ For illustrative purposes, if we were to apply the Tier 1 and Tier 3 payroll used in the current June 30, 2016 valuation to the Tier 1 and Tier 3 contribution rates determined in the June 30, 2015 valuation, the combined contribution rate as determined in the 2015 valuation assuming contributions would be paid at the end of each pay period would change from 23.65% to 23.94%.

SECTION 2: Valuation Summary for the Los Angeles City Employees' Retirement System

If paid by the City at the beginning of the year, the calculated normal cost is 6.70% of payroll for Tier 1 and Tier 3 combined. The remaining 15.44% of payroll will amortize the unfunded actuarial accrued liability over an equivalent single amortization period of about 24 years.

The contribution rates as of June 30, 2016 are based on all of the data described in the previous sections, the actuarial assumptions described in Section 4, and the Plan provisions adopted at the time of preparation of the Actuarial Valuation.

Reconciliation of Recommended Contribution

The chart below details the changes in the recommended contribution from the prior valuation to the current year's valuation.

CHART 15

Reconciliation of Recommended Contribution⁽¹⁾ from June 30, 2015 to June 30, 2016

Recommended Contribution as of June 30, 2015	23.65%
Effect of increase in employer normal cost due to payroll and demographic changes (including the enrollment of new employees in Tier 3 instead of Tier 2)	0.29%
Effect of anticipated one-year delay in implementing the lower combined contribution rate calculated in the prior valuation	-0.04%
Effect of investment loss	0.23%
Effect of amortizing prior year's UAAL over a smaller than expected projected total payroll	0.13%
Effect of lower than expected salary increases for actives	-0.50%
Effect of lower than expected COLAs granted to retirees and beneficiaries	-0.79%
Effect of other gains on accrued liability	<u>-0.01%</u>
Total change	-0.69%
Recommended Contribution as of June 30, 2016	22.96%

⁽¹⁾ Based on contributions at the end of each pay period.

The chart reconciles the contribution from the prior valuation to the amount determined in this valuation.

SECTION 2: Valuation Summary for the Los Angeles City Employees' Retirement System

E. FUNDED RATIO

A commonly reported piece of information regarding the Plan's financial status is the funded ratio. The ratios compare the valuation value of assets and the market value of assets to the actuarial accrued liabilities of the Plan as calculated. High ratios indicate a well-funded plan with assets sufficient to cover the plan's actuarial accrued liabilities. Lower ratios may indicate recent changes to benefit structures, funding of the plan below actuarial requirements, poor asset performance, or a variety of other factors. The chart below depicts a history of the funded ratios for this plan.

The funded status measures shown in this valuation are appropriate for assessing the need for or amount of future contributions. However, they are not necessarily appropriate for assessing the sufficiency of Plan assets to cover the estimated cost of settling the Plan's benefit obligations. As the chart below shows, the measures are different depending on whether the valuation or market value of assets is used.

CHART 16

Funded Ratio for Years Ending June 30, 2007 – 2016

⁽¹⁾ Valuation value of assets is after excluding \$5,269,481 of discounted Harbor Port Police assets transferred in October 2007.

SECTION 2: Valuation Summary for the Los Angeles City Employees' Retirement System

F. VOLATILITY RATIOS

Retirement plans are subject to volatility in the level of required contributions. This volatility tends to increase as retirement plans become more mature.

The Asset Volatility Ratio (AVR), which is equal to the market value of assets divided by total payroll, provides an indication of the potential contribution volatility for any given level of investment volatility. A higher AVR indicates that the plan is subject to a greater level of contribution volatility. This is a current measure since it is based on the current level of assets.

For LACERS, the current AVR is about 6.0. This means that a 1% asset gain/(loss) (relative to the assumed investment return) translates to about 6.0% of one-year's payroll. Since LACERS amortizes actuarial gains and losses over a period of 15 years, there would be a 0.5% of payroll decrease/(increase) in the required contribution for each 1% asset gain/(loss).

The Liability Volatility Ratio (LVR), which is equal to the Actuarial Accrued Liability divided by payroll, provides an indication of the longer-term potential for contribution volatility for any given level of investment volatility. This is because, over an extended period of time, the plan's assets should track the plan's liabilities. For example, if a plan is 50% funded on a market value basis, the liability volatility ratio would be double the asset volatility ratio and the plan sponsor should expect contribution volatility to increase over time as the plan becomes better funded.

The LVR also indicates how volatile contributions will be in response to changes in the Actuarial Accrued Liability due to actual experience or to changes in actuarial assumptions.

For LACERS, the current LVR is about 8.9. This is about 48% higher than the AVR. Therefore, we would expect that contribution volatility will increase over the long-term

This chart shows how the asset and liability volatility ratios have varied over time.

CHART 18
Volatility Ratios for Years Ended June 30, 2008 – 2016

Year Ended June 30	Asset Volatility Ratio	Liability Volatility Ratio

Note: The equivalent single amortization period is about 24 years.

SECTION 3: Supplemental Information for the Los Angeles City Employees' Retirement System

EXHIBIT I

Section 415 Limitations

Section 415 of the Internal Revenue Code (IRC) specifies the maximum benefits that may be paid to an individual from a defined benefit plan and the maximum amounts that may be allocated each year to an individual's account in a defined contribution plan.

A qualified pension plan may not pay benefits in excess of the Section 415 limits. The ultimate penalty for non-compliance is disqualification: active participants could be taxed on their vested benefits and the IRS may seek to tax the income earned on the plan's assets.

In particular, Section 415(b) of the IRC limits the maximum annual benefit payable at the Normal Retirement Age to a dollar limit of \$160,000 indexed for inflation. That limit is \$210,000 for 2016. Normal Retirement Age for these purposes is age 62. These are the limits in simplified terms. They must be adjusted based on each participant's circumstances, for such things as age at retirement, form of benefits chosen and after tax contributions.

Benefits in excess of the limits may be paid through a qualified governmental excess plan that meets the requirements of Section 415(m).

Legal Counsel's review and interpretation of the law and regulations should be sought on any questions in this regard.

Contribution rates determined in this valuation have not been reduced for the Section 415 limitations. Actual limitations will result in gains as they occur.

SECTION 3: Supplemental Information for the Los Angeles City Employees' Retirement System

EXHIBIT J

Definitions of Pension Terms

The following list defines certain technical terms for the convenience of the reader:

Assumptions or Actuarial Assumptions:

The estimates on which the cost of the Plan is calculated including:

- (a) Investment return — the rate of investment yield that the Plan will earn over the long-term future;
- (b) Mortality rates — the death rates of employees and pensioners; life expectancy is based on these rates;
- (c) Retirement rates — the rate or probability of retirement at a given age; and
- (d) Turnover rates — the rates at which employees of various ages are expected to leave employment for reasons other than death, disability, or retirement.

Normal Cost:

The amount of contributions required to fund the benefit allocated to the current year of service.

Actuarial Accrued Liability For Actives:

The equivalent of the accumulated normal costs allocated to the years before the valuation date.

Actuarial Accrued Liability For Pensioners:

The single sum value of lifetime benefits to existing pensioners. This sum takes account of life expectancies appropriate to the ages of the pensioners and the interest that the sum is expected to earn before it is entirely paid out in benefits.

Unfunded Actuarial Accrued Liability:

The extent to which the actuarial accrued liability of the Plan exceeds the assets of the Plan. There is a wide range of approaches to paying off the unfunded actuarial accrued liability, from meeting the interest accrual only to amortizing it over a specific period of time.

SECTION 3: Supplemental Information for the Los Angeles City Employees' Retirement System

Amortization of the Unfunded Actuarial Accrued Liability:

Payments made over a period of years equal in value to the Plan's unfunded actuarial accrued liability.

Investment Return:

The rate of earnings of the Plan from its investments, including interest, dividends and market gain and loss adjustments, computed as a percentage of the average value of the fund. For actuarial purposes, the investment return often reflects a smoothing of the market gains and losses to avoid significant swings in the value of assets from one year to the next.

SECTION 4: Reporting Information for the Los Angeles City Employees' Retirement System

EXHIBIT I

Summary of Actuarial Valuation Results

The valuation was made with respect to the following data supplied to us:

1. Retired members as of the valuation date (including 3,863 beneficiaries in pay status)		18,357
2. Inactive members during year ended June 30, 2016 (including 4,677 members with under 5 years of service eligible for a refund of contributions)		6,895
3. Members active during the year ended June 30, 2016		24,446
Fully vested	20,078	
Not vested	4,368	

The actuarial factors as of the valuation date are as follows:

Assets

1. Valuation value of assets (\$14,005,059,515 at market value as reported by LACERS and \$14,752,102,625 at actuarial value*)		\$12,439,250,206
2. Present value of future normal costs		
Employee	\$1,692,325,332	
Employer	<u>1,080,451,987</u>	
Total		2,772,777,319
3. Unfunded actuarial accrued liability		<u>4,985,746,123</u>
4. Present value of current and future assets		\$20,197,773,648

Liabilities

5. Present value of future benefits		
Retired members and beneficiaries	\$9,185,730,095	
Inactive members	402,619,618	
Active members	<u>10,609,423,935</u>	
Total		\$20,197,773,648

* Market value and actuarial value of assets include assets for Retirement, Health, Family Death, and Larger Annuity Benefits.

Summary of Actuarial Valuation Results

The determination of the recommended contribution is as follows:

	<u>Tier 1</u>	<u>Tier 3</u>	<u>Combined</u>
1. Total normal cost	\$336,566,728	\$4,191,894	\$340,758,622
2. Expected employee contributions ⁽¹⁾	<u>-205,768,747</u>	<u>-3,076,775</u>	<u>-208,845,522</u>
3. Employer normal cost: (1) + (2)	\$130,797,981	\$1,115,119	\$131,913,100
4. Payment on projected unfunded actuarial accrued liability	\$299,521,454	\$4,481,138	\$304,002,592
5. Total recommended contribution: (3) + (4), payable beginning of year	<u>\$430,319,435</u>	<u>\$5,596,257</u>	<u>\$435,915,692</u>
6. Total recommended contribution: adjusted for July 15 payment	<u>\$431,600,282</u>	<u>\$5,612,914</u>	<u>\$437,213,196</u>
7. Total recommended contribution: adjusted for biweekly payment	<u>\$446,164,686</u>	<u>\$5,802,323</u>	<u>\$451,967,009</u>
8. Projected payroll	\$1,939,683,049	\$29,019,581	\$1,968,702,630
9. Item 5 (beginning of year contribution) as a percentage of projected payroll: (5) ÷ (8)	22.18%	19.29%	22.14%
10. Item 6 (July 15 contribution) as a percentage of projected payroll: (6) ÷ (8)	22.25%	19.34%	22.21%
11. Item 7 (biweekly contribution) as a percentage of projected payroll: (7) ÷ (8)	23.00%	19.99%	22.96%

⁽¹⁾ Discounted to beginning of year.

EXHIBIT II

History of Employer Contributions

Plan Year Ended June 30	Actuarially Determined Employer Contributions (ADEC)*	Actual Contributions	Percentage Contributed
2007	\$277,516,400	\$277,516,400	100.00%
2008	288,119,041	288,119,041	100.00%
2009	274,554,786	274,554,786	100.00%
2010	258,642,795	258,642,795	100.00%
2011	303,560,953	303,560,953	100.00%
2012	308,539,905	308,539,905	100.00%
2013	346,180,852	346,180,852	100.00%
2014	357,649,232	357,649,232	100.00%
2015	381,140,923	381,140,923	100.00%
2016	440,546,011	440,546,011	100.00%

* Prior to plan year ending June 30, 2014, this amount was the Annual Required Contribution (ARC).

SECTION 4: Reporting Information for the Los Angeles City Employees' Retirement System

EXHIBIT III

Actuarial Assumptions and Actuarial Cost Method

Rationale for Assumptions: The information and analysis used in selecting each assumption that has a significant effect on this actuarial valuation is shown in the July 1, 2011 through June 30, 2014 Actuarial Experience Study dated October 8, 2014. Unless otherwise noted, all actuarial assumptions and methods shown below apply to both Tier 1 and Tier 3 members. These assumptions have been adopted by the Board.

Economic Assumptions:

Net Investment Return: 7.50%, net of investment and administrative expenses.

Consumer Price Index: Increase of 3.25% per year; benefit increases due to CPI subject to 3.00% maximum for Tier 1 and 2.00% maximum for Tier 3.

Employee Contribution Crediting Rate: Based on average of 5-year Treasury note rate. An assumption of 3.25% is used to approximate that crediting rate in this valuation.

Salary Increases: Inflation: 3.25%; plus additional 0.75% “across the board” salary increases (other than inflation); plus the following merit and promotional increases:

<u>Service</u>	<u>Percentage Increase</u>
0	6.50%
1	6.20%
2	5.10%
3	3.10%
4	2.10%
5	1.10%
6	1.00%
7	0.90%
8	0.70%
9	0.60%
10+	0.40%

SECTION 4: Reporting Information for the Los Angeles City Employees' Retirement System

Demographic Assumptions:

Post-Retirement Mortality Rates:

Healthy Members and All Beneficiaries: RP-2000 Combined Healthy Mortality Table projected with Scale BB to 2020, set back one year for males and with no setback for females.

Disabled Members: RP-2000 Combined Healthy Mortality Table projected with Scale BB to 2020, set forward seven years for males and set forward eight years for females.

The above mortality tables contain about a 10% margin, based on actual to expected deaths, as a provision appropriate to reasonably anticipate future mortality improvement, based on a review of mortality experience as of the measurement date.

Termination Rates Before Retirement:

Pre-Retirement Mortality: RP-2000 Combined Healthy Mortality Table projected with Scale BB to 2020, set back one year for males and with no setback for females.

Age	Rate (%)	
	Disability	Termination*
25	0.01	5.75
30	0.03	5.75
35	0.05	4.85
40	0.09	3.50
45	0.15	2.70
50	0.19	2.50
55	0.20	2.35
60	0.20	2.25

* Rates for members with five or more years of service. Termination rates are zero for members eligible to retire.

SECTION 4: Reporting Information for the Los Angeles City Employees' Retirement System

Rates of termination for members with less than 5 years of service are as follows:

Service	Rate (%)
	Termination (Based on Service)
0	13.25
1	11.00
2	8.75
3	7.25
4	5.75

Retirement Rates:

Age	Rate (%)			
	Tier 1		Tier 3	
	Non-55/30	55/30	Non-55/30	55/30
50	6.0	0.0	6.0	0.0

69	12.0	17.0	11.0	16.0
70	100.0	100.0	100.0	100.0

⁽¹⁾ Not eligible to retire under the provisions of the Tier 3 plan.

SECTION 4: Reporting Information for the Los Angeles City Employees' Retirement System

Retirement Age and Benefit for Inactive Vested Participants:

Pension benefit paid at the later of age 58 or the current attained age. For reciprocals, 4.40% compensation increases per annum.

Exclusion of Inactive Members:

All inactive participants are included in the valuation.

Unknown Data for Members:

Same as those exhibited by members with similar known characteristics. If not specified, members are assumed to be male.

Percent Married/Domestic Partner:

76% of male participants; 50% of female participants.

Age of Spouse:

Male retirees are assumed to be 4 years older than their female spouses. Female retirees are assumed to be 2 years younger than their male spouses.

Service:

Employment service is used for eligibility determination purposes. Benefit service is used for benefit calculation purposes.

Future Benefit Accruals:

1.0 year of service per year.

Other Reciprocal Service:

5% of future inactive vested members will work at a reciprocal system.

Actuarial Methods:

Actuarial Value of Assets:

The market value of assets less unrecognized returns in each of the last seven years. Unrecognized return is equal to the difference between the actual and expected returns on a market value basis and is recognized over a seven-year period. The actuarial value of assets cannot be less than 60% or greater than 140% of the market value of assets.

SECTION 4: Reporting Information for the Los Angeles City Employees' Retirement System

Actuarial Cost Method: Entry Age Cost Method, level percent of salary.

Funding Policy: The plan sponsor of the City of Los Angeles Employees' Retirement System makes contributions equal to the normal cost adjusted by an amount to amortize any surplus or unfunded actuarial accrued liability. The amortization method for the UAAL is a level percent of payroll, assuming annual increases in total covered payroll equal to inflation plus across the board increases (other than inflation). Both the normal cost and the actuarial accrued liability are determined under the Entry Age cost method and are calculated on an individual basis. Entry age is calculated as age on the valuation date minus years of service.

Under the current funding policy, changes in the UAAL due to actuarial gains/losses are amortized over separate 15-year periods. Any changes in the UAAL due to assumption or method changes are amortized over separate 20-year periods. Plan changes, including the 2009 ERIP, are amortized over separate 15-year periods. Future ERIPs will be amortized over 5 years. Any actuarial surplus is amortized over 30 years. All the bases on or before June 30, 2012, except those arising from the 2009 ERIP and the two GASB 25/27 layers, were combined and amortized over 30 years effective June 30, 2012.

The recommended contribution is set equal to the greater of the current funding policy or the minimum Annual Required Contribution (ARC) as determined by the then current GASB Statements 25 and 27. In particular, an additional contribution due to the application of the 40-year minimum amortization requirement for both fiscal year 2003/2004 and fiscal year 2004/2005 is included in the calculation of the recommended contribution.

SECTION 4: Reporting Information for the Los Angeles City Employees' Retirement System

EXHIBIT IV

Summary of Plan Provisions

This exhibit summarizes the major provisions of LACERS included in the valuation. It is not intended to be, nor should it be interpreted as, a complete statement of all plan provisions.

Plan Year: July 1 through June 30

Census Date: June 30

Membership Eligibility:

Tier 1
(§ 4.1002(a))

All employees who became members of the Retirement System before July 1, 2013, and certain employees who became members of the Retirement System on or after July 1, 2013. In addition, pursuant to Ordinance No. 184134, all Tier 2 employees who became members of the Retirement System between July 1, 2013 and February 21, 2016 were transferred to Tier 1 effective February 21, 2016.

Tier 3
(§4.1080.2(a))

All employees who became members of the Retirement System on or after February 21, 2016, except as provided otherwise in Section 4.1080.2(b) of the Los Angeles Administrative Code.

Normal Retirement Benefit:

Tier 1

Age & Service Requirement
(§ 4.1005(a))

Age 70; or
Age 60 with 10 years of continuous City service; or
Age 55 with at least 30 years of City service.

Amount (§ 4.1007(a))

2.16% per year of service credit (not greater than 100%) of the Final Average Monthly Compensation.

SECTION 4: Reporting Information for the Los Angeles City Employees' Retirement System

Normal Retirement Benefit: (continued)

Tier 3

➤ *With less than 30 Years of Service (§ 4.1080.5(a)(2)(i))*

Age & Service Requirement Age 60 with 10 years of service, including 5 years of continuous City service.
Amount 1.50% per year of service credit at age 60 (not greater than 80%*) of the Final Average Monthly Compensation.

➤ *With 30 or more Years of Service (§ 4.1080.5(a)(2)(ii))*

Age & Service Requirement Age 60 with 30 years of service, including 5 years of continuous City service.
Amount 2.00% per year of service credit at age 60 (not greater than 80%*) of the Final Average Monthly Compensation.

* *Except when benefit is based solely on the annuity component funded by the member's contributions.*

Early Retirement Benefit:

Tier 1

Age & Service Requirement Age 55 with 10 years of continuous City service; or
 (§ 4.1005(b)) Any age with 30 years of City service.
Amount (§ 4.1007(b)) 2.16% per year of service credit (not greater than 100%) of the Final Average Monthly Compensation, reduced for retirement ages below age 60 using the following Early Retirement benefit adjustment factors:

<u>Age</u>	<u>Factor</u>	<u>Age</u>	<u>Factor</u>
45	0.6250	53	0.8650
46	0.6550	54	0.8950
47	0.6850	55	0.9250
48	0.7150	56	0.9400
49	0.7450	57	0.9550
50	0.7750	58	0.9700
51	0.8050	59	0.9850
52	0.8350	60	1.0000

SECTION 4: Reporting Information for the Los Angeles City Employees' Retirement System

Early Retirement Benefit: (continued)

Tier 3

Age & Service Requirement
(§ 4.1080.5(a)(1))

Prior to age 60 with 30 years of service, including 5 years of continuous City service.

Amount (§ 4.1080.5(a)(1))

2.00% per year of service credit (not greater than 80%*) of the Final Average Monthly Compensation, reduced for retirement ages below age 55 using the following Early Retirement benefit adjustment factors:

<u>Age</u>	<u>Factor</u>	<u>Age</u>	<u>Factor</u>
45	0.6250	50	0.7750
46	0.6550	51	0.8050
47	0.6850	52	0.8350
48	0.7150	53	0.8650
49	0.7450	54	0.8950
		55 - 60	1.0000

* Except when benefit is based solely on the annuity component funded by the member's contributions.

Enhanced Retirement Benefit:

Tier 1

Age & Service Requirement

Not applicable - see Normal Retirement age and service requirement.

Amount

Not applicable - see Normal Retirement amount.

Tier 3

► *With less than 30 Years of Service* (§ 4.1080.5(a)(3)(i))

Age & Service Requirement

Age 63 with 10 years of service, including 5 years of continuous City service.

Amount

2.00% per year of service credit at age 63 (not greater than 80%*) of the Final Average Monthly Compensation.

* Except when benefit is based solely on the annuity component funded by the member's contributions.

SECTION 4: Reporting Information for the Los Angeles City Employees' Retirement System

Enhanced Retirement Benefit: (continued)

Tier 3

➤ *With 30 or more Years of Service (§ 4.1080.5(a)(3)(ii))*

Age & Service Requirement

Age 63 with 30 years of service, including 5 years of continuous City service.

Amount

2.10% per year of service credit at age 63 (not greater than 80%*) of the Final Average Monthly Compensation.

* *Except when benefit is based solely on the annuity component funded by the member's contributions.*

Service Credit:

Tiers 1 & 3

(§ 4.1001(a) & § 4.1080.1(a))

The time component of the formula used by LACERS for purposes of calculating benefits.

**Final Average
Monthly Compensation:**

Tier 1

(§ 4.1001(b))

Equivalent of monthly average salary of highest continuous 12 months (one year); includes base salary plus regularly assigned pensionable bonuses or premium pay.*

Tier 3

(§ 4.1080.1(b))

Equivalent of monthly average salary of highest continuous 36 months (three years); limited to base salary and any items of compensation that are designated as pension based.*

* *IRC Section 401(a)(17) compensation limit would apply to all employees who began membership in LACERS after June 30, 1996.*

SECTION 4: Reporting Information for the Los Angeles City Employees' Retirement System

Cost of Living Benefit:

Tier 1

(§ 4.1022)

Based on changes to Los Angeles area Consumer Price Index, to a maximum of 3% per year; excess banked.

Tier 3

(§ 4.1080.17)

Based on changes to Los Angeles area Consumer Price Index, to a maximum of 2% per year; excess not banked.

Death after Retirement:

Tier 1 & 3

(§ 4.1010(c) & § 4.1080.10(c))

- (i) 50% of retiree's unmodified allowance continued to an eligible spouse or a domestic partner; or a modified continuance to an eligible spouse or a domestic partner at the time of member's death (or a designated beneficiary selected by member at the time of retirement)*;
- (ii) \$2,500 lump sum death benefit paid to a designated beneficiary; and
- (iii) Any unused contributions if the member has elected the cash refund annuity option.

* *The retiree may elect at the time of retirement to take a reduced allowance in order to provide for a higher continuance percentage pursuant to the provisions of either Section 4.1015 (Tier 1) or Section 4.1080.14 (Tier 3).*

Death before Retirement:

Tier 1 & 3

(§ 4.1010(a) & § 4.1080.10(a))

Greater of:

Option #1:

- (i) Eligibility – None.
- (ii) Benefit – Refund of employee contributions plus a limited pension benefit equal to 50% of monthly salary paid, according to the following schedule:

SECTION 4: Reporting Information for the Los Angeles City Employees' Retirement System

Death before Retirement: (continued)

Tier 1 & 3 (continued)

<u>Service Credit</u>	<u>Number of Monthly Payments</u>
0 years	0
1 year	2
2 years	4
3 years	6
4 years	8
5 years	10
6+ years	12

Option #2:

- (i) Eligibility – Duty-related death or after 5 years of continuous service.
- (ii) Benefit – Continuance of service or disability benefit payable under 100% joint and survivor option to an eligible spouse or qualified domestic partner.

Member Normal Contributions:

Tier 1

(§ 4.1003)

Effective July 1, 2011, the member normal contribution rate became 7% for all employees. The 7% member rate shall be paid until June 30, 2026 or until the ERIP Cost Obligation (defined in ERIP Ordinance No. 180926) is fully paid, whichever comes first*.

Beginning January 1, 2013, all non-represented members and members in certain bargaining groups are required to pay an additional 4% member contribution rate to defray the cost of providing a Retiree Medical Plan premium subsidy (this additional rate has increased to 4.5% for certain members).

Members with no eligible spouse or domestic partner at retirement can request a refund of the survivor portion of the member contributions (i.e., generally based on a contribution rate of 0.5% of pay).

* The member normal contribution rate will drop down to 6% afterwards.

SECTION 4: Reporting Information for the Los Angeles City Employees' Retirement System

Member Normal Contributions: (continued)

Tier 3

(§ 4.1080.3)

The member normal contribution rate is 7% for all employees.

All members are required to pay an additional 4% member contribution rate to defray the cost of providing a Retiree Medical Plan premium subsidy.

Members with no eligible spouse or domestic partner at retirement can request a refund of the survivor portion of the member contributions (i.e., generally based on a contribution rate of 0.5% of pay).

Disability

Tier 1 & 3

Service Requirement

(§ 4.1008(a) & § 4.1080.8(a))

5 years of continuous service

*Amount**

(§ 4.1008(c) & § 4.1080.8(c))

1/70 (1.43%) of the Final Average Monthly Compensation per year of service or 1/3 of the Final Average Monthly Compensation, if greater.

* *The benefit calculated using the service retirement formula will be paid if the member is eligible and that benefit is greater than that calculated under the disability retirement formula.*

Deferred Retirement Benefit (Vested):

Tier 1

(§ 4.1006)

Age & Service Requirement

Age 70 with 5 years of continuous City service; or

Age 60 with 5 years of continuous City service and at least 10 years elapsed from first date of membership; or

Age 55 with at least 30 years of service.

Deferred employee who meets part-time eligibility: age 60 and at least 10 years elapsed from first date of membership.

Amount

Normal retirement benefit (or refund of contributions and accumulated interest).

SECTION 4: Reporting Information for the Los Angeles City Employees' Retirement System

Deferred Retirement Benefit (Vested): (continued)

Tier 1 (continued)

Age & Service Requirement Age 55 with 5 years of continuous City service and at least 10 years elapsed from first date of membership; or
 Age 55 with 10 years of continuous City service.
 Deferred employee who meets part-time eligibility: age 55 and at least 10 years elapsed from first date of membership.

Amount Early retirement benefit (or refund of contributions and accumulated interest), using the following Early Retirement benefit adjustment factors:

<u>Age</u>	<u>Factor</u>
55	0.9250
56	0.9400
57	0.9550
58	0.9700
59	0.9850

Tier 3

(§ 4.1080.6)

Age & Service Requirement Age 60 with 5 years of continuous City service and at least 10 years elapsed from first date of membership; or
 Age 70 with 5 years of continuous City service, regardless of the number of years that have elapsed from first date of membership.

Amount Normal retirement benefit (based on a Retirement Factor of 1.50%; or refund of contributions and accumulated interest).

Age & Service Requirement Age 60 with 30 years of continuous City service and at least 10 years elapsed from first date of membership; or
 Age 63 with 10 years of service, including 5 years of continuous City service.

Amount Normal retirement benefit (based on a Retirement Factor of 2.00%; or refund of contributions and accumulated interest).

SECTION 4: Reporting Information for the Los Angeles City Employees' Retirement System

Deferred Retirement Benefit (Vested): (continued)

Tier 3 (continued)

Age & Service Requirement Age 63 with 30 years of continuous City service and at least 10 years elapsed from first date of membership.

Amount Enhanced retirement (benefit based on a Retirement Factor of 2.10%; or refund of contributions and accumulated interest).

Age & Service Requirement Age 55 (but not yet 60) with 5 years of continuous City service and at least 10 years elapsed from first date of membership.

Amount Early retirement benefit (based on a Retirement Factor of 1.50% instead of 2.00%; or refund of contributions and accumulated interest), using the following Early Retirement benefit adjustment factors:

<u>Age</u>	<u>Factor</u>
55	0.9250
56	0.9400
57	0.9550
58	0.9700
59	0.9850

Withdrawal of Contributions Benefit (Ordinary Withdrawal):

Refund of employee contributions with interest.

Changes in Plan Provisions:

Tier 2 was rescinded (Tier 2 members were transferred to Tier 1) and Tier 3 became effective February 21, 2016.

NOTE: *The summary of major Plan provisions is designed to outline principal plan benefits as interpreted for purposes of the actuarial valuation. If the System should find the plan summary not in accordance with the actual provisions, the System should alert the actuary so that both parties can be sure the proper provisions are valued.*

*Board of Administration
Los Angeles City Employees' Retirement System
202 W. 1st Street, Suite 500
Los Angeles, CA 90012-4401*

Dear Board Members:

We are pleased to submit this Actuarial Valuation and Review of Other Postemployment Benefits (OPEB) as of June 30, 2016 under Governmental Accounting Standards Board Statements No. 43 and No. 45. The report summarizes the actuarial data used in the valuation, discloses the Net OPEB Obligation (NOO) as of June 30, 2016, establishes the Annual Required Contribution (ARC) for the Fiscal Year 2017/2018, and analyzes the preceding year's experience. This report was based on the census and unaudited financial data provided by the Retirement System and the terms of the Plan as summarized in Exhibit III. The actuarial calculations were completed under the supervision of Thomas Bergman, ASA, MAAA, Enrolled Actuary and Andy Yeung, ASA, MAAA, FCA, Enrolled Actuary.

This actuarial valuation has been completed in accordance with generally accepted actuarial principles and practices. To the best of our knowledge, the information supplied in this actuarial valuation is complete and accurate. Further, in our opinion, the assumptions used in this valuation and described in Exhibit II are reasonably related to the experience of and the expectations for the Plan. The actuarial projections are based on these assumptions and the plan of benefits as summarized in Exhibits II and III.

Sincerely,

Segal Consulting, a Member of the Segal Group, Inc.

*Paul Angelo, FSA, MAAA, FCA, EA
Senior Vice President and Actuary*

*Andy Yeung, ASA, MAAA, FCA, EA
Vice President and Actuary*

SECTION 1: Valuation Summary for Los Angeles City Employees' Retirement System Measurement Under GASB 43 and 45 as of June 30, 2016

PURPOSE

This report presents the results of our actuarial valuation of the City of Los Angeles Employees' Retirement System OPEB plan as of June 30, 2016. The results are in accordance with the Governmental Accounting Standards, which prescribe an accrual methodology for accumulating the value of other postemployment benefits (OPEB) over participants' active working lifetimes.

HIGHLIGHTS OF THE VALUATION

- In the June 30, 2015 actuarial valuation reports we noted that Tier 2 had been rescinded, that all Tier 2 members would be transferred to Tier 1, and that new hires would be enrolled in a new Tier 3. However, as of the date of issuance of the June 30, 2015 valuation, the provisions of Tier 3 were not yet determined and Tier 2 employees were not yet transferred to Tier 1. For those reasons, we continued to calculate a Normal Cost rate in the June 30, 2015 valuation for all Tier 2 employees based on the Tier 2 plan provisions in effect at that time.
- Subsequent to the issuance of the June 30, 2015 valuation reports, Ordinance No. 184134 ("the Ordinance") was adopted by the City Council on January 12, 2016, and Tier 2 was rescinded. Section 4.1002.1 of the Ordinance states that "effective February 21, 2016, all persons who entered LACERS membership between July 1, 2013 and February 21, 2016, as members of Tier 2 of the Retirement System shall be members of Tier 1 of the Retirement System".
- Segal determined the funds necessary to make the OPEB Fund whole due to these reclassifications.
- Any difference in the future Tier 1 employer Normal Cost rate that results from the transfer of Tier 2 members to Tier 1 is reflected in this valuation as of June 30, 2016.
- Section 4.1080.2(a) of the Ordinance states that "effective February 21, 2016, and ongoing, every employee shall become a member of Tier 3 of the Retirement System on the first day of employment in a position with the City in which he or she is not excluded from membership pursuant to the provisions of Subsection (c) of this section, unless he or she qualifies for Tier 1 membership pursuant to the exceptions to Tier 1 membership set forth in Subsection (b)." We have been provided with the Tier 3 members entering on or after February 21, 2016.
- The Ordinance also includes a plan change to provide retiree health benefits to part-time members who retire with more than 10 years of eligibility service but less than 10 years of benefit service. The impact of the plan change is included in the reconciliations of UAAL and ARC shown in Chart 2 and Exhibit H, respectively.
- The recommended contribution has increased from \$90.5 million (4.74% of payroll) to \$96.9 million (4.92% of payroll), assuming contributions are made by the City on July 15. The main reasons for these increases in contribution rate were investment return lower than expected, and an increase in normal cost rate due in part to the enrollment of new employees in Tier 3. A complete reconciliation of the change in the recommended contribution rate is provided in Exhibit H. Rates are shown separately for Tier 1 and Tier 3 in Chart 4.

**SECTION 1: Valuation Summary for Los Angeles City Employees' Retirement System
Measurement Under GASB 43 and 45 as of June 30, 2016**

- In the June 30, 2015 valuation, we used the minimum annual contribution calculated using a single 30-year amortization layer, as the UAAL contributions required by GASB and the Board's funding policy, because those annual contributions were greater than the net amount calculated using the various amortization layers. The same 30-year minimum contribution requirement has been triggered in the June 30, 2016 valuation. The Board's funding policy includes a provision that the amortization layers be combined and/or restarted when the calculated contribution rate is less than that required to comply with the amortization standards set forth by GASB. The results in this valuation would not have been affected if we had combined the bases in this report since the 30-year contribution requirement applied again in the June 30, 2016 valuation.
- The ratio of the actuarial value of assets to actuarial accrued liabilities increased from 79.67% to 80.49%. On a market value of assets basis, the funded ratio decreased from 80.99% to 76.42%. The unfunded actuarial accrued liability increased from \$538 million to \$545 million. A complete reconciliation of the System's unfunded actuarial accrued liability is provided in Chart 2.
- As indicated in Exhibit G, the total unrecognized investment losses as of June 30, 2016 is \$747.0 million for the assets for Retirement, Health, Family Death, and Larger Annuity Benefits. These investment losses will be recognized in the determination of the actuarial value of assets for funding purposes in the next several years. This implies that earning the assumed rate of investment return of 7.50% per year (net of expenses)

on a market value basis will result in net investment losses on the actuarial value of assets after June 30, 2016. Item 9 in Exhibit G shows how, under the asset smoothing method, the \$747.0 million in unrecognized losses will be recognized in the next 6 years.

The deferred losses of \$747.0 million represent 5.3% of the market value of assets as of June 30, 2016. Unless offset by future investment losses or other unfavorable experience, the recognition of the \$747.0 million market losses is expected to have an impact on the System's future funded percentage and contribution rate requirements. This potential impact may be illustrated as follows:

- If the retiree health plan component of the deferred losses were recognized immediately in the actuarial value of assets, the funded ratio would decrease from 80.49% to 76.42%.
- If the retiree health plan component of the deferred losses were recognized immediately in the valuation value of assets, the aggregate employer rate (payable on July 15) would increase from 4.92% to about 5.4% of payroll.

**SECTION 1: Valuation Summary for Los Angeles City Employees' Retirement System
Measurement Under GASB 43 and 45 as of June 30, 2016**

- The actuarial valuation report as of June 30, 2016 is based on financial information as of that date. Changes in the value of assets subsequent to that date are not reflected. Declines in asset values will increase the actuarial cost of the Plan, while increases will decrease the actuarial cost of the Plan.
- As in prior years, the employer contribution rates provided in this report have been developed assuming they will be paid by the City on any of the following dates:
 - (1) The beginning of the fiscal year, or
 - (2) On July 15, 2017, or
 - (3) Throughout the year (i.e., the City will pay contributions at the end of every pay period).
- The Governmental Accounting Standards Board (GASB) approved two new Statements affecting the reporting of OPEB liabilities for accounting purposes. Statement No. 74 replaces Statement No. 43 and is for plan reporting. Statement No. 75 replaces Statement No. 45 and is for employer reporting. It is important to note that the new GASB rules only define OPEB expense for financial reporting purposes, and do not apply to contribution amounts for actual OPEB funding purposes. Employers and plans can still develop and adopt funding policies under current practices. Because these new Statements are not effective until fiscal year ending June 30, 2017 for Plan reporting and fiscal year ending June 30, 2018 for employer reporting, the financial reporting information in this report continues to be in accordance with Statements No. 43 and No. 45.
- Based on previous directions provided by the LACERS, we have not included in the report the projected excise tax that may be imposed by the Affordable Care Act (ACA) and related statutes. It is our understanding that the GASB Statements No. 74 and No. 75 will require the inclusion of the excise tax liability for financial reporting purposes.

**SECTION 1: Valuation Summary for Los Angeles City Employees' Retirement System
Measurement Under GASB 43 and 45 as of June 30, 2016**

SUMMARY OF VALUATION RESULTS

The key valuation results for the current and prior years are shown.

	June 30, 2016	June 30, 2015
Actuarial Accrued Liability (AAL)	\$2,793,688,955	\$2,646,989,367
Actuarial Value of Assets	2,248,753,480	2,108,924,651
Unfunded Actuarial Accrued Liability	544,935,475	538,064,716
Funded Ratio on Actuarial Value Basis	80.49%	79.67%
Market Value of Assets	2,134,877,117	2,143,705,809
Funded Ratio on Market Value Basis	76.42%	80.99%
Annual Required Contribution (ARC)		
Normal cost (beginning of year)	\$68,385,120	\$62,359,771
Amortization of the unfunded actuarial accrued liability	<u>28,182,806</u>	<u>27,827,466</u>
Total Annual Required Contribution (beginning of year)	\$96,567,926	\$90,187,237
Total Annual Required Contribution (July 15)	\$96,859,359	\$90,459,414
Total Annual Required Contribution (end of each pay period)	\$100,123,757	\$93,508,118
Projected total payroll ⁽¹⁾	\$1,968,702,630	\$1,907,664,598
ARC as a percentage of pay (there is a 12-month delay until the rate is effective) ⁽²⁾		
Beginning of year	4.91%	4.73% ⁽³⁾
July 15	4.92%	4.74% ⁽³⁾
End of each pay period	5.09%	4.90% ⁽³⁾
Total Participants	44,651	43,597
Annual OPEB Cost (AOC) for Coming Year		
Annual Required Contributions (July 15)	\$90,459,414	\$106,643,515
Interest on Net OPEB Obligations	0	0
ARC Adjustments	<u>0</u>	<u>0</u>
Total Annual OPEB Cost	\$90,459,414	\$106,643,515
AOC as a percent of pay	4.74%	5.62%

⁽¹⁾ Reflects amount calculated in the pension valuation.

⁽²⁾ A breakdown of the ARC by tier is provided in Chart 4.

⁽³⁾ The June 30, 2015 combined rates were determined in our June 30, 2015 valuation report dated October 30, 2015 and have not been restated herein to reflect any events after June 30, 2015.

Measurement Under GASB 43 and 45 as of June 30, 2016**

IMPORTANT INFORMATION ABOUT ACTUARIAL VALUATIONS

An actuarial valuation is a budgeting tool with respect to the defining future uncertain obligations of a postretirement health plan. As such, it will never forecast the precise future stream of benefit payments. It is an estimated forecast – the actual cost of the plan will be determined by the benefits and expenses paid, not by the actuarial valuation.

In order to prepare an actuarial valuation, Segal Consulting (“Segal”) relies on a number of input items. These include:

- **Plan of benefits** Plan provisions define the rules that will be used to determine benefit payments, and those rules, or the interpretation of them, may change over time. It is important to keep Segal informed with respect to plan provisions and administrative procedures, and to review the plan description in this report to confirm that Segal has correctly interpreted the plan of benefits.
- **Participant data** An actuarial valuation for a plan is based on data provided to the actuary by the Retirement Office. Segal does not audit such data for completeness or accuracy, other than reviewing it for obvious inconsistencies compared to prior data and other information that appears unreasonable. It is important for Segal to receive the best possible data and to be informed about any known incomplete or inaccurate data.
- **Actuarial assumptions** In preparing an actuarial valuation, Segal starts by developing a forecast of the benefits to be paid to existing plan participants for the rest of their lives and the lives of their beneficiaries. This requires actuarial assumptions as to the probability of death, disability, withdrawal, and retirement of each participant for each year, as well as forecasts of the plan’s benefits for each of those events. The forecasted benefits are then discounted to a present value, typically based on an estimate of the rate of return that will be achieved on the plan’s assets. All of these factors are uncertain and unknowable. Thus, there will be a range of reasonable assumptions, and the results may vary materially based on which assumptions the actuary selects within that range. That is, there is no right answer (except with hindsight). It is important for any user of an actuarial valuation to understand and accept this constraint. The actuarial model may use approximations and estimates that will have an immaterial impact on our results and will have no impact on the actual cost of the plan. In addition, the actuarial assumptions may change over time, and while this can have a significant impact on the reported results, it does not mean that the previous assumptions or results were unreasonable or wrong.
- **Assets** This valuation is based on the market value of assets as of the valuation date, as provided by the Retirement Office.

The user of Segal’s actuarial valuation (or other actuarial calculations) should keep the following in mind:

- The valuation is prepared at the request of LACERS. Segal is not responsible for the use or misuse of its report, particularly by any other party.

**SECTION 1: Valuation Summary for Los Angeles City Employees' Retirement System
Measurement Under GASB 43 and 45 as of June 30, 2016**

- An actuarial valuation is a measurement of the plan's assets and liabilities at a specific date. Accordingly, except where otherwise noted, Segal did not perform an analysis of the potential range of future financial measures. The actual long-term cost of the plan will be determined by the actual benefits and expenses paid and the actual investment experience of the plan.
- If LACERS is aware of any event or trend that was not considered in this valuation that may materially change the results of the valuation, Segal should be advised, so that we can evaluate it.
- Segal does not provide investment, legal, accounting, or tax advice. Segal's valuation is based on our understanding of applicable guidance in these areas and of the plan's provisions, but they may be subject to alternative interpretations. LACERS should look to their other advisors for expertise in these areas.

As Segal Consulting has no discretionary authority with respect to the management or assets of LACERS, it is not a fiduciary in its capacity as actuaries and consultants with respect to LACERS.

Measurement Under GASB 43 and 45 as of June 30, 2016**

November 9, 2016

ACTUARIAL CERTIFICATION

This is to certify that Segal Consulting (Segal) has conducted an actuarial valuation of certain benefit obligations of Los Angeles City Employees' Retirement System's other postemployment benefit programs as of June 30, 2016, in accordance with generally accepted actuarial principles and practices. In particular, it is our understanding that the assumptions and methods used for funding purposes meet the parameters set by the Actuarial Standards of Practice (ASOPs). Actuarial valuations are performed annually for this other postemployment benefit program with the last valuation completed as of June 30, 2015. The actuarial calculations presented in this report have been made on a basis consistent with our understanding of Governmental Accounting Standard Board (GASB) Statement No. 43 for the determination of the liability for postemployment benefits other than pensions.

The actuarial valuation is based on the plan of benefits verified by LACERS and on participant, premium, claims and financial data provided by LACERS. Segal did not audit LACERS' financial statements, but conducted an examination of all participant data for reasonableness and we concluded that it was reasonable and consistent with the prior year's data.

One of the general goals of an actuarial valuation is to establish contributions that fully fund the Retirement System's liabilities, and that, as a percentage of payroll, remain as level as possible for each generation of active members. Both the Normal Cost and the Actuarial Accrued Liability are determined under the Entry Age cost method. In no event will the recommended contribution be less than the minimum Annual Required Contribution (ARC) as determined under GASB Statement No. 43.

The actuarial computations made are for purposes of fulfilling plan accounting and funding requirements. Determinations for purposes other than meeting financial accounting and funding requirements may be significantly different from the results reported here. Accordingly, additional determinations may be needed for other purposes, such as judging benefit security at termination of the plan, or determining short-term cash flow requirements.

Segal prepared all of the supporting schedules in the Actuarial Section of the Comprehensive Annual Financial Report (CAFR) and certain supporting schedules in the Financial Section, based on the results of the June 30, 2016 actuarial valuation. A listing of the supporting schedules Segal prepared for inclusion in the Financial Section as Required Supplementary Information prescribed by GASB Statement No. 43, and in the Actuarial Section, is provided below:

Financial Section

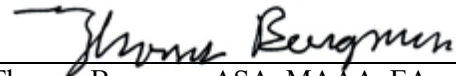

- 1) Schedule of Funding Progress
- 2) Schedule of Employer Contributions

Actuarial Section

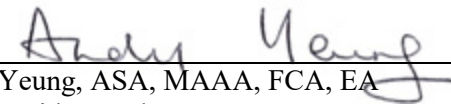

- 3) Active Member Valuation Data
- 4) Retirees and Beneficiaries Added to and Removed from Health Benefits
- 5) Solvency Test for Health Benefits
- 6) Schedule of Funding Progress
- 7) Actuarial Analysis of Financial Experience
- 8) Actuarial Balance Sheet

**SECTION 1: Valuation Summary for Los Angeles City Employees' Retirement System
Measurement Under GASB 43 and 45 as of June 30, 2016**

LACERS' staff prepared other trend data schedules in the statistical section based on information supplied in this valuation report. To the best of our knowledge, this report is complete and accurate and in our opinion presents the information necessary to comply with GASB Statement No. 43 with respect to the benefit obligations addressed. The signing actuaries are members of the Society of Actuaries, and/or the American Academy of Actuaries, as well as other professional actuarial organizations and collectively meet their "General Qualification Standards for Statements of Actuarial Opinions" to render the actuarial opinion contained herein.

Vice President and Actuary

**SECTION 2: Valuation Results for the Los Angeles City Employees' Retirement System
Measurement Under GASB 43 and 45 as of June 30, 2016**

The actuarial present value of total projected benefits uses the actuarial assumptions disclosed in Section 4 to calculate the value today of all benefits expected to be paid to current actives and retired plan members. The actuarial balance sheet shows the expected breakdown of how these benefits will be financed.

CHART 1

Actuarial Present Value of Total Projected Benefits (APB) and Actuarial Balance Sheet

	Actuarial Present Value of Total Projected Benefits (APB)	
	June 30, 2016	June 30, 2015
Participant Category		
Current retirees, beneficiaries, and dependents	\$1,275,604,225	\$1,210,066,527
Current active members	2,058,219,841	1,924,927,069
Terminated members entitled but not yet eligible	<u>50,413,399</u>	<u>42,943,089</u>
Total	\$3,384,237,465	\$3,177,936,685
	June 30, 2016	June 30, 2015
Actuarial Balance Sheet		
The actuarial balance sheet as of the valuation date is as follows:		
Assets		
1. Actuarial value of assets	\$2,248,753,480	\$2,108,924,651
2. Present value of future normal costs	590,548,510	530,947,318
3. Unfunded actuarial accrued liability	<u>544,935,475</u>	<u>538,064,716</u>
4. Present value of current and future assets	\$3,384,237,465	\$3,177,936,685
Liabilities		
5. Actuarial Present Value of total Projected Benefits	\$3,384,237,465	\$3,177,936,685

**SECTION 2: Valuation Results for the Los Angeles City Employees' Retirement System
Measurement Under GASB 43 and 45 as of June 30, 2016**

The actuarial accrued liability shows that portion of the APB (Chart 1) allocated to periods prior to the valuation date by the actuarial cost method. The chart below shows the portion of the liability for active and inactive members,

and reconciles the unfunded actuarial accrued liability from last year to this year.

CHART 2

Actuarial Accrued Liability (AAL) and Unfunded AAL (UAAL)

	June 30, 2016	June 30, 2015
Participant Category		
Current retirees, beneficiaries, and dependents	\$1,275,604,225	\$1,210,066,527
Current active members	1,467,671,331	1,393,979,751
Terminated members entitled but not yet eligible*	<u>50,413,399</u>	<u>42,943,089</u>
Total actuarial accrued liability	\$2,793,688,955	\$2,646,989,367
Unfunded Actuarial Accrued Liability		
Total actuarial accrued liability	\$2,793,688,955	\$2,646,989,367
Actuarial value of assets	<u>2,248,753,480</u>	<u>2,108,924,651</u>
Unfunded actuarial accrued liability	\$544,935,475	\$538,064,716
Development of Unfunded Actuarial Accrued Liability for the Year Ended June 30, 2016		
1. Unfunded actuarial accrued liability as of June 30, 2015		\$538,064,716
2. Employer normal cost as of June 30, 2015		62,359,771
3. Expected employer contributions during 2015/2016 fiscal year		-90,187,237
4. Interest		<u>38,267,794</u>
5. Expected unfunded actuarial accrued liability as of June 30, 2016 (1 + 2 + 3 + 4)		\$548,505,044
6. Effect of change in eligibility requirement for part-time employees		17,214,744
7. Effect of combined gains and losses*		-20,784,313
8. Unfunded actuarial accrued liability as of June 30, 2016 (5 + 6 + 7)		\$544,935,475

* Due in part to fewer than expected members retiring and enrolling in a health plan than projected in the prior valuation.

Note that the expected employer contribution in (3) reflects a 30-year effective amortization of the UAAL. The adjustment to reflect the 30-year limit on effective amortization period accounts for the difference in [(6) + (7)] above and the sum of new bases shown in Chart 3.

**SECTION 2: Valuation Results for the Los Angeles City Employees' Retirement System
Measurement Under GASB 43 and 45 as of June 30, 2016**

The unfunded actuarial accrued liability may be amortized over periods of up to 30 years. Amortization payments may be calculated as level dollar amounts or as amounts designed to remain level as a percent of a growing payroll base. Los Angeles City Employees' Retirement System has elected to amortize the unfunded actuarial accrued liability using the following rules: The costs associated with the 2009 ERIP have been amortized over 15 years beginning with the June 30, 2009 valuation date. The unfunded actuarial accrued liability as of June 30, 2012 is amortized over a fixed period of 30 years beginning July 1, 2012. Assumption changes resulting from the triennial experience study will be amortized over 20 years.

Health trend and premium assumption changes, plan changes, and gains and losses will be amortized over 15 years.

The recommended contribution is set equal to the greater of the current funding policy amount or the minimum Annual Required Contribution (ARC) as determined by GASB Statements No. 43 and No. 45. In this report, the minimum ARC requirement for fiscal year 2017/2018 (due to the application of the GASB 30-year maximum effective amortization period) is greater than the current funding policy amount due to the 15-year amortization of the experience gain base created as of June 30, 2015.

CHART 3

Table of Amortization Bases

Type	Date Established	Initial Year	Initial Amount	Outstanding Balance	Annual Payment*	Years Remaining
Plan Amendment (2009 ERIP)	06/30/2009	15	\$54,735,645	\$43,412,956	\$6,075,668	8
Combined Base**	06/30/2012	30	597,984,614	644,331,589	36,351,687	26
Experience Loss	06/30/2013	15	16,206,142	15,305,951	1,520,236	12
Change in Assumptions	06/30/2014	20	135,287,549	135,657,952	9,839,579	18
Experience Gain	06/30/2014	15	-101,972,860	-98,553,540	-9,176,014	13
Experience Gain	06/30/2015	15	-193,346,818	-190,555,707	-16,729,123	14
Plan Change***	06/30/2015	15	17,466,894	17,214,744	1,511,304	14
Experience Gain	06/30/2016	15	<u>-21,878,470</u>	<u>-21,878,470</u>	<u>-1,820,203</u>	15
Total				\$544,935,475	\$28,182,806****	

* Level percentage of pay.

** On October 23, 2012, the Board elected to combine all amortization bases as of June 30, 2012, except for the base associated with the 2009 ERIP, which remains on its original schedule. In addition, the Board adopted an initial amortization period of 30 years for the combined bases as of June 30, 2012.

*** Not shown in June 30, 2015 valuation, but reflected in 2016/2017 contribution rates shown in our plan change study dated March 14, 2016.

**** Reflects adjustment so that the equivalent single amortization payment is 30 years. Before the adjustment, the payment amount is \$27,573,134.

**SECTION 2: Valuation Results for the Los Angeles City Employees' Retirement System
Measurement Under GASB 43 and 45 as of June 30, 2016**

The Annual Required Contribution (ARC) is the amount calculated to determine the annual cost of the OPEB plan for accounting purposes on an accrual basis. The calculation consists of adding the Normal Cost of the plan to an amortization payment. Both are determined as of the start of the accounting period and adjusted as if the annual cost were to be contributed throughout the fiscal year or on July 15th.

CHART 4

Determination of Annual Required Contribution (ARC)

Tier 1 - Cost Element	Determined as of			
	June 30, 2016		June 30, 2015	
	Amount	Percentage of Compensation	Amount	Percentage of Compensation
1. Normal cost	\$67,278,447	3.47%	\$59,249,618	3.31%
2. Amortization of the unfunded actuarial accrued liability	<u>27,767,379</u>	<u>1.43%</u>	<u>26,092,737</u>	<u>1.46%</u>
3. Total Annual Required Contribution (beginning of year)	\$95,045,826	4.90%	\$85,342,355	4.77%
4. Projected Payroll ⁽¹⁾	\$1,939,683,049		\$1,788,743,164	
5. Adjustment for timing (July 15)	\$286,839	0.01%	\$257,555	0.02%
6. Total Annual Required Contribution (July 15)	\$95,332,665	4.91%	\$85,599,910	4.79%
7. Adjustment for timing (end of pay period)	\$3,499,784	0.18%	\$3,142,482	0.18%
8. Total Annual Required Contribution (end of pay period)	\$98,545,610	5.08%	\$88,484,837	4.95%

⁽¹⁾ Reflects amount calculated in the pension valuation.

7. Adjustment for timing (end of pay period)	\$56,047	0.20%		0.18%
8. Total Annual Required Contribution (end of pay period)	\$1,578,147	5.44%		5.18%

⁽¹⁾ Reflects amount calculated in the pension valuation.

⁽²⁾ Effective February 21, 2016, all Tier 2 employees were transferred to Tier 1.

⁽³⁾ In developing the UAAL contribution rate, we have combined the UAAL for Tier 1 and Tier 3 and amortized that total UAAL over the total payroll for Tier 1 and Tier 3.

⁽⁴⁾ For purposes of Government Service Buybacks for Tier 3, the UAAL rate as of June 30, 2016 is -0.01%. It is calculated by: (i) amortizing -\$21,094 over 15 years (or a credit of \$ 1,755) and (ii) dividing that credit over Tier 3 payroll (or \$29,019,581). If paid on July 15, the UAAL rate remains at -0.01% even though the credit increases to \$1,760.

⁽⁵⁾ As of June 30, 2015, Tier 3 was not yet effective (it became effective February 21, 2016), so there were no members in this tier at that time.

**SECTION 2: Valuation Results for the Los Angeles City Employees' Retirement System
Measurement Under GASB 43 and 45 as of June 30, 2016**

VOLATILITY RATIOS

OPEB plans are subject to volatility in the level of required contributions. This volatility tends to increase as OPEB plans become more mature.

The Asset Volatility Ratio (AVR), which is equal to the market value of assets divided by total payroll, provides an indication of the potential contribution volatility for any given level of investment volatility. A higher AVR indicates that the plan is subject to a greater level of contribution volatility. This is a current measure since it is based on the current level of assets.

For LACERS, the current AVR is about 1.08. This means that a 1% asset gain/(loss) (relative to the assumed investment return) translates to about 1.08% of one-year's payroll. Since LACERS amortizes actuarial gains and losses over a period of 15 years, there would be a 0.1% of payroll decrease/(increase) in the required contribution for each 1% asset gain/(loss).

The Liability Volatility Ratio (LVR), which is equal to the Actuarial Accrued Liability divided by payroll, provides an indication of the longer-term potential for contribution volatility for any given level of investment volatility. This is because, over an extended period of time, the plan's assets should track the plan's liabilities. For example, if a plan is 50% funded on a market value basis, the liability volatility ratio would be double the asset volatility ratio and the plan sponsor should expect contribution volatility to increase over time as the plan becomes better funded.

The LVR also indicates how volatile contributions will be in response to changes in the Actuarial Accrued Liability due to actual experience or to changes in actuarial assumptions.

For LACERS, the current LVR is about 1.42. This is about 31% higher than the AVR. Therefore, we would expect that contribution volatility will increase over the long-term.

This chart shows how the asset and liability volatility ratios have varied over time.

CHART 8

Volatility Ratios for Years Ended June 30, 2011 – 2016

Year Ended June 30	Asset Volatility Ratio	Liability Volatility Ratio
2011	0.80	1.07
2012	0.82	1.26
2013	0.93	1.31
2014	1.10	1.40
2015	1.12	1.39
2016	1.08	1.42

**SECTION 2: Valuation Results for the Los Angeles City Employees' Retirement System
Measurement Under GASB 43 and 45 as of June 30, 2016**

The Actuarial Valuation and Review considers the number and demographic characteristics of covered members, including active members, inactive non-vested members (entitled to a refund of member contributions), inactive vested members, retired members and beneficiaries.

This section presents a summary of significant statistical data on these member groups.

More detailed information for this valuation year and the preceding valuation can be found in Section 3, Exhibit A.

A historical perspective of how the member population has changed over the past ten valuations can be seen in this chart.

**CHART 9
Member Population: 2007 – 2016**

Measurement Under GASB 43 and 45 as of June 30, 2016**

**EXHIBIT D
Cash Flow Projections**

The ARC generally exceeds the current pay-as-you-go (“paygo”) cost of an OPEB plan. Over time the paygo cost will tend to grow and may even eventually exceed the ARC in a well-funded plan. The following table projects the paygo cost as the projected net fund payment over the next ten years.

Year Ending June 30	Projected Number of Retirees*			Projected Benefit Payments		
	Current	Future	Total	Current	Future	Total
2017	19,086	1,333	20,419	\$108,901,420	\$9,507,716	\$118,409,136
2018	18,562	2,264	20,826	109,100,502	18,207,459	127,307,961
2019	18,009	3,263	21,272	109,547,900	28,264,035	137,811,935
2020	17,441	4,312	21,753	109,330,220	39,847,712	149,177,932
2021	16,865	5,396	22,261	108,935,160	53,025,860	161,961,020
2022	16,280	6,450	22,730	108,610,818	66,800,771	175,411,589
2023	15,685	7,457	23,142	107,470,124	80,450,452	187,920,576
2024	15,083	8,451	23,534	106,667,547	94,498,648	201,166,195
2025	14,474	9,363	23,837	105,345,986	108,072,479	213,418,465
2026	13,857	10,226	24,083	104,494,149	121,303,295	225,797,444

* Includes spouses of retirees, but excludes those not receiving a subsidy from LACERS.

**SECTION 3: Supplemental Valuation Details for the Los Angeles City Employees' Retirement System
Measurement Under GASB 43 and 45 as of June 30, 2016**

It is desirable to have level and predictable plan costs from one year to the next. For this reason, the Board of Administration has approved an asset valuation method that gradually adjusts to market value. Under this valuation method, the full value of market fluctuations is not recognized in a single year and, as a result, the asset value and the plan costs are more stable.

The amount of the adjustment to recognize market value is treated as income, which may be positive or negative. Realized and unrealized gains and losses are treated equally and, therefore, the sale of assets has no immediate effect on the actuarial value.

The chart shows the determination of the actuarial value of assets as of the valuation date.

EXHIBIT G

Determination of Actuarial Value of Assets as of June 30, 2016

1. Market value of assets				\$14,005,059,515
2. Calculation of unrecognized return ⁽¹⁾				
	<u>Original</u>	<u>Portion Not</u>	<u>Amount Not</u>	
	<u>Amount</u>	<u>Recognized</u>	<u>Recognized</u>	
(a) Year ended June 30, 2016	-\$1,065,023,569	6/7	-\$912,877,345	
(b) Year ended June 30, 2015	-707,760,540	5/7	-505,543,243	
(c) Year ended June 30, 2014	1,246,285,581	4/7	712,163,189	
(d) Combined net deferred loss as of June 30, 2013 ⁽²⁾	-81,571,421	3/6	<u>-40,785,711</u>	
(e) Total unrecognized return				-\$747,043,110
3. Preliminary actuarial value: (1) - (2e)				\$14,752,102,625
4. Adjustment to be within 40% corridor				0
5. Final actuarial value of assets: (3) + (4)				<u>\$14,752,102,625</u>
6. Actuarial value as a percentage of market value: (5) ÷ (1)				105.3%
7. Market value of health assets				\$2,134,877,117
8. Valuation value of health assets (5) ÷ (1) x (7)				\$2,248,753,480
9. Deferred return recognized in each of the next 6 years:				
(a) Amount recognized on 6/30/2017				-\$88,809,313
(b) Amount recognized on 6/30/2018				-88,809,313
(c) Amount recognized on 6/30/2019				-88,809,313
(d) Amount recognized on 6/30/2020				-75,214,076
(e) Amount recognized on 6/30/2021				-253,254,873
(f) Amount recognized on 6/30/2022				<u>-152,146,224</u>
(g) Subtotal (may not total exactly due to rounding)				-\$747,043,110

⁽¹⁾ Total return minus expected return on a market value basis.

⁽²⁾ Based on action taken by the Board on September 9, 2014, the net unrecognized loss as of June 30, 2013 (i.e., \$81,571,421) has been recognized in six level amounts, with three years of recognition remaining after the June 30, 2016 valuation.

EXHIBIT I

Summary of Required Supplementary Information

Valuation date	June 30, 2016	
Actuarial cost method	Entry Age Cost Method, level percent of salary.	
Amortization method	Level percent of payroll – assuming a 4.00% increase in total covered payroll.	
Amortization period	Multiple Layers:	
	2009 ERIP	15 years
	2012 Combined Base	30 years
	Actuarial Experience	15 years
	Change in non-health related assumptions	20 years
	Change in health related assumptions	15 years
	Future ERIP	5 years
	AVA in excess of AAL	30 years
	Plan Amendment	15 years
Asset valuation method	Market value of assets less unrecognized returns in each of the last seven years. Unrecognized return is equal to the difference between the actual market return and the expected return on the market value, and is recognized over a seven-year period. The actuarial value of assets cannot be less than 60% or greater than 140% of the market value of assets.	
Actuarial assumptions:		
Investment rate of return	7.50%	
Inflation rate	3.25%	
Real across-the-board salary increase	0.75%	
Projected salary increases	Ranges from 10.50% to 4.40%	
Medical, dental, Medicare Part B trend rates	See table on page 40.	
Plan membership:	<u>June 30, 2016</u>	<u>June 30, 2015</u>
Current retirees, beneficiaries, and dependents receiving benefits	19,086	18,670
Current active participants	24,446	23,895
Terminated participants entitled but not yet eligible	<u>1,119</u>	<u>1,032</u>
Total	44,651	43,597

**SECTION 4: Supporting Information for the Los Angeles City Employees' Retirement System
Measurement Under GASB 43 and 45 as of June 30, 2016**

EXHIBIT II

Actuarial Assumptions and Actuarial Cost Method

Rationale for Assumptions: The information and analysis used in selecting each assumption that has a significant effect on this actuarial valuation is shown in the July 1, 2011 through June 30, 2014 Actuarial Experience Study dated October 8, 2014 and retiree health assumptions letter dated September 30, 2016. Unless otherwise noted, all actuarial assumptions and methods shown below apply to both Tier 1 and Tier 3 members. These assumptions have been adopted by the Board.

Measurement Date: June 30, 2016

Data: LACERS provided detailed census data and financial data for post-employment benefits.

Post-Retirement Mortality Rates:

Healthy Members and All Beneficiaries: RP-2000 Combined Healthy Mortality Table projected with Scale BB to 2020, set back one year for males and with no setback for females.

Disabled Members: RP-2000 Combined Healthy Mortality Table projected with Scale BB to 2020, set forward seven years for males and set forward eight years for females.

The above mortality tables contain about a 10% margin, based on actual to expected deaths, as a provision appropriate to reasonably anticipate future mortality improvement, based on a review of mortality experience as of the measurement date.

Termination Rates Before Retirement:

Pre-Retirement Mortality: RP-2000 Combined Healthy Mortality Table projected with Scale BB to 2020, set back one year for males and with no setback for females.

Age	Rate (%)	
	Disability	Termination*
25	0.01	5.75
30	0.03	5.75
35	0.05	4.85
40	0.09	3.50
45	0.15	2.70
50	0.19	2.50
55	0.20	2.35
60	0.20	2.25

* Rates for members with five or more years of service. Termination rates are zero for members eligible to retire.

**SECTION 4: Supporting Information for the Los Angeles City Employees' Retirement System
Measurement Under GASB 43 and 45 as of June 30, 2016**

Rates of termination for members with less than 5 years of service are as follows:

Service	Rate (%)
	Termination (Based on Service)
0	13.25
1	11.00
2	8.75
3	7.25
4	5.75

Retirement Rates:

70	100.0	100.0	100.0	100.0

⁽¹⁾ Not eligible to retire under the provisions of the Tier 3 plan.

**SECTION 4: Supporting Information for the Los Angeles City Employees' Retirement System
Measurement Under GASB 43 and 45 as of June 30, 2016**

Retirement Age and Benefit for Inactive Vested Participants:	Assume retiree health benefit will be paid at the later of age 58 or the current attained age.
Exclusion of Inactive Vested:	Inactive vested with less than 10 years of service are excluded.
Definition of Active Members:	First day of biweekly payroll following employment for new department employees or immediately following transfer from other city department.
Unknown Data for Members:	Same as those exhibited by members with similar known characteristics. If not specified, members are assumed to be male.
<hr/>	
Service:	Employment service is used for eligibility determination purposes. Benefit service is used for benefit calculation purposes.
Future Benefit Accruals:	1.0 year of service per year.
Net Investment Return:	7.50%
Salary Increases:	Inflation: 3.25%; plus additional 0.75% "across the board" salary increases (other than inflation); plus the following merit and promotional increases:

<u>Service</u>	<u>Percentage Increase</u>
0	6.50%
1	6.20%
2	5.10%
3	3.10%
4	2.10%
5	1.10%
6	1.00%
7	0.90%
8	0.70%
9	0.60%
10+	0.40%

**SECTION 4: Supporting Information for the Los Angeles City Employees' Retirement System
Measurement Under GASB 43 and 45 as of June 30, 2016**

Actuarial Value of Assets: The market value of assets less unrecognized returns in each of the last seven years. Unrecognized return is equal to the difference between the actual and expected returns on a market value basis and is recognized over a seven-year period. The actuarial value of assets cannot be less than 60% or greater than 140% of the market value of assets.

Actuarial Cost Method: Entry Age Cost Method, level percent of salary.

Per Capita Cost Development: The assumed costs on a composite basis are the future costs of providing postemployment health care benefits at each age. To determine the assumed costs on a composite basis, historical premiums are reviewed and adjusted for increases in the cost of health care services.

Maximum Dental Subsidy

<u>Carrier</u>	<u>Election Percent</u>	<u>Monthly 2016-2017 Fiscal Year Subsidy</u>
Delta Dental PPO	78.6%	\$43.92

**SECTION 4: Supporting Information for the Los Angeles City Employees' Retirement System
Measurement Under GASB 43 and 45 as of June 30, 2016**

Members who are subject to the retiree medical subsidy cap will have monthly health insurance subsidy maximums capped at the levels in effect at July 1, 2011, as shown in the table below:

	Single Party	Married/With Domestic Partner	Eligible Survivor
Under 65 – All Plans	\$1,190.00	\$1,190.00	\$593.62
<u>Over 65</u>			
Kaiser HMO	\$203.27	\$406.54	\$203.27
Blue Cross Medicare Supplement	\$478.43	\$540.77	\$478.43
UHC Medicare Adv. HMO for California	\$219.09	\$417.14	\$129.09

Adjustments to per-capita costs (as shown on page 37) based on age, gender, and status, are as follows:

Age	Retiree		Spouse	
	Male	Female	Male	Female
55	0.9000	0.9292	0.7083	0.8023
60	1.0689	1.0016	0.9483	0.9305
64	1.2263	1.0625	1.1971	1.0473
65	0.9186	0.7808	0.9186	0.7808
70	1.0647	0.8415	1.0647	0.8415
75	1.1474	0.9058	1.1474	0.9058
80+	1.2356	0.9765	1.2356	0.9765

**SECTION 4: Supporting Information for the Los Angeles City Employees' Retirement System
Measurement Under GASB 43 and 45 as of June 30, 2016**

**Spouse/Domestic
Partner Coverage:**

60% of male and 30% of female retirees who receive a subsidy are assumed to be married or have a qualified domestic partner and elect dependent coverage. Of these covered spouses/domestic partners, 100% are assumed to continue coverage if the retiree predeceases the spouse/domestic partner.

Spouse Age Difference:

Male retirees are assumed to be 4 years older than their female spouses. Female retirees are assumed to be 2 years younger than their male spouses.

Participation:

Retiree Medical and Dental Coverage Participation:

Service Range	Percent Covered*
10 – 14	65%
15 – 19	80%
20 – 24	90%
25 and Over	95%

* *Inactive members are assumed to elect coverages at 50% of the rates shown above.*

100% of retirees becoming eligible for Medicare are assumed to be covered by both Parts A and B.

SECTION 4: Supporting Information for the Los Angeles City Employees' Retirement System Measurement Under GASB 43 and 45 as of June 30, 2016

Health Care Cost Subsidy Trend Rates:

Trends to be applied in following fiscal years, to all health plans.

Trend is to be applied to premium for shown fiscal year to calculate next fiscal year's projected premium. For example, the projected single party Kaiser non-Medicare premium for 2017-2018 would be $(1 + 8.39\%) \times \$787.23 = \853.28 (before applying the age, gender, and status adjustment factors as shown on page 38).

First Fiscal Year (July 1, 2016 through June 30, 2017)

PLAN	Anthem Blue Cross PPO, Under Age 65	Anthem Blue Cross Medicare Supplement	Kaiser HMO, Under Age 65	Kaiser Senior Advantage	Anthem Blue Cross HMO, Under 65	UHC Medicare HMO
Trend to be applied to 2016-2017 Fiscal Year premium	8.27%	5.14%	8.39%	6.59%	2.22%	4.07%
			The fiscal year trend rates are based on the following calendar year trend rates:			
Trend (Approx.)			Trend (applied to calculate following year premium)			
Fiscal Year	Medicare	Non-Medicare	Calendar Year	Non-Medicare	Medicare	
2017-2018	6.38%	6.38%	2017	6.50%*	6.50%*	
2018-2019	6.13%	6.13%	2018	6.25%	6.25%	
2019-2020	5.88%	5.88%	2019	6.00%	6.00%	
2020-2021	5.63%	5.63%	2020	5.75%	5.75%	
2021-2022	5.38%	5.38%	2021	5.50%	5.50%	
2022-2023	5.13%	5.13%	2022	5.25%	5.25%	
2023 and later	5.00%	5.00%	2023 and later	5.00%	5.00%	
Dental Premium Trend						5.00% for all years
Medicare Part B Premium Trend						Trend for the 2016-17 fiscal year will be calculated based on the actual increase in Medicare B premium from 2016 to 2017, when it becomes available. 5.00% for years following the 2017 calendar year.

* For example, the 6.50% assumption, when applied to the 2017 calendar year medical premiums would provide the 2018 calendar year medical premiums.

**SECTION 4: Supporting Information for the Los Angeles City Employees' Retirement System
Measurement Under GASB 43 and 45 as of June 30, 2016**

Health Care Reform:

As previously directed by LACERS, we have not reflected in the current valuation the impact of potential excise tax imposed by the Affordable Care Act (ACA) and related statutes on certain health plans in calculating the contribution rates for the employer. We understand that the recently adopted Statements No. 74 and No. 75 by the Governmental Accounting Standards Board (GASB) for financial reporting purposes is expected to require the inclusion of the excise tax in the liability. Statement No. 74 is effective for fiscal years beginning after June 15, 2016 for plan reporting and Statement No. 75 is effective for fiscal years beginning after June 15, 2017 for employer reporting.

Administrative Expenses:

No administrative expenses were valued separately from the premium costs.

Plan Design:

Development of plan liabilities was based on the substantive plan of benefits in effect as described in Exhibit III.

**Assumption Changes
Since Prior Valuation:**

Starting premium costs and first year trends were revised to reflect 2017 calendar year premium data.

Medical and dental carrier election assumptions were updated.

Retirement rates for Tier 3 were added.

**SECTION 4: Supporting Information for the Los Angeles City Employees' Retirement System
Measurement Under GASB 43 and 45 as of June 30, 2016**

EXHIBIT III

Summary of Plan

This exhibit summarizes the major benefit provisions as included in the valuation. To the best of our knowledge, the summary represents the substantive plans as of the measurement date. It is not intended to be, nor should it be interpreted as, a complete statement of all benefit provisions.

Membership Eligibility:

Tier 1 (§4.1002(a))

All employees who became members of the Retirement System before July 1, 2013, and certain employees who became members of the Retirement System on or after July 1, 2013. In addition, pursuant to Ordinance No. 184134, all Tier 2 employees who became members of the Retirement System between July 1, 2013 and February 2, 2016 were transferred to Tier 1 effective February 2, 2016.

Tier 3 (§4.1080.2(a))

All employees who became members of the Retirement System on or after February 2, 2016, except as provided otherwise in Section 4.1080.2(b) of the Los Angeles Administrative Code.

Benefit Eligibility:

*Tier 1 (§4.1111(a))
and Tier 3 (§4.1126(a))*

Retired age 55 or older with at least 10 years of service (including deferred vested members who terminate employment and receive a retirement benefit from LACERS), or if retirement date is between October 2, 1996, and September 30, 1999 at age 50 or older with at least 30 years of service. Benefits are also payable to spouses, domestic partners, or other qualified dependents while the retiree is alive. Please note that the health subsidy is not payable to a disabled retiree before the member reaches age 55.

**Medical Subsidy for Members
Not Subject to Cap:**

*Under Age 65 or Over Age 65
Without Medicare Part A*

*Tier 1 (§4.1111(d))
and Tier 3 (§4.1126(c))*

The System will pay 4% of the maximum health subsidy (limited to actual premium) for each year of Service Credit, up to 100% of the maximum health subsidy. As of July 1, 2016, the maximum health subsidy is \$1,580.08 per month, increasing to \$1,736.88 in calendar year 2017.

**SECTION 4: Supporting Information for the Los Angeles City Employees' Retirement System
Measurement Under GASB 43 and 45 as of June 30, 2016**

*Over Age 65 and Enrolled in
Both Medicare Parts A and B*

*Tier 1 (§4.1111(e)) and
Tier 3 (§4.1126(d))*

For retirees, a maximum health subsidy shall be paid in the amount of the single-party monthly premium of the approved Medicare supplemental or coordinated plan in which the retiree is enrolled, subject to the following vesting schedule:

<u>Completed Years of Service</u>	<u>Vested Percentage</u>
1-14	75%
15-19	90%
20+	100%

Subsidy Cap for Tier 1:
(§4.1111(b))

As of the June 30, 2011 valuation, the retiree health benefits program was changed to cap the medical subsidy for non-retired members who do not contribute an additional 4% or 4.5% of employee contributions to the Pension Plan.

The capped subsidy is different for Medicare and non-Medicare retirees.

The cap applies to the medical subsidy limits at the 2011 calendar year level.

The cap does not apply to the dental subsidy or the Medicare Part B premium reimbursement.

Dependents:

*Tier 1 (§4.1111(e)(4))
and Tier 3 (§4.1126(d)(4))*

An additional amount is added for coverage of dependents which shall not exceed the amount provided to a retiree not enrolled in Medicare Parts A and B and covered by the same medical plan with the same years of service. The combined member and dependent subsidy shall not exceed the actual premium.

**SECTION 4: Supporting Information for the Los Angeles City Employees' Retirement System
Measurement Under GASB 43 and 45 as of June 30, 2016**

Dental Subsidy for Members:

*Tier 1 (§4.1114(b))
and Tier 3 (§4.1129(b))*

The System will pay 4% of the maximum dental subsidy (limited to actual premium) for each year of Service Credit, up to 100% of the maximum dental subsidy. As of July 1, 2016, the maximum dental subsidy is \$43.24 per month; increasing to \$44.60 in calendar year 2017.

There is no subsidy available to spouses or domestic partners or for dependent coverage. There is also no reimbursement for dental plans not sponsored by the System.

**Medicare Part B Reimbursement
for Members:**

*Tier 1 (§4.1113) and
Tier 3 (§4.1128)*

If a Retiree is covered by both Medicare Parts A and B, and enrolled in a LACERS medical plan or participates in the LACERS Retiree Medical Premium Reimbursement Program, LACERS will reimburse the retiree the basic Medicare Part B premium.

Surviving Spouse Medical Subsidy

*Tier 1 (§4.1115) and
Tier 3 (§4.1129.1)*

The surviving spouse or domestic partner will be entitled to a health subsidy (limited to the actual lowest cost plan available single-party premium) based on the member's years of service and the surviving dependent's eligibility for Medicare.

*Under Age 65 or Over Age 65
Without Medicare Part A*

The maximum health subsidy available for survivors is the lowest cost plan available (currently Kaiser) single-party premium (\$748.03 per month as of July 1, 2016, increasing to \$826.43 on January 1, 2017).

**SECTION 4: Supporting Information for the Los Angeles City Employees' Retirement System
Measurement Under GASB 43 and 45 as of June 30, 2016**

*Over Age 65 and Enrolled in
Both Medicare Parts A and B*

For survivors, a maximum health subsidy limited to the single-party monthly premium of the plan in which the survivor is enrolled, is provided subject to the following vesting schedule:

<u>Completed Years of Service</u>	<u>Vested Percentage</u>
1-14	75%
15-19	90%
20+	100%

Changes in Plan Provisions:

Tier 2 was rescinded (Tier 2 members were transferred to Tier 1) and Tier 3 became effective February 21, 2016.

Retiree health benefits provided to current and future part-time employees who retire with 10 or more years of eligibility service but less than 10 years of benefit service (previously not eligible for health benefits).

NOTE:

The summary of major Plan provisions is designed to outline principal plan benefits as interpreted for purposes of the actuarial valuation. If the System should find the plan summary not in accordance with the actual provisions, the System should alert the actuary so that both parties can be sure the proper provisions are valued.

**SECTION 4: Supporting Information for the Los Angeles City Employees' Retirement System
Measurement Under GASB 43 and 45 as of June 30, 2016**

**EXHIBIT IV
Definitions of Terms**

The following list defines certain technical terms for the convenience of the reader:

**Assumptions or Actuarial
Assumptions:**

The estimates on which the cost of the Plan is calculated including:

- (a) Investment return — the rate of investment yield that the Plan will earn over the long-term future;
- (b) Mortality rates — the death rates of employees and pensioners; life expectancy is based on these rates;
- (c) Retirement rates — the rate or probability of retirement at a given age;
- (d) Turnover rates — the rates at which employees of various ages are expected to leave employment for reasons other than death, disability, or retirement.

**Actuarial Present Value of Total
Projected Benefits (APB):**

Present value of all future benefit payments for current retirees and active employees taking into account assumptions about demographics, turnover, mortality, disability, retirement, health care trends, and other actuarial assumptions.

Normal Cost:

The amount of contributions required to fund the benefit allocated to the current year of service.

**Actuarial Accrued Liability
For Actives:**

The equivalent of the accumulated normal costs allocated to the years before the valuation date.

**Actuarial Accrued Liability
For Retirees:**

The single sum value of lifetime benefits to existing retirees. This sum takes account of life expectancies appropriate to the ages of the retirees and of the interest which the sum is expected to earn before it is entirely paid out in benefits.

**SECTION 4: Supporting Information for the Los Angeles City Employees' Retirement System
Measurement Under GASB 43 and 45 as of June 30, 2016**

Actuarial Value of Assets (AVA):	The value of assets used by the actuary in the valuation. These may be at market value or some other method used to smooth variations in market value from one valuation to the next.
Funded Ratio:	The ratio AVA/AAL.
Unfunded Actuarial Accrued Liability (UAAL):	The extent to which the actuarial accrued liability of the Plan exceeds the assets of the Plan. There is a wide range of approaches to paying off the unfunded actuarial accrued liability, from meeting the interest accrual only to amortizing it over a specific period of time.
Amortization of the Unfunded Actuarial Accrued Liability:	Payments made over a period of years equal in value to the Plan's unfunded actuarial accrued liability.
Investment Return (discount rate):	The rate of earnings of the Plan from its investments, including interest, dividends and capital gain and loss adjustments, computed as a percentage of the average value of the fund. For actuarial purposes, the investment return often reflects a smoothing of the capital gains and losses to avoid significant swings in the value of assets from one year to the next. If the plan is funded on a pay-as-you-go basis, the discount rate is tied to the expected rate of return on day-to-day employer funds.
Covered Payroll:	Annual reported salaries for all active participants on the valuation date.
ARC as a Percentage of Covered Payroll:	The ratio of the annual required contribution to covered payroll.
Health Care Cost Trend Rates:	The annual rate of increase in net claims costs per individual benefiting from the Plan.
Annual Required Contribution (ARC):	The ARC is equal to the sum of the normal cost and the amortization of the unfunded actuarial accrued liability.

**SECTION 4: Supporting Information for the Los Angeles City Employees' Retirement System
Measurement Under GASB 43 and 45 as of June 30, 2016**

Net OPEB Obligation (NOO):	The NOO is the cumulative difference between the annual OPEB cost and actual contributions made. If the plan is not pre-funded, the actual contribution would be equal to the annual benefit payments less retiree contributions.
Annual OPEB Cost (AOC):	Annual OPEB cost is the measure required by GASB 45 of a sole or agent employer's "cost" of participating in an OPEB plan. When an employer has no net OPEB obligation, annual OPEB cost is equal to the ARC. When a net OPEB obligation has a liability (positive) balance, annual OPEB cost is equal to (a) the ARC, plus (b) one year's interest on the beginning balance of the net OPEB obligation, less (c) an adjustment to the ARC to offset, approximately, the amount included in the ARC for amortization of the past contribution deficiencies. When a net OPEB obligation has an asset (negative) balance, the interest adjustment should be deducted from and the ARC adjustment should be added to the ARC, to determine annual OPEB cost.
ARC Adjustment:	The ARC adjustment is an amortization payment based on the prior year NOO. The purpose of the interest and ARC adjustments is to avoid "double-counting" annual OPEB cost and liabilities. Without the adjustments, annual OPEB cost and the net OPEB obligation (liability) would be overstated by the portion of the amortization amount previously recognized in annual OPEB cost. With the adjustments, annual OPEB cost should be approximately equal to the ARC that would have been charged if all prior ARCs had been paid in full, plus one year's interest on the net OPEB obligation.
Employer Contributions:	For the purposes of GASB 43/45, an employer has contributed to an OPEB plan if the employer has (a) provided benefits directly to retired plan members or their beneficiaries, (b) paid insurance premiums to insure the payment of benefits, or (c) irrevocably transferred assets to a qualifying trust, or equivalent arrangement, in which plan assets are dedicated to providing benefits to retirees and their beneficiaries in accordance with the terms of the plan and are legally protected from creditors of the employer(s) or plan administrator.

**SECTION 4: Supporting Information for the Los Angeles City Employees' Retirement System
Measurement Under GASB 43 and 45 as of June 30, 2016**

EXHIBIT V

Accounting Requirements

The Governmental Accounting Standards Board (GASB) issued Statement Number 43 -- *Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans*, and Statement Number 45 – *Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions*. Under these statements, all state and local government entities that provide other post-employment benefits (OPEB) are required to report the cost of these benefits on their financial statements. The accounting standards supplement cash accounting, under which the expense for postemployment benefits is equal to benefit and administrative costs paid on behalf of retirees and their dependents (*i.e.*, a pay-as-you-go basis).

The statements cover postemployment benefits of health, prescription drug, dental, vision and life insurance coverage for retirees; long-term care coverage, life insurance and death benefits that are *not* offered as part of a pension plan; and long-term disability insurance for employees. The benefits valued in this report are limited to those described in Exhibit III of Section 4, which are based on those provided under the terms of the substantive plan in effect at the time of the valuation and on the pattern of sharing costs between the employer and plan members. The projection of benefits is not limited by legal or contractual limits on funding the plan unless those limits clearly translate into benefit limits on the substantive plan being valued.

The new standards introduce an accrual-basis accounting requirement, thereby recognizing the employer cost of postemployment benefits over an employee's career. The standards also introduce a consistent accounting requirement for both pension and non-pension benefits.

The total cost of providing postemployment benefits is projected, taking into account assumptions about demographics, turnover, mortality, disability, retirement, health care trends, and other actuarial assumptions. These assumptions are summarized in Exhibit II of Section 4. This amount is then discounted to determine the actuarial present value of the total projected benefits (APB). The actuarial accrued liability (AAL) is the portion of the present value of the total projected benefits allocated to years of employment prior to the measurement date. The unfunded actuarial accrued liability (UAAL) is the difference between the AAL and actuarial value of assets in the Plan.

Once the UAAL is determined, the Annual Required Contribution (ARC) is determined as the normal cost (the APB allocated to the current year of service) and the amortization of the UAAL. This ARC is compared to actual contributions made and any difference is reported as the Net OPEB Obligation (NOO). In addition, Required Supplementary Information (RSI) must be reported, including historical information about the UAAL and the progress in funding the Plan. Exhibit IV of Section 4 contains a definition of terms as well as more information about GASB 43/45 concepts.

**SECTION 4: Supporting Information for the Los Angeles City Employees' Retirement System
Measurement Under GASB 43 and 45 as of June 30, 2016**

The calculation of an accounting obligation does not, in and of itself, imply that there is any legal liability to provide the benefits valued, nor is there any implication that the Employer is required to implement a funding policy to satisfy the projected expense.

Actuarial calculations reflect a long-term perspective, and the methods and assumptions use techniques designed to reduce short-term volatility in accrued liabilities and the actuarial value of assets, if any.

Actuarial valuations involve estimates of the value of reported amounts and assumptions about the probability of events far into the future, and the actuarially determined amounts are subject to continual revision as actual results are compared to past expectations and new estimates are made about the future

5446564v4/05806.003.

**Los Angeles City Employees'

November 9, 2016

*Board of Administration
Los Angeles City Employees' Retirement System
202 W. 1st Street, Suite 500
Los Angeles, CA 90012-4401*

Dear Board Members:

We are pleased to submit this Governmental Accounting Standards (GAS) 67 Actuarial Valuation as of June 30, 2016. It contains various information that will need to be disclosed in order to comply with GAS 67.

This report was prepared in accordance with generally accepted actuarial principles and practices at the request of the Board to assist in administering the System. The census and financial information on which our calculations were based was prepared by LACERS. That assistance is gratefully acknowledged.

The measurements shown in this actuarial valuation may not be applicable for other purposes. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; and changes in plan provisions or applicable law.

The actuarial calculations were completed under the supervision of Andy Yeung, ASA, MAAA, FCA, Enrolled Actuary. We are members of the American Academy of Actuaries and we meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion herein. To the best of our knowledge, the information supplied in the actuarial valuation is complete and accurate. Further, in our opinion, the assumptions as approved by the Board are reasonably related to the experience of and expectations for the System.

We look forward to reviewing this report with you and to answering any questions.

Sincerely,

Segal Consulting, a Member of The Segal Group, Inc.

By:

*Paul Angelo, FSA, MAAA, FCA, EA
Senior Vice President and Actuary*

*Andy Yeung, ASA, MAAA, FCA, EA

SECTION 1: Valuation Summary for the Los Angeles City Employees' Retirement System

Purpose

This report has been prepared by Segal Consulting to present certain disclosure information required by Statement No. 67 of the Governmental Accounting Standards Board as of June 30, 2016. This valuation is based on:

- The benefit provisions of the Pension Plan, as administered by the Board of Administration;
- The characteristics of covered active members, inactive vested members, and retired members and beneficiaries as of June 30, 2016, provided by LACERS;
- The assets of the Plan as of June 30, 2016, provided by LACERS;
- Economic assumptions regarding future salary increases and investment earnings; and
- Other actuarial assumptions, regarding employee terminations, retirement, death, etc.

Significant Issues in Valuation Year

The following key findings were the result of this actuarial valuation:

- The Governmental Accounting Standards Board (GASB) rules only define pension liability and expense for financial reporting purposes, and do not apply to contribution amounts for pension funding purposes. Employers and plans can still develop and adopt funding policies under current practices.
- When measuring pension liability, GASB uses the same actuarial cost method (Entry Age) and the same type of discount rate (expected return on assets) as LACERS uses for funding. This means that the Total Pension Liability (TPL) measure for financial reporting shown in this report is determined on the same basis as LACERS' Actuarial Accrued Liability (AAL) measure for funding. We note that the same is true for the Normal Cost component of the annual plan cost for funding and financial reporting.
- The Net Pension Liability (NPL) is equal to the difference between the TPL and the Plan's Fiduciary Net Position. The Plan's Fiduciary Net Position is equal to the market value of assets and therefore, the NPL measure is the same as the Unfunded Actuarial Accrued Liability (UAAL) calculated on a market value basis. The NPL reflects all investment gains and losses as of the measurement date. This is different from the UAAL calculated on an actuarial value of assets basis in the funding valuation that reflects investment gains and losses over a seven-year period.

SECTION 1: Valuation Summary for the Los Angeles City Employees' Retirement System

- The NPL increased from \$4.99 billion as of June 30, 2015 to \$5.62 billion as of June 30, 2016 mainly due to the return on the market value of assets of 0.10% during 2015/2016 that was less than the assumption of 7.50% used in the June 30, 2015 valuation (that loss was about \$0.89 billion). Changes in these values during the last two fiscal years ending June 30, 2015 and June 30, 2016 can be found in Exhibit 3.
- The NPLs measured as of June 30, 2016 and 2015 have been determined from the actuarial valuations as of June 30, 2016 and June 30, 2015, respectively.
- The discount rate used to determine the TPL and NPL as of June 30, 2016 and 2015 was 7.50%, following the same assumption used by the System in the pension funding valuations as of the same dates. The detailed calculations used in the derivation of the discount rate of 7.50% used in the calculation of the TPL and NPL as of June 30, 2016 can be found in Exhibit 5 of Section 2. Various other information that is required to be disclosed can be found throughout Exhibits 1 through 4 in Section 2.

SECTION 1: Valuation Summary for the Los Angeles City Employees' Retirement System

Summary of Key Valuation Results

	2016	2015
Disclosure elements for fiscal year ending June 30:		
Service cost ⁽¹⁾	\$322,574,274	\$322,380,251
Total Pension Liability	17,424,996,329	16,909,996,380
Plan Fiduciary Net Position	11,809,329,415	11,920,570,019
Net Pension Liability	5,615,666,914	4,989,426,361
Schedule of contributions for fiscal year ending June 30:		
Actuarially determined contributions	\$440,546,011	\$381,140,923
Actual contributions	440,546,011	381,140,923
Contribution deficiency (excess)	0	0
Demographic data for plan year ending June 30:		
Number of retired members and beneficiaries	18,357	17,932
Number of vested terminated members ⁽²⁾	6,895	6,507
Number of active members	24,446	23,895
Key assumptions as of June 30:		
Investment rate of return	7.50%	7.50%
Inflation rate	3.25%	3.25%
Projected salary increases ⁽³⁾	Ranges from 10.50% to 4.40%, based on years of service	Ranges from 10.50% to 4.40%, based on years of service

⁽¹⁾ The service cost is always based on the previous year's assumptions, meaning the June 30, 2016 value is based on those assumptions shown as of June 30, 2015, whereas the June 30, 2015 value is based on the June 30, 2014 assumptions (which are the same as the June 30, 2015 assumptions shown above).

⁽²⁾ Includes terminated members due a refund of employee contributions.

⁽³⁾ Includes inflation at 3.25% plus real across the board salary increase of 0.75% plus merit and promotional increases

SECTION 1: Valuation Summary for the Los Angeles City Employees' Retirement System

Important Information about Actuarial Valuations

An actuarial valuation is a budgeting tool with respect to the financing of future projected obligations of a pension plan. It is an estimated forecast – the actual long-term cost of the plan will be determined by the actual benefits and expenses paid and the actual investment experience of the plan.

In order to prepare an actuarial valuation, Segal Consulting (“Segal”) relies on a number of input items. These include:

- **Plan of benefits** Plan provisions define the rules that will be used to determine benefit payments, and those rules, or the interpretation of them, may change over time. Even where they appear precise, outside factors may change how they operate. It is important to keep Segal informed with respect to plan provisions and administrative procedures, and to review the plan summary included in this report (as well as the plan summary included in our funding valuation report) to confirm that Segal has correctly interpreted the plan of benefits.
- **Participant data** An actuarial valuation for a plan is based on data provided to the actuary by the System. Segal does not audit such data for completeness or accuracy, other than reviewing it for obvious inconsistencies compared to prior data and other information that appears unreasonable. It is important for Segal to receive the best possible data and to be informed about any known incomplete or inaccurate data.
- **Assets** This valuation is based on the market value of assets as of the valuation date, as provided by the System. The System uses an “actuarial value of assets” that differs from market value to gradually reflect year-to-year changes in the market value of assets in determining contribution requirements.
- **Actuarial assumptions** In preparing an actuarial valuation, Segal projects the benefits to be paid to existing plan participants for the rest of their lives and the lives of their beneficiaries. This projection requires actuarial assumptions as to the probability of death, disability, termination, and retirement of each participant for each year. In addition, the benefits projected to be paid for each of those events in each future year reflect actuarial assumptions as to salary increases and cost-of-living adjustments. The projected benefits are then discounted to a present value, based on the assumed rate of return that is expected to be achieved on the plan’s assets. There is a reasonable range for each assumption used in the projection and the results may vary materially based on which assumptions are selected. It is important for any user of an actuarial valuation to understand this concept. Actuarial assumptions are periodically reviewed to ensure that future valuations reflect emerging plan experience. While future changes in actuarial assumptions may have a significant impact on the reported results, that does not mean that the previous assumptions were unreasonable.

SECTION 1: Valuation Summary for the Los Angeles City Employees' Retirement System

The user of Segal's actuarial valuation (or other actuarial calculations) should keep the following in mind:

- The actuarial valuation is prepared at the request of the Board to assist the sponsors of the Fund in preparing items related to the pension plan in their financial reports. Segal is not responsible for the use or misuse of its report, particularly by any other party.
- An actuarial valuation is a measurement of the plan's assets and liabilities at a specific date. Accordingly, except where otherwise noted, Segal did not perform an analysis of the potential range of future financial measures. The actual long-term cost of the plan will be determined by the actual benefits and expenses paid and the actual investment experience of the plan.
- If the System is aware of any event or trend that was not considered in this valuation that may materially change the results of the valuation, Segal should be advised, so that we can evaluate it.
- Segal does not provide investment, legal, accounting, or tax advice. Segal's valuation is based on our understanding of applicable guidance in these areas and of the plan's provisions, but they may be subject to alternative interpretations. The Board should look to their other advisors for expertise in these areas.

As Segal Consulting has no discretionary authority with respect to the management or assets of the Plan, it is not a fiduciary in its capacity as actuaries and consultants with respect to the Retirement System.

SECTION 2: GASB 67 Information for the Los Angeles City Employees' Retirement System

EXHIBIT 1

General Information – “Financial Statements”, Note Disclosures and Required Supplementary Information for a Single-Employer Pension Plan

Plan Description

Plan administration. The Los Angeles City Employees' Retirement System (LACERS) was established by City Charter in 1937. LACERS is a single employer public employee retirement system whose main function is to provide retirement benefits to the civilian employees of the City of Los Angeles.

Under the provisions of the City Charter, the Board of Administration (the "Board") has the responsibility and authority to administer the Plan and to invest its assets. The Board members serve as trustees and must act in the exclusive interest of the Plan's members and beneficiaries. The Board has seven members: four members, one of whom shall be a retired member of the system, shall be appointed by the Mayor subject to the approval of the Council; two members shall be active employee members of the system elected by the active employee members; one shall be a retired member of the system elected by the retired members of the system.

Plan membership. At June 30, 2016, pension plan membership consisted of the following:

Retired members or beneficiaries currently receiving benefits	18,357
Vested terminated members entitled to, but not yet receiving benefits ⁽¹⁾	6,895
Active members	<u>24,446</u>
Total	49,698

⁽¹⁾ Includes terminated members due a refund of employee contributions.

Benefits provided. LACERS provides service retirement, disability, death and survivor benefits to eligible employees. Employees of the City become members of LACERS on the first day of employment in a position with the City in which the employee is not excluded from membership. Members employed prior to July 1, 2013 are designated as Tier 1, and pursuant to Ordinance No. 184134, all Tier 2 employees who became members of the Retirement System between July 1, 2013 and February 21, 2016 were transferred to Tier 1 effective February 21, 2016. Those employed on or after February 21, 2016 are designated as Tier 3 (unless a specific exception applies to the employee, providing a right to Tier 1 status).

SECTION 2: GASB 67 Information for the Los Angeles City Employees' Retirement System

Tier 1 members are eligible to retire for service with a normal retirement benefit once they attain the age of 70, or the age of 60 with 10 or more years of continuous City service, or the age of 55 with 30 or more years of City service. Tier 3 members are eligible to retire for service with a normal retirement benefit at 1.50% of final average monthly compensation per year of service credit once they attain the age of 60 with 10 years of service (but with less than 30 years of service), including 5 years of continuous City service, or at 2.00% of final average monthly compensation per year of service credit once they attain the age of 60 with 30 years of service, including 5 years of continuous City service.

Tier 1 and 3 members are eligible to retire for disability once they have 5 or more years of continuous service.

Under the Tier 1 formula, the monthly service retirement allowance at normal retirement age is 2.16% of final average monthly compensation per year of service credit. Reduced retirement allowances are available for early retirement for Tier 1 members reaching age 55 with 10 or more years of continuous City service, or with 30 or more years of City service at any age. The Tier 1 early retirement reduction factors, for retirement below age 60, are as follows:

<u>Age</u>	<u>Factor</u>	<u>Age</u>	<u>Factor</u>
45	0.6250	53	0.8650
46	0.6550	54	0.8950
47	0.6850	55	0.9250
48	0.7150	56	0.9400
49	0.7450	57	0.9550
50	0.7750	58	0.9700
51	0.8050	59	0.9850
52	0.8350	60	1.0000

Under the Tier 3 formula, the monthly service retirement allowance at normal retirement age is 2.00% of final average monthly compensation per year of service credit. Reduced retirement allowances are available for early retirement for Tier 3 members prior to reaching age 60 with 30 years of service, including 5 years of continuous City service. The Tier 3 retirement reduction factors at early retirement ages are as follows:

<u>Age</u>	<u>Factor</u>	<u>Age</u>	<u>Factor</u>
45	0.6250	50	0.7750
46	0.6550	51	0.8050
47	0.6850	52	0.8350
48	0.7150	53	0.8650
49	0.7450	54	0.8950
		55-60	1.0000

SECTION 2: GASB 67 Information for the Los Angeles City Employees' Retirement System

Tier 3 members are eligible to retire with an enhanced retirement benefit at 2.00% of final average monthly compensation per year of service credit once they attain the age of 63 with 10 years of service (but with less than 30 years of service), including 5 years of continuous City service, or at 2.10% of final average monthly compensation per year of service credit once they attain the age of 63 with 30 years of service, including 5 years of continuous City service.

Under Tier 1, pension benefits are calculated based on the highest average salary earned during a 12-month period (including base salary plus regularly assigned pensionable bonuses or premium pay). Under Tier 3, pension benefits are calculated based on the highest average salary earned during a 36-month period (limited to base salary and any items of compensation that are designated as pension based). The IRC Section 401(a)(17) compensation limit applies to all employees who began membership in LACERS after June 30, 1996.

For Tier 1 members, the maximum monthly retirement allowance is 100% of the final average monthly compensation. For Tier 3 members, the maximum monthly retirement allowance is 80% of the final average monthly compensation, except when the benefit is based solely on the annuity component funded by the member's contributions.

In lieu of the service retirement allowance under the Tier 1 and Tier 3 formula ("unmodified option"), the member may choose an optional retirement allowance. The unmodified option provides the highest monthly benefit and a 50% continuance to an eligible surviving spouse or domestic partner for Tier 1 and Tier 3 members. The optional retirement allowances require a reduction in the unmodified option amount in order to allow the member the ability to provide various benefits to a surviving spouse, domestic partner, or named beneficiary.

LACERS provides annual cost-of-living adjustments (COLAs) to all retirees. The cost-of-living adjustments are made each July 1 based on the percentage change in the average of the Consumer Price Index for the Los Angeles-Riverside-Orange County Area--All Items For All Urban Consumers. It is capped at 3.0% for Tier 1 and 2.0% for Tier 3.

The City of Los Angeles contributes to the retirement plan based upon actuarially determined contribution rates adopted by the Board of Administration. Employer contribution rates are adopted annually based upon recommendations received from LACERS' actuary after the completion of the annual actuarial valuation. The combined employer contribution rate as of June 30, 2016 was 23.47% of compensation.¹

All members are required to make contributions to LACERS regardless of the tier in which they are included. Currently, all Tier 1 members contribute at 11.0% or 11.5% of compensation and all Tier 3 members contribute at 11.0% of compensation.

¹ Based on the June 30, 2014 funding valuation (which established funding requirements for fiscal year 2015/2016), and after adjustments to phase in over five years the impact of new actuarial assumptions as a result of the June 30, 2011 Triennial Experience Study on the City's contributions. Exhibit 4 in Section 2 of this report provides details on how this rate was calculated.

SECTION 2: GASB 67 Information for the Los Angeles City Employees' Retirement System

EXHIBIT 2

Net Pension Liability

The components of the Net Pension Liability of LACERS are as follows:

	June 30, 2016	June 30, 2015
Total Pension Liability	\$17,424,996,329	\$16,909,996,380
Plan Fiduciary Net Position	<u>-11,809,329,415</u>	<u>-11,920,570,019</u>
System's Net Pension Liability	\$5,615,666,914	\$4,989,426,361
Plan Fiduciary Net Position as a percentage of the Total Pension Liability	67.77%	70.49%

The Net Pension Liability was measured as of June 30, 2016 and 2015. The Plan's Fiduciary Net Position (plan assets) was valued as of the measurement date, while the Total Pension Liability was determined based upon the results of the actuarial valuations as of June 30, 2016 and 2015, respectively.

Plan provisions. The plan provisions used in the measurement of the NPL as of June 30, 2016 and 2015 are the same as those used in the LACERS funding valuations as of June 30, 2016 and 2015, respectively.

Actuarial assumptions. The Total Pension Liabilities as of June 30, 2016 and June 30, 2015 were determined by actuarial valuations as of June 30, 2016 and June 30, 2015, respectively. The actuarial assumptions used in both the June 30, 2015 and June 30, 2016 valuations were based on the results of an experience study for the period from July 1, 2011 through June 30, 2014. They are the same as the assumptions used in the June 30, 2016 funding actuarial valuation for LACERS. In particular, the following actuarial assumptions were applied to all periods included in the measurement:

Inflation	3.25%
Salary increases	Ranges from 10.50% to 4.40% based on years of service, including inflation
Investment rate of return	7.50%, net of pension plan investment expense, including inflation
Other assumptions	Same as those used in the June 30, 2016 actuarial valuation

The long-term expected rate of return on pension plan investments was determined using a building-block method in which expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These returns are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation and subtracting expected investment expenses and a risk margin. The target allocation and projected arithmetic real

SECTION 2: GASB 67 Information for the Los Angeles City Employees' Retirement System

rates of return for each major asset class, after deducting inflation, but before deducting investment expenses, used in the derivation of the long-term expected investment rate of return assumption are summarized in the following table:

Asset Class	Target Allocation	Long-Term (Arithmetic) Expected Real Rate of Return
U.S. Large Cap Equity	20.40%	5.94%
U.S. Small Cap Equity	3.60%	6.64%
Developed International Equity	21.75%	6.98%
Emerging Market Equity	7.25%	8.48%
Core Bonds	16.53%	0.71%
High Yield Bonds	2.47%	2.89%
Private Real Estate	5.00%	4.69%
Cash	1.00%	(0.46)%
Credit Opportunities	5.00%	3.07%
Public Real Assets	5.00%	3.41%
Private Equity	<u>12.00%</u>	10.51%
Total	100.00%	

Discount rate: The discount rate used to measure the Total Pension Liability was 7.50% as of June 30, 2016 and June 30, 2015. The projection of cash flows used to determine the discount rate assumed plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the actuarially determined contribution rates. For this purpose, only employer and employer contributions that are intended to fund benefits for current plan members and their beneficiaries are included. Projected employer contributions that are intended to fund the service costs for future plan members and their beneficiaries, as well as projected contributions from future plan members, are not included. Based on those assumptions, the Pension Plan's Fiduciary Net Position was projected to be available to make all projected future benefit payments for current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the Total Pension Liability as of both June 30, 2016 and June 30, 2015.

SECTION 2: GASB 67 Information for the Los Angeles City Employees' Retirement System

Sensitivity of the Net Pension Liability to changes in the discount rate. The following presents the Net Pension Liability of LACERS as of June 30, 2016, calculated using the discount rate of 7.50%, as well as what LACERS' Net Pension Liability would be if it were calculated using a discount rate that is 1-percentage-point lower (6.50%) or 1-percentage-point higher (8.50%) than the current rate:

	1% Decrease (6.50%)	Current Discount (7.50%)	1% Increase (8.50%)
Net Pension Liability as of June 30, 2016	\$7,914,674,553	\$5,615,666,914	\$3,700,956,045

Covered-employee payroll⁽⁵⁾	\$1,876,946,179	\$1,835,637,409
Plan Net Pension Liability as percentage of covered-employee payroll	299.19%	271.81%

SECTION 2: GASB 67 Information for the Los Angeles City Employees' Retirement System

Notes to Exhibit 3

- (1) Excludes interest on the portion of the benefit payments attributable to the transfer to the City of Los Angeles Fire and Police Pension Plan (see note 2 below), since that transfer was made on July 24, 2015.*
- (2) Includes a transfer of \$2,138,996 to the City of Los Angeles Fire and Police Pension Plan due to a change in membership for certain employees in the Office of Public Safety.*
- (3) Beginning of year segregation of a portion of the Reserve for Member Contributions into the (non-pension related) Reserve for Larger Annuity Contributions (\$4,666,410). The Reserve for Larger Annuity Contributions has increased to \$5,199,707 as of June 30, 2015.*
- (4) Excludes the Reserve for Larger Annuity Contributions (Acct. 256), based on directions from LACERS. This reserve has been separately identified by LACERS for the first time in the June 30, 2015 valuation, pursuant to a suggestion made by Segal. The amount in Acct. 256 was \$5,199,707 as of June 30, 2015.*
- (5) Covered-employee payroll represents the collective total of the pensionable wages of all LACERS membership tiers.*

SECTION 2: GASB 67 Information for the Los Angeles City Employees' Retirement System

EXHIBIT 4

Schedule of Employer Contributions – Last Ten Fiscal Years

Year Ended June 30	Actuarially Determined Contributions	Contributions in Relation to the Actuarially Determined Contributions	Contribution Deficiency (Excess)	Covered-Employee Payroll⁽¹⁾	Contributions as a Percentage of Covered-Employee Payroll
2007	\$277,516,400	\$277,516,400	\$0	\$1,646,055,902	16.86%
2008	288,119,041	288,119,041	0	1,741,849,669	16.54%
2009	274,554,786	274,554,786	0	1,832,795,577	14.98%
2010	258,642,795	258,642,795	0	1,827,864,283	14.15%
2011	303,560,953	303,560,953	0	1,678,059,440	18.09%
2012	308,539,905	308,539,905	0	1,715,197,133	17.99%
2013	346,180,852	346,180,852	0	1,736,112,598	19.94%
2014	357,649,232	357,649,232	0	1,802,931,195	19.84%
2015	381,140,923	381,140,923	0	1,835,637,409	20.76%
2016	440,546,011	440,546,011	0	1,876,946,179	23.47%

⁽¹⁾ Covered-employee payroll represents the collective total of the pensionable wages of all LACERS membership tiers.

SECTION 2: GASB 67 Information for the Los Angeles City Employees' Retirement System

Notes to Exhibit 4

Methods and assumptions used to establish “actuarially determined contribution” (ADC) rates:

Valuation date	Actuarially determined contribution rates are calculated as of June 30, two years prior to the end of the fiscal year in which contributions are reported
Actuarial cost method	Entry Age Cost Method (individual basis)
Amortization method	Level percent of payroll
Amortization period	Multiple layers, closed amortization periods. Actuarial gains/losses are amortized over 15 years. Assumption or method changes are amortized over 20 years. Plan changes, including the 2009 ERIP, are amortized over 15 years. Future ERIPs will be amortized over 5 years. Actuarial surplus is amortized over 30 years. The existing layers on June 30, 2012, except those arising from the 2009 ERIP and the two GASB 25/27 layers, were combined and amortized over 30 years.
Asset valuation method	Market value of assets less unrecognized returns in each of the last seven years. Unrecognized return is equal to the difference between the actual market return and the expected return on the market value, and is recognized over a seven-year period. The actuarial value of assets cannot be less than 60% or greater than 140% of the market value of assets.
Actuarial assumptions:	<u>June 30, 2016 valuation date</u>
Investment rate of return	7.50%
Inflation rate	3.25%
Real across-the-board salary increase	0.75%
Projected salary increases ⁽¹⁾	Ranges from 10.50% to 4.40%, based on years of service
Cost of living adjustments	3.00% for Tier 1; 2.00% for Tier 2 (actual increases are contingent upon CPI increases with a 3.00% maximum for Tier 1 and a 2.00% maximum for Tier 2)
Mortality	Healthy: RP-2000 Combined Healthy Mortality Table projected with Scale BB to 2020, set back one year for males and with no setback for females
Other assumptions	Same as those used in the June 30, 2016 funding actuarial valuation

⁽¹⁾ Includes inflation at 3.25% plus across the board salary increases of 0.75% plus merit and promotional increases.

SECTION 2: GASB 67 Information for the Los Angeles City Employees' Retirement System

2113	1	0 **	0 **	0	0	0
2114	0	0 **	0 **	0	0	0

* Mainly attributable to employer contributions to fund each year's annual administrative expenses.

** Less than \$1 million, when rounded.

Note that in preparing the above projections, we have not taken into consideration the one-year delay between the date of the contribution rate calculation and the implementation.

SECTION 2: GASB 67 Information for the Los Angeles City Employees' Retirement System

EXHIBIT 5

Projection of Pension Plan's Fiduciary Net Position for Use in Calculation of Discount Rate as of June 30, 2016

(\$ in millions) - continued

Notes:

- (1) Amounts may not total exactly due to rounding.
- (2) Amounts shown for the year beginning July 1, 2015 row are actual amounts, based on the unaudited financial statements provided by LACERS.
- (3) Years 2024-2041, 2047-2078, and 2084-2098 have been omitted from this table.
- (4) Column (a): None of the projected beginning Plan Fiduciary Net Position amounts shown have been adjusted for the time value of money.
- (5) Column (b): Projected total contributions include employee and employer normal cost contributions based on closed group projections (based on covered active members as of June 30, 2016); plus employer contributions to the unfunded actuarial accrued liability; plus contributions to fund each year's annual administrative expenses reflecting an 15-year amortization schedule. Contributions are assumed to occur halfway through the year, on average.
- (6) Column (c): Projected benefit payments have been determined in accordance with paragraph 39 of GAS Statement No. 67, and are based on the closed group of active, inactive vested, retired members, and beneficiaries as of June 30, 2016. The projected benefit payments reflect the cost of living increase assumptions used in the June 30, 2016 funding valuation report. Benefit payments are assumed to occur halfway through the year, on average. In accordance with paragraph 31.b.(1)(e) of GASB Statement No. 67, the long-term expected rate of return on Plan investments of 7.50% was applied to all periods of projected benefit payments to determine the discount rate.
- (7) Column (d): Projected administrative expenses are calculated as approximately 0.14% of the projected beginning Plan Fiduciary Net Position amount. The 0.14% portion was based on the actual fiscal year 2015 - 2016 administrative expenses as a percentage of the beginning Plan Fiduciary Net Position amount as of July 1, 2015. Administrative expenses are assumed to occur halfway through the year, on average.
- (8) Column (e): Projected investment earnings are based on the assumed investment rate of return of 7.50% per annum.
- (9) As illustrated in this Exhibit, the Plan's Fiduciary Net Position was projected to be available to make all projected future benefit payments for current Plan members. In other words, there is no projected 'cross-over date' when projected benefits are not covered by projected assets. Therefore, the long-term expected rate of return on Plan investments of 7.50% per annum was applied to all periods of projected benefit payments to determine the Total Pension Liability as of June 30, 2016 shown earlier in this report, pursuant to paragraph 44 of GASB Statement No. 67.

5445947v5/05806.114
