State of Connecticut<br>State Employees Retirement Commission<br>55 Elm Street<br>Hartford, CT 06106

Members of the Commission:
Connecticut General Statutes Section 5-155a governs the operation of the Connecticut State Employees Retirement System (SERS). The actuary makes periodic valuations of the contingent assets and liabilities of the Retirement System at the direction of the Commission. We are pleased to submit the report giving the results of the actuarial valuation of the Retirement System prepared as of June 30, 2016.

The purpose of the report is to provide a summary of the funded status of SERS as of June 30, 2016 and to recommend rates of actuarially determined contributions rates for the fiscal year ending June 20, 2018 and June 30, 2019. The report indicates that annual actuarially determined employer contribution at the rate of $44.31 \%$ of compensation for the fiscal year ending June 30, 2018 and $47.26 \%$ of compensation for the fiscal year ending June 30, 2019 is sufficient to support the benefits of the System.

Since the previous valuation, the actuarial assumptions and methods have been changed to reflect the latest experience investigation for the five-year period ending June 30, 2015 and the December 8, 2016 agreement between the State and the State Employees Bargaining Agent Coalition (SEBAC). In preparing the valuation, the actuary relied on data provided by the Comptroller's Office. While not verifying data at the source, the actuary performed tests for consistency and reasonableness.

The System is funded on an actuarial reserve basis. The actuarial assumptions recommended by the actuary and adopted by the Commission are reasonably related to the experience under the System and to reasonable expectations of anticipated experience under the System. The funding objective of the System is that contribution amounts will be sufficient to fully fund the liabilities of System over a reasonable funding period. The funding method determines the unfunded actuarial accrued liability (UAAL) as the excess of actuarial accrued liability over the actuarial value of assets. The UAAL is allocated to 1 ) the portion attributable the unfunded accrued liability as of 1984 (called the Statutory UAAL base) and 2) the remainder of the UAAL which is called the 2016 UAAL base. The Statutory UAAL base is amortized over the 40-year period beginning 1992 while the 2016 UAAL base is amortized over a closed 30 -year period beginning 2016. As of June 30, 2016, the weighted average amortization period is 25.1 years.

This is to certify that the valuation was prepared in accordance with principles of practice prescribed by the Actuarial Standards Board, and that the actuarial calculations were performed by qualified actuaries in accordance with accepted actuarial procedures, based on the current provisions of the retirement system and on actuarial assumptions that are internally consistent and reasonably based on the actual experience of the System.

Future actuarial results may differ significantly from the current results presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law. Since the potential impact of such factors is outside the scope of a normal actuarial valuation, an analysis of the range of results is not presented herein.

The actuarial computations presented in this report are for purposes of determining the recommended funding amounts for the System. Use of these computations for purposes other than meeting these requirements may not be appropriate.

The undersigned meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein.

Sincerely yours,

John J. Garrett, ASA, FCA, MAAA

## SECTION I - SUMMARY OF PRINCIPAL RESULTS

1. For convenience of reference, the principal results of the current and preceding valuations are summarized below:

| Valuation Date | June 30, 2016 | June 30, 2014 |
| :---: | :---: | :---: |
| Number of active members | 50,019 | 49,976 |
| Annual compensation | \$ 3,720,751,429 | \$ 3,487,576,617 |
| Retired members and beneficiaries: |  |  |
| Number | 48,191 | 45,803 |
| Annual allowances | \$ 1,745,785,103 | \$ 1,576,606,022 |
| Deferred Vested Members: |  |  |
| Number | 1,412 | 1,457 |
| Annual allowances | \$ 20,316,080 | \$ 20,956,362 |
| Assets: |  |  |
| Market Value | \$ 10,636,702,645 | \$ 10,472,567,077 |
| Actuarial Value | \$ 11,922,965,860 | \$ 10,584,795,257 |
| Unfunded actuarial accrued liability | \$ 21,693,750,225 | \$ 14,920,814,520 |
| Single Equivalent Amortization period (years) | 25.1 | 17.0 |
| Funded Ratio based on Actuarial Assets | 35.5\% | 41.5\% |
| Funded Ratio based on Market Assets | 31.6\% | 41.1\% |
| For Fiscal Year Ending | June 30, 2018 | June 30, 2016 |
| Actuarially Determined Employer Contribution (ADEC): |  |  |
| Normal | \$ 365,570,268 | \$ 278,812,817 |
| Accrued liability | 1,282,836,995 | 1,235,654,507 |
| Total | \$ 1,648,407,263 | \$ 1,514,467,324 |
| Actuarially Determined Employer Contribution Rate (ADEC): |  |  |
| Normal | 9.83\% | 7.99\% |
| Accrued liability | 34.48\% | 35.43\% |
| Total | 44.31\% | 43.42\% |

2. All amounts shown that are prior to June 30, 2010 were developed and/or reported by the prior actuarial firm. The results of the valuation are given in Schedule A.
3. Comments on the valuation results are given in Section IV, comments on the experience and actuarial gains and losses during the valuation year are given in Section VII and the rates of contribution payable by employers are given in Section V.
4. Schedule B of this report presents the development of the actuarial value of assets.
5. Schedule D details the actuarial assumptions and methods employed. Since the last valuation, changes to the demographic assumptions include changes to the rates of withdraws, disability retirement, service retirement and mortality. The analysis and basis for these changes are included in the latest Experience Investigation for the five-year period ending June 30, 2015. Further, economic assumptions (assumed rates of inflation and investment return), the actuarial cost method, and the UAAL amortization methodology were changed in accordance with the Memorandum of Agreement (MOU) between the State and SEBAC effective December 8, 2016.
6. Schedule F gives a summary of the benefit and contribution provisions of the plan. There were no changes to the plan provisions since the last valuation.
7. The Governmental Accounting Standards Board issued Statement No. 67 (GASB 67) in June 2012 and is effective for plan years beginning after June 15, 2013. GASB 67 replaced GASB 25 for plans and a separate GASB 67 report will be prepared for the Commission. We have provided some supplemental disclosure information and tables in Section VI.
8. As shown in the Summary of Principal Results, the funding ratio is the ratio of the actuarial value of assets to the accrued liability. The funded ratio is an indication of progress in funding the promised benefits using a long-term, stable funding approach. Since the ratio is less than $100 \%$, there is a need for contributions in addition to the plan's normal cost. The funded ratio based on the market value of assets is also provided for informational purposes.

*Years

This valuation also includes 1,412 deferred vested members with estimated annual benefits of \$20,316,080.

## SECTION III - ASSETS

1. As of June 30, 2016, the total market value of assets amounted to $\$ 10,636,702,645$ as reported by the Comptroller's Office. This amount includes $\$ 15,989,968$ of receivables as of the valuation date. The estimated investment return for the two plan years since the last valuation were $3.43 \%$ and ( $0.16 \%$ ), respectively. Schedule $C$ shows receipts and disbursements of the System for the two years preceding the valuation date and a reconciliation of the fund balances at market value.
2. The actuarial value of assets used for the current valuation was $\$ 11,922,965,860$. The estimated investment return for the two plan years on an actuarial value of assets basis was $8.46 \%$ and $5.30 \%$, respectively, which can be compared to the investment return assumed over the two-year period of $8.00 \%$ (the change in assumed investment rate of return applies to year following June 30, 2016). Schedule B shows the development of the actuarial value of assets as of June 30, 2016.
3. Schedule C shows receipts and disbursements of the System for the two years preceding the valuation date and a reconciliation of the fund balances at market value.

## SECTION IV - COMMENTS ON VALUATION

1. Schedule A of this report outlines the results of the valuation of the Retirement System as of June 30, 2016. The valuation was prepared in accordance with the actuarial assumptions and methods set forth in Schedule D and the actuarial cost method which is described in Schedule E.
2. The valuation shows that the System has a total actuarial accrued liability of $\$ 33,616,716,085$, of which $\$ 22,931,601,402$ is for the benefits payable on account of present retired members, beneficiaries of deceased members, and inactive members entitled to deferred vested benefits, and $\$ 10,685,114,683$ is for the benefits expected to be payable on account of present active members, based on service to the valuation date. Against these liabilities, the System has total present assets for valuation purposes of $\$ 11,922,965,860$ as of June 30 , 2016. When this amount is deducted from
the actuarial accrued liability of $\$ 33,616,716,085$, there remains $\$ 21,693,750,225$ as the unfunded actuarial accrued liability (UAAL).
3. The December 8, 2016 MOU between the State and SEBAC contains several changes to the funding methods and assumptions used in developing valuation results. First, the actuarial cost method utilized in the valuation is the Entry Age Normal cost method. This cost method is used to determine the annual normal cost contribution for active members as well as the determination of the unfunded actuarial accrued liability. Second, the amortization of the UAAL is reset to separately amortize the portion attributable to the unfunded liability as of 1984 (Statutory UAAL base) over the period ending June 30, 2032 and the remaining UAAL (2016 UAAL base) which is funded over a 30 -year period ending June 30, 2047. Future actuarial gains and losses will be amortized over closed 25 -year periods beginning the year each separate base is established. Finally, the MOU change the amortization method from a level percentage of payroll amortization method to a level dollar method to be phased in over a 5 year period. These changes, in addition to the change in the assumed rate of inflation (from $2.75 \%$ to $2.50 \%$ ) and the change in the assumed rate of investment return (from $8.00 \%$ to $6.90 \%$ ) are expected to markedly enhance the stability of valuation results in future years.
4. The employer's contributions to the System consist of normal cost contributions and accrued liability contributions. The normal cost, now determined using the Entry Age Normal cost method, represents the ultimate cost of the benefits and the accrued liability contribution is an addition (reduction in case of a surplus) due to the amortization of the unfunded accrued liability. The valuation indicates that annual employer normal cost contributions at the rate of $9.83 \%$ of active members' compensation are required to provide the currently accruing benefits of the System.
5. The following table provides the components of the total UAAL and the derivation of the amortization amounts required in accordance with the MOU.

## Total UAAL Amortization Schedule (\$ thousands)

|  | UAAL | Remaining Amortization Period (years) | Amortization Payment |
| :---: | :---: | :---: | :---: |
| Statutory Base (1984 UAAL) | 4,138,969 | 15 | 353,894 |
| 2016 Base | 17,554,781 | 30 | 928,943 |
| Total UAAL | 21,693,750 |  | 1,282,837 |
| Single Equivalent <br> Amortization Period (yrs) |  |  | 25.1 |
| Annual Valuation Payroll |  |  | 3,720,751 |
| UAAL Amortization Rate |  |  | 34.48\% |

6. We have determined that a contribution of $34.48 \%$ of payroll is required to amortize the unfunded accrued liability of $\$ 21,693,750,225$ over the scheduled amortization periods in accordance with the MOU.
7. Schedule $J$ of this report shows the amortization schedule for the total UAAL.

## SECTION V - CONTRIBUTIONS PAYABLE BY EMPLOYER

The following table shows the amount and rate of contribution payable by the employer as determined from the present valuation for the 2017/2018 fiscal year.

| Contribution for | Contribution Amount | Contribution Rate |
| :---: | :---: | :---: |
| A. Normal Cost: <br> Service retirement benefits <br> Disability benefits <br> Survivor benefits <br> Total Normal Cost <br> B. Less Member Contributions | $\$ 424,679,586$ $22,440,498$ $\underline{2,225,412}$ $\$ 449,345,496$ $(83,775,228)$ | $\begin{array}{r} 11.41 \% \\ 0.60 \% \\ 0.07 \% \\ \hline 12.08 \% \\ \\ \\ \hline(2.25) \% \\ \hline \end{array}$ |
| C. Employer Normal Cost | \$365,570,268 | 9.83\% |
| D. Unfunded Actuarial Accrued Liabilities (25.1 year level percent of payroll amortization) | \$1,282,836,995 | 34.48\% |
| E. Total (C. + D.) | \$1,648,407,263 | 44.31\% |

The following table shows a breakdown by group of the normal cost amount and rate payable by the employer as determined from the present valuation for the 2017/2018 fiscal year.

| Group | Normal Cost | Normal Rate |
| :--- | ---: | :---: |
| Tier I - Hazardous | $\$$ | 877,540 |
| Tier I - Plan B | $11,811,772$ | $22.69 \%$ |
| Tier I - Plan C | 256,394 | 6.42 |
| Tier II - Hazardous | $31,873,412$ | 20.80 |
| Tier II - Others | $82,512,307$ | 8.29 |
| Tier IIA - Hazardous | $89,969,539$ | 18.37 |
| Tier IIA - Others | $86,361,068$ | 7.56 |
| Tier III - Hazardous | $20,192,645$ | 12.90 |
| Tier III - Hybrid Plan | $12,990,459$ | 6.94 |
| Tier III - Others | $28,725,132$ | 6.40 |
| Total | $\$ 365,570,268$ | $9.83 \%$ |

The following table provides the projected required contributions for the fiscal year ending June 30, 2019. These results assume a $6.90 \%$ investment return on actuarial value of assets and a 24.1 year amortization period.

| Projected Contributions <br> Required for Fiscal Year <br> Ending June 30, 2019 | Roll Forward of <br> June 30, 2016 Valuation |  |
| :---: | :---: | :---: |
|  | As \% of Pay | $\$$ |
| Unfunded Actuarial <br> Accrued Liabilities | $3.77 \%$ | $\$ 376,197,543$ |
| Total | $47.26 \%$ | $\$ 1,819,895,718$ |

## SECTION VI - ACCOUNTING INFORMATION

1. Governmental Accounting Standards Board (GASB) issued Statements No. 67 and 68 which replaced Statements No. 25 and 27 for plan years beginning after June 15, 2013. The information required under the new GASB Statements will be issued in separate reports. The following is a distribution of the number of employees by type of membership:

## SECTION VII - EXPERIENCE

Actual experience will never (except by coincidence) coincide exactly with assumed experience. It is assumed that gains and losses will be in balance over a period of years, but sizable year to year fluctuations are common. Detail on the derivation of the experience gain/(loss) for the two year period ended June 30, 2016 is shown below. Schedule H provides detailed gain/(loss) by source.
(1) UAAL* as of June 30, 2014 \$ 14,920.8
(2) Total Normal cost from 2014 valuation 355.9
(3) Actual Employer and Employee contributions 1,565.1
(4) Interest accrual: [[(1) +(2)] x .08]-[(3) x.0392] 1,160.7
(5) Expected UAAL as of June 30, 2015: (1) + (2) - (3) + (4) \$ 14,872.3
(6) Total Normal cost for 2015 fiscal year 371.7
(7) Actual Employer and Employee contributions 1,652.8
(8) Interest accrual: [[(5) + (6)] x .08]-[(7) x .0392] 1,154.7
(9) Expected UAAL as of June 30, 2016: (5) + (6) - (7) + (8) \$ 14,745.9
(10) Assumption Changes

DEATHS AFTER RETIREMENT: The RP-2014 White Collar Mortality Table projected to 2020 by Scale BB at $100 \%$ for males and $95 \%$ for females is used for the period after retirement and for dependent beneficiaries. Representative values of the assumed annual rates of mortality are as follows:

| Age | Males | Females | Age | Males | Females |
| :---: | :--- | :--- | :---: | :---: | :---: |
| 40 | $0.043 \%$ | $0.031 \%$ | 65 | $0.705 \%$ | $0.579 \%$ |
| 45 | 0.067 | 0.052 | 70 | 1.133 | 0.933 |
| 50 | 0.272 | 0.194 | 75 | 1.943 | 1.553 |
| 55 | 0.384 | 0.250 | 80 | 3.407 | 2.688 |
| 60 | 0.501 | 0.348 | 85 | 6.247 | 4.826 |

In our opinion, the projection of the mortality rates with Scale BB provide a sufficient margin in the assumed rates of mortality to allow for additional improvement in mortality experience.

The RP-2014 Disabled Retiree Mortality Table at $65 \%$ for males and $85 \%$ for females is used for the period after disability.

ASSET METHOD: Actuarial Value, as developed in Schedule B. The actuarial value of assets recognizes a portion of the difference between the market value of assets and the expected value of assets, based on the assumed valuation rate of return. The amount recognized each year is $1 / 5$ of the difference between market value and expected actuarial value. In addition, the actuarial value of assets cannot be less than $80 \%$ or more than $120 \%$ of the market value of assets.

VALUATION METHOD: Entry Age Normal cost method. See Schedule E for a brief description of this method.

SPOUSES: For members who have elected spouse coverage, husbands are assumed to be three years older than their wives.

PERCENT MARRIED: $80 \%$ of active members are assumed to be married with an average of two children who are on average age 12.

## OTHER ASSUMPTIONS:

- $20 \%$ of Pre-Retirement deaths are assumed to be service related,
- $50 \%$ of Tier I Hazardous Employees are assumed to be State Police,
- To take into account State Police Supplemental Benefits and the offset of Workers Compensation, Social Security, and Non-Rehabilitation Earnings, the following minimum and maximum benefits as a percent of salary are assumed for disability benefits:

|  | Minimum | Maximum |
| :--- | :---: | :---: |
| $\frac{60 \%}{}$ | $80 \%$ |  |
| Tier I State Police | $40 \%$ | $60 \%$ |

## SCHEDULE E

## ACTUARIAL COST METHOD

The valuation is prepared on projected benefit basis, under which the present value of each member's expected benefits at retirement or death is determined, based on age, service and sex and using the interest rate assumed to be earned in the future ( $6.90 \%$ per annum). The calculations take into account the probability of a member's death or termination of employment prior to becoming eligible for a benefit, as well as the possibility of his terminating with a service, disability or survivor's benefit. Future salary increases are also anticipated. The present value of the expected benefits payable on account of the active members is added to the present value of the expected future payments to retired members, beneficiaries and members entitled to deferred vested benefits to obtain the present value of all expected benefits payable from the System on account of the present group of members and beneficiaries.

The employer contributions required to support the benefits of SERS are determined following a level funding approach, and consist of a normal cost contribution and an unfunded actuarial accrued liability contribution. The normal contribution is determined using the "entry age normal" method. Under this method, a calculation is made for pension benefits to determine the uniform and constant percentage rate of employer contribution which, if applied to the compensation of the average new member during the entire period of his anticipated covered service, would be required in addition to the contributions of the member to meet the cost of all benefits payable on his behalf.

The unfunded actuarial accrued liability is determined by subtracting the actuarial value of assets from the actuarial accrued liability. The UAAL is amortized according to the MOU between the State and SEBAC. The employer required contribution amount is the sum of the normal cost contribution and the UAAL amortization payment.

Average Salary of the five highest paid years of service. No one year's earnings can be greater than $130 \%$ of the average of the two preceding years in calculating the Final Average Earnings.

Tier I Hazardous - 20 years of credited service.
Tier I Plans B and C - Earliest of age 55 with 25 years of service, age 60 with 10 years of service, or age 70 with 5 years of service.

Tier II Hazardous - 20 years of credited service.
Tier II and IIA - For those who will be eligible for retirement on or before July 1, 2022, the earliest of age 62 with 10 years of vesting service (effective July 1, 1992), age 60 with 25 years
of vesting service, age 70 with 5 years of vesting service, or age 62 with 5 years of actual state service for terminations on or after July 1, 1997.

For those who will not be eligible for retirement on or before July 1, 2022, the earliest of age 65 with 10 years of vesting service, age 63 with 25 years of vesting service, age 70 with 5 years of vesting service.

Tier III Hazardous - Earlier of Age 50 and 20 years of benefit service or 25 years of benefit service.

Tier III - Age 63 and 25 years of benefit service or Age 65 and 10 years of benefit service.

Tier I Hazardous - $50 \%$ of FAE plus $2 \%$ for each year of service in excess of 20.

Tier I Plan B - 2\% of FAE times years of service up to age 65. Thereafter, $1 \%$ of FAE up to $\$ 4,800$, plus $2 \%$ of FAE in excess of $\$ 4,800$ times years of service. At age 70 , greater of $1.25 \%$ of FAE up to $\$ 4,800$ plus $2.5 \%$ of FAE in excess of $\$ 4,800$ times years of service (maximum 20 years) or 1.0\% of FAE up to $\$ 4,800$ plus $2 \%$ of FAE in excess of $\$ 4,800$ times year of service. Minimum benefit with 25 years is $\$ 833.34$ per month.

Tier I Plan C $-2 \%$ of FAE times years of service. At age 70 , greater of $2.5 \%$ of FAE times years of service (maximum 20 years) or $2.0 \%$ of FAE times years of service. Minimum benefit with 25 years is $\$ 833.34$ per month.

Tier II,IIA and III Hazardous - 2.5\% of FAE times years of service up to 20 years plus $2.0 \%$ of FAE times years of service in excess of 20 years, if any. Minimum benefit with 25 years is $\$ 360$ per month.

Tier II, IIA and III All Others - 1.40\% of FAE plus $0.433 \%$ of FAE in excess of year's breakpoint*, times years of service from October 1, 1982 up to 35 years plus $1.625 \%$ of FAE times years of service in excess of 35 years, if any. Minimum benefit with 25 years if $\$ 360$ per month.

* $\$ 10,700$ increased by $6 \%$ each year after 1982 , rounded to nearest $\$ 100$ but not greater than Social Security Covered Compensation.

## Early Retirement Benefit

Eligibility

Benefit
Hazardous - None.
Tier I - Age 55 with 10 years of service.
Tier II and IIA - Age 55 with 10 years of service.
Tier III - Age 58 with 10 years of service.

Tier I - Benefit is Normal Retirement Benefit reduced for retirement prior to age 60 with less than 25 years of service.

Tier II, IIA and III - Benefit is Normal Retirement Benefit reduced 0.25\% (effective July 1, 1991) for each month prior to age 60 if at least 25 years of service or age 62 if at least 10 but less than 25 years of service.

For those who retire on or after October 2, 2011 but prior to meeting the age and service requirements for a normal retirement, will be subject to a benefit reduced by $0.50 \%$ for each month prior to Normal Retirement.

## Disability Retirement Benefit

Tier I

Tier II, IIA and III

For non-service disabilities occurring prior to age 60 with at least 5 years of service, benefit is $3 \%$ of FAE times years of service; maximum benefit is $1.667 \%$ of FAE times year of service projected to age 65.

For service disabilities occurring prior to age 60, benefit is $1.667 \%$ of Salary times years of service projected to age 65 (maximum 30 years).

Exception: State Police benefit is equal to the normal retirement benefit if more than 20 years of service. State Police also receives an additional benefit of $\$ 360$ per month plus $\$ 300$ to spouse plus $\$ 300$ to a surviving dependent child.

Prior to age 65 for service related disability or at any age with at least 10 years of service, benefit is $1.333 \%$ of FAE plus $0.50 \%$ of FAE in excess of the year's breakpoint, times service projected to age 65 (maximum 30 years).

## Pre-Retirement Spouse's Benefit

Tier I

Tier II, IIA and III

Tiers I, II, IIA and III

Tier l-10 years of service.
Tier II and IIA - Effective July 1, 1997, 5 years of actual state service, 10 years of vesting service, or age 70 with 5 years of service.

Tier III - 10 years of benefit service.

Tier I - Benefit is payable at Normal Retirement Age or an Early Retirement Benefit is payable at age 55.

Tier II and IIA - Benefit is payable at Normal Retirement Age or an Early Retirement Benefit is payable at age 55.

Tier III - Benefit is payable at Normal Retirement Age or an Early Retirement Benefit is payable at age 58.

State Police - Survivor benefits to spouse of $\$ 670$ per month plus $\$ 300$ to a surviving dependent child.

If eligible for early or normal retirement, $50 \%$ of the average of the Life Benefit and the 50\% Joint \& Survivor Benefit the member would have received.

If not eligible for retirement but with 25 years of service, the same benefit calculated as though age 55 using service and earnings at death.

If not eligible for retirement, return of contributions (5\% interest).

If eligible for early or normal retirement, $50 \%$ of the $50 \%$ Joint \& Survivor Benefit the member would have received.

If not eligible for retirement but with 25 years of service, the same benefit calculated as though age 55 using service and earnings at death.

If not eligible for retirement, return of contributions (5\% interest).

If death is due to employment and there are dependent children under age 18 , spouse will be paid $\$ 100,000$ in 10 annual installments while living and not remarried. In addition, $\$ 50$ per month will be paid to each child while under age 18.

If death is due to employment and there are no dependent children under age 18, spouse will be paid $\$ 50,000$ in not less than 10 annual installments.

## Payment Options

Annual adjustments each July 1 of up to $5 \%$ for retirements prior to July 1, 1980; 3\% for retirements after July 1, 1980. For members (and beneficiaries) not covered by Social Security and age 62 and over, the maximum increase is $6 \%$.

For employees retiring after June 30, 1999, the annual adjustment will be $60 \%$ of the increase in CPI up to $6 \%$ and $75 \%$ of the increase in the CPI over 6\%. This adjustment will be no less than $2.5 \%$ and no greater than $6 \%$.

Employees retiring between July 1, 1997 and June 30, 1999 made an irrevocable choice between the above formula and a fixed $3 \%$ annual adjustment.

An employee from Tier IIA must have at least 10 years of actual state service or directly make the transition into retirement in order to be eligible for annual adjustments.

For employees retiring on or after October 2, 2011, the minimum COLA shall be $2.0 \%$ and the maximum COLA shall be $7.5 \%$.

4\% of earnings up to Social Security Taxable Wage Base plus $5 \%$ of earnings above that level.
$2 \%$ of earnings up to Social Security Taxable Wage Base plus $5 \%$ of earnings above that level.
$5 \%$ of earnings.
$4 \%$ of earnings.
None.
$5 \%$ of earnings.
$2 \%$ of earnings.

[^1]Individuals hired on or after July 1, 2011 otherwise eligible for the Alternate Retirement Plan ("ARP") shall be eligible to be members of the new Hybrid Plan in addition to their existing choices. Individuals who are currently members of the ARP shall be eligible to join the Hybrid Plan on a one time option at the full actuarial cost. The Hybrid Plan shall have defined benefits identical to Tier II/IIA and Tier III for individuals hired on or after July 1, 2011, but shall require employee contributions 3\% higher than the contribution required from the Applicable Tier II/IIA/III Plan. An employee shall have the option, upon leaving state service, of accepting the defined benefit amount, or electing to receive a return of his/her contributions to the Hybrid Plan, plus a $5 \%$ employer match, plus 4\% interest ("cash out option"). In the event the employee elects the cash out option, he/she shall permanently waive any entitlement they may have to health insurance as a retired state employee unless they convert the cash out option to a periodic payment as would be required under the current ARP Plan.

## ACTUARIAL SURPLUS TEST

Section 5-162(h) of the General Statutes of Connecticut provides that the Retirement Commission may grant additional Cost-of-Living Adjustments (COLAs) for retired members if an actuarial surplus exists. An actuarial surplus is deemed to exist if three criteria are met.
I. Investment Income: The actual rate of return for the Fiscal Year ending on the valuation date must exceed the actuarial interest rate assumption.

| Market Value of Assets on June 30, 2015: (A) | $\$ 10,737,492,074$ |
| :--- | ---: |
| Market Value of Assets on June 30, 2016: (B) | $\$ 10,636,702,645$ |
| Investment Income for FY 2015-2016: (I) | $\$(17,334,272)$ |
| Actual Rate of Return for FY 2015-2016: 21 / (A + B - I) | $(0.16) \%$ |
| Actuarial Interest Rate Assumption: | $8.00 \%$ |

Actual return of $(0.16) \%$ is less than the assumed $8.00 \%$, so the first criterion is not met.
II. Assets vs. Liabilities: Market value of assets must exceed $50 \%$ of specified liabilities.

Market Value of Assets on June 30, 2016: \$10,636,702,645
Specified Liabilities on June 30, 2016:
Liability for Retired Members
\$22,664,892,602
Liability for Terminated Vested Members
\$266,708,800
Liability for Member Contributions with Interest
\$1,091,811,686
Total
\$24,023,413,088
$50 \%$ of Specified Liabilities
\$12,011,706,544
Market Value does not exceed $50 \%$ of specified liabilities so the second criterion is not met.
III. Unfunded Liability: Actual unfunded liability must be less than the projected unfunded liability five years from the determination date.

Actual Unfunded Liability on June 30, 2016:
\$21,693,750,225
Projected Unfunded Liability on June 30, 2021 (see next page):
\$8,454,273,000
Actual Unfunded Liability is not less than Projected Unfunded Liability so the third criterion is not met and therefore, no actuarial surplus exists.

## SCHEDULEI

(continued)

## ACTUARIAL SURPLUS TEST PROJECTION OF UNFUNDED LIABILITY

Section 5-162-h(b)(2) of the General Statutes of Connecticut specifies the means of calculating the Projected Unfunded Liability used in the third criterion of the Actuarial Surplus Test. The projection reflects the actual unfunded liability as of December 31, 1983 adjusted for changes in actuarial assumptions and cost methods through the determination date. No provision is made in the Statute for reflecting the impact of plan changes. The projection below reflects the following changes: data correction (June 30, 1987); change in actuarial assumptions (June 30, 1987); change in actuarial cost method (June 30, 1988); change in actuarial assumptions - interest rate only (June 30, 1989); change in actuarial cost method - amortization period only (June 30, 1992); change in actuarial assumptions (June 30, 1993); change in actuarial cost method - level percent amortization (June 30, 1997); change in actuarial methods and assumptions (June 30, 2000); change in actuarial assumptions (June 30, 2004); change in actuarial assumptions (June 30, 2008); change in actuarial assumptions (June 30, 2012) change in actuarial assumptions (June 30, 2016).
