165 Capitol Avenue
Hartford, CT 06106

Re: Actuarial Valuation of the State Teachers'
Retirement System as of June 30, 1989

Dear Members of the Board:

Under the supervision and direction of the undersigned, The Wyatt Company has prepared an actuarial valuation of the State Teachers' Retirement System as of June 30, 1989 in accordance with generally accepted actuarial principles and practices. To the best of our knowledge, the results set forth in this report are complete and accurate and the contribution requirement for the State of Connecticut developed for the fiscal year ending June 30, 1991 as well as the actuarial present value of accrued benefits shown herein fairly reflect the status of the System at the times indicated.

In preparing this report, we have relied upon the following:

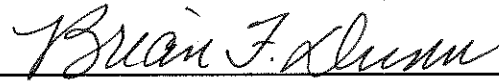

- Member census data as of June 30, 1989 submitted by the Board. This data was not audited by us, but was checked for reasonableness and appears to be sufficient for the purposes of this report.
- Financial data as of June 30, 1989 provided by the State Treasurer's Office and the Board. This data was not audited by us, but appears to be sufficient for the purposes of this report.
- Revised actuarial assumptions which, in the aggregate, are reasonably related to the past experience of the System and to expected future results. These assumptions were approved by the Board at its meeting on November 29, 1989.
- Actuarial methods and the provisions of the System which are summarized in this report. Included is the change in the method of developing the actuarial value of assets which the Board also approved at its November meeting.

State Teachers' Retirement Board
January 10, 1990

If, in connection with this actuarial valuation of the System, you have any other investigations which you would like us to conduct, or if any questions arise in connection with this report, we will be pleased to proceed according to your instructions.

Respectfully submitted,

THE WYATT COMPANY

STATE OF CONNECTICUT
STATE TEACHERS' RETIREMENT SYSTEM
PURPOSE AND SCOPE

This report has been prepared by The Wyatt Company to:

- Present the principal results of the actuarial valuation of the State Teachers' Retirement System as of June 30, 1989, based on the revised actuarial assumptions and methods approved by the Board at its November 29, 1989 meeting;
- Compare these results with those from the previous valuation;
- Provide to the State Teachers' Retirement Board the contribution requirement for the State under Public Act 79-436 (as amended) for the fiscal year ending June 30, 1991; and
- Provide information about the financial status of the System, including a measure of the extent to which benefits have been funded.

The introduction to this document presents a summary of the principal results of the June 30, 1989 actuarial valuation, including the State contribution requirement for the fiscal year ending June 30, 1991 and the funded status of the System as of June 30, 1989. A comparison of these results with those from the previous valuation is also included.

Exhibit 1 shows the determination of the unfunded actuarial accrued liability and the normal cost for the year. In Exhibit 2, we develop the State contribution requirement for the fiscal year ending June 30, 1991 in accordance with Public Act 79-436 (as amended).

It should be noted that the Member census data as of June 30, 1989 reflects the third and final year of salary increases attributable to the Education Enhancement Act. Exhibit 3 incorporates the impact of the Education Enhancement Act in three sets of projections of the State's future contribution requirements.

Exhibit 4 is an historical review of the funded status of the System.

Exhibit 5 consists of a reconciliation of the market value of assets from July 1, 1988 to June 30, 1989. In Exhibit 6 we develop the actuarial value of assets to be used in determining the State contribution requirement.

In Exhibit 7 and the accompanying charts, we present information regarding the census data for the Members of the System.

The principal provisions of the System are outlined in Exhibit 8, while the actuarial assumptions and cost methods used in this valuation are summarized in Exhibit 9.

At the request of the co-chairpersons of the Appropriations Committee of the State Legislature, we developed the State contribution requirement for the fiscal year ending June 30, 1991, using the projected unit credit actuarial cost method in place of the entry age actuarial cost method. Results of these alternative calculations appear in Exhibit 10.

The report concludes with descriptions of the entry age actuarial cost method and the projected unit credit actuarial cost method.

STATE OF CONNECTICUT
STATE TEACHERS' RETIREMENT SYSTEM
SUMMARY OF PRINCIPAL VALUATION RESULTS

A. Important Changes

Since the last actuarial valuation of the System as of June 30, 1987, the State Legislature enacted P.A. 89-333 which requires that the System be valued on the basis of an 8½% interest rate assumption.

At its November 29, 1989 meeting, the State Teachers' Retirement Board approved changes in certain other actuarial assumptions and methods as a result of an experience study of the System.

These changes and their effects on the costs and liabilities of the System are included in this report.

B. Contribution Requirement

The State contribution requirement for the fiscal year ending June 30, 1991 was determined in accordance with Public Act 79-436 (as amended) and was based on the revised actuarial assumptions and methods referenced above.

Contribution Requirement for the Fiscal Year Ending June 30, 1991	\$ 304,331,000
--	----------------

A detailed development of this contribution requirement is included as Exhibit 2.

C. Funded Status of the System

The funded status of the System as of June 30, 1989 was measured by comparing the market value of assets with the actuarial present value of accrued benefits as of that date. This actuarial present value of accrued benefits was based on Members' service as of the valuation date with salary projected to retirement using the revised actuarial assumptions.

1. Actuarial Present Values for:

a. Retired Teachers, Beneficiaries, Survivors, Dependents, and Other Inactive Teachers	\$ 2,052,961,000
b. Active Teachers	3,757,694,000
c. Member Contributions	<u>1,279,520,000</u>
d. Total	\$ 7,090,175,000

2. Market Value of Assets \$ 4,136,564,000

3. Funded Ratio: Item 2 ÷ Item 1.d. 58.3%

A review of the recent history of the funded ratio of the System is presented in Exhibit 4.

STATE OF CONNECTICUT
STATE TEACHERS' RETIREMENT SYSTEM

DETERMINATION OF THE UNFUNDED ACTUARIAL ACCRUED LIABILITY
AND THE NORMAL COST

The actuarial cost method used to determine the State contribution to the System is the entry age actuarial cost method. Under this method, the normal cost for retirement benefits for each Member is defined as the level percent of the Member's salary needed as an annual contribution from entry age to retirement age to fund the Member's projected benefit. The actuarial accrued liability is the accumulated value of such normal costs for each Member from entry age to the date of the current valuation. (Note: Under this actuarial cost method, the actuarial accrued liability does not represent the liability for benefits accrued as of the valuation date.) The unfunded actuarial accrued liability is the excess of the actuarial accrued liability over the actuarial value of the System's assets.

A. Unfunded Actuarial Accrued Liability

1. Actuarial Accrued Liability for Retirement Benefits

a. Member Contributions	\$ 1,279,520,000
b. Active Teachers	4,611,694,000
c. Terminated Vested and Inactive Teachers	1,729,000
d. Retired Teachers and Beneficiaries	2,038,373,000
e. Survivors and Dependents	<u>12,859,000</u>
f. Total	\$ 7,944,175,000

2. Actuarial Value of Assets

3,600,763,000

3. Unfunded Actuarial Accrued Liability:
Item 1f. - Item 2

\$ 4,343,412,000

B. Normal Cost

1. Normal Cost as of July 1, 1989	\$ 127,787,000
2. Annual Compensation of Active Teachers	1,540,789,000
3. Normal Cost as a Percent of Annual Compensation	8.3%

STATE OF CONNECTICUT
STATE TEACHERS' RETIREMENT SYSTEM
DEVELOPMENT OF THE STATE CONTRIBUTION REQUIREMENT
FOR THE FISCAL YEAR ENDING JUNE 30, 1991

The State contribution requirement for the fiscal year ending June 30, 1991 was determined in accordance with Public Act 79-436 (as amended) and was based on the expected unfunded actuarial accrued liability as of June 30, 1990 and an estimate of the July 1, 1990 normal cost. This estimate was based on the July 1, 1989 normal cost and an estimate of future salary increases.

To develop the expected unfunded actuarial accrued liability as of June 30, 1990, the actual unfunded actuarial accrued liability as of June 30, 1989 was added to the normal cost as of July 1, 1989 and this sum was adjusted for one year's interest at the new valuation rate of 8.5% per annum. This result was then reduced by the State contributions adjusted with interest. The expected unfunded actuarial accrued liability was then amortized in accordance with Public Act 79-436 (as amended) which requires that changes after 1980 be funded separately by contributions of normal cost plus 30-year amortization of the applicable unfunded actuarial accrued liability.

As shown on the following page, the expected unfunded actuarial accrued liability and the contribution for the amendments to the System resulting from Public Acts 82-91 and 87-381 were developed separately. There was no normal cost associated with Public Acts 82-91 and 87-381 because they affected only retired Members.

The State contribution requirement for the fiscal year ending June 30, 1991 is \$304,331,000 based on the revised assumptions and methods approved by the Board. In the absence of any of these changes, the State contribution requirement for the fiscal year ending June 30, 1991 would have been \$408,198,000.

STATE OF CONNECTICUT
STATE TEACHERS' RETIREMENT SYSTEM
PROJECTED CONTRIBUTIONS BASED ON THE JUNE 30, 1989 VALUATION

The following tables contain projections of the State contribution requirements under three alternative assumptions regarding the future growth of teachers' salaries.

For the purpose of these illustrations, we have developed 40-year projections based on aggregate salary increases of 6%, 8%, and 10% per year, assuming the number of active teachers will remain at 40,258. Results shown for 1980-1989 (which correspond to contributions for fiscal years 1982 - 1991) are based on actual valuations of the System. Results shown for the projection period from 1990 to 2029 (which correspond to contributions for fiscal years from 1992 to 2031) are based on estimates of future results.

Each line of the tables contains the normal cost and unfunded actuarial accrued liability as of a particular valuation date followed by contribution information related to the appropriate fiscal year. The full contribution amount and the required contribution amount under PA 79-436 (as amended) are included both as a dollar figure and as a percentage of the historical or estimated future teachers' payroll, as applicable. For example, the June 30, 1986 valuation generated a normal cost of \$132,310,000 and an unfunded actuarial accrued liability of \$3,818,585,000. Together, those results were used in calculating both the full contribution of \$321,551,000 and the required contribution of \$241,563,000 for the fiscal year ending June 30, 1988. The above contribution requirements represent 26.9% and 20.2%, respectively, of the teachers' payroll of \$1,193,463,000 for the fiscal year ending June 30, 1987.

The following differences exist between the required contributions as recommended by the Board and as shown on the tables and the actual contribution amounts appropriated to the System:

<u>Fiscal Year</u> <u>Ending June 30,</u>	<u>Required</u> <u>Contribution</u>	<u>Actual</u> <u>Contribution</u>
1989	\$302,917,000	\$282,917,000
1990	\$348,639,000	\$321,639,000

For consistency with other numbers shown, the tables contain the required amounts but the projections take the actual amounts into consideration.

STATE OF CONNECTICUT
STATE TEACHERS' RETIREMENT SYSTEM
THE FUNDED STATUS OF THE SYSTEM

As noted in the Summary of Valuation Results, we have compared the market value of assets with the actuarial present value of accrued benefits to obtain one measure of how the System is meeting its obligation to fund benefits payable to its Members.

The actuarial present value of benefits (the liabilities under the System) was based on Members' service as of the valuation date and upon salary projected to retirement using the revised actuarial assumptions which are summarized in Exhibit 9. In attempting to compare the current results with those of prior years, it is crucial to keep in mind that the actuarial basis of the calculations has been changed. Therefore, the actuarial present value of benefits as of June 30, 1989 is not comparable to results from prior years. The increase in the funded ratio to 58.3% and the decrease of the unfunded ratio to 191.7% are primarily due to changes in the measurement scale (i.e., the actuarial assumptions).

Fiscal Year Ending June 30	Market Value of Assets	Actuarial Present Value of Benefits	Funded Ratio	Unfunded Actuarial Present Value of Benefits	Annual Compensation	Unfunded Ratio
1980	\$ 1,049,306,000	\$ 2,603,702,000	40.3%	\$ 1,554,396,000	\$ 692,547,000	224.4%
1982	1,154,963,000	3,244,804,000	35.6%	2,089,841,000	769,500,000	271.6%
1984	1,696,074,000	4,398,687,000	38.6%	2,702,613,000	886,409,000	304.9%
1985	2,157,914,000	4,882,540,000	44.2%	2,724,626,000	975,248,000	279.4%
1986	2,728,837,000	5,305,841,000	51.4%	2,577,004,000	1,065,077,000	242.0%
1987	3,188,223,000	6,293,712,000	50.7%	3,105,489,000	1,193,463,000	260.2%
1989	4,136,564,000	7,090,175,000	58.3%	2,953,611,000	1,540,789,000	191.7%

Analysis of the funded ratio over time indicates how the System is meeting its obligation to fund benefits. Generally, the greater this ratio, the stronger and more well-funded the System.

We have also compared the unfunded actuarial present value of accrued benefits with annual compensation to remove the effects of inflation and to aid in the analysis of the System's progress in accumulating sufficient assets to pay benefits when due. Generally, the smaller the unfunded percentage, the stronger the System.

STATE OF CONNECTICUT
STATE TEACHERS' RETIREMENT SYSTEM

RECONCILIATION OF THE MARKET VALUE OF ASSETS

A. Reconciliation

1.	Market Value of Assets as of July 1, 1988	\$3,422,467,000
2.	Contributions (from State and Members, including Health Insurance)	383,177,000
3.	Benefit Payments:	
a.	Pension Payments	(180,716,000)
b.	Refund of Member Contributions	(5,846,000)
c.	Survivorship Benefits	(3,008,000)
4.	Net Investment Income	<u>520,490,000</u>
5.	Market Value of Assets as of June 30, 1989	\$4,136,564,000

B. Net Rate of Return on Market Value of Assets 14.8%

STATE TEACHERS' RETIREMENT SYSTEM

DEVELOPMENT OF VALUATION ASSETS

In order to reduce potential volatility in the market value of the System's assets, a smoothing technique is used to develop an actuarial value of assets. This value is then used to determine the unfunded actuarial accrued liability.

To develop the actuarial value of assets as of June 30, 1989, the actuarial value of assets as of July 1, 1988 was increased by contributions to the System and reduced by benefit payments made to former Members and their Beneficiaries. These amounts were then adjusted with interest to the end of the year, using the expected rate of return on assets. Effective with the June 30, 1989 actuarial valuation, the expected rate of return is assumed to be the same as the discount rate used to determine costs and liabilities. The resulting figure represents the expected actuarial value of assets, provided the assumed rate of return will be realized.

The expected actuarial value of assets at year end was then compared with the market value of assets as of June 30, 1989 and 20% of the difference was recognized. The resulting value would have been further adjusted if it had been less than 80% or greater than 120% of the market value of assets.

1.	Actuarial Value of Assets as of July 1, 1988	\$ 3,009,196,000
2.	Contributions	383,177,000
3.	Benefit Payments	189,570,000
4.	Net Transactions: Item 2 - Item 3	193,607,000
5.	Expected Rate of Return	8.5%
6.	Expected Investment Return: Item 5 x (Item 1 + $\frac{1}{2}$ Item 4)	264,010,000
7.	Expected Actuarial Value of Assets as of June 30, 1989: Item 1 + Item 4 + Item 6	3,466,813,000
8.	Market Value of Assets as of June 30, 1989	4,136,564,000
9.	Adjustments: 20% of the Difference between Item 8 and Item 7	133,950,000
10.	Preliminary Actuarial Value of Assets as of June 30, 1989: Item 7 + Item 9	3,600,763,000
11.	Limiting Values:	
	a. 80% of Item 8	3,309,251,000
	b. 120% of Item 8	4,963,877,000
12.	Actuarial Value of Assets as of June 30, 1989: Item 10, but not less than Item 11.a. or greater than Item 11.b.	\$ 3,600,763,000

STATE OF CONNECTICUT
STATE TEACHERS' RETIREMENT SYSTEM
CENSUS DATA FOR MEMBERS IN THE SYSTEM

For the purposes of the June 30, 1989 actuarial valuation of the Connecticut State Teachers' Retirement System, we were provided with census data on each active teacher who was in the System as of the valuation date. The data included name, sex, date of birth, service, salary, and the Member's contributions. Pertinent data was also provided for each retiree, beneficiary, survivor, and dependent as of June 30, 1989, including name, sex, date of birth, date of retirement, amount and form of monthly benefit, and beneficiary information, where applicable. In addition, we received data on former teachers who were no longer active in the System.

The table below gives a comparison of certain characteristics of Members in the System between this year and the previous valuation.

	<u>June 30, 1987</u>	<u>June 30, 1989</u>
1. Active Teachers		
a. Number	39,014	40,258
b. Average Age	43.4	44.1
c. Average Service	14.3	14.6
d. Average Annual Compensation	\$ 30,590	\$ 38,273
2. Terminated Vested Teachers		
a. Number	766	721
b. Average Monthly Deferred Benefit	\$ 469	\$ 469
3. Survivors and Dependents		
a. Number	485	504
b. Average Monthly Benefit	\$ 259	\$ 266
4. Retired Teachers and Beneficiaries		
a. Number	12,207	13,164
b. Average Monthly Benefit	\$ 1,099	\$ 1,267

The table below gives further details on the Retired Teachers and Beneficiaries as of June 30, 1989.

<u>Age</u>	<u>Number</u>	<u>Avg. Mo. Benefit</u>
Under 50	52	\$ 973
50 - 54	154	1,098
55 - 59	823	1,414
60 - 64	2,590	1,471
65 - 69	2,618	1,361
70 - 74	2,199	1,216
75 - 79	1,947	1,145

STATE OF CONNECTICUT
STATE TEACHERS' RETIREMENT SYSTEM
OUTLINE OF THE PRINCIPAL PROVISIONS OF THE SYSTEM

Outlined below are the principal provisions of the System which were reflected in this valuation.

1. Covered Employees

Any teacher, principal, superintendent or supervisor engaged in service of public schools, plus professional employees at State schools of higher education if they choose to be covered.

2. Salary

Amount paid to a teacher as specified in a contract of employment excluding amounts paid for extra duty assignments, coaching, unused sick time, unused vacation or terminal pay.

3. Average Annual Salary

Average of annual salary received during three years of highest salary.

4. Credited Service

One month for each month of service as a teacher in Connecticut public schools, maximum 10 months for each school year. Ten months of credited service constitutes one year of Credited Service. Certain other types of teaching service, State employment, or war-time military service may be purchased at retirement, if the member pays one-half of the cost.

5. Normal Retirement

Eligibility: Age 60 and 20 years of Credited Service in Connecticut or 35 years of Credited Service including at least 25 years of service in Connecticut.

5. Normal Retirement - continued

Benefit: 2% times years of Credited Service times Average Annual Salary
(maximum percent is 75%)

plus

any additional amounts derived from 6th percent and voluntary contribu-
tions by the teacher.

Minimum Benefit: Effective January 1, 1988, Public Act 87-381 provides a
minimum monthly retirement benefit of \$800 to teachers who retire under
the Normal Retirement provisions and who complete at least 25 years of
full time Connecticut service at retirement.

6. Early Retirement

Eligibility: At any age after the completion of 25 years of Credited
Service including 20 years of Connecticut service or at or after age 55
and the completion of 20 years of Credited Service including 15 years of
Connecticut service, with the last 5 years in Connecticut.

Benefit: Reduced normal retirement benefit. The early retirement factors
currently in effect are 6% per year for the first five years by which
early retirement precedes the minimum normal retirement age and 4% per
year for the next five years by which early retirement precedes the mini-
mum normal retirement age.

7. Proratable Retirement

Eligibility: Age 60 and 10 years of Credited Service with the last 5
years in Connecticut.

Benefit: 2% less .1% for each year less than 20 years times years of
Credited Service in Connecticut plus 1% times years of additional Credited
Service times Average Annual Salary.

8. Disability Retirement

Eligibility: Disability prior to age 60 and after 5 years of Credited Service in Connecticut if not incurred in the performance of duty and without regard to service if incurred in the performance of duty.

Benefit: Lesser of:

- 3% times Credited Service to date of disability times Average Annual Salary;
- 1-2/3% times Credited Service projected to age 60 times Average Annual Salary;
- 50% times Average Annual Salary.

Not less than 15% times Average Annual Salary.

9. Termination of Employment

With less than 5 years of Credited Service: Return of 5% contributions with interest.

With 5 or more years of Credited Service: Return of 5% contributions with interest and 1% contributions without interest.

With 10 or more years of Credited Service: 100% vested. Member may elect return of all contributions plus interest on 5% contributions in lieu of vested benefit.

10. Pre-Retirement Death Benefits

A lump sum plus one of the following: survivor's benefit, return of all contributions with interest, surviving spouse's benefit, or automatic surviving spouse's benefit.

10. Pre-Retirement Death Benefits
(continued)

- Lump Sum: \$1,000 for the first 5 years of Connecticut service plus \$200 per year thereafter. Maximum benefit: \$2,000.
- Survivor's Benefit: \$300 per month to a surviving spouse or dependent former spouse (receiving child support), or to a dependent parent over age 65 if there is no surviving spouse, or dependent child, or to a legal guardian if there is no surviving spouse, dependent former spouse, or dependent parent. \$200 per month to a single dependent child under age 18 or over 18 if disabled. \$300 per month divided equally among two or more such children in a family.
- Accumulated contributions with interest plus dependent children's benefits as described in the "Survivor's Benefit" paragraph.
- Surviving Spouse's Benefit: the 50% co-participant option plus dependent children's benefits as described in the "Survivor's Benefit" paragraph.
- Automatic Surviving Spouse's Benefit: Prefiled co-participant option with the percent continued chosen from 33-1/3%, 50%, 66-2/3%, 75%, or 100%.

11. Form of Annuity

Normal: Partial Refund Option - 75% of total benefit is paid as a life annuity. If 25% of the benefits paid prior to death do not exceed the Member's 5% contributions plus interest frozen at the date of benefit commencement, the difference is paid to his beneficiary.

Optional Forms: 5-, 10-, 20-, or 25-year certain and life. 33-1/3%, 50%, 66-2/3%, 75%, or 100% co-participant annuity (if co-participant dies first, benefit reverts to unreduced amount).

12. Cost-of-Living Allowance

Pension benefit adjustments are made in accordance with increases in the Consumer Price Index, with a minimum of 3% and a maximum of 5% per annum.

13. Teachers' Required Contribution

Each teacher is required to contribute 6% of annual salary.

14. State Contribution

The State funds the balance of the liability for benefits with annual contributions (currently paid in installments at the beginning of each quarter) determined in accordance with Section 10-183(z) (which reflects Public Act 79-436 as amended).

STATE OF CONNECTICUT
STATE TEACHERS' RETIREMENT SYSTEM
SUMMARY OF ACTUARIAL ASSUMPTIONS AND
ACTUARIAL COST METHODS

The following is a summary of the revised actuarial assumptions and the actuarial cost methods used in this valuation of the State Teachers' Retirement System, as well as the prior assumptions and methods.

A. <u>Actuarial Assumptions</u>	<u>Prior Assumption</u>		<u>Revised Assumption</u>	
1. Investment Return:	8.0% per annum, compounded annually.		8.5% per annum, compounded annually.	
2. Mortality:	The Unisex Pension Table for 1984, set back five years in age for females.		No change.	
3. Termination of Employment:	<u>Years of Service</u>	<u>Rate</u>	<u>Years of Service</u>	<u>Rate</u>
	1-5	10%	1-5	9%
	6-10	6%	6-10	5%
	11-20	1%	11-20	2%
	21 and above	1%	21 and above	1%
4. Salary Increases:	<u>Years of Service</u>	<u>Rate</u>	<u>Years of Service</u>	<u>Rate</u>
	0-15	8.0%	0-15	8.0%
	16 and above	5.5%	16 and above	5.5%
	plus 2.0% from 7/1/84 to 6/30/88		plus 4.0% from 7/1/89 to 6/30/93	

	<u>Prior Assumption</u>	<u>Revised Assumption</u>	
5. Cost of Living Increases:	Annual increases in pensions of 5% after retirement.	Annual increases in pensions of 4% after retirement.	
6. Retirement Age:	Teachers will retire when first eligible for normal retirement benefits as follows:	<u>Age</u>	<u>Percent Expected to Retire</u>
	<ul style="list-style-type: none"> ● after 35 years of service if before age 60 ● at age 60 if after 20 years of service but before 35 years of service ● at 20 years of service if after age 60 but before age 70 ● at age 70 if after 10 years of service but before 20 years of service ● if active and currently eligible to retire on the valuation date under one of the age and service combinations cited above, the teacher is assumed to retire on the following June 30th. 	55 56-59 60-64 65 66 67 68 69 70 71 72 73 74 75	1% 5% 15% 20% 24% 28% 32% 36% 40% 52% 64% 76% 88% 100%

	<u>Prior Assumption</u>	<u>Revised Assumption</u>								
7. Disability Incidence:	Sample Rates:	No change.								
	<table border="0"> <thead> <tr> <th style="text-align: center;"><u>Age</u></th> <th style="text-align: center;"><u>Rate</u></th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">30</td> <td style="text-align: center;">.059%</td> </tr> <tr> <td style="text-align: center;">40</td> <td style="text-align: center;">.105%</td> </tr> <tr> <td style="text-align: center;">50</td> <td style="text-align: center;">.262%</td> </tr> </tbody> </table>	<u>Age</u>	<u>Rate</u>	30	.059%	40	.105%	50	.262%	
<u>Age</u>	<u>Rate</u>									
30	.059%									
40	.105%									
50	.262%									
8. Active Member Marriage Assumptions:	85% of all Members are married. Females are 3 years younger than spouse and have one child when they are 25 and another at age 27.	No change.								
9. Expenses:	Paid directly by the State.	No change.								

B. Actuarial Cost Methods;
Asset Valuation Method

1. Actuarial Cost Methods:

Prior Method

The entry age actuarial cost method was used to determine liabilities related to the State contribution requirement.

The unit credit actuarial cost method was used to determine the actuarial present value of accrued benefits, which is used to measure the funded status of the System.

Revised Method

No change.

No change.

2. Valuation of Assets:

The valuation assets are updated with actual contributions and benefit payments, and with interest at a rate equal to the cost-of-living adjustment to Social Security benefits (as determined under prior law for June adjustments), plus three percentage points. This preliminary value is compared with the market value of assets and 20% of the difference is recognized. The actuarial value of assets is further adjusted if necessary to lie between 80% and 120% of the market value of assets. The starting value used with this technique is the market value of assets as of June 30, 1980.

The valuation assets are updated with actual contributions and benefit payments, and with interest at a rate equal to the valuation rate of 8.5%. This preliminary value is compared with the market value of assets and 20% of the difference is recognized. The actuarial value of assets is further adjusted if necessary to lie between 80% and 120% of the market value of assets. The starting value used with this technique is the market value of assets as of June 30, 1980.

STATE OF CONNECTICUT
STATE TEACHERS' RETIREMENT SYSTEM
ALTERNATIVE RESULTS UNDER THE
PROJECTED UNIT CREDIT ACTUARIAL COST METHOD

In response to a request by the co-chairpersons of the Appropriations Committee of the State Legislature, we have calculated the unfunded actuarial accrued liability and the normal cost as of June 30, 1989, as well as the State contribution requirement for the fiscal year ending June 30, 1991, under the projected unit credit actuarial cost method.

Following is a comparison of the results under the entry age actuarial cost method, which the Board has adopted to determine the State contribution requirement, with the results under the projected unit credit actuarial cost method:

	<u>Results Under Entry Age Cost Method</u>	<u>Results Under Unit Credit Cost Method</u>
A. Unfunded Actuarial Accrued Liability as of June 30, 1989		
1. Actuarial Accrued Liability	\$7,944,175,000	\$7,090,175,000
2. Actuarial Value of Assets	<u>3,600,763,000</u>	<u>3,600,763,000</u>
3. Unfunded Actuarial Accrued Liability	\$4,343,412,000	\$3,489,412,000
 B. Normal Cost as of June 30, 1989		
1. Normal Cost	\$ 127,787,000	\$ 172,306,000
2. Annual Compensation of Active Teachers	1,540,789,000	1,540,789,000
3. Normal Cost as a Percent of Annual Compensation	8.3%	11.2%
 C. State Contribution Requirement for the Fiscal Year Ending June 30, 1991	 \$ 304,331,000	 \$ 319,065,000

For reference, we have included a brief description of the entry age actuarial cost method and the projected unit credit actuarial cost method as Exhibits 11 and 12, respectively.

STATE OF CONNECTICUT
STATE TEACHERS' RETIREMENT SYSTEM

DESCRIPTION OF THE ENTRY AGE ACTUARIAL COST METHOD

The objective of this actuarial cost method, as applied to a pension plan with a pay-related formula, is to express the cost attributable to the current year's employment for each participant as a level percent of the participant's salary.

The expected pension benefit at normal retirement is determined for each participant based on projected service at normal retirement and on salary projected to normal retirement using the assumed salary progression.

Normal Cost (also called "Current Service Cost") - For each participant, a level percent called the "Normal Cost Rate" is calculated. The Normal Cost Rate is calculated so that if each year that percent of the participant's salary for the year were paid into the fund from the earliest time the participant would have been eligible to join the plan (hence, entry age) until his retirement or termination, the payments would accumulate with interest (at the assumed valuation rate) to an amount sufficient to pay all benefits under the plan for that participant.

A participant's Normal Cost for a given plan year is the product of his Normal Cost Rate and his salary for that plan year.

The Normal Cost for the plan is the sum of the Normal Costs for the individual participants.

Actuarial Accrued Liability (also called "Past Service Liability") - The Actuarial Accrued Liability is determined as the theoretical amount that would have accumulated in the fund had annual contributions equal to the Normal Cost been made in each year prior to the valuation date. (It does not represent the liability for benefits accrued as of the valuation date.)

The Actuarial Accrued Liability for the plan is the sum of the Actuarial Accrued Liabilities for the individual participants.

The Unfunded Actuarial Accrued Liability (Unfunded Past Service Liability) is the excess of the Actuarial Accrued Liability (Past Service Liability) over the value of the plan assets.

The calculation of the Normal Cost and the Actuarial Accrued Liability takes into account the time value of money (by discounting for interest), expected increases in compensation (through salary progression), and appropriate probabilities of disability, termination, retirement, and death.

STATE OF CONNECTICUT
STATE TEACHERS' RETIREMENT SYSTEM

DESCRIPTION OF THE PROJECTED UNIT CREDIT ACTUARIAL COST METHOD

Under this actuarial cost method, the cost attributable to past employment (i.e., prior to the valuation date) and to the current year's employment for each participant is determined by prorating the pension benefit expected to be paid upon normal retirement over all years of service.

The expected pension benefit at normal retirement is determined for each participant based on service as of the valuation date but on salary projected to normal retirement using the assumed salary progression.

Normal Cost (also called "Current Service Cost") - The Normal Cost is calculated as the actuarial present value as of the valuation date of the current year's portion of the employee's expected pension benefit. The current year's portion equals the expected pension benefit divided by the total number of years of the participant's service at normal retirement.

The Normal Cost for the plan is the sum of the Normal Costs for the individual participants.

Actuarial Accrued Liability (also called "Past Service Liability") - The Actuarial Accrued Liability is determined as the actuarial present value as of the valuation date of the past years' (i.e., prior to the valuation date) portion of the participant's expected pension benefit. The past years' portion is equal to the expected pension benefit times the ratio of the number of years between the participant's date of participation and the valuation date to the number of years between his date of participation and his normal retirement date.

The Actuarial Accrued Liability for the plan is the sum of the Actuarial Accrued Liabilities for the individual participants.

The Unfunded Actuarial Accrued Liability (Unfunded Past Service Liability) is the excess of the Actuarial Accrued Liability (Past Service Liability) over the value of plan assets.

The calculation of the Normal Cost and the Actuarial Accrued Liability takes into account the time value of money (by discounting for interest), expected increases in compensation (through salary progression), and appropriate probabilities of disability, termination, retirement, and death.
