Ladies and Gentlemen:

This report presents the results of the actuarial valuation of the City of Atlanta Firefighters' Pension Fund as of January 1, 2008. The purpose of this report is to provide a summary of the funded status of the plan as of January 1, 2008, to determine the minimum required contribution for the 2009 plan year, and to determine the annual required contribution and accounting disclosures pursuant to Governmental Accounting Standard Nos. 25 and 27 (GASB 25/27).

### **Recommended Contribution**

Currently, the plan receives contributions from the City of Atlanta and from employees. Employees contribute either 6% or 7% of base salary, depending on whether the employee has any beneficiaries who would be eligible for death benefits under the plan. The City contributes the amount that is actuarially determined as a level percentage of payroll, where the unfunded accrued liability is scheduled to be eliminated as of January 1, 2024 and payroll is assumed to increase at the rate of 4.00% per year. The contribution is based on the actuarial valuation results as of January 1 of the preceding plan year.

For the 2009 plan year, the minimum required contribution is 60.40% of payroll after taking into account expected employee contributions of 6.66% of payroll. This amount represents an increase of 4.61% of payroll from the required contribution for the 2008 plan year.

The minimum required contribution decreases or increases due to experience gains and losses, respectively. The primary source of experience gains and losses is the investment return. As of December 31, 2007, an asset and income statement was not available from the plan's auditor. Therefore, we have based the December 31, 2007 on the best information that was available as of the date of this report.

During 2007, the market value of assets gained 3.43% as compared with an assumed return of 7.75%. However, rather than reflect the entire amount of the unrealized gains and losses immediately, the actuarial value of assets is based on a five-year phase-in of the unrealized

appreciation. On this basis, the actuarial value of assets gained 12.01% for the year, which was well above the assumed 7.75% return.

We will continue to monitor the assumptions used to determine the City's contribution and will make changes as necessary to reflect future expectations.

### **Contents of the Report**

A summary of the results of the valuation is presented in Table I, while Table II provides a historical record of the City's contribution percentage. A detailed breakdown of the liabilities of the plan by type of benefit is presented in Table III. Information for the auditors can be found in Tables IV and V. Tables VI through VIII provide information about the fund's assets. In particular, Table VI provides a breakdown of the fund assets by investment type, and Tables VII and VIII provide a historical record of the growth, expenditures, and annual yields of the fund. Tables IX through XII provide a variety of useful information concerning the participant population. Finally, Table XIII provides a summary of the assumptions and methods used to complete the valuation and Table XIV provides a summary of the plan provisions.

### **Certification**

To the best of our knowledge, this report fairly and accurately represents the liabilities of the plan as of January 1, 2008 based on the participant data and asset information provided by the City of Atlanta and the plan provisions and actuarial assumptions set forth herein. We believe that these assumptions are reasonable in the aggregate and represent our best estimate of anticipated experience. All calculations set forth herein conform to generally accepted actuarial principles and practices and comply with our current understanding of the requirements of the Georgia Code and the Governmental Accounting Standards Board.

Respectfully submitted,

Charles T. Carr  
Consulting Actuary  
Enrolled Actuary No. 08-04927
