Additions – The System accumulates resources needed to fund benefit payments through contributions and returns on invested funds. In fiscal year 2008, total contributions increased 3.6%, reflecting a contribution percentage that increased along with a modest overall salary increase. Net investment income decreased by \$2.9 billion. The decrease was primarily due to declining equity markets in 2008, compared to 2007

retroactive benefit payments in 2007. Refunds increased 0.7%, which was primarily due to an increase in the number of refunds processed during 2008. Administrative expenses increased 25% over the prior year, due primarily to increases in computer services, contractual services, and accounting and investment services. all defined benefit plans and to postretirement cost of living increases in benefits as well as a contingent liability involving payments. This was due to an increase of approximately 3.9% in the number of retirees receiving benefit payments across Deductions - For fiscal year 2008, total deductions increased 8.0%, primarily because of a 7.7 % increase in benefit

Funding Status

actuarial value of assets and funding ratios for the five applicable defined benefit retirement plans were as follows: actuaries. The funding ratio, which is presented on the schedule of funding progress, indicates the ratio of the actuarial and funded from an actuarial perspective. The information is based upon actuarial valuations conducted by certified to its funding requirements. The June 30, 2007 and 2006 actuarial valuations, the latest valuations available, indicate the value of assets and the actuarial accrued liabilities. The higher this ratio, the better position the System is in with regard The schedules of funding progress and employer contributions provide information regarding how the plans are performing
