May 16, 2012

Board of Trustees,
Teachers Retirement System of Georgia
Suite 100, Two Northside 75
Atlanta, GA 30318

Members of the Board:

Section 47-3-23 of the law governing the operation of the Teachers Retirement System of Georgia provides that the actuary shall make annual valuations of the contingent assets and liabilities of the Retirement System on the basis of regular interest and the tables last adopted by the Board of Trustees. We have submitted the report giving the results of the actuarial valuation of the System prepared as of June 30, 2011. The report indicates that annual employer contributions at the rate of 12.28% of compensation for the fiscal year ending June 30, 2014 are sufficient to support the benefits of the System. Our firm, as actuary, is responsible for all of the actuarial trend data in the financial section of the annual report and the supporting schedules in the actuarial section of the annual report.

Since the previous valuation, the one-time 3% increase on the first \$37,500 of members' allowances made at retirement has been discontinued for all members who retire on or after January 1, 2013.

In our opinion, the valuation is complete and accurate, and the methodology and assumptions are reasonable as a basis for the valuation. The valuation takes into account the effect of all amendments to the System enacted through the 2011 Session of the General Assembly. In preparing the valuation, the actuary relied on data provided by the System. While not verifying data at the source, the actuary performed tests for consistency and reasonableness.

The System is funded on an actuarial reserve basis. The actuarial assumptions recommended by the actuary and adopted by the Board are in the aggregate reasonably related to the experience under the System and to reasonable expectations of anticipated experience under the System. The assumptions and methods used for funding purposes meet the parameters set for the disclosures presented in the financial section by Governmental Accounting Standards Board (GASB) Statement Nos. 25 and 27. The funding objective of the plan is that contribution rates over time will remain level as a percent of payroll. The valuation method used is the entry age normal cost method. The normal contribution rate to cover current cost has been determined as a level percent of payroll. Gains and losses are reflected in the unfunded accrued liability, which is amortized as a level percent of payroll within a 30-year period.

The System is being funded in conformity with the minimum funding standard set forth in Code Section 47-20-10 of the Public Retirement Systems Standards Law. In our opinion the System is operating on an actuarially sound basis. Assuming that contributions to the System are made by the employer from year to year in the future at the rates recommended on the basis of the successive actuarial valuations, the continued sufficiency of the retirement fund to provide the benefits called for under the System may be safely anticipated assuming future required contributions (ARC) are contributed when due.

Future actuarial results may differ significantly from the current results presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law. Since the potential impact of such factors is outside the scope of a normal annual actuarial valuation, an analysis of the range of results is not presented herein.

This is to certify that the independent consulting actuary is a member of the American Academy of Actuaries and has experience in performing valuations for public retirement systems, that the valuation was prepared in accordance with principles of practice prescribed by the Actuarial Standards Board, and that the actuarial calculations were performed by qualified actuaries in accordance with accepted actuarial procedures, based on the current provisions of the retirement system and on actuarial assumptions that are internally consistent and reasonably based on the actual experience of the System.

Sincerely yours,

A handwritten signature in blue ink, appearing to read 'Edward Macdonald'.

**TEACHERS RETIREMENT SYSTEM OF GEORGIA
REPORT OF THE ACTUARY
ON THE VALUATION
PREPARED AS OF JUNE 30, 2011**

SECTION I - SUMMARY OF PRINCIPAL RESULTS

1. For convenience of reference, the principal results of the valuation and a comparison with the preceding year's results are summarized below (all dollar amounts are in thousands):

Valuation Date	June 30, 2011	June 30, 2010
Number of active members	216,137	222,020
Annual earnable compensation	\$ 10,099,278	\$ 10,437,703
Number of retired members and beneficiaries	92,177	86,978
Annual allowances	\$ 3,102,607	\$ 2,862,477
Assets:		
Market Value	\$ 54,084,176	\$ 45,925,549
Actuarial Value	55,427,716	54,529,416
Unfunded accrued liability	\$ 10,550,924	\$ 9,062,621
Amortization period (years)	30	30
Funded Ratio	84.0%	85.7%
Contributions for Fiscal Year Ending	June 30, 2014	June 30, 2013
Member Contribution Rate	6.00%	6.00%
Annual Required Employer Contribution Rate (ARC):		
Normal	6.24%	6.36%
Unfunded accrued liability	<u>6.04</u>	<u>5.05</u>
Total	12.28%	11.41%

2. Comments on the valuation results as of June 30, 2011 are given in Section IV and further discussion of the employer contribution levels is set out in Section V.
3. Schedule C of this report shows the development of the smoothed interest rate and describes the application of the corridor.
4. Schedule E of this report outlines the full set of actuarial assumptions and asset method used to prepare the current valuation. There have been no changes since the previous valuation.

5. The entry age actuarial cost method was used to prepare the valuation. Schedule F contains a brief description of this method.
6. The major benefit and contribution provisions of the System as reflected in the current valuation are summarized in Schedule G. Since the previous valuation, the one-time 3% increase on the first \$37,500 of members' allowances has been discontinued for all members who retire on or after January 1, 2013.

SECTION II - MEMBERSHIP

1. The data we received for the 2011 valuation was provided by the Retirement System. While not verifying the data at its source, we performed tests for consistency and reasonableness.
2. The following table shows the number of teachers and their annual earnable and average compensation as of June 30, 2011 on whose account benefits may be payable under the Retirement System. The annual compensation for each active member was provided by the Retirement System and was used without adjustment.

THE NUMBER AND ANNUAL EARNABLE AND AVERAGE COMPENSATION OF ACTIVE MEMBERS AS OF JUNE 30, 2011

TOTAL NUMBER	ANNUAL COMPENSATION (\$1,000's)	AVERAGE COMPENSATION
216,137	\$10,099,278	\$46,726

The results of the valuation include liabilities for 86,431 terminated employees entitled to benefits but not yet receiving benefits.

3. The following table shows the number of beneficiaries on the roll as of June 30, 2011, together with the amount of their annual retirement allowances payable under the System as of that date.

**THE NUMBER AND ANNUAL RETIREMENT ALLOWANCES
OF BENEFICIARIES ON THE ROLL AS OF JUNE 30, 2011**

GROUP	NUMBER	ANNUAL RETIREMENT ALLOWANCES (\$1,000's)
Service Retirements	82,385	\$ 2,907,459
Disability Retirements	3,637	69,960
Beneficiaries of Deceased Active and Retired Members	<u>6,155</u>	<u>125,188</u>
Total	92,177	\$ 3,102,607

SECTION III - ASSETS

1. The retirement law provides for the maintenance of two funds for the purpose of recording the financial transactions of the System; namely, the Annuity Savings Fund and the Pension Accumulation Fund.

- (a) Annuity Savings Fund

The Annuity Savings Fund is the fund to which are credited all contributions made by members together with regular interest thereon. When a member retires, or if a death benefit allowance becomes payable to his beneficiary, his accumulated contributions are transferred from the Annuity Savings Fund to the Pension Accumulation Fund. The annuity which these contributions provide is then paid from the Pension Accumulation Fund. On June 30, 2011 the value of assets credited to the Annuity Savings Fund amounted to \$6,973,343,000.

- (b) Pension Accumulation Fund

The Pension Accumulation Fund is the fund to which all income from investments and all contributions made by employers of members of the System and by the State for members of local retirement funds are credited. All retirement allowance and death benefit allowance payments are disbursed from this fund. Upon the retirement of a member, or upon his death if a death benefit allowance is payable, his accumulated contributions are transferred from the Annuity Savings Fund to this fund to provide the annuity portion of the allowance. On June 30, 2011 the market value of assets credited to the Pension Accumulation Fund amounted to \$47,110,833,000.

3. As of June 30, 2011 the total market value of assets amounted to \$54,084,176,000 as reported by the Auditor of the System. The actuarial value of assets used for the current valuation was \$55,427,716,000. Schedule B shows the development of the actuarial value of assets
4. Schedule D shows receipts and disbursements of the System for the two years preceding the valuation date and a reconciliation of the fund balances at market value.

SECTION IV – COMMENTS ON VALUATION

1. Schedule A of this report contains the valuation balance sheet which shows the present and prospective assets and liabilities of the System as of June 30, 2011 (all amounts are in thousands).
2. The valuation balance sheet shows that the System has total prospective liabilities of \$76,078,820, of which \$37,271,020 is for the prospective benefits payable on account of present retired members and beneficiaries of deceased members and \$38,807,800 is for the prospective benefits payable on account of present active and inactive members and members entitled to deferred vested benefits. Against these liabilities, the System has total present assets for valuation purposes of \$55,427,716 as of June 30, 2011. The difference of \$20,651,104 between the total liabilities and the total present assets represents the present value of contributions to be made in the future. Of this amount, \$5,144,787 is the present value of future contributions expected to be made by members to the Annuity Savings Fund, and the balance of \$15,506,317 represents the present value of future contributions payable by the employer.
3. The employer's contributions to the System consist of normal contributions and accrued liability contributions. The valuation indicates that employer normal contributions at the rate of 6.24% of payroll are required, in addition to member contributions, to provide the benefits of the System for the average new member.
4. Prospective normal contributions, excluding administrative expenses, have a present value of \$4,955,393. When this amount is subtracted from \$15,506,317, which is the present value of the total future contributions to be made by the employer, there remains \$10,550,924 as the amount of future unfunded accrued liability contributions.

SECTION V – CONTRIBUTIONS PAYABLE BY EMPLOYERS

1. The Teachers Retirement System funding policy provides for periodic employer contributions at rates which, expressed as percents of annual covered payroll, are sufficient to provide resources to pay benefits when due without being increased for future generations of taxpayers.
2. The retirement law provides that the contributions of employers shall be a percentage of the compensation of active members consisting of a normal contribution rate and an unfunded accrued liability contribution rate as determined by actuarial valuation.
3. Normal contributions include 0.25% of compensation that is required to meet the expenses of administering the System.
4. Based on the current total employer contribution rate of 12.28% of payroll, the unfunded accrued liability contribution is 6.04% of payroll, which will amortize the unfunded accrued liability within a 30 year period. The interest rate used to amortize the unfunded accrued liability over a 30 year period was equivalent to the smoothed interest rate of 8.02% for 23 years and the ultimate investment rate of return of 7.50% for seven years.
5. The following table summarizes the employer contribution rates, which were determined by the June 30, 2011 valuation and are recommended for use.

**ANNUAL REQUIRED EMPLOYER CONTRIBUTION RATES
FOR FISCAL YEAR ENDING JUNE 30, 2014**

CONTRIBUTION	PERCENTAGE OF ACTIVE MEMBERS' COMPENSATION
Normal	6.24%
Unfunded Accrued Liability	<u>6.04</u>
Total	12.28%

SECTION VI – ACCOUNTING INFORMATION

1. Governmental Accounting Standards Board Statements 25 and 27 set forth certain items of required supplementary information to be disclosed in the financial statements of the System and the employer. One such item is a distribution of the number of employees by type of membership, as follows:

**NUMBER OF ACTIVE AND RETIRED MEMBERS
AS OF JUNE 30, 2011**

GROUP	NUMBER
Retirees and beneficiaries currently Receiving benefits	92,177
Terminated employees entitled to benefits but not yet receiving benefits	86,431
Active plan members	<u>216,137</u>
Total	<u>394,745</u>

2. Another such item is the schedule of funding progress as shown below.

SCHEDULE OF FUNDING PROGRESS
(Dollar amounts in thousands)

Actuarial Valuation Date	Actuarial Value of Assets (a)	Actuarial Accrued Liability (AAL) - Entry Age (b)	Unfunded AAL (UAAL) (b - a)	Funded Ratio (a / b)	Covered Payroll (c)	UAAL as a Percentage of Covered Payroll ((b - a) / c)
6/30/2006	\$49,263,027	\$51,059,681	\$ 1,796,654	96.5%	\$8,785,985	20.4%
6/30/2007	52,099,171	54,996,570	2,897,399	94.7	9,492,003	30.5
6/30/2008	54,354,284	59,133,777	4,779,493	91.9	10,197,584	46.9
6/30/2009	53,438,604	59,450,116	6,011,512	89.9	10,641,543	56.5
6/30/2010	54,529,416	63,592,037	9,062,621	85.7	10,437,703	86.8
6/30/2011	55,427,716	65,978,640	10,550,924	84.0	10,099,278	104.5

3. The following shows the schedule of employer contributions.

<u>Year Ending</u>	<u>Annual Required Contribution</u>	<u>Percentage Contributed</u>
6/30/2006	\$ 855,626	100%
6/30/2007	927,371	100
6/30/2008	986,759	100
6/30/2009	1,026,287	100
6/30/2010	1,057,416	100
6/30/2011	1,089,912	100

4. The information presented in the required supplementary schedules was determined as part of the actuarial valuation at June 30, 2011. Additional information as of the latest actuarial valuation follows.

Valuation date	6/30/2011
Actuarial cost method	Entry age
Amortization method	Level percent of pay, open
Remaining amortization period	30 years
Asset valuation method	7-year smoothed market
Actuarial assumptions:	
Ultimate investment rate of return (discount rate)*	7.50%
Projected salary increases*	3.75 – 7.00%
Cost-of-living adjustments	3.00% Annually

**Includes inflation at 3.00%*

TREND INFORMATION
(Dollar amounts in thousands)

<u>Year Ending</u>	<u>Annual Pension Cost (APC)</u>	<u>Percentage of APC Contributed</u>	<u>Net Pension Obligation</u>
June 30, 2009	\$ 1,026,287	100%	\$ 0
June 30, 2010	1,057,416	100	0
June 30, 2011	1,089,912	100	0

SECTION VII – EXPERIENCE

1. Section 47-3-23 of the act governing the operation of the System provides that as an aid to the Board in adopting service and mortality tables, the actuary will prepare an experience investigation at least once in each five-year period. The last investigation was prepared for the five-year period ending June 30, 2009 and, based on the results of the investigation, new rates of separation, mortality and salary increase were adopted by the Board on November 17, 2010. The next experience investigation will be prepared for the period July 1, 2009 through June 30, 2014.

2. The following table shows the estimated gain or loss from various factors that resulted in an increase of \$1,488,303,000 in the unfunded accrued liability from \$9,062,621,000 to \$10,550,924,000 during the fiscal year ending June 30, 2011.

ANALYSIS OF THE INCREASE IN UNFUNDED ACCRUED LIABILITY
(Dollar amounts in millions)

ITEM	AMOUNT OF INCREASE/ (DECREASE)
Interest (7.50%) added to previous unfunded accrued liability	\$ 733.2
Accrued liability contribution	(396.3)
Experience:	
Valuation asset growth	2,018.7
Pensioners' mortality	24.2
Turnover and retirements	195.3
New entrants	89.6
Salary increases	(1,132.2)
Method Change	0.0
Interest Smoothing	412.8
Amendment	(685.5)
Miscellaneous	<u>228.5</u>
Total	\$ 1,488.3

SCHEDULE A

(b)	125% of Market Value: 1.25 x (2)	\$ 67,605,220
(9)	Actuarial Value End of Year: (7), but not less than (8)(a) and not greater than (8)(b)	\$ 55,427,716
(10)	Difference Between Market & Actuarial Values: (2) - (9)	\$ (1,343,540)
(11)	Rate of Return on Actuarial Value	4.34%

SCHEDULE C

SMOOTHED INTEREST RATE

Actual Rate of Return for 7 Year Look Back Period

Fiscal Year Ending 6/30	Actual Rate of Return for Fiscal Year
2005	7.87 %
2006	6.05
2007	14.61
2008	-3.38
2009	-13.06
2010	11.16
2011	21.30

SMOOTHED INTEREST RATE: The assumed rate of return during the 23 year look forward period beginning on the valuation date. This is the investment rate of return expected to be earned during this period based on the actual rates earned during the seven year look back period shown above such that the average rate of return over the combined 30 year period is equivalent to the ultimate investment rate of return (currently 7.50%). On this basis, for the June 30, 2011 valuation, the smoothed interest rate during the 23 year look forward period has been determined to be 8.02%.

ULTIMATE INVESTMENT RATE OF RETURN (DISCOUNT RATE): The assumed investment rate of return used in determining the smoothed interest rate described above. This is also the assumed investment rate of return after the 23 year look forward period and is currently 7.50%.

LONG-TERM INVESTMENT RATE OF RETURN: The average investment rate of return over the 40 year period beginning on the valuation date.

CORRIDOR AROUND LONG-TERM INVESTMENT RATE OF RETURN: Determined such that the long-term investment rate of return is between the 40th and 50th percentile of expected returns over a 40 year period based on current TRS capital market assumptions. This produces a range between 7.25% and 7.84% as the suggested acceptable range for the long-term investment rate of return.

LIMITED SMOOTHED INTEREST RATE: The assumed rate of return during the 23 year look forward period as limited based on the application of the corridor above and used for valuation purposes. Based on the smoothed interest rate above of 8.02% for the first 23 years after the valuation date and the ultimate investment rate of return of 7.50% for the next 17 years, the calculated long-term investment rate of return of 7.80% over the 40 year period would be within the corridor limits shown above.

SCHEDULE D

SUMMARY OF RECEIPTS AND DISBURSEMENTS
(Dollar amounts in thousands)

	YEAR ENDING	
	June 30, 2011	June 30, 2010

Investment Income (Net of Investment Expenses)	1,211,790	1,214,218
Unrealized Appreciation/(Depreciation)	<u>8,383,204</u>	<u>3,457,353</u>
TOTAL	\$ 11,289,032	\$ 6,321,251
<u>Disbursements for the Year</u>		
Benefit Payments	\$ 3,041,503	\$ 2,800,424
Refunds to Members	67,916	53,638
Administration Expense	<u>20,986</u>	<u>20,223</u>
TOTAL	\$ 3,130,405	\$ 2,874,285
<u>Excess of Receipts over Disbursements</u>	\$ 8,158,627	\$ 3,446,966
<u>Reconciliation of Asset Balances</u>		
Asset Balance as of the Beginning of Year (Market Value)	\$ 45,925,549	\$ 42,478,583
Excess of Receipts over Disbursements	<u>8,158,627</u>	<u>3,446,966</u>
Asset Balance as of the End of Year (Market Value)	<u>\$ 54,084,176</u>	<u>\$ 45,925,549</u>

SCHEDULE E

OUTLINE OF ACTUARIAL ASSUMPTIONS AND METHODS

Adopted by the Board November 17, 2010 with the exception of the changes in the asset smoothing method and the interest smoothing method which were adopted by the Board on July 27, 2011.

ULTIMATE INVESTMENT RATE OF RETURN (Discount Rate): 7.50% per annum, compounded annually (including inflation of 3.00%).

SALARY INCREASES*:

<u>Service</u>	<u>Annual Rate</u>	<u>Service</u>	<u>Annual Rate</u>	<u>Service</u>	<u>Annual Rate</u>
0	7.00 %	7	5.25 %	14	4.75 %
1	6.75	8	5.25	15	4.50
2	6.63	9	5.00	16	4.50
3	6.50	10	5.00	17	4.25
4	6.25	11	4.85	18	4.25
5	6.00	12	4.80	19	4.25
6	5.50	13	4.75	20	3.75

*includes inflation component of 3.00% and a real rate of salary increase component of 0.75%

SERVICE RETIREMENT:

<u>AGE</u>	<u>Male</u>		<u>Female</u>	
	<u>< 30 years of service</u>	<u>>= 30 years of service</u>	<u>< 30 years of service</u>	<u>>= 30 years of service</u>

* The RP-2000 Combined Mortality Table (set back two years for males and three years for females) is used for death prior to service retirement.

DEATHS AFTER RETIREMENT: The RP-2000 Combined Mortality Table (set back two years for males and three years for females) is used for death after service retirement and beneficiaries. The RP-2000 Disabled Mortality Table (set back two years for males) is used for death after disability retirement. Representative values of the assumed annual rates of death after service retirement and after disability retirement are shown below:

Age	Annual Rate of Death After			
	Service Retirement		Disability Retirement	
	Men	Women	Men	Women
40	.10%	.06%	2.26%	0.75%
45	.13	.09	2.26	0.75
50	.19	.13	2.64	1.15

85	8.97	5.63	12.83	10.02
90	15.06	9.63	16.22	14.00
95	23.37	15.76	23.37	19.45

COST OF LIVING: Increases of 1.5% semi-annually.

PAYROLL GROWTH ASSUMPTION: 3.75%

ADMINISTRATIVE EXPENSES: 0.25% of active members' payroll included in normal contribution.

ASSET METHOD: Actuarial Value, as developed in Schedule B. The actuarial value of assets recognizes a portion of the difference between the market value of assets and the expected actuarial value of assets, based on the ultimate investment rate of return. The amount recognized each year is 1/7 of the difference between market value and expected actuarial value. The actuarial value of assets is limited to a range between 75% and 125% of the market value of assets.

PERCENTAGE MARRIED: 85% of males and 60% of female active members were assumed to be married with the husband 4 years older than his wife.

UNUSED SICK LEAVE: 1.75% load on liabilities for members who retire on early retirement, a 2.0% load for members who retire with unreduced retirement before 30 years of service and a 2.5% load for members who retire with 30 or more years of service.

TERMINATING VESTED MEMBERS: Prior to age 50, 50% of active vested members who terminate are assumed to elect a refund in lieu of a benefit; on or after age 50, 25% of active vested members who terminate are assumed to elect a refund in lieu of a benefit. Benefits are assumed to begin at age 60.

VALUATION INTEREST RATE SMOOTHING: The valuation liabilities are calculated using a smoothed interest rate method. The interest rate assumed during the look forward period (currently 23 years from the valuation date) is the investment rate of return expected to be earned during the look forward period based on the actual rate of return earned during the look back period (currently 7 years) such that the average assumed rate of return over the combined 30 year period is equivalent to the assumed ultimate investment rate of return (currently 7.50%). The interest rate after the 23 year look forward period is the ultimate investment rate of return of 7.50%.

CORRIDOR LIMIT ON INTEREST RATE SMOOTHING: The smoothed interest rate used during the 23 year look forward period is subject to a corridor which is determined such that the long-term investment rate of return is between the 40th and 50th percentile of expected returns based on TRS capital market assumptions as of June 30, 2009. The interest rate used in the current valuation is described in further detail in Schedule C.

SCHEDULE F

ACTUARIAL COST METHOD

1. The valuation is prepared on the projected benefit basis, under which the present value, at the interest rate assumed to be earned in the future (see Schedules C and E for a description of the interest rate used), of each active member's expected benefit at retirement or death is determined, based on his age, service, sex and compensation. The calculations take into account the probability of a member's death or termination of employment prior to becoming eligible for a benefit, as well as the possibility of his terminating with a service, disability or survivor's benefit. Future salary increases and post-retirement cost-of-living adjustments are also anticipated. The present value of the expected benefits payable on account of the active members is added to the present value of the expected future payments to retired members and beneficiaries and inactive members to obtain the present value of all expected benefits payable from the System on account of the present group of members and beneficiaries.
2. The employer contributions required to support the benefits of the System are determined following a level funding approach, and consist of a normal contribution and an accrued liability contribution.
3. The normal contribution is determined using the "entry age normal" method. Under this method, a calculation is made to determine the uniform and constant percentage rate of employer contribution which, if applied to the compensation of the average new member during the entire period of his anticipated covered service, would be required in addition to the contributions of the member to meet the cost of all benefits payable on his behalf.
4. The unfunded accrued liability is determined by subtracting the present value of prospective employer normal contributions and member contributions, together with the current actuarial value of assets held, from the present value of expected benefits to be paid from the System.

SCHEDULE G

SUMMARY OF MAIN PLAN PROVISIONS AS INTERPRETED FOR VALUATION PURPOSES

The Teachers Retirement System of Georgia began operation as of January 1, 1945. The System is supported by the joint contributions of the members and their employers. All teachers employed by an agency of and within the State of Georgia are eligible for membership in the System. The State makes contributions for certain retired members of local funds and certain benefits are payable by the System to them or on their account.

The following summary describes the main benefit and contribution provisions of the System as interpreted for the valuation.

1 - DEFINITIONS

"Prior service" means service rendered prior to January 1, 1945 for which credit is allowed. "Creditable service" means the sum of membership service and prior service. "Earnable compensation" means the full rate of compensation that would be payable to a member teacher if he worked the full normal working time and shall include compensation paid to a member by an employer from grants or contracts made by outside agencies with the employer. "Employer" means the State of Georgia, the county or independent board of education, the State Board of Education, the Board of Regents of the University System of Georgia, or any other agency of and within the State by which a teacher is paid.

2 - BENEFITS

MEMBERS OF THE RETIREMENT SYSTEM

Service Retirement Benefit

Condition for Allowance

Any member may retire on a service retirement allowance upon the attainment of age 60 and the completion of 10 years of creditable service or upon the completion of 25 years of creditable service.

Amount of Allowance

The service retirement allowance consists of:

- (a) An annuity which is the actuarial equivalent of the member's accumulated contributions at the time of his retirement; and
- (b) A pension which, together with the annuity, will provide a total annual allowance equal to 2.00% of the member's average annual compensation during the two consecutive years of his creditable service as a contributing member producing the highest such average, multiplied by the number of years of his creditable service limited to 40 years.

If the member has less than 30 years of creditable service and has not attained age 60 at the time of retirement, his allowance is reduced by the lesser of 1/12 of 7% for each month that retirement precedes age 60 or 7% for each year or fraction of a year by which the member has less than 30 years of creditable service at the time of retirement.

The minimum service retirement allowance is \$204 per annum for each year of creditable service, not to exceed 40 years of such service.

In no event will a teacher who was a member on June 30, 1961 receive a smaller retirement allowance than he would have received under the benefit provisions of the System in effect on that date.

Disability Retirement Benefit

Condition for Allowance

A disability retirement allowance is payable to any member who becomes permanently incapacitated, mentally or physically, for the further performance of duty, after having rendered 10 or more years of creditable service.

Amount of Allowance

If a member qualifies for either service retirement or disability retirement and a service retirement calculation exceeds the amount that he would receive on disability, he shall receive a service retirement allowance. Otherwise he receives a disability retirement allowance determined as a service retirement allowance on the basis of the member's creditable service and compensation up to the time of disability, but with no reduction for age.

Death Benefit

Condition for Allowance

A death benefit is payable on account of a member who dies after having completed 10 or more years of creditable service provided there is a named living beneficiary.

Amount of Allowance

The death benefit is the amount which would have become payable to the member's beneficiary had the member retired on the date of his death on either a service retirement allowance or a disability retirement allowance, whichever is larger, and died after an election of Option 2 had become effective.

Vesting Benefit

Condition for Allowance

A member who withdraws from service prior to attaining age 60 after having rendered at least 10 years of creditable service and who elects to leave his accumulated contributions in the System is eligible for a vesting retirement allowance upon application therefore upon the attainment of age 60 or at any time thereafter.

Amount of Allowance

The vesting allowance is determined as a service retirement allowance on the basis of the member's creditable service and compensation up to the time of withdrawal from service and on the basis of his age at the time the allowance commences.

Return of Contributions Prior to Retirement

Upon a member's withdrawal from service or death prior to retirement, his accumulated contributions together with the accumulated interest are returned to him, or are paid to his designated beneficiary or estate, provided no other benefit is payable under the Retirement System.

Return of Contributions After Retirement Under Maximum Plan

Benefits are payable to a member retired on service or disability for the remainder of his lifetime under the maximum plan. In the event total monthly benefits paid at the time of death are less than the contributions which the member made to the System, the difference between the benefits paid and the amount of contributions is refunded to the member's designated beneficiary or estate, provided no optional allowance has been selected.

Optional Allowances

Upon retirement, any member may elect to convert the retirement allowance otherwise payable to him, except any additional pension payable under the minimum provision, to a reduced retirement allowance of equivalent actuarial value in one of the following optional forms:

Option 1. If he dies before receiving in annuity payments the amount of his accumulated contributions at retirement, the balance is paid to his designated beneficiary or to his estate; or

Option 2. Upon his death his reduced retirement allowance is continued throughout the life of and paid to his designated beneficiary; or

Option 3. Upon his death one-half of his reduced retirement allowance is continued throughout the life of and paid to his designated beneficiary; or

Option 4. A reduced retirement allowance payable during the life of the retired member, with the provision that upon his death some other benefit shall be payable; provided that the total value of such benefits is the actuarial equivalent of the retirement allowance he would have received without optional modification and provided the benefit is approved by the Board of Trustees; or

Option 5. A member may elect Option 2 with the added provision that in the event the designated beneficiary predeceases the member, the retirement allowance payable to the member after the designated beneficiary's death shall be equal to the retirement allowance which would have been payable had the member not elected the option; or

Option 6. A member may elect Option 3 with the added provision that in the event the designated beneficiary predeceases the member, the retirement allowance payable to the member after the designated beneficiary's death shall be equal to the retirement allowance which would have been payable had the member not elected the option.

Cost-of-Living Adjustment

The retirement allowances of members or of any beneficiary of a member who died in service will be subject to adjustment as of each January 1 and July 1 based upon the change in the average CPI during the previous six-month period. The maximum increase in retirement allowances for any such six-month period will be 1-1/2% and no adjustment of less than 1/2% will be made. If the CPI decreases, no reduction in allowance will be made for the first 2-1/2% of a reduction and retirement allowances will not be reduced below the amounts initially paid upon retirement.

In addition, for members who retire prior to January 1, 2013, a one-time 3% increase on the first \$37,500 of members' allowances is made at retirement.

A member who retires prior to age 60 with less than 30 years of creditable service is not eligible for post-retirement adjustments until such time as the member reaches age 60 or would have obtained 30 years of creditable service, whichever occurs earlier.

3 - CONTRIBUTIONS

By Members

Each member contributes 5.53% of his earnable compensation. However, no contributions are payable after the attainment of age 65 and the completion of 40 years of creditable service. Members may elect to cease making contributions after the completion of 40 years of creditable service but before the attainment of age 65. Effective July 1, 2012, the member contribution rate will be 6.00%.

By Employer

The employer contributes at a specified percentage of active member payroll determined annually by actuarial valuation.
