

**MUNICIPAL FIRE AND POLICE
RETIREMENT SYSTEM OF IOWA**

ACTUARIAL VALUATION REPORT

JULY 1, 2005

October 10, 2005

PERSONAL & CONFIDENTIAL

Board of Trustees
Municipal Fire & Police Retirement System of Iowa
2836 – 104 Street
Des Moines, IA 50322

RE: July 1, 2005 Actuarial Report

Dear Board Members:

We are pleased to submit this actuarial report of the Municipal Fire and Police Retirement System of Iowa. The costs developed and presented in this report are based on asset values as of June 30, 2005, member census data as of July 1, 2005, and current System provisions, all of which were supplied by the Municipal Fire & Police Retirement System of Iowa.

The purposes of the actuarial report are:

1. To determine the normal contribution rate which is payable by the Cities under Chapter 411 of the Code of Iowa;
2. To determine the funded status of the System; and
3. To provide information relating to the disclosure requirements of the Governmental Accounting Standards Board (GASB) Statement No. 25 – Financial Reporting for Defined Benefit Pension Plans.

All costs and liabilities were determined in accordance with generally accepted actuarial principles and procedures. To the best of our knowledge, the information supplied in this report is complete and accurate. The amounts presented in the accompanying report have been determined appropriately according to the actuarial assumptions and methods stated herein, and fully and fairly disclose the actuarial position of the System.

Sincerely,

Donn B. Jones, FSA
Principal
Member of American Academy
of Actuaries
Enrolled Actuary No. 05-2717

Glen C. Gahan, FSA

Total	7,407	7,446	7,523

COMMENTS ON THE VALUATION

Cities Recommended Contribution

The recommended contributions for the Retirement System are determined using the Aggregate actuarial cost method as required by Chapter 411 of the Code of Iowa. The same method has been used in prior years to determine the contribution for the Retirement System.

We recommend a contribution of \$54,429,700 be made for the 2005 plan year. This is equal to a contribution rate of 27.75% of payroll. This rate assumes that the State of Iowa will contribute approximately \$2,745,784 for the 2005 plan year.

The Retirement System's normal contribution rate decreased from the 28.21% for 2004 to 27.75% for 2005. The Retirement System's contribution rate before any adjustment to the minimum contribution rate changed as follows:

July 1, 2004 normal contribution rate	28.21%
<ul style="list-style-type: none"> • Increase in contribution rate due to lower State contribution • Plan experience more favorable than assumed • Investment experience more favorable than assumed • Changes in System provisions • Changes in actuarial assumptions 	0.07% (0.36%) (0.74%) 0.00% <u>0.57%</u>
Preliminary normal contribution rate	27.75%
<ul style="list-style-type: none"> • Increase necessary to meet minimum contribution rate 	0.00%
July 1, 2005 normal contribution rate	27.75%

Actuarial Present Value of Accrued Benefits

The value of plan assets, the present value of vested accrued benefits, and the present value of accrued benefits are displayed and compared in this section of the report. Plan assets are valued at market value. The present value of vested accrued and accrued benefits is based on actuarial assumptions that anticipate the System will continue. Summarizing from this section of the report:

	Values as of <u>July 1, 2005</u>	Funded Ratio		
		<u>2003</u>	<u>2004</u>	<u>2005</u>
Market Value of Plan Assets	\$1,469,753,955	--	--	--
Actuarial Present Value:				
Accrued Benefits	1,600,631,755	80%	88%	92%
Vested Accrued Benefits	1,562,490,808	83%	90%	94%
Interest Rate		7.5%	7.5%	7.5%

Changes in System Provisions

All System provisions remained unchanged from the prior valuation.

Changes in Actuarial Assumptions

Beginning with the July 1, 1999 actuarial valuation, mortality improvements represented by published mortality tables will be phased in over the next several years. The July 1, 2005 actuarial valuation reflects an additional one-year step in a plan to complete the phase-in of the 1994 Group Annuity Mortality Table by the July 1, 2013 actuarial valuation. All other actuarial assumptions remained unchanged from the prior valuation.

Mortality Table Assumption Policy

In November 1999, the Board of Trustees adopted a policy to phase into the 1994 Group Annuity Mortality Table consistent with the funding capacities of the sponsoring Cities. A multiple year phase-in to the 1994 Group Annuity Mortality Table was recommended. The phase-in period of the 1994 Group Annuity Mortality Table should range from 6 to 20 years measured from 1999.

Government Accounting Standards Board Disclosure

Measurements used to evaluate the funding status of the system are based on procedures set forth by GASB (Government Accounting Standards Board). In an effort to enhance the understandability and usefulness of the pension information that is included in the financial reports of pension plans for state and local governments, GASB has issued Statement No. 25 — Financial Reporting for Defined Benefit Pension Plans.

GASB Statement No. 25 establishes a financial reporting framework for defined benefit plans. In addition to two required statements regarding plan assets, the statement requires two schedules, the Schedule of Funding Progress and Schedule of Employer Contributions, and accompanying notes disclosing information relative to the funded status of the plan and historical contribution patterns.

- The Schedule of Funding Progress is not required for systems which use the Aggregate Method to determine the Annual Required Contribution (ARC). Since the Retirement System uses the Aggregate Method to determine the ARC, this schedule has not been developed.
- The Schedule of Employer Contributions provides historical information about the Annual Required Contribution (ARC) and the percentage of the ARC that was actually contributed. For the Retirement System, the ARC is equal to the normal contribution rate multiplied by the covered payroll for the year or \$57,175,703 for 2005. This is the total ARC before any adjustment for minimum contribution rates or state contributions.

Covered Members

Ages of Active Members — The average age of the active members has slightly increased. The average age of members included in the valuation was 40.2 for the current year and 40.0 in the prior year.

Service of Active Members — The average service of the active members has slightly increased. The average service of members included in the valuation was 13.3 for the current year and 13.2 in the prior year.

Participating Compensation and Members — Total participating compensation increased from \$186,919,429 to \$196,143,062, a 4.9% increase. The number of active members increased from 3,775 in 2004 to 3,786 in 2005.

Average Annual Compensation — The average compensation of active members is more than the average compensation for the prior year. The average compensation was \$49,515 for 2004 and \$51,807 in 2005.

ACTUARIAL VALUATION RESULTS

This section of the report provides information concerning the valuation of Retirement System assets and liabilities. The following is a brief description of the exhibits and of how the information is organized.

Retirement System Assets — Retirement System assets are amounts that have accumulated and will be used to meet future benefit obligations. In the Retirement System Assets exhibit, trust fund transactions reported by the system are traced from the prior valuation date to the current valuation date. In addition, the actuarial value of assets is developed based on the prescribed method.

Retirement System Liabilities and Contributions —The recommended annual contribution is defined by the rate of contribution and covered payroll. The rate of contribution is determined by dividing the present value of unfunded future benefits by the present value of future payroll of all members. The Retirement System's contribution rate by statute may not be less than 17% of covered payroll. GASB Statement No. 25 defines a term, the Annual Required Contribution which is equal to the Cities contribution rate (prior to adjustment for minimum contribution rates or state contributions) multiplied by the covered payroll for the fiscal year.

Present Value of Accrued Benefits —Another objective of preparing the actuarial valuation is to evaluate the funding status of the Retirement System. A comparison of the market value of assets with the present value of accrued benefits is displayed for the current and prior year.

ACTUARIAL VALUATION RESULTS

ACTUARIAL VALUATION RESULTS

Change in Actuarial Present Value of Accrued Benefits

The change in actuarial present value of accrued benefits due to various factors including benefits accumulated, the passage of time, benefits paid, changes in assumptions and changes in System provisions is displayed below.

Actuarial present value of accrued benefits on July 1, 2004	\$1,511,241,555
Change in present value of accrued benefits from July 1, 2004 to July 1, 2005 due to:	
• Additional benefits accumulated	\$ 51,860,492
• Interest due to passage of time	110,326,047
• Benefits paid	(81,936,443)
• Change in assumptions	9,140,104
• Changes in System provisions	<u>0</u>
Actuarial present value of accrued benefits on July 1, 2005	\$1,600,631,755

SYSTEM EXPERIENCE

During the plan year July 1, 2004 to June 30, 2005, actual experience differed from that expected by the actuarial assumptions, as summarized below.

Decrement Type	Expected	Actual
Actives		
Service Retirement	57	63
Accidental Disability	31	28
Ordinary Disability	14	7
Accidental Death	5	0
Ordinary Death	7	2
Withdrawal	76	87

SUMMARY OF ACTUARIAL ASSUMPTIONS

Administrative Expenses	None assumed.
Percentage Married	85%
Spouses' Age	Wives are three years younger than husbands.
Number of Children	2.5 per couple.
Participating Payroll	Actual annualized earnable compensation reported for prior plan year increased to the current plan year based on the System's assumed salary increase rate.

SUMMARY OF ACTUARIAL METHODS

Actuarial Cost Method

The Aggregate Actuarial Cost Method was used to determine recommended contributions. Using this method, the present value of projected benefits to be funded by future contributions is determined by subtracting the actuarial value of plan assets and the actuarial present value of future member contributions from the actuarial present value of projected benefits. This result, the present value of unfunded future benefits, is divided by the present value of future salaries of active members included in the valuation to determine a normal cost accrual rate. The normal cost accrual rate is multiplied by the total of current annual salaries of members in the valuation to determine the recommended contribution.

Using the Aggregate Method, gains and losses that arise due to actual experience are not directly determined and recognized each year. Gains and losses are included in the present value of unfunded future benefits and affect the normal cost accrual rate. As a result, gains and losses are spread over the remaining period to retirement of members in the valuation and are recognized as a portion of future annual contributions.

Actuarial Asset Valuation Method

The preliminary actuarial value is equal to the prior year's actuarial value (starting with the market value as of July 1, 1992) adjusted for contributions, disbursements and expected return on investments. The preliminary value is then increased by 25% of any investment gains or (losses) during the four prior plan years.

SUMMARY OF SYSTEM PROVISIONS

The System was established, effective January 1, 1992, by Chapter 411 of the Code of Iowa by combining each city's fire retirement system and police retirement system into a single statewide retirement system for fire fighters and police officers. Plan amendments through July 1, 2005 are reflected in this summary.

Participation	Each person who becomes a permanent full-time police officer or fire fighter in a participating city.												
Membership Service	From date of employment to date of separation from employment.												
Earnable Compensation	The annual compensation which a member receives for services rendered as a police officer or fire fighter in the course of employment with a participating City, except for amounts received for overtime, meal or travel expenses, uniform allowances, fringe benefits, severance pay, mandatory deferred compensation, and accumulated sick leave or vacation pay.												
Contributions													
Members	The following percentages of Earnable Compensation: <table><thead><tr><th>Effective Date</th><th>Percentage</th></tr></thead><tbody><tr><td>October 16, 1992</td><td>6.10%</td></tr><tr><td>July 1, 1993</td><td>7.10</td></tr><tr><td>July 1, 1994</td><td>8.10</td></tr><tr><td>January 1, 1995</td><td>8.35</td></tr><tr><td>July 1, 1995</td><td>9.35</td></tr></tbody></table>	Effective Date	Percentage	October 16, 1992	6.10%	July 1, 1993	7.10	July 1, 1994	8.10	January 1, 1995	8.35	July 1, 1995	9.35
Effective Date	Percentage												
October 16, 1992	6.10%												
July 1, 1993	7.10												
July 1, 1994	8.10												
January 1, 1995	8.35												
July 1, 1995	9.35												
Cities	The amount actuarially determined necessary to fund the benefits in accordance with accepted actuarial principles but not less than 17% of the Earnable Compensation of the active members.												
State	The annual appropriation from the State of Iowa to fund benefits is about \$2,745,784 a year.												

SUMMARY OF SYSTEM PROVISIONS

Average Final Compensation

The average Earnable Compensation of the member during the three years of service the member earned their highest salary as a police officer or fire fighter.

Service Retirement Benefit

Eligibility

After age 55 and completion of 22 years of service.

Benefit

Monthly annuity equal to 66.0% of Average Final Compensation plus 2.0% of Average Final Compensation for each year of service in excess of 22 years (up to 8 additional years). The maximum benefit is 82.0% of Average Final Compensation.

Termination Benefit

Eligibility

At least 4 years of service upon termination of membership before age 55, or at least 4, but less than 22 years of service upon termination of membership after age 55.

Benefit

Monthly annuity payable at age 55 or current age, if later, equal to 66.0% of Average Final Compensation plus 2.0% of Average Final Compensation for each year of service in excess of 22 years (up to 8 additional years), if any, times a ratio equal to service at termination divided by 22 (ratio not to exceed 1.0).

Effective July 1, 1990, members who terminate service, other than by death or disability, can elect to withdraw their accumulated contributions with interest in lieu of any benefits to which the member may be entitled to from the System.

SUMMARY OF SYSTEM PROVISIONS

Ordinary Disability Benefit

Eligibility

A member in good standing at any age and any length of service.

Benefit

Monthly annuity payable upon disability equal to either (a) or (b) below, but no less than (c):

- (a) If service at disability is greater than or equal to 5, 50% of Average Final Compensation; or
- (b) If service at disability is less than 5, 25% of Average Final Compensation;
- (c) The benefit determined using the Service Retirement formula based on service and Average Final Compensation at the date of disability.

Accidental Disability Benefit

Eligibility

A member in good standing at any age and any length of service.

Benefit

A monthly annuity equal to 60% of Average Final Compensation but no less than the benefit determined using the Service Retirement formula based on service and Average Final Compensation at the date of disability.

Ordinary Death Benefit

Eligibility

For members in service: any age and any length of service.

For member not in service: 4 years of service.

Benefit

Upon death of the member, either (a) or (b) below:

- (a) A lump sum equal to 50% of Earnable Compensation during the last year of employment; or

SUMMARY OF SYSTEM PROVISIONS

- (b) A monthly annuity equal to 40% of average final compensation but not less than 20% of the average Earnable Compensation of an active member of the System, as reported by the actuary. For a member not in service, the monthly annuity is payable on the date the member would have reached age 55, except if there is a dependent child, it is paid immediately upon death of the member.

For each dependent child, an additional benefit equal to 6% of the average Earnable Compensation of an active member of the System, as reported by the actuary. This benefit is payable until the child reaches age 18 or 22 (if a full-time student) or payable for life if the child is disabled.

Accidental Death Benefit

Eligibility

Death from causes sustained in the line of duty.

Benefit

A monthly annuity equal to 50% of Average Final Compensation payable to surviving spouse, dependent child or dependent parents. In addition, a lump sum of \$100,000 is payable to the surviving spouse, dependent child or dependent parents if death is due to a traumatic personal injury incurred in the line of duty.

For each dependent child, an additional benefit equal to 6% of the average Earnable Compensation of an active member of the System, as reported by the actuary.

Death After Retirement

Eligibility

Death of member while receiving a service (basic benefit only), ordinary, accidental or vested (basis benefit only) retirement.

SUMMARY OF SYSTEM PROVISIONS

Benefit

To surviving spouse, 50% of the gross monthly benefit of the retired member but not less than 20% of the average Earnable Compensation of an active member of the System, as reported by the actuary.

For each dependent child, an additional benefit equal to 6% of the average Earnable Compensation of an active member of the System, as reported by the actuary.

Annual Escalator Benefit

Eligibility

All retired members, except for vested retirements, and for beneficiaries, except for beneficiaries of vested retirements.

Benefit

The monthly pension benefit is increased each July 1 by the sum of (a) plus (b) below:

- (a) The previous monthly benefit multiplied by 1.5%, and
- (b) An additional dollar amount from the table below based on the number of years the member has been retired.

Amount	Years of Retirement
\$15	Less than 5
20	5 – 9
25	10 – 14
30	15 – 19
35	20 or More

Normal Form of Benefit

Married

Joint and 50% Survivor Annuity.

Single

Life Only Annuity.
