INDEX

Actuarial Summary	1 - 17
--------------------------------	--------

Financial Statements

Exhibit A	Actuarial Balance Sheet, Assets and Liabilities.....	19 - 21
Exhibit B	Income and Expenditures.....	23 - 25
Exhibit C	Comparative Analysis, Assets and Liabilities.....	27 - 31
Exhibit D	Taxes Receivable	32

Statistical Data

Exhibit E	Membership Statistics.....	33
Exhibit F	Salary and Age Statistics.....	34 - 35
Exhibit G	Age and Service Distribution.....	36 - 37
Exhibit H	Annuitants Classified by Age.....	38 - 39
Exhibit I	Health Insurance Classified by Age.....	40
Exhibit J	New Annuities Granted During 2002	41 - 43
Exhibit K	Retirees and Beneficiaries by Type of Benefit	44
Exhibit L	Average Employee Retirement Benefits Payable.....	45
Exhibit M	History of Average Annual Salaries	46
Exhibit N	History of New Annuities Granted	47
Exhibit O	History of Total Annuities	48
Exhibit P	History of Benefit Expenses by Type	49 - 50
Exhibit Q	History of Investment Yields.....	51

Legislative Changes

Exhibit R	Legislative Changes	53 - 60
-----------	---------------------------	---------

Historical Data

Exhibit S	History of Recommended Employer Multiples and Taxes Levied.....	61
Exhibit T	History of Financial Information	62 - 63
Exhibit U	Department of Insurance Disclosure.....	64

GASB

Exhibit V	GASB Disclosure.....	65 - 75
-----------	----------------------	---------

Actuarial Assumptions

Exhibit W	Summary of Actuarial Methods and Assumptions	77 - 79
Exhibit X	Service Table Functions.....	80 - 82
Exhibit Y	Actuarial Experience.....	83 - 85
Exhibit Z	Impact Statement.....	86

Plan Summary

Exhibit AA	Plan Summary.....	87 - 91

The Retirement Board of the
County Employees' and Officers'
Annuity and Benefit Fund
of Cook County
Chicago, Illinois

Dear Members of the Board:

This is to certify that the annual statement as of December 31, 2002, of the County Employees' and Officers' Annuity and Benefit Fund of Cook County is, to the best of our knowledge and belief, a true and correct statement of the affairs and conditions of said Fund for the calendar year 2002. This statement has been prepared from the unaudited books of the Fund.

GASB

The Governmental Accounting Standards Board (GASB) Statement No. 25, *Financial Reporting for Defined Benefit Pension Plans*, is effective for periods beginning after June 15, 1996. The purpose of the Statement is to make the pension information more understandable and more useful. This statement is measuring the plan's funded status in accordance with the plan's funding policy under the GASB Statement No. 25 rules as well as under the traditional book and market valuation methods.

The Actuarial Asset Value, a smoothed market related value of assets technique, is calculated by taking the asset cost times the average ratio of the market value to cost for the invested assets for the current year and the prior four years.

A level dollar amortization of the actuarial unfunded liability with an open amortization period of 40 years is the method used for computing the amortization requirements.

The accounting procedure is outlined in Chapter 40, Section 5, Article 9 of the Illinois Compiled Statutes.

The method financing the system and the actuarial assumptions and methods used in the valuation are shown in Exhibit W. The attempt is made to give effect to realistic valuation factors, which affect costs. This statement has been prepared in accordance with generally accepted actuarial principles and practice.

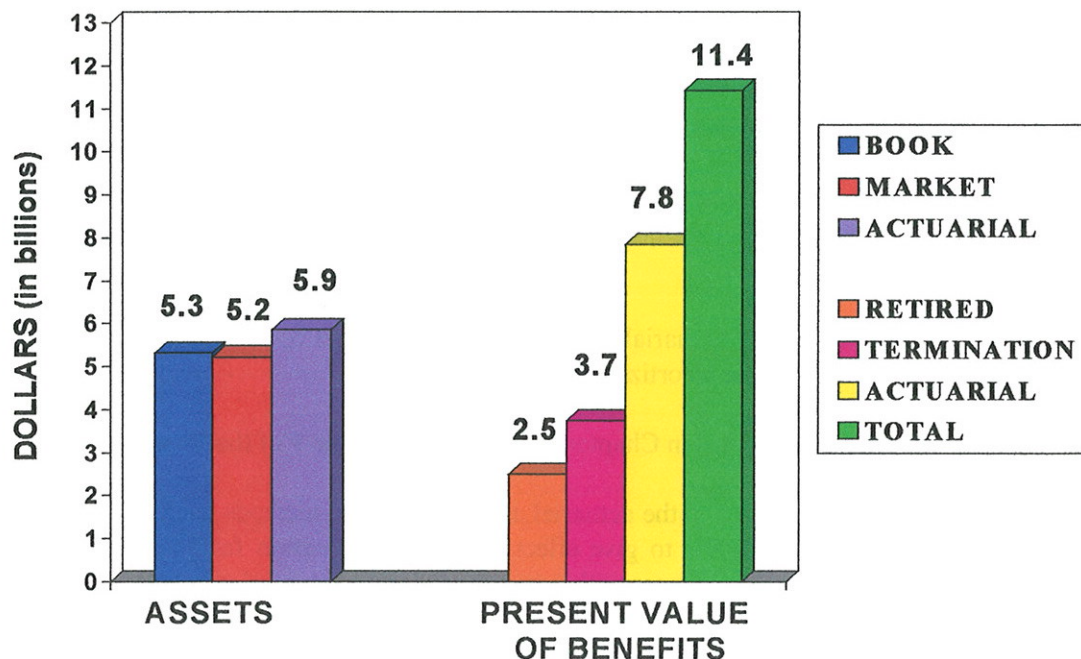

The costs for each of the alternative methods of funding the unfunded accrued liability, as required by the Illinois Compiled Statutes Chapter 40, Section 5/1 A-101 et. seq., are shown in this report. These include:

1. interest only on the unfunded liability;
2. the level annual amount required to amortize the unfunded accrued liability over a period not exceeding 40 years; and
3. the amount required for the current year to amortize the unfunded accrued liability over a period not exceeding 40 years as a level percentage of payroll.

The actuarial present value of “Credited Projected Benefits” required by GASB No. 5 and used for reporting to the Illinois Department of Insurance, but not funding, is shown in Exhibit U. The “Entry Age Normal” method is retained for funding.

This report contains results with assets valued at Book, Market, and Actuarial values. It is intended to meet the Insurance Department requirements, the statutory reporting requirements, and the GASB No. 25 reporting requirements.

COUNTY

Graph A, the graph of assets and actuarial accrued liabilities, illustrates the fund's position with respect to asset growth and liability growth for the various ways of measuring the liabilities. The difference between the assets and the actuarial accrued liability is the unfunded actuarial accrued liability.

Graph B, the graph of funded ratios, displays the ratio of actuarial assets to actuarial accrued liabilities for the various measures of liability.

Graph C, the graph of unfunded actuarial accrued liabilities, displays the liabilities for the different measures of liability with actuarial assets.

Graph D illustrates the income of the Fund - investment income, plus employer contributions, plus employee contributions - and the current payouts of the Fund benefits, refunds, and expenses. The excess or net of income over payouts goes to build reserves for future benefit payments.

Actuarial Assumptions

Actuarial assumptions required by GASB No. 25 takes into consideration anticipated future experience as well as past experience. As a guide to our thinking, we consulted two recent studies to compare interest and salary scale assumptions being used in other public and private pension fund valuations.

Greenwich Reports' 1999 survey, titled *How Funds Are Coping with "Uncertain Markets,"* shows that the mean actuarial interest rate assumption for public funds (based on 285 public funds surveyed in 1998) was 8.2% for 1996, 8.2% for 1997, and 8.1% for 1998. The corresponding salary increase assumption for public funds was 5.4% for 1996, 5.1% for 1997 and 5.0% for 1998. For 1998, the average monthly benefit paid to all public retirees was \$1,080.

Another report consulted, the *2003 Yearbook of Stocks, Bonds, Bills and Inflation* published by Ibbotson Associates, Chicago, Illinois, shows the following investment results based on historical data for the past 77 years from 1926 through 2002.

Stocks, Bonds, or Bills	Total Annual Return	Inflation	Net
Common Stocks	10.2%	3.0%	7.2%
Small Stocks	12.1	3.0	9.1
Long-Term Corporate Bonds	5.9	3.0	2.9
Long-Term Government Bonds	5.5	3.0	2.5
Intermediate Term Government Bonds	5.4	3.0	2.4
U.S. Treasury Bills	3.8	3.0	0.8
Inflation by decade:			
	2000's	2000-2002	2.4%
	1990's	1990-1999	2.9
	1980's	1980-1989	5.1
	1970's	1970-1979	7.4
	1960's	1960-1969	2.5
	1950's	1950-1959	2.2
	1940's	1940-1949	5.4
	1930's	1930-1939	(2.0)
	1920's	1926-1929	(1.1)

Using the above returns and inflation, configuring a portfolio similarly diversified to County Fund, 20% in long-term corporate bonds, 15% in treasuries and government agencies, 15% in intermediate term government bonds, and 50% in common stocks, the annual return for the 77-year period would be approximately 7.66% with a net return after inflation of 4.66%. The rate of return is consistent with the benchmark portfolio composed of 40% S&P 500 Index and 60% of the Lehman Brothers Aggregate Index or the Lehman Brothers Government/Corporate Index, whichever is applicable.

Based on these studies, it is our opinion that, for this Fund, an 8% future interest assumption is a reasonable rate for valuation purposes and a 5.5% per year salary scale is also reasonable. These assume an underlying 3.5% inflation. These assumptions take into consideration generally expected future investment earnings and the generally accepted views on future salary increases for our national economy. They could be characterized as being middle of the road.

The liabilities and costs in this report are based in part on an 8% per year interest assumption (net of investment expense), a 5.5% per year salary scale assumption, and a 10% cost of living inflation factor for retiree health care. All other assumptions are the same as those used for the previous years. In our opinion, each of these actuarial assumptions is reasonable, taking into account fund experience and future expectations, and represents the best estimate of anticipated experience.

YIELDS ON TOTAL ASSETS

(Compared to Actuarial Assumption)

ASSUMPTIONS VERSUS AVERAGE SALARY INCREASE AND CHICAGO CONSUMER PRICE INDEX

Actuarial Asset Value, reflecting smoothed market value

The actuarial asset value is computed as a five year smoothed average ratio of market over book value of invested assets (excluding cash and cash equivalents), and is based on unaudited figures.

See schedule in Exhibit V of this report for the methodology used.

Date	Total Assets at Book Value	Total Assets at Market Value	Total Assets at Actuarial Value
2000	\$ 4,977,840,126	\$ 5,547,128,904	\$ 5,706,998,091
2001	\$ 5,203,933,816	\$ 5,530,302,748	\$ 5,935,506,269
2002	\$ 5,309,453,185	\$ 5,221,853,532	\$ 5,861,233,506

Actuarial Obligations of the Fund

The value of all future pension payments, calculated using the actuarial assumptions contained in this report, is the sum of payments to two major groups of beneficiaries.

1. Retired Lives

For those currently receiving known benefits, i.e., current retirees, widows, widowers, and children, the value is determined based on estimated future longevity with the future benefit payments discounted to the present time at the assumed investment earnings rate.

Group	Number	Present Value of Future Benefits
Employee Annuity with Compound Increase	8,814	\$ 1,728,509,505
Future Widow(er) Benefit with Compound Increase	4,749	199,313,175
Lump Sum Death Benefit	8,814	3,761,288
Health Insurance Supplement	5,632	442,525,557
Widow(er) Annuity with Compound Increase	2,009	124,198,409
Widow(er) Compensation Annuity	2	413,294
Widow(er) Supplement (Total Annuity)	0	0
Total Retired Reserve		\$ 2,498,721,228

2. Active Lives

The value of future payments for active employees who will receive benefits in the future is estimated, since the amount of pension is only known at the actual time of retirement. This estimate is made using various actuarial assumptions as to future salary increases; probable retirement age; and chance of death, withdrawal, or disablement before retirement. For active employees, the goal is to have enough assets on hand at retirement to pay for all future benefits promised. To provide for an orderly accumulation of these required assets, an actuarial funding method is used. Using the "Entry Age Normal" funding method, assets are allocated as a level amount (expressed as a percentage of salary) over the employee's working lifetime. These allocated costs are called "normal costs" and are sufficient, if set aside each year, for a newly hired employee to accumulate the amount required to fully fund his or her benefits when and if he or she retires. For an employee who has completed half of his or her working lifetime, roughly half of the required retirement assets should have been accumulated. The actuarial reserve (amount of assets needed now) is then the present value of future benefits less the value of future normal costs to be paid.

Benefit	Present Value of Benefits	
Employee Annuity with Compound Increase	\$	5,980,240,998
Future Widow(er) Benefit with Compound Increase		576,321,305
Widow(er) of Employees, Dying in Service with Compound Increase		177,402,649
Lump Sum Death Benefit		3,040,424
Health Insurance Supplement		647,193,334
Refunds		222,637,856
Miscellaneous Benefits ¹		1,312,558,390
Total Active	\$	8,919,394,956
Total Active and Retired Present Value of Benefits	\$	11,418,116,184
Less Present Value of Future Normal Costs		\$ 3,571,808,193
Net Active Reserve		5,347,586,763
Net Reserve: Active and Retired		7,846,307,991
Less Present Actuarial Asset Values		5,861,233,506
Unfunded Liability	\$	1,985,074,485

¹ Miscellaneous Benefits includes the Present Value of Sheriff's Plan Annuities, Reciprocal Annuities, Child Annuities, Ordinary and Duty Disability, and Expenses based upon the current credit of these accounts.

The difference between the sum of the actuarial reserve for active and retired lives (sometimes called the "Actuarial Accrued Liability") and the present assets is called the "Unfunded Actuarial Accrued Liability." If assets exceed liability, there is a surplus. The unfunded liability depends upon the benefits, the characteristics of the covered group of employees and retirees, the actuarial assumptions, and the actuarial funding method. The unfunded liability can be thought of as the amount of assets that will be needed in future years to provide for all future benefits payable, when added to the future normal costs determined by the actuarial funding method.

Actuarial Balance

For the pension fund to be in actuarial balance, the present value of all benefits payable in the future must equal the sum of present assets plus present value of all future contributions.

Future contributions from the employee and employer must provide for the payment of normal costs and for amortization of the unfunded liability on some reasonable basis.

Future Contributions	Present Value	% of Total
Present Actuarial Assets	\$ 5,861,233,506	51.33%
Future Employee Contributions	1,433,189,456	12.55%
Future Employer Contributions	2,140,898,409	18.75%
Deficiency (Excess)	1,982,794,813	17.37%

Actuarial Cost Method

Three Methods of Financing the Unfunded Liability

1. Normal Cost plus Interest Method

This is the method of valuation that was used in reports prior to 1997. It is intended to continue the current provisions of the Article governing the fund in full force and effect on a permanent basis, and in the amount required each year to keep the unfunded liability from increasing if all assumptions are realized.

The normal cost plus interest only method of funding is that recommended by the former Illinois Public Employees' Pension Laws Commission. It was also the minimum required for private pension plans for IRS qualification before ERISA.

2. Normal Cost Plus 40-Year Amortization Method, used to compute the GASB No. 25 Annual Required Contribution

GASB No. 25 now requires an amortization of the unfunded liability, as does ERISA's minimum funding standards, which require the initial unfunded liability existing on January 1, 1976 be amortized over a 40-year period. We have calculated the cost of amortizing the existing unfunded liability.

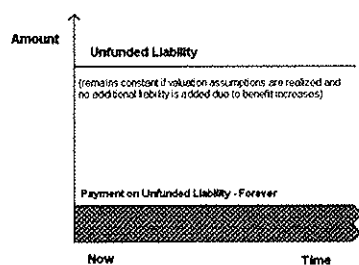

Both of these cost methods, the normal cost plus interest method and the normal cost plus 40-year amortization method, express the past service costs as a level annual dollar amount. Consequently, as the total payroll increases in the future, the level annual amount becomes a decreasing percent of the total payroll.

Under both methods, level dollar amounts represent a greater percent of payroll initially and a decreasing percent of payroll as future payrolls increase.

3. Level Annual Percent of Payroll Method

An alternative method for funding of public employee pension plans is a method that sets the funding standard cost objective as a level annual percent of payroll rather than as a level annual amount. This method will result in increasingly greater dollar amounts each year as payrolls increase.

This constant percent of payroll method is not an acceptable method under ERISA, but is permitted under GASB No. 25. It may be more acceptable in the future in view of the presumably permanent nature of public retirement systems with a constant flow of new entrants and the desire to place a relatively constant tax burden (as percentage of salary) on future generations of taxpayers. Please note that if this amount is recomputed each year with the same "open" amortization period, the unfunded liability will never be amortized.

1

2

3

For the Retirement Board's guidance, we have estimated the financial effects of different amortization methods. The costs under these funding methods are contingent upon all actuarial assumptions being met and continued active membership at the same level. These three methods meet the requirements set forth in Illinois Compiled Statutes Chapter 40, Section 5/1 et. seq. The results are given in the following table:

Actuarial Assets with Various Amortization Methods	Required 2003 Tax Levy	Ultimate Required Multiple ¹	Unfunded Liability Will ¹	Portion Required for Amortization of Unfunded Liability ¹
1. Normal Cost Plus Interest Only	\$368,334,908	3.14	Remain constant at \$1,985,074,485	\$152,811,105
2. GASB No. 25 40-year level dollar amortization	\$375,936,397	3.21	Decrease to \$0	\$160,184,549
3. Normal Cost Plus 40-Year Level % of Payroll Increasing 3.5% a Year (Inflation Only)	\$319,161,509	2.72	Increase to about \$2,975,309,818 In 22 years and decreases thereafter	\$105,112,908 increases to \$485,239,654 in 40 years
4. Present Law	\$187,745,000	1.54		

¹ Assuming all valuation assumptions are realized and no future benefit liberalization.

The preceding comparative table indicates the need to take into consideration in the funding policy future annual costs expressed both as a level annual dollar amount and as a level annual percent of payroll. The contribution requirements (and the required multiple) will decrease as the unfunded liability is amortized or as the unfunded liability becomes smaller relative to the total liabilities of the Fund.

The level annual percent of payroll method results in substantially increasing costs and contributions in future years, especially at the end of a funding period.

In determining funding policy it is essential to provide a margin of safety for unfavorable operating experience such as salaries over anticipated salaries, decreasing age of retirement, increasing longevity, and declining fund membership.

Actuarially Determined Contribution and Employer Annual Required Contribution

Based on the normal cost plus 40-year level dollar open period method of funding of the unfunded liability determined using Actuarial Assets, we find that the County tax levy for 2003 should be \$375,936,397, which includes a 3.0% overall reserve for loss on collection. This amount is based on an annual payroll (as of December 31, 2002) of \$1,330,456,896 and an active membership of 26,571 persons. The detail is shown in the table that follows. The estimated employee contributions assume salary increases and a permanent Optional Contribution Plan of benefits scheduled to expire July 1, 2005.

Detail of Annual County Contribution	Last Year Projection for 2002	This Year Projection for 2003	Last Year % of Salary	This Year % of Salary	Last Year Dollars Per Active Member	This Year Dollars Per Active Member
1. Normal Cost for Current Service	\$318,953,825	\$334,858,532	25.02%	25.17%	\$ 12,018	\$ 12,602
2. 40-Yr Level Dollar Amortization of the Unfunded Liability	59,932,872	160,184,549	4.70%	12.04%	2,258	6,029
3. Actuarially Determined Contribution (1+2)	378,886,697	495,043,081	29.72%	37.21%	14,276	18,631
4. Employee ¹ Contributions (next year estimate)	124,944,322	130,384,776	9.80%	9.80%	4,708	4,907
5. Annual Required Contribution of the Employer (ARC) (3-4)	253,942,375	364,658,305	19.92%	27.41%	9,568	13,724
6. Expected Net Employer Contribution from Tax Levy of:	179,603,000	187,745,000				
After a 3.0% Loss	174,214,910	182,112,650	13.66%	13.69%	6,564	6,854
7. Expected Net Annual Deficiency (Excess)	79,727,465	182,545,655	6.25%	13.72%	\$ 3,004	\$ 6,870
8. Tax Levy Required (Assumed 3.0% Loss)	\$261,796,262	\$375,936,397				
9. Required Multiple (@ 40-year Amortization)	2.33	3.21				
10. Present Authorized Multiple	1.54	1.54				
11. Increase in Multiple Needed	0.79	1.67				

¹ The estimated employee contributions include estimates for the optional plan. This estimate, though conservative, is more accurate to the trend of actual employee contributions, based on past experience.

The chart illustrates the history of the annual actuarial cost (composed of current service cost, or normal costs, and past service cost), on the three different funding methods, to be paid for by the employee and the employer.

Detail of Normal Cost	Last Year % of Salary	This Year % of Salary	Last Year Dollars Per Active Member	This Year Dollars Per Active Member

See the historical tabulation in Exhibit T.

CHANGE IN THE UNFUNDED LIABILITY

Funded Ratio

The ratio of actuarial assets to accrued liabilities was 74.70% as of December 31, 2002, and 88.88% as of December 31, 2001. This ratio represents the extent to which promises of present and future benefit promises are secured by the current actuarial value of assets.

Ratio of Active Employees to Annuitants and Beneficiaries

The ratio of active employees to annuitants and beneficiaries is 2.33 as of December 31, 2002, and was 2.35 as of December 31, 2001. This ratio illustrates the relationship between the contributors and the beneficiaries.

Termination Liability

A measure of plan funding is a comparison of the assets to liabilities for present annuitants and the amount of refundable contributions for active and inactive employees. This amount would be a minimum measure of the cost to terminate the plan as of the valuation date.

Termination Liability	2001	2002
Liability for Retired Annuitants, Widows/Widowers, and Spouses of Annuitants	\$ 2,277,232,951	\$ 2,498,721,228
Salary Deductions Contributed by Active Fund Members (with Interest)	1,108,332,348	1,245,347,907
Total Termination Liability	3,385,565,299	3,744,069,135
Actuarial Asset Value	5,935,506,269	5,861,233,506
Cost (Excess) Upon Termination	\$ (2,549,940,970)	\$ (2,117,164,371)
Quick Ratio	175.32%	156.55%
Available Assets for Actives (Retirees Fully Funded)	\$ 3,658,273,318	\$ 3,362,512,278
Available Assets per Active Employee	137,840	126,548
Average Salary Deductions per Active	\$ 41,761	\$ 46,869
Ratio of Available Assets to Salary Deductions	330%	270%

GASB Disclosure

GASB No. 25 requires the financial statements to include a "Statement of Net Assets" and a "Statement of Changes in Plan Assets".

GASB No. 25 requires supplementary information to include a "Schedule of Funding Progress" and a "Schedule of Employer Contributions" containing the pension disclosure information.

Schedule of Funding Progress Restated to Actuarial Asset Values for GASB No. 25

¹ Stated at Normal Cost plus 40-Year Level Dollar Amortization

² Tax levy after 3.0% overall loss.

³ Net tax levy plus miscellaneous.

The Future

A continuous review of the Fund's operating experience is needed, just as it has been needed in the past. The rates of salary increases, rates of retirement and investment earnings are of critical importance in cost estimates. Costs will need to be adjusted as these factors vary.

For example, for every \$1.00 increase in salary over the 5.5% increases assumed in the salary scale, the unfunded liability will be increased by about \$4.02. This will be in addition to the additional current annual service cost for every dollar in salary over the 5.5% salary scale assumed.

These additional costs will be reduced to some extent by the annual amount of investment income earned over the assumed 8.0% used for valuation purposes. The extent of the reduction will depend on the relative amounts of these two items.

Funding methods that use the level percent of payroll funding of past service have the disadvantage that the unfunded liability will continually increase if salaries continue at the predicted rates and if the amortization period is reestablished each year. Subject to projections of contributions and disbursements for potential cash flow problems, the level percent of payroll method would appear to provide a long-range level funding method on a minimum funding basis.

Respectfully submitted,

Total	\$ 166,377,499.66	\$ 4,859,095.00	\$ 4,742,406.66	\$ 9,601,501.66	\$ 156,775,998.00
					<u>\$ 17,978,260.00</u>
					\$ 164,014.00
					<u>\$ 174,590,244.00</u>

For 2002 the original tax levy of \$179,603,000 was reduced to \$161,624,740 on which there was a 3.0% loss of collection of \$4,848,742. The resulting \$156,775,998, when added to the 2002 Personal Property Replacement Tax of \$17,814,246 (Gross PPRT of \$17,978,260 less Excess Benefit allocation of \$164,014), will result in an overall loss of 2.8% on the \$179,603,000.

It is expected that for 2003 the original tax levy of \$187,745,000 will be reduced to \$168,951,725 on which there will be a 3.0% loss of \$5,068,552. The resulting \$163,883,173, when added to the 2003 Personal Property Replacement Tax of \$17,293,275 (Gross PPRT of \$18,793,275 less Excess Benefit allocation of \$1,500,000) will result in an overall loss of 3.5% on the \$187,745,000.

Total 2002 County Contributions from Tax Levy = \$174,590,244 (See Income page.)

Notes: Yield = Investment Income/((Beginning Assets + End Assets - Investment Income)/2)

Bonds valued at amortized cost, stocks at cost. Market values considered only in Market Value section.

LEGISLATIVE CHANGES

Spring 1982 Session

- SB 1147 • Actuarial reporting to Insurance Department and Pension Laws Commission. Actuarial statements prepared by a qualified actuary for plan years ending after December 31, 1984 including actuarial present value of credited projected benefits.
- SB 1452 • Allows a participant who served as Village Trustee and was not then eligible to participate in the IMRF for such service, to obtain credit in this fund by making the required contributions. Four-year maximum credit.
- SB 1579 • Permitted investment list moved to general section of the statute. Expanded fiduciary standards, prohibited transactions, civil action may be brought by Attorney General or by a participant.
- HB 2286 • Deputy Sheriff may elect between January 1, 1983 and January 15, 1983 to transfer credit to this Fund from the State Employees' Retirement System.

Spring 1983 Session

- SB 22 • Delegation of investment authority restrictions.
- HB 514 • 10% prudent person investment category.
 - 10% increase in spouse benefits to spouses receiving benefits as of January 1, 1984.
 - Immediate participation rather than after 1 year of service.
 - Refunds if off the payroll at least 30 days.
 - Money purchase annuity for County Sheriff's service not counted for Sheriff Formula.
 - Elected sheriff may be covered by Sheriff Formula with contributions.
- HB 637 • Allows an active member of the General Assembly to establish credit in this fund for time for which he or she could have elected to participate with interest at 6% and to transfer credits to the Park Fund.

1984 Session

- No changes.

1985 Session

- HB 17 • For withdrawals on or after July 1, 1985, 10 year vesting formula (for employee minimum and spouse minimum annuity) providing the employee 2% of final average earnings for each year of service reduced 0.5% (for ages 55-60) for each month under age 60 (but no reduction with at least 30 years of service. Spouse minimum amount is 50% of the employee's amount at retirement (reduced 0.5% for each month the spouse is under age 60) but not less than 10% of the final average earnings.
 - Unisex money purchase factors for widows/widowers.
 - Disability provisions extended to 70 in certain cases.
 - Sheriff formula for withdrawals after December 31, 1985 after having attained age 50 in service with 20 or more years of service of 50% of 4 year average earnings plus 2% for each year or fraction of service over 20.

LEGISLATIVE CHANGES

- Changes in the reversionary annuity provisions.
- Optional plan of 3% contributions for 1% optional benefit per year of service. Provisions for payment of past service with interest. Provisions expire July 1, 1990. Such plan, if elected by a member, would require a 3% of salary contribution (with interest for past service) and would produce an additional 1% per year of service benefit and would increase the employee annuity, post-retirement increase and spouse annuity. Membership in this plan is optional and as such, it is possible to delay election to just prior to retirement. Therefore, at this time, there is no accurate estimate of how many members will actually elect the optional benefits. The liabilities and the annual cost requirements of the fund may be substantially understated (up to 50% in some cases) if participation is high. It is difficult to pre-fund an unknown benefit. Actuarial losses may occur as experience develops.

1986 Session

- HB 2630
- Allows for a member of a County police department to establish service credit for approved leaves of absence without pay, during which the employee served as head of an employee association consisting of other police officers by making the required contributions.
 - Allows for the use of service of less than one year for calculating reciprocal annuities in the case of employees who transfer or are transferred as a class from one participating system to another.

Spring 1987 Session

- HB 2715
- For withdrawals after January 1, 1988, and for employees with at least 10 years of service and age 50, the minimum formula annuity is increased to 2.2% of the Final Average Salary for each of the first 20 years of service and 2.4% for each year thereafter, not to exceed the maximum of 80% of Final Average Salary. For retirement between age 50 (new minimum retirement age) and age 60, the annuity thus computed will be reduced 0.5% for each month the employee is under age 60 unless the employee has 30 or more years of service in which case no reduction will apply.
 - The surviving spouse of an employee who retires on or after January 1, 1988, with at least 10 years of service is entitled to 50% of the annuity including increases that the deceased annuitant was receiving as of his or her date of death. Such annuity to be reduced 0.5% for each month the surviving spouse is under age 60 at the date of the annuitant's death.
 - Effective July 1, 1988, any child's annuity being paid shall be increased from \$140 per month to 10% of the employee's salary at the date of death provided that the increased annuity would be greater than \$140 per month, subject to Statutory maximums.
 - Effective January 1, 1987, the maximum age conditions for any disability are removed for employees whose disability continued past that date.
 - A Deputy Sheriff with at least 15 years of service as a Deputy Sheriff can receive credit under the Police formula for other Cook County service by electing to pay an additional contribution prior to retirement. In addition, any Police Officer who has rendered at least 20 years of service and who separates from service prior to age 50 and does not withdraw his or her contributions can apply for pension benefits at age 50 without returning to duty.
 - Effective July 1, 1988, all employee and surviving spouse annuitants will receive a one-time increase. Such increase to be an additional 1% for each full year that the annuitant has received benefits as of July 1, 1988.

LEGISLATIVE CHANGES

- An alternative plan for elected officials of 3% of the Final Average Salary for the first 8 years, 4% for the next 4 years and 5% thereafter, subject to the maximum of 80%, is available. The elected official must contribute an additional 3% of salary to receive these benefits.
- Effective December 1, 1988, the Retirement Board will be increased from 5 to 7 Trustees. One annuitant Trustee to be elected for a 3 year term by those persons receiving annuity or disability benefits and 1 Forest Preserve District Trustee to be elected by the Forest Preserve District contributors for a term of 3 years beginning December 1, 1988.

Spring 1988 Session

- No legislative changes.

1989 Session

- SB 95
- Allows active members of the General Assembly to transfer credits and creditable service established in the Fund to a Fund established under Article 5 of the Pension Code.
 - For withdrawals on or after July 1, 1985, provides that for employees with at least 30 years of service, no reduction for age less than 60 will apply for the spouse annuity.
- SB 1096
- Extends the Optional Plan of benefits from the original expiration date of July 1, 1990 to July 1, 1992.
- HB 332
- Signed August 23, 1989.
 - Eliminated age-related discriminatory provisions as required by Federal law or regulation.
 - Provided for age discrimination changes effective January 1, 1988 to eliminate age 65 requirements for marriage in service and children's benefits, provided contributions after age 65 for spouse benefits, provided employee accumulation annuities be computed after age 70, provided employee and spouse accumulation annuities not be "fixed" at age 65, provided no age 70 restriction on disability benefits, provided for active members over age 65 that their accounts be "unfixed" and accumulate interest until the date of withdrawal, and provided that there be no age 70 membership limitation and removed the permitted "no spouse" refund at age 65.
 - Provides that for employees retiring after January 1, 1988, but before age 55, Section 20-131 shall not apply; therefore, they are not entitled to the alternative formula set forth in Section 20-122 repealed in 1975.
- HB 158
- Provides for payment by the Fund of 50% of the health care premiums for annuitants who participate in any of the County's health care programs beginning January 1, 1990 and ending December 31, 1993, subject to the following maximums:

Single coverage, no Medicare	\$130.00 per month
Single coverage, with Medicare	39.00 per month
Annuitant + 1 family member, no Medicare	212.00 per month
Annuitant + 1 family member, 1 with Medicare	168.00 per month
Annuitant + 1 family member, both with Medicare	78.00 per month
Annuitant + 2 or more family members, no Medicare	280.00 per month

LEGISLATIVE CHANGES

1990 Session

- SB 1951
- Signed January 14, 1991.
 - Raises the maximum annuity for a Deputy Sheriff from 75% of final average salary to 80% of final average salary.
 - Provides for a revised table to be used for reversionary annuities to allow for the younger age 50 retirement approved in previous legislation.
 - Allows for the refund of the additional 0.5% contributions that are paid by a Deputy Sheriff for the special Sheriff's formula to be refunded if the regular formula is used to calculate the employee annuity at the time of retirement. The refund, if given, is to include the interest as well as the 0.5% contributions.
-
- In the case where an employee who is disabled and cannot return to work after all his/her disability credit has expired, and chooses the option to pay for up to one additional year of service under Section 9-174, this additional service will not affect the resignation date for annuity purposes, but the salary and service will be used for such purposes.
 - Provides for employees who retire on or after November 1, 1990, any accumulated vacation paid out in a lump-sum at the time of retirement will not affect the employees' withdrawal date for purposes of annuity. Any service will be granted and used for annuity purposes, but the final average salary will not include the salary for any vacation paid out.
- SB 136
- Amends Chapter 120, Paragraph 671 of the Revenue Act to provide for a separate listing on the tax bill of the dollar amount of tax due from the person assessed which is allocable to a tax levied under the Illinois Pension Code, or any other tax levied by a municipality or township for public pension or retirement purposes. Effective January 1, 1990.

1991 Session

- HB 971
- Signed November 19, 1991.
 - Early Retirement Window for employees attaining age 55 prior to withdrawal and withdrawing on or after January 1, 1992, but before December 31, 1992, the service requirement for minimum formula annuity is reduced to 5 years. In addition, for the same period above, the age discount for retirement prior to age 60 is reduced to 0.25% per month under age 60 at retirement. The widow(er)'s annuity for the above early retirement window is 50% of the employee's annuity reduced by 0.5% for each month the widow(er) is under age 60 at the time of the employee's death.

Other Changes

- Provides that the 3% annuity increase will begin on January 1st following the first anniversary of retirement for employees who retired with 30 or more years of service and were under age 60 at retirement.
- Extends the Optional Plan of Benefits for an additional 5 years to July 1, 1997.
- Allows for an employee to make contributions and receive service credit for any unused accumulated sick leave up to 180 days, at retirement.
- Employees may now discontinue making contributions to the Pension Fund after 35 (previously 42) years of contributing service upon notification to the Retirement Board at least 60 days before the deductions cease.

LEGISLATIVE CHANGES

- For widow(er)s of employees or annuitants who die after November 19, 1991, the maximum limit on the spouse annuity is removed provided that the employee was at least age 60 with at least 20 years of service or also if retirement occurred on or after January 1, 1982, at age 65 or over with at least 10 years of service for retirements.
 - For widow(er)s of employees who retired on or after January 1, 1984, but before July 1, 1985, with at least 30 years of service, the annuity is 50% of the employee's annuity as of the date of retirement with no discount for under age 60.
-
- Beginning with retirements or deaths on January 1, 1992, with at least 10 years of service, the age discount for a widow(er)'s annuity will be 0.5% for each month the widow(er) is under age 55 at the date of the employee's death. This is reduced from age 60 for prior deaths or retirements.
 - Beginning on November 19, 1991, provides for a \$1,000.00 death benefit payable upon the death of employee or annuitant to the employee's designated beneficiary, or to the employee's estate if no beneficiary has been named.
 - Beginning December 1, 1991, the Fund may pay, on behalf of each of the Fund's annuitants who chooses to participate in any of the County's health care plans, all or any portion of the total health care premium (including coverage for other family members) due from each such annuitant.
 - Allows the annuitant to authorize the withholding of dues from annuity checks for certain labor organizations.
 - Allows participation for all employees with at least one month of service.
 - Provides for a repayment of contributions and transfer of service from the General Assembly and for former members of the General Assembly through February 1, 1993.
 - Grants the authority to rent or lease office space to the Board of Trustees when deemed desirable for the purposes of the Fund.
 - Allows the Pension Fund to withhold contributions to a labor organization from annuity checks provided that at least 100 annuitants authorize withholding from their checks.
 - Provides for the repayment of contributions by former members of the County Police who were the head of an employee association, to include both the employee and employer shares.

1992 Session

- SB 1770
- Signed September 16, 1992.
 - Early Retirement Incentive
 - Provides an extra 1% per year of County service, up to 10 maximum, times the final four year average salary for those eligible employees. There is no cost to the employee. The age discount from age 55 to 60 is eliminated if eligible.
 - Eligible if a contributing member on May 1, 1992 and:
 - Retires on or after December 1, 1992 and on or before May 29, 1993;
 - Attains age 55 or more on or before the date of retirement; and
 - Has at least 10 years of creditable service.

LEGISLATIVE CHANGES

1993 Session

- SB 1650
- Signed January 26, 1993.
 - Provides that the 3% annuity increase will begin no later than January 1, 1993 for employees who retire before age 60 before January 1, 1991 with at least 30 years of service.
 - For widow(er)s of annuitants who die on or after January 1, 1993, the widow(er)'s annuity shall be 50% of employee's retirement annuity at death discounted 0.5% per month the widow(er)'s age is less than 55, except if the employee had 30 years of service.
 - Allows an employee with 25 years of service to pay for up to 2 years of military service, whether or not followed by County service.
 - Two year minimum subsequent service is changed to six months for employees who apply to repay a refund between January 1, 1993 and March 1, 1993.
 - Employees may transfer to County up to 10 years with Municipal or Laborers' until March 1, 1993.
 - Allows for transfer of County service credit to Judges.
-
- Allows a State Policeman to transfer all or some of his service with County Police to State Employees Retirement System until July 1, 1993 and reinstate service credit terminated by a refund by paying 6% compounded annually until July 1, 1993.
 - Former members of County Police who retire January 1, 1993 to March 1, 1993 do not have to pay employer contribution for periods served as head of an employee association.

1994 Session

- No legislative changes.

1995 Session

- SB 114
- Approved July 14, 1995.
 - The amount of earnings that may be taken into account by any retirement system is limited to the maximum dollar limitation specified in Section 401(a)(17) of the Internal Revenue Code, except for persons who became participants before 1996.
 - Allows for active participants employed by the Cook County State's Attorney's office on January 1, 1995 to transfer to this Fund credits accumulated under a pension fund established under Article 5 of this Code and to transfer said credits from said fund to the Cook County fund upon payment of both employee and employer contributions with 6% interest to the County Employees' Annuity and Benefit Fund.
 - The Fund is authorized to make certain involuntary distributions required by Section 401(a)(9) of the Internal Revenue Code.
- SB 424
- Approved July 7, 1995.
The Pension Laws Commission was created as a legislative support services agency.

1996 Session

- SB 1456
- Approved August 9, 1996.
 - Any chief of the County Police Department or undersheriff of the County Sheriff's Department may elect to be included as a deputy sheriff.

LEGISLATIVE CHANGES

1997 Session

- HB 313
- Signed June 27, 1997.
 - Change county size necessary for fund creation to 3,000,000, from the previously required 500,000.
 - As of January 1, 1998 the automatic annual increase for employee and spouse annuitants changed to 3% compounded for all past, current, and future annuitants, regardless of the effective date of the annuity. Term annuities are not eligible for the automatic annual increase.
 - Early Retirement Incentive
 - Provides an extra 1% per year of County service, up to 10 maximum, times the final four year average salary for those eligible employees. There is no cost to the employee. The age discount from age 55 to 60 is eliminated if eligible.
 - Eligible if a contributing member on May 1, 1997 and:
 - Retires on or after September 1, 1997 and on or before February 28, 1998;
 - Attains age 55 or more on or before the date of retirement; and
 - Has at least 10 years of creditable service.
 - Effective January 1, 1998 all widow(er) annuitants will have their annuities increased by 3% and will receive the automatic increase of 3% compounded annually. Those widow(er) annuitants receiving a Term annuity will not be eligible for the automatic annual increase.
 - Extends the Optional Plan of benefits to July 1, 2002.
 - Allows members of the Cook County police department to transfer their service into the Policemen's fund until July 1, 1998, and to reinstate service credit terminated by a refund by paying 6% compounded annually.
 - Allows members of the fund with at least 20 years of service credit to make contributions, until June 1, 1998, into the fund based on CTA compensation and creditable service is granted for this period for up to 10 years of service credit.

1998 Session

- Passed the Qualified Illinois Domestic Relations Order (QILDRO) which allows for alternative payees designated by the order. All or some of annuity or refund payments can be made to alternative payee, but employee cannot be forced to make retirement decisions, hence alternative payee can only be paid from normally scheduled payments. The fund may be required to provide statement of benefits accrued based on data on file as of date of subpoena, but in no event shall the fund be required to provide an actuarial opinion of a member's present value.

1999 Session

- No legislative changes.

2000 Session

- Passed Public Act 87-1130, which removes the remarriage penalty. Effective September 6, 2000 widow annuities will no longer be ceased due to their remarriage.

2001 Session

- No legislative changes.

LEGISLATIVE CHANGES

2002 Session

- HB 5168
- Signed June 28, 2002.
 - Contractual service to the Retirement Board, of at least 5 years, can be purchased as creditable service in the fund for up to 10 years of services by making a written application to the board before July 1, 2003. A person who establishes such credit may, at the same time, reinstate credit in the Fund and repay a refund without a return to service.
 - An employee, who withdraws on or after July 1, 1996 but before August 1, 1996, at age 55 or over with 8 or more years of service, may elect to receive a minimum formula annuity equal to 2.2% of the Final Average Salary for each of the first 20 years of service and 2.4% for each year thereafter, not to exceed the maximum of 80% of Final Average Salary. There will be an age discount of 0.25% for each month that the employee is under the age of 60, unless the employee has at least 30 years of service.
 - For withdrawals after June 30, 2002, with at least 10 years of service and age 50, the minimum formula annuity is increased to 2.4% of the Final Average Salary for each year of service, not to exceed the maximum of 80% of Final Average Salary.
 - Early Retirement Incentive
 - Provides an extra 1% per year of County service, up to 10 maximum, times the highest consecutive four year average salary in the last 10 years of service for those eligible employees. There is no cost to the employee. The age discount for attained age under 60 is eliminated if eligible.
 - Eligible if a contributing member on January 1, 2001 and:
 - Retires on or after November 30, 2002 and on or before March 31, 2003;
 - Attains age 50 or more on or before the date of retirement; and
 - Has at least 20 years of creditable service in the Fund.
 - For widow(er)s of annuitants who die in service or after July 1, 2002, or has at least 10 years of service and dies on or after July 1, 2002 while receiving an annuity, the widow(er)'s annuity shall be 65% of employee's retirement annuity at death discounted 0.5% per month the widow(er)'s age is less than 55, except if the employee had 30 years of service.
 - For widow(er)s of annuitants who were not married at the time of retirement, but married after retirement for at least one year prior to annuitant's death, the widow(er) will be eligible for an annuity if the refunded contributions for a widow(er)s annuity are repaid, plus interest at the rate of 6% per year. (The Pension Fund Board has received a legal opinion that has interpreted this to include the widow(er)s of annuitants who were married at the time of retirement, but later legally married the current widow(er). The legal opinion was that, since in these instances no refund of spouse contributions was made, there is no payment due from the widow.)
 - Extends the Optional Plan of benefits to July 1, 2005.

Plan Description

Any employee of Cook County employed under the provisions of the County personnel ordinance who is not participating in any other pension fund or retirement system is covered by the County Employees' Annuity and Benefit Fund (County Plan) which is a defined benefit single employer pension plan with a defined contribution minimum. Although this is a single employer plan, the defined benefits, as well as the employer and employee contribution levels are mandated in Illinois Compiled Statutes Chapter 40, Pensions, Article 9 and may be amended only by the Illinois legislature. The County of Cook accounts for the plan as a pension trust fund. The County payroll for employees covered by the County Plan for the year ended December 31, 2002 was \$1,330,456,896. At December 31, 2002 the County Plan membership consisted of:

Retirees and beneficiaries currently receiving annuities	11,396
Terminated employees entitled to benefits or a refund of contributions but not yet receiving them	9,204
Current employees	26,571

The County Fund provides retirement benefits as well as death and disability benefits. Employees age 50 or more with at least 10 years of service are entitled to receive a money purchase annuity with partial County contributions if under age 60 with less than 20 years of service. Employees age 50 or more with at least 10 years of service are entitled to receive a minimum formula annuity of 2.4% per year of service times the final average salary (the highest average annual salary for any 4 consecutive years within the last 10 years of service immediately preceding the date of retirement). If the employee retires prior to age 60, the annuity shall be reduced by 0.5% for each month the employee is under age 60 unless the employee has 30 years of service, in which case no reduction is made for under age 60. The original annuity can not exceed 80% of the highest average annual salary. The monthly annuity is increased by 3% of the original annuity beginning in January of the year immediately following the first anniversary of retirement, and by 3% annually thereafter if the employee retires at age 60 or older or if he has at least 30 years of service. If retirement is before age 60 and the employee has less than 30 years of service, increases begin in January of the year following attainment of age 60.

Covered employees are required to contribute 8.5% of their salary to the County Plan. If an employee leaves covered employment without qualifying for an annuity, accumulated contributions are refunded with interest (3% or 4% depending on when employee became a participant). Cook County is required by state statutes to contribute the remaining amounts necessary to finance the requirements of the Fund. It is required to levy a tax at a rate not more than an amount equal to the total amount of contributions by the employees to the Fund made in the calendar year two years prior to the year for which the annual applicable tax is levied, multiplied by 1.54 annually.

Plan Assets

GASB No. 25 requires the use of a market related asset value. We have used a 5 year smoothed average ratio of market to book value. For Insurance Department use, assets are at fair market value.

¹ Includes miscellaneous income.

For the year 2002 (based on a 2002 multiple of 1.54) the County contributed (after tax levy losses of 3.0%) \$178,410,973 or 13.99% of payroll. For 2002, the employee contributions were \$146,979,954 or 11.53% of payroll. As the Annual Required Contribution was 19.92% of payroll, there was a deficiency of 4.20% of payroll or \$53,495,770.

¹ Stated at Normal Cost Plus 40-Year Level Dollar Amortization.

² Tax levy after 1.8% overall loss through 1995, 2.7% beginning in 1996, and 3.0% beginning in 1998.

³ Net tax levy plus miscellaneous.

⁴ Changes in asset valuation, actuarial assumptions, employee benefits, and funding method result in changes to the expected employee and employer contributions. The scale of these changes will cause any comparison to previous years to have little practical meaning.

⁵ Beginning in 1998, estimates for employee contributions include estimated optional contributions.

GASB DISCLOSURE

**Actuarial Accrued Liability Prioritized Solvency Test
Restated to Actuarial Asset Values for GASB No. 25**

The prioritized solvency test is another means of checking a system's progress under its funding program, based on the Actuarial Accrued Liability. In this test the plan's present assets (cash and investments) are compared with obligations in order of priority: (1) active member contributions on deposit; (2) the present value of future benefits to present retired lives; (3) the Actuarial Accrued Liability for present active members. In a system that has been following the discipline of financing, the obligation for active member contributions on deposit (present value 1) and the present value of future benefits to present retired lives (present value 2) will be fully covered by present assets (except in rare circumstances). In addition, the Actuarial Accrued Liability for present active members (present value 3) will be partially covered by the remainder of present assets. Generally, if the system has been following a system of amortizing the unfunded liability, the funded portion of present value (3) will increase over time.

a Change in actuarial assumptions.

b Change in benefits.

c Change in asset valuation method for all years.

Note: Active Members (ER Financed Portion) was based on credited projected value of benefits prior to 1997.

GASB DISCLOSURE

**Actuarial Asset Calculation Method
(Reflecting Smoothed Market Value)**

The Investment Asset Value is valued at cost times the average ratio of the market to cost for the current year and the prior four years. Cash and equivalents are valued at market value for the total actuarial assets, while all other assets are valued at market value.

Net Pension Obligation – beginning of year	(128,123,135)
Net Pension Obligation – end of year	\$ (74,627,365)

¹ Employer's Annual Pension Cost is the APC less Expected Employee Contributions.

² In accordance with GASB No. 27, for an employer that has no net pension obligation (this included an NPO that is a negative balance) the annual pension cost (APC) is equal to the annual required contribution (ARC).

Note: GASB No. 27 states that employers should have all necessary information to calculate NPO beginning after the effective date of GASB No. 5, December 15, 1986. NPO calculations begin for first statement year following that effective date. The Net Pension Obligation is a liability, so a negative NPO balance is desirable.

SUMMARY OF ACTUARIAL METHODS AND ASSUMPTIONS

Method: The actuarial funding method used is the **entry age normal method**, which reflects actuarial gains and losses immediately in the **unfunded liability**.

This cost method assigns to each year of employment a constant percentage of an employee's salary, called the **current service cost** (sometimes referred to as **normal cost**), sufficient to accumulate the necessary funds to provide for the full prospective costs of the employee's projected retirement pension. The amount of pension must be estimated using various assumptions as to future compensation levels, employee turnover, and mortality and pension fund earnings, since the actual pension can be known only at the time of retirement. These are called actuarial assumptions.

It should be emphasized that the actuarial assumptions do not directly affect the cost of the pension plan. Benefits are fixed by statute and will become payable as various members and their dependents satisfy the contingencies covered. The actual cost of the plan can only be determined after all benefits have been paid and is equal to the total benefits paid, plus total administrative expenses, minus total investment income.

The **accrued liability** of the fund at any point in time is the accumulated value of all **current service costs** that should have been paid up at that time for active employees plus the full prospective cost of pensions for all retired employees. The extent that the actual plan **assets** are less than the **accrued liability** is called the **unfunded liability**.

An amount of money is required each year to amortize the **unfunded liability** over a period of 40 years if all assumptions are realized. This amount is called **40-year level-dollar amortization** of the **unfunded liability**.

The required total **actuarial contribution** required to the fund is equal to the **current service costs** plus a **40-year level dollar amortization** on the **unfunded liability**. The old funding policy of interest only has been strengthened. This minimum method of funding, often referred to as the middle of the road method, is the method the fund has tried to follow in the past. It has evolved over the years and seeks to satisfy the ideologies of all interested groups, including opinions often expressed by the Civic Federation. Under the new GASB No. 25 standard, a 40-year level dollar amount is provided for amortization of the **unfunded liability**.

Reserves for employees' retirement annuities, spouses' retirement annuities, health insurance and death benefits are valued on the entry age normal method. Grouped ages of entry 22, 27, 32, 37, 42, 47, 52, 57, 62, and 67 and over are used.

The costs for the following items are valued on an actuarial cost basis. No reserves are set up, as these items tend to stabilize on a cash basis.

1. Duty disability benefits
2. Ordinary disability benefits
3. Children's annuities
4. Refunds, including refunds for no spouse
5. Expense of administration (net of investment expense)

Reserves are set up for duty and ordinary disability recipients as if they were in active service.

ACTUARIAL EXPERIENCE

The actuarial assumptions for retirement, withdrawal and pre-retirement mortality determine when and if a benefit is expected to be paid. The post-retirement mortality determines how long the benefit is expected to be paid. Once the actives enter service, there is a probability that they will not be in the work force at the end of each year because of withdrawal, retirement or death, at which time they may be eligible for a benefit to be paid. The withdrawal and retirement rates for the County have been based on past experience of this Fund with adjustments for expected changes in the future. The pre-retirement and post-retirement mortality are based on a published table, the 1983 GAM set forward two years (adopted 1997), and not on the experience of this Fund. The actual experience of the Fund is compared to the expected experience of the Fund each year and changes in the rates or tables are made when the future expectations differ from the expectations using the current rates.

Actuarial Experience: Actual to Expected Experience					
Year	Active Mortality	Retired Mortality	Widow/er Mortality	Retirement	Withdrawal

PLAN SUMMARY

Participants

Persons employed by the County whose salary, or persons whose wage is paid in whole or in part by the County.

Service

For all purposes except minimum formula annuity and ordinary disability credit, service in 4 months in any calendar year constitutes one year of service credit. No more than 1 year of service is allowed during any calendar year.

For minimum formula annuity, service for any 15 days in a calendar month shall be a month of service.

For purposes of ordinary disability, service shall include the following:

- a) the time during which he performed the duties of his position;
- b) paid vacations and leaves of absence with whole or part pay;
- c) period for which he received duty disability benefits;
- d) any period of disability for which he received whole or part pay.

Retirement Annuity

Accumulation Annuity: Payable at age 50, with at least 10 years of service (entire sum accumulated from deductions plus 10% County contributions for each year after 10). Full County contributions are added for age 60 and over, regardless of service. This annuity is known as the money purchase plan.

Minimum Formula Annuity: Payable at age 50, with at least 10 years service; 2.4% per year of service times the final average salary (highest 4 consecutive within the last 10 years). Maximum annuity is 80% of final average monthly salary. Under age 60 the annuity is reduced by a percentage equal to 0.5% for each month and fraction thereof that the employee is under age 60 at retirement unless he has 30 or more years service credit, in which case there is no reduction for age.

Automatic Increase in Annuity: Retirement at age 60 or older or if retirement occurs on or after January 1, 1991 with at least 30 years of service: 3% of annuity starting January of the year following the year in which the first anniversary of retirement occurs. If retirement is before age 60 with less than 30 years of service, increases begin in January of the year immediately following the year in which the age of 60 years is attained. Beginning January 1, 1998, increases are calculated as 3% of the monthly annuity payable at the time of the increase. Increases apply only to life annuities.

Special rules applicable only to the County Police Department have not been included in the above.

PLAN SUMMARY

Optional Plan of Contributions and Benefits

Optional plan of 3% of salary contributions (past service requires repayment with interest) for 1% optional benefit per year of service. Basic retirement annuity, post-retirement increase and spouse's annuity are increased. Provisions expire July 1, 2005.

Elected County Officials' Optional Plan

An alternative plan for elected officials of 3% of the Final Salary for the first 8 years, 4% for the next 4 years and 5% thereafter, subject to the maximum of 80%, is available. The elected official must be age 60 with 10 years of service or age 65 with 8 years of service to be eligible. The elected official must contribute an additional 3% of salary to receive these benefits.

Spouse's Annuity

Spouse annuity is payable for life or until termination of temporary annuity.

Death in Service (Non-Duty): Money Purchase based on total salary deductions and County contributions for both employee and spouse.

Minimum Formula Annuity if the deceased employee has at least 10 years service. Beginning January 1, 1992, widow(er)'s annuity is 50% of annuity that would have been payable to employee which is discounted 0.5% for each month widow(er) is under age 55 at death of employee. Beginning July 1, 2002, widow(er)'s annuity is 65% of annuity that would have been payable to employee which is discounted 0.5% for each month widow(er) is under age 55 at death of employee. There is no reduction for age with 30 or more years of service. For employee dying in service, annuity shall not be less than 10% of the final average salary.

Death after Retirement: Annuity is determined to be based on money purchase plan or formula minimum annuity depending on rules in effect at the date the participant retires. Widow(er)s of annuitants who die on or after January 1, 1993 will receive 50% of the employee's annuity at death, discounted 0.5% per month the widow(er) is under 55 at employee's death. Widow(er)s of annuitants who die on or after July 1, 2002 will receive 65% of the employee's annuity at death if he had at least 10 years of service at retirement, discounted 0.5% per month the widow(er) is under 55 at employee's death. There is no reduction for age with 30 or more years of service.

Increases for Surviving Spouses: Spouse annuitants will receive 3% of the monthly annuity payable at the time of the increase starting on January 1, 1998, or on the January 1st occurring on or immediately following the first anniversary of the employee's death, whichever is later.

Children's Annuity

Child annuity is payable upon death of County employee, either active or retired. Child must be unmarried, under age 18, legally adopted at least one year before child's annuity becomes payable. Annuity is the greatest of 10% of the employee's final salary at the date of death or \$140 per month per child. Except for duty death, deceased employee must have had 4 years of service and at least 2 years from latest re-entrance if he had previously resigned from service.

PLAN SUMMARY

Family Maximum

Non-Duty Death: 60% of final monthly salary.

Duty Death: 70% of final monthly salary.

Disabilities

Duty Disability Benefit: Benefit is granted if the employee is disabled as a result of an accidental injury incurred in the performance of an act of duty (unless the disability resulted from a physical defect or disease that existed prior to the time of the injury). Duty disability benefit is equal to 75% of employee's salary at the date of disablement. This benefit is reduced by the amount the employee receives from Worker's Compensation. Duty disability benefit begins on the first day after disablement occurs and continues until the employee attains age 65, if disability begins before age 60. For an employee who begins disability on or after age 60, disability will continue for period of 5 years. In addition, the employee is entitled to receive \$10 a month for each child under age 18; the total amount paid for the children not to exceed 15% of his final salary. The County contributes the amounts necessary for the employee's pension. Any disablement resulting from any physical defect or disease which existed at the time such injury was sustained shall be paid at 50% of the salary at the date of such injury.

Ordinary Disability Benefit: Benefit is granted if the employee is disabled from any causes that are not duty related. Ordinary disability benefit is equal to 50% of employee's salary at the date of disablement. The first payment shall be made one month after the disablement occurs. Payments will continue for a period not greater than 25% of employee's total service, but no more than 5 years. The County pays deductions for pension purposes. Service for this purpose is actual service; one day of service is given for each day paid, exclusive of any overtime payments.

Employees unable to return to work at the expiration of Disability benefits may elect to receive annuity benefits before age 50. If service is less than 10 years, such employees are entitled to receive accumulation annuity (entire sum accumulated from deductions plus full County contributions). If employee has at least 10 years and is age 50 or more, such employee is entitled to the greater of the accumulation annuity previously described, or minimum formula annuity discounted by 0.5% for each month he is less than age 60. If service is 20 years or more, at any age the employee can receive the minimum formula if greater. The annuity would be discounted for age under 60 as in the minimum formula and then reduced to its actuarial equivalent at his attained age.

Lump Sum Death Benefit

Beginning November 19, 1991, a \$1,000 death benefit, payable upon the death of an active or retired employee to the employee's designated beneficiary or to the employee's estate if no beneficiary has been named.

PLAN SUMMARY

Group Health Insurance

The pension fund may pay all or any portion of the premium for health insurance if the annuitant is enrolled in the County plan.

Refunds

To Employee: Upon separation from service, deductions plus interest if employee under age 55. If over age 55, employee is eligible for a refund if he has less than 10 years of service or if employee is eligible for temporary rather than life annuity. Employee forfeits all rights upon acceptance of a refund.

Spouse's annuity deductions: payable to employee if unmarried when he retires.

To Spouse: In lieu of annuity if annuity would be temporary rather than life and spouse so chooses.

Remaining Amounts: Excess over total annuity payments may be paid to children, estate, heirs or designated beneficiary.

Deductions and Contributions

	Deductions	County Contributions ¹
Employee	6.5%	6.0%
Spouse	1.5%	2.0%
Annuity Increase	<u>0.5%</u>	—
Total	8.5%	8.0%

¹ Financing

The County shall levy a tax annually that will produce a sum equal to 1.54 for the years 1984 and after multiplied by the total amount of contributions made by employees two calendar years prior to the year of the levy.

Tax Shelter of Employee Salary Deductions

Beginning April 1, 1982, the employee contributions were designated for income tax purposes to be made by the employer even though they are still paid by the employee. The W-2 salary is therefore reduced by the amount of contribution. For pension purposes the salary remains unchanged. For the purpose of benefits and refunds these contributions will be treated as employee contributions.

PLAN SUMMARY
