PUBLIC EMPLOYEES' RETIREMENT FUND
OF INDIANA

Summary of Actuarial Valuation as of July 1, 2005

Introduction

As of the valuation date there were 141,428 active members, 57,121 pensioners and 10,531 terminated members entitled to future benefits. See the exhibit labeled Summary of Employee Data for a breakdown of the members between state employees and employees of political subdivisions.

We have established the following contributions as of July 1, 2005:

	<u>State</u>	<u>Political Subdivisions</u>	<u>Total</u>
Total Annual Cost	\$ 87,947,466	\$ 161,721,639	\$ 249,669,105
Cost as Percentage of Anticipated Payroll (Interest adjusted to mid-year)	5.5%	6.3%	6.0%

This Valuation is the fourth to reflect census data as reported by a new database system. The previous database system reported salaries on a calendar year basis and reported service through the March 31 preceding the valuation date. The new database system reports both salary and service on a fiscal year basis. Also, the new database system may have created an increase of about \$70 million in liabilities associated with prior service earned by active members. Due to the fiscal impact of the more current data, this valuation has been prepared in such a manner as to phase-in the changes brought about by the new database system over a four-year period on a pro rata basis. This phase-in will ease the transition to the census data reporting by the new database system.

This report reflects the plan provisions in effect as of July 1, 2005. Refer to the exhibit titled Summary of Major Plan Provisions for a brief description of benefits provided by this plan.

The Total Annual Cost is composed of employer normal cost of \$220,065,372 and an amortization payment of \$29,603,733. As of July 1, 2005, the Unfunded Actuarial Accrued Liability is \$386,384,977. A breakdown and a comparison with the results of the prior valuation is provided in the exhibit titled Contribution Breakdown and Comparison.

Introduction, Continued

The Total Annual Cost for 2005, as a percent of anticipated payroll increased to 6.0% as compared to 5.0% for 2004. The Fund had experience losses primarily from investments yielding less than the assumed 7.25% (estimated return for the 2004 plan year was 7.0% on an actuarial value basis) and from changes in actuarial assumptions. In terms of actual dollars, the Total Annual Cost increased by \$47,038,490 from \$202,630,615 for the 2004 plan year to \$249,669,105 for the 2005 plan year.

Actuarial Methods and Assumptions

The Entry Age Normal Cost Method was continued for determining the cost of retirement benefits, death benefits, disability benefits, and termination benefits. Valuation assets continue to be developed on an actuarial basis.

The actuarial assumptions used in this Valuation have been revised from the prior Valuation. The COLA actuarial assumption was changed from 0.5% annually to 1.0% annually. The COLA assumption is applied for the lifetime of the benefit recipients.

A brief explanation of the methods and a complete summary of the assumptions used may be found in the exhibits titled Actuarial Methods and Actuarial Assumptions.

Valuation Data and Disclaimer

The valuation census data was provided by the Public Employees' Retirement Fund and transposed into a computer file for processing. Similar information has been furnished to us in the past, and the accuracy of this report depends on the accuracy of all data that has been furnished to us from time to time. Trust information was also furnished by the Public Employees' Retirement Fund. It is noted that we make no representation concerning the accuracy of any employee data or valuation information that has been furnished to us.

The Valuation has been prepared for the sole purpose of determining the contribution requirements for the respective plan year and for providing accounting data to meet the requirements of GASB #25 and #27. The figures in this Valuation should not be used as the basis for any other purpose for which it was not designed.

Summary of Trust Experience

On an actuarial basis, the entire asset portfolio had net investment income for the 2004-2005 plan year that resulted in an estimated yield of 7.0%. The approximate market basis return during the same time period was 9.2%. See the exhibit labeled Ten Year Historical Investment Experience for more detail.

We will be pleased to furnish any additional information or answer any questions which may arise after your review of this report.

ACTUARIAL CERTIFICATION

The information and valuation results shown in this report are, to the best of my knowledge, complete and accurate and are based upon:

The information and valuation results shown in this report are, to the best of my knowledge, complete and accurate and are based upon:

1. Employee census data as of July 1, 2005 submitted by the Director of the Public Employees' Retirement Fund. Although we did not audit this data, it appears to be sufficient and reliable for purposes of the report.
2. Financial data as of July 1, 2005 submitted by the Director of the Public Employees' Retirement Fund. Although we did not audit this data, it appears to be sufficient and reliable for purposes of the report.
3. Actuarial assumptions which were chosen by the PERF Board after consultation with the actuary.
4. Generally accepted actuarial principles and in accordance with standards of practice prescribed by the Actuarial Standards Board.
5. Actuarial methods as stated in the report and our interpretation of plan provisions as summarized in the report.

ACTUARIAL METHODS

ACTUARIAL COST METHOD

Entry Age Normal Cost

ASSET VALUATION METHOD

75% of Expected
Actuarial Value Plus
25% of Market Value

Entry Age Normal Cost

The normal cost is calculated separately for each active member and is equal to the level percentage of payroll needed as an annual contribution from entry age to retirement age to fund projected benefits. The unfunded actuarial accrued liability on any valuation date is the accumulated value of such normal costs from entry age to the valuation date less the actuarial value of assets.

The effect of this valuation method is to amortize all actuarial gains and losses, resulting from experience different from that anticipated in our assumptions, over a 30-year period. The purpose of the method is to give a smooth progression of the costs from year to year and, at the same time, provide for an orderly funding of the unfunded liabilities.

ACTUARIAL ASSUMPTIONS

Interest	7.25% net of administrative expenses
Future Salary Increases	Based on PERF experience 1995-2000.
Cost of Living Increases	An increase of 1.0% compounded annually (changed from 0.5% compounded annually) is assumed to be applied to the pension benefit each year following retirement. No increase is assumed to be applied to the PERF annuity benefit.
Mortality	UP-1994. Pre-retirement mortality based on PERF experience 1995-2000.
Disability	Based on PERF experience 1995-2000.
Termination	Select and ultimate tables based on PERF experience 1995-2000. Separate tables are used for state employees and political subdivision employees.
Retirement	Based on PERF experience 1995-2000.
Spouse's Benefit	90% of members are assumed either to be married or to have a dependent beneficiary. Males are assumed to be 3 years older than their spouses.
Administrative Expense	Netted against investment earnings

SUMMARY OF MAJOR PLAN PROVISIONS

PARTICIPATION

All full time employees of the State of Indiana and all full time employees of political subdivisions which have adopted the plan must become members of PERF upon date of hire.

ELIGIBILITY FOR ANNUITY BENEFITS:

Normal Retirement

Earliest of:

- (1) Age 65 with 10 years of creditable service;
- (2) Age 60 with 15 years of creditable service;
- (3) Sum of age and creditable service equal to 85 (but not earlier than age 55).

Early Retirement

Age 50 with 15 years of creditable service

Late Retirement

Subject to continued employment after normal retirement

Disability Retirement

5 years of creditable service and qualified for Social Security disability benefits or federal Civil Service disability benefits.

Termination

10 years of creditable service and election not to take lump sum payment of employee account balance with interest.

Pre-Retirement Death

If death occurs in service, 15 years of creditable service. If death occurs after separating from service, age 50 with 15 years of creditable service.

SUMMARY OF MAJOR PLAN PROVISIONS, Continued

AMOUNT OF BENEFITS:

Normal Retirement	The normal retirement benefit is an annuity payable for life with 60 months guaranteed and is equal to 1.1% of average monthly earnings* times years and months of creditable service earned.
Early Retirement	The early retirement benefit is the accrued retirement benefit determined as of the early retirement date and payable commencing at the normal retirement date. A member may elect to have the benefit commence prior to normal retirement provided the benefit is reduced by 1/10% for each of the first 60 months and by 5/12% for each of the next 120 months that the benefit commencement date precedes the normal retirement date.
Late Retirement	The late retirement benefit is calculated in the same manner as the normal retirement benefit. Creditable service and earnings earned after normal retirement is included in the computation.
Disability Retirement	The disability retirement benefit is the accrued retirement benefit determined as of the disability date and payable commencing the month following disability date without reduction for early commencement.
Termination	The termination benefit is the accrued retirement benefit determined as of the termination date and payable commencing at 65. If the member has 15 or more years of creditable service, then the member may elect to receive a reduced early retirement benefit.

* Average monthly earnings is the monthly average of earnings during the 20 quarters (in groups of 4 consecutive quarters) preceding retirement that produce the highest such average. Earnings include basic salary, the member's 3% mandatory contribution paid by the employer, the member's salary reduction agreement under Section 125, 403(b) or 457 of the Internal Revenue Code, and up to \$2,000 of additional compensation received from the employer in anticipation of the member's termination or retirement.

SUMMARY OF MAJOR PLAN PROVISIONS, Continued

AMOUNT OF BENEFITS:

Pre-Retirement Death

The spouse or dependent beneficiary is entitled to receive the monthly life annuity under the assumption that the member retired on the later of age 50 or the day before the date of death and elected the joint and full survivor option.

Employee Contributions

Each member is required to contribute to an employee annuity at the rate of 3% of pay (unless the employer has opted to make all or a portion of the contribution for the employee). These contributions are kept on deposit and credited with interest until such time as they are refunded or used to provide the annuity benefit at retirement.

The benefits provided by employee contributions are in addition to the benefits provided by employer contributions. The monthly annuity provided at a normal retirement age of 65 is equal to \$1.00 for each \$108.79 of accumulated employee contributions plus interest.
