and PENSION SYSTEM

Comprehensive Annual Financial Report

Maryland State Retirement and Pension System

A Pension Trust Fund of the State of Maryland
For the Years Ended June 30, 2014 and 2013

2014

MISSION STATEMENT

The Board of Trustees of the Maryland State Retirement and Pension System (System) is charged with the fiduciary responsibility for administering the survivor, disability and retirement benefits of the System's participants and to ensure that sufficient assets are available to fund the benefits when due. To accomplish this mission the System has established the following key goals:

- To prudently invest System assets in a well diversified manner to optimize long-term returns, while controlling risk through excellence in execution of the investment objectives and strategies of the System.
- To effectively communicate with all retirement plan participants to inform them about the benefits provided by the System, and to educate them about planning and preparing for all aspects of their future retirement.
- To accurately and timely pay retirement allowances provided by State pension law to the System's retirees and their beneficiaries.
- To implement an automated, comprehensive and integrated pension administration and electronic document management system.
- To efficiently collect the required employer and members contributions necessary to fund the System.

Introduction

December 15, 2014

Dear Members, Retirees and Beneficiaries:

On behalf of the Board of Trustees, we are pleased to present the Comprehensive Annual Financial Report of the Maryland State Retirement and Pension System for the fiscal year ended June 30, 2014. This report provides information on the financial status of the retirement system during a period when the system issued, on average, approximately \$262 million in monthly payments to nearly 143,000 retirees and beneficiaries.

Fiscal Year 2014 was a strong year for investment returns as the system's portfolio returned 14.37 percent. This return exceeded by significant margins both the actuarial return assumption for the fiscal year of 7.70 percent and the policy benchmark of 14.16 percent. The policy benchmark return represents what would have been earned on investments if the fund had been completely indexed, or passively managed. Active management added value to the fund in the fiscal year, as it will over longer time periods. All of the system's asset classes experienced positive returns in the fiscal year, led by growth-oriented investments such as public and private equity.

While we are pleased with the investment performance of the fund in fiscal year 2014, the board continues to focus on long-term performance. The capital markets are always going to experience volatility, which will result in good years and bad years. Being a long-term investor allows the system to weather the short-term volatility for long-term returns. Over the last 25 years—a period that has included multiple economic cycles—the system has earned an average return of 7.75%.

The board's fundamental mission is to ensure that retirement benefits are paid in full, and in an accurate and timely manner. The board oversees the investment of the Maryland State Retirement and Pension System assets in order to help ensure the funding necessary to meet those obligations.

Your retirement system remains administratively and financially sound. As a participant in the system, you can remain confident that your pension benefits are secure. As always, your commitment to and involvement in the concerns of the system are greatly appreciated. We value your input—this is your system. If you have any questions, please do not hesitate to contact us.

Sincerely,

NANCY K. KOPP
Chairman

PETER FRANCHOT
Vice Chairman

Introduction

LETTER OF TRANSMITTAL

December 15, 2014

Honorable Chairman and Members of the Board of Trustees:

We are pleased to submit the Comprehensive Annual Financial Report for the Maryland State Retirement and Pension System for the fiscal year ended June 30, 2014. We believe this report fairly presents the operating results achieved during this 12-month reporting period.

The System is responsible for properly administering retirement, disability, and death benefits. At the same time, it strives to keep employer contribution rates as reasonable as possible by maximizing investment returns while maintaining an acceptable level of risk. Members covered by the plans include state employees, teachers, law enforcement officers, legislators, judges, as well as local government employees and correctional personnel whose employers have elected to participate in the System.

The System currently provides monthly allowances to about 143,000 retirees and beneficiaries, and is an essential element of the future financial security for more than 193,000 active participating members. Descriptions of the membership requirements and benefits provided by each plan administered by the System are included in the Plan Summary Section starting on page 114.

This Comprehensive Annual Financial Report contains six sections. The Introductory Section provides information about the administrative structure of the System. The Financial Section provides a comprehensive review of the System's financial position, the results of its operations and its funded status. It also contains the report from the System's independent auditor, the combined financial statements and supplementary financial data. The Investment Section includes a report highlighting the System's investment performance in addition to various summary level portfolio compositions and other investment data. The Actuarial Section contains the independent actuary's report on the results of the System's annual actuarial valuation. The Statistical and Plan Summary Sections provide demographic composition of the System's membership segments affected by each plan and detailed descriptions of the various plans' provisions. In addition to this Letter of Transmittal, additional narrative, overview, and analysis can be found in Management's Discussion and Analysis beginning on page 18.

INVESTMENTS

The System's investment portfolio returned 14.37 percent in fiscal year 2014. The fund achieved its 7.70 percent actuarial return target for the fiscal year, and also exceeded the plan policy benchmark of 14.16 percent by 21 basis points. The plan policy benchmark is a point of reference that compares the System's total investment performance against the weighted average of the benchmark performance of each of the System's underlying asset classes.

The System's strong performance in fiscal year 2014 continued to be driven by growth-oriented assets, including public and private equity, with additional value generated from active management.

After the payment of benefits, the market value of assets increased by approximately \$4.9 billion from \$40.4 billion on June 30, 2013 to \$45.3 billion on June 30, 2014.

The System's target asset allocation is comprised of 35 percent public equities, 10 percent fixed income, 10 percent private equities, 10 percent credit/debt strategies, 10 percent real estate, 14 percent real return, 10 percent absolute return and 1 percent cash. The System's portfolio is balanced across several asset and sub-asset classes and is globally diversified. This, coupled with a long term investment horizon, allows the System to weather short term market volatility.

Financial Information

System management has committed the resources necessary to maintain an internal control structure that provides reasonable assurance that assets are adequately safeguarded, financial records are consistently and accurately maintained, and transactions are properly executed to permit preparation of financial statements in accordance with generally accepted accounting principles. The System's internal control structure includes written policies and procedures and an internal audit division that reports to the Board.

Accounting System and Reports

The System reports its transactions on the accrual basis of accounting. Under this method, revenues are reported in the accounting period they are earned and become measurable, and expenses are reported when the related liability is incurred and measurable. Investments are reported at fair value at fiscal year end. Investment purchases and sales are reported in the accounting period in which the related trade dates occur.

Revenues

The reserves necessary to finance retirement allowances and other benefits are accumulated through investment earnings and the collection of employer and member contributions. During fiscal year 2014, investment earnings were \$5.71 billion, while revenues from employer and member contributions were \$1.73 billion and \$727.7 million, respectively. For fiscal year 2014, member contribution rates on average were 7 percent, while employer rates varied depending on the System.

Expenses

The System's expenses consist of monthly retirement allowances, refunds of contributions to terminated and transferring members, withdrawing employers, and the administrative cost of System operations. Payments to retirees, beneficiaries and transferring or withdrawing members and employers continued to be the System's primary disbursements during FY 2014, totaling \$3.1 billion. In addition, the System disbursed \$357.6 million to manage the investment portfolio and to administer the System, of which \$331.5 million was paid for investment management, portfolio custody, and securities lending services and \$26.1 million used to fund the System's administrative operations.

Funding

Funds are derived from the excess of additions, which include contributions and investment earnings, over deductions, which are comprised of benefits and administrative expenses. Funds are accumulated to meet future benefit obligations to retirees and beneficiaries. This accumulated balance is referred to as the "net assets held in trust for pension benefits" in the Statement of Pension Net Position in the Financial Section of this report. The actuarial accrued liability is not disclosed in the basic financial statement but is disclosed in note nine to the basic financial

statements. The funded status schedule presented in note nine shows the actuarial value of assets, which is based on a five-year smoothed expected rate of return, wherein the excess or shortfall of investment income over or under the actuarial assumed income of 7.70 percent is recognized over a five-year period. This is the value of assets used by the actuary in determining contribution rates for the Systems as disclosed in note five to the basic financial statements.

The actuarial accrued liability of the System is also determined by the actuary. It is a measure of the present value of actuarial accrued liabilities estimated to be payable in the future to current retirees, beneficiaries and employees for service earned to date. The percentage computed by dividing the actuarial value of net assets available for benefits by the actuarial accrued liability is generally referred to as the "funded ratio." This ratio provides an indication of the funded status of the System on a going-concern basis and generally, the greater this percentage, the stronger the System. The System's funded ratio increased from 65.5 percent at June 30, 2013 to 68.7 percent at June 30, 2014.

At June 30, 2014, the System's actuarial accrued liability was \$62.6 billion and the unfunded actuarial accrued liability totaled \$19.6 billion, resulting in a funded status ratio of 68.7 percent. The unfunded actuarial accrued liability will be amortized over a closed 25-year period.

Professional Services

The System contracts for the services of various independent consulting, investment advisory and financial professionals to assist the Board of Trustees in carrying out its fiduciary responsibility to efficiently and effectively manage the System. Actuarial services were provided by Gabriel Roeder Smith & Company and independent financial statement audit services were provided by SB & Company, LLC. The System's asset custody and portfolio accounting services were provided by the State Street Bank & Trust Company under a multi-year, master custody arrangement. Hewitt Ennis Knupp, Inc. served as the System's general investment consultant. Specialty consulting services were provided by Altius Associates Limited and Pension Consulting Alliance, Inc. for private equity and real estate, respectively. Albourne America LLC advises staff on the retirement System's Absolute Return portfolio and Wilshire Associates provides risk consulting services. A complete listing of the System's professional consultants and external investment advisors is presented on page 11.

Awards

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the Maryland State Retirement and Pension System for its Comprehensive Annual Financial Report for the fiscal year ended June 30, 2013. This was the twenty-fifth consecutive year (1989 through 2013) that it has received this prestigious award. In order to be awarded a Certificate

of Achievement, a governmental unit must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe our current comprehensive annual financial report continues to meet the Certificate of Achievement Program's requirements, and we are submitting it to the GFOA to determine its eligibility for another certificate.

Additionally, the Maryland State Retirement and Pension System received the Public Pension Coordinating Council's (PPCC) 2014 Recognition Award for Administration, in recognition of meeting professional standards for plan administration as set forth in the Public Pension Standards.

The PPCC is a coalition of the following associations that represent public pension funds that cover the vast majority of public employees in the U.S.:

- National Association of State Retirement Administrators (NASRA)
- National Council on Teacher Retirement (NCTR)
- National Conference on Public Employee Retirement Systems (NCPERS)

The Public Pension Standards are intended to reflect expectations for public retirement Systems management and administration, and serve as a benchmark by which all defined benefit public plans should be measured. The Maryland State Retirement and Pension System is proud to be a recipient of this award.

Acknowledgments

This annual report reflects the dedicated efforts of the System's staff under the steady direction of the Board of Trustees. We extend our sincere gratitude to each member of the Board, the System's staff, the Board's advisors and the many people who worked with diligence and dedication throughout fiscal year 2014.

REPORT OF INDEPENDENT PUBLIC ACCOUNTANTS

To the Board of Trustees
Maryland State Retirement and Pension System

Report on the Financial Statements

We have audited the accompanying financial statements of the Maryland State Retirement and Pension System (the System), which is a pension trust fund of the State of Maryland, as of and for the years ended June 30, 2014 and 2013, and the related notes to the financial statements, which collectively comprise the System's financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

We have audited the accompanying financial statements of the Maryland State Retirement and Pension System (the System), which is a pension trust fund of the State of Maryland, as of and for the years ended June 30, 2014 and 2013, and the related notes to the financial statements, which collectively comprise the System's financial statements as listed in the table of contents.

Auditor's Responsibility

Our responsibility is to express an opinion on the financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the System, as of June 30, 2014 and 2013, and the respective changes in plan net position for the years then ended, in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, schedule of changes in employers' net pension liability, schedule of employers' net pension liability and related ratios, schedule of employers' contributions and related ratios, schedule of investment returns, and notes to required supplementary information be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audits of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Supplementary Information

Our audits were conducted for the purpose of forming an opinion on the financial statements that collectively comprise the System's basic financial statements. The introductory, other supplementary information, investment, actuarial, statistical and plan summary sections, as listed in the table of contents, are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The schedule of fund balances, schedule of administrative expenses, schedule of plan net position by system, schedule of changes in plan net position by system, and the schedule of investment expenses are the responsibility of management and were derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the other supplementary information, as listed above, is fairly stated in all material respects in relation to the basic financial statements as a whole.

The schedule of funding progress, the schedule of contributions from employer and other contributing entity, and the introductory, investment, actuarial, statistical, and plan summary sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

MANAGEMENT'S DISCUSSION AND ANALYSIS

To help facilitate a better understanding of the Maryland State Retirement and Pension System's (the "System") financial condition as of June 30, 2014, the results of its operations for the fiscal year then ended and the fiscal policies that govern its significant business operations, management has prepared this narrative analysis. This narrative is intended to supplement the System's audited financial statements and, as such should be read in conjunction with these statements, which are presented beginning on page 24.

OVERVIEW OF THE FINANCIAL STATEMENTS

As required by accounting principles generally accepted in the United States of America, the System's basic financial statements are comprised of the comparative Statements of Plan Net Position and Statements of Changes in Plan Net Position, along with the related note disclosures. In addition, the System's financial statements include certain required supplementary information (e.g., schedule of changes in employers' net pension liability, schedule of employers' net pension liability, schedule of employers' contributions, and schedule of investment returns) as well as other supplementary schedules considered relevant to the financial statement user (e.g., schedules of fund balances, administrative and investment expenses, plan net position, and related changes by system). To better understand the relevance of the information presented in the System's financial statements and related notes and supplementary information, it is helpful to first consider what purpose each component is intended to serve.

The Statements of Plan Net Position present a comparative, summary-level snapshot, as of a specific point in time (i.e., June 30th – the last day of the System's fiscal year), of the market value of the net position available to pay future pension benefits to retirees and beneficiaries. To assist the reader in understanding the composition of the System's accumulated net position the most significant components (e.g., cash and cash equivalent securities, investments) are separately disclosed. In this regard, cash and cash equivalents represent that portion of the System's assets that, as of the end of the fiscal year, reside in the form of actual cash or short-term, highly liquid, investment securities. This amount gives an indication of the System's liquidity at fiscal year-end. Conversely, the amounts shown as investments represent those funds invested in longer-term securities (e.g., stocks, bonds, real estate) held for the purpose of generating investment income. The sum of these assets, reduced by any liabilities owed by the System as of fiscal year-end, represents the net position held in trust to pay pension benefits.

By contrast, the Statements of Changes in Plan Net Position are intended to show, on a comparative basis, the major categories of income earned (additions to plan net position) and expenses incurred (deductions from plan net position) by the System during the previous fiscal year. As such, the System's net income or loss accounts for the entire change in the net position held in trust to pay pension benefits during the fiscal year as a result of System operations. As with the System's assets and liabilities, significant categories of income and expense, as reported on the Statements of Changes in Plan Net Position, are separately disclosed to help clarify the major sources and uses of the System's resources.

Finally, the note disclosures are provided as an integral component of the basic financial statements to help explain in narrative form some of the more complex or less obvious elements of the statements. Further, the notes to the financial statements provide additional information (e.g., significant accounting policies, various types of investment risk) that is essential for a comprehensive understanding of the System's financial condition and the results of its operations.

As part of the Government Accounting Standards Board (GASB) Statement No. 67, *Financial Reporting for Pension Plans – An Amendment of GASB Statement No. 25*, certain new disclosures were made this year. These disclosures include information on the actuarial assumptions, long-term expected rates of return on investments, the discount rate, and the sensitivity of the net pension liability. These can be found in note 9 of the accompanying financial statements.

The Schedule of Funding Progress, while similar in scope to the Statements of Plan Net Position in that it is primarily focused on reporting on the accumulation of assets, differs from such statements both in its method for valuing such assets and in its approach to explaining their relevance to the liability they are being accumulated to satisfy. In this regard, the Schedule of Funding Progress first takes a long-term, actuarial view toward valuing the System's investment portfolio, as opposed to the market value approach reflected on the Statements of Plan Net Position. Specifically, the System's assets are valued (for funding purposes) using a methodology that distributes investment gains and losses over a five-year period in order to minimize the effects of annual market volatility on employer contribution rates.

The Schedule of Changes in Employers' Net Pension Liability, Schedule of Employers' Net Pension Liability, Schedule of Employers' Contributions, and Schedule of Investment Returns share common characteristics with data disclosed in the basic financial statements. In this regard, both the Statements of Changes in Plan Net Position and the Schedule of Contributions from Employers and Other Contributing Entity disclose the amount of contributions received from participating employers. However, the Schedule of Employer Contributions differs from the Statements of Changes in Plan Net Position in that the schedule's primary focus is to disclose the contributions required to be made in accordance with the System's funding policy and the percentage of the required contributions actually made during the fiscal years presented.

Finally, the other supplementary schedules, presented immediately after the required supplementary information, summarize the changes in fund balances, disclose major categories of operating and investment expenses, and provide combining, plan-level detail related to asset, liability, income and expense amounts summarized in the basic financial statements.

ANALYSIS OF FINANCIAL POSITION AND RESULTS OF OPERATIONS

The System's overall funding objective is to accumulate sufficient assets over time to meet its long-term benefit obligations as they become due. Accordingly, collecting employer and member contributions as well as earning an adequate long-term rate of return on its investments are essential components of the System's plan for accumulating the funds needed to finance future retirement benefits.

ANALYSIS OF RECENT ACCOUNTING PRONOUNCEMENTS

In June 2012, the Governmental Accounting Standards Board (GASB) issued Statement No. 67, *Financial Reporting for Pension Plans*, (GASB 67) that reflects substantial changes to the accounting and financial reporting of pension plans. For state and local government pension plans, GASB 67 replaces Statement No. 25, *Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans*, (GASB 25) for financial reporting. Additionally, GASB 67 replaces the requirements under Statement No. 50, *Pension Disclosures*, (GASB 50) for those governments and public pension plans. GASB 67 shifts the focus of accounting for pension plans from a funding model, under GASB 25, to a cost model.

This change focuses on the measurement of the liability. GASB 25 subtracts the Actuarial Value of Assets from the Actuarial Accrued Liability to determine the Unfunded Actuarial Accrued Liability shown in the statements. GASB 67 subtracts the Fiduciary Net Position from the Total Pension Liability to determine the Net Pension Liability shown in the statements. Another key change is that GASB 25 allows for the smoothing of assets, whereas, GASB 67 uses their fair value as of the measurement date.

Fiscal Year 2014 compared to 2013

The following condensed comparative Statement of Plan Net Position for the fiscal years ended June 30, 2014 and 2013, presents an increase in the System's net position of \$4.98 billion (12.3%). This increase is primarily due to positive net returns in the investment portfolio, led by public equity; private equity, real estate and debt. Additional information on our fiscal year 2014 investment activities can be found in the Investment Section of this report.

A schedule of the System's investments and changes (by type) from fiscal year 2013 to 2014 is as follows (expressed in millions):

	June 30,		Change	
	2014	2013	Variance	%
Cash & cash equivalents	\$2,054.2	\$2,085.1	\$(30.9)	-1.5%
U.S. Government obligations	3,422.8	3,556.6	(133.8)	3.8%
Domestic corporate obligations	3,803.3	2,771.8	1,031.5	37.2%
International obligations	1,870.1	1,603.7	266.4	16.6%
Domestic stocks	8,344.4	8,255.4	89.0	1.1%
International stocks	8,057.3	7,827.1	230.2	2.9%
Mortgages & mortgage related securities	1,926.7	2,079.5	(152.8)	-7.3%
Alternative investments	16,358.8	12,227.2	4,131.6	33.8%
Total managed investments	45,837.6	40,406.4	5,431.2	13.4%
Collateral for loaned securities	2,490.9	2,876.4	(385.5)	-13.4%
Total investments and cash & cash equivalents	48,328.5	43,282.8	5,045.7	11.7%
Receivables	848.8	1,455.2	(606.4)	-41.7%
Total Assets	49,177.3	44,738.0	4,439.3	9.9%
Liabilities	3,837.3	4,374.8	(537.5)	-12.3%
Total Net Position, End of Year	\$ 45,340.0	40,363.2	\$4,975.8	12.3%

As depicted in the following comparative Statement of Changes in Plan Net Position for fiscal years 2014 and 2013, contributions to the System during fiscal year 2014 increased slightly as a result of an increase in covered payroll and the State's reinvestment contribution of savings as a result of the pension reform legislation passed during the 2011 General Assembly session. The System's investments experienced a positive weighted average investment return of 14.38%, recognizing \$5,706.3 million in net investment income.

The System continues to pay out more benefits than contributions collected. An increase of \$171.1 million in benefits paid to retirees correlates to the increase in the number of retirees and beneficiaries experienced in fiscal year 2014. This increase offset against \$5,706.3 million of fiscal year 2014 investment returns resulted in a net change in pension net position of \$4,976.8 million.

A schedule of the System's additions to and deductions from plan net position and related changes (by major category) from fiscal year 2013 to 2014, is as follows (expressed in millions):

	June 30,		Change	
	2014	2013	Variance	%
Employer contributions	\$ 1,016.6	\$959.6	\$ 57.0	5.9%
Member contributions	727.7	710.9	16.8	2.4%
State contributions on behalf of local governments & contribution interest	717.0	683.5	33.5	4.9%
Net investment income	5,706.3	3,845.8	1,860.5	48.4%
Total additions	8,167.6	6,199.8	1,967.8	31.7%
Benefit payments	3,121.8	2,950.7	171.1	5.8%
Refunds	42.9	38.3	4.6	12.0%
Administrative expenses	26.1	26.3	(0.2)	-0.8%
Total deductions	3,190.8	3,015.3	175.5	5.8%
Net increase in plan net position	\$4,976.8	\$3,184.5	\$ 1,792.3	56.3%

Analysis of Net Pension Liability (expressed in millions)

	June 30,		Change	
	2014	2013	Variance	%
Total Pension Liability	\$ 63,086.7	\$60,060.1	\$ 3,026.6	5.04%
Plan Fiduciary Net Position	45,340.0	40,363.2	4,976.8	12.33%
Net Pension Liability	\$ 17,746.7	\$ 19,696.9	\$ (1,950.2)	-9.90%
Ratio - Fiduciary Net Position/TPL	71.87%	67.20%		

During the year the net pension liability decreased by \$1,950.2. This was mainly due to an increase of investment income of \$1,860.5, which outpaced the growth in expenses of \$175.5.

Fiscal Year 2013 compared to 2012

The following condensed comparative Statement of Plan Net Position for the fiscal years ended June 30, 2013 and 2012, presents an increase in the System's net position of \$3.2 billion (8.6%). This increase was primarily due to positive net returns in the investment portfolio, led by domestic, international and global equity; credit and debt strategies; private equity and real estate. Additional information on our fiscal year 2013 investment activities can be found in the Investment Section of this report.

A schedule of the System's investments and changes (by type) from fiscal year 2012 to 2013 follows (expressed in millions):

	June 30,		Change	
	2013	2012	Variance	%
Cash & cash equivalents	\$ 2,085.1	\$ 2,171.0	\$ (85.9)	-4.0%
U.S. Government obligations	3,556.6	3,231.4	325.2	10.1%
Domestic corporate obligations	2,771.8	2,808.3	(36.5)	-1.3%
International obligations	1,603.7	1,306.5	297.2	22.7%
Domestic stocks	8,255.4	7,988.3	267.1	3.3%
International stocks	7,827.1	8,147.7	(320.6)	-3.9%
Mortgages & mortgage related securities	2,079.5	2,491.8	(412.3)	-16.5%
Real estate	-	5.0	(5.0)	-100.0%
Alternative investments	<u>12,227.2</u>	<u>9,614.4</u>	<u>2,612.8</u>	<u>27.2%</u>
Total managed investments	40,406.4	37,764.4	2,642.0	7.0%
Collateral for loaned securities	<u>2,876.4</u>	<u>3,452.1</u>	<u>(575.7)</u>	<u>-16.7%</u>
Total investments and cash & cash equivalents	43,282.8	41,216.5	2,066.3	5.0%
Receivables	<u>1,455.2</u>	<u>1,040.6</u>	<u>414.6</u>	<u>39.8%</u>
Total assets	44,738.0	42,257.1	2,480.9	5.9%
Liabilities	<u>4,374.8</u>	<u>5,078.4</u>	<u>(703.6)</u>	<u>-13.9%</u>
Total Net Position, End of Year	\$ 40,363.2	\$37,178.7	\$ 3,184.5	8.6%

The System continues to pay out more benefits than contributions collected. An increase of \$195.6 million in benefits paid to retirees correlates to the increase in the number of retirees and beneficiaries experienced in fiscal year 2013. This increase offsets against \$3,845.8 million of fiscal year 2013 investment returns resulted in a net change in pension net position of \$3,184.5 million.

As depicted in the following comparative Statement of Changes in Plan Net Position for fiscal years 2013 and 2012, contributions to the System during fiscal year 2013 increased slightly as a result of an increase in covered payroll and the State's reinvestment contribution of savings as a result of the pension reform legislation passed during the 2011 General Assembly session. The System's investments experienced a positive weighted average investment return of 10.6%, recognizing \$3,845.8 million in net investment income.

A schedule of the System's additions to and deductions from plan net position and related changes (by major category) from fiscal year 2012 to 2013, is as follows (expressed in millions):

	June 30,		Change	
	2013	2012	Variance	%
Employer contributions	\$ 959.6	\$ 697.5	\$ 262.1	37.6%
Member contributions	710.9	703.3	7.6	1.1%
State contributions on behalf of local governments & contribution interest	683.5	898.2	(214.7)	-23.9%
Net investment income	<u>3,845.8</u>	<u>104.1</u>	<u>3,741.7</u>	<u>3594.3%</u>
Total additions	<u>6,199.8</u>	<u>2,403.1</u>	<u>3,796.7</u>	<u>158.0%</u>
Benefit payments	2,950.7	2,755.1	195.6	7.1%
Refunds	38.3	33.8	4.5	13.3%

NOTES TO THE FINANCIAL STATEMENTS

1. GENERAL DESCRIPTION OF THE SYSTEM

A. Organization

The State Retirement Agency (the "Agency") is the administrator of the Maryland State Retirement and Pension System (the "System"). The System was established by the State Personnel and Pensions Article of the Annotated Code of Maryland to provide retirement allowances and other benefits to State employees, teachers, police, judges, legislators, and employees of participating governmental units. Responsibility for the System's administration and operation is vested in a 15-member Board of Trustees. The System is made up of two cost-sharing employer pools: the "State Pool" and the "Municipal Pool". The "State Pool" consists of the State agencies, boards of education, community colleges, and libraries. The "Municipal Pool" consists of the participating governmental units that elected to join the System. Neither pool shares in each other's actuarial liabilities, thus participating governmental units that elect to join the System (the "Municipal Pool") share in the liabilities of the Municipal Pool only.

The State of Maryland is the statutory guarantor for the payment of all pensions, annuities, retirement allowances, refunds, reserves, and other benefits of the System. The Agency is legally authorized to use all assets accumulated for the payment of benefits to pay such obligations to any plan member or beneficiary as defined by the terms of the plan. Consequently, the System is accounted for as a single plan as defined in Governmental Accounting Standards Board (GASB) Statement No. 67, "Financial Reporting for Pension Plans - An Amendment of GASB Statement No.25." Additionally, the System is fiscally dependent on the State by virtue of the legislative and executive controls exercised with respect to its operations, policies, and administrative budget. Accordingly, the System is included in the State's reporting entity and disclosed in its financial statements as a pension trust fund.

The System is comprised of the Teachers' Retirement and Pension Systems, Employees' Retirement and Pension Systems, State Police Retirement System, Judges' Retirement System, and the Law Enforcement Officers' Pension System.

B. Covered Members

The Teachers' Retirement System was established on August 1, 1927, to provide retirement allowances and other benefits to teachers in the State. Effective January 1, 1980, the Teachers' Retirement System was closed to new members and the Teachers' Pension System was established. As a result, teachers hired after December 31, 1979, became members of the Teachers' Pension System as a condition of employment. On or after January 1, 2005, an individual who is a member of the Teachers' Retirement System may not transfer membership to the Teachers' Pension System.

On October 1, 1941, the Employees' Retirement System was established to provide retirement allowances and other benefits to State employees, elected and appointed officials and the employees of participating governmental units. Effective January 1, 1980, the Employees' Retirement System was essentially closed to new members and the Employees' Pension System was established. As a result, State employees (other than correctional officers) and employees of participating governmental units hired after December 31, 1979, became members of the Employees' Pension System as a condition of employment, while all State correctional officers and members of the Maryland General Assembly continue to be enrolled as members of the Employees' Retirement System. On or after January 1, 2005, an individual who is a member of the Employees' Retirement System may not transfer membership to the Employees' Pension System. Currently, more than 150 governmental units participate in the Employees' Retirement System.

The State Police Retirement System was established on July 1, 1949, to provide retirement allowances and other benefits to any police employee or cadet of the Maryland State Police.

The Judges' Retirement System was established on June 30, 1969, to provide retirement allowances and other benefits for State and local, appointed, or elected judges.

The Law Enforcement Officers' Pension System (LEOPS) was established on July 2, 1990, to provide retirement allowances and other benefits for certain State and local law enforcement officers. This System includes both retirement plan and pension plan provisions which are applicable to separate portions of this System's membership. The retirement plan provisions are only applicable to those members who, on the date they elected to participate in LEOPS, were members of the Employees' Retirement System. This System's pension plan provisions are applicable to all other participating law enforcement officers.

The following tables present a summary of membership by system as of June 30, 2014 and 2013, with comparative prior year totals:

	Inactive & Deferred Vested	Retirees & Beneficiaries	Active Plan Participants		
			Vested	Non-vested	Total
Teachers' Retirement & Pension Systems	24,220	68,929	81,595	22,875	104,470
Employees' Retirement & Pension Systems*	27,540	69,482	62,739	22,177	84,916
Judges' Retirement System	8	395	254	47	301
State Police Retirement System	82	2,468	998	353	1,351
Law Enforcement Officers' Pension System	283	1,613	1,832	652	2,484
Total as of June 30, 2014	52,133	142,887	147,418	46,104	193,522
Total as of June 30, 2013	51,552	137,925	150,001	42,809	192,810

*Employees' Retirement & Pension Systems includes 50 vested and 41 non-vested active members, 23 retired members, and 2 deferred vested members from the Correctional Officers' Retirement System..

	Inactive & Deferred Vested	Retirees & Beneficiaries	Active Plan Participants		
			Vested	Non-vested	Total
Teachers' Retirement & Pension Systems	23,555	66,390	82,753	21,275	104,028
Employees' Retirement & Pension Systems*	27,652	67,211	64,109	20,658	84,767
Judges' Retirement System	10	378	276	12	288
State Police Retirement System	84	2,428	993	327	1,320

Total as of June 30, 2013	51,552	137,925	150,001	42,809	192,810
Total as of June 30, 2012	51,230	132,493	150,309	42,685	192,994

*Employees' Retirement and Pension System includes Correctional Officers' Retirement System.

C. Summary of Significant Plan Provisions

All plan benefits are specified by the State Personnel and Pensions Article of the Annotated Code of Maryland. For all individuals who are members of the Employees', Teachers', Correctional Officers' or State Police Retirement System on or before June 30, 2011, retirement allowances are computed using both the highest three years' Average Final Compensation (AFC) and the actual number of years of accumulated creditable service. For individuals who become members of the State Police Retirement System or the Correctional Officers' Retirement System on or after July 1, 2011, retirement allowances are computed using both the highest five years' AFC and the actual number of years of accumulated creditable service. For all individuals who are members of the pension systems of the State Retirement and Pension System on or before June 30, 2011, pension allowances are computed using both the highest three consecutive years' AFC and the actual number of years of accumulated creditable service. For any individual who becomes a member of one of the pension systems on or after July 1, 2011, pension allowances are computed using both the highest five consecutive years' AFC and the actual number of years of accumulated creditable service. Various retirement options are available under each system which ultimately determines how a retiree's benefit allowance will be computed. Some of these options require actuarial reductions based on the retiree's and/or designated beneficiary's attained age and similar actuarial factors.

Beginning July 1, 2011, the member contribution rate was increased for members of the Teachers' Pension System and Employees' Pension System from 5% to 7%, and from 4% to 6% respectively, in fiscal year 2013 and 7% in fiscal year 2014 and beyond for members of the Law Enforcement Officers' Pension System. Beginning July 1, 2013, the member contribution rate was increased for members of the Judges' Retirement System from 6% to 8%.

In addition, the benefit attributable to service on or after July 1, 2011 in many of the pension systems now will be subject to different cost-of-living adjustments (COLA) that is based on the increase in the Consumer Price Index (CPI) and capped at 2.5% or 1.0% based on whether the market value investment return for the preceding calendar year was higher or lower than the investment return assumption used in the valuation.

A brief summary of the retirement eligibility requirements of and the benefits available under the various systems in effect during fiscal year 2014, are as follows:

Service Retirement Allowances

A member of either the Teachers' or Employees' Retirement System is generally eligible for full retirement benefits upon the earlier of attaining age 60 or accumulating 30 years of creditable service regardless of age. The annual retirement

allowance equals $1/55$ (1.81%) of the member's AFC multiplied by the number of years of accumulated creditable service.

An individual who is a member of either the Teachers' or Employees' Pension System on or before June 30, 2011, is eligible for full retirement benefits upon the earlier of attaining age 62, with specified years of eligibility service, or accumulating 30 years of eligibility service regardless of age. An individual who becomes a member of either the Teachers' or Employees' Pension System on or after July 1, 2011, is eligible for full retirement benefits if the member's combined age and eligibility service equals at least 90 years or if the member is at least age 65 and has accrued at least 10 years of eligibility service.

For most individuals who retired from either the Teachers' or Employees' Pension System on or before June 30, 2006, the annual pension allowance equals 1.2% of the member's AFC, multiplied by the number of years of creditable service accumulated prior to July 1, 1998, plus 1.4% of the member's AFC, multiplied by the number of years of creditable service accumulated subsequent to June 30, 1998. With certain exceptions, for individuals who are members of the Teachers' or Employees' Pension System on or after July 1, 2006, the annual pension allowance equals 1.2% of the member's AFC, multiplied by the number of years of creditable service accumulated prior to July 1, 1998, plus 1.8% of the member's AFC, multiplied by the number of years of creditable service accumulated subsequent to June 30, 1998. Beginning July 1, 2011, any new member of the Teachers' or Employees' Pension System shall earn an annual pension allowance equal to 1.5% of the member's AFC multiplied by the number of years of creditable service accumulated as a member of the Teachers' or Employees' Pension System.

Exceptions to these benefit formulas apply to members of the Employees' Pension System, who are employed by a participating governmental unit that does not provide the 1998 or 2006 enhanced pension benefits or the 2011 reformed pension benefits. The pension allowance for these members equals 0.8% of the member's AFC up to the social security integration level (SSIL), plus 1.5% of the member's AFC in excess of the SSIL, multiplied by the number of years of accumulated creditable service. For the purpose of computing pension allowances, the SSIL is the average of the social security wage bases for the past 35 calendar years ending with the year the retiree separated from service.

An individual who is a member of the State Police Retirement System on or before June 30, 2011, is eligible for full retirement benefits upon the earlier of attaining age 50 or accumulating 22 years of eligibility service regardless of age. An individual who becomes a member of the State Police Retirement System on or after July 1, 2011 is eligible for full retirement benefits upon the earlier of attaining age 50 or accumulating 25 years of eligibility service regardless of age. The annual retirement allowance equals 2.55% of the member's AFC multiplied by the number of years of accumulated creditable service and may not exceed 71.4% of the member's AFC.

A member of the Judges' Retirement System is eligible for full retirement benefits upon attaining age 60. The annual retirement allowance for a member with at least 16 years of accumulated creditable service equals $2/3$ (66.7%) of the salary of an active judge holding a comparable position. The annual retirement allowance is prorated if the member retires with fewer than 16 years of accumulated creditable service.

A member of the Law Enforcement Officers' Pension System is eligible for full retirement benefits upon the earlier of attaining age 50 or accumulating 25 years of eligibility service regardless of age. The annual retirement allowance for a member who is covered under the retirement plan provisions equals $1/50$ (2.0%) of the member's AFC multiplied by the number of years of accumulated creditable service up to 30 years, plus $1/100$ (1.0%) of the member's AFC multiplied by the number of years of accumulated creditable service in excess of 30 years. For members subject to the pension provisions, full service pension allowances equal 2.0% of AFC up to a maximum benefit of 60% (30 years of credit).

Vested Allowances

Any individual who is a member of the State Retirement and Pension System on or before June 30, 2011 (other than a judge or a legislator), and who terminates employment before attaining retirement age but after accumulating 5 years of eligibility service is eligible for a vested retirement allowance. Any individual who joins the State Retirement and Pension System on or after July 1, 2011 (other than a judge or a legislator), and who terminates employment before attaining retirement age but after accumulating 10 years of eligibility service is eligible for a vested retirement allowance. An individual who is a member of the Judges' Retirement System on or before June 30, 2013, has no minimum service requirements prior to vesting. However, individuals who join the Judges' Retirement System on or after July 1, 2013, and terminate employment before attaining retirement age will have to accrue five years of eligibility service in order to receive a vested retirement allowance. Legislators become eligible for a vested retirement allowance upon accumulating 8 years of eligibility services. A member, who terminates employment prior to attaining retirement age and before vesting, receives a refund of all member contributions and interest.

Early Service Retirement

A member of either the Teachers' or Employees' Retirement System may retire with reduced benefits after completing 25 years of eligibility service. Benefits are reduced by 0.5% per month for each month remaining until the retiree either attains age 60 or would have accumulated 30 years of creditable service, whichever is less. The maximum reduction for a Teachers' or Employees' Retirement System member is 30%.

An individual who is a member of either the Teachers' or Employees' Pension System on or before June 30, 2011, may retire with reduced benefits upon attaining age 55 with at least 15 years of eligibility service. Benefits are reduced by 0.5% per month for each month remaining until the retiree attains age 62. The maximum reduction for these members of the Teachers' or Employees' Pension System is 42%. An individual who becomes a member of either the Teachers' or Employees' Pension System on or after July 1, 2011, may retire with reduced benefits upon attaining age 60 with at least 15 years of eligibility service. Benefits are reduced by 0.5% per month for each month remaining until the retiree attains age 65. The maximum reduction for these members of the Teachers' or Employees' Pension System is 30%.

Members of the State Police, Judges', Law Enforcement Officers' and Local Fire and Police Systems are not eligible for early service benefits.

Disability and Death Benefits

Generally, a member covered under retirement plan provisions who is permanently disabled after 5 years of service receives a service allowance based on a minimum percentage (usually 25%) of the member's AFC. A member covered under pension plan provisions who is permanently disabled after accumulating 5 years of eligibility service receives a service allowance computed as if service had continued with no change in salary until the retiree attained age 62. A member (other than a member of the Maryland General Assembly or a judge, both of which are ineligible for accidental disability benefits) who is permanently and totally disabled as the result of an accident occurring in the line of duty receives $\frac{2}{3}$ (66.7%) of the member's AFC plus an annuity based on all member contributions and interest. Death benefits are equal to a member's annual salary as of the date of death plus all member contributions and interest.

Adjusted Retirement Allowances

Retirement and pension allowances are increased annually to provide for changes in the cost of living according to prescribed formulae. Such adjustments for retirees are based on the annual change in the CPI. For the Teachers' and Employees' Retirement Systems (TRS/ERS) the method by which the annual COLA's are computed depends upon elections made by members who were active on July 1, 1984 (or within 90 days of returning to service, for members who were inactive on July 1, 1984) enabling the member to receive either an unlimited COLA, a COLA limited to 5% or a two part combination COLA depending upon the COLA election made by the member.

For State Police and Correctional Officers' Retirement System retirees, prior to July 1, 2011, unlimited compounded COLAs are effective July 1 and are applied to all benefits which have been in payment for one year. With certain exceptions, effective July 1, 1998, for Teachers', Employees', and Law Enforcement Officers' Pension System retirees, the adjustment is capped at a maximum 3% compounded and is applied to all benefits which have been in payment for one year. The annual increases to pension allowances for Employees' Pension System retirees who were employed by a participating governmental unit that does not provide enhanced pension benefits are limited to 3% of the initial allowance.

However, beginning July 1, 2011, for benefits attributable to service earned on or after July 1, 2011, in all of the systems except the judges' and legislators' systems, the adjustment is capped at the lesser of 2.5% or the increase in CPI if the most recent calendar year market value rate of return was greater than or equal to the assumed rate. The adjustment is capped at the lesser of 1% or the increase in CPI if the market value return was less than the assumed rate of return. In years in which COLAs would be less than zero due to a decline in the CPI, retirement allowances will not be adjusted. COLAs in succeeding years are adjusted until the difference between the negative COLA that would have applied and the zero COLA is fully recovered.

Retirement allowances for legislators and judges are recalculated when the salary of an active member holding a comparable position is increased.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Basis of Accounting

The System's financial statements are prepared on the accrual basis of accounting principles generally accepted in the United States of America. Accordingly, investment purchases and sales are recorded as of their respective trade dates. Employer and Member contributions are recognized in the period when due, pursuant to statutory or contractual requirements. Benefits and refunds are recognized when due and payable in accordance with the terms of the plan.

B. Investment Limitations

The State Personnel and Pensions Article of the Annotated Code of Maryland authorizes the System to invest plan assets in stocks, bonds, notes, certificates of indebtedness, mortgage notes, real estate, debentures or other obligations, subject to the terms, conditions, limitations and restrictions imposed by the Board of Trustees of the State Retirement and Pension System of Maryland.

C. Portfolio Valuation Method

The System investments are reported at fair value. For fixed income securities, fair value is based on quoted market prices provided by independent pricing services. Securities traded on a national or international exchange are valued at the last reported sales price at current exchange rates. Mortgages and mortgage related securities are valued on the basis of future principal and interest payments and are discounted at prevailing interest rates for similar instruments. Fair value for alternative investments and mutual funds (other than those funds traded on a national or international exchange) is based on information provided by the applicable fund managers (generally the most recent independently audited financial statements adjusted for cash flows). Alternative investments generally value their funds in accordance with Generally Accepted Accounting Principles using a hierarchy process whereby level 1 represents price available from active markets, level 2 relies on observation, models or other valuation methodologies and level 3 is based on management judgement and estimations. Investment amounts presented in the accompanying Statements of Plan Net Position represent the fair value of the respective portfolios as of the fiscal year-end. Similarly, investment income amounts reported in the accompanying Statements of Changes in Plan Net Position represent the income or loss derived for the year then ended. Accordingly, significant market fluctuations could periodically occur subsequent to the financial statement valuation date, which are not reflected in either the fair value of investments or the related investment income presented in these financial statements.

D. Derivatives

As permitted by guidelines established by the Board of Trustees the System may invest in derivatives. Compliance with these guidelines is monitored by Agency staff. Pursuant to such authority, the system invests in foreign currency forward contracts, options, futures, and swaps. The Agency does not purchase rights and warrants; however, can accrue ownership through corporate actions. No derivatives were purchased with borrowed funds.

Derivatives are generally used to hedge against foreign currency risk and changes in interest rates, improve yield and adjust the duration of the System's fixed income portfolio. These securities are subject to changes in value due to changes in currency valuations or interest rates. Credit risk for derivatives results from the same considerations as other counterparty risk assumed by the System, which is the risk that the counterparty might be unable to meet its obligations.

The System enters into forward foreign currency exchange contracts for hedging purposes to minimize the short-term impact of foreign currency. Fluctuations foreign currency exchange contracts are reported at fair value based on published market prices and quotations from major investment firms. The System could be exposed to risk if the counterparties to the contracts are unable to meet the terms of the contracts. The System seeks to minimize risk from counterparties by establishing minimum credit quality standards.

E. Administrative and Investment Expenses

All of the System's administrative and investment expenses (e.g., salaries of Agency employees, investment advisory fees) are incurred centrally and charged to each individual retirement or pension system on the basis of its percentage ownership in the System's net position. The System's investment expenses are funded from investment income. The System's administrative expenses are funded from administrative fees assessed to each participating employer. See pages 50 and 51 for detailed Schedules of Administrative and Investment Expenses, respectively.

F. Federal Income Tax Status

During the fiscal years ended June 30, 2014 and 2013, the System qualifies under Section 401(a) of the Internal Revenue Code (the Code) and was exempt from Federal income taxes under Section 501(a) of the Code.

3. CASH, CASH EQUIVALENTS, AND INVESTMENTS

A. Legal Provisions

The Board of Trustees is required by Section 21-116 (c), State Personnel and Pensions Article, Annotated Code of Maryland (SPP), to establish and maintain an Investment Policy Manual, which authorizes investing in all major sectors of the capital market in order to diversify and minimize total investment program risk. Such sectors include, but are not limited to:

Type	Description	As of June 30, 2014	
		Strategic Target	Actual
Public Equity	Investments in securities, known as shares or stocks, that represent an ownership interest in corporations and are generally traded on a stock exchange.	35.0%	38.9%
Fixed Income	Investments in securities, known as bonds, that represent an ownership interest in the debt of governments and corporations that are generally not traded on an exchange. They generally pay interest on a regular schedule and repay principal or face value at maturity.	10.0%	14.8%
Credit/Debt Related Strategies	Debt issued by corporations and other non-government sectors of the fixed income market such as distressed debt, convertibles, corporate and mortgage related credit strategies, mezzanine debt, bank loans, high yield, emerging markets and preferred securities.	10.0%	10.0%
Alternative Investment: Absolute Return	Investments whose performance is expected to deliver absolute returns in any market conditions. The System's program may include strategies such as hedge fund of funds, multi-strategy, global tactical asset allocation, event driven, relative value, macro, insurance and equity hedged.	10.0%	9.4%
Private Equity	Investments in companies that are not registered with the SEC and are not traded in the public markets. Private equity may also be referred to as venture capital or buy-outs.	10.0%	7.0%
Real Estate	Investment in real property including office buildings, shopping centers, industrial property, warehouses, and apartments. Investment vehicles may include direct investments, REITS, and private partnerships.	10.0%	6.8%
Real Return	Investments whose performance is expected to exceed the rate of inflation over an economic cycle. The System's Real Return program may include the following investment vehicles in both public and private investments: treasury inflation protected, global inflation linked bonds, commodities, energy related, infrastructure, timber and other natural resources, and multi-asset class portfolios with a real return mandate.	14.0%	12.0%
Cash Portfolio	Short term investments such as money market funds, U.S. treasury bills and currency.	1.0%	1.1%

The System is also authorized by its Board of Trustees to operate a securities lending program, and has contracted with its custodian bank to reinvest cash collateral received from the transfer of securities in any investment instrument authorized by the investment policy. The System's Board of Trustees has determined the collateralization percentages necessary for both foreign and domestic demand deposits. The Board of Trustees has established a policy to require collateral equal to 105% for international equity securities and 102% for all other securities, which is marked to market daily. See section G for additional information.

B. Cash and Cash Equivalents

For cash deposits and cash equivalents, custodial credit risk is the risk that, in the event of a bank failure, the System's deposits may not be returned to it.

The System does not have any funds or deposits that are not covered by depository insurance, that are uncollateralized, collateralized with securities held by the pledging financial institution, or collateralized with securities held by the pledging financial institution's trust department or agent, but not in the System's name and there are no legal or contractual provisions for deposits and investments. Nor does the System have any investments that are not registered in its name and are either held by the counterparty or the counterparty's trust department or agent, but not in the System's name.

The amount of the System's total cash and cash equivalents as of June 30, 2014 and June 30, 2013, was \$2,054,181 and \$2,085,086 (in thousands), respectively.

C. Investments

These investments are accounted for as the System and are allocated to Teachers' Retirement and Pension, Employees' Retirement and Pension, Judges' Retirement, State Police Retirement and Law Enforcement Officers' Pension.

All investments are governed by the prudent person rule as described in SPP Section 21-203 which states: A fiduciary shall discharge the fiduciary's duties with respect to the several systems solely in the interest of the participants and as follows: (1) for the exclusive purposes of providing benefits to the participants and for reasonable expenses of administering the several systems; (2) with the care, skill, prudence, and diligence under the circumstances then prevailing, that a prudent person acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with like aims; (3) by diversifying the investments of the several systems so as to minimize the risk of large losses, unless under the circumstances it is clearly prudent not to do so; (4) in accordance with the laws governing the several systems; and (5) in accordance with the documents and instruments governing the several systems to the extent that the documents and instruments are consistent with this subtitle.

D. Interest Rate Risk

As of June 30, 2014, the System had the following fixed income investments allocated by year of maturity with the exception of the Commingled Funds, which are based on their average maturity:

Investment Type:	Fair Value (in thousands)	Investment Maturities (in years)			
		Less than 1	1 thru 5	5+ thru 10	More than 10
Asset backed securities	\$371,969	\$ 151	\$ 149,719	\$ 67,671	\$ 154,428
Bank loans	412,692	2,788	140,013	269,891	-
Collateralized mortgage backed securities	1,043	-	-	-	1,043
Collateralized mortgage obligations	564,909	-	16,960	17,387	530,561
Credit/debt commingled funds	2,123,503	79,124	1,387,934	614,820	41,625
Convertible bonds	71,540	2,824	30,455	18,012	20,249
Domestic corporate obligations	2,104,906	43,166	813,552	813,925	434,263
International obligations	1,977,061	82,294	660,585	573,160	661,022
Mortgage pass-throughs	1,360,781	-	15,019	33,456	1,312,306
Municipals	64,203	306	14,188	17,746	31,963
Options	1,178	1,178	-	-	-
Short-term	1,839,450	1,839,450	-	-	-
Swaps	16,906	(1,237)	18,676	(1,443)	910
U.S. government agency	123,608	9,199	55,801	42,794	15,814
U.S. treasury inflation linked	2,160,447	59,033	573,635	819,378	708,401
U.S. treasury notes/bonds	1,120,486	46,241	660,340	284,425	129,480
U.S. treasury strips	18,284	-	2,063	72	16,149
Yankee bonds	585,893	32,961	252,305	155,470	145,157
Total	\$14,918,859	\$2,197,478	\$4,791,245	\$ 3,726,764	\$4,203,371

Market or interest rate risk is the greatest risk faced by an investor in the fixed income market. The price of a fixed income security typically moves in the opposite direction of the change in interest rates. Derivative securities, variable rate investments with coupon multipliers greater than one, and securities with long terms to maturity are examples of investments whose fair values may be highly sensitive to interest rate changes. These securities are reported at fair value in the Statements of Plan Net Position.

Examples of securities that would qualify as “highly interest rate sensitive” include interest only, principal only and inverse floaters, of which the System had no significant holdings as of June 30, 2014 and 2013.

As of June 30, 2014, the System had \$1.4 billion invested in mortgage pass-through securities issued by the Federal National Mortgage Association, Federal Home Loan Mortgage Corporation, and Government National Mortgage Association. These investments are moderately sensitive to changes in interest rates because they are backed by mortgage loans in which the borrowers have the option of prepaying.

Investment guidelines developed for each mandate determines the amount of interest rate risk allowable for each manager.

Derivatives held as of June 30, 2014, are identified in greater detail in Note 4.

E. Credit Risk

The System’s exposure to credit risk as of June 30, 2014 and 2013, is shown below:

Credit Quality Distribution for Securities with Credit Exposure as a Percentage of Total Investments				
<i>(Expressed in Thousands)</i>				
Rating	2014 Fair Value	Percentage Total Investments	2013 Fair Value	Percentage Total Investments
AAA	\$ 766,342	1.690%	\$ 513,727	1.273%
AA	1,201,044	2.649%	1,965,427	4.869%
A	2,550,887	5.626%	2,618,161	6.487%
BAA	559,154	1.233%	351,744	0.871%
BA	21,361	0.047%	17,009	0.042%
BBB	1,316,746	2.904%	813,333	2.015%
BB	372,866	0.822%	214,586	0.532%
B	241,736	0.533%	215,930	0.535%
CAA	53,322	0.118%	54,075	0.134%
CA	1,821	0.004%	2,604	0.006%
CCC	115,727	0.255%	126,653	0.314%
CC	15,081	0.033%	18,954	0.047%
C	3,016	0.007%	-	0.000%
D	15,592	0.034%	17,542	0.043%
NR	2,207,752	4.869%	1,630,869	4.040%
	<u>\$9,442,447</u>		<u>\$8,560,614</u>	

The current policy regarding credit risk is determined by each investment manager’s mandate. The above listed ratings are based on the most conservative rating when multiple ratings were offered. NR represents securities not rated; primarily made up of commingled funds, alternative investments and swaps, which by nature do not have credit quality ratings.

F. Foreign Currency Risk

The System's exposure to foreign currency risk as of June 30, 2014 is shown below:

International Investment Securities – At Fair Value as of June 30, 2014
(U.S. Dollars in Thousands)

Currency	Equity	Fixed Income	Cash	Alternative Investments	Total
Australian Dollar	\$ 252,415	\$ 53,043	\$ 4,293	\$ 112,826	\$ 422,577
Brazilian Real	39,502	53,888	2,832	24,717	120,939
Canadian Dollar	374,209	24,991	8,191	39,339	446,730
Czech Koruna	6,447	-	3	-	6,450

Egyptian Pound	2,347	-	-	-	2,347
Euro Currency	1,734,478	694,330	42,317	916,169	3,387,294
Hong Kong Dollar	322,378	-	2,934	63,471	388,783
Hungarian Forint	1,379	-	76	-	1,455
India Rupee	-	-	(496)	-	(496)
Indonesian Rupiah	15,361	-	151	-	15,512
Israeli Shekel	13,310	-	153	-	13,463
Japanese Yen	978,961	45,725	16,061	107,331	1,148,078
Malaysian Ringgit	18,480	309	457	-	19,246
Mexican Peso	11,813	58,686	14,231	6,747	91,477
Moroccan Dirham	320	-	17	-	337
New Israeli Sheqel	148	-	-	313	461
New Russian Ruble	-	4,063	-	-	4,063
New Taiwan Dollar	40,426	-	609	-	41,035
New Zealand Dollar	4,404	22,315	869	17,031	44,619
Nigerian Naira	52	303	-	-	355
Norwegian Krone	74,314	-	1,361	815	76,490
Philippine Peso	2,827	-	29	-	2,856
Polish Zloty	11,917	26,536	194	-	38,647
Pound Sterling	1,100,658	149,700	24,393	618,109	1,892,860
Qatari Rial	120	-	-	-	120
Singapore Dollar	82,657	-	1,973	22,263	106,893
South African Rand	44,330	11,559	2,331	-	58,220
South Korean Won	144,927	-	531	-	145,458
Swedish Krona	143,743	5,226	3,382	22,770	175,121
Swiss Franc	457,871	435	285	6,568	465,159
Thailand Baht	15,319	-	114	-	15,433
Turkish Lira	21,688	-	238	-	21,926
Uae Dirham	3,080	-	-	-	3,080
Multiple	1,659,195	-	-	-	1,659,195
Total Holdings Subject to Foreign Current Risk	<u>\$7,683,415</u>	<u>\$ 1,151,636</u>	<u>\$ 127,762</u>	<u>\$1,975,742</u>	<u>\$ 10,938,555</u>

The majority of foreign currency-denominated investments are in non-US stocks. The Agency has an overlay program to help minimize its currency risk.

Note: This schedule does not agree with the total International obligations and International equities as listed on the Statement of Plan Net Assets due to American Depository Receipts and International obligations valued in U.S. dollars but classified as International. Mutual Funds listed have exposure to multiple currencies, however, are valued in U.S. dollars.

G. Security Lending Transactions

The System accounts for securities lending transactions in accordance with GASB Statement No.28 "Accounting and Financial Reporting for Securities Lending Transactions."

The following table details the net income from securities lending for the periods ending June 30, 2014 and 2013 (in thousands):

	2014	2013
Interest income	\$ 10,945	\$ 17,863
Less:		
Interest expense	174	2,607
Program fees	1,688	2,392
Expenses from securities lending	1,862	4,999
Net income from securities lending	\$ 9,083	\$ 12,864

The Board of Trustees has authorized the System to lend its securities to broker-dealers with a simultaneous agreement to return the collateral for the same securities in the future. The System's custodian, pursuant to a written agreement, is permitted to lend long-term securities to authorized broker-dealers subject to the receipt of acceptable collateral. The System lends securities for collateral in the form of either cash or other securities. The types of securities on loan as of June 30, 2014, were long-term U.S. government obligations, domestic and international equities, as well as domestic and international obligations. At the initiation of a loan, borrowers are required to provide collateral amounts of 102% (domestic equities and bonds) and 105% (international equities) of the fair value of the securities lent. In the event the collateral fair value falls below the respective collateral percentages, the borrower is required to provide additional collateral by the end of the next business day. On July 1, 2014 the collateral for the international equity was marked to bring it up to the required percentage up to 105%. The contractual agreement with the System's custodian provides indemnification in the event the borrower fails to return the securities lent or fails to pay the System income distributions by the securities' issuers while the securities are on loan. There have been no violations of the provisions of the agreement during the period of these financial statements.

The System maintained the right to terminate securities lending transactions upon notice. The cash collateral received on each loan was invested, together with the cash collateral of other qualified tax-exempt plan lenders, in a collective investment pool. As of June 30, 2014, such investment pool had an average duration of 42.86 days and an average final maturity of 78.32 days for U.S. dollar collateral. Because the loans were terminable at will, their duration did not generally match the duration of the investments made with cash collateral. The system cannot pledge or sell collateral securities received unless and until a borrower defaults. As of June 30, 2014, the System had no credit risk exposure to borrowers. The market value of collateral held and the market value of securities on loan for the System as of June 30, 2014 (in thousands) was \$2,490,915 and \$2,434,349, respectively.

The following table presents the fair values of the underlying securities, and the value of the collateral pledged at June 30, 2014 (in thousands):

Securities Lent	Fair Value Loaned Securities	Collateral Fair Value	Percent Collateralized
Lent for cash collateral:			
U.S. government and agency	\$611,079	\$ 623,045	102.0%
Domestic fixed income	312,725	319,126	102.0%
Domestic equity	1,051,025	1,072,541	102.0%
International fixed	41,060	42,143	102.6%
International equity	246,080	257,967	104.8%
Lent for noncash collateral			
U.S. government and agency	141,319	144,346	102.1%
Domestic equity	12,547	12,915	102.9%
International fixed	17,164	17,413	101.5%
International equity	1,351	1,420	105.1%
Total securities lent	\$2,434,350	\$2,490,916	102.3%

The securities collateral value is based on the System's pro rata share of the value of the securities collateral maintained in a pool at the custodian bank for all lending clients participating in the lending program. Collateral value listed above includes all collateral for securities on loan.

4. DERIVATIVES

Each investment manager's guidelines determine the extent to which derivatives are permissible. Futures and other derivatives are permitted to the extent that they are used in a manner that does not materially increase total portfolio volatility or relate to speculative activities. Unleveraged derivatives are permitted for the purpose of hedging investment risk, to replicate an investment that would otherwise be made directly in the cash market, or to modify asset exposure in tactical portfolio shifts. Use of derivatives is not permitted to materially alter the characteristics, including the investment risk, of each investment manager's account. The investment managers are to have in place, and use, procedures that subject derivative based strategies to rigorous scenario and volatility analysis. Futures and short option positions must be hedged with cash, cash equivalents, or current portfolio security holdings.

1. Negative values (in brackets) refer to losses
2. Negative values refer to liabilities
3. Notional may be a dollar amount or size or underlying for futures and options, negative values refer to short positions
4. Excludes futures margin payments

A. Credit Risk

The System is exposed to credit risk on derivative instruments that are in asset positions. To minimize its exposure to losses related to credit risk, the investment managers use counterparty collateral in their non exchange-traded derivative instruments. Netting arrangements are also used when entering into more than one derivative instrument transaction with counterparty. At the present time, the Agency does not have a formal policy relating to counterparty collateral or netting arrangements.

The aggregate fair value of derivative instruments in asset positions at June 30, 2014, was \$155,858,904. This represents the maximum loss that would be recognized at the reporting date if all counterparties failed to perform. The maximum loss would, however, be reduced by the counterparty collateral and the liabilities included in netting arrangements with counterparties.

The following table lists the market value of credit exposure per ratings of the Standard & Poor's (S&P), Moody's and Fitch.

Counterparty Ratings

The following tables list the market value of credit exposure per ratings of Standard & Poor's (S&P), Moody's and Fitch (in thousands):

Market Value	S&P Rating	Market Value	Moody's Rating	Market Value	Fitch Rating

B. Interest Rate Risk

During Fiscal Year 2014 the Agency was exposed to interest rate risk. For more details refer to the Interest Rate Risk Note 3D (GASB Statement No. 40).

C. Foreign Currency Risk

The System's derivatives exposed it to foreign currency risk. For more details refer to the Foreign Currency Risk Note 3F (GASB Statement No. 40).

5. CONTRIBUTIONS

The State Personnel and Pensions Article requires both active members and their respective employers to make contributions to the System. Rates for required contributions by active members are established by law. Members of the Teachers' and Employees' Retirement Systems are required to contribute 7% or 5% of earnable compensation depending upon the retirement option selected. Members of the State Police and Judges' Retirement Systems are required to contribute 8% and 6% of earnable compensation, respectively, and beginning July 1, 2013, members of the Judges Retirement System are required to make contributions of 8% of earnable compensation. Members of the Teachers' and Employees' Pension System, Alternate Contributory Pension Selection (ACPS), are required to contribute 7% of earnable compensation.

However, members of the Employees' Pension System who are employed by a participating governmental unit that elected to remain in the Contributory Pension System are required to contribute 2% of earnable compensation. The members of the Employees' Pension System who are employed by participating governmental units who elected to remain in the Non-Contributory Pension System are only required to contribute 5% of earnable compensation in excess of the social security taxable wage base.

Contribution rates for employer and other "nonemployer" contributing entities are established by annual actuarial valuations using the Individual Entry Age Normal Cost method with projection and other actuarial assumptions adopted by the Board of Trustees. These contribution rates have been established as the rates necessary to fully fund normal costs and amortize the unfunded actuarial accrued liability.

The unfunded actuarial liability was being amortized in distinct layers. The unfunded actuarial accrued liability which existed as of the June 30, 2000, actuarial valuation was being amortized over a 40-year period (as provided by law) from July 1, 1980 and as provided by law, any new unfunded liabilities or surpluses arising during the fiscal year ended June 30, 2001, or any fiscal year thereafter, was being amortized over a 25-year period from the end of the fiscal year in which the liability or surplus arose. However, in the 2014 legislative session, the Legislature changed the method used to fund the System. The unfunded liability for each System is being amortized over a single closed 25-year period.

Effective July 1, 2002, the law provides that employer contribution rates may be more or less than the actuarially determined rates as described above for the Employees' Retirement and Pension Systems and the Teachers' Retirement and Pension Systems. When the funding ratio for each of the combined Systems is at least 90% but not more than 110%, the contribution rate will be the rate certified by the Board of Trustees for the previous fiscal year, adjusted to reflect legislative changes that result in changes to the normal cost. If the funding ratio is below 90%, the contribution rate will be the sum of the contribution rate for the previous fiscal year and 20% of the difference between the full funding rate for the current fiscal year and the contribution rate for the previous fiscal year. If the funding ratio is above 110%, the contribution rate will be the difference between the contribution rate for the previous fiscal year and 20% of the difference between the contribution rate for the previous fiscal year and the full funding rate for the current fiscal year.

The State of Maryland (which is also a non-employer contributor to the Teachers' Retirement and Pension Systems and the Judges' Retirement System), the Maryland Automobile Insurance Fund, the Injured Workers' Insurance Fund, and more than 150 participating governmental units make all of the employer and other (non-employer) contributions to the System.

6. LONG-TERM CONTRIBUTIONS RECEIVABLE

In addition to actuarially determined contributions, certain withdrawn employers also make annual installment payments, including interest at the actuarially assumed rate of return in effect at the time of withdrawal, for liabilities associated with

employees that have elected to stay in the System when their employer elected to withdraw. As of June 30, 2014 and 2013, the outstanding balances were \$34,806 and \$38,040 (expressed in thousands), respectively. These payments are due over various time periods, based on the date of the employer's withdrawal.

7. REFUNDS

Member contributions plus interest may be refunded to a member who withdraws from the System, or to the designated beneficiary following a member's death. Employer contributions may also be refunded with interest to any participating governmental unit electing to withdraw from the System. For the fiscal years ended June 30, 2014 and 2013, refunds to members and withdrawing employers were \$42,922 and \$38,281 (expressed in thousands), respectively.

8. ACCOUNTS PAYABLE AND ACCRUED EXPENSES

For the fiscal years ended June 30, 2014 and 2013, accounts payable and accrued expenses consisted of the following components (expressed in thousands):

	2014	2013
Administrative expenses	\$1,374	\$1,276
Investment management fees	25,790	24,048
Tax and other withholdings	33,800	31,788
Total	<u>\$60,964</u>	<u>\$57,112</u>

9. NET PENSION LIABILITY

The components of the net pension liability of the participating employers as of June 30, 2014 were as follows:
(expressed in thousands)

Total Pension Liability (TPL)	\$ 63,086,719
Plan Fiduciary Net Position	45,339,988
Net Pension Liability	<u>\$ 17,746,731</u>
Ratio - Fiduciary Net Position/TPL	<u>71.87%</u>

A. Actuarial Assumptions

Actuarial	Entry Age Normal
Amortization Method	Level Percentage of Payroll, Closed
Remaining Amortization Period	24 years for State system, 25 years for LEOPS Muni, and 32 years for CORS Muni as of June 30, 2014. For ECS Muni, 6 years remaining as of June 30, 2014 for prior UAAL existing on June 30, 2000. 25 years from each subsequent valuation date for each year's additional UAAL
Asset Valuation Method	5-year smoothed market; 20% collar
Inflation	2.90% general, 3.40% wage
Salary Increases	3.40% to 11.90% including inflation
Discount Rate	7.65%
Investment Rate of Return	7.65%
Retirement Age	Experienced-based table of rates that are specific to the type of eligibility condition. Last updated for the 2012 valuation pursuant to an experience study of the period 2006-2010
Mortality	RP-2000 Combined Healthy Mortality Table projected to the year 2025
Note	There were no benefit changes during the year. Adjustments to the roll-forward liabilities were made to reflect the following assumptions changes in the 2014 valuation: Investment return assumption changed from 7.70% to 7.65% Inflation assumption changed from 2.95% to 2.90% Disability mortality assumption for State Police and LEOPS changed to: RP-2000 Disabled Mortality: 50% table for males and 75% for females, but not less than the RP- 2000 Combined Healthy Mortality table projected to year 2025

B. Investments

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of geometric real rates of return were adopted by the Board after considering input from the System's investment consultant(s) and actuary(s). For each major asset class that is included in the System's target asset allocation, these best estimates are summarized in the following table:

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return
Public Equity	35%	4.70%
Fixed Income	10%	2.00%
Credit Opportunity	10%	3.00%
Real Return	14%	2.80%
Absolute Return	10%	5.00%
Private Equity	10%	6.30%
Real Estate	10%	4.50%
Cash	1%	1.40%
Total	100%	

The above was the Board of Trustees adopted asset allocation policy and best estimate of geometric real rates of return for each major asset class as of June 30, 2014.

For the year ended June 30, 2014, the annual money-weighted rate of return on pension plan investments, net of the pension plan investment expense, was 14.38%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

C. Discount Rate

A single discount rate of 7.65% was used to measure the total pension liability. This single discount rate was based on the expected rate of return on pension plan investments of 7.65%. The projection of cash flows used to determine this single discount rate assumed that plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rate. Based on these assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

D. Sensitivity of the Net Pension Liability

Regarding the sensitivity of the net pension liability to changes in the single discount rate, the following presents the plan's net pension liability, calculated using a single discount rate of 7.65%, as well as what the plan's net pension liability would be if it were calculated using a single discount rate that is 1-percentage-point lower or 1-percentage-point higher:

(Expressed in thousands)

System	1% Decrease to 6.65%	Current Discount	1% Increase to 8.65%
Teachers	\$ 14,572,359	\$ 9,833,881	\$ 5,872,403
Employees (state)	8,286,104	6,175,026	4,395,518
State Police	924,726	669,790	461,757
Judges	98,744	51,348	10,848
LEOPS (State)	446,763	330,520	234,877
Employees (Muni)	1,065,707	557,462	127,677
LEOPS (Muni)	177,885	128,558	88,452
CORS	2,985	146	(2,194)
Total System Net Pension Liability	\$ 25,575,273	\$ 17,746,731	\$ 11,189,338

Fiscal Year Ended	Annual money-weighted rate of return, net of investment expenses
2014	14.38%

*These schedules are presented to illustrate the requirement to show information for 10 years. However, until a full 10-year trend is compiled, pension plans should present information for those years for which the information is available.

NOTES TO REQUIRED SUPPLEMENTARY INFORMATION

Changes in Benefit Terms

There were no benefit changes during the year.

Changes in Assumptions

Adjustments to the roll-forward liabilities were made to reflect the following assumptions changes in the 2014 valuation:

- Investment return assumption changed from 7.70% to 7.65%
- Inflation assumption changed from 2.95% to 2.90%
- Disability mortality assumption for State Police and LEOPS changed to:
- RP-2000 Disabled Mortality: 50% table for males and 75% for females, but not less than the RP- 2000 Combined Healthy Mortality table projected to year 2025

Method and Assumptions used in Calculations of Actuarially Determined Contributions

Actuarial	Entry Age Normal
Amortization Method	Level Percentage of Payroll, Closed
Remaining Amortization Period	24 years for State system, 25 years for LEOPS Muni, and 32 years for CORS Muni as of June 30, 2014. For ECS Muni, 6 years remaining as of June 30, 2014 for prior UAAL existing on June 30, 2000. 25 years from each subsequent valuation date for each year's additional UAAL
Asset Valuation Method	5-year smoothed market; 20% collar
Inflation	2.90% general, 3.40% wage
Salary Increases	3.40% to 11.90% including inflation
Investment Rate of Return	7.65%
Retirement Age	Experienced-based table of rates that are specific to the type of eligibility condition. Last updated for the 2012 valuation pursuant to an experience study of the period 2006-2010

** Beginning July 1, 2006, the system changed its funding method from the Aggregate Entry Age Normal method to the Individual Entry Age Normal method. Due to an actuarial error, the Schedule of Funding Progress presented in the June 30, 2007 Comprehensive Annual Financial Report overstated the Actuarial Accrued Liability. The 2007 funding results have been restated above to reflect the corrected actuarial valuation results.

SCHEDULE OF CONTRIBUTIONS FROM
EMPLOYERS AND OTHER CONTRIBUTING ENTITY*(Expressed in Thousands)*

Fiscal Year Ended June 30,	Annual Required Contributions	Percentage Contributed
2005	\$ 805,564	83%
2006	874,079	82% *
2007	1,025,972	81%
2008	1,183,765	89%
2009	1,313,560	84%
2010	1,519,980	86%
2011	2,035,401	74%
2012	2,146,624	71%
2013	2,149,985	76%
2014	2,320,991	75%

* Implementation of the statutory corridor funding method in fiscal year 2003 set the contribution made by the State into the Employees' and Teachers' Combined Systems at the contribution rates generated by the June 30, 2000 valuation which are adjusted when the funded ratio for the Employees' Systems and/or for the Teacher's systems falls below 90% or exceeds 110% and/or when the benefits for the Employees' or Teachers' Systems are enhanced

OTHER SUPPLEMENTARY INFORMATION

FUND BALANCE ACCOUNTS

As provided by law, all System assets must be credited, according to the purpose for which they are held, to either the Annuity Savings Fund, the Accumulation Fund or the Expense Fund. These funds are classified as accounts for financial reporting purposes and are further explained as follows:

A. Annuity Savings Fund

Members' contributions together with interest thereon, at statutory interest rates, are credited to the Annuity Savings Fund. Upon retirement, members' accumulated contributions and interest are transferred from the Annuity Savings Fund to the Accumulation Fund.

B. Accumulation Fund

Contributions made by employers, other contributions and investment income are credited to the Accumulation Fund. All retirement, disability, and death benefits are paid from this Fund.

C. Expense Fund

All of the System's administrative and investment management expenses are recorded in the Expense Fund. During the year, the System's investment expenses are covered by funds transferred from the Accumulation Fund and the System's administrative expenses are covered by administrative fees assessed and collected in to the Expense Fund from each participating employer to cover annual operating and administrative expenses of the System.

CHIEF INVESTMENT OFFICER'S REPORT

INVESTMENT OVERVIEW

The Maryland State Retirement and Pension System returned 14.37 percent net of fees in fiscal year 2014. After the payment of benefits, the market value of assets increased by approximately \$5.1 billion, from \$40.3 billion on June 30, 2013 to \$45.4 billion on June 30, 2014. All major asset classes produced positive returns for the year. The fund exceeded its actuarial return target of 7.65 percent, and also outperformed its policy benchmark of 14.16 percent.

For the second consecutive fiscal year, public equity was the best-performing asset class, with a return of 22.1 percent. This return trailed the public equity benchmark of 23.1 percent.

The public equity program has three components: U.S. equities, international equities and global equities. The U.S. public equity portfolio returned 26.1 percent, beating the return of the Russell 3000 Index, which returned 25.2 percent. The international equity portfolio returned 20.4 percent compared to 21.8 percent for its benchmark, the Morgan Stanley Capital International (MSCI) All Country World ex-U.S. Index. The global equity portfolio returned 21.1 percent compared to 23.0 percent for its benchmark, the MSCI All Country World Index, a broad measure of stock performance in the developed and emerging markets. The underperformance of the international and global equity programs relative to their respective benchmarks can be attributed to losses from the System's currency overlay program as a result of a weakening U.S. dollar relative to foreign currencies, as well as the long/short equity strategies in the global equity program. Active management by the long-only managers added value in all three public equity programs.

The fixed income portfolio returned 4.6 percent, compared to 3.6 percent for its blended benchmark: 80 percent Barclays Capital (BC) Intermediate Aggregate Index and 20 percent BC Global Bond 1 – 10 year Index. The credit/debt strategies portfolio returned 11.5 percent compared to 8.7 percent for its blended benchmark: 50 percent BC High Yield Index, 20 percent BC Credit Index, 20 percent JP Morgan GBI EM Global Diversified, and 10 percent S&P/LSTA Leverage Loan Index. The portfolio was established in 2009 to take advantage of the dislocation in the credit markets, and is expected to provide near equity-like returns at a reduced level of risk.

The real return portfolio returned 7.0 percent, compared to 6.0 percent for its blended benchmark, which consists of three components:

- 30 percent Dow Jones UBS Commodities Index (total return);
- 10 percent Consumer Price Index + 5 percent, with this second component having a maximum total benchmark return of 8 percent; and
- 60 percent inflation linked bonds (consisting of 50 percent BC U.S. Treasury Inflation-Protected Securities (TIPS) Index and 50 percent BC Global Inflation Linked (U.S. dollar hedged) Index).

The absolute return portfolio returned 7.6 percent, matching the 7.6 percent return for its customized benchmark: Hedge Funds Research, Inc. (HFRI) Fund of Funds Index. The real estate portfolio returned 14.2 percent versus 13.7 percent for its blended benchmark: NCREIF Fund Index - Open End Diversified Core Equity (NCREIF ODCE) and the Financial Times Stock Exchange European Public Real Estate Association/NAREIT Developed REIT Index (Net) (FTSE EPRA NAREIT).

The private equity program returned 19.6 percent, compared to the 18.6 percent return of its customized benchmark, the State Street Private Equity Index (one quarter lag).

The System's Terra Maria program returned 19.6 percent, compared to 19.3 percent for its customized benchmark. As more fully described below, the program is comprised of smaller investment management firms focusing primarily on equity and fixed income investments.

INVESTMENT POLICY AND OBJECTIVES

The Board of Trustees is charged with the responsibility of managing the assets of the System. In doing so, the Board is required to exercise its fiduciary duties solely in the interest of the participants with the care, skill and diligence that a prudent person would exercise under similar circumstances. This standard of care encourages diversifying investments across various asset classes.

Investment objectives are designed to support fulfillment of the Board's mission to optimize risk-adjusted returns to ensure that sufficient assets are available to pay benefits to members and beneficiaries when due. As a long-term

investor, the Board understands that short-term market returns will fluctuate.

These investment objectives are implemented in accordance with investment policies developed by the Board. The “prudent person standard”, as outlined in both the Maryland Annotated Code and the Board’s investment policies, allows for the Board to set investment policies and delegate authority to investment professionals employing active and passive strategies. Firms retained must have a demonstrated performance record and a clearly defined and consistently applied investment process.

The Board manages the System’s assets with the goal of achieving an annualized investment return that over a long-term time frame: (1) meets or exceeds the System’s investment policy benchmark; (2) in nominal terms, equals or exceeds the actuarial investment return assumption of the System adopted by the Board; and (3) in real terms, exceeds the U.S. inflation rate by at least 3 percent. A more detailed discussion of each of these goals follows below.

1. **Meeting or exceeding the System’s Investment Policy Benchmark.** The Investment Policy Benchmark is calculated by using a weighted average of the Board-established benchmarks for each asset class. This benchmark enables the comparison of the System’s actual performance to a passively-managed proxy and measures the contribution of active management and policy implementation to overall fund returns.
2. **In nominal terms, equaling or exceeding the actuarial investment return assumption of the System adopted by the Board.** The actuarial rate of interest for fiscal year 2014 was 7.65 percent. The actuarial investment return assumption functions as an estimate of the long-term rate of growth of the System’s assets. The Board has determined that this assumption will reduce .05 percent each year for the next two years, until it reaches 7.55 percent. In adopting an actuarial return assumption, the Board anticipates that the investment portfolio may achieve higher returns in some years and lower returns in other years.
3. **In real terms, exceeding the U.S inflation rate by at least 3 percent.** The inflation related objective compares the investment performance against

a rate of inflation measured by the Consumer Price Index (CPI) plus 3 percent. The inflation measure provides a link to the System’s liabilities, which have an embedded sensitivity to changes in the inflation rate.

In addition to prudent investment objectives, asset allocation is also a key determinant of a successful investment program. The Board considers the System’s assets and liabilities when determining its asset allocation policy. It does this, in part by weighing three liability-oriented objectives when making asset allocation determinations:

1. achieve and maintain a fully funded pension plan;
2. minimize contribution volatility year to year; and
3. realize surplus assets.

Asset allocation long-term policy targets are determined by recognizing that liabilities (future benefit payments to the System’s participants and beneficiaries) must be paid in full and on time. To ensure this, the long-term policy targets are established with a dual focus. First, there is a focus on long-term return, to ensure that an attractive rate of return on plan assets can be earned over the period that benefits must be paid. Secondly, there is a focus on risk. This involves diversifying assets with a recognition that while individual asset classes can be volatile over short time horizons, diversification will often serve to lower overall portfolio volatility.

The Board’s long-term asset class targets and ranges as of June 30, 2014 are shown below.

ASSET CLASS	LONG-TERM	
	POLICY TARGET	RANGE
Domestic Equity		
International Equity		
Global Equity		
Total Public Equity	35%	+/-4%
Private Equity	10%	+/-4%
Fixed Income	10%	+/-4%
Credit / Debt Strategies	10%	+/-4%
Real Estate	10%	+/-4%
Real Return	14%	+/-4%
Absolute Return	10%	+/-4%
Cash	1%	0-5%
TOTAL ASSETS	100%	

Due to the requirements of enacting a prudent pacing schedule to achieve full allocations to private market assets such as private equity and real estate, transitional allocations are implemented as assets are gradually and judiciously deployed to private market asset classes. Assets not yet deployed to private equity, credit/debt strategies and absolute return are assigned to the public equity transitional target. Assets not yet deployed to real

estate and real return are assigned to the fixed income transitional target.

INVESTMENT PERFORMANCE

Investment performance is calculated using time-weighted rates of total return. Total return includes interest and dividends, as well as capital appreciation.

The investment program realized a return of 14.37 percent for fiscal year 2014. Annualized returns for the 3-, 5-, 10-, 20- and 25-year periods ending June 30, 2014 were 8.3 percent, 11.7 percent, 6.5 percent, 7.3 percent and 7.8 percent, respectively.

The System's allocation as of June 30, 2014 reflects the ranges and transitional targets as described in the previous section.

ECONOMIC AND CAPITAL MARKET OVERVIEW

In many ways, fiscal year 2014 was a continuation of fiscal year 2013 in terms of strong investment returns for financial and real assets. In the U.S., the Federal Reserve continued its accommodative posture of low interest rates and monthly bond purchases in an effort to stimulate economic growth and employment. In part as a result, most economic metrics improved during the fiscal year with U.S. Gross Domestic Product (GDP) growing at a rate of 2.4 percent and unemployment falling to 6.1 percent. Inflation for the fiscal year was 2.1 percent, very close to the Federal Reserve's long-term target of 2 percent. Due to the improved economic conditions, the Federal Reserve announced in December of 2013 that it would gradually reduce its purchases of long-term Treasury bonds and mortgage-backed securities throughout calendar year 2014. It is widely expected that the quantitative easing program will come to an end sometime in the fall of 2014.

Like fiscal year 2013, public equity was the top-performing asset class in fiscal year 2014. The U.S. public equity market, as represented by the Russell 3000 index, generated a return of 25.2 percent as corporate operating margins and profits remain at high levels. For the sixth consecutive fiscal year, U.S. equities exceeded the performance of developed non-U.S. equities as measured by the MSCI All-Country World ex-U.S. index, which returned 21.8 percent. The euro zone continued to suffer from very weak economic conditions with stagnating GDP growth, high unemployment rates, declining private sector lending and dangerously low inflation levels. In June, European Central Bank President Mario Draghi announced a series of measures intended to address these issues in an attempt to stimulate growth and inflation. These measures included further interest rates cuts, negative rates for banks' excess reserves, inexpensive bank liquidity and the possibility of future bond purchases. Emerging markets equities also continued to underperform U.S. equities for the fiscal year, posting a return of 14.3 percent, as measured by the MSCI Emerging Markets Index. Concerns over rising U.S. interest rates and Federal Reserve bond tapering have been factors in this underperformance, as several emerging markets countries rely on foreign capital for funding. In addition, slower global growth and the depreciation of the currencies of several countries have also weighed on performance.

Unlike last fiscal year, fixed income indices delivered positive returns in line with long-term averages. The general level of interest rates ended the fiscal year nearly unchanged as measured by the ten-year Treasury yield. However, rates fluctuated within a fairly wide range in what proved to be a difficult environment to anticipate directionality of yield changes. During the fiscal year, the yield curve unexpectedly flattened as intermediate-term bond yields increased while long-maturity yields declined, leading to significant outperformance of long bonds. Investors continued to show strong confidence in the creditworthiness of borrowers as credit spreads for investment grade and non-investment grade debt narrowed over the fiscal year. The Barclays Capital Aggregate Bond Index returned 4.4 percent for the fiscal year, while high yield bonds as represented by the Barclays Capital High Yield Index returned 11.7 percent.

In summary, investment returns for fiscal year 2014 were very strong, particularly for more risky assets. The environment continued to be conducive for economic expansion, albeit at a slower rate relative to past recoveries, with low interest rates, low inflation and accommodative global monetary policy. The U.S. stock market continued to lead the rest of the world, with higher growth rates, price stability and an improving unemployment picture. Unlike the prior fiscal year, core fixed income assets achieved positive returns as the interest rate increases widely expected due to the tapering of the Federal Reserve's unconventional monetary policy never materialized.

PUBLIC EQUITIES

As of June 30, 2014, approximately \$17.7 billion of the System's total assets were invested in public equities, representing 38.9 percent of total assets. The public equity program has three components: U.S. equities, international equities and global equities. The program is constructed without a home country bias. Accordingly, the weightings of the three components are adjusted from time-to-time, reflecting the investable global public equity opportunity set.

The System's Terra Maria program, which seeks to identify promising smaller or developing management firms, is an integral part of the public equities asset class. At June 30, 2014, 74.8 percent of the Terra Maria program was invested in public equities with 45.5 percent in U.S. equities. Each of the managers in the Terra Maria program has an active management mandate. A more detailed discussion of the Terra Maria program follows below.

A. U.S. Equities

As of June 30, 2014, approximately \$4.7 billion or 10.3 percent of total assets was invested in U.S. public equities. Passively and enhanced passively managed equities totaled \$2.9 billion, while actively managed assets outside of the Terra Maria program totaled \$370 million and Terra Maria program assets were \$1.4 billion, representing 6.5 percent, 0.8 percent, and 3.0 percent of total assets, respectively.

U.S. Equity	\$ Millions	% of Total Plan
Passively Managed	\$2,934.5	6.5%
Actively Managed (exclude T.M.)	\$369.9	0.8%
Terra Maria Program	\$1,356.3	3.0%
Total U.S. Equity	\$4,660.7	10.3%

For FY 2014, U.S. equities returned 26.1 percent, compared to 25.2 percent for its benchmark, the Russell 3000 Index.

B. International Equities

As of June 30, 2014, approximately \$5.5 billion or 12.1 percent of total assets were invested in international equities. Passively managed assets totaled approximately \$2.6 billion, while actively managed assets outside of the Terra Maria program totaled approximately \$2.1 billion and Terra Maria assets were \$0.85 billion, representing 5.7 percent, 4.6 percent and 1.9 percent of total assets, respectively. As more fully described below, in 2009 the System instituted a currency overlay program which is designed to protect the value of some foreign equities in a rising dollar environment and reduce volatility.

International Equity	\$ Millions	% of Total Plan
Passively Managed	\$2,587.3	5.7%
Actively Managed (exclude T.M.)	\$2,095.7	4.6%
Terra Maria Program	\$850.6	1.9%
Currency Overlay	(\$31.1)	-0.1%
Total International Equity	\$5,502.5	12.1%

For FY 2014, international equities returned 20.4 percent compared to 21.8 percent for its benchmark, the MSCI All Country World ex-U.S. Index.

C. Global Equities

As of June 30, 2014, approximately \$7.5 billion or 16.5 percent of total assets were invested in global equities. Actively managed long-only assets outside of the Terra Maria program totaled \$5.3 billion; Terra Maria assets were \$22.3 million, and actively managed long-short assets totaled \$1.7 billion, representing 11.8 percent, 0.05 percent, and 3.8 percent of total assets, respectively. The currency overlay program, which is designed to protect the value of some foreign equities in a rising dollar environment and reduce volatility, is also applied to the global equity program.

Global Equity	\$ Millions	% of Total Plan
Passively Managed	\$413.8	0.9%
Actively Managed (exclude T.M.)	\$5,343.1	11.8%
Terra Maria Program	\$22.3	0.0%
Long/Short Funds	\$1,744.0	3.8%
Currency Overlay	(\$15.2)	0.0%
Total Global Equity	\$7,508.0	16.5%

For FY 2014, global equities returned 21.1 percent compared to 23.0 percent for its benchmark, the MSCI All Country World Index.

CURRENCY OVERLAY PROGRAM

The currency overlay program was implemented in April of 2009, and is managed by Record Currency Management. An objective of the program is to provide insurance against a strengthening dollar, which could negatively impact returns from foreign currency-denominated equities. The manager uses a systematic currency overlay strategy and generally does not make fundamental currency valuation assessments. The strategy is also dynamic in that the degree to which currency hedging is applied changes depending on currency market conditions. As a general rule, the manager uses low hedge ratios when the dollar is weak and high hedge ratios when the dollar is strong. During fiscal year 2014, the currency program detracted from returns in the international and global public equity programs as the U.S. dollar weakened relative to other currencies. The cost to the System's portfolio as a result of using this systematic currency overlay strategy was \$116.5 million. While the currency program acted as a drag on performance during fiscal year 2014, it has served to reduce volatility and improve the risk/return profile of the international and global equity programs since its inception.

PRIVATE EQUITY

As of June 30, 2014, private equity totaled roughly \$3.2 billion, or 7.0 percent of total assets. This asset class includes buyouts, growth equity, venture capital, secondaries and funds-of-funds.

In fiscal year 2014, commitments were made to 16 private equity funds totaling \$1.5 billion. Since the inception of the private equity program in fiscal year 2005, commitments have been made totaling roughly \$6.9 billion to 131 different funds. In fiscal year 2014, the private equity program returned 19.6 percent, compared to 18.6 percent for its customized benchmark, the State Street Private Equity Index.

In fiscal 2015, the Board expects that exposure to private equity will continue to increase toward its long-term targeted levels as unfunded commitments of \$3.2 billion are drawn down by the fund managers. It is expected that it will take several more years for the target allocation of 10.0 percent to be reached in a prudent manner.

FIXED INCOME

Fixed income markets began the fiscal year at an elevated level of yields due to concerns with the Federal Reserve's announcement regarding its intention to begin winding down its unconventional stimulative monetary policy that has become known as Quantitative Easing. Over the course of the year, yields have exhibited some volatility but the level of yields ended the year largely unchanged. The shape of the curve, however, saw major changes with yields in the front end of the curve rising (+20 basis points) and yields in the back end of the curve falling (-15 basis points). Credit sensitive bonds exhibited remarkable outperformance with risk premiums declining to levels that have not been seen since prior to 2008. The portfolio has a blended benchmark of 80 percent Barclays Capital Intermediate Aggregate Index and 20 percent Barclays Capital Global Bond 1-10 year Index. As of June 30, 2014, the fixed income portfolio represented \$6.7 billion, or 14.8 percent of total assets. The relative performance of the portfolio was strong, returning 4.6 percent for the fiscal year, versus 3.6 percent for its benchmark.

CREDIT/DEBT STRATEGIES

The credit/debt strategies portfolio totaled approximately \$4.6 billion, representing 10.0 percent of total plan assets as of June 30, 2014. Investments in this asset class are held

in both liquid and illiquid structures. The Board has funded the program principally with mezzanine and distressed debt, high yield and investment grade bonds, bank loans and emerging market debt. The portfolio has a blended benchmark of 50 percent Barclays U.S. High Yield Index, 20 percent Barclays U.S. Credit Index, 20 percent JP Morgan GBI EM Global Diversified Index and 10 percent S&P LSTA Leveraged Loan Index. The portfolio returned 11.5 percent for the fiscal year, versus 8.7 percent for its benchmark. The outperformance relative to the benchmark was primarily due to the strong performance of the System's distressed debt investments.

REAL ESTATE

The real estate portfolio returned 14.2 percent in fiscal year 2014, versus 13.7 percent for its custom benchmark, a blend of the NCREIF ODCE and FTSE-EPRA NAREIT. At the end of the fiscal year, real estate accounted for 6.8 percent of total assets, valued at \$3.1 billion. The program includes publicly-traded securities and private investment funds.

The NCREIF ODCE index returned 13.8 percent for the twelve months ending March 31, 2014. Public real estate securities, as measured by the Financial Times Stock Exchange European Public Real Estate Association/NAREIT Developed REIT Index (Net), had one-year return of 13.5%. Cap rates for core properties remain low on an absolute level although at a reasonable spread to some fixed income alternatives.

REAL RETURN

The real return portfolio totaled approximately \$5.5 billion, representing 12.0 percent of total assets as of June 30, 2014. The objectives of this asset class are to provide a level of protection against inflation and event risk, and to enhance diversification for the total fund. As of June 30, 2014, the largest components of the asset class were Treasury Inflation Protected Securities (TIPS) and global inflation-linked bonds totaling \$2.9 billion, or 6.5 percent of total assets. Combined, these two components had a return of 4.8 percent, given low inflation expectations in most markets. There was also an allocation to commodities, representing \$1.7 billion, or 3.7 percent of total assets. The remaining assets consist of publicly-traded Master Limited Partnerships (MLPs) and private investments in infrastructure, timber and energy-related assets.

The real return portfolio returned 7.0 percent in fiscal 2014 versus 6.0 percent for its custom benchmark. The main drivers of outperformance relative to the benchmark were MLPs and private energy-related investments.

ABSOLUTE RETURN

The absolute return portfolio totaled approximately \$4.3 billion, representing 9.4 percent of total assets as of June 30, 2014. The portfolio consists of three global macro funds, two multi-asset strategies, two funds-of-funds, three relative value multi-strategy funds and one insurance fund. Its goal is to provide diversification for the total plan through its low correlation to the broad financial markets. The portfolio matched its benchmark in fiscal 2014, returning 7.6 percent versus 7.6 percent for the HFRI Fund of Funds Composite Index.

TERRA MARIA PROGRAM

As previously mentioned, the Terra Maria program seeks to identify promising smaller or developing managers. The seven existing public market program managers serve as an extension of staff to source investment managers, perform manager due diligence, monitor managers and prepare manager "hire/fire" and funding recommendations. The managers include Attucks Asset Management, Bivium Capital Partners, Capital Prospects, FIS Group, Leading Edge Investment Advisors, Northern Trust Global Advisors and Progress Investment Management Company.

Terra Maria publicly-traded assets totaled approximately \$3.0 billion, or 6.6 percent of total assets at June 30, 2014. The program returned 19.6 percent for the fiscal year, compared to the custom benchmark return of 19.3 percent. The relative performance results have remained positive since the April 2007 inception of the program.

During fiscal year 2011, the Terra Maria program was expanded to include investments in private equity partnerships. Since January 2011, \$3.5 billion has been committed globally to 50 private equity funds. Of this, \$2.0 billion has been committed to 28 domestic funds, which includes \$358 million to 11 Terra Maria emerging managers.

Additionally, at the end of fiscal year 2014, \$5.2 billion, or 11.5 percent of the System's total assets, was managed by minority and women-owned firms.

In the Terra Maria program, as well as in other parts of the fund's portfolio, the Chief Investment Officer has the ultimate responsibility for making manager selection and termination decisions, and for determining funding allocations.

CONCLUSION

Fiscal year 2014 was a very strong year for investment returns as the System outperformed both the actuarial return assumption and the policy benchmark. Central banks around the globe are at different stages and degrees of stimulative monetary policy. Going forward, investment returns will depend largely on the actions of global central banks and the market's reaction to these actions, and whether the appropriate balance between growth and inflation can be achieved.

To conclude, I would like to extend my gratitude to the Executive Director, Investment Committee and Board of Trustees for their time, leadership and support. I would also like to thank the investment staff and consultants for their unwavering commitment to producing attractive risk-adjusted investment results in a balanced and diversified manner.

Respectfully submitted,

Robert M. Burd, CFA, CAIA
Acting Chief Investment Officer

November 25, 2014

Board of Trustees
Maryland State Retirement and Pension System
120 East Baltimore Street
Baltimore, MD 21202

Dear Members of the Board:

At your request, we have performed an actuarial valuation of the Maryland State Retirement & Pension System as of June 30, 2014. The actuarial information provided herein should only be considered in conjunction with the entire actuarial valuation report dated November 25, 2014, and other supporting documents referenced therein.

Funding Objective

The funding objective of the System is to establish contribution rates which, over time, will remain relatively level as a percent of payroll. In order to achieve this, a contribution rate has been determined which will provide for current cost (i.e., normal cost expressed as a level percent of payroll) plus a level percent of payroll amortization of the unfunded actuarial liability over a single 25-year closed period ending June 30, 2039. Maryland law contains provisions (i.e., a corridor approach) to mitigate annual fluctuations in contribution rates. Due to this funding approach, the contribution rates appropriated for the Employees' and Teachers' Combined Systems have been lower than the actuarially determined rates for GASB Statement No. 27 accounting purposes in most recent years. However, the corridor approach is being phased out over a 10-year period (8 years remaining) based on recent legislation.

Assumptions

The economic and demographic actuarial assumptions used in the years' valuation were adopted by the Board of Trustees based upon review of the System's experience completed during Fiscal Year 2011. In particular, the assumed rate of investment return was 7.65%.

The assumptions and methods used in performing this valuation meet the parameters set for disclosure presented in the financial section of the System's Comprehensive Annual Financial Report (CAFR) by Government Accounting Standards Board Statement No. 67, Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans. A summary of these assumptions is presented in the financial section of the System's CAFR.

With the exception of the contribution rates, which apply to Fiscal 2016, the results and conclusions of this report are only valid as of June 30, 2014 and should not be interpreted as applying to future years. The actuarial assumptions reflect an understanding of the likely future experience of the plans. The accuracy of the results presented in this report is dependent upon future experience conforming to these assumptions. To the extent that future experience deviates from the actuarial assumptions, the true cost of the plans could vary from our results.

Reliance on Others

In preparing our report, we have relied, without audit, on employee census data and financial information provided by Agency staff. Census data provided to us by the Agency has been reviewed for reasonableness and for consistency with the data certified by the System's auditors.

Supporting Schedules

Certain information presented in the System's June 30, 2014 CAFR was derived from our June 30, 2014 actuarial valuation report and our separate accounting reports. In this regard, we were responsible for producing all supporting schedules to be found in the Actuarial Section. These schedules include the Summary of Valuation Results, UAAL and Actuarial Gain/Loss, Asset Gain/Loss, Assets/Liabilities Trend, Benefits vs. Contributions Trend, State Contribution Rate Trend, Accounting Statement Information, Summary of Unfunded Liabilities/Solvency Test, Summary of Retirees and Beneficiaries Added to and Removed from Rolls, Summary of Principal Results by System, and the Schedule of Active Membership by Plan.

Additionally, we were responsible for producing all data presented in the Schedule of Funding Progress, Schedule of Employer Contributions and Notes to the Required Supplementary Information shown in the Financial Section of the 2014 CAFR. Information pertaining to valuations prior to 2009 was determined by previous actuarial firms.

Certification

On the basis of the foregoing, we certify that, to the best of our knowledge, this report is complete and accurate and has been prepared in accordance with Maryland's Annotated Code and generally recognized and accepted actuarial principles and practices which are consistent with the Code of Professional Conduct and applicable Actuarial Standards of Practice as promulgated by the Actuarial Standards Board. Brad L. Armstrong, Brian B. Murphy, and Amy Williams are independent from the plan sponsor and System and are Members of the American Academy of Actuaries and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein.

Sincerely,

Brad L. Armstrong, ASA, MAAA
Consulting Actuary

Brian B. Murphy, FSA, MAAA
Consulting Actuary

Amy Williams, ASA, MAAA
Consulting Actuary

INTRODUCTION

This section presents the results of the June 30, 2014 annual actuarial valuation of the Maryland State Retirement and Pension System (MSRPS). The purposes of the annual valuations are as follows:

- Measure the financial position of MSRPS,
- Assist the Board in determining employer contribution rates (including reinvested savings) necessary to fund the benefits provided by MSRPS, as well as establishing statutory employer contribution rates,
- Indicate trends in the financial progress of the fund,
- Provide actuarial reporting and disclosure information for the System's financial report, and
- Analyze the experience of the System over the past year.

A summary of the primary valuation results as of June 30, 2014 is presented on the following page.

¹Includes CORS Municipal only. State CORS included in ECS.

²Retiree benefit amounts include the cost-of-living-adjustment granted July 1, «val_date_1» and July 1, «val_date_2», respectively.

³Actuarial estimation method shown is expected to differ modestly from figures reported by State Street

⁴Contribution rates shown in the "Total" column are for informational purposes only and are not used for funding purposes.

⁵Reflects the reduction of reinvested savings from \$300 million to \$100 million passed by the General Assembly.

⁶Does not reflect the reduction of reinvested savings.

Totals may not add due to rounding.

ACTUARY'S COMMENTS

The System's assets earned **14.27%¹** for the year ended June 30, 2014, which is more than the 7.70% assumed rate of investment return. Recognized asset gains from fiscal years 2010, 2011, 2013 and 2014 offset recognized asset losses from fiscal year 2012 in the actuarial value of assets as of June 30, 2014. This resulted in a gain under the asset smoothing method.

	UAAL and Actuarial Gain/(Loss) State and Municipal (\$ in Millions)		
	State	Municipal	Total SRPS
Unfunded Actuarial Accrued Liability (UAAL) as of June 30, 2013	\$19,716	\$993	\$20,709
Expected UAAL as of June 30, 2014 before changes	20,163	979	21,142
Changes in benefit provisions:	-	-	-
Changes in methods and assumptions:	298	22	320
Expected UAAL as of June 30, 2014 after changes	20,461	1,001	21,462
Actual UAAL as of June 30, 2014	18,750	863	19,613
Net actuarial gain (loss)	1,711	138	1,849
Actuarial gain (loss) by source:			
Actuarial investment experience	1,259	114	1,373
Actuarial accrued liability experience	452	24	476

In relative terms, the overall System funded ratio of actuarial value of assets to liabilities increased from 65.52% in 2013, to **68.67%** this year. If market value of assets were the basis for the measurements, the funded ratio would have increased from 67.20% to 72.42% funded. The market value of assets exceeds the retiree liabilities by about 26% in total, an increase from 17% last year. This is referred to as a short condition test and is demonstrated in the chart at the bottom of this page. It is looking at the current retiree liabilities as the benefits that will be paid the soonest since these benefits are already in pay status. Active liabilities and deferred vested liabilities do not have associated immediate cash flow requirements. Although the market value of assets exceeds the current retiree liabilities in total, this is not true for two of the smaller systems. For State Police and LEOPS, the market value of assets is less than the retiree liabilities.

Summary of Contribution Rates by State System (\$ in Millions)							
	TCS	ECS	State Police	Judges	LEOPS	CORS	Total
Market Value of Assets (MVA)	\$27,491	\$15,345	\$ 1,307	\$ 409	\$ 768	\$ 20	\$45,340
Retiree Liability	21,098	12,278	1,596	308	788	10	36,077
MVA as % of Retiree Liability	130%	125%	82%	133%	98%	193%	126%

¹ Actuarial calculations may differ from figures reported by State Street.

In the 2013 legislative session, the Legislature changed the method used to fund the State Systems of the MSRPS. The unfunded liability for each System is being amortized over a single closed 25-year period beginning July 1, 2014 and ending June 30, 2039 (24 years remaining as of the June 30, 2014 valuation, which determines the fiscal year 2016 contribution). In addition, the corridor method used by the Teachers' Combined System and the State portion of the Employees' Combined System, which was established in 2001, is being phased-out over a 10-year period (eight years remaining for the fiscal year 2016 contribution calculated in the June 30, 2014 valuation). Under the corridor funding method, the State appropriation is fixed at the prior fiscal year's rate, but adjusted to reflect the cost of any legislative benefit changes, as long as the actuarial funded status of these Systems remains in a corridor of 90% funded to 110% funded. Once the ratio falls outside this corridor, the appropriated or budgeted rate will be adjusted 36% in fiscal year 2016, (44% in fiscal year 2017, etc.) of the way toward the underlying actuarially calculated rate, with the exception of the cost of/or the savings from legislative benefit changes, which are fully recognized regardless of whether the Systems

are within or outside of the corridor. The Teachers' Combined System (TCS) has remained out of the corridor since the June 30, 2005 valuation and the State portion of the Employees Combined System (ECS) remained out of the corridor since the June 30, 2004 valuation resulting in contribution rates for TCS and ECS that are less than actuarial rates.

In 2011, the General Assembly enacted pension reforms which were effective July 1, 2011, and affect both current actives and new hires. The member contribution rate was increased for members of the Teachers' Pension System and Employees' Pension System from 5% to 7%, and from 4% to 6% in fiscal year 2012 and to 7% in fiscal year 2013 and beyond for LEOPS. In addition, the benefit attributable to service on or after July 1, 2011, is subject to different cost-of-living adjustments (COLAs) that are based on the increase in the Consumer Price Index and capped at 2.5% or 1.0% based on whether the market value investment return from the preceding calendar year was higher or lower than the investment return assumption used in the valuation (currently 7.65%). There were also changes to the provisions for members hired on or after July 1, 2011. The valuation as of June 30, 2012, was the first valuation which included members covered under the Reformed Benefit Plans applicable to members hired on or after July 1, 2011.

In addition to the benefit provision changes, a portion of the savings from the pension reforms is to be reinvested in certain State Systems (TCS, ECS, State Police, and LEOPS). Legislation enacted in 2014 reduced the amount of reinvested savings from \$300 million each year beginning in fiscal year 2014, to \$100 million each year for fiscal years 2014 and 2015, \$150 million for fiscal year 2016, \$200 million for fiscal year 2017, \$250 million for fiscal year 2018, and \$300 million each year beginning in fiscal year 2019 and thereafter until the later of the combined funded ratio of the Systems reaching 85% and the corridor funding method being fully phased out. The allocation of reinvested savings by System is in proportion to the savings from the pension reforms as measured in the actuarial valuation as of June 30, 2011.

On the following page is a summary by the State System of the budgeted contribution rates and the actuarially determined contribution rates. The budgeted contribution rates use the corridor funding method for TCS and ECS.

The actuarially determined rates exclude the corridor funding method and are equal to the employer normal cost plus the unfunded actuarial accrued liability contribution rate. The unfunded actuarial contribution rate is equal to the payment resulting from amortizing the current unfunded liability as a level percentage of pay over a single 25-year closed period as of June 30, 2013 (24 years remaining as of June 30, 2014).

The fiscal year 2016 budgeted rate for TCS is about 97.3% (97.5% with the addition of reinvested savings) of the actuarially determined rate, and the budgeted rate for ECS is about 91.6% (92.1% with the addition of reinvested savings) of the actuarially determined rate.

FY2016 Contribution Rates (State Portion Only)						
	TCS	ECS	State Police	Judges	LEOPS	Total
Budgeted Contribution Rate ¹	15.71%	16.38%	78.91%	40.70%	39.77%	16.83%
Actuarially Determined Rate ¹	16.15%	17.89%	78.91%	40.70%	39.77%	17.61%
Budgeted/Actuarially Determined Rate	97.28%	91.56%	100.00%	100.00%	100.00%	95.57%
Budgeted Contribution Rate with Reinvested Savings	17.27%	17.70%	81.24%	40.70%	42.14%	18.32%
Actuarially Determined Rate with Reinvested Savings	17.71%	19.21%	81.24%	40.70%	42.14%	19.08%
Budgeted with Reinvested Savings/ Actuarial with Reinvested Savings	97.52%	92.14%	100.00%	100.00%	100.00%	96.01%

1. Excludes reinvested savings.

The budgeted rates with reinvested savings are based on a projection of payroll. It is our understanding that the Retirement Agency will monitor contributions to ensure that the System receives the proper amount of reinvested dollar savings during fiscal year 2016.

Beginning in fiscal year 2013, local employers contributed a portion of the statutory normal cost contribution for the Teachers Combined System. Normal cost contribution amounts for local employers for fiscal years 2013 through 2016 are defined by the Maryland statutes. Beginning in fiscal year 2017, local employers will contribute the full normal cost contribution on behalf of their employees.

Under the present circumstances, the corridor method results in contributions that are less than those determined actuarially and those needed to make sufficient progress toward funding the current unfunded liability. However, with the phasing out of the corridor method and the inclusion of reinvested savings, the return to actuarial funding is on the horizon.

The results of this valuation report disclose the actuarially determined rates and the budgeted contribution rates. Under the phase out of the corridor funding method, the budgeted rates will equal the actuarially determined rates by fiscal year 2024. The analysis in this report will focus on the actuarially determined rates but will footnote the appropriated or budgeted rates where applicable.

The schedules required under Government Accounting Standards Board Statement (GASB) No. 67 (beginning with fiscal year 2014) and No. 68 (beginning with fiscal year 2015) are provided in a separate report. The GASB Statement No. 68 schedules produced for fiscal year 2014 were pro-forma only.

PRIOR YEAR EXPERIENCE

Assets (State and Municipal)

Plan assets for this System are measured on both a market value and an actuarial or smoothed value basis. The actuarial smoothing method, described in detail in Appendix A, annually recognizes 20% of the difference between (a) the expected investment return if the market value of assets had earned the assumed rate of 7.70% during FY 2014, and (b) the actual investment return. In addition, there is a market value collar that constrains the actuarial value to be within 20% of the market value of assets. In periods of high returns, this method defers the amount of asset gains above the assumed return (7.70% for FY 2014 and 7.65% for FY 2015). Conversely, in periods of returns below the assumed rate, recognition of the losses is deferred. The primary advantage of this smoothing technique is contribution stability. The System does not immediately feel the full impact of lower (or higher) costs when asset values fluctuate dramatically. In the Teachers' and Employees' Systems, the impact is further reduced by the corridor method. In Systems where both the corridor method and the asset smoothing method are in effect, it can take 15 or more years to recognize a single year's gain or loss. The statutory phase-out of corridor will ultimately reduce this to 5 years.

For the plan year ending June 30, 2014, the System's assets earned 14.27%¹ on a market value basis and 11.22% on a smoothed or actuarial basis. The System experienced an investment gain of \$2,626 million on a market value basis and a loss of \$1,373 million on an actuarial basis. A reconciliation of market value and actuarial value of assets are presented below.

(STATE AND MUNICIPAL)

Item (In Millions)	Market Value	Actuarial Value
June 30, 2013 Value	\$ 40,363	\$ 39,351
June 30, 2013 Municipal Withdrawals /New Entrants	-	-

¹ Actuarial estimation method shown is expected to differ modestly from figures reported by State Street.

Trends (State and Municipal)

One of the best ways to measure or evaluate the financial condition of a pension plan is to examine the historical trends that are evolving. Below are three charts which illustrate trend information from 1993 through the end of 2014, on the System's assets and liabilities, annual cash flows in and out of the fund, and the State contribution rate. Our comments on each follow.

Chart A:
Assets/Liabilities

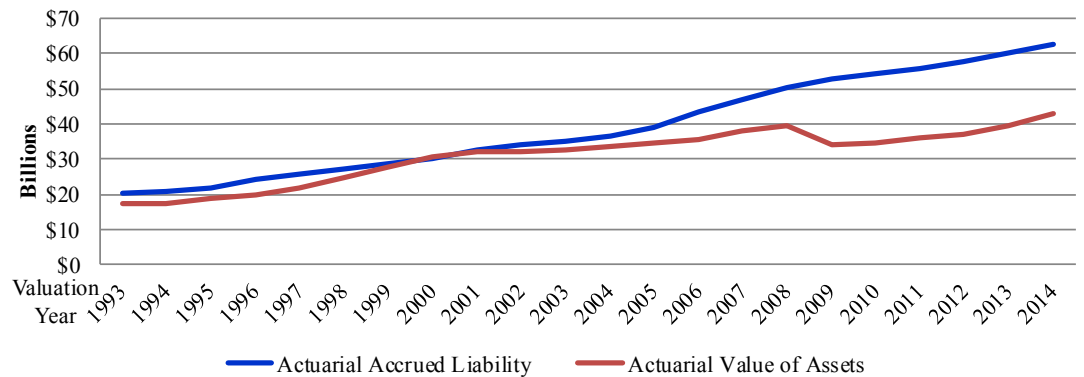

Chart B:
Benefits vs Contributions

Chart C:
State Contribution Rate

* Excludes reinvested savings in valuation years 2011- 2014. 2010 rates are prior to the 2011 GA Reforms.

Comments

Chart A displays a comparison of the actuarial value of assets and the actuarial accrued liability. As of June 30, 2014, the actuarial value of assets under the 5-year asset smoothing method are 95% of the market value of assets, compared with 97% as of June 30, 2013.

Chart B presents non-investment cash flow trend information that can have investment implications. Many statewide retirement systems, with the aging and retirements of the baby boom generation, are seeing payments to retirees on the increase. This is expected for mature retirement systems. Benefit payments, which is the total amount below the green line, exceeds the total contributions, which is the total amount below the top of the red bar. The amount needed to pay excess benefit payments over total contributions comes from investment return or current assets. If the difference between the total benefit payments and total contributions increases, a larger portion of investment return will be needed to pay benefits and may require a change in asset allocation. As long as cash into the fund from employer and employee contributions is increasing in a similar manner to benefit payments, the financial objectives of the System will continue to be met. The budgeted rates under the corridor funding method first became less than the actuarial rates in FY 2006 for ECS and in FY 2007 for TCS. The corridor method increased the extent of negative cash flows, which could affect the manner in which the assets are invested.

Finally, **Chart C**, looks at the composite actuarially determined and budgeted State contribution rates. The budgeted contribution rates by System determine the fiscal year State appropriation. It shows the impact of the 1990's decade sustained investment gains, a continuous lowering of the rate until 2000. Effective with the 2001 valuation, the State appropriations were performed under a corridor funding method for the two largest plans. The appropriation remained essentially level for a few years before increasing with the 2004 valuation. In the absence of significant favorable investment and/or demographic experience, the contribution rates can be expected to increase to the level indicated if the corridor method had not been adopted. Without the corridor method, the

State contribution in FY 2016 would be 0.78% of payroll higher (excluding reinvested savings) than the amount to be budgeted under the corridor method. The actual contribution rate for FY 2016 is therefore 4% less than the actuarially determined rate.

Legislation enacted in 2013 is phasing out the corridor funding method for TCS and ECS over a 10-year period beginning with the valuation as of June 30, 2013. The budgeted rate is expected to increase and will converge with the actuarial rate for TCS and ECS at the end of the 10-year period.

Chart C further illustrates that, since inception, the corridor method has consistently acted to reduce the State's contribution. The new amortization method and the phase-out of the corridor will result in budgeted contribution rates that are equal to the actuarially determined ones in 8 years (when the corridor is fully phased by the valuation as of June 30, 2022).

SRPS
Statistical Section

The Maryland State Retirement and Pension System (MSRPS) has implemented GASB Statement 44, Economic Condition Reporting: The Statistical Section. This statement establishes standardized reporting requirements relative to the supplementary information provided in this section in an effort to improve the understandability and usefulness of the information presented. GASB Statement 44 further states that the purpose of the Statistical Section is to provide historical perspective, context, and detail to assist readers in using the information in the financial statements and the notes to the financial statements to better understand and assess the System's overall economic condition. The schedules within the Statistical Section are classified into the following four categories: Financial Trends, Revenue Capacity, Demographic and Economic Information, and Operating Information.

The schedules beginning on page 103 show financial trend information to assist users in understanding and assessing how the MSRPS's financial position has changed over the past 10 years. The financial trend schedules presented are:

- Changes in Net Assets
- Benefits Expense by Type

The schedules beginning on page 104 show demographic and economic information and operating information. The demographic and economic information is intended to assist users in understanding the environment in which MSRPS operates. The operating information is intended to provide contextual information about MSRPS's operations to assist readers in using financial statement information. The demographic and economic information and the operating information presented include:

- Schedule of Average Benefit Payments .
- Funding Progress
- Contribution Rates by Plan
- Schedule of Retired Members by Type
- Schedule of Active Membership by Plan
- Schedule of Retirees and Beneficiaries by Plan
- Revenues by Source and Expenses by Type
- Revenues vs. Expenses
- Principal Participating Employers

Option Selected:

- Basic – The standard benefit if no option is selected. Generally, at retiree’s death, all payments cease. However, the basic allowance for the State Police, Law Enforcement Offices (LEOPS), Judges and Legislators provides a continuing benefit for spouses or children under 18.
- Opt. 1 – Guarantees return of the present value of the retirement benefit less the total payments already paid to the member.
- Opt. 2 – Guarantees the same payment to the designated beneficiaries for their lifetime.
- Opt. 3 – Guarantees one half the member’s payment to the designated beneficiaries for their lifetime.
- Opt. 4 – Guarantees return of the member’s accumulated contributions and interest less the member’s accumulated reserves already paid.
- Opt. 5 – Guarantees the same payment to the designated beneficiaries for their lifetime, unless the beneficiaries predecease the respective members. Allowance then increases to the basic.
- Opt. 6 – Guarantees one half the member’s payment to the designated beneficiaries for their lifetime, unless the beneficiaries predecease the respective members. Allowance then increases to the basic.
- Opt. 7 – Special option calculation performed by actuary.

A large, semi-transparent graphic in the center of the page. It features the letters 'SRPS' in a large, serif font at the top. Below the letters is a stylized, abstract design consisting of several overlapping shapes, including circles and rectangles, arranged in a way that suggests a network or a complex structure. The entire graphic is rendered in shades of gray.

THE TEACHERS' RETIREMENT SYSTEM (TRS) was established on August 1, 1927 and is administered in accordance with the State Personnel and Pensions Article of the Annotated Code of Maryland. Prior to January 1, 1980, membership in the TRS was a condition of employment for State and local teachers and certain board of education, public library and community college employees, unless those who were eligible elected to participate in an optional retirement program. Effective July 1, 1971 Baltimore City teachers and retired teachers were included in the TRS.

Effective January 1, 1980, the TRS was effectively closed to new membership when the Teachers' Pension System (TPS) was established. Individuals who were members of the TRS on December 31, 1979, continue their TRS membership unless, and until, they elected to transfer to the TPS prior to January 1, 2005.

Member Contributions

All member contributions to the TRS are based on a specified percentage of annual earnable compensation. Members who elected in 1984 to receive unlimited future cost-of-living adjustments (COLA) contribute 7% if enrolled after June 30, 1973. Members enrolled before July 1, 1973 contribute the lesser of 7% or 2% more than the rate of contribution in effect on the date of their enrollment. This option is referred to as Selection A (Unlimited COLA).

Members who elected in 1984 to receive limited future COLA's contribute 5% if enrolled after June 30, 1973. Members enrolled before July 1, 1973 contribute the lesser of 5% or the rate of contribution in effect on the date of their enrollment. This option is referred to as Selection B (Limited COLA).

All other TRS members contribute **in accordance with the provisions of the Teachers' Pension System**. This option is referred to as Selection C (Combination Formula), that provides a two-part benefit calculation upon retirement. The employee contribution for Section C, Part 2 is 5%.

Members who are in Selection A, B, or C will remain in these until their retirement. As of January 1, 2005, they were no longer permitted to change selections.

Service Retirement Allowances

Eligibility — TRS members are eligible for full service retirement allowances upon attaining age 60 or upon accumulating 30 years of eligibility service regardless of age.

Allowances — Full service retirement allowances equal 1/55 (1.818%) of the highest three years' average final **compensation** (AFC) multiplied by the number of years and months of accumulated creditable service. Allowances for members who fail to make all required contributions are reduced by the actuarial equivalent of the total unpaid contributions plus interest to date of retirement. Service is accrued based on a full normal school year (ten months).

Early Retirement Allowances

Eligibility — TRS members are eligible for early service retirement allowances upon accumulating at least 25 years of eligibility service prior to attaining age 60.

Allowances — Early service retirement allowances equal the amount payable for a full service retirement reduced by 0.5% for each month by which the retirement date precedes the earlier of the date on which the member reaches age 60, or the date on which the member would have completed 30 years of service. The maximum reduction for a TRS member is 30 percent. The maximum reduction for a TRS member who elected Selection C is 30% on the first part and 42% on the second part of the benefit calculation.

Ordinary Disability Retirement Allowances

Eligibility — TRS members are eligible for ordinary disability retirement allowances upon completing five years of eligibility service and receiving certification from the Medical Board that they are permanently incapable of performing their necessary job functions.

Allowances — Ordinary disability retirement allowances generally equal 1/55 (1.818%) of the highest three years' AFC multiplied by the number of years of accumulated creditable service. However, the ordinary disability benefits can be no greater than 1.818% of AFC for each year of creditable service the members would have received had they continued to work until age 60.

Accidental Disability Retirement Allowances

Eligibility — TRS members are eligible for accidental disability benefits if the Medical Board certifies that, in the course of job performance and as the direct result of an accidental injury, they became totally and permanently disabled.

Allowances — Accidental disability allowances equal the sum of an annuity determined as the actuarial value of the members' accumulated contributions, plus 2/3 (66.7%) of AFC. Allowances may not exceed the members' AFC.

Death Benefits

Eligibility — To be eligible for death benefits, TRS members must have either accumulated at least one year of eligibility service prior to the date of death or died in the line of duty.

Benefits — The benefit provided upon death for TRS members equals the members' annual earnable compensation at the time of death plus accumulated contributions. Under certain circumstances, surviving spouses who were named as sole primary beneficiaries may elect to receive either the aforementioned lump sum payment, or a monthly allowance calculated under Option 2 (100% survivor option).

Special Death Benefit - Provides a special death benefit to the surviving spouse, dependent children, or dependent parents of employees killed in the line of duty equal to 2/3 of the deceased member's average final compensation.

Vested Retirement Allowances

Eligibility — TRS members are eligible for vested retirement allowances after separation from service and upon reaching normal retirement age, provided that at least five years of eligibility service was accumulated prior to separation.

Allowances — Vested allowances equal the normal service retirement allowances computed on the basis of the members' accumulated creditable service and AFC at the point of separation.

If members do not withdraw their contributions, and die before attaining age 60, their accumulated contributions are returned to the designated beneficiary.

Cost-of-Living Adjustments

Retirement allowances are adjusted each year based on the Consumer Price Index(CPI). Cost-of-living adjustments (COLAs) are effective July 1st of each year and are applied to all allowances payable for the year. However, the method by which the annual COLAs are computed depends upon elections made by members who were active on July 1, 1984 (or within 90 days of returning to service, for members who were inactive on July 1, 1984). Each option is explained in the following column.

Selection A (Unlimited COLA) — TRS members who elected Selection A, agreed to contribute no more than 7% of earnable

compensation in return for unlimited annual COLAs after retirement.

Selection B (Limited COLA) — TRS members who elected Selection B, agreed to contribute at the required TPS employee contribution rate of earnable compensation in return for COLAs that are limited to 5% annually after retirement.

Selection C (Combination Formula) — TRS members who elected Selection C, agreed to contribute at the required TPS employee contribution rate of earnable compensation in return for COLAs that, similar to the retirement benefit, are divided into two parts.

Part 1: The COLAs are unlimited unless the member elected Selection B prior to electing Selection C, in which case COLAs are limited to 5%.

Part 2: The COLAs are limited to 3%.

In years in which COLAs would be less than zero due to a decline in the CPI, retirement allowances will not be adjusted. COLAs in succeeding years are adjusted until the difference between the negative COLA that would have applied and the zero COLA is fully recovered.

Optional Forms of Payment

Option 1: Payment guarantees a cash reserve equal to the excess of the present value of the retirement allowance at the date of retirement minus the total amount of payments (less COLAs) made to the date of death.

Option 2: 100% joint and survivor annuity.

Option 3: 50% joint and survivor annuity.

Option 4: Payment guarantees a minimum return of the members' accumulated contributions.

Option 5: 100% joint and survivor annuity with adjustment to maximum benefit if beneficiary predeceases retiree.

Option 6: 50% joint and survivor annuity with adjustment to maximum benefit if beneficiary predeceases retiree.

Except for a spouse or disabled child, the beneficiary designated under Option 2 or 5 cannot be more than 10 years younger than the retiree (IRS Regulation).

Workers' Compensation Benefits Reduction

Disability retirement allowances are generally reduced by workers' compensation benefits paid after retirement if, and to the extent that, such benefits are for the same injury and the same period of time for which the retirement benefits are payable. The workers' compensation benefit reduction cannot reduce any retirement allowance to less than the amount necessary to cover the retiree's monthly health insurance premiums.

THE TEACHERS' PENSION SYSTEM (TPS) was established on January 1, 1980 and is administered in accordance with the State Personnel and Pensions Article of the Annotated Code of Maryland. Membership in the TPS is a condition of employment for all State and local teachers and certain board of education, public library and community college employees (unless those who are eligible elect to participate in an optional retirement program).

All individuals who are members of the Teacher's Pension System on or before June 30, 2011, participate in the Alternate Contributory Pension Selection (ACPS) except for the few members who transferred from the Teachers' Retirement System after April 1, 1998 or former vested members who terminated employment prior to July 1, 1998.

All individuals who enroll in the Teachers' Pension System on or after July 1, 2011, participate in the Reformed Contributory Pension Benefit (RCPB).

Member Contributions

All ACPS members are required to contribute 7% of earnable compensation during FY2010.

Service Pension Allowances

ACPS Eligibility — Members are eligible for full service pension allowances upon accumulating 30 years of eligibility service regardless of age. Absent 30 years of eligibility service, members must meet one of the following conditions to be eligible for full service pension allowances:

- age 62, & five years of eligibility service
- age 63, & four years of eligibility service
- age 64, & three years of eligibility service
- age 65 or older, & two years of eligibility service

RCPB Eligibility — Members are eligible for full service pension allowances when their combined age and eligibility service equals at least 90 years or they attain age 65 after 10 years of eligibility service.

ACPS Allowances — Service pension allowances equal 1.2% of AFC for the three highest consecutive years as an employee for each year of creditable service accrued prior to July 1, 1998, plus 1.8% of AFC for the three highest consecutive years as an employee for each year of creditable service accrued on and after July 1, 1998.

RCPB Allowances — Service pension allowances equal 1.5% of AFC for the five highest consecutive years as an employee for each year of creditable service on or after July 1, 2011.

Early Service Pension Allowances

ACPS Eligibility — Members are eligible for early service pension allowances upon attaining age 55 with at least 15 years of eligibility service.

ACPS Allowances — Early service pension allowances equal the amount payable for a full service pension reduced by 0.5% for each month by which the retirement date precedes the date on which the members reach age 62. The maximum reduction is 42 percent.

RCPB Eligibility — Members are eligible for early service pension allowances upon attaining age 60 with at least 15 years of eligibility service.

RCPB Allowances — Early service pension allowances equal the amount payable for a full service pension reduced by 0.5% for each month by which the retirement date precedes the date on which the members reach age 65. The maximum reduction is 30%.

Ordinary Disability Pension Allowances

Eligibility — ACPS and RCPB members are eligible for ordinary disability pension allowances upon completing five years of eligibility service and receiving certification from the Medical Board that they are permanently incapable of performing their necessary job functions.

Allowances — Ordinary disability pension allowances equal the full service pension allowances if the members are at least age 62 on the date of retirement. Otherwise, the allowances equal the full service pension allowances computed as though the members had continued to accrue service credits until age 62 without any change in the rate of earnable compensation.

Accidental Disability Pension Allowances

Eligibility — ACPS and RCPB members are eligible for accidental disability pension allowances if the Medical Board certifies that, in the course of their job performance and as the direct result of an accidental injury, they became totally and permanently disabled.

Allowances — Accidental disability pension allowances equal the sum of an annuity determined as the actuarial value of the mem-

bers' accumulated contributions, and 2/3 (66.7%) of AFC. Allowances may not exceed the members' AFC.

Death Benefits

Eligibility — To be eligible for death benefits, ACPS and RCPB members must have either accumulated at least one year of eligibility service prior to the date of death or died in the line of duty.

Benefits — The benefit provided upon death of ACPS members equals the members' annual earnable compensation on the date of death plus accumulated contributions. Under certain circumstances, surviving spouses who were named as sole primary beneficiaries may elect to receive either the aforementioned lump sum payment, or a monthly allowance calculated under Option 2 (100% survivor option). If at the time of death, the members had:

- accrued at least 25 years of eligibility service, or
- attained age 55 with at least 15 years of eligibility service, or
- attained age 62, then

the survivor's allowance is determined as if the members had been eligible to retire, and had in fact retired.

Special Death Benefit - Provides a special death benefit to the surviving spouse, dependent children, or dependent parents of employees killed in the line of duty equal to 2/3 of the deceased member's average final compensation.

Vested Pension Allowances

ACPS Eligibility — Members are eligible for vested pension allowances after separation from service and upon reaching age 62, provided that at least five years of eligibility service was accumulated prior to separation. Members may be eligible for reduced vested pension allowances upon attaining age 55 with at least 15 years of eligibility service. Vested allowances are reduced by 0.5% for each month by which the allowance commencement date precedes the date on which the members attain age 62.

ACPS Allowances — Vested allowances equal the normal service pension allowances computed on the basis of the members' accumulated creditable service and AFC at the point of separation. If members do not withdraw their contributions, and die before attaining age 62, their accumulated contributions are returned to the designated beneficiary.

RCPB Eligibility — Members are eligible for vested pension allowances after separation from service and upon reaching age 65, provided that at least 10 years of eligibility service was accumulated prior to separation. Members may be eligible for reduced vested pension allowances upon attaining age 60 with at least 15 years of eligibility service. Vested allowances are reduced by 0.5% for each month by which the allowance commencement date precedes the date on which the members attain age 65

RCPB Allowances — Vested allowances equal the normal service pension allowances computed on the basis of the members' accumulated creditable service and AFC at the point of separation. If members do not withdraw their contributions, and die before attaining age 65, their accumulated contributions are returned to the designated beneficiary

Cost-of-Living Adjustments

Retirement allowances for ACPS members are adjusted each year based on the Consumer Price Index. COLAs are effective July 1st of each year and, are compounded annually. Effective July 1, 1998, the adjustment is capped at a maximum 3% and is applied to all benefits which have been in payment for one year.

For ACPS and RCPB retirement allowances attributable to service earned on or after July 1, 2011, the adjustment is capped at the lesser of 2.5% or the increase in CPI if the most recent calendar year market value rate of return was greater than or equal to the assumed rate. For fiscal year 2013, the assumed rate of return is 7.75%, as approved by the Board of Trustees. The adjustment is capped at the lesser of 1% or the increase in CPI if, for fiscal year 2013, the market value return was less than the assumed rate of 7.75%.

In years in which COLAs would be less than zero due to a decline in the CPI, retirement allowances will not be adjusted. COLAs in succeeding years are adjusted until the difference between the negative COLA that would have applied and the zero COLA is fully recovered.

Optional Forms of Payment

Option 1: Payment guarantees a cash reserve equal to the excess of the present value of the pension allowance at the date of retirement minus the total amount of payments (less COLAs) made to the date of death.

Option 2: 100% joint and survivor annuity.

Option 3: 50% joint and survivor annuity.

Option 4: Payment guarantees a minimum return of the members' accumulated contributions.

Option 5: 100% joint and survivor annuity with adjustment to maximum benefit if beneficiary predeceases retiree.

Option 6: 50% joint and survivor annuity with adjustment to maximum benefit if beneficiary predeceases retiree.

Except for a spouse or disabled child, the beneficiary designated under Option 2 or 5 cannot be more than 10 years younger than the retiree (IRS regulation).

Workers' Compensation Benefits Reduction

Disability retirement allowances are generally reduced by workers' compensation benefits paid after retirement if, and to the extent that, such benefits are for the same injury and the same period of time for which the retirement benefits were paid. The workers' compensation benefit reduction cannot reduce any retirement allowance to less than the amount necessary to cover the retiree's monthly health insurance premiums.

THE EMPLOYEES' RETIREMENT SYSTEM (ERS) was established on October 1, 1941 and is administered in accordance with the State Personnel and Pensions Article of the Annotated Code of Maryland. Prior to January 1, 1980, membership in the ERS was a condition of employment for all State employees (other than those eligible for participation in another system) and employees of participating governmental units. For certain elected and appointed officials, participation in ERS was optional.

Effective January 1, 1980, the ERS was effectively closed to new membership when the Employees' Pension System (EPS) was established. Individuals who were members of the ERS on December 31, 1979, continue their ERS membership unless, and until, they elect to transfer to the EPS, prior to January 1, 2005..

Member Contributions

All member contributions to the ERS are based on a specified percentage of annual earnable compensation. Members who elected in 1984 to receive unlimited future COLAs contribute 7% if enrolled after June 30, 1973. Members enrolled before July 1, 1973 contribute the lesser of 7% or 2% more than the rate of contribution in effect on their date of enrollment. This option is referred to as Selection A (Unlimited COLA).

Members who elected in 1984 to receive limited future COLAs contribute 5% if enrolled after June 30, 1973. Members enrolled before July 1, 1973 contribute the lesser of 5% or the rate of contribution in effect on the date of their enrollment. This option is referred to as Selection B (Limited COLA).

Members who are State employees as well as members whose employer elected to participate in the Employees' Pension System contribute in accordance with the provisions of the Employees' Pension System elected by the employer. This option is referred

to as Selection C (Combination Formula). The employee contribution for Section C, Part 2 is 5%.

Members who are in Selection A, B, or C will remain in these until their retirement. As of January 1, 2005, they were no longer permitted to change selections.

Service Retirement Allowances

Eligibility — ERS members are eligible for full service retirement allowances upon attaining age 60 or upon accumulating 30 years of eligibility service regardless of age.

Allowances — Full service retirement allowances equal 1/55 (1.818%) of the highest three years' AFC multiplied by the number of years and months of accumulated creditable service. Allowances for members who fail to make all required contributions are reduced by the actuarial equivalent of the total unpaid contributions plus interest to date of retirement.

Early Retirement Allowances

Eligibility — ERS members are eligible for early service retirement allowances upon accumulating at least 25 years of eligibility service prior to attaining age 60.

Allowances — Early service retirement allowances equal the amount payable for a full service retirement reduced by 0.5% for each month by which the retirement date precedes the earlier of the date on which the member reaches age 60, or the date on which the member would have completed 30 years of service. The maximum reduction for an ERS member is 30 percent. The maximum reduction for an ERS member who elected Selection C is 30% on the first part and 42% on the second part of the benefit calculation.

Ordinary Disability Retirement Allowances

Eligibility — ERS members are eligible for ordinary disability retirement allowances upon completing five years of eligibility service and receiving certification from the Medical Board that they are permanently incapable of performing their necessary job functions.

Allowances — Ordinary disability retirement allowances generally equal 1/55 (**1.818%**) of the highest three years' AFC multiplied by the number of years of accumulated creditable service. However, the ordinary disability benefits can be no greater than **1.818%** of AFC for each year of creditable service the members would have received had they continued to work until age 60.

Accidental Disability Retirement Allowances

Eligibility — ERS members are eligible for accidental disability benefits if the Medical Board certifies that, in the course of job performance and as the direct result of an accidental injury, they became totally and permanently disabled.

Allowances — Accidental disability allowances equal the sum of an annuity determined as the actuarial value of the members' accumulated contributions, plus 2/3 (66.7%) of AFC. Allowances may not exceed the members' AFC.

Death Benefits

Eligibility — To be eligible for death benefits, ERS members must have either accumulated at least one year of eligibility service prior to the date of death or died in the line of duty.

Benefits — The benefit provided upon death for ERS members equals the members' annual earnable compensation at the time of death plus accumulated contributions. Under certain circumstances, surviving spouses who were named sole primary beneficiaries may elect to receive either the aforementioned lump sum payment, or a monthly allowance calculated under Option 2 (100% survivor option).

Special Death Benefit - Provides a special death benefit to the surviving spouse, dependent children, or dependent parents of employees killed in the line of duty equal to 2/3 of the deceased member's average final compensation.

Vested Retirement Allowances

Eligibility — ERS members are eligible for vested retirement allowances after separation from service and upon reaching normal retirement age, provided that at least five years of eligibility service was accumulated prior to separation.

Allowances — Vested allowances equal the normal service retirement allowances computed on the basis of the members' accumulated creditable service and AFC at the point of separation.

If members do not withdraw their contributions, and die before attaining age 60, their accumulated contributions are returned to the designated beneficiary.

Cost-of-Living Adjustments

Retirement allowances are adjusted each year based on the Consumer Price Index. COLAs are effective July 1st of each year and are applied to all allowances payable for the year. However, the method by which the annual COLAs are computed depends upon elections made by members who were active on July 1, 1984 (or within 90 days of returning to service for members who were inactive on July 1, 1984). Each option is explained below.

Selection A (Unlimited COLA) — ERS members who elected Selection A, agreed to contribute no more than 7% of earnable compensation in return for unlimited annual COLAs after retirement.

Selection B (Limited COLA) — ERS members who elected Selection B, agreed to contribute no more than 5% of earnable compensation in return for COLAs that are limited to 5% annually after retirement.

Selection C (Combination Formula) — ERS members who elected Selection C, agreed to contribute at the required EPS employee contribution rate of earnable compensation in return for

COLAs that, similar to the retirement benefit, are divided into two parts:

Part 1: The COLAs are unlimited unless the members elected Selection B prior to electing Selection C, in which case COLAs are limited to 5%.

Part 2: Generally, the COLAs are limited to 3%; however, if the employers participate in the Non-Contributory Pension System, the COLA's are limited to 3% of the initial allowance.

Optional Forms of Payment

Option 1: Payment guarantees a cash reserve equal to the excess of the present value of the retirement allowance at the date of retirement minus the total amount of payments (less COLA's) made to the date of death.

Option 2: 100% joint and survivor annuity.

Option 3: 50% joint and survivor annuity.

Option 4: Payment guarantees a minimum return of the members' accumulated contributions.

Option 5: 100% joint and survivor annuity with adjustment to maximum benefit if beneficiary predeceases retiree.

Option 6: 50% joint and survivor annuity with adjustment to maximum benefit if beneficiary predeceases retiree.

Except for a spouse or disabled child, the beneficiary designated under Option 2 or 5 cannot be more than 10 years younger than the retiree (IRS regulation).

Workers' Compensation Benefits Reduction

Disability retirement allowances, except for employees of participating governmental units, are generally reduced by workers' compensation benefits paid after retirement if, and to the extent that, such benefits are for the same injury and the same period of time for which the retirement benefits are payable. The workers' compensation benefit reduction cannot reduce any retirement allowance to less than the amount necessary to cover the retiree's monthly health insurance premiums.

Miscellaneous Provisions for Members of the Maryland General Assembly

For individuals who are members of the Legislative Pension Plan on or before December 31, 2014, the retirement allowance is equal to 3.00% of current legislative salary for each year of creditable service (maximum 22 years, 3 months) upon attainment of age 60 and at least eight years of creditable service. Reduced benefits are payable upon attainment of age 50 and completion of 8 years of creditable service. The benefit is reduced by .005 for each month between ages 50 and 60 that the early retirement date precedes age 60.

An individual who is a member of the Legislative Pension Plan on or before December 31, 2014, with eight years of creditable service who has not attained age 60 may leave contributions in the

system and receive a retirement allowance at age 60, or a reduced benefit on or after age 50. If termination occurs before the completion of eight years of creditable service, the member may make contributions equal to the member's and the State's required contributions until the member would have completed eight years of eligibility service, (and receive 24% of creditable compensation at age 60 or a reduced benefit on or after age 50).

For individuals who join the Legislative Pension Plan on or after January 1, 2015, the retirement allowance is equal to 3.00% of current legislative salary for each year of creditable service (maximum 22 years 3 months) upon attainment of age 62 and at least eight years of creditable service. Reduced benefits are payable upon attainment of age 55 and completion of 8 years of creditable service. The benefit is reduced by .005 for each month between ages 55 and 62 that the early retirement date precedes age 62.

An individual who joins the Legislative Pension Plan on or after January 1, 2015, accrues eight years of creditable service, and who has not attained age 62 may leave contributions in the system and receive a retirement allowance at age 62, or a reduced benefit on or after age 55. If termination occurs before the completion of eight years of creditable service, the member may make contributions equal to the member's and the State's required contributions until the member would have completed eight years of eligibility service, (and receive 24% of creditable compensation at age 62 or a reduced benefit on or after age 55).

A member who is certified as disabled by the Medical Board and approved by the Board of Trustees for a disability retirement benefit after attaining at least 8 years of creditable service may resign from the General Assembly and immediately receive a retirement allowance based on their creditable service.

The member's surviving spouse receives 50% of the member's retirement allowance if the member i) is retired, ii) is eligible for a deferred vested benefit, or iii) is active and has eight years of creditable service. The surviving spouse of a member who had accrued less than eight years of creditable service and dies in office shall receive a lump sum death benefit of accumulated contributions plus an amount equal to the deceased's annual earnable compensation at the time of death.

Beginning January 1, 2015, members contribute 7% of their earnable compensation during their first 22 years, 3 months of service with contributions earning interest at 4% per year.

All retirement allowances are recalculated each time the salaries for current members of the General Assembly are increased.

Miscellaneous Provisions for State Correctional Officers

Correctional officers serving in the first six job classifications, maximum security attendants at Clifton T. Perkins Hospital Center, a

Correctional Dietary, Maintenance or Supply Officer, Maryland Correctional Enterprise Officers and Trainees, Plant Supervisors, Plant Managers, and Regional Managers; and Laundry Officers participate under this System. Effective July 1, 2006, Maryland counties may elect to participate on behalf of their detention center officers. Additionally, beginning July 1, 2014, individuals serving as a security chief, a facility administrator, an assistant warden or a warden will participate in this System.

The retirement allowance for an individual who is a correctional officer on or before June 30, 2011, is 1/55th of average final compensation for the three highest years as a member for each year of creditable service. The retirement allowance for an individual who is a correctional officer on or after July 1, 2011, is 1/55th of average final compensation for the five highest years as a member for each year of creditable service.

An immediate service retirement allowance is payable to a correctional officer if, on or before the retirement, the officer has completed 20 years of eligibility service and served at least five years in one of the positions noted above immediately preceding retirement. For individuals who are correctional officers on June 30, 2011, the vested retirement allowance of a correctional officer who was in the first six job classifications for at least 5 years preceding retirement commences at age 55; for the security attendant it commences at age 60. For individuals who become correctional officers on or after July 1, 2011, the vested retirement allowance for a correctional officer who was in the first six job classifications for at least 10 years preceding retirement commences at age 55; for the security attendant it commences at age 60.

For benefits attributable to service on or after July 1, 2011, the Cost-of-living adjustment for Correctional Officers is capped at the lesser of 2.5% or the increase in CPI if the most recent calendar year market value rate of return was greater than or equal to the assumed rate of investment return from the most recent actuarial valuation. The adjustment is capped at the lesser of 1% or the increase in CPI if the most recent calendar year market value rate of return was less than the assumed rate of investment return from the most recent actuarial valuation.

EMPLOYEES' PENSION SYSTEM

THE EMPLOYEES' PENSION SYSTEM (EPS)

The Employees' Pension System (EPS) is administered in accordance with the State Personnel and Pension Article of the Annotated Code. The EPS consists of four parts:

Non-Contributory Pension System (NCPS)

The NCPS was established on January 1, 1980 and consists only of those participating employers that did not elect membership in the Employees' Contributory Pension System (ECPS) or the Alternate Contributory Pension Selection (ACPS).

Employees' Contributory Pension System (ECPS)

The ECPS was established as of July 1, 1998 and consists of those participating employers that elected participation in the ECPS effective July 1, 1998 through July 1, 2005 and did not elect membership in the ACPS as of July 1, 2006. Employees who transferred from the ERS to the EPS after April 1, 1998 were not eligible for the benefits of the ECPS.

Alternate Contributory Pension Selection (ACPS)

The ACPS was established as of July 1, 2006 and consists of all eligible State employees and those participating employers that elected participation in the ACPS effective July 1, 2006. Employees who transferred from the ERS to the EPS after April 1, 1998 were not eligible for the benefits of the ACPS.

Reformed Contributory Pension Benefit (RCPB)

The RCPB was established as of July 1, 2011 and consists of all State employees and, employees of participating governmental units enrolling in the EPS on or after July 1, 2011. It does not apply to employees of participating governmental units participating in the NCPS or ECPS who in enroll in the Employees' Pension System on or after July 1, 2011.

Member Contributions

NCPS — Members were required to contribute 5% of earnable compensation in excess of the social security wage base.

ECPS — Members are required to contribute 2% of earnable compensation.

ACPS — Members were required to contribute 7% of earnable compensation.

RCPB — Members were required to contribute 7% of earnable compensation.

Service Pension Allowances

NCPS, ECPS, and ACPS Eligibility — Members are eligible for full service pension allowances upon accumulating 30 years of eligibility service regardless of age. Absent 30 years of eligibility service, members must meet one of the following conditions to be eligible for full service pension allowances:

- age 62, & five years of eligibility service
- age 63, & four years of eligibility service
- age 64, & three years of eligibility service
- age 65 or older, & two years of eligibility service

RCPB Eligibility - Members are eligible for full service pension allowances when their combined age and eligibility service equals at least 90 years or they attain age 65 after 10 years of eligibility service.

Allowances

NCPS - Full service pension allowance equals .8% of the highest three consecutive years AFC up to the SSIL, plus 1.5% of the AFC in excess of the SSIL, multiplied by the number of years of accumulated creditable service. For purposes of computing pension allowances, the SSIL is the average of the social security wage bases for the 35 years immediately prior to the year of retirement.

ECPS - Full service pension allowance equals 1.2% of AFC for the three highest consecutive years as an employee for each year of creditable service accrued prior to July 1, 1998 plus 1.4% of the AFC for the three highest consecutive years as an employee for each year of creditable service accrued on or after July 1, 1998.

ACPS - Full service pension allowance equals 1.2% of AFC for the three highest consecutive years as an employee for each year of creditable service accrued prior to July 1, 1998 plus 1.8% of the AFC for the three highest consecutive years as an employee for each year of creditable service accrued on or after July 1, 1998.

RCPB - Full service pension allowance equals 1.5% of AFC for the five highest consecutive years as an employee for each year of creditable service accrued on or after July 1, 2011.

Early Service Pension Allowances

NCPS, ECPS, and ACPS Eligibility — Members are eligible for early service pension allowances upon attaining age 55 with at least 15 years of eligibility service.

NCPS, ECPS, and ACPS Allowances — Early service pension allowances equal the amount payable for a full service pension reduced by 0.5% for each month by which the retirement date precedes the date on which the member reaches age 62. The maximum reduction is 42 percent.

RCPB Eligibility — Members are eligible for early service pension allowances upon attaining age 60 with at least 15 years of eligibility service.

RCPB Allowances — Early service pension allowances equal the amount payable for a full service pension reduced by .5% for each month by which the retirement date precedes the date on which the members reach age 65. The maximum reduction is 30%.

Ordinary Disability Pension Allowances

Eligibility — All EPS members are eligible for ordinary disability pension allowances upon completing five years of eligibility service and receiving certification from the Medical Board that they are permanently incapable of performing their necessary job functions.

Allowances — Ordinary disability pension allowances equal the full service pension allowances if the members are at least age 62 on the date of retirement. Otherwise, the allowances equal the full service pension allowances computed as though the members had continued to accrue service credits until age 62 without any change in the rate of earnable compensation.

Accidental Disability Pension Allowances

Eligibility — All EPS members are eligible for accidental disability pension allowances if the Medical Board certifies that, in the course of their job performance and as the direct result of an accidental injury, they became totally and permanently disabled.

Allowances — Accidental disability pension allowances equal the sum of an annuity determined as the actuarial value of the members' accumulated contributions, and 2/3 (66.7%) of AFC.

Death Benefits

Eligibility — To be eligible for death benefits, EPS members must have either accumulated at least one year of eligibility service prior to the date of death or died in the line of duty.

Benefits — The benefit provided upon death of all EPS members equals the members' annual earnable compensation on the date of death plus accumulated contributions. Under certain circumstances, surviving spouses who were named sole primary beneficiaries may elect to receive either the aforementioned lump sum payment, or a monthly allowance calculated as payment under Option 2 (100% survivor option).

If at the time of death, the members had:

- accrued at least 25 years of eligibility service, or
- attained age 55 with at least 15 years of eligibility service, or
- attained age 62, then

the survivor's allowance is determined as if the members had been eligible to retire.

Special Death Benefit - Provides a special death benefit to the surviving spouse, dependent children, or dependent parents of employees killed in the line of duty equal to 2/3 of the deceased member's average final compensation.

Vested Pension Allowances

NCPS, ECPS, and ACPS Eligibility — Members are eligible for

vested pension allowances after separation from service and upon reaching age 62, provided that at least five years of eligibility service was accumulated prior to separation. Members may be eligible for reduced vested pension allowances upon attaining age 55 with at least 15 years of eligibility service. Vested allowances are reduced by 0.5% for each month by which the allowance commencement date precedes the date on which the members attain age 62.

NCPS, ECPS, and ACPS Allowances — Vested allowances equal the normal service pension allowances computed on the basis of the members' accumulated creditable service and AFC at the point of separation. Members who elect to withdraw their accumulated contributions, remain eligible to receive the employer-provided share of the vested benefit. If members do not withdraw their contributions, and die before attaining age 62, their accumulated contributions are returned to the designated beneficiary.

RCPB Eligibility — Members are eligible for vested pension allowances after separation from service and upon reaching age 65, provided that at least 10 years of eligibility service was accumulated prior to separation. Members may be eligible for reduced vested pension allowances upon attaining age 60 with at least 15 years of eligibility service. Vested allowances are reduced by 0.5% for each month by which the allowance commencement date precedes the date on which the members attain age 65.

RCPB Allowances — Vested allowances equal the normal service pension allowances computed on the basis of the members' accumulated creditable service and AFC at the point of separation. If members do not withdraw their contributions, and die before attaining age 65, their accumulated contributions are returned to the designated beneficiary.

Cost of Living Adjustments

Retirement allowances for all EPS members are adjusted each year based on the Consumer Price Index. The Cost of Living Adjustments (COLA) are effective July 1st of each year.

For retirement allowances attributable to service earned on or before June 30, 2011:

NCPS - Limits the increase the retiree may receive to a maximum of 3% of the initial allowance annually.

ECPS - Limits the increase the retiree may receive to a maximum of 3%, compounded annually

ACPS - Limits the increase the retiree may receive to a maximum of 3%, compounded annually

For any EPS retirement allowance attributable to service earned on or after July 1, 2011, the adjustment is capped at the lesser of 2.5% or the increase in CPI if the most recent calendar year market value rate of return was greater than or equal to the assumed rate. For fiscal year 2013, the assumed rate of return is 7.75%, as approved by the Board of Trustees. The adjustment is capped at the lesser of 1% or the increase in CPI if, for fiscal 2013, the market value return was less than the assumed rate of 7.75%.

In years in which COLAs would be less than zero due to a decline in the CPI, retirement allowances will not be adjusted. COLAs in succeeding years are adjusted until the difference

between the negative COLA that would have applied and the zero COLA is fully recovered.

Optional Forms of Payment

- Option 1:** Payment guarantees a cash reserve equal to the excess of the present value of the pension allowance at the date of retirement minus the total amount of payments (less COLAs) made to the date of death.
- Option 2:** 100% joint and survivor annuity.
- Option 3:** 50% joint and survivor annuity.
- Option 4:** Payment guarantees a minimum return of the members' accumulated contributions.
- Option 5:** 100% joint and survivor annuity with adjustment to maximum benefit if beneficiary predeceases retiree.
- Option 6:** 50% joint and survivor annuity with adjustment to maximum benefit if beneficiary predeceases retiree.

Except for a spouse or disabled child, the beneficiary designated under Option 2 or 5 cannot be more than 10 years younger than the retiree (IRS regulation).

Workers' Compensation Benefits Reduction

Disability retirement allowances, except for retirees of a participating governmental unit, are generally reduced by workers' compensation benefits paid after retirement if, and to the extent that, such benefits are for the same injury and the same period of time for which the retirement benefits were paid.

The workers' compensation benefit reduction cannot reduce any retirement allowance to less than the amount necessary to cover the retiree's monthly health insurance premiums.

JUDGES' RETIREMENT SYSTEM

Retirees & Beneficiaries		
Number	395	378
Average Age	76.7	76.7
Average Monthly Benefit	\$ 6,057	\$ 5,847

THE JUDGES' RETIREMENT SYSTEM (JRS) was established on June 30, 1969 and is administered in accordance with the State Personnel and Pensions Article of the Annotated Code of Maryland. Membership is a condition of employment for all District Court, Circuit Court, Court of Appeals and Court of Special Appeals judges. Full-time masters in chancery and masters in juvenile causes appointed prior to June 30, 1989 and Workers' Compensation Commission judges are also members of the JRS.

Member Contributions

Beginning July 1, 2012, all members contribute 8% of annual earnable compensation during the first 16 years of service. After accruing 16 years of credit, no member contributions are required.

Service Retirement Allowances

Eligibility — JRS members who are members before July 1, 2012, are eligible for full service retirement allowances upon attaining age 60 or upon retirement by order of the Court of Appeals, with at least 16 years of eligibility service.

Individuals who become JRS members on or after July 1, 2012, are eligible for full service retirement allowances upon attaining age 60 and accruing at least five years of eligibility service, or upon retirement by order of the Court of Appeals, with at least 16 years of eligibility service.

All JRS members must retire at age 70.

Allowances — Full service retirement allowances equal 2/3 (66.7%) of the current salary for an active judge holding a comparable position. If members retire with less than 16 years of eligibility service, the annual retirement allowance is prorated accordingly.

Early Retirement Allowances

Eligibility — JRS members are not eligible for early service retirement allowances.

Disability Retirement Allowances

Eligibility — JRS members are eligible for disability retirement allowances upon receiving certification from the Medical Board that they are permanently incapable of performing their necessary job functions.

Allowances — The disability retirement allowances for JRS members generally equal the full service retirement allowance based on the members' actual length of service. However, for members completing at least three years of eligibility service, the disability benefit will be no less than 1/3 (33.3%) of the members' annual earnable compensation at the time of retirement.

Death Benefits

Eligibility — All JRS members, and former members, are eligible for death benefits regardless of age or length of service.

Benefits — The benefit provided upon death for JRS members, former members or retirees equals 50% of a service retirement allowance payable to the surviving spouse.

Special provisions apply in circumstances where deceased JRS members, former members or retirees have no surviving spouses, but are survived by a minor child (under age 18). In the event that deceased JRS members or former members are not survived by spouses or minor children, then all accumulated contributions are refunded to the estate

Vested Retirement Allowances

Eligibility — JRS members who are members before July 1, 2012, are immediately vested. Members leaving the bench before attaining age 60 are eligible to receive their service retirement allowances commencing upon attaining age 60.

Individuals who become JRS members on or after July 1, 2012, are eligible for vested retirement allowances after separation from service and upon reaching age 60, provided that at least five years of eligibility service was accumulated prior to separation.

Allowances — Vested allowances equal the normal service retirement allowances computed on the basis of the members' accumulated creditable service and the **salary** of active judges holding comparable positions.

JRS members may elect to withdraw their accumulated contributions within six months of separation in lieu of receiving vested retirement allowances.

Optional Forms of Payment

Generally, JRS retirement allowances are paid as a 50% joint and survivor annuity to the retirees' surviving spouse, or if there is no spouse, to any child under age 18. If the retirees have neither a living spouse nor children under 18 at retirement, retirees may select any one of the following six payment options.

Option 1: Payment guarantees a cash reserve equal to the excess of the present value of the retirement allowance at the date of retirement minus the total amount of payments made to the date of death.

Option 2: 100% joint and survivor annuity.

Option 3: 50% joint and survivor annuity.

Option 4: Payment guarantees a minimum return of the members' accumulated contributions.

Option 5: 100% joint and survivor annuity with adjustment to maximum benefit if beneficiary predeceases retiree.

Option 6: 50% joint and survivor annuity with adjustment to maximum benefit if beneficiary predeceases retiree.

Once retired, neither the option nor designated beneficiary(ies) may be changed. Except for a spouse or disabled child, the beneficiary designated under Option 2 or 5 cannot be more than 10 years younger than the retiree (IRS regulation).

Pension Changes

Effective July 1, 2012, the member contribution for all members of the JRS increases to 8%.

Effective July 1, 2012, for new members of the JRS vesting will require five years of eligibility service.

THE STATE POLICE RETIREMENT SYSTEM (SPRS) was established on July 1, 1949 and is administered in accordance with the State Personnel and Pensions Article of the Annotated Code of Maryland. Membership is a condition of employment for all uniformed officers of the Maryland State Police. The Superintendent of the Maryland State Police may elect membership in either the SPRS or the EPS.

Member Contributions

All SPRS members contribute 8% of annual earnable compensation during employment.

Service Retirement Allowances

Eligibility — SPRS members who are members on or before June 30, 2011, are eligible for full service retirement allowances upon attaining age 50 or upon accumulating 22 years of eligibility service regardless of age. Individuals who become members on or after July 1, 2011, are eligible for full service retirement allowances upon accumulating 25 years of eligibility service or attainment of age 50. Except for the Superintendent, all SPRS members must retire at age 60.

Allowances — For individuals who are members on or before June 30, 2011, a full service retirement allowance equals 2.55% of AFC for the five highest years as a member for each year of creditable service, up to a maximum 71.4% of AFC (28 years). Individuals who become members on or after July 1, 2011, will receive a full service retirement allowance equal to 2.55% of AFC for the five highest years as a member for each of the first 29 years of creditable service. Allowances for members who fail to make all required contributions are reduced by the actuarial equivalent of the total unpaid contributions plus interest to date of retirement.

Early Retirement Allowances

Eligibility — SPRS members are not eligible for early service retirement allowances.

Ordinary Disability Retirement Allowances

Eligibility — SPRS members are eligible for ordinary disability retirement allowances upon completing five years of eligibility service and receiving certification from the Medical Board that they are permanently incapable of performing their necessary job functions.

Allowances — Ordinary disability retirement allowances generally equal 2.55% of the AFC multiplied by the number of years of creditable service up to a maximum of 28 years. The minimum ordinary disability retirement allowance is 35% of AFC.

Special Disability Retirement Allowances

Eligibility — SPRS members are eligible for special disability benefits if the Medical Board certifies that they became totally and permanently incapacitated for duty arising out of or in the actual performance of duty.

Allowances — Special disability allowances equal the sum of an annuity determined as the actuarial value of the members' accumulated contributions, and 2/3 (66.7%) of AFC. Allowances may not exceed the members' AFC.

Ordinary Death Benefits

Eligibility — To be eligible for ordinary death benefits, SPRS members must have accumulated at least one but less than two years of eligibility service prior to the date of death.

Benefits — The ordinary death benefit equals the members' annual earnable compensation at time of death plus accumulated contributions.

Special Death Benefits

Members in Service

Eligibility — To be eligible for special death benefits, SPRS members in service must have accumulated at least two years of eligibility service prior to the date of death or died in the line of duty.

Benefits — The special benefit provided upon the death of SPRS members in service equals 50% of the members' annual earnable compensation at time of death paid as an annuity plus return of accumulated contributions. In cases where the deceased members

are not survived by a spouse, the decedents' children or dependent parents, if any, will continue to receive an annuity equal to 50% of the members' annual earnable compensation until the youngest child reaches age 18, or for the life of each dependent parent. The special death benefit for troopers killed in the line of duty is 2/3 (66.7%) of AFC.

Survivor Benefit

Eligibility — To be eligible for survivor benefits, SPRS retirees must have retired on either a service retirement allowance or a disability allowance.

Benefits — The survivor benefit provided upon the death of an SPRS retiree equals 80% of the retirees' retirement allowance, paid as an annuity. In cases where the deceased members are not survived by a spouse, the decedents' children, if any, will continue to receive 80% of the retirees' allowance until the youngest child reaches age 18.

Vested Retirement Allowances

Eligibility — Individuals who are SPRS members on or before June 30, 2011, are eligible for vested retirement allowances after separation from service and upon reaching age 50, provided that at least five years of eligibility service was accumulated prior to separation. Individuals who are SPRS members on or after July 1, 2011, are eligible for vested retirement allowances after separation from service and upon reaching age 50, provided that at least 10 years of eligibility service was accumulated prior to separation.

Allowances — Vested allowances equal the normal service retirement allowances computed on the basis of the members' accumulated creditable service and AFC at the point of separation. SPRS members may elect to withdraw their accumulated contributions within two years of separation in lieu of receiving vested retirement allowances. If members do not withdraw their contributions, and die before attaining age 50, their accumulated contributions are returned to the designated beneficiary.

Cost-of-Living Adjustments

Retirement allowances attributable to service earned on or before June 30, 2011, are adjusted each year based on the Consumer Price Index.

For retirement allowance attributable to service earned on or after July 1, 2011, the adjustment is capped at the lesser of 2.5% or the increase in CPI if the most recent calendar year market value rate of return was greater than or equal to the assumed rate. For fiscal year 2013, the assumed rate of return is 7.75%, as approved by the Board of Trustees. The adjustment is capped at the lesser of 1% or the increase in CPI if, for fiscal year 2013, the market value return was less than the assumed rate of 7.75%.

In years in which COLAs would be less than zero due to a decline in the CPI, retirement allowances will not be adjusted. COLAs in succeeding years are adjusted until the difference between the negative COLA that would have applied and the zero COLA is fully recovered.

COLAs are effective July 1st of each year and are applied to all allowances payable for the year.

Optional Forms of Payment

Generally, SPRS retirement allowances are paid as an 80% joint and survivor annuity to the retirees' spouse, or if there is no spouse, to any child under age 18. If the retirees have neither a living spouse nor children under 18 at retirement, the retirees may select any one of the following six payment options.

Option 1: Payment guarantees a cash reserve equal to the present value of the retirement allowance at the date of retirement minus the total amount of payments (less COLAs) made to the date of death.

Option 2: 100% joint and survivor annuity.

Option 3: 50% joint and survivor annuity.

Option 4: Payment guarantees a minimum return of the members' accumulated contributions.

Option 5: 100% joint and survivor annuity with adjustment to maximum benefit if beneficiary predeceases retiree.

Option 6: 50% joint and survivor annuity with adjustment to maximum benefit if beneficiary predeceases retiree.

Except for a spouse or disabled child, the beneficiary designated under Option 2 or 5 cannot be more than 10 years younger than the retiree (IRS regulation).

Workers' Compensation Benefits Reduction

Disability retirement allowances are generally reduced by workers'

compensation benefits paid after retirement if, and to the extent that, such benefits are for the same injury and the same period of time for which the retirement benefits are payable. The workers' compensation benefit reduction cannot reduce any retirement allowance to less than the amount necessary to cover the retiree's monthly health insurance premiums.

Deferred Retirement Option Program

SPRS members are eligible to participate in a Deferred Retirement Option Program (DROP). For SRPS members who enter DROP on or before June 30, 2011, they must have at least 22 years of creditable service, but less than 28 years, and be under age 60. For SRPS members who enter DROP on or after July 1, 2011, they must have at least 22 years of creditable service, but less than 29 years, and be under age 60. The maximum period of participation is 4 years.

For members who enter the DROP on or before June 30, 2011, the SPRS member is deemed retired and the retirement allowance is placed in an account earning 6% interest per year, compounded monthly. For members who enter the DROP on or after July 1, 2011, the SPRS member is deemed retired and the retirement allowance is placed in an account earning 4% interest per year, compounded annually. At the end of the DROP period, the lump sum held in the DROP account is paid to the SPRS retiree. The SPRS member must end employment and fully retire at the end of the DROP period.

LAW ENFORCEMENT OFFICERS' PENSION SYSTEM

THE LAW ENFORCEMENT OFFICERS PENSION SYSTEM (LEOPS)

was established on July 2, 1990 and is administered in accordance with the State Personnel and Pensions Article of the Annotated Code of Maryland. Membership in the LEOPS is a condition of employment for all uniformed law enforcement officers of the Maryland State Department of Natural Resources; the Maryland Investigative Services Unit; the Maryland Transportation Authority Police Force; the Baltimore City Sheriff's Department; the State Fire Marshall's Office; the University System of Maryland Police Force; Morgan University Police Force; the BWI Airport Fire and Rescue Department; the Department of General Services Police Force; the Department of Health and Mental Hygiene; the Motor Vehicle Administration; and the Department of Labor, Licensing, and Regulation; the State Department of Elections; Field Enforcement Bureau; Firefighters for Martin's Airport Aviators employed by the Department of State Police. In addition, membership includes law enforcement officers, firefighters, and paramedics employed by a governmental unit that elects to participate in LEOPS.

The LEOPS consists of two separate components — a retirement plan (closed to new members January 1, 2005) and a pension plan. Retirement plan provisions are applicable to those officers who, on the date they elected to participate in the LEOPS, were

members of ERS (closed as of January 1, 2005). Pension plan provisions are applicable to all other LEOPS members.

Member Contributions

All member contributions to the LEOPS are based on the members' annual earnable compensation. Members subject to retirement plan provisions that elected to receive unlimited future COLAs contribute 7%. This option is referred to as Selection A (Unlimited COLA).

Members subject to retirement plan provisions that elected to receive limited future COLAs contribute 5%. This option is referred to as Selection B (Limited COLA).

Beginning July 1, 2011, members subject to pension plan provisions contribute 6% of annual earnable compensation during employment. Beginning July 1, 2012, member contributions will increase to 7% of earnable compensation.

Service Retirement Allowances

Eligibility — LEOPS members are eligible for full service retirement allowances upon attaining age 50 or upon accumulating 25 years of eligibility service regardless of age.

Allowances — For members subject to the retirement plan provisions, full service retirement allowances equal 2.3% of AFC for the first 30 years of creditable service, plus 1.0% of AFC for each additional year.

For members subject to the pension system provisions who became members of LEOPS on or before June 30, 2011, full service pension allowances equal 2.0% of AFC for the three highest consecutive years as an employee, up to a maximum benefit of 60% of AFC (30 years of credit). For members subject to the pension system provisions who become members of LEOPS on or after July 1, 2011, full service pension allowances equal 2.0% of AFC for the five highest consecutive years as an employee, up to a maximum benefit of 60% of AFC (30 years of credit)

Allowances for members who fail to make all required contributions are reduced by the actuarial equivalent of the total unpaid contributions plus interest to the date of retirement.

Early Retirement Allowances

Eligibility — LEOPS members are not eligible for early service retirement allowances.

Ordinary Disability Retirement Allowances

Eligibility — LEOPS members are eligible for ordinary disability retirement allowances upon completing five years of eligibility service and receiving Medical Board certification as to their permanent incapacity to perform their necessary job functions.

Allowances — Ordinary disability retirement allowances for LEOPS members subject to retirement plan provisions equal the greater of the normal service retirement allowance or 25% of AFC.

Ordinary disability retirement allowances for LEOPS members subject to pension plan provisions equal the full service pension allowance if the member is at least age 50 on the date of retirement. Otherwise, the allowances equal full service pension allowances computed as though the member had continued to work until age 50 without any change in the rate of earnable compensation.

Accidental Disability Retirement Allowances

Eligibility — LEOPS members are eligible for accidental disability benefits if the Medical Board certifies that they became totally and permanently incapacitated for duty arising out of or in the actual performance of duty.

Allowances — Accidental disability allowances equal the sum of an annuity determined as the actuarial value of the members' accumulated contributions, and 2/3 (66.7%) of AFC. Allowances may not exceed the members' AFC.

Ordinary Death Benefits

Eligibility — To be eligible for ordinary death benefits, LEOPS members must have accumulated at least one but less than two years of eligibility service prior to the date of death.

Benefits — The ordinary death benefit equals the members' annual earnable compensation at the time of death plus accumulated contributions.

Special Death Benefits

Members in Service

Eligibility — To be eligible for special death benefits, LEOPS members in service must have accumulated at least two years of eligibility service prior to the date of death or died in the line of duty.

Benefits — The special death benefit provided upon death for LEOPS members in service equals 50% of the applicable ordinary disability allowance. In cases where the deceased members are not survived by a spouse, the decedents' children, if any, will continue to receive the special death benefit until the youngest child reaches age 18. The special death benefit for officers killed in the line of duty is 2/3 (66.7%) of AFC.

Survivor Benefits

Eligibility — To be eligible for survivor benefits, LEOPS retiree must have retired on either a service retirement allowance or a disability allowance.

Benefits — The survivor benefit provided upon death for LEOPS retiree equals 50% of the retiree' retirement allowance, paid as an annuity. In cases where the deceased members are not survived by a spouse, the decedents' children, if any, will continue

to receive 50% of the retiree' allowance until the youngest child reaches age 18.

Vested Pension Allowances

Eligibility — Members who join LEOPS on or before June 30, 2011, are eligible for vested pension allowances after separation from service and upon attaining age 50, provided that they accumulated at least five years of eligibility service prior to separation. Members who join LEOPS on or after July 1, 2011, are eligible for vested pension allowances after separation from service and upon attaining age 50, provided that they accumulated at least 10 years of eligibility service prior to separation.

Allowances — Vested allowances equal the normal service retirement or pension allowances computed on the basis of the members' accumulated creditable service and AFC at the date of separation.

Cost-of-Living Adjustments

Retirement allowances are adjusted each year based on the Consumer Price Index. COLAs are effective July 1st of each year and are applied to all allowances payable for the year. For LEOPS members subject to retirement plan provisions, annual COLAs are determined under the various methods applicable to ERS members. Each method is explained below:

Selection A (Unlimited COLA) —LEOPS members who elected Selection A (while enrolled in the ERS), agreed to contribute 7% of earnable compensation in return for unlimited annual COLAs after retirement.

Selection B (Limited COLA) — LEOPS members who elected Selection B (while enrolled in the ERS), agreed to contribute no more than 5% of earnable compensation in return for COLAs which are limited to 5% annually after retirement.

For all other LEOPS members, the annual COLA for retirement allowances attributable to service earned on or before June 30, 2011, is limited to 3% of the annual allowance. For retirement allowances attributable to service earned on or after July 1, 2011, the adjustment is capped at the lesser of 2.5% or the increase in CPI if the most recent calendar year market value rate of return was greater than or equal to the assumed rate. For fiscal year 2013, the assumed rate of return is 7.75%, as approved by the Board of Trustees. The adjustment is capped at the lesser of 1% or the increase in CPI if, for fiscal year 2013, the market value return was less than the assumed rate of 7.75%.

In years in which COLAs would be less than zero due to a decline in the CPI, retirement allowances will not be adjusted. COLAs in succeeding years are adjusted until the difference between the negative COLA that would have applied and the zero COLA is fully recovered.

Optional Forms of Payment

Generally, LEOPS retirement allowances are paid as a 50% joint and survivor annuity to the retiree' spouse, or if there is no spouse, to any child under age 18. If the retiree have neither a living spouse nor children under 18 at retirement, the retiree may select any one of the following six payment options.

Option 1: Payment guarantees a cash reserve equal to the excess of the present value of the retirement allowance at the date of retirement minus the total amount of payments (less COLAs) made to the date of death.

Option 2: 100% joint and survivor annuity.

Option 3: 50% joint and survivor annuity.

Option 4: Payment guarantees a minimum return of the members' accumulated contributions.

Option 5: 100% joint and survivor annuity with adjustment to maximum benefit if beneficiary predeceases retiree.

Option 6: 50% joint and survivor annuity with adjustment to maximum benefit if beneficiary predeceases retiree.

Except for a spouse or disabled child, the beneficiary designated under Option 2 or 5 cannot be more than 10 years younger than the retiree (IRS regulation).

Workers' Compensation Benefits Reduction

Disability retirement allowances are generally reduced by workers' compensation benefits paid after retirement if, and to the extent that, such benefits are for the same injury and the same period of time for which the retirement benefits are payable. The workers' compensation benefit reduction cannot reduce any retirement allowance to less than the amount necessary to cover the retiree' monthly health insurance premiums.

Deferred Retirement Option Program

LEOPS members are eligible to participate in a Deferred Retirement Option Program (DROP). To participate, the LEOPS member must have at least 25 years of creditable service, but less than 30 years. The maximum period of participation is 5 years. For members who enter the DROP on or before June 30, 2011, the LEOPS member is deemed retired and the retirement allowance is placed in an account earning 6% interest per year, compounded monthly. For members who enter the DROP on or after July 1, 2011, the LEOPS member is deemed retired and the retirement allowance is placed in an account earning 4% interest per year, compounded annually. At the end of the DROP period, the lump sum held in the DROP account is paid to the LEOPS retiree. The LEOPS member must end employment and fully retire at the end of the DROP period..
