LETTER OF TRANSMITTAL

I am pleased to present the Annual Report of the Maine State Retirement System for the fiscal year ending June 30, 2003. The year continued the System's steady progress in its transformation of itself and marked a very significant milestone in that transformation: initiation of production of Member Statements. Investment markets improved significantly and with them the System's investment return. That change was very welcome but did not alter our perspective as a long-term investor.

OVERVIEW OF THE PROGRAMS OF THE MAINE STATE RETIREMENT SYSTEM

The Maine State Retirement System's primary program responsibility is the administration of defined benefit retirement programs covering individuals who are employed in Maine's public sector, including State government, elementary and secondary education, and state and local level public sector entities (e.g., municipalities, authorities, utility districts, libraries, etc.). Administration of these programs includes financial administration, investment administration, recordkeeping of members' work and compensation data, and administration of retirement-related services provided to members, employers and retirees. More detail on these programs and responsibilities is presented in the Management Discussion and Analysis (MD&A) component of the System's audited financial statements and in the audited financial statements themselves and Notes thereto, all of which are found in the Financial Section of this Report.

In addition to its defined benefit programs, the System is responsible to administer a Section 457 deferred compensation program and a Section 401(a) defined contribution program that are available to its participating local district (PLD) employers in the Consolidated Plan and their employees.

The System also is responsible for the administration of a group life insurance program that provides or makes available life insurance and accidental death and dismemberment insurance to the employers, members and retirees included in the System's retirement programs and to certain entities and individuals not included in the retirement programs. More detail on the group life insurance program can also be found in the MD&A and the financial statements and Notes thereto.

The System's responsibility for the investment of the funds of the Maine Learning Technology Fund (formerly, Endowment) (MLTF) was completed at the end of fiscal 2003 when, in accordance with the MLTF legislation, the funds were no longer identified as an endowment and were transferred back to the State. More detail on the MLTF can be found in the MD&A and the financial statements and Notes.

FUNDAMENTAL RESPONSIBILITIES

Accounting and Reporting. The System, through its management staff, is responsible for establishing and maintaining an internal control structure that protects assets from loss, theft or misuse and that ensures that financial recordkeeping is complete and accurate. Management is also responsible for the completeness, accuracy and fair presentation of financial information, and for all disclosures. This responsibility notably encompasses our financial statements themselves, including the amounts therein that, necessarily, are based on estimates and judgments. The System's financial statements have been prepared in accordance with generally accepted accounting principles applied on a consistent basis, in accordance with the standards and requirements of the Governmental Accounting Standards Board (GASB). The financial statements are presented in accordance with GASB Statement No. 25, Financial Reporting for Defined Benefit Plans, and GASB Statement No. 34, Basic Financial Statements - Management's Discussion and Analysis for State and Local Governments. Financial information presented throughout this Annual Report is consistent with the financial statements.

Our independent external auditor, PricewaterhouseCoopers, LLP, has conducted an audit of our financial statements in accordance with, as stated in its audit report, generally accepted auditing standards and including those tests and procedures PricewaterhouseCoopers deemed necessary to express its opinion in its audit report. The auditors have unrestricted access to the Board and the Board's audit committee to discuss the audit and its findings as to the integrity of our financial reporting and adequacy of our internal controls.

LETTER OF TRANSMITTAL

Funding of defined benefit retirement programs. The funding of defined benefit retirement programs expresses the basic defined benefit retirement plan equation that over the long term contributions plus investment earnings must be equal to benefits. The interplay of liabilities (i.e., the obligation to pay benefits) and assets (i.e., contributions and investment earnings thereon) can be seen in the plans' funded ratios and changes in funded ratios over time. The retirement programs that the System administers vary in their funded ratios, from the underfunded State employee/teacher program to the slightly underfunded judicial program to the more well-funded Consolidated Plan for PLDs.

The funded ratio of the State employee/teacher program has improved since the mid-1980s, though not without the backsliding that has been the result of poor investment markets in very recent years. The judicial program, whose asset surplus had become smaller over the last few years because of both benefit improvements for judges and negative investment results, became slightly underfunded. The well-funded status of the Consolidated Plan for PLDs reflects the circumstances and timing of its structure and relatively recent inception. More information on the funding of all of the System's retirement programs is found in the MD&A and in the financial statements and Notes.

Investments. Both the necessary inflows of employer and member contributions and healthy long-term returns from the investment of assets are essential to the sound funding of the defined benefit retirement programs administered by the System. The System's Board of Trustees is responsible to establish the policy that is the framework for investment of System assets. The basic tenet of the policy is the mix of investment types in which assets are invested and the allocation of assets among the types. Under the policy, the System invests in domestic equities, international equities, and fixed income securities. The asset classes and the allocations of assets among the classes reflect the Board's thinking and decisions as to expected investment return and as to the nature, level and management of risk. More information on the System's investments is in the Investment Section of this Report and in the MD&A, financial statements and Notes.

MAJOR INITIATIVES

Again in 2003, the System maintained its intense and productive focus on its own transformation. Our capacity and capability to handle immense amounts of data by means of electronic systems and tools continued to expand and to become steadily more effective and efficient. The System's delivery of services, in a direct cause and effect relationship, thereby continues to become more effective and efficient, a fact that is as important to System staff as it is to our members, employers and retirees. A landmark demonstration of the translation of these efforts into meaningful new services for our members was the issuance in 2003 of the System's first-ever Member Statements. These Statements provided individualized pertinent retirement data on service credit and beneficiary designations to the 3,600 State employees who were in the first "wave" of Statement production. Successive waves will steadily follow until each of our members has received an initial Member Statement and all members are receiving periodic updated Statements.

Our priorities for the Automation Project that is at the base of our transformation were continually being re-thought and updated in 2003. While we concentrated tremendous effort on the production of Member Statements, we also focused intently on completing the document imaging project that was begun in 2002. We now have a fully functioning imaging system and conversion of all backfiles has been completed. We have begun our next major project, also time sensitive, which is to install a new benefits payroll system.

The System became a presence in cyberspace with the launch of its website (<http://www.msrs.org>) early in FY 2003. Several years ago we decided that we would establish a website only when our transformation had progressed far enough for us to have confidence in the accuracy and reliability of the information to be provided, and to have confidence that continuous improvement of the site would flow from other changes we were making, in particular in automation. We also were reasonably certain that, until fairly recently, only a relatively small proportion of our members, employers and retirees would in fact turn to a website for information. All of our criteria for making a site a high priority having been met, we are delighted to have added this resource.

We continued to welcome to our staff individuals whose skills and experience are commensurate with the nature and level of our responsibilities. We also continued to shape our organizational structure to better reflect and carry out our work, notably adding in the last two years a Chief Investment Officer position and an Internal Auditor position. In a financial institution of the System's size and scope of responsibility, both are functionally necessary and contribute to fiduciary soundness. The absolute number of our staff positions did not change.

LETTER OF TRANSMITTAL

OVERVIEW OF ANNUAL REPORT

This Annual Report, taken as a whole, provides detail on all aspects of the System. It is organized on the model we established with the 2002 Annual Report. We expect to make further changes, reflecting the continuing evolution of the way in which we carry out this part of our reporting responsibilities and our desire to eventually publish our Annual Report in a form that meets the requirements for excellence in financial reporting established by the Government Finance Officers Association. Again this year, much of the detailed information appears in sections of the Report rather than in the Letter of Transmittal.

The Report is made up of five sections:

The Introductory Section presents this Letter of Transmittal, identifies the members of the System's Board of Trustees, sets out the names and positions of the System's senior administrative staff, provides an organizational chart reflecting the System's entire administrative staff, lists the principal professional consultants that provided services to the System in FY 2003, and includes the Legislative Update for the first regular session of the 121st Maine Legislature.

The Financial Section includes the report of the System's independent auditors and the System's audited financial statements for the fiscal year ending June 30, 2003 with their Notes, Required Supplementary Information and other supplementary information. Trust Fund Balances by System employer/program are also included in this Section. Financial information on Group Life Insurance program operations and on the Maine Learning Technology Fund is also included.

The Investments Section presents detail, at June 30, 2003, of Retirement System, Group Life Insurance and Maine Learning Technology Fund assets. Additional information on investments is in the MD&A, financial statements and Notes.

The Actuarial Section includes the June 30, 2002 actuarial valuations for the four retirement programs administered by the System: the State employee and teacher program, the legislative program, the judicial program and the program of the Consolidated Plan for Participating Local Districts. (Valuations for the several non-Consolidated PLDs are not included but are available from the System.)

The Statistical Section includes selected data thought to be of interest and/or use to persons interested in the Retirement System.

ACKNOWLEDGEMENTS

In last year's Report I said, "I expect that one day I will run out of ways to acknowledge the work and commitment of the Retirement System staff, because I do not expect to ever see a time when such an acknowledgement will not be called for." In 2003, this staff's wonderfully high output of effort and energy did not flag, nor did its real delight in its successes and their importance for our members. The staff's appetite for the challenges ahead is as impressive. The System's members, employers and retirees are well-served by its staff, as individuals and as contributors to a shared endeavor.

Respectfully submitted,

Kay R. H. Evans
Executive Director

BOARD OF TRUSTEES, MANAGEMENT STAFF and PRINCIPAL PROFESSIONAL CONSULTANTS

BOARD OF TRUSTEES

OVERVIEW OF MSRS ORGANIZATION

INTRODUCTION

By the authority granted to it by the Maine State Legislature, the Maine State Retirement System administers retirement programs that cover State employees, the State's public school teachers, judges, legislators, and employees of the approximately 260 municipalities and other public entities, called "participating local districts" (PLDs), that have chosen to provide retirement plans through the MSRS. The System is also responsible for the payment of retirement and survivors' benefits to former governors and their surviving spouses. In addition, the System also administers a Group Life Insurance Program. This program provides or makes available life insurance benefits for active and retired System members and for the employees of a few local districts for whom the MSRS administers only the group life insurance program.

RETIREMENT AND RELATED BENEFITS

Retirement and related benefits provided by MSRS include:

- service retirement benefits, which provide retirement income to a member after the member has reached qualification for retirement;
- disability retirement benefits, which provide income to a member who becomes disabled (as defined by MSRS law) while the member is in service and before the member retires; and
- death benefits, which are paid to a member's designated beneficiary(ies) if the member dies before retirement.

MEMBERSHIP AND CONTRIBUTIONS

State employees and teachers are covered under the Maine State Retirement System's State employee and teacher plan. State employees are required by law to become members of the MSRS when hired. There is an exception to this rule for elected and appointed officials, for whom membership is optional. Public school teachers must also become members of the MSRS when hired. PLD employees become members of the MSRS when they are hired if their PLD participates in the MSRS at that time and if they meet the membership eligibility requirements in effect when they are hired. For some PLD employees membership is optional. These employees include those employed by their PLD before the PLD joined the MSRS, those covered by Social Security (if their employers provide Social Security under a federal section 218 agreement), those covered by an employer-sponsored qualified plan, employees not covered by the Municipal Public Employees Labor Relations Law, elected and appointed officials, and chief administrative officers.

The Maine Legislative Retirement System, also administered by the System, was established to provide a retirement plan for those serving in the Maine Legislature. Except as provided by statute, membership in the Maine Legislative Retirement System is mandatory for legislators entering service on or after December 3, 1986. Any Legislator who was a member under the State employee and teacher plan on December 2, 1986 had the option to continue to be a member instead of becoming a member under the Maine Legislative Retirement System.

The Maine Judicial Retirement System was established to cover Maine's judges. Membership in the Maine Judicial Retirement System is a condition of employment for all judges serving on or after December 1, 1984.

All members of each plan within the System contribute a percentage of their compensation to the System. The amount of the member contribution is set by statute and varies according to the plan under which a member is covered and other criteria set out in the law. Each employer also contributes to the System in an amount that is a percentage of total wages paid to members who are employees of that employer. The State pays the employer contribution on behalf of all teacher members as well as all State employee members. Employer contribution percentages are actuarially determined by plan and vary from year to year. MSRS membership terminates upon retirement, death, or refund of member contributions. Further details regarding plan provisions may be found elsewhere in this Report in the Actuarial Valuation for each plan.

GROUP LIFE INSURANCE PROGRAM

The Group Life Insurance Program is provided or made available to all State employees, public school teachers, and the employees of those PLDs that elect to offer the Program for their employees, as well as members of the Legislative and Judicial Retirement Systems. In addition to basic coverage for the employee (which is equal to one times the employee's annual base compensation rounded up to the next \$1,000), supplemental coverage for the employee and coverage for dependents are also available.

OVERVIEW OF MSRS ORGANIZATION

BOARD OF TRUSTEES

The responsibility for the operation of the Maine State Retirement System is held by the System's Board of Trustees, which is composed of eight members. State law specifies the Board's composition. The law requires that each individual appointed to service as a trustee is subject to the legislative confirmation process. All appointed trustees are required to have "a working knowledge of retirement policy and legal issues and a general knowledge and understanding of banking, finance and investment practices." Three trustees are to be Retirement System members, one of whom is proposed and elected by the Maine Education Association, one of whom is proposed and elected by the Maine State Employees Association and one of whom is a PLD member proposed by the governing body of the Maine Municipal Association. Four trustees are appointed by the Governor. Of these, one must be selected by the Governor from a list of nominees submitted by the Maine Retired Teachers Association and one must be an MSRS retiree selected from a list of nominees submitted by State and/or PLD retirees. The remaining two appointees are direct gubernatorial appointments, both of whom must be qualified through training or experience in the field of investments, accounting, banking or insurance or as actuaries. The eighth trustee is the State Treasurer, who serves ex-officio. All trustee terms are three years, except for the two-year term of the State Treasurer. The Board annually elects its chair and vice chair from its members.

The Board contracts for the services of an actuary, currently the firm of Milliman USA, to prepare annual valuations of the assets and liabilities of each of the retirement plans administered by the System. The actuary also provides information and recommendations as to sound and appropriate actuarial assumptions, which are utilized, together with valuation information, to determine the plans' funding requirements.

The Board's management of MSRS investments is governed by its investment policy. The policy states the Board's underlying investment objectives, sets out the investment strategies intended to realize the objectives and establishes guidelines and criteria for implementation of the strategies. The Board currently contracts with the firm of Ennis Knupp and Associates to advise in the development of the investment policy and the carrying out of the investment program.

The Board is the final administrative decision maker in matters involving the rights, credits, and benefits of members. It has established an administrative appeals process for the making of such decisions, through which the relevant factual information and legal requirements are identified and analyzed by Hearing Officers who serve under contract. In decisions on disability retirement appeals, statutorily established medical boards and individual medical advisors provide recommendations as to the medical aspects of disability. The Board's final administrative decisions are appealable to Superior Court.

ADMINISTRATION

The Maine State Retirement System is a service organization with very significant financial and investment management and recordkeeping responsibilities. The Board of Trustees appoints the Executive Director of the MSRS. The work of the System is managed through the Office of the Executive Director and three departments.

The Office of the Executive Director oversees all actuarial work and investments. Actuarial work and investment operations are carried out with the assistance of an actuarial consultant, the System's Chief Investment Officer, an investment consultant, other appropriate consultant services and investment managers. In addition, the Office manages day-to-day administration of the System, budget preparation and management, legislative matters, appeals, federal, state and local relations, planning, organizational development, and numerous special projects, notably the System's automation effort.

The Department of Service Programs and Administrative Appeals is responsible for service and disability retirement programs, membership and employer programs, survivor benefit and group life insurance programs, and records management. The Department is the System's primary liaison with members, employers and benefit recipients. The Department staff also includes System advocates who represent the System before Hearing Officers in all administrative appeals of decisions of the Executive Director.

The Department of Internal Services includes three divisions: Accounting and Finance, Information Technology, and Benefits Payroll Administration and Supporting Services. The Accounting and Finance Division has primary responsibility for the MSRS accounting and financial management systems. This includes receiving and recording to the general ledger all member and employer contributions, recording all benefit disbursements to the general ledger, and processing and recording the payment of all invoices submitted to the System. The Information Technology Division is responsible for acquisition and support of the technology used by MSRS staff in providing agency programs and services and, in a common effort with the user-staff, for the design and development of the System's Member Recordkeeping System. The Division's responsibilities include maintenance and

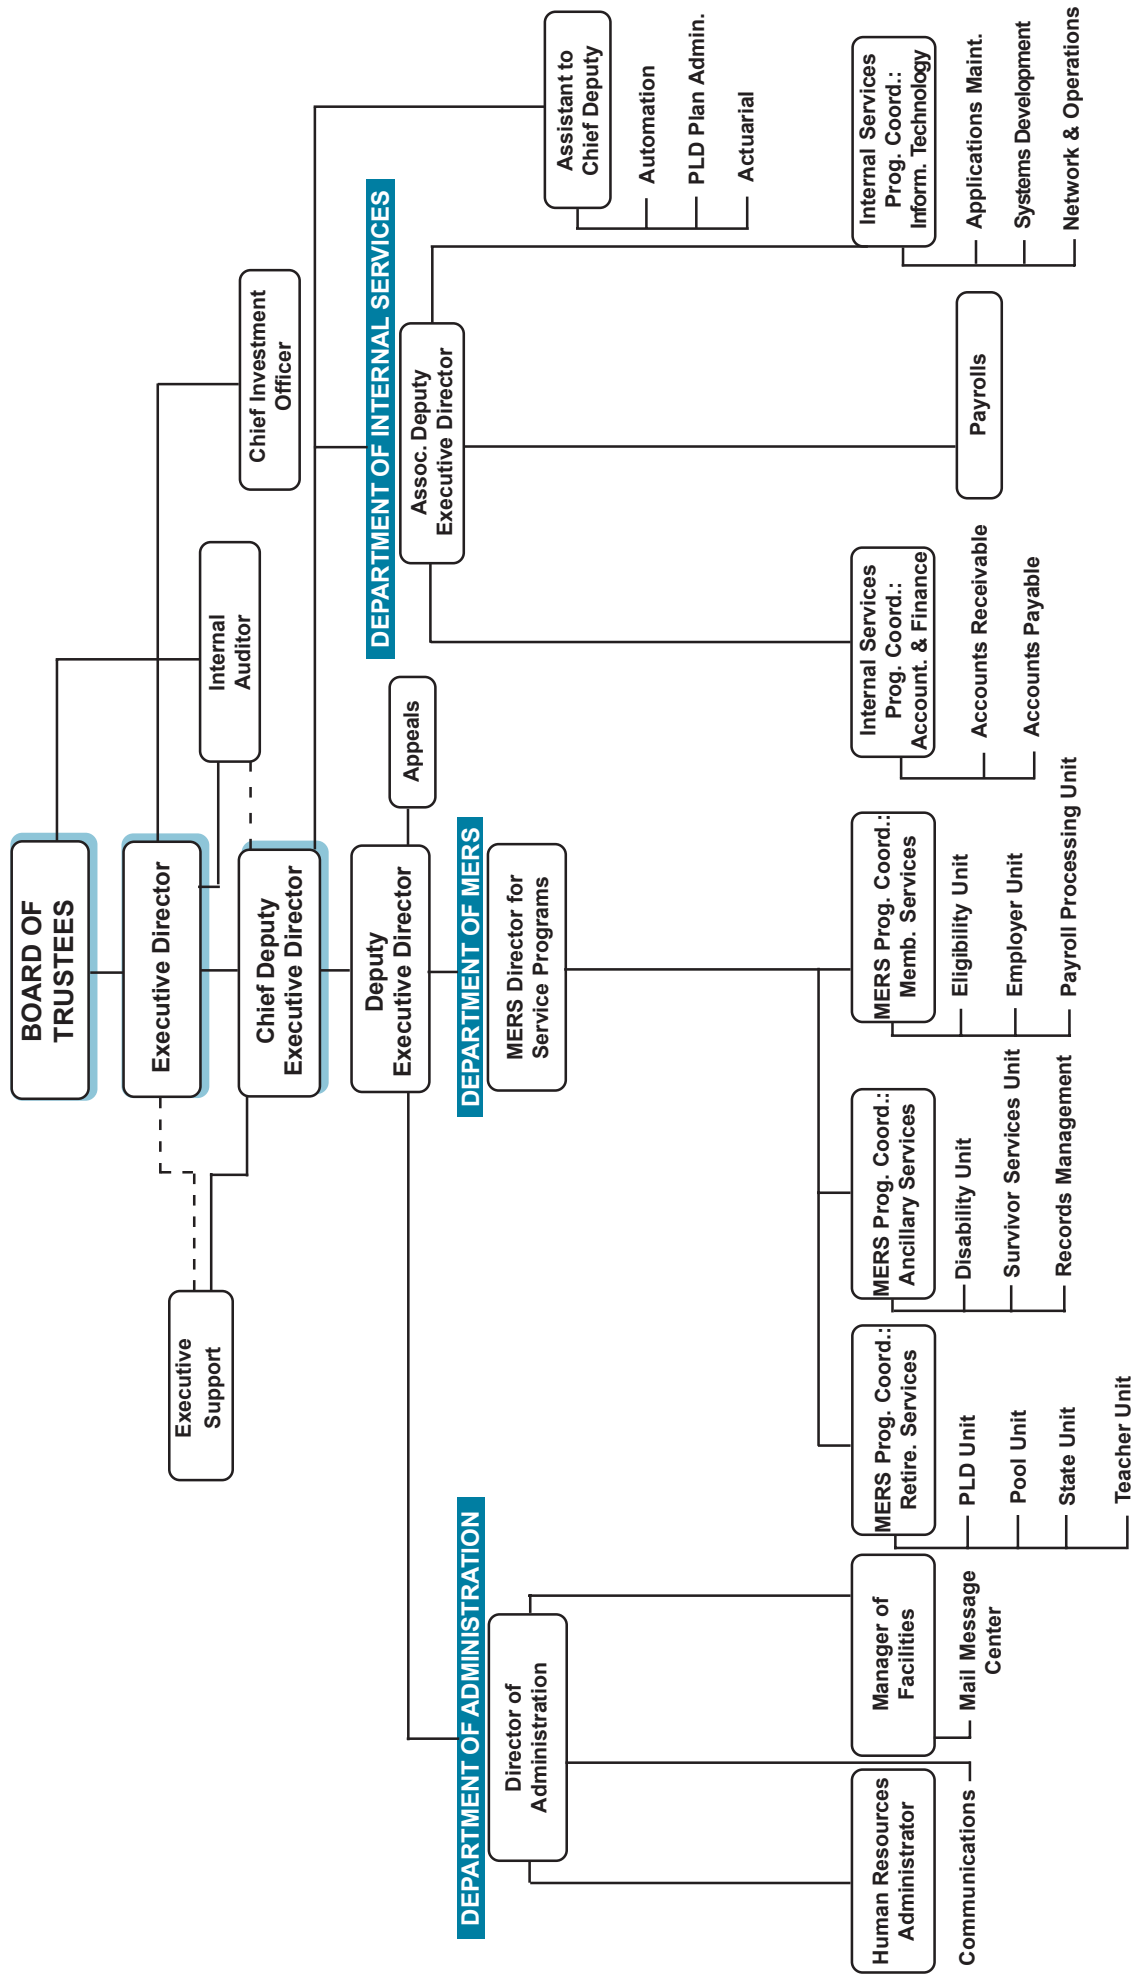

OVERVIEW OF MSRS ORGANIZATION

technical support of various software applications and operation of the computer network and related hardware. Primary computer operations occur in the MSRS Augusta office; a back-up site is located in the System's Portland office. The Payrolls Administration Division is responsible for the System's benefits payroll program and for the administration of member refunds.

The **Department of Administration** is responsible for the staff-centered aspects of the System's development as an organization and oversees the management of internal personnel, including labor relations, and of the staff payroll. Personnel information and payroll data is tracked using a Human Resource Payroll and Information System. The Human Resources staff participate in developing agency-wide strategies and goals that adhere to equal employment opportunity mandates, labor-management agreements and health and safety requirements. The Department also administers the System's facilities management, the mail/message center and the Division of Communications.

ORGANIZATIONAL CHART by FUNCTION

Legislative Update

Legislation Enacted in the First Regular Session of the 121st Legislature

[An Act Making Unified Appropriations and Allocations for the Expenditures of State Government... for the Fiscal Years Ending June 30, 2004 and June 30, 2005](#)

PL 2003, Chapter 20 [LD 1319]
Effective Date: July 1, 2003

This bill is the "Part 1" State budget. Part NN of this bill changes the amortization period currently in place for payment of the unfunded actuarial liability associated with the retirement plan that covers State employees and teachers. *(See related article on page 1 of the Summer 2003 issue of Retirement News.)*

[An Act Relating to Employees Whose Membership in the Maine State Retirement System is Optional](#)

PL 2003, Chapter 261 [LD 672]
Amending: 5 MRSA §§17652, 17703, 17704-A
Effective Date: September 13, 2003
Members Affected: Some State Employees

This bill changes the purchase of service provisions that apply to optional members in the State employee/teacher retirement plan. It also makes a change to the membership eligibility provisions that apply to specific employees of the Maine Community College System. *(See related article on page 5 of the Summer 2003 issue of Retirement News.)*

[An Act Pertaining to Former Members of the Maine State Retirement System](#)

PL 2003, Chapter 273 [LD 831]
Amending: 5 MRSA §18203
Effective Date: September 13, 2003
Members Affected: Some PLD Employees

This bill permits a withdrawn participating local district to elect to amend the retirement plan by which its employees who remained MSRS members are covered. Any provision of retirement law, whether effective before or after the district's withdrawal, is available for adoption by the withdrawn district.

[An Act To Authorize Certain Former Members of the Maine State Retirement System To Rejoin the Maine State Retirement System](#)

PL 2003, Chapter 324 [LD 1535]
Effective Date: May 27, 2003
Members Affected: Some Service Retired State and Teacher

This bill permits any retiree who in 2001, was working towards earning a sufficient amount of money to become restored to membership, but who was unable to become restored to membership as a result of the repeal of the restoration to service provision, to now make an election so as to accomplish that result.

[An Act Concerning Disability Retirement Benefits under the Maine State Retirement System](#)

PL 2003, Chapter 328 [LD 1248]
Amending: 5 MRSA §18530
Effective Date: September 13, 2003
Members Affected: Some Disability Retired PLD

This bill changes the amount of a disability retirement benefit that can be paid to a recipient who also receives a workers' compensation and/or a social security disability retirement benefit. *(See related article on page 1 of the Summer 2003 issue of Retirement News.)*

*Legislative Update continued***An Act to Amend Laws Relating to the Maine State Retirement System**

**PL 2003, Chapter 387 [LD 1501]
Effective Date: September 13, 2003
Members Affected: State, Teacher and PLD**

This bill makes a number of changes to various provisions of current MSRS statutes. The changes of particular interest include: 1) the period of time that a member may continue to earn creditable service while on a leave of absence in order to serve in the military is increased from four to five years in order to comply with federal law; 2) rehabilitation services are extended to additional disability benefit recipients and participation in those services is made optional (*See related article on page 1 of the Summer 2003 issue of Retirement News.*); and 3) the withdrawal of contributions is made optional for certain participating local district members who terminate membership. (*See related article on page 5 of the Summer 2003 issue of Retirement News.*)

An Act to Update the Department of Defense, Veterans and Emergency Management Laws

**PL 2003, Chapter 404 [LD 1513]
Amending: 5 MRSA §17652
Effective Date: September 13, 2003
Members Affected: Some State Employees**

This bill makes membership optional for Maine National Guard members who are on active state service for more than 15 consecutive days. These employees were previously excluded from MSRS membership. (*See related article on page 5 of the Summer 2003 issue of Retirement News.*)

**An Act to Make Supplemental Appropriations and Allocations for the Expenditures of State Government...
for Fiscal Years Ending June 30, 2003, June 30, 2004 and June 30, 2005**

**PL 2003, Chapter 451 [LD 1614]
Effective Date: June 12, 2003
Members Affected: Some State Employees and Retired Teachers**

This bill is the "Part 2" State budget. Part GG of this bill amends the plan coverage for liquor inspectors who were hired prior to September 1, 1984, who were laid off in 2003, and who meet certain eligibility requirements. Part OO of this bill increases the health insurance payment for retired teachers from 35% to 40% effective August 1, 2003.

An Act to Clarify Eligibility in the Maine State Retirement System Life Insurance Program

**PL 2003, Chapter 485 [LD 1107]
Amending: 5 MRSA §18055
Effective Date: September 13, 2003
Members Affected: State, Teacher and PLD**

This bill permits individuals who are covered by group life insurance as a retiree to also be covered by group life insurance as an active member of the System. In order to have the additional coverage, the individual must pay the premium associated with the active employee coverage, regardless of whether the employer normally pays the cost of the coverage.

An Act Concerning Retirement Benefits for State Employees

**PL 2003, Chapter 486 [LD 1009]
Amending: 5 MRSA §§17001 and 17704-B
Effective Date: September 13, 2003
Members Affected: Active and Retired State Employees**

This bill permits members in the judicial and state employee/teacher retirement plan who were required to take days off without pay during the fiscal year beginning July 1, 2002, to elect to pay member contributions and interest in order to include those earnings as earnable compensation. (*See related article on page 6 of the Summer 2003 issue of Retirement News.*)

REPORT OF INDEPENDENT ACCOUNTANTS

To the Board of Trustees of The Maine State Retirement System:

In our opinion, the accompanying basic financial statements present fairly, in all material respects, the fiduciary net assets of the Maine State Retirement System, which is a component unit of the State of Maine, as of June 30, 2003 and 2002, and the changes in fiduciary net assets for the years then ended, in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the System's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and *Government Auditing Standards* issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

Our audit was made for the purpose of forming an opinion on the basic financial statements taken as a whole. The supplemental information included [on pages 15-22 and pages 31-35] is not a required part of the basic financial statements but is supplemental information required under Government Auditing Standards Board (GASB) Statement No. 34, as amended and No. 25. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements, and in our opinion, is fairly stated in relation to the basic financial statements taken as a whole.

In accordance with *Government Auditing Standards*, we have also issued our report dated December 11, 2003, on compliance and on internal control over financial reporting based on an audit of financial statements performed in accordance with *Government Auditing Standards*.

Our audit was conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The supplemental schedule [on page 35] is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information has not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we express no opinion on it.

MANAGEMENT DISCUSSION AND ANALYSIS

This Management Discussion and Analysis (MD & A) is prepared by the management staff of the Maine State Retirement System (MSRS, the System) for the purpose of providing an introduction to and overview of the System's financial statements and the financial activities represented by them. The MD & A is in effect an annotated table of contents for the financial statements, describing generally the functional and operational context in which the System's financial activities take place and providing a narrative discussion, at an informative level, of those financial activities.

The Maine State Retirement System is an independent public agency of the State of Maine. The System's principal responsibility is the administration of retirement plans. The System also administers a group life insurance program and oversees the investment of a State endowment unrelated to its retirement and life insurance programs. More fully described, the System's responsibilities are:

- The administration of defined benefit retirement programs that encompass both pension and long-term disability benefits. These programs cover substantially all of the State's employees, all of the State's public school teachers ("teachers" includes school administrators and other certified/licensed school staff), the State's judges ("Maine Judicial Retirement System," "MJRS"), the State's legislators ("Maine Legislative Retirement System," "MLRS"), and employees of the 260 State and local level public entities ("participating local districts" or "PLDs") that contract with the System for the administration of their retirement programs (229 PLDs are in the "Consolidated Plan for PLDs," the remaining 31 are free-standing PLDs that no longer provide an MSRS retirement benefit plan to employees hired after a given date but continue to support liabilities relating to certain then-active and/or then-inactive MSRS members and/or benefit recipients.);
- The administration of two defined contribution retirement plans that are established under sections 457 and 401(a) respectively of the Internal Revenue Code. These plans are available to employees of those PLDs in the Consolidated Plan for PLDs that have adopted one or both of the plans;
- The administration of a group life insurance program that provides or makes available life insurance to most of those members covered under the System's defined benefit retirement programs and also to employees of some public entities that do not offer the System's retirement benefit programs; and
- The investment of the funds that comprise the Maine Learning Technology Fund (MLTF, formerly Maine Learning Technology Endowment, renamed by legislative enactment), an initiative of the State to accomplish dissemination and utilization of technology in the State's public schools. The System does not have policy or administrative responsibility for the MLTE program. Rather, the MLTF funds comprise an agency fund as that term is defined by the Government Accounting Standards Board (GASB).

The System itself and all of its programs are established by and operate within the scope of Maine statutory law. The operation of the System's defined benefit retirement programs is also governed by provisions of the Maine Constitution, not all of which apply to all of the programs.

The System's operating funds are provided by its participating employers. Total operating expenses for staff and all other costs of operation, with the exception of certain investment-related expenses required by law to be paid directly from investments, are allocated among the System's three employer/employee groups (i.e., State employees, including for this purpose judges and legislators; teachers; PLDs). The allocation is based on the headcount of members, including all active and inactive members except inactive nonvested members, and of benefit recipients for each group. The allocation methodology produces an operating cost rate for each employer/employee group. Operating funds for the State employee component are appropriated, not as dollars but as the calculated rate, in the State budget bill; the rate is applied to the State employee payroll. For the teacher component, operating funds are appropriated as a dollar amount, calculated by the application of the rate to projected teacher payrolls, that is a part of the total State appropriation for teacher retirement. Operating funds for the PLD component are collected by assessment across all PLD programs. The System's authority to expend funds for its operations is provided via annual legislation that establishes, for a given fiscal year, the amount of its operating budget. The \$1.4 million change in administrative expense from 2002 to 2003 reflected in the financial statements is due principally to costs related to the conversion from microfiche to electronic imaging for document receipt, retention and storage. The imaging-conversion costs were charged to the Imaging Reserve (\$578,000) established at the close of fiscal year 2002 in light of the conversion project already underway, to the Social Security Reserve for the PLD share of conversion costs (\$202,000) and to insurance monies (\$118,000) related to the warehouse fire in late 2002 that destroyed backup paper and fiche records stored off-site. The balance of the imaging conversion cost was charged to the System's operating budget. The remaining amount of the 2002-2003 difference was made up of a number of different recurring and/or expected cost increases, e.g., wages and benefits, particularly health insurance; property rental and maintenance; phone system conversion; depreciation increase.

MANAGEMENT DISCUSSION AND ANALYSIS

FINANCIAL REPORTING STRUCTURE AND HIGHLIGHTS

The System's financial and financial reporting obligations differ for its separate spheres of responsibility. These differences are reflected in its financial statements and the notes, required supplementary information, and other additional supplementary information that comprise the financial statements. The statements, notes and supplementary material provide comprehensive information on the System's defined benefit programs and on its group life insurance program. They report less comprehensively on the MLTE fund, in keeping with the System's narrower responsibility for the fund. They do not report on the defined contribution plans, for which the System has oversight responsibilities but whose financial flows and duties are between and held by the participating PLD employers and the plans' third party provider of investment, administration and recordkeeping services.

Defined Benefit Plan

The Maine State Retirement System's defined benefit retirement plan responsibilities are administered as a single plan, notwithstanding that separate actuarial valuations are performed for each of the retirement programs that the Retirement System administers, that contributions inflows and benefits payments are separately tracked and recorded, and that separate trust fund balances are attributed to each such program. The System's financial statements, notes thereto and required supplementary information are prepared accordingly. As additional supplementary information, the System includes with its financial statements a schedule that sets out in relevant detail the trust fund balances of the State employee and teacher program, the MJRS program, the MLRS program, and the program of the Consolidated Plan for PLDs and the nonconsolidated PLDs combined.

Group Life Insurance Program

The group life insurance program administered by the System provides or makes available to State employees, teachers and employees of some PLDs several categories of term life insurance coverage (i.e., basic and supplemental life coverages for employees; spousal life coverages; dependent life coverages; accidental death and dismemberment coverages for employees). Premiums, whether paid by the employer or employee, are transmitted to the System by the employer (except when, primarily for reasons of pay status, an employee is responsible to pay premiums directly). Claims are paid through the System's contracted insurance carrier to which the System pays the related administrative costs. Program reserves, principally resulting from the return to the System many years ago of funds from the demutualization of the System's then-insurance carrier and earnings thereon, constitute the other element of the program's financial structure.

Maine Learning Technology Fund

The System's responsibilities with respect to the Maine Learning Technology Fund are to invest, account for the receipt and expenditures of, and provide for the annual audit of, Fund funds. All transactions involving MLTF funds are made under the aegis of legislative and/or State administrative directives. These are set out in statute, in an administrative Memorandum of Understanding between the State and the System and in other agreements between the State and the System based on their common understanding of legislative intent and their related but separate responsibilities. The terms of the Fund's origin and continued existence are reflected in the nature of its spending plan. The nature of the spending plan is in turn reflected in the vehicle in which MLTF funds were initially invested and continue to be invested.

OVERVIEW OF THE FINANCIAL STATEMENTS

The System's financial statements, briefly described, comprise the following:

Financial Statements

A statement of net assets and a statement of changes in net assets as of June 30, 2003 and for the year then ending, with comparative information as of June 30, 2002 and for the year then ending. In these statements, assets are shown at market value.

Notes to Financial Statements

Notes that provide additional information that is essential to a full understanding of the data provided in the financial statements themselves.

MANAGEMENT DISCUSSION AND ANALYSIS

Note 1. Plan Description

Note 1 provides a general overview of the Maine State Retirement System as the administrator of a defined benefit retirement plan and a group life insurance program and as the entity responsible to invest Maine Learning Technology Endowment funds.

Note 2. Summary of Significant Accounting Policies

Note 2 explains the basis of accounting at MSRS and summarizes significant accounting policies relating to investments, cash, the use of estimates, risks and uncertainties and accounting pronouncements.

Note 3. Cash and Investments

Note 3 provides detail on deposits, cash equivalents and other investments held in trust by the System. There are also disclosures on a certain type of investment-related risk and on holdings that comprise 5 percent or more of plan net assets.

Note 4. Derivative Securities

Note 4 explains derivative financial instruments and their use by the System in the normal course of investing. It also covers the management of market risk and compliance monitoring.

Note 5. Securities Lending Agreement

Note 5 discusses the System's securities lending program, under which any type of security in the System's portfolio can be lent to broker-dealers and other entities.

Note 6. Contributions and Reserves

Note 6 explains assumptions under which employer and employee contribution rates are actuarially determined and applied. It informs the reader how a percentage of a qualifying state budgetary surplus is provided to the System to reduce the unfunded pension liability of the State employee and teacher retirement program, and it lists employer contribution rates in effect in 2003 and 2002.

Note 7. Statutory and Constitutional Requirements

Note 7 explains that statutory changes enacted by the Maine Legislature in 1998 and 2000 shortened the period for the State to amortize the unfunded actuarial pension liability of the State employee and teacher plan from the amortization period of 31 years established by constitutional amendment in 1995. The Note also explains that a statutory change enacted in 2003 re-lengthened the period for the FYs 2004-2005 biennium and re-shortens it as of the beginning of FY 2006.

Note 8. System Employees - Retirement and Retiree Health Benefits

Note 8 explains that the Maine State Retirement System is an employer participating in the Consolidated Retirement Plan for Participating Local Districts. The Note describes both employer and employee retirement contribution rates applicable to the System and its employees. The Note also discusses the provision of post-retirement medical benefits for employees who retire from the System.

Required Supplementary Information

Supplementary information required by GASB consists of two schedules and accompanying notes. The two schedules are the Schedule of Funding Progress and the Schedule of Employer Contributions. The notes provide additional disclosure on the two schedules and also provide information on the Group Life Insurance Program administered by the Maine State Retirement System.

Schedule of Funding Progress

The Schedule of Funding Progress presents an overview of all of the defined benefit retirement programs administered by the System, without regard to the funded status of the separate programs. It compares the value of pension assets attributable to all of the defined benefit retirement programs administered by the System taken together with the actuarial accrued liabilities of all of these programs taken together, as of actuarial valuation dates over a period of eight years, and calculates the unfunded actuarial accrued liability for all of the programs taken together for each date. The schedule calculates the actuarial funded ratio of all of the programs taken together and illustrates it as a percentage of the covered payroll of all members of all programs taken together.

Schedule of Employer Contributions

The Schedule of Employer Contributions compares the annual required contribution as defined by GASB for all employers participating in MSRS to actual employer contributions, over a period of eight years. It reports the difference between required contributions and actual contributions for each year.

MANAGEMENT DISCUSSION AND ANALYSIS

Unaudited Supplemental Information

This supplemental schedule is a statement of changes in net assets for each of the member/employer groups for which the Maine State Retirement System is the defined benefit retirement program administrator. The schedule also includes a statement of changes in net assets for the group life insurance program.

SYSTEM INVESTMENTS

Defined Benefit Plan Investments

The assets of all the defined benefit retirement programs that the System administers are commingled for investment purposes. Essentially all of the assets are invested in three asset classes: publicly traded domestic stocks, publicly traded foreign stocks and publicly traded fixed income securities. Less than 1 percent of the assets are invested otherwise than in these classes. The investment policy established by the System's Board of Trustees assigns strategic target allocations for each of the three asset classes. As of June 30, 2003 the targets are 50 percent for domestic stocks, 15 percent for foreign stocks and 35 percent for fixed income. Only minor variations, resulting from market activity and controlled by a formally approved rebalancing methodology, are allowed between actual allocations and the strategic targets. While strategic targets may be changed by the Board from time to time, such changes reflect carefully analyzed investment policy adjustments. The System does not shift funds between asset classes based on short term forecasts or results, believing that such market timing is a high cost and high risk strategy inconsistent with the nature of public pension investments and their long term investment horizon.

The System's investment strategy is designed to prudently accommodate the funding demands inherent in a defined benefit plan, under which benefits are determined by a formula in which the factors are length of service, amount of compensation and benefit accrual rate. Retirement benefits under defined benefit plans do not increase or decrease with investment returns, hence the term "defined benefit." Plan assets can be said to exist to collateralize the promise to pay future retirement benefits. This perspective would suggest that conservative investment strategies be used. However, conservative, i.e., low risk, strategies can be expected to provide low investment returns. If investment returns are low, contributions, the other source of benefits collateral, will need to be greater. Thus, an overly conservative investment strategy can place an unacceptable burden on the contributors, i.e., employees, employers and taxpayers, resulting in an underfunded plan and serving the interests of neither the plan beneficiaries nor the plan contributors. Thus, a prudent investment strategy for a defined benefit retirement plan requires accepting some level of investment risk. The System believes that the current investment strategy provides a prudent compromise between low investment risk and high investment return for the plan. One way of describing the risk/return relationship reflected in the strategy is to say that on average over the long-term the strategy is expected to produce negative returns approximately one year out of the four. The risk/return balance is the fundamental element of the System's investment program and receives virtually constant attention from the Board and staff.

Essentially all of the assets of the defined benefit plan are in portfolios managed by professional investment management firms. These managers act as fiduciaries and invest the assets assigned to them in accordance with the System's investment policy and their separate contractual arrangements. At June 30, 2003 total assets in these portfolios (together with the very small amount otherwise managed) were \$6.9 billion net of accruals for investment management fees and certain investment-related administrative expenses. The comparable number at June 30, 2002 was \$6.6 billion. The investment return at June 30, 2003 was positive 5.3 percent. The return at June 30, 2002 was negative 7.5 percent. Over the 10-year period ending on June 30, 2003 the average annual investment return was positive 8.0 percent.

The System earns additional income by lending securities. The borrowers of the securities, generally securities broker-dealers, are obligated to return them to the System either at the end of a specified period or on demand by the System. The borrowers provide collateral with value equal to or greater than the value of the securities borrowed. The System may keep the collateral if the borrower fails to return the security at the required time. The collateral is invested and, in return for lending the securities, the System retains a portion of the investment income earned on the collateral. The System's financial statements, including Note 5, specifically report the amounts on loan, the collateral held, and the income received for the lending program conducted on the System's behalf by its master custodian. For the fiscal year ended June 30, 2003, net securities lending income from this program was \$1.4 million. The amount of securities on loan for this program at the end of the year was \$516.3 million. For the prior fiscal year, net income was \$1.6 million; the amount of securities on loan at year-end was \$467.4 million. System assets held in common/collective trusts may participate in similar securities lending programs conducted by the trusts. Neither the lending income nor the collateral held by these common/collective trusts is included in the securities lending activity reported in the financial statements.

MANAGEMENT DISCUSSION AND ANALYSIS

In addition to its investment portfolio, System assets attributed across its defined benefit retirement programs include the three properties in Augusta, Maine that house the System's operations, a property in Gardiner, Maine (undeveloped land), and cash outside of the investment portfolio, which is held in short-term investments at the System's commercial and/or custodial bank(s). At June 30, 2003 the market value of the System's Augusta and Gardiner properties was \$4.5 million based on current appraisals. The June 30, 2002 value was \$3.4 million. Cash outside the investment portfolio fluctuates with the inflow of contributions and the outflow of benefit payments. At June 30, 2003 cash outside the portfolio was \$9.1 million; at June 30, 2002 it was \$31.3 million. The larger 2002 amount was the result of the payoff by each of several PLDs of its Initial Unpooled Unfunded Actuarial Liability (IUUAL). There were fewer, and smaller, such payoffs in 2003. Whether cash outside of the investment portfolio is deposited at the System's commercial or custodial bank depends on the imminence and amount of cash needs and the interest rate currently payable at each institution.

Group Life Insurance Program Investments

Group life insurance program investment assets at June 30, 2003 were \$41.5 million. The June 30, 2002 amount was \$39.4 million. The assets are invested in short- and medium-term fixed income securities in portfolios managed by an outside professional investment manager.

Maine Learning Technology Fund Investments

The Maine Learning Technology Fund total assets at June 30, 2003 were \$13.6 million. This amount represented the net result of the initial legislative appropriation of \$50.0 million, reduced by subsequent legislative and State administrative withdrawals and increased by non-State contributions to the Fund and by net investment income. Total assets at the end of the preceding fiscal year were \$31.0 million. The \$17.4 million decrease was the net result of a \$2.3 million non-State contribution, \$0.5 million of net investment income and \$20.2 million of withdrawals in accordance with legislative and administrative directives.

Defined Benefit Plan/Programs Funding Status

An actuarial valuation of the retirement assets and liabilities of the System taken as a whole and of those of each of the System's retirement programs is performed annually as of June 30 of the given year. Valuation of the plans requires the establishment of actuarial assumptions as to plan demographics and as to economic factors relevant to plan funding. Both kinds of assumptions are established by the Board of Trustees on recommendation of its actuaries. The actuaries' recommendations as to demographic assumptions are based on relevant generally-established expectations (as to, e.g., terminations of service, occurrence of disability, age at retirement and life expectancy) and on periodic review by the actuaries of the actual demographic experience of the plans. The actuaries' recommendations as to economic factors are based on information and analysis obtained from both actuarial and investment-related sources, as to expected return on investments, general salary growth, and inflation, and as to the interrelationship of these three factors. (By way of information, the Board's actuarial investment return assumption is 8 percent per year, its general salary growth assumption is 5.5 percent per year and its inflation assumption is 4 percent per year. All of these assumptions reflect on-average, over-the-long-term expectations. Given both their importance to plan funding and their very long-term nature, these assumptions are often reviewed and rarely changed. In 2003, the Board reviewed the assumptions and concluded that they remained appropriate.)

Within the framework of the demographic and economic assumptions, plan assets and plan liabilities accrued to date and expected to accrue in the future are actuarially measured as of the valuation date. Actuarial measurement of assets involved the application of actuarial smoothing techniques. Smoothing takes into account the following:

- earnings on invested assets are a fundamental element of plan funding;
- assets are invested in investment vehicles and markets whose constant movements and changes constantly affect asset values, sometimes dramatically;
- the System's plans and their funding requirements are very long-term in nature; and
- allowing the full brunt of near-term market movements to affect asset values and funding requirements as they occur in inconsistent with the long-term nature of the plans.

Thus, the purpose and effect of smoothing is to delay, or spread out over time, the recognition of near-term market fluctuations. The result of smoothing, with respect to funding progress and contribution requirements, is that the full effect of an increase in asset value does not fully "show up" at the time it occurs; neither, of course, does the full effect of a decrease in asset value. In 2003, the increase in asset value at the end of the fiscal year was smoothed, or dampened, by the flow-through of the decrease in asset value in recent prior years. Similarly, the effect of those prior-year decreases was itself smoothed or dampened, by the flow-through of the effect of asset value increases in still earlier years.

MANAGEMENT DISCUSSION AND ANALYSIS

At the System level - that is, including all of its defined benefit programs taken together - at June 30, 2003 the System was actuarially funded at 74.4 percent, which is a decrease from its actuarial funding level of 77.0 percent at June 30, 2002. With respect to the several retirement programs, actuarial funding levels differ by program and are set out below. While smoothing affects all programs, actuarial valuation methodology for each program is also relevant to its funded status. The State employee and teacher program, the MJRS program, the program of the Consolidated Plan for PLDs and the programs of the nonconsolidated PLDs are valued by the entry age normal methodology; such plans can be over- or under-funded. The MLRS program is valued by the aggregate actuarial methodology, under which actuarial assets and actuarial liabilities are set equal to each other.

At June 30, 2003 the actuarial liabilities of the State employee and teacher program were \$2.92 billion greater than its actuarial assets. At June 30, 2002, actuarial liabilities were \$2.59 billion greater than assets. The increases in the unfunded actuarial liability (UAL) in 2001, 2002 and 2003 were preceded by eight successive years of annual decreases. The changes in the UAL, both increases and decreases, were the direct result of the performance of the investment markets in the relevant years and the actuarial smoothing techniques described above. The actuarial funding level of the State employee and teacher program at June 30, 2003 was 67.4 percent. At June 30, 2002 it was 69.4 percent.

At June 30, 2003, the actuarial liabilities of the MJRS exceeded its actuarial assets by \$898,247. At June 30, 2002, assets exceed liabilities by \$1.32 million. The MJRS' actuarial surplus decreased over recent years because of both the decline in the value of investments and the enactment by the Legislature of benefit enhancements. In 2003 the actuarial surplus was eliminated and the program had an unfunded liability. The actuarial funding level of the MJRS program at June 30, 2003 was 97.6 percent. At June 30, 2002 it was 104 percent.

At June 30, 2003 the MLRS' actuarial assets of \$6.4 million equaled its actuarial liabilities, as dictated by the program's actuarial funding methodology. At June 30, 2002 the program's actuarial assets and liabilities were \$6.25 million. The change reflected the effect of actuarial smoothing.

At June 30, 2003, the actuarial assets of the Consolidated Plan for PLDs, including the unfunded liability obligations to the Plan of some of its participating PLDs, exceeded its actuarial liabilities by \$175.2 million. (Any PLD having such an obligation is required to make monthly payments to the Consolidated Plan to reduce the obligation, in accordance with the amortization schedule established at the time the PLD entered the Consolidated Plan.) The actuarial funding level of the Plan with these obligations included in its net assets was 113 percent. Excluding the unfunded liability obligations, the Consolidated Plan's actuarial assets exceeded its actuarial liabilities by \$153.6 million; on this basis the Plan's funding level was 111 percent. At June 30, 2002, actuarial assets including unfunded liability obligations exceeded actuarial liabilities by \$260.5 million; the actuarial funding level on this basis was 120 percent. Excluding the unfunded liability obligations, the excess of assets over liabilities was \$224.1 million and the actuarial funding level was 117 percent. As with the other retirement programs, the decreases in the actuarial funding levels between June 30, 2002 and June 30, 2003 were due to the continuing recognition in the actuarial value of assets, by actuarial smoothing techniques, of the losses in market value of recent prior years.

The actuarial funding status of each of the nonconsolidated PLDs is calculated separately for each such PLD and is available from the System.

MEMBERS, CONTRIBUTIONS AND BENEFITS PAYMENTS

The State employee component of the State employee and teacher retirement program administered by the System comprises (1) the Regular Plan that covers most State employee members and (2) the several Special Plans that cover employees who work in occupations considered by the Legislature to involve some degree of demand or hazard, thereby warranting a retirement plan that permits retirement with full benefits at an earlier age and/or with fewer years of service than does the Regular Plan.

The teacher component of the State employee and teacher program comprises a Regular Plan, the terms and benefits of which are identical to the Regular Plan for State employees. For purposes of retirement benefits, the State represents the "employer" of teachers. That is, as the employer contribution on behalf of teachers is paid entirely by the State, except for those contributions that are paid on behalf of teachers whose positions are funded by grants. In such cases the employer contributions are paid by the respective employers, e.g., school administrative units, from the grant funds. (For almost all other purposes, the employers of teachers are the various school administrative units that make up the public elementary and secondary education system in Maine.)

Membership of State employees at June 30, 2003 was 31,936 in the Regular and Special Plans, an increase of 1,332 over the June 30, 2002 membership. Regular Plan members contribute 7.65 percent of earnable compensation. Special Plan members

MANAGEMENT DISCUSSION AND ANALYSIS

contribute 8.65 percent of earnable compensation until Special Plan retirement eligibility requirements are met, after which they contribute 7.65 percent of earnable compensation. Total Regular and Special Plan member contributions were \$34.5 million in fiscal year 2003; the fiscal year 2002 total was \$33.4 million. Member contributions for purchases of creditable service (e.g., buybacks of refunded time/service; other categories of purchasable service credit) are included in these totals.

Membership of teachers at June 30, 2003 was 90,557, an increase of 9,556 over the June 30, 2002 membership. Teacher members contribute 7.65 percent of earnable compensation. Total teacher member contributions were \$73.3 million in fiscal year 2003; the fiscal year 2002 total was \$71.1 million. Member contributions for purchases of creditable service (e.g., buybacks of refunded time/service; other categories of purchasable service credit) are included in these totals. The increases in membership in both the State employee and teacher plans are largely due to improved data collection and management with respect to inactive nonvested members, one of the many fruits of the System's Automation Project, not to actual membership growth. Because inactive nonvested members do not constitute liabilities, this data change has no effect on plan funding.

The State's employer contributions to the Regular and Special Plans on behalf of State employees totaled \$77.9 million in fiscal year 2003; in fiscal year 2002, its Regular and Special Plan contributions were \$75.6 million. The State's employer contributions on behalf of teachers totaled \$166.2 million in fiscal year 2003; in fiscal year 2002 it was \$157.3 million. These employer contributions were augmented by the contribution of a portion of the State's unallocated fiscal year 2003 General Fund Surplus. This additional contribution is mandated by statute to be made when sufficient General Fund Surplus (GFS) monies exist at fiscal year end. GFS contribution monies in the amount of \$10.5 million were accrued by the System at June 30, 2003 on the basis of a firm estimate by the State. The contribution was allocated according to System policy in equal parts to the State employee and teacher components of the program. Thus, total State employer contributions in 2003 on behalf of State employees were \$83.1 million and on behalf of teachers were \$171.5 million.

The actual GFS monies in the amount of \$10,579,345 were received by the System after the close of the fiscal year. Upon receipt of the funds, calculations required by a separate legislative provision affecting allocation of the GFS monies could be made. These will be reflected in the System's fiscal year 2004 financial statements as adjustments to the fiscal year 2003 allocation. In summary, this legislative provision in effect required that the priority use of GFS monies was to reduce the remaining balance owed to pay the past service cost of benefit improvements enacted in 2002 for certain Special Plan groups. Under the provision, this allocation priority remained until that balance was paid in full. While at the end of fiscal year 2003 the GFS monies were clearly adequate to pay the balance in full, the exact amount of the balance could not be established until the date upon which the actual funds were received. Thus the fiscal year 2004 adjustments will reflect the actual amount of the GFS monies received, the allocation made to pay off the balance and the adjusted allocation of the GFS funds remaining after the priority allocation to the State employee and teacher components in equal parts.

The State's employer contribution on behalf of all State employees and all teachers has two components: (1) the normal cost contribution, which, with current member contributions, supports benefits currently being earned by active members and (2) the unfunded actuarial liability (UAL) contribution, which is payment on the amortized debt that represents the liability for benefits insufficiently funded for in the past. The Maine Constitution requires that the UAL be fully funded in not more than 31 years from July 1, 1997. The Maine Legislature in 1998 and again in 2000 shortened the Constitutional amortization period by a total of nine years. Effective July 1, 2003 for the two years of the then-beginning FY 2004-2005 biennium, the Legislature re-lengthened the period to the full extent of the then-remaining Constitutional period of 25 and 24 years, respectively. The legislation that instituted this change also provides that effective July 1, 2005, the beginning of FY 2006, the amortization period returns to the shortened period at year 14 thereof.

Total benefit payments under the State employee component of the State employee and teacher program, including payments to retirees, beneficiaries of retirees, disability benefit recipients, survivor beneficiaries of deceased members not yet retired and survivor beneficiaries of deceased disability benefit recipients were \$149.1 million in fiscal year 2003; the fiscal year 2002 total was \$141.9 million. Total benefit payments under the teacher component of the program, including all of the above-listed categories, were \$191.7 million in fiscal year 2003; the fiscal year 2002 amount was \$180.1 million. The increase in benefit payments were principally the result of the application of the statutorily-required 1.1 percent cost of living adjustment (COLA) to the benefits of recipients eligible for the COLA, a 2.1 percent increase in number of service retirement benefit recipients and an increase of 3.3 percent in the number of disability benefit recipients.

Membership in the MJRS was 60 at June 30, 2003; at June 30, 2002 it was 57. Judicial members contribute at 7.65 percent of earnable compensation. Total member contributions in fiscal year 2003 were \$425,926; in fiscal year 2002 the total was \$414,655. Member contributions for purchases of creditable service (e.g., buybacks of refunded time/service; other categories of

MANAGEMENT DISCUSSION AND ANALYSIS

purchasable service credit) are included in these totals. The State's fiscal year 2003 employer normal cost contributions on behalf of judges were \$821,222; in fiscal year 2002 contributions were \$808,144. Benefits payments in all categories under the MJRS were \$1.8 million in fiscal year 2003; in fiscal year 2002 payments were \$1.7 million.

Membership in the MLRS was 346 at June 30, 2003; at June 30, 2002 it was 300. Legislative members contribute at 7.65 percent of earnable compensation. Total member contributions in fiscal year 2003 were \$152,541; in fiscal year 2002 the total was \$106,337. Member contributions for purchases of creditable service (e.g., buybacks of refunded time/service; other categories of purchasable service credit) are included in these totals. Because of the funding methodology and funded status of the MLRS, no employer contribution was required in fiscal year 2003 or in fiscal year 2002. Benefits payments in all categories under the MLRS were \$119,143 in fiscal year 2003; in fiscal year 2002 they were \$101,435.

The Consolidated Plan for Participating Local Districts comprises 11 retirement plans. Each PLD in the Consolidated Plan chooses the plan or plans under which its employees will be covered. Total membership in the Consolidated Plan at June 30, 2003 was 14,546; at June 30, 2002 it was 17,690. Member contributions vary according to the covering plan. The range of member contributions as a percent of earnable compensation was 3.0 percent to 8.0 percent in fiscal year 2003 and 2002 both. Total Consolidated Plan member contributions in fiscal year 2003 were \$20.1 million; in fiscal year 2002 the total was \$17.3 million. Member contributions for purchases of creditable service (e.g., buybacks of refunded time/service; other categories of purchasable service credit) are included in these totals. Employer normal cost contributions also vary according to the covering plan. The range of employer contributions as a percent of earnable compensation in fiscal year 2003 and in fiscal year 2002 was 1.7 percent to 6.5 percent. The net effect of the Consolidated Plan's funding status and the established funding approach is that Plan employers' normal cost contributions may be, and currently are, less than what the true normal cost would otherwise require but will not be less than a floor level that reflects the then-current funding status. Benefits payments in all categories under the Consolidated Plan totaled \$63.0 million in fiscal year 2003; in fiscal year 2002 the total was \$59.8 million.

As with the State employee and teacher membership data, the changes in Consolidated Plan membership data are largely attributable to data management improvements with respect to inactive nonvested members, who do not represent plan liabilities. The data changes in PLD membership also included improvements in attribution as between the Consolidated Plan and the Nonconsolidated PLDs. PLDs represent particularly challenging data issues, as the histories of individual members and of the separate plans (within and outside of the Consolidated Plan), both before and after the establishment of the Consolidated Plan, are extremely complex and highly fluid.

Member, contribution and benefit data for the 31 nonconsolidated PLDs are specific to each PLD and are obtainable from the System.

At the System level, fiscal year 2003 was the second year in which member and employer contributions inflows were insufficient to support outflows for benefits payments, member refunds and disability rehabilitation providers (the latter are required by State law to be treated as a specific outflow). While in fiscal year 2002, payoffs of their individual unfunded liability obligations by several PLDs resulted in an overall positive cash flow for the System, fewer and smaller such payoffs were made in fiscal year 2003 and the System's cash flow was negative for the fiscal year. This is not unexpected, is principally the result of evolution in member demographics occurring in the normal course of plan history and can be expected to continue. The System has a procedure in place by which it can raise cash from its investment portfolio when needed.

OTHER INFORMATION THAT WILL OR COULD SIGNIFICANTLY AFFECT THE SYSTEM'S FINANCIAL ACTIVITIES OR POSITION

The System's defined benefit retirement programs are by far the dominant element in its financial activities and position. The design of defined benefit plans by nature presupposes that the return on invested contributions will supply a significant amount of the benefit-funding resources of such plans. When the investment markets do not provide the return expected, the resulting funding shortfall must be made up by employer contributions. Thus, the performance of the investment markets is the single most significant factor affecting the financial activities or position of the System, and the effects of market performance flow through to contributions made by its participating employers. As with all actuarially-funded defined benefit plans and as described earlier, the System utilizes actuarial methods and procedures that integrate short-term market behavior with the very long demographic time horizon of the plan. This actuarial 'smoothing' of market behavior moderates the volatility of employer contribution requirements and the budget effects thereof. Finally, while investment market performance affects plan funding requirements, it does not affect benefits being paid or to be paid in future.

MANAGEMENT DISCUSSION AND ANALYSIS

REQUESTS FOR INFORMATION

Questions concerning this Management Discussion and Analysis, other parts of the System's financial statements or the System's financial activities should be directed to Maine State Retirement System, Carl A. Cappello, Associate Deputy Executive Director, at 46 State House Station, Augusta, Maine 04333 or at (207) 512-3100 or toll-free at 1-800-451-9800.

NOTES TO BASIC FINANCIAL STATEMENTS

1. Overview of the Maine State Retirement System Defined Benefit Plan

The Maine State Retirement System (the System), which is a component unit of the State of Maine, is the administrator of an agent multiple-employer public employee retirement system established and administered under the Maine State Retirement System Laws of the State of Maine. The System provides pension, disability and death benefits to its members, which include employees of the State, public school employees who are defined by Maine law as teachers for whom the State is the employer for retirement contribution and benefit purposes, and employees of 260 local municipalities and other public entities (participating local districts, or PLDs) in Maine, each of which contracts for participation in the System under provisions of the relevant statutes. At June 30, 2003 and 2002, the membership counts that are the basis on which liabilities are calculated are as follows:

	2003	2002
Active vested and nonvested members	51,848	52,480
Terminated vested participants	5,056	2,963
Retirees and benefit recipients	30,774	30,122
Total	<u>87,678</u>	<u>85,565</u>

The System's retirement programs provide defined retirement benefits based on members' average final compensation and service credit earned as of retirement. Vesting (i.e., eligibility for benefits upon reaching qualification) occurs upon the earning of five years of service credit (effective October 1, 1999, the prior ten-year requirement was reduced by legislative action to five years for State employees and teachers; separate legislation enacted the same reduced requirement for judges, legislators and employees of PLDs). In some cases, vesting occurs on the earning of one year of service credit immediately preceding retirement at or after normal retirement age. Normal retirement age for State employees and teachers, judges and legislative members is age 60 or 62, determined by whether a member had at least ten years of creditable service on June 30, 1993. For PLD members, normal retirement age is 60. The monthly benefit of members who retire before normal retirement age by virtue of having at least 25 years of service credit is reduced by a statutorily prescribed factor for each year of age that a member is below her/his normal retirement age at retirement. The System also provides disability and death benefits, which are established by statute for State employee and teacher members and by contract with other participating employers under applicable statutory provisions.

Upon termination of membership, members' accumulated employee contributions are refundable with interest, credited in accordance with statute. Withdrawal of accumulated contributions results in forfeiture of all benefits and membership rights. The annual rate of interest credited to members' accounts is set by the System's Board of Trustees and is currently 6.0 percent.

Individual PLDs are permitted by law to withdraw from participation under the System. Withdrawal precludes the PLD's nonmember employees, if any, and its employees hired subsequent to withdrawal from membership in the System. Depending on the circumstances and requirements of the PLD's participation under the System, a withdrawn PLD has continuing funding obligations after withdrawal with respect to its employees who are active members at time of withdrawal and who continue to be members thereafter, to its terminated vested employee-members, and to its former employee-members who are retired at the time of withdrawal.

Retirement benefits are funded by contributions from members and employers and by earnings from investments. Disability and death benefits are funded by employer contributions and by investment earnings. Member and employer contributions are a percentage of applicable member compensation. Member contribution rates are defined by law and depend on the terms of the plan under which a member is covered. Employer contribution rates are determined by annual actuarial valuations.

The total funds managed by the System are constitutionally restricted as held in trust for the payment of pension and related benefits to its members. The System's Board of Trustees, in its fiduciary capacity, establishes the System's investment policies and their overall implementation. The System maintains separate reserves and accounts for each participating entity and performs separate actuarial valuations for each participating entity's respective plan. Management's interpretation of the State of Maine statutes is that all assets accumulated for the payment of benefits may legally be used to pay benefits, including refunds of member contributions, to any of the plan members or beneficiaries, and that the System is therefore regarded as administering a single plan for financial reporting purposes. During fiscal 1999, the System became aware that the State Auditor has a different view with respect to this, believing that the System should report as the administrator of multiple plans. The System has sought to take appropriate steps to resolve any issue related to its accounting and reporting. Regardless of this question, each of its participating entities is responsible for the funding of benefits related to that entity.

NOTES TO BASIC FINANCIAL STATEMENTS

Group Life Insurance Program

The System also administers a group life insurance program under a policy that is administered by a third-party insurance company. Premiums paid by or on behalf of those covered are set and collected by the System. Benefit payments are made by the insurance company. The System remits to the insurance company payments in the amount of benefits paid out and additional payments representing administrative fees.

Maine Learning Technology Fund

The System is responsible to invest and account for the funds that comprise the Maine Learning Technology Fund (formerly the Maine Learning Technology Endowment, renamed by Legislative enactment in 2003) well as to provide for its inclusion in the audit of the System.

2. Summary of Significant Accounting Policies

Basis of Accounting

The System's basic financial statements are prepared using the accrual basis of accounting. Plan member contributions are recognized in the period in which the contributions are due. Benefits and refunds are recognized when due and payable in accordance with the terms of each plan.

Investments

Investments are reported at fair value. Securities traded on a national or international exchange are valued at the last reported sales price at current exchange rates. Securities that are not traded on a national or international exchange are manually valued at the end of each month by the System's master custodian through a variety of external sources. The fair value of the pro rata share of units in commingled equity and fixed income mutual and index funds and common/collective trusts is determined by the respective fund trustee based on quoted sales prices of the underlying securities. Investments that do not have an established market are reported at estimated fair value. Investment purchases and sales are recorded as of their trade date.

Net investment income includes net appreciation (depreciation) in the fair value of investments (which includes interest and dividend income from common/collective trusts), interest income and dividend income from actively managed direct investments, foreign currency transaction gains and losses, securities lending income and investment expenses, which include investment management and custodial fees and all other significant investment related costs.

Due to/from Brokers

Amounts due to/from brokers for securities purchased or sold include, in addition to trades not yet settled, pending transfers among index funds managed by the System's index fund provider.

Cash and Cash Equivalents

The System considers all highly liquid debt instruments with maturities of three months or less, when purchased, to be cash equivalents.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make significant estimates and assumptions that affect the reported amounts of net assets held in trust for pension benefits at the date of the financial statements, the actuarial information included in the required supplementary information as of the actuarial information date, the changes in net assets during the reporting period and, when applicable, the disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

Risks and Uncertainties

The System makes investments, in accordance with the Trustees' investment policy, in a combination of equities, fixed income securities, derivative financial instruments, other investment securities and mutual funds and common/collective trusts holding such investments. The System prohibits its investment managers from using leverage in its derivative financial instruments or from investing in speculative positions. Investment securities and investment securities underlying certain investment securities are exposed to various risks, such as interest rate risk, market risk and credit risk. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the value of investment securities, it is at least reasonably possible that changes in the values of investment securities may occur in the near term and that such changes could materially affect the amounts reported in the statement of plan net assets and the statement of changes in plan net assets.

NOTES TO BASIC FINANCIAL STATEMENTS

Employer contributions to the System are established on the basis of actuarial assumptions related to economic indicators (e.g., interest rates, inflation rates), and member and retiree compensation and demographics. By law, the assumptions are adopted by the Board of Trustees based on recommendation of the System's actuary. The System is required by Maine law to perform an actuarial experience study whenever the Board of Trustees, on recommendation of its actuary, determines such a study to be necessary for actuarial soundness or prudent administration.

Reclassifications

Certain balances from the 2002 financial statements have been reclassified to conform to the 2003 presentation.

3. Cash and Investments

The System is authorized to invest in equities, fixed income securities, real estate and other investments. The System maintains certain deposits, cash equivalents and other investments with financial institutions.

At June 30, 2003 and 2002, cash and cash equivalents were comprised of the following:

	2003	2002
Cash on deposit with local banks	\$ 9,090,689	\$ 31,332,923
Short-term investment funds	173,327,519	88,523,440
Foreign currency deposits	10,876,081	16,185,120
Total	<u>\$ 193,294,289</u>	<u>\$ 136,041,483</u>

The System's investments would generally be categorized into one of three separate categories. Category 1 includes investments, including units in common/collective trusts, that are insured or registered and for which the securities or units are held by the System or by its agent in the System's name. Category 2 includes uninsured and unregistered investments for which the securities are held by the broker or agent in the System's name. Category 3 includes uninsured and unregistered investments for which the securities are held by the broker or agent, but not in the System's name. At June 30, 2003 and 2002, all of the System's investments are considered Category 1, except for real estate and securities held by/through others (e.g., custodians; brokers) under securities lending agreements, which are uncategorized.

The System has no single investment, whether a direct investment or an investment held through a commingled fund, that represents 5 percent or more of plan net assets.

Maine Learning Technology Fund

In fiscal year 2000, the Legislature established an endowment to be used to enable the full integration of appropriate learning technologies into teaching and learning for the State's elementary and secondary students. In fiscal year 2001, funds in the amount of \$50,000,000 were transferred to the System to be held in trust and invested on behalf of the State for endowment purposes. At June 30, 2003 and 2002, the value of this fund, which is invested in short-term high quality fixed income investments, was \$13,558,826 and \$30,977,898, respectively. The change in value was the net result of legislative and administrative withdrawals, gifts to the endowment and investment income. The amount remaining at June 30, 2003 is unrelated to and not available to pay plan benefits and therefore has been reflected as an asset and a liability in the accompanying statement of plan net assets.

4. Derivative Securities

Derivative financial instruments are financial contracts whose value depends on the value of one or more underlying assets, reference rates or financial indexes. They include futures, forwards, options and swap contracts. In addition, some traditional securities can have derivative-like characteristics, e.g., asset-backed securities, including collateralized mortgage obligations (CMOs), which are sensitive to changes in interest rates and to prepayments.

The System is a party, both directly and indirectly, to various derivative financial investments that are used in the normal course of investing to enhance returns on investments and to manage the risk of exposure to changes in value due to fluctuations

NOTES TO BASIC FINANCIAL STATEMENTS

in market conditions. The System's investments in derivatives are not leveraged, nor do they represent speculative investment activity. These investments may involve, to varying degrees, elements of credit and market risk. Credit risk, also called counterparty risk, is the possibility that loss may occur from the failure of a counterparty to perform according to the terms of the contract. Credit risk is managed, in the case of exchange-traded derivatives, by the execution of trades through a clearinghouse and, in the case of over-the-counter transactions, by managers' due diligence assessment/approval of counterparties. Market risk arises due to adverse changes in market price or to interest rate or foreign exchange rate fluctuations that may result in a decrease in the market value of a financial investment and/or increase its funding cost. Market risk is managed by imposing strict limits as to the types, amounts and degree of risk that investment managers may undertake. These limits are approved by the Board of Trustees and senior management, and the risk positions of the investment managers are reviewed on a periodic basis to monitor compliance with the limits.

Foreign currency forward contracts are used to hedge against the currency risk in the System's foreign equity and fixed income security portfolios. A foreign currency forward contract is an agreement to buy or sell a specific amount of a foreign currency at a specified delivery or maturity date for an agreed-upon price. The contracts are valued at forward exchange rates, and the changes in value of open contracts are recognized in the statement of changes in plan net assets. The unrealized gain or loss on forward currency contracts represents the difference between the value of the original contracts and the closing value of such contracts and is included in the statement of changes in fiduciary net assets. As of June 30, 2003 and 2002, the fair value of forward currency contracts held by the System was \$372,778 and \$0, respectively.

The System's fixed income managers invest in CMOs to improve the yield or adjust the duration of the fixed income portfolio. As of June 30, 2003 and 2002, the carrying value of the System's CMO holdings totaled \$59,410,315 and \$77,965,911, respectively.

The System also holds investments in futures and options, which are used to manage various risks within the portfolio. Futures and options of approximately \$145,535,671 and \$223,870,605 were held for investment purposes at June 30, 2003 and 2002, respectively. Gains and losses on futures and options are determined based upon quoted market prices and recorded in the statement of changes in plan net assets.

In addition to the derivative financial instruments directly held, the System may have indirect exposure to risk through its ownership interests in commingled investment funds, which use, hold or write derivative financial instruments. There also may be indirect exposure in the securities lending programs in which the System participates, in which some collateral pools may include derivatives (Note 5). Where derivatives are held in those funds/pools, risks and risk management are as described above.

5. Securities Lending

The System has entered into agreements with its master custodian to lend any type of security held in the System's portfolio and custodied at the master custodian to broker-dealers and other entities. The agreements require that all loans be collateralized by cash, irrevocable letters of credit, or other securities in an amount at least equal to 102 percent (105 percent for international securities) of the market value of the securities loaned. Loaned securities are marked to market daily and collateral adjusted accordingly. The contract with the custodian requires it to indemnify the System if: a) the borrowers fail to return the securities and b) the custodian has failed to comply with its contractual obligations regarding the securities lent. The System is not permitted to pledge or sell collateral securities received unless the borrower defaults. Either the System or the borrower can terminate all securities loans on demand. The average term of the loans is 10 days, and the cash collateral received is invested in one of the master custodian's short-term investment pools, of which the average duration is 5 to 15 days. The System has minimal credit risk to borrowers because the amount the System owes to the borrowers exceeds the amounts the borrowers owe the System. The market value of securities out on loan under this program at June 30, 2003 and 2002 is \$516,326,542 and \$467,387,438, respectively. The market value of collateral received from borrowers as of the same date is \$537,118,595 and \$482,421,064. Gross investment income from loaned securities was \$1,768,851 and \$2,331,726, for the years ended June 30, 2003 and 2002, respectively. Cash collateral of \$425,561,811 and \$378,847,024 at June 30, 2003 and 2002, respectively, received in securities lending arrangements is reported on the statement of plan net assets as an asset with a related liability as required under GASB 28. Some of the System's assets are held in common/collective trusts and are subject to similar agreements arranged by those trusts. The income from those arrangements and the associated collateral are not included in the securities lending amounts reported.

6. Contributions and Reserves

The Maine Constitution, Maine statutes and the System's funding policy provide for periodic employer contributions at actuarially determined rates that, based on certain assumptions and expressed as percentages of annual covered payroll, are

NOTES TO BASIC FINANCIAL STATEMENTS

sufficient to accumulate adequate assets to pay benefits when due. Level percentage of payroll employer contribution rates are determined using the entry age normal actuarial funding method, except for the plan under which legislators are covered, in which the aggregate method is used. The System also uses the level percentage of payroll method to amortize the unfunded liability of the State and teacher plan over a closed period that cannot be longer than 31 years from July 1, 1997 but that may be, and at certain times has been, shorter than that period (Note 7). For participating local districts having separate (i.e., unpooled) unfunded liabilities, the level percentage of payroll method is also used. Amortization periods for these separate unfunded liabilities range from 7 years to 23 years.

The State of Maine is required by Maine law to remit a percentage of its unallocated General Fund Surplus, if sufficient, at the end of its fiscal year to the System, in order to reduce any unfunded pension liability for state employees and teachers. For fiscal 2003, this additional contribution was approximately \$10,500,000. On the basis of the State's firm estimate this amount is included in the contributions receivable at June 30, 2003.

Significant actuarial assumptions used to compute contribution requirements are the same as those used to compute the standardized measure of the pension obligation discussed in the required supplemental information (pages 21-23).

Retirement contribution rates for all employee-members are set by law. Employer retirement contribution rates as applied to State employee-members' and teacher-members' compensation are the actuarially determined rates as adjusted in the State's budget process to reflect differences in, e.g., salary growth projections. PLD employer contribution rates are the actuarially determined rates. The rates in effect in 2003 and 2002 are as follows:

	2003	2002
State		
Employees (1)	7.65 - 8.65%	7.65 - 8.65%
Employer (1)	12.43 - 37.12%	12.19 - 36.35%
Teachers		
Employees	7.65%	7.65%
Employer	17.71%	17.71%
Participating local districts		
Employees (1)	3.0 - 8.0%	3.0 - 8.0%
Employers (1)	1.7 - 6.5%	1.7 - 6.5%

(1) Employer and employee retirement contribution rates vary depending on specific terms of plan benefits for certain classes of employees and/or, in the case of PLDs, in benefit plan options selected by a particular PLD. The contributions of withdrawn entities that do not have active employees but continue to have other liabilities are set in dollar amounts, not as rates.

7. Statutory and Constitutional Requirements

In 1998, the State Legislature enacted a law that required the State to fund unfunded actuarial liabilities existing as of June 30, 1998, of the State and teacher plans over a period not to exceed 25 years, commencing June 30, 1998. This statute shortened the required amortization period of not more than 31 years from June 30, 1997, put in place by an amendment to the Maine Constitution approved at referendum in November 1995. This Constitutional amendment also prohibits the creation of new unfunded liabilities in the State and teacher plans except those arising from experience losses, which must be funded over a period of not more than ten years. In addition, the amendment requires use of actuarially sound current-cost accounting, reinforcing the existing statutory requirements. In 2000, the amortization period was further reduced by the Legislature to 19 years, commencing June 30, 2000. The two legislative changes made in 1998 and 2000 shortened the amortization period by a total of nine years. In 2003, the Legislature relengthened the period to the full extent of the then-remaining Constitutional years for the FYs 2004-2005 biennium and reshortened the period effective July 1, 2005, which is the start of FY 2006, to the 14 years that will then remain in the earlier shortened period.

NOTES TO BASIC FINANCIAL STATEMENTS

8. System Employees - Retirement and Retiree Health Benefits

The System, as the employer of its staff, is a participating employer (i.e., a PLD) in the Consolidated Plan for Participating Local Districts administered by the Maine State Retirement System. System employees are required by statute, as PLD employees, to contribute 6.5 percent of their annual covered salaries. The System is required to contribute at an actuarially established normal cost rate under the actuarial valuation of the Consolidated Plan and also to make the payments required to amortize its Initial Unpooled Unfunded Actuarial Liability (IUUAL). The normal cost rate was 2.8 percent of annual covered payroll for 2003 and 2002, respectively, and the employer contribution on behalf of its employees was \$534,672 and \$326,736 for 2003 and 2002, respectively, including both normal cost and IUUAL payment. The 2003 contribution included payment in full of the System's \$265,398 IUUAL balance. The actuarial assumptions used in the Consolidated Plan valuation are described in the actuarial assumptions and methods footnote to the required supplementary information.

The System also offers post-retirement medical benefits for all of its employees who retire from the System with an immediate pension. The System pays the premium cost of these benefits for those first employed before July 1, 1991 and pays all or a portion of the premium cost for those employed after that date, depending on their years of participation in the health plan. Employees terminating employment with at least 25 years of service credit but not immediately retiring may defer eligibility for provision of health benefits at retirement. Included in administrative expenses in 2003 and 2002 is a charge of \$174,476 and \$154,000, respectively, to cover all current expenses and to establish a liability for future benefits. As of June 30, 2003 and 2002, there is \$1,611,151 and \$1,390,451, respectively, in other liabilities for the payment of future health insurance benefits. The charge is equal to the actuarially determined expense as calculated by amortizing, as a level percent of payroll, the present value of future benefits less assets over a 25-year period, of which 16 years remain. The present value of the future benefits for fiscal year 2003 and 2002 was \$4,428,000 and \$3,945,000, respectively.

SCHEDULE OF FUNDING PROGRESS

	(a)	(b)	(b-a)	(a/b)	(c)	((b-a)/c)

1996	241,166,296	247,406,546	102.6%

NOTES TO REQUIRED SUPPLEMENTAL INFORMATION

1. Basis of Presentation

For basic financial statement reporting purposes, the information provided on the required supplemental information schedules includes combined amounts for all participating entities: State employees, teachers, judicial and legislative employees, as well as employees of participating local districts.

2. Actuarial Assumptions and Methods

The information in the required supplemental schedules was determined as part of the actuarial valuations at the dates indicated. Additional information as of the latest actuarial valuation date, June 30, 2003, is as follows:

Funding Method

Costs are developed using the entry age normal cost method (based on a level percentage of covered payroll), except for the costs of the legislative plan, where the aggregate method is used. Under the entry age normal method, the accrued liability and the present value of future normal costs are determined by summing the individual entry age results for each participant. The normal cost is then determined in aggregate by spreading the present value of future normal costs as a level percentage of expected future covered payroll. Entry age is defined as the first day service is credited under the plan.

Experience gains and losses, i.e., decreases or increases in liabilities and/or in assets when actual experience differs from the actuarial assumptions, adjust the unfunded actuarial accrued liability.

Asset Valuation Method

Assets are valued for funding purposes using a three-year moving average. Under this method, the year-end actuarial asset value equals 1/3 of the current fiscal year-end fair value, as reported in the financial statements, plus 2/3 of the "expected market value." For purposes of this calculation, the "expected market value" is the preceding fiscal year's actuarial asset value, adjusted for the current fiscal year's cash flows with interest accumulated at the actuarial assumed rate of return on investments.

Amortization

The unfunded actuarial accrued liability of the state employee and teacher plan is amortized on a level percentage of payroll over the amortization period then in effect under statutory and constitutional requirements (Note 7). The unfunded actuarial accrual liability of the judicial plan is amortized over a period of which 14 years remained at June 30, 2003.

The IUUAL of PLDs are amortized over periods established for each PLD separately. During fiscal years 2003 and 2002, various PLDs contributed in total approximately \$13,933,000 and \$163,054,000, respectively, to reduce or pay in full their Initial Unpooled Unfunded Actuarial Liabilities. The Consolidated Plan has no Pooled Unfunded Actuarial Liability.

Significant actuarial assumptions employed by the actuary for funding purposes as of June 30, 2003 are as follows:

Investment Return - 8 percent per annum, compounded annually.

Salary Increases - State employee and teacher plan, 5.5 percent to 9.5 percent per year; judicial and legislative plans, 5 percent per year; Consolidated Plan for PLDs, 4.5 percent to 9 percent per year.

Mortality Rates - Active State employee members, active participating local district members, nondisabled State employee retirees and nondisabled participating local district members with retirement dates on or after July 1, 1998 - UP 1994 Tables; Active teacher members and nondisabled teacher retirees with retirement dates on or after July 1, 1998 - 85 percent of UP 1994 Tables; Nondisabled State employee retirees and nondisabled participating local district members with retirement dates before July 1, 1998 - GAM 1971 Tables; Nondisabled teacher retirees with retirement dates before July 1, 1998 - GAM 1971 Tables with ages set back two years; All recipients of disability benefits with retirement dates before July 1, 1998 - 1964 Commissioners Disability Table; All recipients of disability benefits with retirement dates on or after July 1, 1998 - RPA 1994 Table for pre-1995 Disabilities.

Cost of Living Benefit Increases - 4 percent per annum.

NOTES TO REQUIRED SUPPLEMENTAL INFORMATION

3. Group Life Program

The Group Life Insurance Program administered by the System provides for a life insurance benefit for certain active members equal to a member's annual base compensation as defined by statute. Upon retirement, life insurance coverage in the amount of the member's average final compensation is provided with a reduction of 15 percent per year until the greater of 40 percent of the average final compensation or \$2,500 is reached. To be covered in retirement, retirees must have participated in the Group Life Program for a minimum of ten years. Premiums are remitted to the System by the employer. The State pays a premium rate of \$0.30 per \$1,000 of coverage per month for state employees. Teachers and employees of participating local districts pay a premium rate of \$0.22 and \$0.46 per \$1,000 of coverage per month, respectively, some or all of which may be deducted from employees' compensation as per individual agreements between employers and employees. Assumptions used to determine the actuarial liability are the same as for the pension plan. At June 30, 2003 and 2002, the net assets held in trust for group life insurance benefits were \$39,042,736 and \$36,629,817, respectively. At June 30, 2003 and 2002, the plan had the following actuarially determined liabilities:

<i>(in millions)</i>	2003	2002
Actuarial liabilities		
Active members	\$ 44.6	\$ 40.3
Retired members	42.7	42.9
Total	<u>\$ 87.3</u>	<u>\$ 83.2</u>

**Independent Auditors' Report on Compliance and on
Internal Control over Financial Reporting Based on an Audit of Basic Financial
Statements Performed in Accordance with
*Government Auditing Standards***

To the Board of Trustees of
Maine State Retirement System

We have audited the basic financial statements of the Maine State Retirement System (the "System"), which is a component unit of the State of Maine, as of and for the year ended June 30, 2003 and have issued our report thereon dated December 11, 2003. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States of America.

Compliance

As part of obtaining reasonable assurance about whether the System's basic financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations and contracts, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance that are required to be reported under *Government Auditing Standards*.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered the System's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing an opinion on the financial statements and not to provide assurance on the internal control over financial reporting. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control over financial reporting that might be material weaknesses. A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. We noted no matters involving the internal control over financial reporting and its operation that we consider to be material weaknesses.

This report is intended for the information of the Board of Trustees, management and government agencies and is not intended to be and should not be used by anyone other than these specified parties.

PricewaterhouseCoopers LLP

ACTUARIAL SECTION

The System's Comprehensive Annual Financial Report (CAFR) includes the actuarial valuations for its plans prepared as of June 30th of the fiscal year prior to the fiscal year of the CAFR itself. These are presented in order to better align the data contained in the valuation with its resulting effect on the System's financial condition, as described by the financial statements.

Actuarial valuations presented in this FY 2003 Comprehensive Annual Financial Report are for the year ending June 30, 2002. The valuations are used to establish employer contribution rates. Four valuations are presented:

- ◆ State Employee and Teacher Plan
- ◆ Legislative Retirement System
- ◆ Judicial Retirement System
- ◆ Consolidated Plan for Participating Local Districts

State and Teacher, Legislative and Judicial Plans – Results of plan valuations prepared as of June 30 of an even-numbered year are implemented as employer contribution rates in the State's biennial budget that covers the two-year period beginning July 1st of the following year of the valuations. For example, the results of the June 30, 2000 valuations established the employer contribution rates for the 2002-2003 biennium which began July 1, 2001. The State of Maine makes the employer contribution for all non-grant funded employees who are members under the State Employee and Teacher Plan and the Legislative and Judicial plans. Valuation results as of June 30 of odd-numbered years, such as the June 30, 2001 valuation, while comprising important information, are not used to set State employer contributions rates.

Consolidated Plan for Participating Local Districts (PLD) – The Consolidated Plan valuation is prepared each year, reporting results as of June 30th. These results are then implemented in PLD budgets covering a twelve month period that begins as of July 1st one year later. For example, the valuation results for the period ending June 30, 2001 established the participating employer rates for the twelve month period beginning July 1, 2002. Each participating local district that is in the Consolidated Plan makes the employer contribution required by the Consolidated Plan valuation for the plan(s) covering its employee members.

Maine State Retirement System
#46 State House Station
Augusta, ME 04333-0046

Dear Members of the Board:

At your request, we have conducted our annual actuarial valuation of the State Employee and Teacher Plan of the Maine State Retirement System. The results of the valuation are contained in the following report. Any distribution of this report must be in its entirety including this cover letter, unless prior written consent from Milliman USA is obtained.

The actuarial assumptions used in performing this valuation have been recommended by the actuary and adopted by the Board of Trustees based on Milliman's most recent review of the System's experience completed during Fiscal Year 1998. We believe the assumptions used, in the aggregate, reflect our best estimate of anticipated future experience of the plan. The results of this report are dependent upon future experience conforming to these assumptions. To the extent that future experience deviates from these assumptions, the true cost of the plan could vary from our results. The Board of Trustees has the final decision regarding the appropriateness of the assumptions.

The assumptions and methods used in performing this valuation meet the parameters set by Government Accounting Standards Board (GASB) Statement No. 25, Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contributions Plans.

In preparing our report we relied, without audit, on information (some oral and some written) supplied by the Retirement System. This information includes, but is not limited to, plan provisions, employee census data and financial information. We reviewed the census data for reasonableness, and for consistency with the prior year's data. It should be noted that if any data or other information is inaccurate or incomplete, our calculations may need to be revised.

We hereby certify that, to the best of our knowledge, this report is complete and accurate and has been prepared in accordance with generally recognized and accepted actuarial principles and practices which are consistent with the applicable Guides to Professional Conduct, Amplifying Opinions, and Supporting Recommendations and Interpretations of the American Academy of Actuaries.

Sincerely,

Milliman USA

I, Theresa Leatherbury, am a consulting actuary for Milliman USA. I am also a member of the American Academy of Actuaries and meet their Qualification Standards to render the actuarial opinion contained herein.

I, Althea Schwartz, am a consulting actuary for Milliman USA. I am also a member of the American Academy of Actuaries and meet their Qualification Standards to render the actuarial opinion contained herein.

Althea Schwartz, F.S.A.
Principal

SECTION I BOARD SUMMARY

OVERVIEW

This report presents the results of the June 30, 2002 actuarial valuation of the State Employee and Teacher Plan of the Maine State Retirement System (MSRS). The primary purposes of performing the annual actuarial valuation are to:

- 1) determine the contributions that will be paid by the State effective July 1, 2003 (fiscal year 2004), and effective July 1, 2004 (fiscal year 2005);
- 2) measure and disclose, as of the valuation date, the financial condition of the Plan;
- 3) indicate trends in the financial progress of the Plan;
- 4) provide specific information and documentation required by the Government Accounting Standards Board (GASB).

In this section of the report, we present a summary of the above information in the form of:

- ◆ the actuary's comments;
- ◆ the prior year's experience of the Plan's assets, liabilities, contributions, and membership;
- ◆ a series of graphs highlighting key trends experienced by the Plan; and
- ◆ a tabular summary, intended for quick reference purposes, of all the principal results from this year's valuation, compared to the prior year's.

ACTUARY'S COMMENTS

As a result of assets earning a negative return, (7.55%), considerably below the 8% investment return assumption, the Plan has an unfunded actuarial liability of \$2,593 million as of June 30, 2002 compared to an unfunded actuarial liability of \$2,157 million measured at the June 30, 2001 valuation. This experience results in an increase in the State contribution rate of 2.02% of payroll, from 17.30% at June 30, 2001, to 19.32% at June 30, 2002.

However, thanks to the Plan's asset smoothing method adopted by the Board, which dampened the prior decade's asset run-up, the resulting impact from this year's investment performance was somewhat mitigated. The actuarial, or smoothed, rate of return measured from this past year was a positive 1.18%, or 6.8% less than our assumption. This explains why the overall Plan funding ratio of assets to liabilities decreased only slightly from 72.9% at June 30, 2001, to 69.4% at June 30, 2002.

The State contribution rate increase was mainly attributable to the investment loss, relative to the assumed investment return of 8% and, on a smoothed basis, of \$402 million. Combined with a liability loss of \$34 million, due largely to pay increases above assumed levels, this resulted in a Plan experience net loss of \$436 million.

Finally, while the results are not on the favorable side this year, we emphasize again, as we have so often in the past, that the financing of any retirement plan is a long term proposition, and that annual fluctuations are to be expected and should not by themselves be cause for concern. We continue to maintain that the overall financial condition of the Plan is healthy, and that there are procedures, assumptions and methods in place, which in our opinion adequately and appropriately finance the emerging long-term liabilities of the Plan.

The balance of this section summarizes Plan trends, and provides the principal details on this year's experience.

PRIOR YEAR EXPERIENCE

ASSETS

The actuarial value of assets is calculated on the total invested assets of the System, that is, assets attributable to the State Employee and Teacher Plan, the Judicial Plan, the Legislative Plan and the participating local district plans, Consolidated and non-consolidated.

Total System assets are measured on both a market value and an actuarial or smoothed value basis. The actuarial smoothing method, described in Appendix B, reflects 33% of a current year's actual market performance. In periods of high returns, this method significantly dampens the amount of asset gains above the assumed return of 8%. Conversely, in periods of returns less than the assumed return, losses are dampened. The primary advantage of this smoothing technique is contribution stability.

As stated earlier, for the year ending June 30, 2002, while the total assets of the System earned a negative 7.55% on a market value basis, on a smoothed basis the return was a positive 1.18%. Compared to an expected asset growth, using the 8% investment return assumption, the market value of assets fell short by \$1,098 million. A similar comparison using actuarial or smoothed basis produced a loss of \$508 million. The specific changes between the prior year and this year, for the System's plans combined, are presented below.

ALL PLANS OF SYSTEM		
Item (In Millions)	Market Value	Actuarial Value
June 30, 2001 value	\$ 6,994	\$ 7,390
Employer Contributions	415	415
Member Contributions	123	123
Benefit Payments	(403)	(403)
Expected Investment Earnings (8%)	565	596
Expected Value June 30, 2002	\$ 7,694	\$ 8,121
INVESTMENT GAIN (LOSS)	(1,098)	(508)
June 30, 2002 value	\$ 6,596	\$ 7,613

Market value, actuarial value and asset loss (or gain) are next allocated to the separate plans. For the State Employee and Teacher Plan, the market value of assets at June 30, 2002 was \$5,092 million and the corresponding actuarial value was \$5,877 million. The Plan's share of the \$508 million loss on the actuarial assets was \$402 million.

The specific changes for the State Employee and Teacher Plan are presented below.

STATE EMPLOYEE AND TEACHER PLAN		
Item (In Millions)	Market Value	Actuarial Value
June 30, 2001 value	\$ 5,491	\$ 5,801
Employer Contributions	242	242
Member Contributions	104	104
Benefit Payments	(333)	(333)
Expected Investment Earnings (8%)	440	465
Expected Value June 30, 2002	\$ 5,944	\$ 6,279
INVESTMENT GAIN (LOSS)	(852)	(402)
June 30, 2002 value	\$ 5,092	\$ 5,877

LIABILITIES

Three different measures of liabilities are calculated for the Plan: a present value of future obligations (PVB), an actuarial liability (using the Entry Age Normal, or EAN, actuarial method), and an accounting, or accrued benefit, liability (PVAB). Section III of this report describes the development of each. Only the actuarial liability is analyzed in terms of gain and/or loss experience, which then is used to determine the Plan's funding and accounting (GASB) disclosures. During the plan year ending June 30, 2002, the actuarial liabilities experienced an overall loss of \$34 million, which is 0.5% of the Plan's measured actuarial liability. The primary cause for liability experience being worse than anticipated this past year was pay increases greater than expected by the relevant assumption. We will continue to monitor gains and losses to assure that no significant new patterns emerge unexpectedly.

LIABILITIES (IN MILLIONS)	TOTAL VALUE (PVB)	ACTUARIAL (EAN)	ACCOUNTING (PVAB)
June 30, 2001	\$9,340	\$7,959	\$6,393
June 30, 2002	\$9,923	\$8,470	\$6,992

UNFUNDED LIABILITIES AND FUNDING RATIOS

When a retirement plan's benefit liabilities are greater than its assets, the difference between the two is the unfunded liability. This difference is measured in two ways: unfunded **actuarial liabilities**, which compares the actuarial liabilities to the actuarial asset value, and unfunded **accrued benefits**, which compares the present value of benefits accrued as of the valuation date to the market value of assets. These measures are shown below for the State Employee and Teacher Plan at June 30, 2001 and June 30, 2002, as well as the corresponding funding ratios (assets divided by liabilities) at each date.

(IN MILLIONS)	ACTUARIAL	ACCRUED (PVAB)
6/30/2001 Net (Surplus) Unfunded	\$ 2,157	\$ 902
Funding Ratio	72.9%	85.9%
6/30/2002 Net (Surplus) Unfunded	\$ 2,593	\$ 1,899
Funding Ratio	69.4%	72.8%

Because the accrued benefit, or PVAB, measure reflects the full (unsmoothed) impact of investment gains and losses, changes in this related funding ratio are also unsmoothed, appearing as larger movements.

CONTRIBUTIONS

In Section IV, we show the various contribution rates by plans within the State Employee and Teacher Plan. Below we present overall the State contribution rate for all of these plans, and compare it to the rate developed in the June 30, 2001 actuarial valuation. In summary, due to both investment losses and liability losses, the overall State contribution rate has increased by 2.02% of payroll. Because of the State's biennial budgeting practice, contribution rates resulting from this valuation will set rates for the next (FY 2004 and FY 2005) biennium.

RATE AS PERCENT OF COVERED PAYROLL	
June 30, 2001 State Contribution Rate	17.30%
Increase due to Investment Loss	1.89%
Increase due to Liability Loss	0.13%
June 30, 2002 State Contribution Rate	19.32%

MEMBERSHIP

There are three types of plan participants: current active members, terminated members who retain a right to a deferred "vested" benefit, and benefit recipients, who may be retired former members, disabled members or beneficiaries of deceased active, retired or disabled members. In Appendix A, we present extensive details on membership statistics. Below, we compare totals in each group between June 30, 2001 and 2002.

As shown below, there was an overall increase in participation during the year of 2%.

	6/30/2002	6/30/2001	CHANGE
Active Members	43,246	42,575	1.6%
Terminated "Vested" Members	2,448	1,894	29.3%
Benefit Recipients	23,228	22,819	1.8%
TOTAL	68,922	67,288	2.4%

TRENDS

One of the best ways to measure or evaluate the financial condition of a retirement plan is to examine the historical trends that are evolving. Below, we present three charts which present 10 years worth of trend information on the assets and liabilities of the State Employee and Teacher Plan, annual cash flows in and out, and the State's overall contribution rate. Our comments on each follow.

CHART A: ASSETS / LIABILITIES - STATE AND TEACHER ONLY

CHART B: CASH FLOWS - TOTAL SYSTEM

CHART C: STATE CONTRIBUTION RATE - STATE AND TEACHER ONLY

COMMENTS

Chart A depicts the aforementioned investment and liability performance losses of the year ending June 30, 2002. Despite those losses, the ratio of assets to liabilities, which has continuously improved since early 1980's, is the third best ever for the State Employee and Teacher Plan.

Chart B presents an emerging trend being faced by many retirement systems with the aging of the baby boomer generation. Payments to retirees are on the increase, while cash into plans from employer and employee contributions is stable or declining. This is not unanticipated, and essentially is the reason for funding and investment strategies that seek to build plan assets in earlier years when contributions being paid in exceed benefit payments out. The 2002 entry reflects the one-time impact of several of the State's participating local districts paying off their unfunded liability obligations to the System's Consolidated Plan for Participating Local Districts.

Finally, Chart C, looks at changes in the State's overall contribution rate for the State Employee and Teacher Plan. It shows the impact of the past decade's sustained investment gains. After two years of market downturn, this year's rate is the highest of the range shown.

SECTION II ASSETS

The purpose of an actuarial valuation is to assess the funded status of a pension plan at a certain date and to establish, on the basis of that assessment, the plan's funding requirements. On the asset side of a plan's funded status, the relevant measure is net assets available for benefits. "Assets" includes the System's investment portfolio, committed for investment management to outside professionals, buildings and land owned by the System outside of the investment portfolio, and cash managed by the System outside of the investment portfolio.

The investment portfolio is by far the largest of these assets in dollar value, so much so, that its value is often used, in contexts, other than the actuarial valuation, as a kind of proxy for total assets. The investment policy of the System's Board of Trustees governs the investment portfolio and it is to the portfolio that the Trustees' asset allocation policy applies. However, for purposes of evaluating fairly the relationship of plan assets to plan liabilities, the value of all assets is properly to be included.

The value of plan assets for actuarial valuation purposes must be established and disclosed on a market value basis. Thereafter, for purposes of establishing rational plan funding requirements, the market value may be, and in the case of the System's plans is, smoothed. Market value represents a "snap-shot" or "cash-out" value which provides a basis for measuring investment performance from one year to the next. Market value, however, can fluctuate widely, particularly in the short term. As a result, market value is usually not suitable for long range planning.

In an ongoing pension plan, the long range is the important perspective. Actuarial value, or "carrying value" is market value that has been smoothed and is the actuary's best estimate of long term asset value, providing a more useful evaluation of the fund's ongoing ability to meet its obligations. The actuarial smoothing methodology employed in the valuation of the System's plans is explained later in this section.

In this section we present the following information on assets:

- ◆ Disclosure of the value of plan assets on a market basis as measured at June 30, 2002 and June 30, 2001;
- ◆ Statement of the changes in asset value on a market basis during the year;
- ◆ Application to market value of the actuarial smoothing methodology that results in the actuarial value of assets;
- ◆ Attribution of the actuarial value of assets among the System's plans; and
- ◆ A statement of the return on plan assets for the year, on both a market value basis and an actuarial value basis.

Disclosure of Plan Market Value Of Assets

STATEMENT OF ASSETS AT MARKET VALUE		
(In Millions)		
	June 30,	
	2002	2001*
Net Value of Investment Portfolio	\$ 6,566	\$ 6,992
Buildings, land	3	2
Cash external to portfolio	27	0
Net Assets Available for Benefits	<u>\$ 6,596</u>	<u>\$ 6,994</u>

* Characterization of assets differs from 6/30/2001 valuation because of clarifications and corrections. Total amount of Net Assets Available for benefits is unchanged.

CHANGES IN ASSET VALUE (MARKET VALUE BASED) IN VALUATION YEAR:

The components of asset change are:

- ◆ Contributions received from members and employers
- ◆ Benefits paid out
- ◆ Investment Income/(Loss) (realized and unrealized)

The specific changes during 2002 are presented below:

CHANGES IN MARKET VALUES	
Plan Assets/Market Value – June 30, 2001	\$ 6,993,547,146
Member Contributions Received	122,613,975
Employer Contributions Received	415,551,283
Benefits Paid Out	(403,208,003)
Investment Income/(Loss)	<u>(532,832,468)</u>
Plan Assets/Market Value – June 30, 2002	\$ 6,595,671,933

ALLOCATION OF ACTUARIAL VALUE OF ASSETS:

In the investment portfolio, assets for all of the System's plans are commingled for investment purposes. Other assets are in effect commingled in that their value is attributed across all of the plans. The actuarial smoothing methodology is applied on the market value of total assets. This produces a smoothing factor which is then applied to the market value of assets attributable to each of the plans. The smoothing factor derived in this valuation is 1.15417 (\$7,612,509,160 / \$6,595,671,933). The allocation of actuarial value of assets to each of the System's plans is shown in the following chart.

ALLOCATION OF ACTUARIAL VALUE OF ASSETS AS OF JUNE 30, 2002		
	Market Value	Actuarial Value
Teachers	\$ 3,119,594,945	\$ 3,600,534,614
State (Regular and Special)	1,972,524,840	2,276,623,757
Judges	32,119,276	37,071,019
Legislators	5,411,908	6,246,247
Participating Local Districts (Consolidated and Non-Consolidated)	1,466,020,964	1,692,033,523
Total Fund	\$ 6,595,671,933	\$ 7,612,509,160

INVESTMENT PERFORMANCE:

The Market Value of Assets (MVA) returned (7.6%) during 2002. This is lower than the plan's assumed return of 8% but not unexpected in a year, the second in a row, in which investment markets performed poorly.

On the basis of the actuarial value of assets, the return at June 30, 2002 was 1.2%. This return, as compared to the return on a market value basis, demonstrates the effect of smoothing which, while dampening the effect of market gains in good times, serves to cushion the effect of losses in periods of market decline.

APPLICATION TO MARKET VALUE OF SMOOTHING METHODOLOGY TO PRODUCE THE ACTUARIAL VALUE OF ASSETS:

The Actuarial Value of Assets represents a "smoothed" value developed by the actuary to reduce the volatility evident in the investment markets, particularly over short time periods. Because the System's plans are properly regarded as virtually perpetual in nature, it is appropriate to manage their funding with strategies that in effect require that short term events be seen within the longer perspective. For the System, the actuarial value of assets at a given valuation date is calculated by adding to the Adjusted Actuarial Value as Expected at the given valuation date an amount that is 33% of the difference between the Adjusted Actuarial Value as Expected at the valuation date and the Market Value of Assets at that date. The following table illustrates the calculation of the Actuarial Value of Assets for the June 30, 2002 valuation.

DEVELOPMENT OF ACTUARIAL VALUE OF ASSETS AS OF JUNE 30, 2002		
1.	Actuarial Value of Assets at June 30, 2001	\$ 7,389,558,863
2.	Amount in (1) with interest to June 30, 2002 at 8.00% per year	7,980,723,572
3.	Employer & member contributions for the Plan Year ended June 30, 2002	538,165,258
4.	Interest on contributions assuming payments made uniformly throughout the year to June 30, 2002 at 8.00% per year	20,920,977
5.	Disbursements from Trust during the period June 30, 2001 through June 30, 2002	403,208,003
6.	Interest on disbursements to June 30, 2002 at 8.00% per year	15,674,029
7.	Expected adjusted Actuarial Value of Assets at June 30, 2002 = (2) + (3) + (4) - (5) - (6)	8,120,927,775
8.	Actual Market Value of Assets at June 30, 2002	6,595,671,933
9.	Difference Between (8) and (7)	(1,525,255,842)
10.	Actuarial Value of Assets at June 30, 2002 = (7) + 33% of (9)	\$7,612,509,160

SECTION III LIABILITIES

In this section we present detailed information on liabilities of the State Employee and Teacher Plan including:

- ◆ Disclosure of Plan liabilities as measured at June 30, 2002 and June 30, 2001;
- ◆ Statement of changes in these liabilities during the year; and
- ◆ A projection of future liabilities.

DISCLOSURE

Several types of liabilities are calculated and presented in this report. Each type reflects the needs of persons ultimately using the figures and the purpose for which they are using them.

- ◆ **Total Future Obligations:** Used for analyzing the financial outlook of the Plan, this represents the amount of money needed today to fully pay off all future benefits and expenses of the Plan, assuming participants continue to accrue benefits.
- ◆ **Actuarial Liabilities:** Used for funding calculations and GASB disclosures, this liability is calculated by taking the Total Future Obligations above and subtracting the present value of future Member Contributions and future Employer Normal Costs under an acceptable actuarial funding method. The method employed for the State Employee and Teacher Plan is referred to as the Entry Age Normal funding method.
- ◆ **Accrued Liabilities:** Used for communicating the current level of liabilities, this liability represents the total amount of money needed today to fully pay off the current accrued obligations of the Plan, assuming no future accruals of benefits. These liabilities are also required for accounting purposes (FAS 35) and are used to assess whether a plan can meet its current benefit commitments.

The table below discloses each of these liabilities for the current, and prior, State Employee and Teacher Plan valuation. With respect to each disclosure, a subtraction of the appropriate value of Plan assets yields, for each respective type, a net surplus or an unfunded liability.

LIABILITIES/NET (SURPLUS) UNFUNDED	6/30/2002	6/30/2001
Total Obligations		
Active Participant Benefits	\$ 6,208,946,580	\$ 5,840,233,305
Retiree and Inactive Benefits	3,714,368,070	3,499,338,199
Total Obligations	\$ 9,923,314,650	\$ 9,339,571,504
Market Value of Assets	5,092,119,785	5,490,520,609
Future Member Contributions	810,325,166	770,137,523
Future State Contributions	4,020,869,699	3,078,913,372
Total Resources	\$ 9,923,314,650	\$ 9,339,571,504
Actuarial Liability		
Total Liabilities	\$ 9,923,314,650	\$ 9,339,571,504
Present Value of Future Normal Costs Under Entry Age Method	643,154,074	610,624,118
Present Value Of Future Member Contributions	810,325,166	770,137,523
Actuarial Liability	\$ 8,469,835,410	\$ 7,958,809,863
Actuarial Value of Assets	5,877,158,371	5,801,422,994
Net (Surplus) Unfunded	\$ 2,592,677,039	\$ 2,157,386,869
Accrued Liability		
Total Liabilities	\$ 9,923,314,650	\$ 9,339,571,504
Less Present Value of Future Benefit Accruals	(2,931,657,233)	(2,946,077,932)
Accrued Liability	\$ 6,991,657,417	\$ 6,393,493,572
Market Value of Assets	5,092,119,785	5,490,520,609
Net (Surplus) Unfunded	\$ 1,899,537,632	\$ 902,972,963

CHANGES IN LIABILITIES

Each of the liabilities disclosed in the prior table is expected to change at each valuation. The components of that change, depending upon which liability is analyzed, can include:

- new hires since the last valuation;
- benefits accrued since the last valuation;
- plan amendments increasing benefits;
- passage of time during which interest accrues to the prior liability;
- benefits paid to retirees since the last valuation;
- participants retiring, terminating, or dying at rates different than expected;
- a change in actuarial or investment assumptions; and
- a change in the actuarial funding method.

Unfunded liabilities or surpluses will change because of all the above, and also due to changes in fund assets resulting from:

- employer contributions different than expected;
- investment earnings different than expected; and
- a change in the method used to measure plan assets.

In each valuation we report on those elements of change which are of particular significance, potentially affecting the long-term financial outlook of the Plan. Below we present the key changes in liabilities since the last valuation.

	\$ IN MILLIONS		
	TOTAL OBLIGATION	ACTUARIAL LIABILITY	ACCRUED LIABILITY
Liabilities 6/30/2001	\$ 9,340	\$ 7,959	\$ 6,393
Liabilities 6/30/2002	\$ 9,923	\$ 8,470	\$ 6,992
Liability Increase (Decrease)	\$ 583	\$ 511	\$ 599
Change due to:			
Plan Amendment	\$ 0	\$ 0	\$ 0
Assumption Change	\$ 0	\$ 0	\$ 0
Actuarial (Gain)/Loss	N/A	\$ 34	N/A
Benefits Accumulated and Other Sources	\$ 583	\$ 477	\$ 599

**ACTUARIAL LIABILITY
AS OF JUNE 30, 2002**

	TOTAL PLAN	TEACHERS	STATE REGULAR	SPECIAL PLANS
1. Actuarial Liabilities for:				
a. Active Members	\$ 4,755,467,340	\$ 3,288,166,790	\$ 1,232,012,787	\$ 235,287,763
b. Retired, Disabled and Beneficiary Members	3,594,668,294	2,079,988,493	1,287,606,177	227,073,624

3. Actuarial Value of Assets	<u>5,877,158,371</u>	<u>3,600,534,614</u>	<u>1,965,408,425</u>	<u>311,215,332</u>
4. Unfunded Actuarial Liability (2 - 3)	<u>\$ 2,592,677,039</u>	<u>\$ 1,841,508,284</u>	<u>\$ 600,022,700</u>	<u>\$ 151,146,055</u>

SECTION IV CONTRIBUTIONS

In the process of evaluating the financial condition of any pension plan, the actuary analyzes the assets and liabilities to determine what level (if any) of contributions is needed to properly fund the plan. Typically, the actuarial process will utilize a funding approach that will result in a pattern of contributions that is both stable and predictable.

For this Plan, the funding approach employed is the Entry Age Normal Actuarial Cost Method. Under this method there are two components to the total contribution, a normal cost and, given the Plan's unfunded actuarial liability, an amortization payment. A normal cost is determined for each individual participant which, when added up for all participants, represents the Plan's total normal cost. Each year's normal cost represents the cost to fund that portion of the total future obligations which has been allocated to the current year, based upon the actuarial cost method in use.

The amortization payment, on the other hand, is not calculated for individual participants but calculated for the Plan as a whole, and represents an annual installment to fund the unfunded actuarial liability (UAL) for the Plan. The UAL represents the amount of additional funds that would have been accumulated by the valuation date had all prior normal cost contributions been made and all actuarial assumptions been realized.

In Appendix B we describe more fully this technical topic.

The table below presents and compares the actuarially determined contributions for the Plan for this valuation and the prior one, and includes a calculation of the average annual normal cost rate per participant for each year.

ACTUARIALLY DETERMINED CONTRIBUTION	7/1/2002	7/1/2001
Entry Age Normal Cost	6.17%	6.16%
Amortization Payment	<u>13.15%</u>	<u>11.14%</u>
Actuarially Determined Contribution	19.32%	17.30%

The following pages display tables of the contribution rates developed for each of the member/plan groups within the Plan.

SECTION V

ACCOUNTING STATEMENT INFORMATION

Statement No. 35 of the Financial Accounting Standards Board (FASB) requires the System to disclose certain information regarding the Plan's funded status. Statement No. 25 of the Governmental Standards Board (GASB) establishes standards for disclosure of pension information by public employee retirement systems (PERS) and governmental employers in notes to financial statements and supplementary information.

The FASB-35 disclosures are intended to provide a "snap shot" view of how the Plan's assets compare to its liabilities if contributions stopped and accrued benefit claims had to be satisfied. However, due to potential legal requirements and the possibility that alternative interest rates would have to be used to determine the liabilities, these values may not be a good indication of the amount of money it would take to satisfy these claims if the Plan were to terminate.

The GASB 25 actuarial accrued liability is the same as the actuarial liability amount calculated for funding purposes.

Both the present value of accrued benefits (FASB-35) and the actuarial accrued liability (GASB-25) are determined assuming that the plan is ongoing and participants continue to terminate employment, retire, and otherwise act in accordance with the actuarial assumptions. Liabilities are discounted at the assumed valuation interest rate of 8% per annum.

FASB Statement No. 35 specifies that a comparison of the present value of accrued (accumulated) benefits to the market value of the assets as of the valuation date must be provided. GASB Statement No. 25 requires the actuarial accrued liability to be compared with the actuarial value of assets for funding purposes. The relevant amounts as of June 30, 2002 are exhibited in Table V-1, Table V-2, and Table V-3. As directed by FASB-35, the liabilities shown in Section A of Table V-1 and Table V-2 do not include any projection for future service and salary. Finally, Table V-4 reconciles the FASB-35 liabilities determined as of the prior valuation, June 30, 2001, to the liabilities as of June 30, 2002.

	Selected Ages (members	30	7.6
	becoming disabled per	35	10.2
	10,000 members)**	40	19.0
		45	27.9
		50	42.7
		55	81.0
		60	119.3

** 10% assumed to receive Workers Compensation benefits offsetting disability benefit; also, rates for State Special groups are higher by 7 per 10,000 at all ages.

11. Family Composition Assumptions 80% of active members are married and have two children born when the member is 24 and 28; children are dependent until age 18; female spouse is three years younger than male spouse; member has no dependent parents; unmarried members have beneficiaries entitled to benefits worth 80% as much as those of married members' beneficiaries.

12. Vacation/Sick Leave Credits For members who had 10 years of service on July 1, 1993, credits for unused vacation and sick leave may be used to increase final average compensation and/or creditable service. In order to reflect this, projected benefits are increased by 1.0% for state employees and 1.3% for teachers.

ACTUARIAL METHODS

1. Funding Method

The Entry Age Normal method is used to determine costs. Under this funding method, a total contribution rate is determined which consists of two elements, the normal cost rate and the unfunded actuarial liability (UAL) rate.

For Teachers and State Employees, including each of the State Special Plans, a normal cost rate is determined for a typical new entrant. This rate is determined by taking the value, as of age at entry into the plan, of the member's projected future benefits, reducing it by the value of future member contributions, and dividing it by the value, also as of the member's entry age, of the member's expected future salary.

In addition to contributions required to meet the System's normal cost, contributions are required to fund the System's unfunded actuarial liability. The actuarial liability is defined as the present value of future benefits less the present value of future normal costs and future member contributions. The unfunded actuarial liability is the total of the actuarial liability for all members less the actuarial value of the System's assets. The actuarial liability includes projections of future member pay increases and future service credits and should not be confused with the Accrued Benefit Liability.

The unfunded actuarial liability is amortized by annual payments over a 17 year period from July 1, 2002. The payments are determined so that they will be a level percentage of pay, assuming payroll increases 5.5% per year.

2. Asset Valuation Method

For purposes of this June 30, 2002 actuarial valuation, assets are valued at an "actuarial value" as described in Part II.

APPENDIX C

SUMMARY OF PLAN PROVISIONS

STATE EMPLOYEES AND TEACHERS

1. Membership

Membership is a condition of employment for state employees and teachers, and optional for elected and appointed officials.

Membership ceases on the earlier of withdrawal of contributions, retirement, or death.

2. Member Contributions

Except as otherwise described below, members are required to contribute 7.65% of earnable compensation.

Contribution requirements for special groups:

State police, inland fisheries and wildlife officers, and marine resources officers employed before 9/1/84 - 8.65% of earnable compensation for 20 years; 7.65% thereafter.

Forest rangers and state prison employees employed before 9/1/84 - 8.65% of earnable compensation until eligible for retirement; 7.65% thereafter.

1998 Special Plan employees employed after 8/31/84 which include state prison employees, airplane pilots, forest rangers, inland fisheries and wildlife officers, marine resources officers, liquor inspectors and defense, veterans and emergency management firefighters employed at Bangor International Airport - 8.65% of earnable compensation for 25 years; 7.65% thereafter.

State police employed on or after 9/16/84 and special agent investigators hired before 6/21/82 - 8.65% of earnable compensation for 25 years; 7.65% thereafter.

3. Average Final Compensation

For purposes of determining benefits payable under the System, average final compensation is the average annual rate of earnable compensation for the three years of creditable service (not necessarily consecutive) which produce the highest such average.

For compensation paid on or after July 1, 1993, increases in earnable compensation of greater than 5% per year or 10% over the highest three years are not included in calculating average final compensation unless the employer pays the cost of including such compensation.

Earnable compensation does not include sick and vacation pay for those members who had less than 10 years of service at July 1, 1993. For members for whom sick and vacation pay is includible in earnable compensation, these payments are included in applying the caps described in the preceding paragraph.

4. Creditable Service

Creditable service includes service while a member, certain service prior to the establishment of the System, purchased military service credit, other purchased service credit, and service while receiving disability benefits under the System.

APPENDIX C

SUMMARY OF PLAN PROVISIONS

5. Service Retirement Benefits

A. Regular Plan (State Employees and Teachers)

Eligibility for members with at least 10 years of creditable service on July 1, 1993

Normal Retirement Age: 60

Eligibility for members in active service and inactive members: 25 years of creditable service.

Eligibility alternative for members in active service: at least one year of creditable service immediately before retirement and at least normal retirement age.

Eligibility for members not in active service at retirement, and not in active service on or after October 1, 1999: at least 10 years of creditable service and at least normal retirement age.

Eligibility for members not in active service at retirement, but in active service on or after October 1, 1999: at least 5 years of creditable service and at least normal retirement age.

Benefit - 1/50 of average final compensation multiplied by years of membership service up to 25 years of prior service, reduced by approximately 2-1/4% for each year retirement age is less than age 60.

Form of payment - life annuity.

Eligibility for members with less than 10 years of creditable service on July 1, 1993

Normal Retirement Age: 62

Eligibility for members in active service and inactive members: 25 years of creditable service.

Eligibility alternative for members in active service: at least one year of creditable service immediately before retirement age and at least normal retirement age.

Eligibility for members not in active service at retirement, and not in active service on or after October 1, 1999: at least 10 years of creditable service and at least normal retirement age.

Eligibility for members not in active service at retirement, but in active service on or after October 1, 1999: at least 5 years of creditable service and at least normal retirement age.

Benefit - 1/50 of average final compensation multiplied by years of membership service and up to 25 years of prior service, reduced by 6% for each year retirement age is less than age 62.

Form of payment - life annuity.

B. Special Plans (state employees)

State police employed before 9/16/84; inland fisheries and wildlife officers and marine resource officers employed before 9/1/84:

Eligibility - 20 years of creditable service in named positions.

Benefit - 1/2 of average final compensation plus 2% for each year of service in excess of 20. If greater, the pro-rated portion of the benefit for service before July 1, 1976 is based on annual pay instead of average final pay.

Form of payment - 50% joint and survivor annuity, or life annuity.

APPENDIX C

SUMMARY OF PLAN PROVISIONS

Forest rangers employed before 9/1/84:

Eligibility - age 50 with 25 years of creditable service as a forest ranger.

Benefit - $\frac{1}{2}$ of average final compensation plus 2% for each year of service earned after qualification for retirement. If greater, the pro-rated portion of the benefit for service before July 1, 1976 is based on annual pay instead of average final pay.

Form of payment - life annuity.

Airplane pilots employed before 9/1/84:

Eligibility - age 55 and 25 years of creditable service as an airplane pilot.

Benefit - greater of (1) $\frac{1}{2}$ of average final compensation plus 2% for each year of service earned after qualification for retirement, and (2) if retiring after age 60, the benefit under the general formula.

Form of payment - life annuity.

Liquor inspectors employed before 9/1/84:

Eligibility - age 55 and 25 years of creditable service as a liquor inspector.

Benefit - $\frac{1}{2}$ of average final compensation plus 2% for each year of service earned after qualification for retirement. If greater, the pro-rated portion of the benefit for service before July 1, 1976 is based on annual pay instead of average final pay.

Form of payment - life annuity.

State prison employees employed before 9/1/84:

Eligibility - age 50 and 20 years of creditable service as a prison employee.

Benefit - $\frac{1}{2}$ of average final compensation plus 2% for each year of service earned after qualification for retirement.

Form of payment - life annuity.

1998 Special Plan

1998 entrants: State prison employees, airline pilots, forest rangers and liquor inspectors, employed after 8/31/84; defense, veterans and emergency management firefighters employed on and after 7/1/98.

2001 entrants: Baxter State Park Authority rangers, correctional employees and state fire marshals employed on or after 1/1/2001.

2002 entrants: Capitol security officers.

Eligibility - 10 years of creditable service under the 1998 Special Plan in one or a combination of the covered capacities after June 30, 1998 (1998 entrants) or after December 31, 1999 (2001 entrants), and the attainment of age 55 - OR - 25 years of creditable service in one or a combination of the covered capacities.

Benefit - for service prior to July 1, 1998 (1998 entrants) or prior to January 1, 2001 (2001 entrants), $\frac{1}{50}$ of average final compensation multiplied by years of service reduced for retirement before age 60 or 62, except state police and certain prison employee benefits are reduced for retirement before age 55.

APPENDIX C SUMMARY OF PLAN PROVISIONS

-AND-

for service starting on July 1, 1998 (1998 entrants) or on January 1, 2001 (2001 entrants), 1/50 of average final compensation multiplied by years of service reduced for retirement before age 55.

Form of payment - life annuity.

25 & Out Plan

1998 entrants: State police employed on or after 9/16/84 and special agent investigators hired before 6/21/82.

2002 entrants: Inland fisheries and wildlife officers and marine resources officers employed on and after 8/31/84.

Eligibility - 25 years of creditable service in named positions.

Benefit - 1/50 of average final compensation multiplied by years of service.

Form of payment - life annuity.

Members in Special Plans who fail to qualify for special plan benefits can receive regular plan benefits when and as eligible and qualified.

6. Disability Retirement Benefits other than No Age Benefits

Eligibility - disabled as defined in the MSRS statutes, prior to normal retirement age; employed prior to October 16, 1992 and did not elect No Age Disability Benefits.

Benefit - 66-2/3% of average final compensation, reduced by employment earnings over the specified statutory limit, and to the extent that the benefit, in combination with worker's compensation and Social Security, exceeds 80% of average final compensation.

Form of payment - payment begins on termination of service and ceases on cessation of disability or after five or two years, depending on disability plan, unless the member is unable to engage in any substantially gainful activity; in which case payments cease on the earlier of 10 years following normal retirement age or date the service retirement benefit equals or exceeds the disability benefit.

Conversion to service retirement - during the period of disability average final compensation is increased with cost-of-living adjustments and service is credited. On the date when service benefits reach a level of 66 2/3% of average final compensation or 10 years after the normal retirement date, if earlier, the disability benefit converts to a service retirement benefit based on service and average final compensation at that point.

7. No Age Disability Retirement Benefits

Eligibility - disabled as defined in the MSRS statutes; employed on or after October 16, 1992 or employed prior to October 16, 1992 and elected the provisions of No Age Disability.

Benefit - 59% of average final compensation, reduced by employment earnings over the specified statutory limit, and to the extent that the benefit, in combination with worker's compensation and Social Security, exceeds 80% of average final compensation.

Form of payment - payment begins on termination of service and ceases on cessation of disability or after five or two years, depending on disability plan, unless the member is unable to engage in any substantially gainful activity; in which case payments cease on the date the service retirement benefit equals or exceeds the disability benefit.

APPENDIX C

SUMMARY OF PLAN PROVISIONS

Conversion to service retirement - during the period of disability average final compensation is increased with cost-of-living adjustments and service is credited. On the date when service benefits reach a level of 59% of average final compensation the disability benefit converts to a service retirement benefit based on service and average final compensation at that point.

8. Pre-Retirement Ordinary Death Benefits

Eligibility - death while active, inactive eligible to retire, or disabled.

Benefit - designated beneficiary, spouse, child(ren), or parents entitled to benefit calculated as if deceased member had retired under Option 2 (see item 12); however, beneficiary may elect survivor benefits payable to a surviving spouse, dependent child(ren), parent, or other designated beneficiaries in monthly amounts varying by status of beneficiary and number of eligible survivors. Otherwise accumulated contributions with interest are payable to designated beneficiary, spouse, child(ren), older parents, or estate.

9. Pre-Retirement Accidental Death Benefits

Eligibility - death while active or disabled resulting from an injury received in the line of duty.

Benefit - if the member leaves no dependent children, 2/3 of the member's average final compensation to the surviving spouse until death.

- ◆ if the member is survived by a spouse who has the care of dependent child(ren) of the member, the surviving spouse shall receive an annual sum equal to the member's average final compensation. When there is no longer any dependent child, the surviving spouse shall receive 2/3 of member's average final compensation until death.
- ◆ if the member is survived by a spouse who does not have the care of the member's dependent child(ren), the surviving spouse and dependent child(ren) shall share equally an annual sum equal to the member's average final compensation. When there is no longer any dependent child the surviving spouse shall receive 2/3 of member's average final compensation until death.
- ◆ if the member leaves no spouse, the dependent child(ren) shall be paid an annual sum equal to the member's average final compensation. Benefits will cease when the last dependent child no longer meets the definition of "dependent child".

10. Refund of Contributions

Eligibility - termination of service without retirement or death.

Benefit - member's accumulated contributions with interest.

11. Cost-of-Living Adjustments

All service and disability retirement and survivor benefits are adjusted each year that there is a percentage change in the Consumer Price Index, based on the Index.

Cost-of-living adjustments are effective September 1 and are applied to all benefits which have been in payment for twelve months. The maximum annual increase or decrease is 4%. Average final compensation used in determining disability benefits for disabled members is similarly adjusted for purposes of determining the recipient's service retirement benefit if and when the recipient moves to service retirement.

Members on service retirement who did not have 10 years of service on July 1, 1993 will not receive a cost-of-living adjustment until 12 months after their normal retirement age.

APPENDIX C

SUMMARY OF PLAN PROVISIONS

12. Methods of Payment of Service Retirement Benefits

At retirement, a member who retires with a benefit must choose from the following methods of payment:

Full Benefit: Unadjusted benefit paid for the life of the member only.

Option 1: Cash refund equal to the remaining employee contribution balance, if any, at the date of death (where the employee contribution balance has been reduced each month by the portion of the monthly benefit deemed to be provided by employee contributions.)

Option 2: 100% joint and survivor annuity.

Option 3: 50% joint and survivor annuity.

Option 4: Joint and survivor annuity at any percentage other than those available under Option 2 and Option 3.

Option 5: Designated percentage of the benefit (not less than 51%) payable to the member, with the remaining percentage (the two to equal 100%) payable to a beneficiary (may only be a sole beneficiary) while both are alive. At the death of either, the higher of the two percentages is paid to the survivor for the survivor's life, and the lower-percentage benefit ceases to be paid.

Option 6: 100% joint and survivor annuity with pop-up*.

Option 7: 50% joint and survivor annuity with pop-up*.

Option 8: Option 4 with pop-up*.

* The "pop-up" feature attached to a given Option means that in the case of a beneficiary predeceasing the member, the member's benefit will be revised prospectively to the amount that the benefit would have been had the member selected Full Benefit payment upon retirement.

Board of Trustees
Maine State Retirement System
#46 State House Station
Augusta, Maine 04333-0046

Re: Maine Legislative Retirement System

Dear Members of the Board:

At your request, we have produced this report containing the full results of the June 30, 2002 actuarial valuation of the Maine Legislative Retirement System.

The actuarial assumptions used in this valuation are described in Schedule C. The actuarial assumptions used in this valuation have been recommended by the actuary and adopted by the Board of Trustees based upon the most recent review of the System's experience completed in 1998. We believe that the assumptions used, in the aggregate, represent our best estimate of anticipated future experience of the plan. The assumptions and methods used in performing this valuation meet the parameters set for disclosure presented in the financial section by Government Accounting Standards Board (GASB) Statement No. 25, Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans.

We have relied, without audit, on employee census data and asset data provided by the Retirement System. We reviewed the census and asset data for reasonableness, and for consistency with the data provided for the last valuation.

The results contained in this report are only applicable to the 2004 fiscal year. Future years results may differ significantly.

We hereby certify that, to the best of our knowledge, this report is complete and accurate and has been prepared in accordance with generally recognized and accepted actuarial principles and practices which are consistent with the applicable Guides to Professional Conduct, Amplifying Opinions, and Supporting Recommendations and Interpretations of the American Academy of Actuaries.

Sincerely,

Milliman USA

I, Theresa Leatherbury, am a consulting actuary for Milliman USA. I am also a member of the American Academy of Actuaries and meet their Qualification Standards to render the actuarial opinion contained herein.

Theresa Leatherbury, FSA
Principal

I, Althea Schwartz, am a consulting actuary for Milliman USA. I am also a member of the American Academy of Actuaries and meet their Qualification Standards to render the actuarial opinion contained herein.

Althea Schwartz, FSA
Principal

INTRODUCTION

This report presents the results, as of June 30, 2002, of the actuarial valuation of the Maine Legislative Retirement System. Schedule A, following this introduction, contains the cost results, assets, liabilities, and accounting disclosure information. Schedule B presents a summary of plan provisions and Schedule C presents a description of actuarial assumptions and methods used in determining costs, including a description of the funding method.

SCHEDULE A

A. PARTICIPANT DATA:

Number of:

Active Members	169
Retired Members	63
Beneficiaries of Retired Members	13
Survivors of Deceased Members	2
Disabled Members	0
Vested Deferred Members	27
Inactive Non-Vested Members	103

Active Payroll	\$ 1,901,011
----------------	--------------

Annual Benefits for Retired Members, Beneficiaries, Survivors and Disabled Members	\$ 103,835
---	------------

B. COST RESULTS:

Employer Normal Cost ¹	0.00%
Unfunded Actuarial Liability	NA
Total Cost	0.00%

¹ Employer Normal Cost includes Retirement Benefits, Disability, and Survivor Benefit costs.

C. ACCOUNTING INFORMATION:

1. GASB DISCLOSURE

a. Actuarial Accrued Liability *

- Retirees and beneficiaries currently receiving benefits and terminated vested employees not yet receiving benefits	\$ 1,636,000
- Current employees	
-- Accumulated employee contributions including allocated investment earnings	\$ 1,100,836
-- Employer-financed vested	\$ 193,762
-- Employer-financed nonvested	\$ 3,315,649
- Total Actuarial Accrued Liability (AAL) *	\$ 6,246,247

b. Actuarial Value of Assets (AVA)	\$ 6,246,247
------------------------------------	--------------

c. Unfunded Actuarial Accrued Liability	\$ 0
---	------

* The Aggregate actuarial funding method used for this plan does not technically define an AAL. For purposes of GASB No. 25 disclosure, in which all plans are combined, we have shown an Accrued Actuarial Liability exactly equal to the Actuarial Value of Assets.

2. OTHER ACCOUNTING INFORMATION:

a. Market Value of Assets	\$ 5,411,908
b. Unfunded Accrued Liability, (not less than \$0)	0
c. Amortization Period	N/A

SCHEDULE B

SUMMARY OF PLAN PROVISIONS

1. Membership

Except as provided by statute, membership is mandatory for legislators entering on or after December 3, 1986, and optional for those who were members of the Maine State Retirement System on December 2, 1986.

Membership ceases on the earlier of withdrawal of contributions, retirement, or death.

2. Member Contributions

Members are required to contribute 7.65% of earnable compensation.

3. Average Final Compensation

For purposes of determining benefits payable under the System, average final compensation is the average annual rate of earnable compensation for the three years of creditable service (not necessarily consecutive) as a legislator which produce the highest such average.

4. Creditable Service

Creditable service includes the following:

- a. all legislative service as a member after December 2, 1986;
- b. all legislative service before December 3, 1986, for which contributions are made at the rate applicable to the Maine State Retirement System, including appropriate interest;
- c. service credited while receiving disability benefits under the System; and
- d. all service creditable under the Maine State Retirement System as a State Employee, provided the member elects to have the member's own and the employer's contributions on behalf of such service transferred to the legislative system.

5. Service Retirement Benefits

Eligibility for members with at least 10 years of creditable service on July 1, 1993:

Eligibility for members in active service and inactive members
- 25 years of creditable service.

Eligibility alternative for members in active service
- attainment of age 60.

Eligibility for members not in active service at retirement, and not in active service on or after October 1, 1999
- attainment of age 60 and 10 years of creditable service.

Eligibility for members not in active service at retirement, but in active service on or after October 1, 1999
- attainment of age 60 and 5 years of creditable service.

Eligibility for members with less than 10 years of creditable service on July 1, 1993:

Eligibility for members in active service and inactive members
- 25 years of creditable service.

SCHEDULE B

SUMMARY OF PLAN PROVISIONS

Eligibility alternative for members in active service
- attainment of age 62.

Eligibility for members not in active service at retirement, and not in active service on or after October 1, 1999
- attainment of age 62 with 10 years of creditable service.

Eligibility for members not in active service at retirement, but in active service on or after October 1, 1999
- attainment of age 62 and 5 years of creditable service.

For eligibility, creditable service includes service under the Maine State Retirement System.

Benefit - 1/50 of average final compensation multiplied by years of creditable service, reduced for retirement before age 60 at the rate of approximately 2¼% for each year retirement age is less than age 60, for members with at least 10 years creditable service on July 1, 1993; reduced for retirement before age 62 at the rate of 6% for each year retirement age is less than age 62, for members with less than 10 years creditable service on July 1, 1993; minimum benefit \$100 per month if at least 10 years of creditable service.

Form of payment - life annuity.

6. Disability Retirement Benefits Other Than No Age Benefits

Eligibility - disabled as defined in the MSRS statutes, prior to normal retirement age; employed prior to October 16, 1992 and did not elect No Age Disability Option.

Benefit - 66 2/3% of average final compensation, reduced by employment earnings over the specified statutory limit, and to the extent that the benefit, in combination with worker's compensation and Social Security, exceeds 80% of average final compensation.

Form of payment - payment begins on termination of service and ceases on cessation of disability or after five years, unless the member is unable to engage in any substantially gainful activity; in which case payments cease on the earlier of 10 years following normal retirement age or the date that the service retirement benefit equals or exceeds the disability benefit.

Conversion to service retirement - during the period of disability, average final compensation is increased with cost-of-living adjustments and service is credited. On the date when service benefits reach a level of 66 2/3% of average final compensation or 10 years after the normal retirement date, if earlier, the disability benefit converts to a service retirement benefit based on service and average final compensation at that point.

7. No Age Disability Retirement Benefits

Eligibility - disabled as defined in the MSRS statutes; employed on or after October 16, 1992 or employed prior to October 16, 1992 and elected the provisions of No Age Disability.

Benefit - 59% of average final compensation, reduced by employment earnings over the specified statutory limit, and to the extent that the benefit, in combination with worker's compensation and Social Security, exceeds 80% of average final compensation.

Form of payment - payment begins on termination of service and ceases on cessation of disability or after five years, unless the member is unable to engage in any substantially gainful activity; in which case payments cease on the date the service retirement benefit equals or exceeds the disability benefit.

Conversion to service retirement - during the period of disability, average final compensation is increased with cost-of-living adjustments and service is credited. On the date when service benefits reach a level of 59% of average final compensation the disability benefit converts to a service retirement benefit based on service and average final compensation at that point.

SCHEDULE B

SUMMARY OF PLAN PROVISIONS

8. Pre-Retirement Ordinary Death Benefits

Eligibility - death while active, inactive eligible to retire or disabled.

Benefit - designated beneficiary, spouse, child(ren), or parents entitled to benefit calculated as if deceased member had retired under Option 2 (see item 12); however, beneficiary may elect survivor benefits payable to a surviving spouse, dependent child(ren), parents, or other designated beneficiaries in monthly amounts varying by status of beneficiary and number of eligible survivors. Otherwise, accumulated contributions with interest are payable to designated beneficiary, spouse, child(ren), older parent or estate.

9. Pre-Retirement Accidental Death Benefits

Eligibility - death while active or disabled resulting from injury received in the line of duty.

Benefit - if the member leaves no dependent children, 2/3 of the member's average final compensation to the surviving spouse until death.

- If the member is survived by a spouse who has the care of dependent child(ren) of the member, the surviving spouse shall receive an annual sum equal to the member's average final compensation. When there is no longer any dependent child, the surviving spouse shall receive 2/3 of member's average final compensation until death.

- If the member is survived by a spouse who does not have the care of the member's dependent child(ren), the surviving spouse and dependent child(ren) shall share equally an annual sum equal to the member's average final compensation. When there is no longer any dependent child, the surviving spouse shall receive 2/3 of member's average final compensation until death.

- If the member leaves no spouse, the dependent child(ren) shall be paid an annual amount equal to the member's average final compensation. Benefits will cease when the last dependent child no longer meets the definition of "dependent child".

10. Refund of Contributions

Eligibility - termination of service without retirement or death.

Benefit - member's accumulated contributions with interest.

11. Cost-of-Living Adjustments

All service and disability retirement and survivor benefits are adjusted each year there is a percentage change in the Consumer Price Index, based on the Index.

Cost-of-Living adjustments are effective September 1 and are applied to all benefits which have been in payment for 12 months. The maximum increase or decrease is 4%. Average final compensation used in determining disability benefits for disabled members is similarly adjusted for purposes of determining the recipients service retirement benefit if and when the recipient moves to service retirement.

Members on service retirement who did not have at least 10 years creditable service on July 1, 1993 are not eligible to receive a cost-of-living adjustment until 12 months after their normal retirement age.

12. Methods of Payment of Service Retirement Benefits

At retirement, a member who retires with a benefit must choose from the following methods of payment:

Full Benefit: Unadjusted benefit is paid for the life of the member only.

SCHEDULE B SUMMARY OF PLAN PROVISIONS

Methods of Payment of Service Retirement Benefits continued

Option 1: Cash refund equal to the remaining employee contribution balance, if any, at the date of death (where the employee contribution balance has been reduced each month by the portion of the monthly benefit deemed to be provided by employee contributions.)

Option 2: 100% joint and survivor annuity.

Option 3: 50% joint and survivor annuity.

Option 4: Joint and survivor annuity at any percentage other than those available under Option 2 and Option 3.

Option 5: Designated percentage of the benefit (not less than 51%) payable to the member, with the remaining percentage (the two to equal 100%) payable to a beneficiary (may only be a sole beneficiary) while both are alive. At the death of either, the higher of the two percentages is paid to the survivor for the survivor's life, and the lower-percentage benefit ceases to be paid.

Option 6: 100% joint and survivor annuity with pop-up*.

Option 7: 50% joint and survivor annuity with pop-up*.

Option 8: Option 4 with pop-up*.

* The "pop-up" feature attached to a given Option means that in the case of a beneficiary predeceasing the member, the member's benefit will be revised prospectively to the amount that the benefit would have been had the member selected Full Benefit payment upon retirement.

SCHEDULE C SUMMARY OF ACTUARIAL ASSUMPTIONS

This schedule summarizes the actuarial assumptions and methods used in the valuation.

A. Actuarial Assumptions

1. Annual Rate of Investment Return: 8%
2. Annual Rate of Salary Increase: 5%
3. Annual Cost-of-Living Increase: 4%
4. Normal Retirement Age: Age 60 for members with at least 10 years creditable service on July 1, 1993.

Age 62 for members with less than 10 years creditable service on July 1, 1993.
5. Probabilities of employment termination at selected ages due to:

<u>Age</u>	<u>Disability</u>	<u>Termination</u>	<u>Death</u>	
			<u>Male</u>	<u>Female</u>
25	.0006	.07	.0007	.0003
30	.0006	.06	.0009	.0004
35	.0007	.05	.0009	.0005
40	.0011	.04	.0012	.0008
45	.0022	.03	.0017	.0010
50	.0042	.02	.0028	.0015
55	.0072	.01	.0048	.0025

6. Rate of Healthy Life Mortality at Selected Ages:

<u>Age</u>	<u>Currently Active Employees</u>		<u>Currently Retired Employees</u>	
	<u>Male</u>	<u>Female</u>	<u>Male</u>	<u>Female</u>
25	.0007	.0003	.0006	.0003
30	.0009	.0004	.0008	.0005
35	.0009	.0005	.0011	.0007
40	.0012	.0008	.0016	.0009
45	.0017	.0010	.0029	.0014
50	.0028	.0015	.0053	.0022
55	.0048	.0025	.0085	.0033

SCHEDULE C

SUMMARY OF ACTUARIAL ASSUMPTIONS

7. Rates of Disabled Life Mortality at Selected Ages

<u>Age</u>	<u>Currently Active Employees</u>		<u>Currently Retired Employees</u>	
	<u>Male</u>	<u>Female</u>	<u>Male</u>	<u>Female</u>
25	.0092	.0072	.0391	.0528
30	.0112	.0089	.0315	.0467
35	.0134	.0109	.0321	.0326
40	.0160	.0126	.0332	.0215
45	.0193	.0144	.0349	.0191
50	.0236	.0165	.0376	.0207
55	.0295	.0191	.0420	.0240

B. Actuarial Methods

1. Funding Method

The Aggregate actuarial funding method is used to determine costs. Under this funding method, the total employer contribution rate consists of only one element, the normal cost rate. The normal cost rate is developed by taking the difference between the present value of future benefits, less future member contributions, and less the actuarial value of plan assets and dividing this difference by the present value of future payroll.

Under the Aggregate actuarial funding method there is no unfunded actuarial liability since the Actuarial Accrued Liability is set exactly equal to the actuarial value of assets.

2. Asset Valuation Method

The actuarial valuation employs a technique for determining the actuarial value of assets which dampens the swings in market value. The specific technique adopted in this valuation recognizes in a given year one-third of the investment return that is different from the 8.00% actuarial assumption for investment return.

Re: Maine Judicial Retirement System

Dear Members of the Board:

At your request, we have produced this report containing the full results of the June 30, 2002 actuarial valuation of the Maine Judicial Retirement System.

The actuarial assumptions used in this valuation are described in Schedule C. The actuarial assumptions used in this valuation have been recommended by the actuary and adopted by the Board of Trustees based upon the most recent review of the System's experience completed in 1998. We believe that the assumptions used, in the aggregate, represent our best estimate of anticipated future experience of the plan. The assumptions and methods used in performing this valuation meet the parameters set for disclosure presented in the financial section by Government Accounting Standards Board (GASB) Statement No. 25, Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans.

We have relied, without audit, on employee census data and asset data provided by the Retirement System. We reviewed the census and asset data for reasonableness, and for consistency with the data provided for the last valuation.

The results contained in this report are only applicable to the 2004 fiscal year. Future years results may differ significantly.

We hereby certify that, to the best of our knowledge, this report is complete and accurate and has been prepared in accordance with generally recognized and accepted actuarial principles and practices which are consistent with the applicable Guides to Professional Conduct, Amplifying Opinions, and Supporting Recommendations and Interpretations of the American Academy of Actuaries.

Sincerely,

Milliman USA

I, Theresa Leatherbury, am a consulting actuary for Milliman USA. I am also a member of the American Academy of Actuaries and meet their Qualification Standards to render the actuarial opinion contained herein.

SCHEDULE B

SUMMARY OF PLAN PROVISIONS

Retirement on or After December 1, 1984

1. Membership

Membership is a condition of employment for all judges serving on or after December 1, 1984.

Membership ceases on the earlier of withdrawal of contributions, retirement, or death.

2. Member Contributions

Members are required to contribute 7.65% of earnable compensation.

3. Average Final Compensation

For purposes of determining benefits payable under the System, average final compensation is the average annual rate of earnable compensation for the three years of creditable service (not necessarily consecutive) which produce the highest such average.

4. Creditable Service

Creditable service includes the following:

- a. all judicial service as a member after November 30, 1984;
- b. all judicial service before December 1, 1984;
- c. service credited while receiving disability benefits under the System; and
- d. all service creditable under the Maine State Retirement System provided the member elects to have his own and the employer's contributions on behalf of the service transferred to the judicial system.

5. Service Retirement Benefits

Eligibility for members with at least 10 years of creditable service on July 1, 1993:

Eligibility for members in active service and inactive members
- 25 years of creditable service.

Eligibility alternative for members in active service
- attainment of age 70 with at least one year of service immediately before retirement.

Eligibility for members not in active service at retirement, and not in active service on or after October 1, 1999
- attainment of age 60 and 10 years of creditable service.

Eligibility for members not in active service at retirement, but in active service on or after October 1, 1999
- attainment of age 60 and 5 years of creditable service.

Eligibility for members with less than 10 years of creditable service on July 1, 1993:

Eligibility for members in active service and inactive members
- 25 years of creditable service.

SCHEDULE B

SUMMARY OF PLAN PROVISIONS

Eligibility alternative for members in active service
- attainment of age 70 with at least one year of service immediately before retirement.

Eligibility for members not in active service at retirement, and not in active service on or after October 1, 1999
- attainment of age 62 with 10 years of creditable service.

Eligibility for members not in active service at retirement, but in active service on or after October 1, 1999
- attainment of age 62 and 5 years of creditable service.

Benefit - sum of (1) For service after November 30, 1984 and before July 1, 1998 and creditable service allowed under Section 1302(3), 2% of average final compensation multiplied by years of service; for service on or after July 1, 1998, 3% of average final compensation multiplied by years of service, and (2) for judicial service prior to December 1, 1984, 75% of November 30, 1984 salary for the position held at retirement, pro rated for prior service less than 10 years.

The benefit is reduced for retirement before age 60 at the rate of approximately 2¼% for each year retirement age is less than 60, for members with at least 10 years creditable service on July 1, 1993; reduced for retirement before age 62 by 6% for each year the member's age is less than age 62, if less than 10 years creditable service on July 1, 1993.

Maximum benefit - total benefit cannot exceed 70% of average final compensation except as provided under the minimum benefit provision.

Minimum benefit - for a judge in service and age 50 or older on December 1, 1984, 75% of salary on 6/30/84 for the position held at retirement, increased by 6% per year from 6/30/84 to 6/30/89 or retirement date if earlier, and increased beyond 6/30/89 by the cost-of-living increase granted the previous September.

Form of payment - life annuity; except, for a judge in service and age 50 before December 1, 1984, 50% joint and survivor annuity to surviving spouse.

6. Disability Retirement Benefits Other Than No Age Benefits

Conditions - disabled as defined in the Judicial Retirement System statutes, prior to Normal Retirement Age; employed as a judge prior to October 16, 1992 and did not elect No Age Disability.

Benefit - 66 2/3% of average final compensation, reduced by employment earnings over the specified statutory limit, and to the extent that the benefit, in combination with worker's compensation and Social Security, exceeds 80% of average final compensation.

Form of payment - payment begins on termination of service and ceases on cessation of disability or after 2 years, unless the member is unable to engage in any substantially gainful activity; in which case payments cease on the earlier of attainment of age 70 and the date that the service retirement benefit exceeds the disability benefit.

Conversion to service retirement - during the period of disability, average final compensation is increased with cost-of-living adjustments and service is credited. On the date when service benefits reach a level of 66 2/3% of average final compensation, or at age 70, if earlier, the disability benefit converts to a service retirement benefit based on service and pay at that point.

7. No Age Disability Retirement Benefits

Conditions - disabled as defined in the Judicial Retirement statutes; employed as a judge on or after October 16, 1992 or employed as a judge prior to October 16, 1992 and elected the provisions of No Age Disability.

Benefit - 59% of average final compensation, reduced by the amount by which employment earnings plus the disability allowance exceeds the current salary of the position held at disability, and to the extent that the benefit, in combination with

SCHEDULE B

SUMMARY OF PLAN PROVISIONS

worker's compensation exceeds 80% of average final compensation. A member in service on 11/30/84 may elect benefits applicable for retirement before December 1, 1984.

Form of payment - payment begins on termination of service and ceases on cessation of disability or after 2 years, unless the member is unable to engage in any substantially gainful activity; in which case payments cease on the date the service retirement benefit exceeds the disability benefit.

Conversion to service retirement - during the period of disability, average final compensation is increased with cost-of-living adjustments and service is credited. On the date when service benefits reach a level of 59% of average final compensation the disability benefit converts to a service retirement benefit based on service and pay at that point.

8. Pre-Retirement Ordinary Death Benefits

Eligibility - death while active, inactive eligible to retire or disabled.

Benefit - designated beneficiary, spouse, child(ren), or parents entitled to benefit calculated as if deceased member had retired under Option 2 (see item 12); however, beneficiary may elect survivor benefits payable to a surviving spouse, dependent child(ren), parents, or other designated beneficiaries in monthly amounts varying by status of beneficiary and number of eligible survivors. Otherwise, accumulated contributions with interest are payable to designated beneficiary, spouse, child(ren), older parent or estate.

Minimum benefit - for a judge in service prior to 12/1/84, 1/2 of the judge's retirement benefit determined on date of death, payable to the spouse and/or dependent children.

9. Pre-Retirement Accidental Death Benefits

Eligibility - death while active or disabled resulting from injury received in the line of duty.

Benefit - if the member leaves no dependent children, 2/3 of the member's average final compensation to the surviving spouse until death.

If the member is survived by a spouse who has the care of dependent child(ren) of the member, the surviving spouse shall receive an annual sum equal to the member's average final compensation. When there is no longer any dependent child, the surviving spouse shall receive 2/3 of member's average final compensation until death.

If the member is survived by a spouse who does not have the care of the member's dependent child(ren), the surviving spouse and dependent child(ren) shall share equally an annual sum equal to the member's average final compensation. When there is no longer any dependent child, the surviving spouse shall receive 2/3 of member's average final compensation until death.

If the member leaves no spouse, the dependent child(ren) shall be paid an annual amount equal to the member's average final compensation. Benefits will cease when the last dependent child no longer meets the definition of "dependent child".

10. Refund of Contributions

Eligibility - termination of service without retirement or death.

Benefit - member's accumulated contributions with interest.

11. Cost-of-Living Adjustments

Except as described below, all service and disability retirement and survivor benefits are adjusted each year there is a percentage change in the Consumer Price Index, based on the Index.

SCHEDULE B SUMMARY OF PLAN PROVISIONS

Cost-of-living adjustments are effective September 1 and are applied to all benefits which have been in payment for twelve months. The maximum increase or decrease is 4%. Average final compensation used in determining disability benefits for disabled members is similarly adjusted for purposes of determining the recipient's service retirement benefit if and when the recipient moves to service retirement.

Members on service retirement who did not have at least 10 years creditable service on July 1, 1993 are not eligible to receive a cost-of-living adjustment until 12 months after the member reaches normal retirement age.

Minimum benefits are increased 6% per year from July, 1985 through July, 1989, and as described above thereafter.

12. Methods of Payment of Service Retirement Benefits

At retirement, a member must choose from the following methods of payment:

Full Benefit: Unadjusted benefit is paid for the life of the member only.

Option 1: Cash refund equal to the remaining employee contribution balance at the date of death (where the employee contribution balance has been reduced each month by the portion of the monthly benefit deemed to be provided by employee contributions.)

Option 2: 100% joint and survivor annuity.

Option 3: 50% joint and survivor annuity.

Option 4: Joint and survivor annuity at any percentage other than those available under Option 2 and Option 3.

Option 5: Designated percentage of the benefit (not less than 51%) payable to the member, with the remaining percentage (the two to equal 100%) payable to a beneficiary (may only be a sole beneficiary) while both are alive. At the death of either, the higher of the two percentages is paid to the survivor for the survivor's life, and the lower-percentage benefit ceases to be paid.

Option 6: 100% joint and survivor annuity with pop-up*.

Option 7: 50% joint and survivor annuity with pop-up*.

Option 8: Option 4 with pop-up*.

* The "pop-up" feature attached to a given Option means that in the case of a beneficiary predeceasing the member, the member's benefit will be revised prospectively to the amount that the benefit would have been had the member selected Full Benefit payment upon retirement.

SCHEDULE C

SUMMARY OF ACTUARIAL ASSUMPTIONS

Retirement Prior to December 1, 1984

1. Currently Effective Annual Salary

For determination of benefit payments, currently effective annual salary is the salary on 6/30/84 for the position last held, increased by 6% per year each July 1, beginning 7/1/84.

2. Regular Retirement Benefits

Eligibility - attainment of age 70 with 7 years of service, or attainment of age 65 with 12 years of service, or attainment of age 60 with 20 years of service.

Benefit - $\frac{3}{4}$ of currently effective annual salary.

3. Disability Benefits

$\frac{3}{4}$ of currently effective annual salary.

4. Survivor Benefits

$\frac{3}{8}$ of currently effective annual salary, payable to the surviving spouse or dependent children.

SCHEDULE C SUMMARY OF ACTUARIAL ASSUMPTIONS

This schedule summarizes the actuarial assumptions and methods used in the valuation.

A. Actuarial Assumptions

1. Annual Rate of Investment Return: 8%
2. Annual Rate of Salary Increase: 5%
3. Annual Cost-of-Living Increase: 4%
4. Normal Retirement:
 - Age 60 for members with at least 10 years creditable service on July 1, 1993.
 - Age 62 for members with less than 10 years creditable service on July 1, 1993.
5. Probabilities of employment termination at selected ages due to:

<u>Age</u>	<u>Disability</u>	<u>Termination</u>	<u>Death</u>	
			<u>Male</u>	<u>Female</u>
25	.0006	.07	.0007	.0003
30	.0006	.06	.0009	.0004
35	.0007	.05	.0009	.0005

B. Actuarial Methods

1. Funding Method

The Entry Age Normal actuarial funding method is used to determine costs. Under this funding method, the total employer contribution rate consists of two elements, the normal cost rate and the unfunded actuarial liability (UAL) rate.

The normal cost rate is developed for a typical new entrant. This rate is determined by taking the value, as of entry age to the plan, of the member's projected future benefits, reducing it by the value of future member contributions, and dividing it by the value, also as of the member's entry age, of the member's expected future salary.

In addition to contributions required to meet the plan's normal cost, contributions will be required to fund the plan's unfunded actuarial liability. The actuarial liability is defined as the present value of future benefits, less the present value of future normal costs and future member contributions. The unfunded actuarial liability is the total actuarial liability less the actuarial value of plan assets.

The unfunded liability is amortized by annual payments over a 16-year period from June 30, 2001. The payments are determined so that they will be a level percentage of pay, assuming total pay increases 5.5% per year.

2. Asset Valuation Method

The actuarial valuation employs a technique for determining the actuarial value of assets which dampens the swings in market value. The specific technique adopted in this valuation recognizes in a given year one-third of the investment return that is different from the 8.00% actuarial assumption for investment return.

Board of Trustees
Maine State Retirement System
#46 State House Station
Augusta, Maine 04333-0046

Dear Members of the Board:

At your request, we have conducted an actuarial valuation of the Consolidated Plan for Participating Local Districts of the Maine State Retirement System as of the June 30, 2002. The results of the valuation are contained in the following report.

The actuarial assumptions used in this valuation were recommended by the actuary and adopted by the Board of Trustees based on Milliman's review of the Plan's experience completed in Fiscal Year 2002. These assumptions are described in Appendix D. We believe the assumptions used, in the aggregate, represent our best estimate of anticipated future experience of the plan. The results of this report are dependent upon future experience conforming to these assumptions. To the extent future experience deviates from these assumptions, the true cost of the plan could vary from these results. The results contained in this report are only applicable to the 2004 fiscal year. Future years results may differ significantly.

The assumptions and methods used in performing this valuation meet the parameters set for disclosure presented in the financial section by Government Accounting Standards Board (GASB) Statement No. 25, Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans.

In preparing our report, we have relied, without audit, on employee census data and asset data provided by the Retirement System. We reviewed the census and asset data for reasonableness, and for consistency with the data provided for the last valuation. If any data or other information is inaccurate or incomplete, our calculations may need to be revised.

We hereby certify that, to the best of our knowledge, this report is complete and accurate, and has been prepared in accordance with generally recognized and accepted actuarial principles and practices as promulgated by the American Academy of Actuaries.

Sincerely,

Milliman USA

I, Althea Schwartz, am a consulting actuary for Milliman USA. I am also a member of the American Academy of Actuaries and meet their Qualification Standards to render the actuarial opinion contained herein.

Althea Schwartz, F.S.A.
Principal and Consulting Actuary

I, Theresa Leatherbury, am a consulting actuary for Milliman USA. I am also a member of the American Academy of Actuaries and meet their Qualification Standards to render the actuarial opinion contained herein.

Theresa Leatherbury, F.S.A.
Principal and Consulting Actuary

SECTION I

EXECUTIVE SUMMARY

OVERVIEW

As of June 30, 2002, there were 228 participating local districts in the Consolidated Plan for Participating Local Districts (PLDs) of the Maine State Retirement System. This report presents the results of our June 30, 2002, actuarial valuation for this Plan. Comments on the findings of our valuation are presented below. Following our comments are detailed tables of the June 30, 2002, results for the Regular Plans and Special Plans that comprise the Consolidated Plan.

Two significant changes are reflected in this valuation. First, we recommended and the Board adopted several actuarial assumption changes after completion of the first experience study performed on this plan. The changes, recommended to and accepted by the Board at its June 2002 meeting, are detailed in a separate report and itemized in Appendix D.

Secondly, several PLDs paid off the outstanding balances of their individual Initial Unpooled Unfunded Actuarial Liability (IUUAL) this year. This group included the City of Portland, whose IUUAL constituted about half of the total IUUAL amount reported as of last year's valuation for all PLDs having IUUALs. IUUAL balances in the course of being paid off are assets of the Plan. While reduction or elimination does not affect valuation results, funding ratios are affected, as can be seen in comparing last year's results to this year's on pages I-6 through I-8. The assumption changes noted above also affected funding ratios.

For the sixth year in a row, the Pooled Unfunded Actuarial Liability (PUAL) is negative (that is, the Plan's pooled assets exceed its pooled liabilities) as of this valuation date because, while investment returns were negative for the year ending June 30, 2002, they were on average over the last six years greater than the investment return assumption of 8%. The negative PUAL is translated into a reduction in the normal cost rates otherwise payable. The amount of the reduction varies by plan; however, mathematically, the result is a net employer contribution rate that is less than zero in all Regular Plans and all Special Plans.

When the 1999 actuarial valuation for the Plan indicated a net employer contribution rate less than zero, the Board, based on our recommendation and its own policy decisions, reduced slightly the then-existing rates and initiated an intensive study to determine whether the funding methodology then in place was the best approach given the Plan's well-funded status. The study examined several funding methodologies intended to manage the volatility associated with a well- or fully-funded plan and to address policy concerns related to employer contribution rates at or near zero.

We prepared, and the Board examined, multiple scenarios illustrating the application of selected funding approaches and their results. The Board ultimately decided on the methodology that establishes an employer contribution rate that is fixed within a given range of full-funded status ("base rate"), is incrementally adjusted when the funded status falls outside of the upper or lower limits of the range and is never less than a given minimum rate, except when the Board identifies compelling circumstances dictating otherwise. The "base rate" represents the aggregate of the rates related to the various plans within the Consolidated Plan. The rates for the various plans reflect the payroll-weighted normal cost and pooled UAL contributions under each plan. The Board decided that the base rate be set at 3% of payroll, that the upper and lower limits of the range be set at 130% and 90% of full funding, respectively, that the factor for incremental adjustments when funded status falls above or below the range be set at 10% of the difference between the calculated rate and the rate then in effect, and that the minimum base rate be set at 1% of payroll. As neither limit of the range is crossed in this current valuation, the base rate of 3% (which is the same as that set in the 2000 valuation and unchanged in the 2001 valuation) is in effect and the resulting rates for each plan in the Consolidated Plan are those shown in the chart in Section IV of this report.

In the following sections of the report we present detailed results on Plan Assets (Section II), Plan Liabilities (Section III), and Plan Contributions (Section IV). This report also contains four Appendices. Appendix A displays a list of the 228 PLDs that have entered the Plan and each PLD's benefit plan elections. Appendix B presents membership data and profiles and Appendix C provides a summary of benefit provisions of the plans within the Plan. Finally, an outline of all actuarial assumptions and procedures used in our valuation is contained in Appendix D.

EXECUTIVE SUMMARY

VALUATION COMMENTS

ASSETS

As of June 30, 2002, the Plan had assets, when measured on a market value basis, of \$1,332 million as compared to \$1,307 million as of June 30, 2001.

On an actuarial basis, using a method which smooths market fluctuations, the Plan's assets were valued at \$1,537 million on June 30, 2002, as compared to \$1,381 million as of June 30, 2001. The components of this change, in millions, are:

ACTUARIAL		MARKET
+ 191	employer and member contributions	+ 191
- 68	payment of benefits and expenses	- 68
+ 115	investment return per 8.0% assumption	+ 109
<u>- 82</u>	actuarial investment loss (actuarial rate of return @ positive 1.2%)	
	market investment loss (market rate of return @ minus 7.6%)	<u>- 207</u>
156	total change in assets	25

Section II of this report presents more detailed information on Plan assets.

LIABILITIES

Throughout this report we discuss two types of liabilities: (1) Unfunded Actuarial Accrued Liabilities and (2) Unfunded Accrued Benefit Liabilities. In Section III, we discuss in detail the different uses and definitions of these terms.

In general, Actuarial Liabilities are calculated for purposes of determining future contributions. Since actuarial funding methods are used to determine costs for future retirement benefits, unfunded actuarial liabilities will include future increases in pay and service credits. The calculated amount of a plan's actuarial liabilities is directly dependent on the particular funding method used by the actuary; use of different funding methods would provide entirely different results, even when none of the factors (e.g., inflation, salary growth, etc.) is different. In this valuation, the "Entry Age Normal" method of funding was used.

As of June 30, 2002, the total actuarial liability for the Plan was \$1,313 million, as compared to \$1,366 million as of June 30, 2001. Comparing this to the actuarial value of assets of \$1,537 million produces an unfunded actuarial liability (or surplus) of (\$224) million. An additional \$36 million is owed to the Plan by those PLDs having IUUALs (described in detail on page III-1). Thus the Plan has a pooled surplus of \$260 million as of June 30, 2002. As of June 30, 2001 the pooled surplus was \$214 million. The components of the decrease in the unfunded actuarial liability (or increase in the surplus), in millions, are as follows:

Pooled Unfunded Actuarial Liability, June 30, 2001	\$ (214)
increase expected	3
decrease due to assumption changes	(104)
increase due to lower than expected investment return	82
decrease due to other (gains)	<u>(27)</u>
Pooled Unfunded Actuarial Liability, June 30, 2002	\$ (260)

EXECUTIVE SUMMARY

The unexpected decrease in unfunded actuarial liabilities from "other (gains)" of \$27 million is attributable to the difference between assumed and actual rates of pay increases, retirements, terminations and deaths.

The second type of liability presented in this report is the Accrued Benefit Liability. This represents the liabilities for all benefits to be paid in the future, based on members' earnings and service credits as of the valuation date. The difference between this figure and plan assets represents the Unfunded Accrued Benefit Liability. As of June 30, 2002, there is no Unfunded Accrued Benefit Liability. More detailed information on plan liabilities is presented in Section III.

CONTRIBUTIONS

In Section IV of this report, we present detailed information on the development of Plan employer contribution rates, calculated as of June 30, 2002.

Employer contributions to the Plan consist of:

- ◆ a "normal cost contribution", for the portion of projected liabilities attributable to service of members during the year following the valuation date,
- ◆ a "pooled unfunded actuarial liability contribution", for the excess of projected liabilities allocated to service to date over assets on hand and receivables from PLDs entering the Plan with IUUALs.

The normal cost varies by plan and is shown in detail in Table IV-1.

The Pooled UAL (PUAL) rate for all employees changed from -10.1% of payroll as of June 30, 2001, to -11.6% of payroll as of June 30, 2002. The primary components of this change are shown below.

Pooled UAL Rate as of June 30, 2001	-10.1%
Change in actuarial assumptions	-3.2%
Investment loss (due to lower than expected investment returns)	2.5%
Other (gains)/losses	<u>-0.8%</u>
Pooled UAL Rate as of June 30, 2002	-11.6%

The PUAL rate as calculated above would normally be reflected in the FY 2004 contribution rates. The PUAL rate is allocated to the individual plans and is used to offset the individual plans' normal costs to develop the ultimate rate for each plan. Because the PUAL rate would completely offset the Normal Cost rate for the respective individual plans, resulting in rates less than zero, and because of our recommendation against that result, the ensuing funding methodology study and the Board's decision not to establish zero rates, the rates summarized in Table IV-1 are based on the PUAL rate as developed in the 1999 valuation.

Employees also contribute to the plans: Employee contribution rates are detailed in Appendix C-1.

MEMBERS AND BENEFIT RECIPIENTS

The total active membership of the Consolidated Plan increased from 8,753 as of June 30, 2001 to 8,843 as of June 30, 2002. The number of benefit recipients increased from 6,289 as of June 30, 2001 to 6,325 on June 30, 2002. The number of vested inactive members increased from 318 on June 30, 2001 to 363 on June 30, 2002.

The total annual payroll of active members in all plans increased from \$248 million as of June 30, 2001 to \$262 million as of June 30, 2002. Appendix B of this report presents more detail regarding members and benefit recipients.

SUMMARY OF PRINCIPAL RESULTS TOTAL

	<u>June 30, 2002</u>	<u>June 30, 2001</u>
1. Participant Data		
Number of:		
Active Members	8,843	8,753

SECTION II ASSETS

In this section we present the value assigned to assets held by the Plan. These assets are valued on two different bases: market value and actuarial value.

Market Value of Assets

For accounting statement purposes, Plan assets are valued at current market values. Briefly stated, these values represent the "snapshot" or "cash out" value of Plan assets as of the valuation date.

Actuarial Value of Assets

The market value of assets, representing a "liquidation" value of the funds, is not a good measure of the Plan's ongoing ability to meet its obligations. Ongoing funding requirements established using market values are subject to significant variability because of the volatility of market values.

As a consequence, actuarial valuations employ a technique for determining the actuarial value of assets that dampens the swings in market value. The specific technique adopted in this valuation recognizes in a given year one-third of the investment return that is in excess of the 8.00% actuarial assumption for investment return. The following is a step-by-step description:

- Step 1:** Determine the total yield on the investments of the Plan using the full investment return (including capital gains) measured by the difference in the actuarial value of the assets at the beginning of the fiscal year just ended (adjusted for cash flow) and the market value of assets at the end of the fiscal year. The calculation of this return is:
- (a) Increase in assets = Market value of assets at the end of the year minus actuarial value of assets at the end of the prior year adjusted for net cash flow for the current year (contributions minus benefit payments) [=($\$928,844,185$)].
 - (b) Adjusted actuarial value of assets = Actuarial value of assets at the end of the prior year plus one-half of net cashflow for the current year [=($\$7,457,037,491$)].
 - (c) Return = (a) (Increase in assets) divided by (b) (Adjusted actuarial value of assets) [=(12.46%)].
- Step 2:** Calculate the excess of the actual return determined in Step 1 over the expected return for the same year according to the actuarial assumption (8.00%). [(12.46%) - 8.00% = (20.46%)]
- Step 3:** Calculate an adjusted rate that is equal to the rate expected by the actuarial assumption (8.00%) plus one-third of the rate determined in Step 2. [$8.00\% + (1/3 \times 20.46\%) = 1.18\%$]
- Step 4:** The actuarial value of assets equals the amount that would have existed if the actual return on the prior year's actuarial value of assets had been the theoretical rate determined in Step 3 applied to the prior year's actuarial value of assets.

This four-step process and the amounts shown are applied in aggregate to the total assets of the System. The portion allocated to the PLD Consolidated Retirement Plan is based on the reported market value applicable to the Plan.

**TABLE II-1
ASSET ALLOCATION**

	Regular Plans	Special Plans	Total
Market Value	\$796,355,628	\$535,543,666	\$1,331,899,294
Actuarial Value	\$919,127,660	\$618,107,012	\$1,537,234,672

SECTION III LIABILITIES

Actuarial Liabilities

A fundamental principle in financing the liabilities of a retirement program is that the cost of its benefits should be related to the period in which benefits are earned, rather than to the period of benefit distribution. There are several methods currently used by actuaries to realize this principle.

The method used for this valuation is referred to as the "entry age normal actuarial cost method". Under this method, a level percent of pay employer cost is determined for each plan that, along with member contributions, will pay for projected benefits at retirement for a new entrant into the plan. This cost is assumed applicable to all active plan members. The level percent of pay is called the normal cost rate, and the product of that rate and payroll is the normal cost.

The actuarial liability is that portion of the present value of projected benefits that will not be paid by future employer normal cost contributions and member contributions. If this liability is greater than the actuarial value of plan assets as of the same date, the difference is referred to as the unfunded actuarial liability.

Upon entering the Consolidated Plan, each PLD had its individual actuarial liability calculated. Each PLD having an Initial Unpooled Unfunded Actuarial Liability (IUUAL) will pay this liability on a scheduled basis, in addition to making the Normal Cost Contribution required by the plan(s) in which it participates. Each PLD having negative IUUALs (i.e., positive balance) will use this balance to pay part or all of its employer contribution. Each year the valuation for the Consolidated Plan will calculate the Pooled Unfunded Actuarial Liability (PUAL) of the Regular and of the Special Plans under the Plan, and adjust the employer contribution rates accordingly. Benefit improvements, actuarial gains and losses, and changes in actuarial assumptions and methodologies, if any, will have an effect on the total actuarial liabilities of the Regular and of the Special Plans under the Plan and on the portions of these that are unfunded. In Table III-1 we have summarized the actuarial liabilities as of June 30, 2002.

Accounting Statement Information

Statement No. 35 of the Financial Accounting Standards Board requires that every pension plan disclose certain information regarding the status of the plan.

As directed by the above referenced accounting statements, the liabilities shown in Table III-2, Accrued Benefit Liabilities, do not include any projections for future creditable service and pay increases.

The Governmental Accounting Standards Board (GASB) released a new pronouncement (Statement No. 25) which replaced the disclosures formerly required by Statement No. 5. The figures shown in Table III-1 are suitable for the new Statement No. 25 disclosures.

Both types of present values of benefits are determined assuming that the plan is ongoing and members continue to terminate employment, retire, etc., in accordance with the actuarial assumptions.

All PLDs that enter the Consolidated Plan cease to be individual sponsors of a "Single-Employer Defined Benefit Pension Plan" and instead become participants in a "Cost-Sharing Multiple-Employer Defined Benefit Pension Plan". As such, the disclosures made by individual PLDs should reflect the assets and liabilities of the Regular and/or Special Plan(s) under the Consolidated Plan in which a PLD participates and not those of the PLD itself.

SECTION IV

CONTRIBUTIONS

General Comments

Under established procedures, employer contribution rates based on this June 30, 2002, actuarial valuation, including our recommendation and the Board's decision not to establish zero rates, are used to determine Fiscal Year 2004 contributions. In this context, the term "employer contribution rate" means the percentage that is applied by each PLD to its active member payroll to determine the PLD's actual employer contribution amount.

In addition to the applicable employer contribution rate, each individual PLD will make a dollar payment (or receive a dollar credit) based on its IUUAL to be added to (or subtracted from) the amount derived by applying the employer contribution rate to the participant payroll.

Employees are required to contribute to the plans: Employee contribution rates are detailed in Appendix C-1.

Description of Rate Components

The Entry Age Normal funding method was used to develop the employer contribution rates in this section. Under this funding method, as with most other actuarial funding methods, a total contribution rate is determined which consists of two elements: the normal cost rate and the pooled unfunded actuarial liability rate.

Normal Cost Rate

For each of the Regular and Special Plans in the Consolidated Plan, an individual entry age normal cost rate was determined for a typical new entrant. This rate was determined by taking the value, as of age at entry into the plan, of the typical member's projected future benefits (including retirement, disability and death benefits), reducing it by the value of future member contributions, and dividing it by the value, also as of the member's entry age, of the member's expected future salary. The normal cost rate, so determined separately for each Regular and each Special Plan, was assumed applicable to all active members of each of the plans.

Pooled Unfunded Actuarial Liability Rate

The unfunded actuarial liability under the Entry Age Normal method equals the present value, at time of valuation, of future benefits less the present value of future normal costs, future member contributions, future IUUAL payments and current assets. Under the Consolidated Plan, a Pooled Unfunded Actuarial Liability Rate is calculated for the Regular Plans as a group and for the Special Plans as a group. The rate for each group is then allocated to each plan within the Regular Plans and to those within the Special Plans, respectively, on the basis of total normal cost plus employee contributions for each such plan. That is, those plans which constitute a larger portion of the overall liability will pay a larger portion of the pooled UAL rate or receive a larger credit if the rate is negative.

IUUAL Payments/(Credits)

In addition to employer contributions required under the Consolidated Plan, each individual PLD in the Consolidated Plan that came into the Plan with liabilities in excess of assets continues to make payments on its IUUAL. Where IUUAL payments are due, each PLD makes payment of a specific dollar amount. Where a PLD had, at the time of entry into the Consolidated Plan, surplus assets, the PLD uses a portion of the surplus toward payment of its employer contributions to the Consolidated Plan. Credit transactions, also of specific dollar amounts, are accomplished by MSRS accounting entries.

Employer Contribution Rate Summary

In Table IV-1 we present employer contribution rates applicable for determining the Fiscal Year 2004 contributions to the Plan, using the cost methods described above. These were developed using actuarial assumptions and methods described in Appendix D.

TABLE IV-1
EMPLOYER CONTRIBUTION RATES*
FISCAL YEAR 2004

	<u>Pooled Unfunded</u> <u>Actuarial Liability</u>			Total Rates
	Normal Cost**	Regular Plans	Special Plans	
<u>Plans with COLA</u>				
Regular Employees Plan AC	7.9%	-5.1%		2.8%
Regular Employees Plan BC	5.3%	-3.6%		1.7%
Special Plan 1C	16.8%		-10.3%	6.5%
Special Plan 2C	9.6%		-5.6%	4.0%
Special Plan 3C	12.6%		-7.3%	5.3%
Special Plan 4C	7.9%		-4.4%	3.5%
<u>Plans with No COLA</u>				
Regular Employees Plan AN	4.1%	-2.6%		1.5%
Special Plan 1N	9.2%		-5.6%	3.6%
Special Plan 2N	4.9%		-2.7%	2.2%
Special Plan 3N	6.5%		-3.6%	2.9%
Special Plan 4N	3.6%		-1.7%	1.9%

* IUUAL payments are made in addition to these costs and IUUAL credits are taken against these costs.

** Includes costs of ancillary benefits.

Notes:

FO = Future Service COLA only, that is, for benefits attributable to service rendered after the Future Service COLA date.

- ¹ Employees hired prior to July 1, 1997 and who are members of the System are covered under Special Plan #1. Corrections Officers and Law Enforcement Officers hired on or after July 1, 1997, will be covered under Special Plan #2. All other employees hired on or after July 1, 1997, will be covered under Regular Plan A.
- ² applicable to all new hires on or after July 1, 1996. All members in the PLD at July 1, 1996 elected to remain in the 1/50 Plan under Regular Plan A.
- ³ applicable to all new police hires on or after July 1, 1998.
- ⁴ applicable for future service only from July 1, 2001.
- ⁵ applicable to all new hires on or after July 1, 1995. All members in the PLD at July 1, 1995 elected to remain in the 1/50 Plan under Regular Plan A.
- ⁶ applicable to all new hires on or after July 1, 1994. All members in the PLD at July 1, 1994 elected to remain in the 1/50 Plan under Regular Plan A.
- ⁷ applicable for future service rendered by the Town's Firefighters and Police Officers from July 1, 2001.

APPENDIX C

SUMMARY OF PLAN PROVISIONS

SUMMARY OF PLAN PROVISIONS

1. Member Contributions

Members are required to contribute a percent of earnable compensation which varies by plan as follows:

Regular AC & AN	6.5%
Regular BC	3.0%
Special 1C & 1N	6.5%
Special 2C & 2N	6.5%
Special 3C & 3N	8.0% for first 25 years, 6.5% after
Special 4C & 4N	7.5% for first 25 years, 6.5% after

2. Average Final Compensation

For purposes of determining benefits payable under the plan, average final compensation is the average annual rate of earnable compensation for the three years of creditable service (not necessarily consecutive) which produce the highest such average.

3. Creditable Service

Creditable service includes service while a member, certain service prior to the establishment of the plan, purchased service credit of which there are several types, and service while receiving disability benefits under the plan.

4. Service Retirement Benefits

Regular Plan AC

Normal Retirement Age: 60

Eligibility for member in active service and inactive members: 25 years of creditable service.

Eligibility alternative for members in active service: at least one year of creditable service immediately before retirement and at least normal retirement age.

Eligibility for members not in active service at retirement, and not in active service on or after October 1, 2000: at least 10 years of creditable service and at least normal retirement age.

Eligibility for members not in active service at retirement, but in active service on or after October 1, 2000: at least 5 years of creditable service and at least normal retirement age.

Benefit: 1/50 of average final compensation multiplied by years of membership service under Consolidated Plan A plus a variable percentage of average final compensation multiplied by years of service under any previous plans (the percentage depends on the previous plan(s)), the sum of which is reduced by approximately 2-1/4% for each year that a member is younger than age 60 at retirement.

Form of payment: life annuity ("full benefit"), unless an optional method of payment is selected.

Cost-of-Living Adjustment: See item 10.

Regular Plan AN

This benefit plan is the same as Regular Benefit Plan AC, except that there is no provision for cost-of-living adjustments.

ACTUAL HOLDINGS

at June 30, 2003

Regular Plan BC

Normal Retirement Age: 60

Eligibility for member in active service and inactive members: 25 years of creditable service.

Eligibility alternative for members in active service: at least one year of creditable service immediately before retirement and at least normal retirement age.

Eligibility for members not in active service at retirement, and not in active service on or after October 1, 2000: at least 10 years of creditable service and at least normal retirement age.

Eligibility for members not in active service at retirement, but in active service on or after October 1, 2000: at least 5 years of creditable service and at least normal retirement age.

Benefit: 1/100 of average final compensation multiplied by years of membership service under Consolidated Plan B plus a variable percentage of average final compensation multiplied by years of service under any previous plans (the percentage depends on the previous plan(s)), the sum of which is reduced by approximately 2-1/4% for each year that a member is younger than age 60 at retirement.

Form of payment: life annuity ("full benefit"), unless an optional method of payment is selected.

Cost-of-Living Adjustment: See item 10.

Note: Under certain circumstances, Regular Plan service can count, on a pro-rata basis, toward meeting Special Plan benefit eligibility requirements.

Special Plan 1C

Eligibility: 20 years of creditable service in named positions.

Benefit: 1/2 of average final compensation plus 2% for each year of service in excess of 20.

Form of payment: life annuity ("full benefit"), unless an optional method of payment is selected.

Cost-of-Living Adjustment: See item 10.

Special Plan 1N

This benefit plan is identical to Special Benefit Plan 1C, except that there is no provision for cost-of-living adjustments.

Special Plan 2C

Eligibility: 25 years of creditable service in named positions.

Benefit: 1/2 average final compensation plus 2% for each year of service in excess of 25.

Form of payment: life annuity ("full benefit"), unless an optional method of payment is selected.

Cost-of-Living Adjustment: See item 10.

Special Plan 2N

This benefit plan is identical to Special Benefit Plan 2C, except that there is no provision for cost-of-living adjustments.

ACTUAL HOLDINGS

at June 30, 2003

Special Plan 3C

Eligibility:	25 years of creditable service in named positions.
Benefit:	2/3 of average final compensation plus 2% for each year of service in excess of 25.
Form of payment:	life annuity ("full benefit"), unless an optional method of payment is selected.
Cost-of-Living Adjustment:	See item 10.

Special Plan 3N

This benefit is identical to Regular Benefit Plan 3C, except that there is no provision for cost-of-living adjustments.

Special Plan 4C

Eligibility:	Age 55 with 25 years of creditable service in named positions.
Benefit:	1/50 of average final compensation multiplied by years of membership service under Consolidated Plan A plus a variable percentage of average final compensation multiplied by years of service under any previous plans (the percentage depends on the previous plan(s)), the sum of which is reduced by approximately 2-1/4% for each year that a member is younger than age 55 at retirement.
Form of payment:	life annuity ("full benefit"), unless an optional method of payment is selected.
Cost-of-Living Adjustment:	See item 10.

Special Plan 4N

This benefit plan is identical to Special Benefit Plan 4C, except that there is no provision for cost-of-Living adjustments.

Note: If Special Plan members fail to meet the Special Plan eligibility criteria, their service retirement benefits are those provided by the applicable underlying Regular Plan; Special Plan service credits are used toward Regular Plan eligibility requirements.

5. Pre-Retirement Accidental Death Benefits

Eligibility:	Death while active or disabled resulting from injury received in the line of duty.
Benefit:	<ul style="list-style-type: none"> - if the member leaves no dependent children, 2/3 of the member's average final compensation to the surviving spouse until death, - if the member is survived by a spouse who has the care of dependent child(ren) of the member, the surviving spouse shall receive an annual sum equal to the member's average final compensation. When there is no longer any dependent child(ren), the surviving spouse shall receive 2/3 of member's average final compensation until death, - if the member is survived by a spouse who does not have the care of the member's dependent child(ren), the surviving spouse and dependent child(ren) shall share equally an annual sum equal to the member's average final compensation. When there is no longer any dependent child(ren), the surviving spouse shall receive 2/3 of member's average final compensation until death, - if the member leaves no spouse, the dependent child(ren) shall be paid an annual amount equal to the member's average final compensation. Benefits will cease when the last dependent child no longer meets the definition of "dependent child".

ACTUAL HOLDINGS

at June 30, 2003

6. Pre-Retirement Ordinary Death Benefits

- Eligibility: Death while active, inactive eligible to retire, or disabled.
- Benefit: designated beneficiary, spouse, child(ren), or parents entitled to benefit calculated as if deceased member had retired under Option 2 (see item 12); however, beneficiary may elect survivor benefits payable to a surviving spouse, dependent child(ren), parents, or other designated beneficiaries in monthly amounts varying by status of beneficiary and number of eligible survivors. Otherwise, accumulated contributions with interest are payable to designated beneficiary, spouse, child(ren), older parent or estate.

7. Disability Benefits Other Than No Age Benefits

- Eligibility: Disabled as defined in the MSRS statutes, prior to normal retirement age; unable to perform duties of own position; employed prior to October 16, 1992 and did not elect No Age Disability Option.
- Benefit: 66 2/3% of average final compensation, reduced by employment earnings over the specified statutory limit, and to the extent that the benefit, in combination with worker's compensation and Social Security, exceeds 80% of average final compensation.
- Form of payment: Payment begins on termination of service and ceases on cessation of disability or after five years, unless the member is unable to engage in any substantially gainful activity; in which case payments cease on the earlier of 10 years following normal retirement age or the date that the service retirement benefit equals or exceeds the disability benefit.
- Conversion to service retirement: During the period of disability, average final compensation is increased with cost-of-living adjustments and service is credited. On the date when service benefits reach a level of 66 2/3% of average final compensation or 10 years after the normal retirement date, if earlier, the disability benefit converts to a service retirement benefit based on service and average final compensation at that point.

8. No-Age Disability Benefits

- Eligibility: Disabled as defined in the MSRS statutes; employed on or after October 16, 1992 or employed prior to October 16, 1992 and elected the provisions of No Age Disability.
- Benefit: 59% of average final compensation, reduced by employment earnings over the specified statutory limit, and to the extent that the benefit, in combination with worker's compensation and Social Security, exceeds 80% of average final compensation.
- Form of payment: Payment begins on termination of service and ceases on cessation of disability or after five years, unless the member is unable to engage in any substantially gainful activity; in which case payments cease on the date the service retirement benefit equals or exceeds the disability benefit.
- Conversion to service retirement: During the period of disability average final compensation is increased with cost-of-living adjustments and service is credited. On the date when service benefits reach a level of 59% of average final compensation the disability benefit converts to a service retirement benefit based on service and average final compensation at that point.

9. Refund of Contributions

- Eligibility: termination of service other than by retirement or death.
- Benefit: member's accumulated contributions with interest.

ACTUAL HOLDINGS

at June 30, 2003

10. Cost-of-Living Adjustments

All retirement (and survivor) benefits payable to (or in relation to) benefit recipients who were employed by a PLD that elected a plan which provides for a COLA are adjusted each year that there is a percentage change in the Consumer Price Index, based on the Index. Cost-of-living adjustments are effective September 1 and are applied to all benefits which have been in payment for six months. The maximum annual increase or decrease is 4%.

11. Methods of Payment of Service Retirement Benefits

At retirement, a member must choose one of the following methods of payment.

Full Benefit: Unadjusted benefit paid for the life of the member only.

- Option 1:** Cash refund equal to the remaining employee contribution balance, if any, at the date of death (the employee contribution balance having been reduced each month by the portion of the monthly benefit deemed to be provided by employee contributions.).
- Option 2:** 100% joint and survivor annuity.
- Option 3:** 50% joint and survivor annuity.
- Option 4:** Joint and survivor annuity at any percentage other than those available under Option 2 and Option 3.
- Option 5:** Designated percentage of the benefit (not less than 51%) payable to the member, with the remaining percentage (the two to equal 100%) payable to a beneficiary (may only be a sole beneficiary) while both are alive. At the death of either, the higher of the two percentages is paid to the survivor for the survivor's life, and the lower-percentage benefit ceases to be paid.
- Option 6:** 100% joint and survivor annuity with pop-up*.
- Option 7:** 50% joint and survivor annuity with pop-up*.
- Option 8:** Option 4 with pop-up*.

* The "pop-up" feature attached to a given Option means that in the case of a beneficiary predeceasing the member, the member's benefit will be revised prospectively to the amount that the benefit would have been had the member selected Full Benefit payment upon retirement.

APPENDIX D ACTUARIAL ASSUMPTIONS AND METHODS

A. Actuarial Assumptions

1. Annual Rate of Investment Return 8.0%
2. Cost of Living Increases in Benefits 4.0% (Where Applicable)

3. Rates of Termination at Selected Ages*

<u>Age</u>	<u>Prior Assumption</u>	<u>Revised</u>	
	Regular & Special Plan Members <u>% Leaving</u>	<u>Regular</u>	<u>Special</u>
25	7.0%	19.5%	7.5%
30	6.0	12.5	7.5
35	5.0	10.0	4.2
40	4.0	7.5	3.2
45	3.0	5.3	2.2
50	2.0	3.6	2.0
55	1.0	2.3	2.0

* Members with five or more years of service are assumed to elect deferred vested benefits; other terminations are assumed to elect refunds.

4. Rates of Active Healthy Life Mortality at Selected Ages (number of deaths per 10,000 members)**

<u>Age</u>	<u>Male</u>	<u>Female</u>
25	7	3
30	9	4
35	9	5
40	12	8
45	17	10
50	28	15
55	48	25

** For Regulars, 5% of deaths are assumed to arise out of and in the course of employment; for Specials, 20% of deaths are assumed to arise out of and in the course of employment.

5. Rates of Inactive Health Life Mortality at Selected Ages (number of deaths per 10,000 members)

<u>Age</u>	<u>Male</u>	<u>Female</u>
25	6	3
30	8	5
35	11	7
40	16	9
45	29	14
50	53	22
55	85	33

ACTUARIAL ASSUMPTIONS AND METHODS
(continued)

7. Rates of Disabled Life Mortality at Selected Ages (number of deaths per 10,000 members)

<u>Age</u>	<u>Male</u>	<u>Female</u>
25	391	528
30	315	467
35	321	326
40	332	215
45	349	191
50	376	207
55	420	240
60	488	288
65	595	366
70	763	487

8. Rates of Retirement at Selected Ages (number retiring per 1,000 members)

	<u>Age</u>	<u>Prior Assumption</u>	<u>Revised Assumption</u>
<u>Regular Plans</u>	45	25	50
	50	38	50
	55	50	100
	56	52	100
	57	55	100
	58	57	150
	59	60	250
	60	1,000	400
	63	1,000	250
	70	1,000	1,000

Special Plans

Prior assumption is that 100% retire when first eligible for retirement (i.e., after 20 years of service in Special Plan 1, after 25 years of service in Special Plans 2 and 3, and at the later age of 55 or 25 years of service in Special Plan 4.

Revised assumption: 50% of those eligible to retire in each year.

9. Rates of Disability at Selected Ages (members becoming disabled per 10,000 members) **

<u>Age</u>	<u>Regular Plan</u>	<u>Special Plan</u>
25	6	13
30	6	13
35	7	14
40	11	18
45	22	29
50	42	49
55	72	79

** Disabilities are assumed to be 75% non-service connected for Regular employees and 25% non-service connected for Police and Fire.

ACTUARIAL ASSUMPTIONS AND METHODS (continued)

10. Family Composition Assumptions	80% of active members are married and have two children born when the member is 24 and 28; children are dependent until age 18; spouses are same age; member has no dependent parents; unmarried members have beneficiaries entitled to benefits worth 80% as much as those of married members' beneficiaries.	
11. Salary Growth Assumption		
Prior Assumption	5½% per annum	
Revised Assumption	<u>Rates of Increase at Selected Ages</u>	
	<u>Age</u>	<u>Increase</u>
	25	9.0%
	30	7.5%
	35	5.5%
	40	5.5%
	45	5.0%
	50	4.5%
	55	4.5%
	60	4.5%

B. Actuarial Methods

1. Funding Method

The Entry Age Normal method is used to determine costs. Under this funding method, the total employer contribution rate is determined which consists of two elements, the normal cost rate and the pooled unfunded actuarial liability (PUAL) rate. The actual contribution for a given PLD will include an IUUAL payment as well, unless the PLD came into the Plan with surplus assets.

For each Regular and Special Plan, a normal cost rate is determined for the average new entrant. This rate is determined by taking the value, as of age at entry into the plan, of the member's projected future benefits, reducing it by the value of future member contributions, and dividing it by the value, also as of the member's entry age, of the member's expected future salary.

In addition to normal cost contributions calculated per plan, the employers in each plan are required to make contributions to fund that plan's pooled unfunded actuarial liability, if any. The actuarial liability is defined as the present value of future benefits less the present value of future normal costs, less future member contributions, and less expected IUUAL payments. The pooled unfunded actuarial liability is the total of the actuarial liability for all members less the actuarial value of the Plan's assets. The actuarial liability includes projections of future member pay increases and future service credits.

The Initial Unpooled Unfunded Actuarial Liability (IUUAL) was calculated at entry into the Consolidated Plan for each PLD. For PLDs with liabilities greater than assets, these amounts are amortized by annual payments over a fixed number of years. Additional unfunded liability amounts which arise after entry to the Consolidated Plan will be pooled and amortized over 15 years.

2. Asset Valuation Method

The actuarial valuation employs a technique for determining the actuarial value of assets which dampens the swings in market value. The specific technique adopted in this valuation recognizes in a given year one-third of the investment return that is in excess of the 8.00% actuarial assumption for investment return.

STATISTICAL SECTION

ACTIVE and INACTIVE MEMBERS

Data reflecting comprehensive membership in the MSRS as of June 30th as contained in the System's Membership Record Keeping System Database (MRKS) are presented below. These membership numbers include both active and inactive members. Active members are those who are currently working for an MSRS participating employer and who are therefore making member contributions to the MSRS. Inactive members are those who made member contributions in the past and whose contributions remain with the System. These members are not making contributions presently because either they are not working for an MSRS participating employer or they are now in positions in which membership is optional and have opted not to be active members.

The comprehensive membership numbers below are broader and therefore somewhat different from the participants counts included in both the Actuarial Valuation and Statistical Sections of this report. Teacher membership presents a particularly interesting data management matter. By statute, any person employed as a teacher is a mandatory member under the State and Teacher plan. Consequently, all substitute teachers, even if employed for only a brief period, are members. When a teacher member appears on a payroll for the first time, a MSRS membership record is established and exists until such time as the member either takes a refund, retires or dies. It is not unusual for a substitute teacher to appear sporadically, if at all, on payrolls in any given year. Therefore, for actuarial reasons having to do with the calculation of liabilities, teacher members with annual earnings of less than \$2,000 are excluded from actuarial valuation data. However, these same teacher members represent recordkeeping and member service responsibilities for MSRS staff and are therefore included in the comprehensive membership numbers below. Likewise, non-vested inactive members are not included in the annual valuation, but are included in the comprehensive membership numbers.

Comprehensive Membership Counts

Members	FY 2003			FY 2002			FY2001		
	Active	Inactive	Total	Active	Inactive	Total	Active	Inactive	Total
State*	14,567	17,217	31,784	14,935	15,606	30,541	14,692	15,505	29,747

BENEFIT RECIPIENTS

Recipients of MSRS benefits fall into five categories:

- *Service Retirees* - those who are receiving a service retirement benefit and their concurrent beneficiaries.
- *Retiree Beneficiaries* - those who are the beneficiaries of deceased service retirees.
- *Disability Retirees* - those who are receiving a disability retirement benefit.
- *Ordinary Death Beneficiaries* - those who are the beneficiaries of active or inactive members or disability retirees who died before being qualified to receive or, if qualified, before receiving, service retirement benefits.
- *Accidental Death Beneficiaries* - those who are the beneficiaries either of deceased active members or of disability retirees who died as a result of injuries arising out of and in the course of employment.

The figures below show the categories of benefits paid and the total benefits in each category paid in the month of June for the years 2001, 2002 and 2003.

	June 2003 Benefit Recipients	June 2003 Benefit Dollars	June 2002 Benefit Recipients	June 2002 Benefit Dollars	June 2001 Benefit Recipients	June 2001 Benefit Dollars
Service Retirees/Current Beneficiaries	24,127	\$ 27,940,415	23,626	\$ 26,535,656	23,287	\$ 25,066,916
Retiree Beneficiaries	3,300	2,614,681	3,265	2,534,788	3,175	2,413,792
Disability Retirees	2,292	3,194,465	2,218	3,213,780	2,096	2,842,590
Ord./Accidental Death Beneficiaries	1,072	441,019	989	412,091	1,008	414,780
Total	30,791	\$ 34,190,580	30,098	\$ 32,696,315	29,566	\$ 30,738,078
