OUR COVER

The Witch Tree, known as the Little Cedar Spirit Tree by the Ojibwe, has stood its watch over Lake Superior for at least 300 years. Located near Grand Portage, the tree is held sacred by the Ojibwe, who, by tradition, leave offerings of tobacco to ensure a safe journey on the big lake.

Achievement Awards

PPCC

The Public Pension Coordinating Council recently recognized PERA for meeting administration and plan funding standards for public retirement systems.

GFOA

The Government Finance Officers Association (GFOA) recognizes public retirement systems that meet its rigorous standards for financial reporting with its annual Certificate of Achievement for Excellence in Financial Reporting. It is the highest form of recognition for accounting and financial reporting in the public pension sector. PERA received this award for our 2008 Comprehensive Annual Financial Report, the 24rd time we have been so honored.

Dennis C. Hegberg
Board President

December 24, 2009

**Dear Members, Annuitants,
 Beneficiaries and Governmental Employers:**

This 78th annual financial report of the Public Employees Retirement Association (PERA) discloses financial, actuarial, and other related information about PERA and the funds it administers. On June 30, 2009, PERA's net assets available for benefits at fair value exceeded \$14.3 billion, a decrease of \$3.8 billion from a year ago due to negative investment returns. Those negative returns were a result of the "Great Recession" which began in December 2007 and continued throughout fiscal year 2009, proving to be the longest and deepest recession since World War II.

The total rate of return for PERA's investment assets was a negative 18.8 percent, net of fees, for the 12 months ended June 30, 2009. For the past 10 years, PERA's investments matched the composite market return benchmark with an annualized return of 2.4 percent. Over the past 20 years, PERA's investments have returned 7.8% net of fees, 5.0 percentage points above CPI during that same period.

Market losses over the past two fiscal years have left PERA in a funding deficit that we will not be able to grow out of through investment gains alone. PERA's Board of Trustees is looking at a variety of options, not just contribution rate increases, that will be needed to sustain the financial viability of all the plans we administer.

As I noted in this report last year, the composite funding ratio of the Minnesota Post Retirement Investment Fund (Post Fund) fell below 80 percent as of June 30, 2008, triggering the merger of the Post Fund with the Active Funds from which assets were originally transferred as members retired. That merger occurred on June 30, 2009, marking the end of a separate fund supporting annuities payable to retirees and their joint annuitants. Future retiree cost of living increases will be locked in at 2.5 percent, even in years when inflation falls below 2.5 percent.

Legislation was passed in 2008 allowing PERA to be the trust administrator of a trust established to pay post-employment benefits. Local units of government can now take advantage of this opportunity by setting up either a revocable or irrevocable trust, using the State Board of Investment to invest the assets. Nineteen local units of government signed up to do just that in fiscal year 2009.

Legislation was passed in 2009 establishing a new statewide volunteer firefighter retirement plan that will be effective in fiscal year 2010. We are proud to be asked to provide this service to our firefighting community, and look forward to working with this group of outstanding volunteers.

As always, our commitment as trustees of the association is the preservation and safety of the assets of PERA's funds, and the protection and furtherance of the interests of our members, annuitants, and beneficiaries. I believe our efforts over the past year have amply illustrated this continuing dedication as fiduciaries of the public employee retirement funds.

Dennis C. Hegberg

Board of Trustees
 Public Employees Retirement Association of Minnesota
 60 Empire Drive, Suite 200
 St. Paul, Minnesota 55103

Dear Trustee:

We are pleased to present this Comprehensive Annual Financial Report of the Public Employees Retirement Association (PERA) for the fiscal year ended June 30, 2009—our 78th year of operation. The information contained in this report is accurate in all material respects and is intended to present fairly the financial status and results of operations of the association.

Responsibility for the contents of this report, including the financial statements, rests solely with the management of the association. This transmittal letter is designed to complement Management's Discussion and Analysis (MD&A) and should be read in conjunction with it. The MD&A begins on page 18 in the Financial Section of this report.

PLAN OVERVIEW

PERA was established in 1931 by the Minnesota legislature. For financial reporting purposes, PERA is considered a pension trust fund of the State of Minnesota. The State reports our assets in the State's annual report as pension trust fund assets. The Plan is funded on an actuarial reserve basis, with money being set aside for benefits while the benefits are being earned and before they are paid.

PERA serves over 2,000 separate local governmental entities. These participating employers include cities, counties, townships, and school districts located throughout the State. On June 30, 2009, PERA's membership included 158,103 current, active employees and 73,807 benefit recipients in the three defined benefit plans, and another 7,182 members with money in the defined contribution plan.

ACCOUNTING SYSTEMS AND REPORTS

Financial statements are prepared in conformity with accounting principles generally accepted in the United States of America and reporting guidelines set forth by the Governmental Accounting Standards Board (GASB). PERA's Comprehensive Annual Financial Report also complies with Minnesota Statutes, Section 356.20. Transactions are reported on the accrual basis of accounting. Contributions from employers and members are recognized as revenue when earned and measurable. Expenses are recorded when corresponding liabilities are incurred, regardless of when payment is made.

Letter of Transmittal

(Continued)

PERA's internal accounting controls are designed to provide reasonable assurance for the safekeeping of assets and the reliability of all financial records. Our independent auditors have audited the accompanying financial statements and reviewed our internal control structure. They reported no material weaknesses in our internal controls. Management believes that an adequate system of internal control is in place and that the accompanying statements, schedules and tables are fairly presented.

INVESTMENTS

In accordance with Minnesota Statutes, Section 353.06, assets of the PERA Funds are invested by the Minnesota State Board of Investment (SBI). All investments undertaken by the SBI are governed by the common law prudent person rule and other standards codified in Chapter 11A of the Minnesota Statutes. The board is comprised of the state's elected officers: Governor Tim Pawlenty; State Auditor Rebecca Otto; Secretary of State Mark Ritchie; and State Attorney General Lori Swanson.

The SBI appoints a 17-member Investment Advisory Council (IAC) to advise the State Board on asset allocation and other policy matters relating to investments. The IAC also advises the SBI on methods to improve the rate of return while assuring adequate security of the assets under management. The executive director of PERA is a standing member of the IAC.

The IAC has decided to eliminate its previous committee structure and has restructured its process for evaluating asset allocation, stock and bond managers, and alternative investments. All proposed investment policies recommended to the Board are reviewed and discussed in detail by the full council before they are presented to the board for action.

The SBI also employs investment consultants to monitor and evaluate investment management firms' performance and to evaluate or suggest various alternatives for asset allocation and other investment policy matters.

ACTIVE FUNDS

Pension assets of the currently working members of the Association are managed externally by private money managers retained under contract with the SBI. These assets are pooled with the assets of other active members of statewide retirement funds into the Basic Retirement Fund. The greatest share of these assets, approximately 61 percent, is invested in domestic and international common stocks in order to maximize the long-term rate of return. Including international stocks in the asset mix allows the SBI to diversify its holdings across world markets and offers the opportunity to enhance returns and reduce the risk/volatility of the total portfolio. For the year ended June 30, 2009, the Basic Retirement Funds produced a negative 19.6 percent rate of return on active member assets.

The SBI has one overriding responsibility in the management of these funds: to ensure that sufficient funds are available to finance promised retirement benefits. Within this context, SBI has established a long-term investment objective: to outperform a composite market index weighted to reflect the long-term asset allocation policy over a ten-year period. Performance is measured net of all fees and costs to assure the SBI's focus is on true net return. The Basic Funds' ten-year annualized rate of return at June 30, 2009 was 2.4 percent, and its' twenty-year annualized rate of return was 7.8 percent, below our assumed rate of 8.5 percent.

POST RETIREMENT INVESTMENT FUND

The SBI has responsibility for investment of the assets of the Minnesota Post Retirement Investment Fund (MPRIF). Until this year, when members retired from one of the defined benefit plans, an amount equal to the present value of expected future benefits was moved from the Active Funds to the Minnesota Post Retirement Investment Fund (MPRIF) to pay those benefits. The MPRIF was made up of retirement assets from PERA's three plans along with assets from the Teachers Retirement Association and the Minnesota State Retirement System. As of June 30, 2008 the MPRIF was 79.7% funded, triggering a dissolution of the MPRIF and a merger on June 30, 2009 of MPRIF assets back into the Active Funds from whence they originally came in accordance with legislation passed in 2008.

In contrast to the investment goals of the Basic Fund, invested for current working members, the MPRIF's goal was to ensure returns were adequate to meet the actuarially assumed return of 6 percent on its invested assets

on an annualized basis and were sufficient to finance lifetime benefit increases. For the one-year, five-year and ten-year periods ending June 29, 2009, the MPRIF had annualized returns of negative 17.5 percent, positive 2.7 percent and 2.5 percent respectively.

The MPRIF and the Active Funds are now a Combined Fund as of June 30, 2009. The Combined Fund had a negative 18.8 percent return in FY09.

ECONOMIC CONDITIONS AND OUTLOOK

The national economy was hit with a financial meltdown during fiscal year 2009 as the country experienced a recession which proved to be the worst in many aspects since the Great Depression. Low interest rates and large capital inflows from outside the U.S. led to a surplus of loanable bank funds and easy credit for homeowners during the first half of this decade. As housing prices soared, the number of high risk subprime loans soared as well. In the summer of 2006 home prices began to fall, and by March 2008, millions of homeowners owed more than their homes were worth and began defaulting on their loans as home prices plummeted. Many of those loans were hidden in collateralized-debt obligations, which had been rated triple-A because of their insurance policies. Leveraged banks and investment companies had to write off billions in assets, causing them to become vastly undercapitalized. This precipitous slide in housing prices ultimately triggered a financial market crisis and a credit crunch, making it difficult for businesses to borrow the funds needed to stay afloat day to day.

As the economy lay on the brink of a recession, firms began laying off workers in an attempt to reduce skyrocketing expenses. Large firms like Bear Stearns, Lehman Brothers, Merrill Lynch, Circuit City, AIG, Fannie Mae and Freddie Mac declared bankruptcy, were bought out, or were taken over. From the start of the recession in December 2007 through June 2009, the number of unemployed persons increased by 7.2 million and the unemployment rate rose to 9.7 percent, a 26-year high. Consumer confidence fell to an all-time low in the fall of 2008. The Federal government stepped in with the Emergency Economic Stabilization Act of 2008 in October, in an attempt to stimulate the economy and keep the financial markets from collapsing. The Fed Funds Rate was dropped to 0. The stimulus package, combined with a precipitous drop in the price of oil, seems to have been successful, however. Positive economic signs finally began to emerge in the spring of 2009 as home prices began to level off.

The markets reacted to the financial crisis in ways not seen since the Great Depression. Equity markets dropped more than 50% worldwide from their highs in 2007, finally bottoming out in March 2009. Fortunately, the second quarter of 2009 saw restored market confidence and record outperformance, especially in the bond markets. The Russell 3000 rebounded, ending the fiscal year down 26.6%.

Minnesota's economy was not immune from the financial crisis. Minnesota's jobless rate soared from 5.3 percent to 8.4 percent in FY09 as 112,000 jobs were lost. Home prices in the Twin Cities remain about 30 percent below their peak in September 2006. The poor housing market translated to depressions in the construction, lumber and wood products industries, large industries in Minnesota.

On a positive note, Minnesota's economy performed better than the nation in most categories. During the year, Minnesota's median household income rose to \$57,288, the thirteenth best in the country. Per capita personal income grew by 4.1 percent, considerably stronger than the 2.9 percent growth observed nationally. More people own their own homes in Minnesota than in any other state. At 72.9 percent, Minnesota's labor force participation rate ranks third in the country. Real GDP per capita in Minnesota grew by 1.25 percent in 2008 while nationally it fell by 0.2 percent.

It appears as though the recession is coming to an end, although economists do not expect to see an increase in payroll employment until 2010 and the U.S. unemployment rate is not expected to dip below 8 percent until 2013. Minnesota is expected to have large budget deficits over the next three years, making it difficult politically to increase contributions to levels needed to recover from asset losses in FY08 and FY09. We should, however, see some fairly good investment returns over the next couple of years as the economy recovers.

CURRENT FUNDING RATIOS

The primary funding objectives of the Association are:

- 1) to establish contribution rates which, when expressed as a percentage of active members' payroll, will remain level from generation to generation; and
- 2) to meet the required deadlines for full funding.

Letter of Transmittal

(Continued)

An important measure of the health of a retirement system is the level of funding. The better the level of funding, the larger the ratio of assets to accrued liabilities and the greater the level of investment income potential. Also, a better level of funding gives the participants a higher degree of assurance that their pensions are secure. A pension plan is fully funded when it has present and projected assets sufficient to cover the liabilities for present and future annuities, benefits and refunds and the projected cost of fund administration.

The Association's progress toward meeting the full funding objective is displayed on the Schedule of Funding Progress on page 34. This report shows the funding levels using the entry age normal actuarial cost method, and reflect various changes in actuarial assumptions. At the end of fiscal year 2009, the ratio of assets to liabilities of the PERF was 69.99 percent. For the PEPFF and the PECF, the ratios were 83.22 percent and 94.85 percent, respectively.

MAJOR INITIATIVES

PERA's staff worked on several large-scale projects during the year. Due to various efficiencies built in to our underlying systems over the past few years, we were able to keep up with an increasing work load while developing and implementing these new initiatives without needing to increase staff size.

PERA's defined contribution plan (DCP) has always been valued on a monthly basis. Effective July 1, 2009 the State Board of Investment (SBI) will be able to value the DCP on a daily basis. That change meant extensive changes to our programs, procedures and correspondence with members during the year, but will allow members the opportunity to be more active investors in the future.

Legislation passed in 2008 allowed PERA to work with our employers to establish OPEB trust funds with the State Board of Investment. While our role is fairly limited, we were able to set up the program and help 19 different entities set up either revocable or irrevocable trusts with SBI that will be used to fund future OPEB costs.

During the year we discovered that a handful of our employers had been sending us contributions on compensation that did not meet the definition of "salary" in our statutes. We worked closely with IRS Voluntary Compliance Program staff as we determined refund and overpaid benefit amounts for members, retirees and employers and developed legislation that was ultimately passed during the 2009 legislative session to fix the problem and prevent it from happening to the same extent in the future.

In response to requests from the firefighting community, a task force was created to establish a new statewide volunteer firefighter retirement plan. The resulting legislation was passed in 2009 and will become effective January 1, 2010. During the year we worked with the task force to develop the legislation, and then developed information sheets, procedures and forms necessary to implement this new plan.

In order to help employers retain skilled employees and allow those skilled employees to ease into retirement, we worked with various groups to develop post-retirement legislation that was passed in 2009. The new law allows certain retirement-eligible employees to begin receiving retirement benefits, yet continue to work on a part-time basis without being penalized.

We will continue to enhance our suite of on-line tools available to members and employers so that everyone has their important retirement information at their fingertips at any time. Our focus is continuous improvement to our systems and services so that we

The chart above reflects funding ratios for the three defined benefit funds administered by PERA.

can accommodate the needs of all stakeholders and constituencies of PERA.

PROFESSIONAL SERVICES

Actuarial consulting services during the fiscal year were provided by Mercer. Benefacts, Inc. handled the production and mailing of our annual Personal Benefit Statements. Evalumed handled independent medical examinations. The State's Attorney General continued to provide PERA with legal counsel. The State's Department of Health provided medical services used for determining disability benefits. The State Board of Investment continued to manage and invest the assets of PERA's funds, and the State's Legislative Auditor provided professional financial auditing services.

MEMBERSHIP REPORT

This report is complemented by an annual financial newsletter that discloses, in summary form, the contents of this report. This financial newsletter is mailed in January of each year to all PERA members, including active members and benefit recipients. In addition, this report is reproduced, in its entirety, on PERA's website, www.mnpera.org.

NATIONAL RECOGNITION

PERA has an outstanding staff and they are very dedicated to the utmost professionalism in administering the plans entrusted to the governance of the PERA Board of Trustees.

PERA received national recognition as a leader in pension fund administration and disclosure of financial information. The Government Finance Officers Association of the United States and Canada (GFOA) awarded a *Certificate of Achievement for Excellence in Financial Reporting* to PERA for its comprehensive annual financial report (CAFR) for the fiscal year ended June 30, 2008. This is the 24th time PERA has received this honor.

The Certificate of Achievement is a prestigious national award, recognizing conformance with the highest standards for preparation of state and local government financial reports. In order to be awarded a Certificate of Achievement, a government unit must publish an easily readable and efficiently organized CAFR. This report must satisfy both generally accepted accounting principles and applicable legal requirements. A Certificate of Achievement is valid for one year only. We believe our current report continues to meet the Certificate of Achievement Program's requirements, and we are submitting it to the GFOA to determine its eligibility for another certificate.

ACKNOWLEDGMENTS

As a compendium of financial, investment, actuarial and other statistical information, PERA's Comprehensive Annual Financial Report provides complete and reliable information on which management decisions may be based and through which compliance with statutory requirements may be assessed. In addition, the report serves as the primary source through which the effectiveness of the Trustees' management and administration of PERA and its funds may be judged.

We are sure you join with us in expressing gratitude and appreciation to the staff and PERA's advisors for their efforts in producing this report and for their loyal and dedicated service to the Association and its members, annuitants, beneficiaries, and participating local governmental employers

Respectfully submitted,

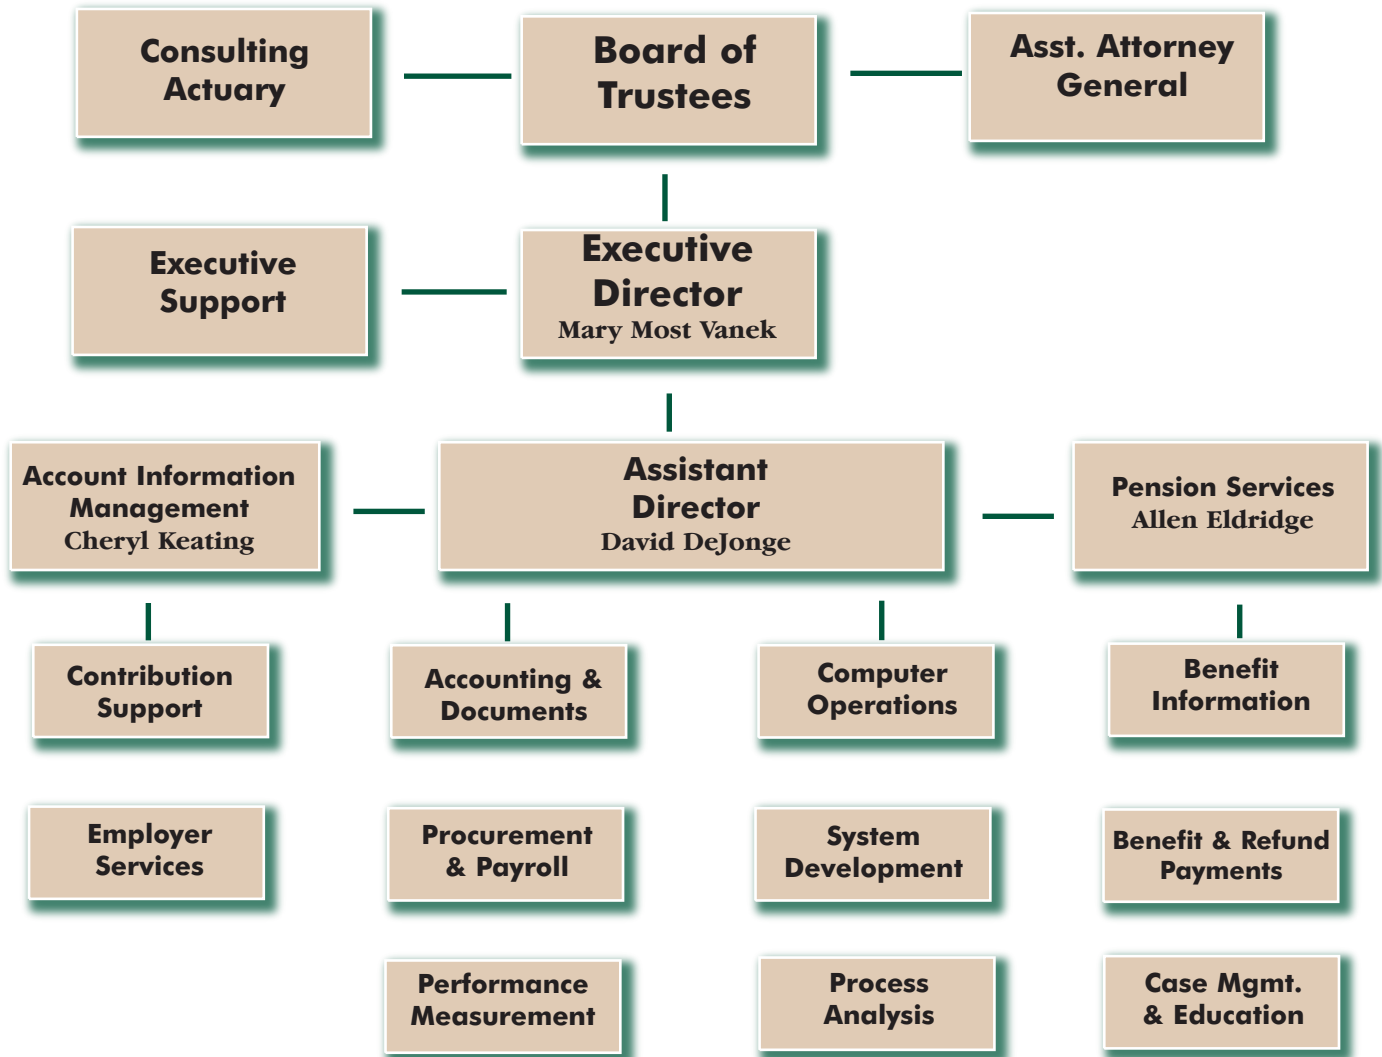

Mary Most Vanek
Executive Director

David DeJonge
Assistant Executive Director

The PERA Board consists of 11 trustees as follows: The State Auditor is a trustee by virtue of office. The governor appoints five trustees to represent counties, cities, school boards, retired annuitants, and the general public. PERA active members elect five representatives—three general membership, one retiree/disabilliant, and one Police and Fire trustee—to serve four-year terms.

Retirement System Plan Summary

Public Employees Retirement Association of Minnesota

Minnesota State Board of Investment on the management and investment of public pension funds and other assets.

MULTI-EMPLOYER PARTICIPATION

Approximately 2,100 separate units of government in Minnesota participate in the PERA-administered retirement system. These units include counties, cities, townships, and school districts*.

EMPLOYEE MEMBERSHIP

PERA has approximately 160,000 active members. With certain statutory exceptions, an employee performing personal services for a governmental employer whose salary is paid, in whole or in part, from revenues derived from taxation, fees, assessments, or other sources, is a member of PERA. Plan participation is dependent on the occupation of the member.

FUNDS

PERA administers four separate funds. Each has specific membership, contribution, benefit, and pension provisions.

The **Public Employees Retirement Fund** encompasses two retirement plans — the PERA Coordinated Plan and the PERA Basic plans. The Coordinated Plan, created in 1968, provides retirement and other benefits in addition to those supplied by Social Security. Established in 1931, the Basic Plan was PERA's original retirement plan and is not coordinated with the federal program.**

The **Public Employees Police and Fire Fund** was created in 1959 for police officers and firefighters not covered by a local relief association. It also encompasses all paid Minnesota police officers and firefighters hired since 1980. In 1999, legislation merged members of PERA's former Police and Fire Consolidation Plan into this plan.

The **Local Government Correctional Service Retirement Fund** was established in 1999 for correctional officers serving in county and regional adult and juvenile corrections facilities. Participants must be responsible for the security, custody and control of the facilities and their inmates.

PURPOSE

Established by the Minnesota Legislature in 1931, the Public Employees Retirement Association (PERA) of Minnesota administers pension funds that serve approximately 200,000 county, school and local public employees, benefit recipients, their survivors, and dependents.

Funds administered by the Association provide a variety of retirement pensions, and survivor and disability benefits. In the case of the Coordinated and Correctional plans, these benefits are in addition to those provided by Social Security.

PERA's Board of Trustees is responsible for administering these funds in accordance with statutes passed by the Minnesota Legislature and has a fiduciary obligation to PERA's members, their governmental employers, the state, and its taxpayers.

ADMINISTRATION

PERA's Board of Trustees is composed of 11 members. The State Auditor is a member by statute. Five trustees are appointed by the Governor. Serving four-year terms, these five trustees represent cities, counties, school boards, retired annuitants, and the general public, respectively.

The remaining five board members are elected by the PERA membership at large to serve four-year terms. Three trustees represent the general active membership, one represents Police and Fire Fund members, and one represents annuitants and benefit recipients. The Association's next membership election will be held in 2011.

The board appoints an executive director to serve as chief administrative officer of PERA. With approval of the board, the director develops the annual administrative budget, determines staffing requirements, contracts for actuarial and other services, and directs the day-to-day operations of the association. The director also serves as a member of the State Investment Advisory Council, which advises the

NOTE:

- * A listing of employers participating in PERA can be found in the Statistical Section of this report.
- ** PERA's Basic Plan was closed to new membership in 1968 with the creation of the Coordinated Plan. At that time, Basic members had the option of remaining in that plan or transferring to the new Coordinated Plan. Today, fewer than 30 Basic members remain active public employees.

Also administered by PERA is the **Public Employees Defined Contribution Plan (DCP)**. Created in 1987 to provide a retirement plan for personnel employed by public ambulance services, the plan has since been expanded to include physicians, city managers, and locally-elected public officials, except for county sheriffs.*

CONTRIBUTIONS

The table below shows contribution rates for employees and employers under the various plans administered by PERA as of June 30, 2009**. Rates are applied to total salary and are set by statute.

Fund	Employee Contribution	Employer Contribution
Public Employees Retirement Fund		
Coordinated	6.00%	6.75%
Basic	9.10%	11.78%
Public Employees Police & Fire Fund	9.40%	14.10%
Local Government Correctional Fund	5.83%	8.75%
Defined Contribution Plan	5.00%	5.00%***

CREDITED SERVICE AND SALARY

Members of PERA’s defined benefit plans receive one service credit for each month for which they are paid. Individuals may earn a maximum of 12 service credits per year. Salary used in retirement and disability benefit calculations is the average monthly salary over an individual’s highest-paid 60 consecutive months of public service, or all months of service if less than 60 (high-five salary).

RETIREMENT BENEFITS

Eligibility and Annuity Formulas

Basic and Coordinated Members

Two methods are used to compute benefits for Coordinated and Basic Plan members—a step-rate benefit accrual formula (Method 1) and a level accrual formula (Method 2). Members hired prior to July 1, 1989 receive the higher of the two calculated amounts. Only Method 2 is used for members hired after June 30, 1989.

Method 1: Coordinated members accrue 1.2 percent of the high-five salary for each of the first 10 years of public employment, and 1.7 percent of that average salary for each successive year. Basic members receive 2.2 percent of their high-five salary for each of their first 10 years of service and 2.7 percent for each year thereafter.

Using this calculation, members are eligible for a full (unreduced) retirement annuity if:

- They are age 65 or over with at least one year of public service; or
- Their age plus years of public service equal 90 (Rule of 90).

A reduced retirement annuity is payable as early as age 55 with three or more years of service. The reduction is .25 percent for each month under age 65. A member with 30 or more years of service may retire at any age with the .25 percent reduction made from age 62 rather than 65.

Method 2: Coordinated members earn 1.7 percent of their high-five salary for every year of public service while Basic members earn 2.7 percent of their average salary for each year.

This calculation provides for unreduced retirement benefits at age 65 for members first hired prior to July 1, 1989, and at the age for unreduced Social Security benefits, capped at age 66, for those first hired into public service on or after that date.

Early retirement results in an actuarial reduction with augmentation (about 6 percent per year) for members retiring prior to full retirement age.

Police and Fire Members

Members receive 3 percent of average salary for each of their years of service. An unreduced retirement annuity is payable to members when they meet the following conditions:

- Age 55 with a minimum of three years of service; or
- Age plus years of service equal at least 90 (if first hired prior to 7/1/89).

A reduced retirement annuity is available to members between the ages of 50 and 55. There is a 1.2 percent reduction in benefits for each year a member retires prior to qualifying for an unreduced retirement benefit. (For members hired or rehired after June 30, 2007, the reduction will be 2.4 percent per year.)

NOTE:

* Officials first elected to a governing body, such as a city council or county board after June 30, 2002, may only participate in PERA’s Defined Contribution Plan. Previously, such officials could elect Coordinated Plan participation as an alternative to the DCP.

** Legislation passed in 2005 called for increases in member and employer contribution rates for both the Coordinated and Police and Fire plans to be phased in over several years. The employer contribution rate for the Coordinated Plan will increase to 7 percent in 2010.

*** This is the rate established for elected public officials and physicians. For ambulance service personnel, participation in the program and contributions made for employees are at the discretion of employers. Salaried employees may match this contribution. City managers may also participate in the DCP as an alternative to Coordinated Plan membership.

Summary

(Continued)

NOTE:

* Selection of a Survivor Option will result in a reduction in the amount of the pension from the Single-life pension level. The amount of the reduction depends on the age of both the retiring member and the survivor.

All survivor pension options incorporate an "automatic bounce back" feature. This returns the amount of the pension to the level of the Single-life benefit in the event the designated survivor predeceases the retiree. The cost of this protection is borne by the funds, not by the retiree.

** The deferred pension accrual rate is 2.5 percent for members first hired into public service after June 30, 2006.

*** Earnings limits are waived for Coordinated members who begin receiving benefits under a Phased Retirement Agreement. Approved by the Legislature in the final days of the fiscal year, Phased Retirement allows members age 62 and above to begin receiving a pension without termination of public service if they accept a reduction in hours worked to less than 1,044 per year. The agreements can be up to one year in length and can be renewed for up to five years. The program sunsets in 2011.

Correctional Service Members

Correctional Plan members earn 1.9 percent of their average salary for every year of public service under the plan.

A full, unreduced pension, is earned at:

- ▣ Age 55 with three or more years of service; or
- ▣ Age plus years of service total at least 90 (if hired prior to 7/1/89).

An actuarial reduction with augmentation is made in a member's benefit for retirement prior to qualification for an unreduced pension.

Defined Contribution Plan Members

The Defined Contribution Plan's benefit amount is determined by the performance of the funds in which contributions are invested. The entire market value of the member's account is payable upon termination of public service, disability, retirement, or death.

TYPES OF PENSIONS AVAILABLE

Members of the PERA Coordinated, Basic, Correctional, and Police and Fire plans may select from several types of retirement benefits.

Single-life Pension — A Single-life Pension is a lifetime annuity that ceases upon the death of the retiree. No survivor benefit is payable.

Survivor Options — Upon retirement, members may choose from one of four Survivor Options. All these pensions are payable for the lifetime of the retiree. At the time of the retiree's death, the designated survivor begins to receive monthly benefit payments at varying levels for his or her lifetime. Depending on the Survivor Option chosen by the member, survivor payments are at a 25, 50, 75 or 100 percent level of that received by the member.*

Pre-Age 62 Increase — This pension option allows a member who retires before age 62 to receive a greater monthly payment until he or she becomes eligible for Social Security at age 62. The monthly benefit amount is then reduced by at least \$100 at age 62.

Deferred Pension — A vested member who terminates public service may leave contributions in the fund(s) in which he or she participated and qualify for a pension at retirement age. The benefit amount, calculated as of the date of termination, will increase at a rate of 3 percent per year, compounded annually, until the first of the year following the member's 55th birthday. It will then increase at a rate of 5 percent per year.**

Combined Service and Proportionate Pensions

Retiring members may elect to combine service in a PERA-covered position with service in any of 14 other Minnesota pension funds and qualify for a retirement benefit from each fund in which they participated. These funds are designated by statute. Members with three or more years of total service qualify for a combined service pension if they have six or more months of service in each fund and have not begun to receive a benefit from any of the designated funds. Pensions are based upon the formula of each fund and the member's average salary over the five highest-paid years of service, no matter when it was earned.

Public employees who retire at age 65 or older with between one and three years of service in one or more of 11 designated funds may qualify for a proportionate pension. Benefits are paid by each applicable fund in which the employee has credit and are based upon the formula of each fund and the member's average salary during the period of service covered by that fund.

EARNINGS LIMITATION

Retirees who return to work in a PERA-covered position are subject to the same earnings limitations as Social Security recipients. Benefits are reduced if these limits are exceeded, with the amount escrowed and earning 6 percent interest compounded annually. The retiree may request repayment of these funds one year after leaving the position.

The earnings limitation only applies to PERA-covered employment. Self- or private employment and elected service will result in no benefit reduction for retirees.***

DISABILITY BENEFITS

Members may be eligible for benefits from PERA if they are unable to work because of a physical or mental disability. Disability is defined by statute, and PERA may require periodic medical examinations of those receiving these benefits.

Disability benefit calculations are based upon years of service and average high-five salary for Coordinated and Basic members. For Police and Fire plan members, there is a minimum benefit of 60 percent of salary if disabled while engaged in hazardous activities related to the occupation. The minimum duty-related disability benefit is 47.5 percent for Correctional members. Disability under any other circumstances results in a minimum benefit of 45 percent of salary for Police and Fire members and 19 percent for Correctional members. *

Basic and Coordinated members qualify for disability with three or more years of service and by meeting the statutory definition. Police and Fire and Correctional members qualify by meeting the definition with one or more years of service if disabled outside the line of duty. If disabled in the line of duty, there is no minimum service requirement. *

SURVIVOR BENEFITS

PERA also provides survivor (death) benefits for families of members who qualify for such coverage. The qualifications and types of benefits vary with each plan.

A Lifetime Survivor Benefit is available to the surviving spouse of a Basic, Coordinated, Correctional, or Police and Fire member. For Police and Fire, and Basic members, this benefit is based on either 50 percent of the member’s average salary during the six months prior to death or a formula using the member’s total years of service, high-five salary, age at death and age of the spouse. The surviving spouse benefit for Coordinated and Correctional members is only based on the formula. This benefit is payable to the spouse of a deceased member for life, even upon remarriage.**

For the surviving spouse of a Basic, Coordinated or Correctional member,

there are alternative term-certain benefits of 10, 15, or 20 years duration. The monthly payment, however, may not exceed 75 percent of the member’s average high five-year salary.

Survivor benefits are immediately suspended for any survivor charged with causing the death of an association member. The benefit is permanently revoked upon conviction of such a crime.

Dependent children of active or disabled Basic, and Police and Fire members are eligible for benefits until age 18, or age 23 if full-time students. In this case, the maximum family benefit is 70 percent of the member’s average monthly salary. If a Coordinated or Correctional member dies and there is no surviving spouse, any children under age 20 qualify to receive a monthly term-certain benefit.

Instead of a monthly benefit, the surviving spouse, if a designated beneficiary, may elect a refund of any remaining employee contributions in the account, plus 6 percent interest compounded annually. However, a refund may not be elected if there are dependent children who are eligible for benefits.

REFUNDS

Refunds of contributions are available at any time to members who leave public service and have not yet begun receiving a pension. The refund includes employee contributions plus 6 percent interest, compounded annually.

A refund of member contributions plus interest may also be elected by the designated beneficiary of a member or former member who dies before reaching retirement. If there is no beneficiary, payment is made to the surviving spouse or, if none, to the estate of the deceased member or former member.

If a retiree and designated survivor, if any, die before all employee contributions are paid in the form of a pension or benefits, the remaining balance would be paid in the same manner outlined for beneficiaries.

No interest is paid to beneficiaries on the balance in an account if the member was receiving retirement benefits.

NOTE:

* Significant changes in the definitions of duty and regular (non-duty) disability for Police & Fire and Correctional plan members became effective July 1, 2007. A duty disability benefit will only be awarded if the disabling event occurred while the member was engaged in hazardous activities inherent to the occupation.

** Automatic lifetime Survivor Benefits are also available to the spouse of Police and Fire members who suffer total and permanent duty disability, as well as disabled Basic members. Survivor benefits for other disabled members are only available if the member chooses a Survivor Option to their disability benefit.

Legislative Auditor's Report

OFFICE OF THE LEGISLATIVE AUDITOR
STATE OF MINNESOTA • James Nobles, Legislative Auditor

Independent Auditor's Report

Members of the Board of Trustees
Public Employees Retirement Association of Minnesota

Ms. Mary Most Vanek, Executive Director
Public Employees Retirement Association of Minnesota

We have audited the accompanying basic financial statements of the Public Employees Retirement Association of Minnesota as of and for the year ended June 30, 2009, as listed in the Table of Contents. These financial statements are the responsibility of the Public Employees Retirement Association's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Public Employees Retirement Association as of June 30, 2009, and the changes in financial position for the year then ended in conformity with accounting principles generally accepted in the United States of America.

On January 6, 2010, the Public Employees Retirement Association revised Figure 4, on page 28, to reallocate its holdings of foreign cash and fixed income investments among the types of foreign currency, as required by Government Accounting Standards Board Statement 40.

In accordance with *Government Auditing Standards*, we have also issued our report dated December 18, 2009, on our consideration of the Public Employees Retirement Association's internal control over financial reporting; on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements; and on other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

Management's Discussion and Analysis and the other required supplementary information, as listed in the Table of Contents, are not a required part of the Public Employees Retirement Association's basic financial statements but are supplementary information required by accounting principles generally accepted in the United States of America. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required

Room 140 Centennial Building, 658 Cedar Street, Saint Paul, Minnesota 55155-1603 • Tel: 651/296-
E-mail: auditor@state.mn.us • Web Site: www.auditor.leg.state.mn.us • Through Minnesota

supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise PERA's basic financial statements. The Introductory, Investment, Actuarial, and Statistical Sections, as listed in the Table of Contents, are presented for purposes of additional analysis and are not a required part of the basic financial statements. The Supporting Schedules in the Financial Section have been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements taken as a whole. The Introductory, Investment, Actuarial, and Statistical Sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on them.

James R. Nobles
Legislative Auditor

Cecile M. Ferkul, CPA, CISA
Deputy Legislative Auditor

December 18, 2009, except for Figure 4, on page 28, as to which the date is January 6, 2010.

Management Discussion and Analysis

As management of Minnesota's Public Employees Retirement Association (PERA), we present this discussion and analysis of the financial activities for the year ended June 30, 2009 (FY09). This narrative is intended to supplement the financial statements which follow this discussion, and should be read in conjunction with the transmittal letter, which begins on page 5 of this annual report.

OVERVIEW OF THE FINANCIAL STATEMENTS

This Comprehensive Annual Financial Report (CAFR) contains two basic financial statements: the Statement of Plan Net Assets and the Statement of Changes in Plan Net Assets. These financial statements, in conjunction with the accompanying Notes to the Financial Statements, report information about PERA's financial condition in an attempt to answer the question: "Is PERA better off or worse off as a result of this year's activities?" These statements are prepared using the accrual basis of accounting as is required by generally accepted accounting principles laid out in statements issued by the Government Accounting Standards Board (GASB).

The Statement of Plan Net Assets provides a snapshot of account balances at year-end. It reports the assets available for future payments to benefit recipients, along with any liabilities that are owed as of the statement date. The difference between assets and liabilities, called "Net Assets," represents the value of assets held in trust for future benefit payments. Over time, increases and decreases in Net Assets can be one measurement of whether PERA's financial position is increasing or decreasing.

The Statement of Changes in Plan Net Assets, on the other hand, shows additions and deductions to Net Assets during the year. The increase or decrease in Net Assets reflects the change in Net Assets found on the Statement of Plan Net Assets from the prior year to the current year.

The Notes to the Financial Statements are an integral part of the financial statements and provide additional information that is essential for a comprehensive understanding of the data provided in the financial statements. The Notes describe the accounting and administrative policies under which PERA operates, and provide additional levels of detail for selected financial statement items.

These financial statements should be reviewed along with the Schedule of Funding Progress and Schedule of Employer Contributions to determine whether PERA is becoming financially stronger or weaker over time. PERA's funding objective is to meet long-term benefit obligations through contributions received and the income derived by investing those contributions during the working career of our members. These two schedules, created by an actuary, show the ratio of the actuarial value of assets to the actuarial accrued liability, and to what extent contributions needed to fully fund the plan are being received.

FINANCIAL HIGHLIGHTS

- ▶ PERA's Net Assets decreased 20.9% during the year from \$18.1 billion in fiscal year 2008 (FY08) to \$14.3 billion in FY09.
- ▶ Total additions for FY09 were a negative \$2.56 billion, comprised of contributions of \$822,810,000, investment losses of \$3,390,434,000 and other income of \$4,461,000. Total additions for FY08 were a negative \$189 million.
- ▶ Total deductions for the year increased from \$1,169,358,000 in FY08 to \$1,220,073,000 in FY09 due to an increase in the number of benefit recipients and a 2.5% COLA granted in January 2009.
- ▶ Total administrative expenses totaled \$10,784,000 in FY09, a 2.3% increase from \$10,544,000 in FY08.
- ▶ As of June 30, 2009 the Public Employees Retirement Fund is actuarially funded at 69.99%. PERA's Police and Fire Fund is actuarially funded at 83.22%, and PERA's Correctional Fund is 94.85% funded.

FINANCIAL ANALYSIS OF PERA'S FUNDS

PERA is the administrator of three defined benefit plans and one defined contribution plan. In a defined contribution plan, pension benefits are determined by contributions made to a member's account and investment returns for those contributions. PERA administers one such plan: the Public Employees Defined Contribution Plan (PEDCP).

In a defined benefit plan, pension benefits are determined by a member's salary and credited years of service, regardless of contribution amounts and investment returns for those contributions over the working career of a member. PERA administers three such plans: the Public Employees Retirement Fund (PERF), the Public Employees Police and Fire Fund (PEPFF), and the Public

Employees Local Government Correctional Services Retirement Fund (which we call the Public Employees Correctional Fund or PCEF).

Until this year, when members retired from one of the defined benefit plans, an amount equal to the present value of expected future benefits was moved from the Active Funds to the Minnesota Post Retirement Investment Fund (MPRIF) to pay those benefits. The MPRIF was made up of retirement assets from PERA's three plans along with assets from the Teachers Retirement Association and the Minnesota State Retirement System. As of June 30, 2008 the MPRIF was 79.7% funded, triggering a dissolution of the MPRIF and a merger on June 30, 2009 of MPRIF assets back into the Active Funds from whence they originally came in accordance with legislation passed in 2008.

Merging the MPRIF and Active Funds will provide a larger asset base from which to pay promised benefits and will also provide an additional source of funding (contributions) should that additional source be needed in the future to pay benefits. Retirees will receive fixed 2.5 percent benefit increases each year, regardless of inflation.

PERF

Total assets as of June 30, 2009 were \$11.8 billion in the PERF, a decrease of \$2.25 billion or 16 percent from the prior year. The primary reason for the decrease was negative investment performance during the year, which was partly offset by an increase in securities lending collateral at the end of the year. Our investment portfolio had a negative 18.8 percent rate of return in FY09.

Total liabilities as of June 30, 2009 were \$1.7 billion, an increase of \$402 million from the prior year, mostly due to a higher value of securities lending collateral on the books at year end.

Total net assets, the difference between total assets and total liabilities, decreased about \$2.6 billion, or roughly 20 percent from the prior year. Ending net assets were \$10.1 billion on June 30, 2009.

Additions to Plan Net Assets

The reserves needed to finance retirement benefits are accumulated through the collection of member and employer contributions and through earnings on investments. Because of negative investment returns, total contributions and net investment income for FY09 totaled a negative \$1.75 billion.

Employer contributions and member contributions increased from the previous year by a total of \$43 million, largely due to contribution rate increases that took effect on January 1, 2009. Employer rates in the Coordinated Plan increased from 6.50% to 6.75%. Net investment income in FY09 totaled a negative \$2.4 billion.

Deductions from Plan Net Assets

Our largest expense was for retirement benefits to members and beneficiaries. Total benefits increased 4.8 percent to \$864 million in FY09. The increase in benefits resulted from an increase in the number of benefit recipients and a 2.5 percent cost of living increase for most retirees effective January 1, 2009. The amount of refunds decreased \$2 million in FY09 due to fewer people taking refunds. Administrative expenses increased 2.5 percent in FY09 to \$9.7 million, largely as a result of having fewer staff vacancies during the year than we had in FY08. As stated earlier, investment losses coupled with larger benefits resulted in a \$2.6 billion decrease in net assets in FY09.

Overall Financial Position

The financial position of a public pension plan is not so much determined by what is found on the face of the financials, but by looking at trends in the funding ratio and contribution sufficiency or deficiency. Although investment returns were negative in FY09, those returns are smoothed over 5 years, so most of the losses will not be recognized until future years. As a result, our funding ratio fell slightly from

Discussion and Analysis

(Continued)

73.60% to 69.99% in FY09, and will likely fall further over the next few years

For the past several years, contribution rates have not been sufficient for us to become fully funded by our target date of 2031. In 2005, legislation was passed to increase contribution rates by 2.37 percent of pay over a five-year period. Member rates were gradually increased from 5.1% to 6% while employer rates were gradually increased from 5.53% to 6.75%. Employer rates will increase a final 0.25% on January 1, 2010. Because of the large drop in investment values over the past two years, however, contributions will remain more than 2% deficient to get us fully funded by 2031. PERA's Board of Trustees is reviewing existing plan provisions and actuarial assumptions and will develop a financial package that will be brought to the legislature in 2010 to ensure the future viability of the plan.

PEPFF

Total assets as of June 30, 2009 were \$4.6 billion in the Public Employees Police and Fire Fund, a decrease of \$1 billion, or 17.5 percent from the prior year. The decrease is due to negative investment earnings offset by a larger amount of securities lending collateral on the books at year end. Total liabilities as of June 30, 2009 were \$651 million, an increase of \$126 million due to the larger securities lending collateral.

Total net assets, the difference between total assets and total liabilities, decreased \$1.1 billion or roughly 22 percent from the prior year to an ending balance of \$4 billion.

Additions to Plan Net Assets

Contributions and net investment income for FY09 totaled a negative \$797 million. Employer contributions increased \$14.5 million and member contribu-

tions increased \$9.4 million in FY09, largely due to an increase in contribution rates. Effective January 1, 2009 member rates increased from 8.6% to 9.4% and employer rates increased from 12.9% to 14.1%. Net investment income in FY09 totaled a negative \$967 million, due to a negative 18.8% investment return.

Deductions from Plan Net Assets

Retirement benefits to members and beneficiaries made up over 99 percent of our total deductions. The amount of benefits paid increased 4.7 percent in FY09 to \$310 million. The increase in benefits resulted from an increase in the number of benefit recipients and a 2.5 percent cost of living increase for most retirees effective January 1, 2009. The amount of refunds decreased in FY09 due to fewer members taking refunds during these difficult economic times. We believe members are realizing the value in having a pension, and leaving their money at PERA rather than taking a refund. Administrative expenses remained roughly the same in FY09.

Overall Financial Position

The Police and Fire Plan was 83.22% funded as of July 1, 2009, indicating that for every dollar of benefits we expect to pay out, we already have about 83 cents in our reserves to cover it. This is the ninth year in a row, however, that the funding ratio has declined. During the first years of this decade, the plan was overfunded and contribution rates were 6.5% of pay below our normal costs. When negative investment returns wiped out the surplus assets, contribution rates were not increased quickly enough to offset the investment losses. At the end of FY08, contributions were deficient by almost 6% of pay for the plan to become fully funded by 2038. Due to the investment losses in FY09, contributions are now 6.5% deficient. Various police and fire groups

are working with our Board to develop a package of benefit provision changes that will be brought to the legislature in 2010 and 2011 in order to shore up the fund.

PECF

In the Public Employees Correctional Fund, total assets as of June 30, 2009 equaled \$194 million, a decrease of \$8 million from the prior year. The PECF is a very new fund with a small asset base, and brings in more cash through contributions than it spends paying benefits and refunds. Total investments decreased in value by \$16 million, but securities lending collateral on hand at year end exceeded FY08's value by \$8 million because more securities were being loaned out at year end.

Total liabilities increased in FY09 due to the larger amount of securities lending collateral. As a result, total net assets, the difference between total assets and total liabilities, decreased \$16 million in fiscal year 2009, with an ending net asset value of \$167 million.

Additions to Plan Net Assets

Contributions and net investment income for FY09 totaled a negative \$12.6 million, a decrease of \$25 million from FY08. Employer and member contributions increased roughly 5.5 percent to \$14.1 million and \$9.4 million respectively, due to an increase in the number of active members and higher salaries. Contribution rates were not increased in the PECF. Net investment losses in FY09 totaled \$36.2 million compared to a loss of \$9.5 million in FY08.

Deductions from Plan Net Assets

Expenses for this plan are still relatively small. Retirement benefits increased 25% from \$2.2 million in FY08 to \$2.8 million in FY09 as more members became eligible to retire. Refunds increased 12% to \$810,000 as account balances grew, resulting in larger refund amounts and more interest being paid. Administrative expenses increased \$6,000 from FY08 to \$219,000 and represent about one-tenth of one percent of total net assets.

Overall Financial Position

In only its tenth year of existence, the Public Employees Correctional Fund is 94.85% funded, a decrease from last year's 100.19%. Since there are very few assets in the plan, the negative investment returns had less of an impact on this plan. With only ten years of experience it is difficult to know if our long-term assumptions are accurate, but we believe contribution levels are sufficient for this plan to be fully funded by 2023.

Agency Summary

The worst financial crisis in decades had a negative effect on our investment returns, resulting in fairly large losses in our asset base. While the Correctional Plan is still in excellent shape, contribution rates in the other two plans are not sufficient to fully fund those plans. Both of those plans have investment losses that have not been recognized in the actuarial value of assets yet, so we expect funding ratios to continue their downward trend over the next two or three years. The Board of Trustees is actively reviewing a number of approaches to improve future funding, including increasing contributions, reducing future pension increases, reducing the interest rate used when paying refunds, and increasing vesting periods for future hires.

This financial report is designed to provide a general overview of PERA's finances and to demonstrate its accountability with the assets it holds in trust. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to PERA at 60 Empire Drive, Suite 200 in St. Paul, Minnesota 55103-2088.

Notes to the Financial Statements

For the Fiscal Year Ended June 30, 2009

PERA is the administrator of three cost-sharing, multiple-employer retirement plans and one multiple-employer deferred compensation plan.

Plan Participation

(Total Membership)
374,235

A. PLAN DESCRIPTION

1. Organization

The Public Employees Retirement Association (PERA) is the administrator of three cost-sharing, multiple-employer retirement plans, the Public Employees Retirement Fund (PERF), the Public Employees Police and Fire Fund (PEPFF), and the Public Employees Local Government Correctional Service Retirement Fund, called the Public Employees Correctional Fund (PECF). In addition, PERA administers one multiple-employer deferred compensation plan, the Public Employees Defined Contribution Plan (PEDCP). PERA also administers an agency fund to track the investments placed in a trust by various entities with the State Board of Investment to cover future other postemployment benefit costs. The plans, including benefit provisions and the obligation to make contributions, are established and administered in accordance with Minnesota Statutes, Chapters 353, 353A, 353B, 353D, 353E and 356. It is also these statutes that define financial reporting requirements.

2. Participating Employers

PERA serves approximately 2000 separate units of government in the PERF, 500 units of government in the PEPFF, 80 counties in the PECF, and 1000 units in the PEDCP. These units of government are made up of counties, cities, townships, school districts, and generally other units of government whose revenues are derived from taxation, fees, or assessments. The defined contribution plan serves any local unit of government whose current or former elected officials elect to participate. The PEDCP

also serves any publicly operated ambulance service that receives an operating subsidy from a governmental entity, and elects to participate.

3. Participating Members

The PERF covers employees of counties, cities, townships and employees of schools in non-certified positions throughout the State of Minnesota. The PEPFF, originally established for police officers and fire-fighters not covered by a local relief association, now covers all police officers and firefighters hired since 1980. Effective July 1, 1999, the PEPFF also covers police officers and fire-fighters belonging to a local relief association that elected to merge with and transfer assets and administration to PERA. The PECF covers employees in county correctional institutions who have direct contact with inmates. Coverage under the PEDCP is open to elected local government officials (except elected county sheriffs), emergency medical service personnel employed by or providing service to any of the participating ambulance services, and physicians employed at public facilities. Elected officials and ambulance personnel who are covered by a public or private pension plan because of their employment are not eligible to participate in the PEDCP. At June 30, 2009, there were 7,182 members in the PEDCP.

Shown in **Figure 1** below are the membership totals in the PERA defined benefit plans as of June 30, 2009.

4. Benefit Provisions — Defined Benefit Plans

a) PERA provides retirement benefits as well as disability benefits to members, and benefits to survivors upon death of eligible

Fig.1 PERA Membership — Defined Benefit Plans

	<u>PERF</u>	<u>PEPFF</u>	<u>PECF</u>	<u>Total</u>
Retirees and beneficiaries receiving benefits	66,059	7,362	386	73,807
Terminated employees entitled to benefits/refunds but not yet receiving them:				
Vested	43,133	1,280	1,683	46,096
Non-Vested	121,690	911	1,525	124,126
Current, active employees:				
Vested	107,781	9,421	2,518	119,720
Non-Vested	35,572	1,614	1,197	38,383
Total	<u>374,235</u>	<u>20,588</u>	<u>7,309</u>	<u>402,132</u>

members. All benefits vest after three years of credited service. Retirement benefits are based on a member's highest average salary for any five successive years of allowable service, age, and years of credit at termination of service. PERF members belong to either the Basic or Coordinated Plan. Coordinated members are covered by Social Security and Basic members are not. All new members must participate in the Coordinated Plan. Two methods are used to compute benefits for Coordinated and Basic members. The retiring member receives the higher of a step-rate benefit accrual formula (Method 1) or a level accrual formula (Method 2).

Under **Method 1**, the annuity accrual rate for Basic members is 2.2 percent of average salary for each of the first 10 years of service and 2.7 percent for each remaining year. For a Coordinated member, the annuity accrual rate is 1.2 percent of average salary for each of the first 10 years of service and 1.7 percent for each remaining year. Under **Method 2**, the annuity accrual rate is 2.7 percent of average salary for Basic members and 1.7 percent for Coordinated members for each year of service. For PEPFF members, the annuity accrual rate is 3.0 percent of average salary for each year of service. For PERF members whose annuity is calculated using Method 1, and for all PEPFF and PECF members who were first hired prior to July 1, 1989, a full annuity is available when age plus years of service equal at least 90. A reduced retirement annuity is also available to eligible members seeking early retirement. The annuity accrual rate for PECF members is 1.9 percent of average salary for each year of service in that plan.

The benefit provisions stated in the preceding paragraphs of this section are current provisions and apply to active plan participants. Vested, terminated employees who are entitled to benefits but are not receiving them yet are bound by the provisions in effect at the time they last terminated their public service.

5. Benefit Provisions and Contribution Rates — Defined Contribution Plan

The Public Employees Defined Contribution Plan (PEDCP) is a multiple-employer deferred compensation plan. The PEDCP is a tax qualified plan under Section 401(a) of the Internal Revenue Code and all contributions by or on behalf of employees are tax deferred until time of withdrawal. (See Notes A.2 and A.3 for employer and employee membership requirements.) The plan is established and administered in accordance with Minnesota Statutes, Chapter 353D.

Plan benefits depend solely on amounts contributed to the plan plus investment earnings, less administrative expenses. Minnesota Statutes, Chapter 353D.03, specifies the employee and employer contribution rates for those qualified personnel who elect to participate. An eligible elected official or physician who decides to participate contributes 5 percent of salary, which is matched by the employer. For ambulance service personnel, employer contributions are determined by the employer, and for salaried employees must be a fixed percentage of salary. Employer contributions for volunteer personnel may be a unit value for each call or period of alert duty. Employees who are paid for their services may elect to make member contributions in an amount not to exceed the employer share. Employer and employee contributions are combined and used to purchase shares in one or more of the seven accounts of the Minnesota Supplemental Investment Fund. Investment options include the Income Share, Growth Share, Common Stock Index, Bond Market, Money Market, International Share, and the Fixed Interest (formerly the Guaranteed Return) accounts. For administering the plan, PERA receives 2 percent of employer contributions paid during the year, plus twenty five-hundredths of one percent (0.25%) of the assets in each member's account each year.

There is no vesting period required to receive benefits in the PEDCP. At the

The PEDCP is a tax qualified plan under Section 401(a) of the Internal Revenue Code and all contributions by or on behalf of employees are tax deferred until the time of withdrawal.

There is no vesting period required to receive benefits in the PEDCP.

Notes

(Continued)

Pooled Accounts

(Portfolio Allocation)

PERA functions as a separate statutory entity. The association maintains rights to sue or be sued in its own name and to hold property in its own name. For financial reporting purposes, PERA is considered a pension trust fund of the State of Minnesota.

time of retirement or termination, PERA distributes the market value of a member's account to the member or transfers it to another qualified plan or individual retirement arrangement. Upon the member's death, PERA distributes the value of the account to the member's designated beneficiary.

6. Agency Fund

Minnesota Statute 353.95 allows the City of Duluth to invest money with the State Board of Investment (SBI) in a separate trust that will be used to pay future OPEB costs. Minnesota Statute 471.6175, added in the 2008 legislative session, allows any political subdivision or other public entity that has an OPEB liability to create a separate trust with the SBI to pay future OPEB costs. Since PERA already had a reporting relationship with those entities, the Association was asked to collect their voluntary contributions and send them on to SBI. The various entities are responsible for making sure any withdrawals are done in accordance with GAAP and Minnesota Statutes. They are also responsible for setting and paying benefits, for determining contribution amounts, and for handling any OPEB reporting requirements. As of June 30, 2009 19 different entities had contributed \$110.6 million to revocable and irrevocable trusts that will be used to pay OPEB costs in the future.

B. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND PLAN ASSET MATTERS

1. Reporting Entity

PERA functions as a separate statutory entity. The association maintains rights to sue or be sued in its own name and to hold property in its own name. For financial reporting purposes, PERA is considered a pension trust fund of the State of Minnesota and is included in the State's Comprehensive Annual Financial Report with its fiduciary funds. PERA does not have any component units.

2. Basis of Accounting

PERA financial statements for all funds are prepared using the accrual basis of accounting. Employee and employer contributions are recognized as revenues when due, pursuant to formal commitments and statutory requirements.

Expenses are recorded when the liability is incurred. Benefits and refunds are recognized when due and payable in accordance with the terms of each plan.

3. Investment Policies and Valuation Methodology

a) Pursuant to Minnesota Statutes, Section 11A.04, the state's retirement fund assets are commingled in various pooled investment accounts, administered by the State Board of Investment (SBI). As of June 30, 2009, the participation shares in the external pools at fair value totaled approximately 28.13 percent for the PERF, 10.98 percent for the PEPFF and 0.46 percent for the PECF.

b) Minnesota Statutes, Section 11A.24, broadly restricts retirement fund investments to obligations and stocks of United States and Canadian governments, their agencies and their registered corporations; short term obligations of specified high quality; restricted participation as a limited partner in venture capital, real estate or resource equity investments; restricted participation in registered mutual funds; and some qualified foreign instruments.

c) Investments in the pooled accounts, including assets of the PEDCP and the agency fund, are reported at fair value. Fair value is the proportionate share of the combined market value of the investment portfolio of the SBI investment pool in which the funds participate. All securities within the pools are valued at market value except for U.S. Government short-term securities and commercial paper, which are valued at market less accrued interest. Accrued interest is recognized as short-term income. SBI values long-term fixed income securities by using the Financial Times Interactive Data Services valuation system. This service provides prices for both actively traded and privately placed bonds. For equity securities, SBI uses a valuation service provided by Reuters and market value is the last reported sales price for securities traded on national or international exchanges. If a security is not actively traded, then the fair value is based on the analysis of financial statements, analysis of future cash flows and independent appraisals.

Assumptions made in valuing securities are as follows:

1. Values of actively traded securities determined by recognized exchanges are objectively negotiated purchase prices between willing buyers and sellers and are not subject to either undue influence or market manipulation.
2. Values of securities not actively traded are determined by objective appraisals by qualified professional analysts whose results would not vary materially from those of other similarly qualified professionals. The fair value of investments is based upon valuations provided by a recognized pricing service. Securities traded on a national or international exchange are valued using the last reported trade price. Short-term investments are reported at cost, which approximates fair value. The fair value of real estate investments is based on independent yearly appraisals. Investments that do not have an established market are reported at estimated fair value.
- d) Information about the primary government's (State of Minnesota) investments, including credit risk classification, can be obtained from Minnesota Management & Budget, 400 Centennial Building, 658 Cedar Street, St. Paul, Minnesota 55155. Information on specific investments owned by the pooled accounts, currency risk, interest rate risk, investment activity and investment management fees paid can be obtained from the Minnesota State Board of Investment at the Retirement Systems of Minnesota Building, 60 Empire Drive, Suite 355, St. Paul, Minnesota 55103.
- e) Investment income is recognized as earned. Accrued investment income of the pooled investment accounts is included in participation in the accounts. Gains and losses on sales or exchanges are recognized on the transaction date.
- f) The cost of security transactions is included in the transaction price. Administrative expenses of the State Board of Investment and investment management fees of the external money managers and the state's master custodian for pension fund assets are allocated to the funds participating in the pooled investment accounts. PERA's share of these expenses totaled \$14,139,680 for

PERF, \$5,633,831 for PEPFF, and \$212,037 for PECF. A detailed schedule of fees and commissions by brokerage firm, along with the number of shares traded, total commissions, and commissions per share for the pooled investment accounts may be obtained from the Minnesota State Board of Investment at the Retirement Systems of Minnesota Building, 60 Empire Drive, Suite 355, St. Paul, Minnesota 55103.

4. Cash

Cash on deposit consists of year-end receipts not processed as of the investment cutoff deadline on June 30. PERA cash funds are held in the state treasury, commingled with other state funds. Minnesota Statutes, Section 9.031, requires that deposits be secured by depository insurance or a combination of depository insurance and collateral securities held in the state's name by an agent of the state. Such insurance and collateral shall be in amounts sufficient to ensure that deposits do not exceed 90 percent of the sum of the insured amount and the market value of the collateral. Throughout fiscal year 2009, the combined depository insurance and collateral was sufficient to meet legal requirements and secure all PERA deposits, eliminating exposure to custodial credit risk. The general ledger cash balance on June 30 was negative in the Public Employees Defined Contribution Plan because cash moving from Short Term Cash Equivalents to Cash to cover the purchase of shares on June 30, 2009 did not occur until July 1 in our general ledger. In accordance with generally accepted accounting principles, our financials include an accounts payable for \$223,000 to cover the negative cash position.

5. Investment Risk

a) Credit risk is the risk that an issuer or counterparty to an investment will be unable to fulfill its obligations to the holder of the investment. The State Board of Investment has policies designed to minimize credit risk. They may invest funds in governmental obligations provided the issue is backed by the full faith and credit of the issuer or the issue is rated among the top four quality rating categories by a nationally

A detailed schedule of fees and commissions by brokerage firm, along with the number of shares traded, total commissions, and commissions per share may be obtained from the Minnesota State Board of Investment.

Notes

(Continued)

PERA does not have exposure to a single issuer that equals or exceeds 5% of the overall portfolio and, therefore, there is no concentration of credit risk.

recognized rating agency. They may invest funds in corporate obligations provided the issue is rated among the top four quality categories by a nationally recognized rating agency. They may also invest in unrated corporate obligations or in corporate obligations that are not rated among the top four quality categories provided that:

- ▶ The aggregate value of these obligations may not exceed five percent of the fund for which the state board is investing;
- ▶ Participation is limited to 50 percent of a single offering; and
- ▶ Participation is limited to 25 percent of an issuer's obligations.

SBI may also invest in bankers acceptances, deposit notes of U.S. banks, certificates of deposit, mortgage securities, and asset backed securities rated in the top four quality categories by a nationally recognized rating agency. Commercial paper must be rated in the top two quality categories.

PERA's share of SBI's exposure to credit risk, based on S&P Quality Ratings for debt securities and short-term investments, is shown in **Figure 2**.

Fig. 2 Credit Risk Exposure

<u>Quality Rating</u>	<u>Fair Value (in thousands)</u>
AA or Better	\$2,502,033
BBB to A	916,647
BB or Lower	249,620
Not Rated	192,482

b) Concentration of credit risk is the risk of loss that may be attributed to the magnitude of a government's investment in a single issuer. PERA does not have exposure to a single issuer that equals or exceeds 5% of the overall portfolio and, therefore, there is no concentration of credit risk.

c) Interest rate risk is the risk that changes in interest rates of debt investments could adversely affect the fair value of an investment. The State Board of

Investment does not have a policy on interest rate risk. Debt securities are held in external investment pools and PERA's share has the following weighted average maturities as shown in **Figure 3**.

d) Foreign currency risk is the risk that changes in exchange rates between the U.S. dollar and foreign currencies could adversely affect the fair value of an investment. Most foreign currency risk resides within SBI's international equity investment holdings. In order to reduce foreign currency risk, the State Board of Investment has developed the following policies. Government obligations, including guaranteed or insured issues of the International Bank for Reconstruction and Development, the Inter-American Development Bank, the Asian Development Bank, and the African Development Bank, must pay interest and principal in U.S. dollars. The principal and interest of obligations of corporations, including those corporations incorporated or organized under the laws of the Dominion of Canada or any province thereof, must also be paid in U.S. dollars.

Total	\$34,301	\$10,625	\$2,127,873

SBI has less than a 15 percent exposure to currency risk. PERA's share of investments at June 30, 2009 was distributed among the currencies shown in Figure 4.

e) In accordance with Minnesota Statutes, SBI has the authority to enter into, and has entered into, derivative transactions including put and call options and future contracts traded on a contract market regulated by a governmental agency or by a financial institution regulated by a governmental agency. Any agreements for put and call options and futures contracts may only be entered into with a fully offsetting amount of cash or security. As of June 30, 2009, PERA's exposure to market risk is minimal.

6. Capital Assets

Capital assets, generally assets with a cost in excess of \$5,000 and a useful life greater than 1 year, are capitalized at the time of acquisition at cost. Depreciation is computed on a straight-line method over the useful life of the related assets. The estimated useful lives are three to 10 years for furniture and equipment.

Capital assets are presented on the June 30, 2009 Statement of Plan Net Assets at historical cost, net of accumulated depreciation, as summarized in Figure 5.

7. Building and Land

Legislation was passed in 1999 allowing PERA, the Minnesota Teacher's Retirement Association (TRA) and the Minnesota State

Retirement System (MSRS) to purchase land and construct a 140,000 square foot building to house all three retirement systems. The systems moved into the facility in September 2001. Ownership of the facility is pro-rated based on the amount of square footage each retirement system occupies in the building. PERA's ownership share is 37.6 percent as of June 30, 2009. PERA's share of the cost to purchase the 4.3 acres of land was \$170,308.

In June 2000 the State of Minnesota, under the authority of the Commissioner of Finance, issued revenue bonds totaling \$29 million on behalf of the three retirement systems to pay for the construction of the facility. Those bonds are backed by the assets of the three retirement systems, excluding assets in the Defined Contribution Plans, and both principal and interest payments are made by the retirement systems using the same ownership ratio to determine amounts. At year end, PERA's share of the bonds payable is \$9,362,400. We are depreciating the facility over 40 years. PERA's share of bond issuance costs are shown on the Statement of Plan Net Assets as Deferred Bond Charges and are being amortized over 30 years, the life of the bonds. The bond repayment schedule is shown in Figure 6.

Legislation was passed in 1999 allowing PERA, the Minnesota Teacher's Retirement Association and the Minnesota State Retirement System to purchase land and construct a 140,000 square foot building to house all three retirement systems. The systems moved into the facility in September 2001.

8. Accrued Compensated Absences

PERA's employees accrue vacation leave, sick leave and compensatory leave at various rates within limits specified in collective bargaining agreements. Accumulated

Total capital assets, net of accumulated depreciation	\$ 9,966	\$(266)	\$0	\$ 9,700

Notes

(Continued)

Actuarial valuations are performed annually using the entry age normal actuarial cost method. Contributions are made as a level percentage of projected payroll, and are specified in statute as fixed percentages.

amounts for compensated absences are accrued when incurred. Such leave is liquidated in cash primarily at the time of termination of employment. We estimate that \$82,936 is considered a short-term liability and \$829,370 is considered a long-term liability. The total, \$912,306, is shown on the Statement of Plan Net Assets.

9. Securities Lending

PERA does not own specific securities, but instead owns shares in pooled funds invested by the State Board of Investments (SBI). The SBI is authorized to enter into securities lending transactions in accordance with Minnesota Statutes, Chapter 356A.06, subd. 7 and has, via a Securities Lending Authorization Agreement, authorized State Street Bank and Trust Company to lend its securities to broker-dealers and banks pursuant to a form of loan agreement.

During the fiscal year, State Street lent, at the direction of the SBI, certain securities held by State Street as custodian and received cash (both United States and foreign currency), securities issued or guaranteed by the United States government, sovereign debt of foreign countries, and irrevocable bank letters of credit as collateral. State Street did not have the ability to pledge or sell collateral securities absent a borrower default. Borrowers were required to deliver collateral for each loan in amounts equal to not less than 100% of the market value of the loaned securities.

The SBI did not impose any restrictions during the fiscal year on the amount of the loans that State Street made on its behalf. There were no failures by any borrower to return loaned securities or pay distributions thereon during the fiscal year that resulted in a declaration and notice of Default of the Borrower.

During the fiscal year, the SBI and the borrowers maintained the right to terminate all securities lending transactions on demand. The cash collateral received on each loan

was invested, together with the cash collateral of other qualified tax-exempt plan lenders, in a collective investment pool. As of June 30, 2009, the investment pool had an average duration of 37 days and an average final maturity of 201 days for USD collateral. Because the loans were terminable at will their duration did not generally match the duration of the investments made with cash collateral. On June 30, 2009 SBI had no credit risk exposure to borrowers. PERA's portion of the collateral held and the fair value of securities on loan from the SBI as of June 30, 2009 was \$2,542,312,638 and \$2,451,689,891 respectively. Cash collateral of \$2,347,557,000 is reported on the Statement of Plan Net Assets as an asset. Liabilities resulting from these securities lending transactions are also reported on the Statement of Plan Net Assets.

10. Funded Status

The funded status of each defined benefit plan as of June 30, 2009, the most recent actuarial valuation date, is shown in Figure 7. The Schedule of Funding Progress, presented as required supplementary information (RSI) following the notes to the financial state-

Fig 6. Remaining Revenue Bond Repayment Schedule (In dollars)

Totals	\$9,362,400	\$7,219,446	\$16,581,846

ments, presents multiyear trend information about whether the actuarial values of plan assets are increasing or decreasing over time relative to the actuarial accrued liabilities of promised benefits.

11. Actuarial Methods and Assumptions

Actuarial valuations are performed annually using the entry age normal actuarial cost method. Contributions are made as a level percentage of projected payroll, and are specified in statute as fixed percentages. There are no maximum or minimum salary limits imposed by statute. A closed amortization period is used, with 22 years remaining for the PERF, 29 years remaining for the PEPFF, and 14 years remaining for the PECF. For actuarial purposes, assets are valued using a 5-year smoothing method. The plans assume an 8.5 percent investment rate of return and a 3 percent inflation rate. Payroll growth is assumed to grow at 4.5 percent. Assumed salary growth in the PERF decreases in annual increments from 5.4 percent at age 20 to 4 percent at age 60. In the PEPFF salary growth assumptions decrease from 11 percent at age 20 to 4.75 percent at age 50. In the PECF salary growth assumptions decrease from 7.75 percent at age 20 to 5.25 percent at age 55. We assume postretirement benefits will increase 2.5 percent each year.

C. CONTRIBUTIONS REQUIRED AND CONTRIBUTIONS MADE

Minnesota Statutes, Chapters 353, 353A, 353B, 353E and 356 set the rates for employer and employee contributions. In 2005 the Minnesota legislature passed legislation that increases employer and

employee contribution rates for PEPFF members and for Coordinated Plan members of the PERF over a five-year period. Current and future contribution rates are shown in Figure 8. Because of the investment losses incurred over the past two years, new contribution rates are not expected to be sufficient to get the PERF fully funded by the year 2031 and the PECF by the year 2023, as is presently required under Minnesota Statutes. The required contributions are expressed as a level percentage of covered payroll and are actuarially determined using an individual entry-age actuarial cost method.

Legislation passed in 1999 closed the Police and Fire Consolidation Fund and moved members and necessary assets to the PEPFF. Some consolidation units were not fully funded at the time, and an amortization schedule was created that allowed those units to pay off the unfunded liability over a 10-year period. The method for calculating yearly payments was set forth in Minnesota Statutes and calculated by an actuary. Payments were due by January 31st each year through the year 2009. In fiscal year 2009 we received \$6,428,330 in principal and interest payments.

D. MINNESOTA POST RETIREMENT INVESTMENT FUND (MPRIF) RESERVE

For all retiring members, except those in the PEPFF who have not elected to have their post retirement adjustments determined by the MPRIF formula, the reserves required to pay the cost of the member's annuity were transferred from the plan's Basic Fund to the MPRIF at retirement, where the funds were invested along with funds from the other statewide retire-

In 2005 the Minnesota legislature passed legislation that increases employer and employee contribution rates for PEPFF members and for Coordinated Plan members of the PERF over a five-year period.

FY09 Contribution Rates

Fig. 7 Schedule of Funding Progress (in thousands)

Plan	Actuarial Valuation Date	Actuarial Value of Assets (a)	Actuarial Accrued Liability (AAL)(b)	Unfunded AAL (UAAL) (b-a)	Funded Ratio (a/b)	Covered Payroll (c)	UAAL as a Percentage of Covered Payroll [(b-a)/c]
PERF	06/30/2009	\$13,158,490	\$18,799,416	\$5,640,926	70.0%	\$4,778,708	118.0%
PEPFF	06/30/2009	5,239,855	6,296,274	1,056,419	83.2%	733,164	144.1%
PECF	06/30/2009	217,577	229,383	11,806	94.9%	154,650	7.6%

Notes

(Continued)

Legislation was passed in 2008 that mandates the dissolution of the MPRIF if the composite funding ratio of the MPRIF fell below 80 percent as of the most recent actuarial valuation. Thus, the MPRIF assets were merged back into the Basic Funds.

ment systems. Legislation passed in 2008 required the dissolution of the MPRIF if funding fell below 80 percent. The MPRIF did fall below that threshold as of June 30, 2008 so it was dissolved on June 30, 2009 and assets were merged back into the Basic Fund of each participating plan on that date.

On June 29, 2009, the assets and accrued earnings of the MPRIF were valued by State Street Bank. The \$16,711,638,000 in investments and \$441,000 in accrued income was distributed to the participating plans' Basic Funds on June 30, 2009 based on their net participation at fair market value in the MPRIF as determined using the formula in Minnesota Statutes Section 11A.18 Subd. 7. The Public Employees Retirement Fund's share of the MPRIF distribution was 26.13054 percent or \$4,366,956,000. The Public Employees Police & Fire Fund's share was 9.35180 percent or \$1,562,880,000. The Public Employees Correctional Fund's share was 0.04395 percent or \$7,345,000.

One of the provisions in the 2008 legislation replaced the method used to determine annual post-retirement benefit increases. Past increases were based on a combination of inflation and investment returns. Future increases will be provided at a flat 2.5 percent. Eligible benefit recipients receiving benefits on or before January 1, 2009 will receive a 2.5 percent benefit increase effective January 1, 2010. Benefit recipients whose first benefit was paid after January 1, 2009 but before December 2, 2009 will receive a prorated portion of the January 1, 2010 increase. This is a revision of the waiting period and proration schedule for cost-of-living adjustments.

Prior to the MPRIF dissolution, MPRIF asset gains and losses were not smoothed. Subsequent to the dissolution, MPRIF asset gains and losses will be recognized incrementally over five years at 20 percent per year, similar to the smoothing of active fund assets. This

change in the actuarial asset method for MPRIF assets reduced the required contribution by 1.61% of pay in the PERF, 3.60% of pay in the PEPFF, and 0.13% of pay in the PECF.

E. OTHER NOTES

1. Administrative Expenses

Administrative expenses of the Public Employees Retirement Association are paid during the year from the Public Employees Retirement Fund. At year-end, a portion of the expenses are allocated to the Public Employees Police and Fire Fund and the Public Employees Correctional Fund, based on membership counts. The PEDCP reimburses the PERF to the extent of fees collected for recovery of administrative costs. The applicable amounts are reported as expenses of the four funds and reported on the Statement of Plan Net Assets as a payable to other funds or due from other funds. Administrative costs are funded from investment income for the defined benefit plans.

For fiscal year 2009, administrative expenses allocated to PERF, PEPFF, PECF, and PEDCP totaled \$9,706,023, \$746,951, \$219,564 and \$111,681 respectively.

2. Participating Pension Plan

All employees of the Public Employees Retirement Association are covered by the PERF Coordinated Plan and eligible for the plan provisions described in Note A.4. Minnesota Statute 353.27 sets the rates for employee and employer contributions. These statutes are established and amended

Fig.8 Retirement Plan Contribution Rates

Effective Date	Contributor	PERF			
		Basic*	Coordinated	PEPFF	PECF*
1/1/08	Member	9.10%	6.00%	8.60%	5.83%
	Employer	11.78%	6.50%	12.90%	8.75%
1/1/09	Member	9.10%	6.00%	9.40%	5.83%
	Employer	11.78%	6.75%	14.10%	8.75%
1/1/10	Member	9.10%	6.00%	9.40%	5.83%
	Employer	11.78%	7.00%	14.10%	8.75%

* Basic Plan and PECF contribution rates are not expected to increase in the near future. Legislation passed in 2005 increased rates in the Coordinated Plan over five years and in the PEPFF over four years

by the state legislature. Current and future rates are shown in **Figure 8**. Total covered payroll for PERA employees during fiscal year 2009 was approximately \$5.08 million.

Employer pension contributions for PERA employees for the years ending June 30, 2009, 2008 and 2007 were \$335,952, \$301,587, and \$266,635 respectively, equal to the required contributions for each year as set by state statute.

3. OPEB

Nearly all PERA employees are covered by the State Employees Group Insurance Plan (SEGIP) administered by the Department of Minnesota Management and Budget. At present, this plan subsidizes the cost of retiree insurance by charging a single premium rate for active employees and retirees, regardless of underwriting experience. At June 30, 2009, the SEGIP had an unfunded net obligation for future benefits of \$73,127,000 to be funded on a pay-as-you-go basis. PERA's allocated portion of this liability is \$27,000.

All employees of the Public Employees Retirement Association are covered by the PERF Coordinated Plan and eligible for the plan provisions.

An Equal Opportunity
Employer

Investment Authority

The assets of the Public Employees Retirement Association are invested under the direction and authority of the State Board of Investment (SBI) in accordance with Minnesota Statutes, Chapters 11A and 356A. The SBI is made up of the State Governor, State Auditor, Secretary of State, and the Attorney General. The Legislature has also established a 17-member Investment Advisory Council to advise the SBI and its staff on investment-related matters. The Executive Director of PERA is a permanent member of this council.

Investment Policy

Investment policy states that the SBI will operate within standard investment practices of the prudent person. The SBI is to "exercise that degree of judgment and care, under circumstances then prevailing, which persons of prudence, discretion, and intelligence exercise in the management of their own affairs, not for speculation, but for investment, considering the probable safety of their capital as well as the probable income to be derived therefrom." The SBI is authorized to own government obligations, corporate obligations, various short-term obligations, corporate stocks, venture capital interests, mutual funds, resource investments, and real estate interests subject to specific parameters. Above all, pension fund assets are to be invested for the exclusive benefit of the members of the fund.

Investment Objectives

Pension contributions of PERA members are invested in the Combined Funds. The Combined Funds include the assets of both the active and retired public employees who participate in the defined benefit plans administered by PERA, the Minnesota State Retirement System, and the Teachers Retirement Association. PERA does not own any underlying assets, but instead owns a participation in the pooled Combined Funds. Because these assets normally accumulate for thirty to forty years, SBI's objective is to take advantage of the long investment time horizon offered by equities and alternative assets in order to meet its actuarial return target of 8.5 percent per year and ensure that sufficient funds are available to finance promised benefits at the time of retirement.

Until this year, assets for active members were invested in the Basic Funds and assets for retired members were invested in the Minnesota Post Retirement Investment Fund (Post Fund). The assets of the Post Fund, which included the eight plans which participate in the Basic Funds as well as the Legislative and Survivors Retirement Fund, financed monthly annuity payments paid to retirees. Investments in the Post Fund were invested a bit more conservatively, but still invested heavily in equities to take advantage of the 15-20 year time horizon associated with the length of time a typical retiree was expected to draw benefits. By State law, on June 30, 2009 the Post Fund was dissolved and assets were merged back into the Basic Funds.

INVESTMENT SECTION

The Combined Fund will have a slightly different asset allocation moving forward than either the Basic Funds or the Post Fund had historically.

The long term objectives of the Combined Funds are:

- (1) provide returns that are 3-5 percentage points greater than inflation over the latest 20-year period; and
- (2) outperform a composite market index weighted in a manner that reflects the actual asset mix of the Combined Funds over the latest 10-year period.

The SBI also compares the Combined Funds returns to other large pension funds in a universe of public and corporate plans.

Based on values on June 30, 2009, the Combined Funds returned 5.0 percentage points above the CPI over the last 20 years and matched the Composite Index over the past 10 years. Investment returns ranked in the 39th percentile over the past five years and in the 70th percentile over the past 10 years, compared to similar funds in the Trust Universe Comparison Service.

Investment Presentation

Investment returns were prepared using a time-weighted rate of return methodology based upon fair market values, net of investment expenses.

Howard Bicker
Executive Director
State Board of Investment

Note: Investment returns were calculated using a time-weighted rate of return.

Asset Allocation

ASSET ALLOCATION (AT JUNE 30, 2009)

Asset allocation has a dominant effect on returns. SBI focused considerable attention on the selection of the appropriate long-term asset allocation policy for the Basic and MPRIF funds, and will do the same for the new Combined Funds.

Investment Type	Basic Fund		MPRIF**	
	Actual Asset Mix	Long-term Policy Target	Actual Asset Mix	Long-term Policy Target
Domestic Stocks	44.6%	45.0%	41.9%	45.0%
International Stocks	16.3	15.0	14.1	15.0
Bonds	22.3	19.0	25.9	25.0
Alternative Assets*	14.8	20.0	13.0	12.0
Cash	2.0	1.0	5.1	3.0
Total	100%	100%	100%	100%

* Alternative assets include real estate, venture capital and resource (oil, gas, etc.) funds.
 ** Asset allocation for the MPRIF as of March 31, 2009.

COMBINED FUNDS

With the closing of the Post Retirement Investment Fund on June 30, 2009, the new Combined Funds have a distinct asset allocation that differs from the historic asset allocation of both the Basic Funds and the MPRIF.

Asset Class	Percentage
Domestic Stocks	45%
Bonds	18%
Alternative Assets	20%
International Stocks	15%
Cash	2%

ANNUITY INCREASE VS. INFLATION (LAST 10 YEARS)

Increases awarded to PERA retirees under the MPRIF greatly outpaced inflation during the 1990s but fell short from 2004 through 2008. However, this year, while inflation was a -2.0 percent, benefit recipients received a 2.5 percent increase. The guaranteed 2.5 percent increase will continue under the new Combined Funds.

Fair Value of Investments

Last 10 Years

PUBLIC EMPLOYEES RETIREMENT FUND

Because of investment losses over the past two years, the fair value of investments is back to where it was 10 years ago.

POLICE AND FIRE FUND

Fair value of Police and Fire Fund investments is slightly ahead of 2003 levels.

PUBLIC EMPLOYEES CORRECTIONAL FUND

Created in 1999, the Public Employees Correctional Fund now has investments valued at \$167 million.

December 3, 2009

Board of Trustees
Public Employees Retirement
Association of Minnesota
60 Empire Drive, Suite 200
St. Paul, Minnesota 55103-2088

Members of the Board:

We have completed our annual actuarial valuation of the Public Employees Retirement Association of Minnesota to test how well the fundamental financing objectives are being achieved and to determine the actuarial status of the Public Employees Retirement Fund (PERF), the Public Employees Police and Fire Fund (PEPFF), and the Public Employees Correctional Fund (PECF) as of June 30, 2009.

The fundamental financing objectives of the funds are to establish contribution rates which, when expressed as a percentage of active member payroll, will remain approximately level from generation to generation and meet the required deadline for full funding.

The results of the valuation indicate that the PERF is 69.99% funded, and the contribution rates are deficient by 2.67% of payroll to meet the target of full funding by 2031. The PEPFF is 83.22% funded, and the contributions are deficient by 6.49% of payroll to meet the 2038 full funding target. The PECF is 94.85% funded, and the contribution rates are 0.55% of payroll higher than what is necessary for that fund to be fully funded by 2023.

The actuarial valuation was based upon applicable GASB 25 and 50 pronouncements, statutory provisions, and the Standards for Actuarial Work in effect on July 1, 2009. In the aggregate, the basic financial and membership data provided to us as of June 30, 2009 by the association office appears reasonable in comparison to last year, and we have relied upon the data as submitted in performing the actuarial valuation and preparing trend data schedules. It is our understanding that the data has subsequently been audited with no significant changes made. We are responsible for providing the numbers for each of the supporting schedules in the Actuarial section of PERA's comprehensive annual financial report. We are also responsible for preparing both of the Required Supplementary Information schedules found in the Financial section of this annual report.

Consulting. Outsourcing. Investments.

The three valuations were performed by using the actuarial cost methods and actuarial assumptions that are described in a separate table of this report. The actuarial cost method and the assumptions related to asset valuation, investment return, earnings progression and active member payroll growth are specified by state statute. All other assumptions are based on actual experience with changes recommended by the actuary, adopted by the PERA Board and approved by the Legislative Commission on Pensions and Retirement.

For the purpose of determining the actuarial value of assets, the Post Fund asset loss for the fiscal year ending June 30, 2009 will be recognized incrementally over five years at 20 percent per year, similar to the smoothing of active fund assets. Prior to June 30, 2009, Post Fund asset gains and losses were not smoothed.

We are not aware of any direct or material indirect financial interest or relationship, including investments or other services that could create a conflict of interest, that would impair the objectivity of our work.

We certify that to the best of our knowledge and belief, this actuarial valuation was performed in accordance with the requirements of Minnesota Statutes Section 356.215, and the requirements of the Standards for Actuarial Work.

Gary D. Dickson

December 1, 2009

GASB Statement No. 44, Economic Condition Reporting: The Statistical Section, was issued in May 2004. The statement establishes requirements related to the supplementary information presented in the Statistical Section of this report. The objective of the information found in the Statistical Section is to provide financial statement users with additional historical perspective, context, and detail. We hope that when used in conjunction with information found in previous sections of this report, readers will gain a better understanding of PERA's overall financial condition.

Financial Information

The Schedule of Changes in Net Assets is presented for the last 10 years, giving the reader an opportunity to review trends in the revenues and expenses of our defined benefit plans. Benefits and refunds are then broken down by type. The Revenues and Expenses graph on page 62 shows that 60 percent of our revenue has come from investment income over the past 20 years, despite the unprecedented investment losses experienced over the past two years.

Plan Membership

Membership data for the past ten years can be found on page 63. Active membership has increased 7 percent during that time period, while the number of benefit recipients has increased 39 percent and the number of terminated vested members has increased 110 percent. The graphs on page 64 show the distribution of our active membership as of 6/30/09.

Information about our benefit recipients is provided on pages 65 through 72, including monthly benefit amounts, types of benefits, benefit options, and location of benefit recipients.

Employers

The rest of this section provides information about the employers who participate in PERA.

All non-accounting data is derived from PERA's internal sources.

A handwritten signature in black ink that reads 'David Bergong'.
