

# Public Employees Retirement Association of Minnesota

General Employees Retirement Plan

Actuarial Valuation Report as of July 1, 2017

November 10, 2017

Public Employees Retirement Association of Minnesota  
Trustees of the General Employees Retirement Plan  
St. Paul, Minnesota

Dear Trustees of the General Employees Retirement Plan:

The results of the July 1, 2017 annual actuarial valuation of the General Employees Retirement Plan are presented in this report. This report was prepared at the request of the Board and is intended for use by the Board and staff and those designated or approved by the Board. This report may be provided to parties other than the Plan only in its entirety. GRS is not responsible for the consequences of any unauthorized use of this report.

The purpose of the valuation is to measure the Plan's funding progress and to determine the required contribution rate for the fiscal year beginning July 1, 2017 according to the prescribed assumptions. Note that we have not attempted to quantify the impact of GASB Statements No. 67 and No. 68 in this report.

The required contribution rate shown on page one was designed to comply with Minnesota Statutes. Users of this report should be aware that contributions made at that rate do not guarantee benefit security. Given the importance of benefit security to any retirement system, we suggest that contributions to the System in excess of those presented in this report be considered.

Actuarial assumptions, including discount rates, mortality tables and others identified in this report, are prescribed by Minnesota Statutes Section 356.215, the Legislative Commission on Pensions and Retirement (LCPR), and the Trustees. These parties are responsible for selecting the plan's funding policy, actuarial valuation methods, asset valuation methods, and assumptions. The policies, methods and assumptions used in this valuation are those that have been so prescribed and are described in the Actuarial Basis of this report. PERA is solely responsible for communicating to GRS any changes required thereto.

**In our professional judgement, the statutory discount rate of 8.0% used in this report deviates materially from the guidance set forth in Actuarial Standards of Practice No. 27 (ASOP No. 27).** In a 2017 analysis of long-term rate of investment return and inflation assumptions, GRS suggested that an investment return assumption in the range of 6.85% to 7.68% would be reasonable. Please see our letter dated September 11, 2017 for additional information. If a discount rate within the reasonable range were used in this valuation instead of 8.0%, the unfunded liability and contribution deficiency would be higher than shown. Note that estimated results based on a 7.0% discount rate are shown on page five.

The contribution rate in this report is determined using the actuarial assumptions and methods disclosed in the Actuarial Basis of this report. This report includes risk metrics on pages five and six, but does not include a more robust assessment of the risks of future experience differing materially from the actuarial assumptions. Additional assessment of risks was outside the scope of this assignment. We encourage a review and assessment of investment and other significant risks that may have a material effect on the plan's financial condition.

The valuation was based upon information furnished by the Public Employees Retirement Association of Minnesota (PERA), concerning benefits, financial transactions, plan provisions and active members, terminated members, retirees and beneficiaries. We checked for internal and year-to-year consistency, but did not audit the data. We are not responsible for the accuracy or completeness of the information provided by PERA.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law. Due to the limited scope of our assignment, we did not perform an analysis of the potential range of such future measurements.

This report should not be relied on for any purpose other than the purpose described herein. Determinations of the financial results associated with the benefits described in this report in a manner other than the intended purpose may produce significantly different results.

The signing actuaries are independent of the plan sponsor. We are not aware of any relationship that would impair the objectivity of our work.

Brian B. Murphy and Bonita J. Wurst are Members of the American Academy of Actuaries (MAAA) and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein. In addition, Mr. Murphy meets the requirements of "approved actuary" under Minnesota Statutes Section 356.215, Subdivision 1, Paragraph (c).

This report has been prepared by actuaries who have substantial experience valuing public employee retirement systems. To the best of our knowledge and belief the information contained in this report is accurate and fairly presents the actuarial position of the General Employees Retirement Plan as of the valuation date and was performed in accordance with the requirements of Minnesota Statutes Section 356.215, and the requirements of the Standards for Actuarial Work established by the LCPR. All calculations have been made in conformity with generally accepted actuarial principles and practices, with the Actuarial Standards of Practice issued by the Actuarial Standards Board, and with applicable statutes.

We are available to answer any questions or provide further details.

Respectfully submitted,

Brian B. Murphy, FSA, EA, FCA, MAAA

Bonita J. Wurst, ASA, EA, FCA, MAAA

BBM/BJW:bd

## Other Observations

### General Implications of Contribution Allocation Procedure or Funding Policy on Future Expected Plan Contributions and Funded Status

Given the plan's contribution allocation procedure, if there are no changes in benefits or contributions and all actuarial assumptions are met (including the assumption of the plan earning 8.00% on the actuarial value of assets), it is expected that:

- (1) The unfunded actuarial accrued liabilities will be fully amortized after 24 years;
- (2) The funded status of the plan will increase gradually towards a 100% funded ratio; and
- (3) The unfunded liability will grow initially as a dollar amount before beginning to decline.

However, as noted elsewhere in this report, we do not expect the earnings assumption of 8.00% to be met. Unfunded liabilities based on a lower earnings assumption have the potential to grow indefinitely.

### Limitations of Funded Status Measurements

Unless otherwise indicated, a funded status measurement presented in this report is based upon the actuarial accrued liability and the actuarial value of assets. Unless otherwise indicated, with regard to any funded status measurements presented in this report:

- (1) The measurement is inappropriate for assessing the sufficiency of plan assets to cover the estimated cost of settling the plan's benefit obligations, in other words, of transferring the obligations to an unrelated third party in an arm's length market value type transaction.
- (2) The measurement is dependent upon the actuarial cost method which, in combination with the plan's amortization policy, affects the timing and amounts of future contributions. The amounts of future contributions will most certainly differ from those assumed in this report due to future actual experience differing from assumed experience based upon the actuarial assumptions. A funded status measurement in this report of 100% is not synonymous with no required future contributions. If the funded status were 100%, the plan would still require future normal cost contributions (i.e., contributions to cover the cost of the active membership accruing an additional year of service credit).
- (3) The measurement would produce a different result if the market value of assets were used instead of the actuarial value of assets.
- (4) The funded status would appear lower if it were based upon an investment return assumption that meets the requirements of ASOP 27.

### Limitations of Project Scope

Actuarial standards do not require the actuary to evaluate the ability of the plan sponsor or other contributing entity to make required contributions to the plan when due. Such an evaluation was not within the scope of this project and is not within the actuary's domain of expertise. Consequently, the actuary performed no such evaluation.

# Summary of Valuation Results

## Contributions

The following table summarizes important contribution information as described in the Development of Costs section.

Contributions	Actuarial Valuation as of	
	July 1, 2017	July 1, 2016
Statutory Contributions - Chapter 353 (% of Payroll)	14.60%	14.62%
Required Contributions - Chapter 356 (% of Payroll)	16.18%	16.49%
Sufficiency/(Deficiency)	(1.58)%	(1.87)%

The statutory contribution deficiency decreased from (1.87)% of payroll to (1.58)% of payroll. The primary reasons for the decreased contribution deficiency were the change in Combined Service Annuity assumptions and the asset return for the year being greater than expected. On a market value of assets basis, contributions are deficient by 1.32% of payroll.

Based on the actuarial value of assets and scheduled contribution rates, statutory contributions are not sufficient to fully amortize the unfunded actuarial accrued liability over the statutory amortization period of 16 years. Based on current statutory contributions, the actuarial value of assets, and other methods and assumptions described in this report, the unfunded liability will be eliminated in approximately 24 years.

The Plan Assets section provides detail on the plan assets used for the valuation including a development of the Actuarial Value of Assets (AVA). The Market Value of Assets (MVA) earned approximately 15.1% for the plan year ending June 30, 2017. The AVA earned approximately 9.3% for the plan year ending June 30, 2017 as compared to the assumed rate of 8.00%. The assumed rate is mandated by Minnesota Statutes, and is outside the upper end of the reasonable range. According to the NASRA survey, the most common assumption for statewide plans is currently 7.50%. Use of a 7.50% return assumption would produce a deficiency greater than shown above.

Participant reconciliation and statistics are detailed in the Membership Data section. The Actuarial Basis section includes a summary of plan provisions and actuarial methods and assumptions used for the calculations in this report.

Accounting information prepared according to GASB Statements No. 67 and No. 68 will be provided in a separate report.

## Summary of Valuation Results

A summary of principal valuation results from the current valuation and the prior valuation follows. Any changes in Plan provisions, actuarial assumptions or valuation methods and procedures between the two valuations are described after the summary.

	<b>Actuarial Valuation as of</b>	
	<b>July 1, 2017</b>	<b>July 1, 2016</b>
<b>Contributions (% of Payroll )</b>		
Statutory - Chapter 353	14.60%	14.62%

# Summary of Valuation Results

## Effects of Changes

The following changes in plan provisions, actuarial assumptions and methods were recognized as of July 1, 2017:

- Loading factors to account for members with Combined Service Annuities were updated as follows:
  - Active Members: Reduced from 0.8% (0.2% for MERF members) of liabilities to 0.0% of liabilities
  - Deferred Vested Members: Reduced from 60% (30% for MERF members) of liabilities to 15% of liabilities
  - Non-Vested Terminated Members: Reduced from 60% (30% for MERF members) of liabilities to 3% of liabilities
  - The Combined Service Annuity assumption changes were approved by the LCPR based on an analysis completed by the LCPR actuary and documented in a report dated October 2016
- The assumed post-retirement benefit increase assumption changed from 1.00% per year through 2052 and 2.50% thereafter to 1.00% through 2035 and 2.50% thereafter. See page four for additional detail about this assumption.

The combined impact of the above changes was to decrease the accrued liability by \$61 million and increase the required contribution by 0.2% of pay, as follows:

	<b>Before Assumption Changes</b>	<b>Reflecting Assumption Changes</b>
Normal Cost Rate, % of Pay	7.6%	7.9%
Amortization of Unfunded Accrued Liability, % of Pay	8.2%	8.1%
Expenses (% of Pay)	0.2%	0.2%
Total Required Contribution, % of Pay	16.0%	16.2%
Accrued Liability Funding Ratio	77.6%	77.8%
Projected Benefit Funding Ratio	96.7%	96.2%
Unfunded Accrued Liability (in billions)	\$5.8	\$5.7

# Summary of Valuation Results

## Valuation of Future Post-Retirement Benefit Increases

Benefit recipients receive a future annual 1.00% post-retirement benefit increase. If the funding ratio reaches 90% (based on a 2.50% post-retirement benefit increase assumption) for two consecutive years, the benefit increase will revert to 2.50%. If, after reverting to a 2.50% benefit increase, the funding ratio declines to less than 80% for one-year or less than 85% for two consecutive years, the benefit increase will decrease to 1.00%. Benefit increases already granted, however, will not be affected.

To determine an assumption regarding a future change in the post-retirement benefit increase, we performed a projection of liabilities and market value of assets based on the following methods and assumptions:

- Future investment returns of 8.00%;
- Open group; stable active population (new member profile based on average new members hired in recent years);
- The post-retirement benefit increase rate is assumed to be 1.00% per year until the funding ratio threshold required to pay a 2.50% post-retirement benefit increase is reached; and
- Current statutory contributions (i.e., not including potential contribution increases under the contribution stabilizer statutes).

Based on these assumptions and methods, the projection indicates that this plan is expected to attain the funding ratio threshold required to pay a 2.50% post-retirement benefit increase in the year 2035, and that the plan would begin paying 2.50% benefit increases on January 1, 2036. This assumption is reflected in our calculations. This is only an assumption. Actual timing will depend on actual experience.

As noted elsewhere in this report, we do not expect the earnings assumption of 8.00% to be met. The funding ratio threshold would be achieved later if it was based upon an investment return assumption that meets the requirements of ASOP No. 27.

# Summary of Valuation Results

## Sensitivity Tests

During the 2017 legislative session, the Legislative Commission on Pensions and Retirement (LCPR) enacted a new sensitivity disclosure requirement for PERA's 2017 valuations. Per the LCPR's requirement, we have calculated the liabilities associated with the following scenarios:

- 1) 7% interest rate assumption
- 2) 9% interest rate assumption
- 3) 1.0% post-retirement benefit increase for all future years
- 4) 2.5% post-retirement benefit increase for all future years

In each case, all other assumptions were unchanged from those used to develop the final valuation results in this report. Note that we believe the 9% interest rate assumption is an unrealistic assumption.

	Final Valuation Assumptions	Final Valuation Assumptions with 7% interest	Final Valuation Assumptions with 9% interest	Final Valuation Assumptions with 1.0% COLA for all future years	Final Valuation Assumptions with 2.5% COLA for all future years
Normal Cost Rate, % of Pay	7.9%	9.8%	6.6%	7.4%	8.3%
Amortization of Unfunded Accrued Liability, % of Pay	8.1%	12.0%	4.4%	6.9%	12.0%
Expenses (% of Pay)	0.2%	0.2%	0.2%	0.2%	0.2%
Total Required Contribution, % of Pay	16.2%	22.0%	11.2%	14.5%	20.5%
Contribution Sufficiency/(Deficiency), % of Pay	(1.6)%	(7.4)%	3.4 %	0.1 %	(5.9)%
Accrued Liability Funding Ratio	77.8%	68.7%	87.1%	80.4%	70.2%
Actuarial Accrued Liability (in billions)	\$25.6	\$29.0	\$22.9	\$24.8	\$28.4
Unfunded Accrued Liability (in billions)	\$5.7	\$9.1	\$2.9	\$4.9	\$8.5

(5) The Funded ratio is the most widely known measure of a plan's financial strength, but the trend in the funded ratio is much more important than the absolute ratio. The funded ratio should trend to 100%. As it approaches 100%, it is important to re-evaluate the level of investment risk in the portfolio and potentially to re-evaluate the assumed rate of return.

(6) and (7) The ratio of Retiree liabilities to total accrued liabilities gives an indication of the maturity of the system. As the ratio increases, cash flow needs increase, and the liquidity needs of the portfolio change. A ratio on the order of 50% indicates a maturing system.

(8) and (9) The ratios of liabilities and assets to payroll gives an indication of both maturity and volatility. Many systems have ratios between 500% and 700%. Ratios significantly above that range may indicate difficulty in supporting the benefit level as a level % of payroll.

(10) and (11) The portfolio standard deviation measures the volatility of investment return. When multiplied by the ratio of assets to payroll it gives the effect of a one standard deviation asset move as a percent of payroll. This figure helps users understand the difficulty of dealing with investment volatility and the challenges volatility brings to sustainability.

(12) The ratio of unfunded liability to payroll gives an indication of the plan sponsor's ability to actually pay off the unfunded liability. A ratio above approximately 300% or 400% may indicate difficulty in discharging the unfunded liability within a reasonable time frame.

(13) and (14) The ratio of Non-Investment Cash Flow to assets is an important measure of sustainability. Negative ratios are common and expected for a maturing system. In the longer term, this ratio should be on the order of approximately -4%. A ratio that is significantly more negative than that for an extended period could be a leading indicator of potential exhaustion of assets.

(15) and (16) Investment return is probably the largest single risk that most systems face. The year by year return and the 5 year geometric average give an indicator of the realism of the systems assumed return. Of course, past performance is not a guarantee of future results.

## Supplemental Information

The remainder of the report includes information supporting the results presented in the previous sections.

- **Plan assets** presents information about the Plan's assets as reported by the Public Employees Retirement Association of Minnesota. The assets represent the portion of total fund liabilities that has been funded.
- **Membership data** presents and describes the membership data used in the valuation.
- **Development of costs** shows the liabilities for Plan benefits and the derivation of the contribution amount.
- **Actuarial basis** describes the Plan provisions, as well as the methods and assumptions used to value the Plan. The valuation is based on the premise that the Plan is ongoing.
- **Additional schedules** shows the Schedule of Funding Progress and Schedule of Contributions.
- **Glossary** defines the terms used in this report.

<b>12. Fund balance at market value at end of year</b>	<b>\$ 20,100,579</b>	<b>\$ 17,994,909</b>
13. Approximate return on market value of assets	15.1%	(0.2)%

\* Includes \$31 million Employer Supplemental Contribution to be paid in July and December 2017.

\*\* Includes \$31 million Employer Supplemental Contribution paid in July and December 2016.

## Plan Assets

### Actuarial Asset Value (*Dollars in Thousands*)

	<b>June 30, 2017</b>	<b>June 30, 2016</b>
1. Market value of assets available for benefits	\$ 20,100,579	\$ 17,994,909
2. Determination of average balance		
a. Total assets available at beginning of year	\$ 17,995,149	\$ 18,581,795
b. Total assets available at end of year	\$ 20,100,579	\$ 17,994,909
c. Net investment income for fiscal year	\$ 2,682,901	\$ (20,851)
d. Average balance $[a. + b. - c.] / 2$	\$ 17,706,413	\$ 18,298,777
3. Expected return $[8.0\% * 2.d.]$	\$ 1,416,513	\$ 1,463,902
4. Actual return	\$ 2,682,901	\$ (20,851)
5. Current year asset gain/(loss) $[4. - 3.]$	\$ 1,266,388	\$ (1,484,753)
6. Unrecognized asset returns		
	<b>Original</b>	<b>Unrecognized Amount</b>
	<b>Amount</b>	
a. Year ended June 30, 2017	\$ 1,266,388	\$ 1,013,111 N/A
b. Year ended June 30, 2016	\$ (1,484,753)	\$ (890,851) \$ (1,187,802)
c. Year ended June 30, 2015	\$ (630,861)	\$ (252,344) \$ (378,517)
d. Year ended June 30, 2014	\$ 1,571,711	\$ 314,341 \$ 628,684
e. Year ended June 30, 2013	\$ 833,405	N/A \$ 166,681
f. Unrecognized return adjustment		\$ 184,257 \$ (770,954)
<b>7. Actuarial value at end of year (1. - 6.f.)</b>	<b>\$ 19,916,322</b>	<b>\$ 18,765,863</b>
8. Approximate return on actuarial value of assets during fiscal year	9.3%	7.6%
9. Ratio of actuarial value of assets to market value of assets	0.99	1.04

# Development of Costs

## Actuarial Valuation Balance Sheet (*Dollars in Thousands*)

The actuarial balance sheet is based on the principle that the long-term projected benefit obligations of the plan should be ideally equal to the long-term resources available to fund those obligations. **A Projected Benefit Funding Ratio less than 100% indicates that contributions are insufficient.** The resources available to meet projected obligations for current members consist of current fund assets plus the present value of anticipated future contributions intended to fund benefits for current members. In the exhibit below, B.2 is the estimated present value of contributions to fund the normal cost rate for current members until their respective termination dates. Item B.1 is the present value of the total 14.60% statutory contribution net of normal cost and anticipated plan expenses during the period from the valuation date to the statutory unfunded amortization date.

The contributions made in excess of amounts required for current benefit payments are accumulated as a reserve to help meet benefit payments in later years. It is this reserve system which permits the establishment of a level rate of contribution each year.

<b>Total</b>	<b>3,311</b>	<b>\$ 36,762</b>	<b>77.1</b>	<b>\$ 1,078,376</b>

# Actuarial Basis

## Actuarial Methods

All actuarial methods are prescribed by Minnesota Statutes, the Legislative Commission on Pensions and Retirement, or the Board of Trustees. Different methodologies may also be reasonable and results based on other methodologies would be different.

### **Actuarial Cost Method**

Actuarial Accrued Liability and required contributions in this report are computed using the Entry Age Normal Cost Method. This method is prescribed by Minnesota Statute. Under this method, a normal cost is developed by amortizing the actuarial value of benefits expected to be received by each active participant (as a level percentage-of-pay) over the total working lifetime of that participant, from hire to termination. Age as of the valuation date was calculated based on the dates of birth provided by the Fund. Entry age for valuation purposes was calculated as the age on the valuation date minus the provided years of service on the valuation date.

To the extent that current assets and future normal costs do not support participants' expected future benefits, an Unfunded Actuarial Accrued Liability ("UAAL") develops. The UAAL is amortized over the statutory amortization period using level percent-of-payroll assuming payroll increases. The total contribution developed under this method is the sum of normal cost, expenses, and the payment toward the UAAL.

### **Valuation of Future Post-Retirement Benefit Increases**

If the plan has reached the funding ratio threshold required to pay a 2.50% benefit increase, Minnesota statutes require the 2.50% benefit increase rate to be reflected in the liability calculations. If the plan has not yet reached the funding ratio threshold required to pay a 2.50% benefit increase, Minnesota statutes require a projection to be performed to determine the expected attainment of the funding ratio threshold, and the expected reversion to a 2.50% benefit increase rate must be reflected in the liability calculations.

### **Funding Objective**

The fundamental financing objective of the fund is to establish contribution rates which, when expressed as a percentage of active member payroll, will remain approximately level from generation to generation and meet the required deadline for full funding.

# Actuarial Basis

## Actuarial Methods (Concluded)

### Asset Valuation Method

The assets are valued based on a five-year moving average of expected and market values (five-year average actuarial value) determined as follows:

- At the end of each plan year, an average asset value is calculated as the average of the market asset value at the beginning and end of the fiscal year net of investment income for the fiscal year;
- The investment gain or (loss) is taken as the excess of actual investment income over the expected investment income based on the average asset value as calculated above;
- The investment gain or (loss) so determined is recognized over five years at 20% per year; and
- The asset value is the sum of the market asset value plus the scheduled recognition of investment gains or (losses) during the current and the preceding four fiscal years.

### Payment on the Unfunded Actuarial Accrued Liability

Payment equals a level percentage-of-payroll each year to the statutory amortization date of June 30, 2033 assuming payroll increases of 3.50% per annum. If there is a negative Unfunded Actuarial Accrued Liability, the surplus amount is amortized over 30 years as a level percentage-of-payroll. If the unfunded liability increases due to changes in benefits, assumptions, or methods, the statutory amortization date will be re-determined. Projected payroll is multiplied by 0.959 in the determination of the present value of future payroll to account for timing differences (as required by the Standards for Actuarial Work).

### Changes in Methods since Prior Valuation

There have been no changes in actuarial methods since the prior valuation.

# Actuarial Basis

## Summary of Actuarial Assumptions – Basic and Coordinated

The following assumptions were used in valuing the liabilities and benefits under the plan. All actuarial assumptions are prescribed by Minnesota Statutes, the Legislative Commission on Pensions and Retirement (LCPR), or the Board of Trustees. These parties are responsible for selecting the assumptions used for this valuation. Unless noted otherwise, the assumptions prescribed are based on the last experience study dated June 30, 2015. The Allowance for Combined Service Annuity assumptions are based on an analysis completed by the LCPR actuary and documented in a report dated October 2016.

Investment return	8.00% per annum.
Benefit increases after retirement	1.00% per annum through 2035 and 2.50% per annum thereafter.
Salary increases	Reported salary at valuation date increased according to the rate table, to current fiscal year and annually for each future year. Prior fiscal year salary is annualized for members with less than one year of service earned during the year.
Inflation	2.75% per year.
Payroll growth	3.50% per year.
Mortality rates	
Healthy pre-retirement	RP-2014 Employee Mortality Table, adjusted for white collar and mortality improvements using projection scale MP-2015, from a base year of 2014. Rates are set forward one year for males and set back one year for females.
Healthy post-retirement	RP-2014 Healthy Annuitant Mortality Table, adjusted for white collar and mortality improvements using projection scale MP-2015, from a base year of 2014. Rates are set forward two years for males. Female rates are multiplied by a factor of 0.90.
Disabled retirees	RP-2014 Disabled Mortality Table, adjusted for mortality improvements using projection scale MP-2015, from a base year of 2014. Rates are set forward one year for males and set forward six years for females.
	The RP-2014 employee mortality table as published by the Society of Actuaries (SOA) contains mortality rates for ages 18 to 80 and the annuitant mortality table contains mortality rates for ages 50 to 120. We have extended the annuitant mortality table as needed for members younger than age 50 who are receiving a benefit by deriving rates based on the employee table and the juvenile table. Similarly, we have extended the employee table as needed for members older than age 80 by deriving rates based on the annuitant table.
Retirement	Members retiring from active status are assumed to retire according to the age related rates shown in the tables. Members who have attained the highest assumed retirement age are assumed to retire in one year.
Withdrawal	Service-related rates based on experience; see table of sample rates.

# Actuarial Basis

## Summary of Actuarial Assumptions – Basic and Coordinated (Continued)

Disability	Age-related rates based on experience; see table of sample rates.
Allowance for combined service annuity	Liabilities for former members are increased by 15.0% for vested members and 3.0% for non-vested members to account for the effect of some participants having eligibility for a Combined Service Annuity.
Administrative expenses	Prior year administrative expenses expressed as percentage of prior year projected payroll.
Refund of contributions	Account balances accumulate interest until normal retirement dates at the rates described in the Summary of Plan Provisions and are discounted back to the valuation date. All employees withdrawing after becoming eligible for a deferred benefit take the larger of their contributions accumulated with interest or the value of their deferred benefit.
Commencement of deferred benefits	Members receiving deferred annuities (including current terminated deferred members) are assumed to begin receiving benefits at Normal Retirement.
Percentage married	80% of male and 70% of female active members are assumed to be married. Actual marital status is used for members in payment status.
Age of spouse	Males are assumed to have a beneficiary three years younger, while females are assumed to have a beneficiary two years older. For members in payment status, actual spouse date of birth is used, if provided.
Eligible children	Retiring members are assumed to have no dependent children.
Form of payment	<p>Married members retiring from active status are assumed to elect subsidized joint and survivor form of annuity as follows:</p> <p>Males:        10% elect 25% Joint &amp; Survivor option                          15% elect 50% Joint &amp; Survivor option                          10% elect 75% Joint &amp; Survivor option                          35% elect 100% Joint &amp; Survivor option</p> <p>Females:      10% elect 25% Joint &amp; Survivor option                          10% elect 50% Joint &amp; Survivor option                          5% elect 75% Joint &amp; Survivor option                          15% elect 100% Joint &amp; Survivor option</p> <p>Remaining married members and unmarried members are assumed to elect the Straight Life option.</p> <p>Members receiving deferred annuities (including current terminated deferred members) are assumed to elect a straight life annuity.</p>
Eligibility testing	Eligibility for benefits is determined based upon the age nearest birthday and service on the date the decrement is assumed to occur.
Decrement operation	Withdrawal decrements do not operate during retirement eligibility. Decrement are assumed to occur mid-fiscal year.
Service credit accruals	It is assumed that members accrue one year of service credit per year.

# Actuarial Basis

## Summary of Actuarial Assumptions – Basic and Coordinated (Continued)

---

Pay increases	Pay increases are assumed to happen at the beginning of the fiscal year. This is equivalent to assuming that reported earnings are pensionable earnings for the year ending on the valuation date.
---------------	--

---

Unknown data for certain members	<p>To prepare this report, GRS has used and relied on participant data supplied by the Fund. Although GRS has reviewed the data in accordance with Actuarial Standards of Practice No. 23, GRS has not verified or audited any of the data or information provided.</p> <p>In cases where submitted data was missing or incomplete, the following assumptions were applied:</p> <p><u>Data for active members:</u> There were 3,636 members reported with a salary less than \$100. We used prior year salary (2,452 members), if available; otherwise high five salary with a 10% load to account for salary increases (1,057 members). If neither prior year salary or high five salary was available, we assumed a value of \$35,000.</p> <p>There were also 2,339 members reported without a gender and 51 members reported with an invalid date of birth. We assumed a date of birth based on an entry age of 38 and female gender.</p> <p><u>Data for terminated members:</u> We calculated benefits for these members using the reported Average Salary and credited service. If Average Salary was not reported (186 members), we assumed a value of \$24,000. If credited service was not reported (141 members), we assumed credited service was elapsed time from hire to termination date (92 members); otherwise nine years. If termination date was invalid or not reported (116 members), we assumed the termination date was equal to hire date plus credited service; otherwise the valuation date unless they are noted as a pre-July 1, 1989 hire, then June 30, 1989. If reported termination date occurs prior to reported hire date, the two dates were swapped.</p> <p>There were 44 members reported with an invalid date of birth and 272 members reported without a gender. We assumed a date of birth of July 1, 1967 and female gender.</p> <p><u>Data for retired members:</u> There were 106 members reported without a gender. We assumed retirees are female and beneficiaries are male. There were 8 members reported with an invalid date of birth. We assumed a date of birth of July 1, 1945.</p> <p>There were 595 members that were active last year, and retirement eligible, and not on the retiree data file this year. At the direction of PERA, we included these members in the 2017 valuation as retirees with an estimated life only monthly benefit.</p>
----------------------------------	---

---

## Actuarial Basis

### Summary of Actuarial Assumptions – Basic and Coordinated (Continued)

---

Unknown data for certain members (Continued)	<u>Data for retired members (Continued):</u> Because PERA reclassifies disabled members as retirees once the member reaches Normal Retirement Age, we compare the members that PERA reports as retirees to our disabled group from the last valuation. If a member was disabled in the valuation, we reclassify that member as a disabled retiree in this year's valuation. We reclassified 2,142 retirees as disabled retirees in this valuation.
Changes in actuarial assumptions	<p>The Combined Service Annuity (CSA) loads were 0.8% for active members (0.2% for active MERF members) and 60.0% for vested and non-vested deferred member liability (30.0% for deferred MERF members). The revised CSA loads are now 0.0% for active member liability, 15.0% for vested deferred member liability, and 3.0% for non-vested deferred member liability.</p> <p>The assumed post-retirement benefit increase rate was changed from 1.00% per year through 2052 and 2.50% per year thereafter to 1.00% per year through 2035 and 2.50% per year thereafter.</p>

---

## Summary of Actuarial Assumptions - MERF

The following assumptions were used in valuing the liabilities and benefits under the plan for MERF members only. Assumptions regarding investment return, mortality, benefit increases, and Combined Service Annuity (CSA) are the same as shown in the Basic and Coordinated Plan assumption summary.

Salary increases	Total reported pay for prior calendar year increased 1.86% (half year of 3.75%, compounded) to prior fiscal year and 3.75% annually for each future year.
Retirement	Active members are assumed to retire at age 61, or immediately if currently age 61 or older.
Withdrawal	Rates are shown in rate table.
Disability	Age-related rates based on experience; see table of sample rates.
Commencement of deferred benefits	Members receiving deferred annuities (including current terminated deferred members) are assumed to begin receiving benefits at age 60.
Percentage married	66.67% of active members are assumed to be married. Actual marital status is used for members in payment status.
Age of spouse	Females are assumed to be three years younger than their male spouses. For members in payment status, actual spouse date of birth is used, if provided.
Eligible children	Retiring members are assumed to have no dependent children.
Form of payment	Members are assumed to elect a life annuity.
Unknown data for certain members	<p>To prepare this report, GRS has used and relied on participant data supplied by the Fund. Although GRS has reviewed the data in accordance with Actuarial Standards of Practice No. 23, GRS has not verified or audited any of the data or information provided.</p> <p>In cases where submitted data was missing or incomplete, the following assumptions were applied:</p> <p>There were no members with missing or invalid dates of birth.</p> <p><u>Data for active members:</u></p> <p>There were no active members with missing salary or service.</p> <p><u>Data for terminated members:</u></p> <p>Benefits were provided by PERA for five members. For the remaining members, we calculated benefits using the reported Average Salary, credited service and termination date from the 2016 valuation data file.</p> <p><u>Data for Retired members:</u></p> <p>There were no members reported with missing benefits. There was one member reported without a gender. We assumed male gender.</p>

## Summary of Plan Provisions - Basic

Following is a summary of the major plan provisions used in the valuation of this report. PERA is solely responsible for the validity, accuracy and comprehensiveness of this information. If any of the plan provisions shown below are not accurate and complete, the valuation results may differ significantly from those shown in this report and may require a revision of this report.

<b>Plan year</b>	July 1 through June 30				
<b>Eligibility</b>	A public employee who is not covered under the Social Security Act. General exceptions are employees covered by other public funds, certain part-time employees and full-time students under age 23.				
<b>Contributions</b>	Shown as a percent of salary:  <table><tr><td><u>Member</u></td><td>9.10% of salary</td></tr><tr><td><u>Employer</u></td><td>11.78% of salary</td></tr></table> Member contributions are “picked up” according to the provisions of Internal Revenue Code 414(h).	<u>Member</u>	9.10% of salary	<u>Employer</u>	11.78% of salary
<u>Member</u>	9.10% of salary				
<u>Employer</u>	11.78% of salary				
<b>Allowable service</b>	Service during which member contributions were made. May also include certain leaves of absence and military service.				
<b>Salary</b>	Includes amounts deducted for deferred compensation or supplemental retirement plans, net income from fees and sick leave payments funded by the employer. Excludes unused annual leaves and sick leave payments, severance payments, Workers’ Compensation benefits and employer-paid flexible spending accounts and employer-paid deferred compensation deposits, cafeteria plans, healthcare expense accounts, day-care expenses, fringe benefits and the cost of insurance coverage.				
<b>Average salary</b>	Average of the five highest successive years of annual salary. Average salary is based on all Allowable Service if less than five years.				
<b>Vesting</b>	Hired before July 1, 2010: 100% vested after 3 years of Allowable Service.  Hired after June 30, 2010: 100% vested after 5 years of Allowable Service. (Not applicable since all Basic members were hired before 1968.)				
<b>Retirement</b>					
<u>Normal retirement benefit</u>					
Age/service requirement	Age 65 and vested. Proportionate retirement annuity is available at age 65 and one year of Allowable Service.				
Amount	2.70% of Average Salary for each year of Allowable Service.				
<u>Early retirement benefit</u>					
Age/service requirement	(a.) Age 55 and vested. (b.) Any age with 30 years of Allowable Service. (c.) Rule of 90: Age plus Allowable Service totals 90.				

# Actuarial Basis

## Summary of Plan Provisions – Basic (Continued)

---

### Retirement (Continued)

#### Early retirement benefit (Continued)

Age/service  
requirement

The greater of (a) or (b):

Amount

(a.) 2.20% of Average Salary for each of the first ten years of Allowable Service and 2.70% of Average Salary for each subsequent year with reduction of 0.25% for each month if the Member is under age 65 at time of retirement and has less than 30 years of Allowable Service or if the Member is under age 62 and has 30 or more years of Allowable Service. No reduction if age plus years of Allowable Service totals 90.

(b.) 2.70% of Average Salary for each year of Allowable Service assuming augmentation to age 65 at 3.00% per year and actuarial reduction for each month the Member is under age 65.

Form of payment

Life annuity with return on death of any balance of contributions over aggregate monthly payments. Actuarially equivalent options are:

25%, 50%, 75% or 100% Joint and Survivor. If a Joint and Survivor benefit is elected and the beneficiary predeceases the annuitant, the annuitant's benefit increases to the Life Annuity amount. This "bounce back" is subsidized by the plan.

Benefit increases

Benefit recipients receive a future annual 1.00% post-retirement benefit increase. If the funding ratio reaches 90% for two consecutive years, the benefit increase will revert to 2.50%. If, after reverting to a 2.50% benefit increase, the funding ratio declines to less than 80% for one year or less than 85% for two consecutive years, the benefit increase will decrease to 1.00%.

A benefit recipient who has been receiving a benefit for at least 12 full months as of June 30 will receive a full increase. Members receiving benefits for at least one month but less than 12 full months as of June 30 will receive a pro rata increase. Members retired under laws in effect before July 1, 1973 receive an additional lump sum payment each year. In 1989, this lump sum payment is the greater of \$25 times each full year of Allowable Service or the difference between \$400 times each full year of Allowable Service and the sum of benefits paid from any Minnesota public pension plan plus cash payments from the Social Security Administration for the preceding fiscal year July 1, 1988 through June 30, 1989. In each following year, the lump sum payment will increase by the same percentage increase that is applied to regular annuities paid from the fund. Effective January 1, 2002, annual lump sum payment is divided by 12 and paid as a monthly life annuity in the annuity form elected.

# Actuarial Basis

## Summary of Plan Provisions – Basic (Continued)

---

<b>Disability</b>	
<u>Disability benefit</u>	
Age/service requirement	Total and permanent disability before normal retirement age if vested. Since all remaining active Basic members are over normal retirement age, none are eligible for disability benefits.
Amount	<p>Normal Retirement benefit based on Allowable Service and Average Salary at disability without reduction for commencement before Normal Retirement Age. Supplemental benefit of \$25 per month payable to the later of the normal retirement age or the five-year anniversary of commencement of disability. The disability benefit is reduced to that amount which, when added to Workers' Compensation, does not exceed the salary the disabled Member received as of the date of the disability or the salary currently payable for the same employment position substantially similar to the one the person held as of the date of the disability, whichever is greater.</p> <p>If a member becomes disabled prior to July 1, 1997 but did not commence his or her benefit before July 1, 1997, the benefit payable is calculated under the laws in effect at the time the Member became disabled and an actuarial increase shall be made for the change in the post-retirement interest rates from 5.00% to 6.00%.</p> <p>Payments stop earlier if disability ceases. If death occurs prior to age 65, or within five years of disability, the surviving spouse can receive a refund or a survivor benefit. Dependent children are entitled to dependent child benefits subject to the 70.00% family maximum. Payments revert to a retirement annuity at normal retirement age. Benefits may be reduced on resumption of partial employment.</p>
Form of payment	Same as for retirement.
Benefit increases	Same as for retirement.
<u>Retirement after disability</u>	
Age/service requirement	Normal retirement age
Amount	Any optional annuity continues. Otherwise, the larger of the disability benefit paid before normal retirement age or the normal retirement benefit available at normal retirement age, or an actuarially equivalent optional annuity.
Benefit increases	Same as for retirement.

---

# Actuarial Basis

## Summary of Plan Provisions - Basic (Continued)

---

### Death

#### Surviving spouse benefit

Age/service requirement

Active Member with 18 months of Allowable Service or while Member is receiving a disability benefit.

Amount

50.00% of salary averaged over last six months. Family benefit is maximum of 70.00% and minimum of 50.00% of average salary. Benefit paid until spouse's death but no payments while spouse is remarried prior to July 1, 1991.

If a member becomes deceased prior to July 1, 1997 and the beneficiary was not eligible to commence their survivor benefit as of July 1, 1997, the benefit payable is calculated under the laws in effect before July 1, 1997, and an actuarial increase shall be made for the change in the post-retirement interest rates from 5.00% to 6.00%.

Surviving spouse optional annuity may be elected in lieu of this benefit.

Benefit increases

Same as for retirement.

#### Surviving dependent children's benefit

Age/service requirement

Active Member with 18 months of Allowable Service or while Member is receiving a disability benefit.

Amount

10.00% of salary averaged over last six months for each child. Family benefit minimum (including spouse's benefit) of 50.00% of salary and maximum of 70.00% of average salary. Benefits paid until child marries, dies, or attains age 18 (age 22 if full-time student).

If a member becomes deceased prior to July 1, 1997 and the beneficiary was not eligible to commence their survivor benefit before July 1, 1997, the benefit payable is calculated under the laws in effect before July 1, 1997, and an actuarial increase shall be made for the change in the post-retirement interest rates from 5.00% to 6.00%.

Benefit increases

Same as for retirement.

---

# Actuarial Basis

## Summary of Plan Provisions - Basic (Continued)

---

<b>Death (Continued)</b>	
<u>Surviving spouse optional annuity</u>	
Age/service requirement	Member or former Member who dies before retirement benefits commence and other survivor annuity is waived by spouse.
Amount	<p>Survivor's payment of the 100% joint and survivor benefit the Member could have elected if terminated or an actuarial equivalent term certain annuity. If commencement is prior to age 65 (age 62 if 30 years of service), the benefit is reduced the same as early retirement with half the applicable reduction factor used from age 55 to the actual commencement age. If no surviving spouse, then an actuarial equivalent dependent child benefit is paid to age 20 or for five years if longer.</p> <p>If a member becomes deceased prior to July 1, 1997 and the beneficiary was not eligible to commence their survivor benefit as of July 1, 1997, the benefit payable is calculated under the laws in effect before July 1, 1997, and an actuarial increase shall be made for the change in the post-retirement interest rates from 5.00% to 6.00%.</p>
Benefit increases	Same as for retirement.
<u>Refund of contributions with interest</u>	
Age/service requirement	Member dies before receiving any retirement benefits and survivor benefits are not payable.
Amount	The excess of the Member's contributions with 6.00% interest until June 30, 2011; 4.00% interest thereafter over any disability or survivor benefits paid.

---

<b>Termination</b>	
<u>Refund of contributions</u>	
Age/service requirement	Termination of public service.
Amount	<p>If member terminated before July 1, 2011, member's contributions credited with 6% interest compounded annually prior to July 1, 2011 and 4% interest thereafter. If member terminated after June 30, 2011, member's contributions credited with 4% interest compounded annually.</p> <p>A deferred annuity may be elected in lieu of a refund if three or more years of Allowable Service.</p>

---

# Actuarial Basis

## Summary of Plan Provisions - Basic (Continued)

---

<b>Termination (Continued)</b>	
<u>Deferred benefit</u>	
Age/service requirement	Fully vested.
Amount	<p>Benefit computed under law in effect at termination and increased by the following "augmentation" percentage compounded annually for terminations prior to 2012:</p> <ul style="list-style-type: none"><li>(a.) 0.00% before July 1, 1971;</li><li>(b.) 5.00% from July 1, 1971 to January 1, 1981;</li><li>(c.) 3.00% thereafter until the earlier of January 1 of the year following attainment of age 55 and January 1, 2012;</li><li>(d.) 5.00% thereafter until the earlier of the date the annuity begins and January 1, 2012; and</li><li>(e.) 1.00% from January 1, 2012 thereafter.</li></ul> <p>Members who terminate after 2011 will receive no future augmentation.</p> <p>Members active with a public employer the day prior to the privatization of the employer become vested immediately and receive enhanced augmentation (unless the enhancement results in a net loss to the Plan). Amount is payable at a normal or early retirement. Augmentation equals 2.00% compounded annually, unless the enhancement results in a net loss to the Plan, in which case augmentation equals 1.00% compounded annually. If privatization occurred prior to January 1, 2011, augmentation occurs at the rate of 4.00% compounded annually through the year the Member turns age 55 and 6.00% thereafter until the annuity begins. If privatization occurred prior to January 1, 2007 (or January 1, 2008 for Hutchinson Area Health Care), augmentation occurs at the rate of 5.50% compounded annually through the year the Member turns age 55 and 7.50% thereafter until the annuity begins.</p> <p>If a member terminated employment prior to July 1, 1997 but was not eligible to commence their pension before July 1, 1997, the benefit payable is calculated under the laws in effect before July 1, 1997 and an actuarial increase shall be made for the change in the post-retirement interest rates from 5.00% to 6.00%.</p>
Form of payment	Same as for retirement.
<b>Optional form conversion factors</b>	Actuarially equivalent factors based on the RP-2000 mortality table for healthy annuitants, white collar adjustment, projected to 2025, females set back two years and no setback for males, blended 45% males, 7.50% post-retirement interest, and 8.50% pre-retirement interest.

## Summary of Plan Provisions - Coordinated

Following is a summary of the major plan provisions used in the valuation of this report. PERA is solely responsible for the validity, accuracy and comprehensiveness of this information. If any of the plan provisions shown below are not accurate and complete, the valuation results may differ significantly from those shown in this report and may require a revision of this report.

<b>Plan year</b>	July 1 through June 30	
<b>Eligibility</b>	A public employee who is covered under the Social Security Act. General exceptions are employees covered by other public funds, certain part-time employees and full-time students under age 23. City managers and persons holding certain elective office positions may choose to become Members.	
<b>Contributions</b>	Shown as a percent of salary:	
<u>Effective date</u>	<u>Member</u>	<u>Employer</u>
January 1, 2015	6.50%	7.50%
	Member contributions are "picked up" according to the provisions of Internal Revenue Code 414(h).	
<b>Allowable service</b>	Service during which member contributions are deducted. May also include certain leaves of absence and military service.	
<b>Salary</b>	Includes amounts deducted for deferred compensation or supplemental retirement plans, net income from fees and sick leave payments funded by the employer. Excludes unused annual leave and sick leave payments, severance payments, Workers' Compensation benefits and employer-paid flexible spending accounts and employer-paid deferred compensation deposits, cafeteria plans, healthcare expense accounts, day-care expenses, fringe benefits and the cost of insurance coverage.	
<b>Average salary</b>	Average of the five highest successive years of annual salary. Average salary is based on all Allowable Service if less than five years.	
<b>Vesting</b>	Hired before July 1, 2010: 100% vested after three years of Allowable Service.  Hired after June 30, 2010: 100% vested after five years of Allowable Service.	
<b>Retirement</b>		
<u>Normal retirement benefit</u>		
Age/service requirement	First hired before July 1, 1989:  (a.) Age 65 and vested.  (b.) Proportionate retirement annuity is available at age 65 and one year of Allowable Service.	
Amount	1.70% of Average Salary for each year of Allowable Service.	

# Actuarial Basis

## Summary of Plan Provisions – Coordinated (Continued)

### Retirement (Continued)

#### Normal retirement benefit

##### (Continued)

Age/service requirement

First hired after June 30, 1989:

- (a.) The greater of age 65 or the age eligible for full Social Security retirement benefits but no later than age 66 and vested.
- (b.) Proportionate Retirement Annuity is available at normal retirement age and one year of Allowable Service.

Amount

1.70% of Average Salary for each year of Allowable Service.

#### Early retirement benefit

Age/service requirement

First hired before July 1, 1989:

- (a.) Age 55 and vested.
- (b.) Any age with 30 years of Allowable Service.
- (c.) Rule of 90: Age plus Allowable Service totals 90.

First hired after June 30, 1989:

- (a.) Age 55 and vested.

Amount

First hired before July 1, 1989:

The greater of (a) or (b):

- (a.) 1.20% of Average Salary for each of the first ten years of Allowable Service and 1.70% of Average Salary for each subsequent year with reduction of 0.25% for each month the Member is under age 65 at time of retirement or under age 62 if 30 years of Allowable Service. No reduction if age plus years of Allowable Service totals 90.
- (b.) 1.70% of Average Salary for each year of Allowable Service assuming augmentation to age 65 at 3.00% per year and actuarial reduction for each month the Member is under age 65.

First hired after June 30, 1989:

- (a.) 1.70% of Average Salary for each year of Allowable Service assuming augmentation to normal retirement age at 3.00% per year (2.50% if hired after June 30, 2006) and actuarial reduction for each month the Member is under normal retirement age.

Form of payment

Life annuity with return on death of any balance of contributions over aggregate monthly payments. Actuarially equivalent options are:

25%, 50%, 75% or 100% Joint and Survivor. If a Joint and Survivor benefit is elected and the beneficiary predeceases the annuitant, the annuitant's benefit increases to the Life Annuity amount. This "bounce back" is subsidized by the plan.

# Actuarial Basis

## Summary of Plan Provisions – Coordinated (Continued)

---

### Retirement (Continued)

#### Benefit increases

Benefit recipients receive a future annual 1.00% post-retirement benefit increase. If the funding ratio reaches 90% for two consecutive years, the benefit increase will revert to 2.50%. If, after reverting to a 2.50% benefit increase, the funding ratio declines to less than 80% for one year or less than 85% for two consecutive years, the benefit increase will decrease to 1.00%.

A benefit recipient who has been receiving a benefit for at least 12 full months as of June 30 will receive a full increase. Members receiving benefits for at least one month but less than 12 full months as of June 30 will receive a pro rata increase.

Members retired under laws in effect before July 1, 1973 receive an additional lump sum payment each year. In 1989, this lump sum payment is \$25 times each full year of Allowable Service. In each following year, the lump sum payment will increase by the same percentage increase that is applied to regular annuities paid from the fund.

---

### Disability

#### Disability benefit

Age/service requirement

Total and permanent disability before normal retirement age if vested.

Amount

Normal Retirement benefit based on Allowable Service and Average Salary at disability without reduction for commencement before normal retirement age. The disability benefit is reduced to that amount which, when added to Workers' Compensation, does not exceed the salary the disabled Member received as of the date of the disability or the salary currently payable for the same employment position substantially similar to the one the person held as of the date of the disability, whichever is greater.

If a Member becomes disabled prior to July 1, 1997 but did not commence his or her benefit before July 1, 1997, the benefit payable is calculated under the laws in effect before July 1, 1997, and an actuarial increase shall be made for the change in the post-retirement interest rates from 5.00% to 6.00%.

Payments stop if disability ceases or death occurs. Payments change to a retirement annuity at normal retirement age. Benefits may be reduced on resumption of partial employment.

Form of payment

Same as for retirement.

Benefit increases

Same as for retirement.

---

# Actuarial Basis

## Summary of Plan Provisions – Coordinated (Continued)

---

<b>Disability (Continued)</b>	
<u>Retirement after disability</u>	
Age/service requirement	Normal retirement age.
Amount	Any optional annuity continues. Otherwise, the larger of the disability benefit paid before normal retirement age or the normal retirement benefit available at normal retirement age, or an actuarially equivalent optional annuity.
Benefit increases	Same as for retirement.

---

<b>Death</b>	
<u>Surviving spouse optional annuity</u>	
Age/service requirement	Member or former Member who dies before retirement or disability benefits commence.
Amount	<p>Survivor's payment of the 100% joint and survivor benefit the Member could have elected if terminated or an actuarial equivalent term certain annuity. If commencement is prior to age 65 (age 62 if 30 years of service), the benefit is reduced the same as early retirement with half the applicable reduction factor used from age 55 to the actual commencement age. If no surviving spouse, then an actuarial equivalent dependent child benefit is paid to age 20 or for five years if longer.</p> <p>If a member becomes deceased prior to July 1, 1997 and the beneficiary was not eligible to commence their survivor benefit before July 1, 1997, the benefit payable is calculated under the laws in effect before July 1, 1997, and an actuarial increase shall be made for the change in the post-retirement interest rates from 5.00% to 6.00%.</p>
Benefit increases	Same as for retirement.
<u>Refund of contributions</u>	
Age/service requirement	Member dies before receiving any retirement benefits and survivor benefits are not payable.
Amount	The excess of the Member's contributions with 6.00% interest until June 30, 2011; 4.00% interest thereafter over any disability or survivor benefits paid.

---

<b>Termination</b>	
<u>Refund of contributions</u>	
Age/service requirement	Termination of public service.
Amount	<p>If member terminated before July 1, 2011, member's contributions credited with 6% interest compounded annually prior to July 1, 2011 and 4% interest thereafter. If member terminated after June 30, 2011, member's contributions credited with 4% interest compounded annually.</p> <p>A deferred annuity may be elected in lieu of a refund if vested.</p>

---

# Actuarial Basis

## Summary of Plan Provisions – Coordinated (Continued)

---

<b>Termination (Continued)</b>	
<u>Deferred benefit</u>	
Age/service requirement	Fully vested.
Amount	<p>Benefit computed under law in effect at termination and increased by the following percentage (augmentation) compounded annually for terminations prior to 2012:</p> <ul style="list-style-type: none"><li>(a.) 0.00% before July 1, 1971;</li><li>(b.) 5.00% from July 1, 1971 to January 1, 1981;</li><li>(c.) 3.00% (2.50% if hired after June 30, 2006) thereafter until the earlier of January 1 of the year following attainment of age 55 and January 1, 2012;</li><li>(d.) 5.00% (2.50% if hired after June 30, 2006) thereafter until the earlier of the date the annuity begins and January 1, 2012; or</li><li>(e.) 1.00% from January 1, 2012 to when the benefit begins.</li></ul> <p>Members who terminate after 2011 will receive no future augmentation.</p> <p>Members active with a public employer the day prior to the privatization of the employer become vested immediately and receive enhanced augmentation (unless the enhancement results in a net loss to the Plan). Amount is payable at a normal or early retirement. Augmentation equals 2% compounded annually, unless the enhancement results in a net loss to the Plan, in which case augmentation equals 1.00% compounded annually. If privatization occurred prior to January 1, 2011, augmentation occurs at the rate of 4.00% compounded annually through the year the Member turns age 55 and 6.00% thereafter until the annuity begins. If privatization occurred prior to January 1, 2007 (or January 1, 2008 for Hutchinson Area Health Care), augmentation occurs at the rate of 5.50% compounded annually through the year the Member turns age 55 and 7.50% thereafter until the annuity begins.</p> <p>If a member terminated employment prior to July 1, 1997 but was not eligible to commence their pension before July 1, 1997, the benefit payable is calculated under the laws in effect before July 1, 1997 and an actuarial increase shall be made for the change in the post-retirement interest rates from 5.00% to 6.00%.</p>
Form of payment	Same as for retirement.
<b>Actuarial equivalent factors</b>	Actuarially equivalent factors based on the RP-2000 mortality table for healthy annuitants, white collar adjustment, projected to 2025, females set back two years and no setback for males, blended 45% males, 7.50% post-retirement interest and 8.50% pre-retirement interest. The post-retirement interest rate will change to 6.50% on the earlier of the effective date of the next mortality adjustment or July 1, 2017.

---

# Actuarial Basis

## Summary of Plan Provisions – Coordinated (Concluded)

---

<b>Combined service annuity</b>	<p>Members are eligible for combined service benefits if they:</p> <ul style="list-style-type: none"><li>(a.) Meet minimum retirement age for each plan participated in and total public service meets the vesting requirements of each plan; or</li><li>(b.) Have three or more years of service under PERA and the covered fund(s) (if hired prior to July 1, 2010).</li></ul> <p>Other requirements for combined service include:</p> <ul style="list-style-type: none"><li>(a.) Member must have at least six months of allowable service credit in each plan worked under; and</li><li>(b.) Member may not be in receipt of a benefit from another plan.</li></ul> <p>Members who meet the above requirements must have their benefit based on the following:</p> <ul style="list-style-type: none"><li>(a.) Allowable service in all covered plans are combined in order to determine eligibility for early retirement.</li><li>(b.) Average salary is based on the high five consecutive years during their entire service in all covered plans.</li></ul>
<b>Contribution stabilizer</b>	<p>The following is a summary of contribution stabilizer provisions in Minnesota Statute 353.27:</p> <ul style="list-style-type: none"><li>• If a contribution sufficiency of more than 1.00% exists, member and employer contributions may be adjusted by the Board of Directors to a level necessary to maintain a 1.00% sufficiency. Member and employer contributions may not be less than the sum of normal cost and administrative expenses.</li><li>• If a contribution deficiency of at least 0.50% exists, the member and employer contribution rates may be increased by the Board of Directors to eliminate the deficiency.</li><li>• Any adjustment to the contribution rates must be reported to the Legislative Commission on Pensions and Retirement (LCPR) by January 15 following the most recent valuation report. If the LCPR does not recommend against or alter the change in rates, the adjustment becomes effective on the salary paid after the next January 1st.</li></ul>
<b>Changes in plan provisions</b>	<p>There have been no changes in plan provisions since the previous valuation.</p>

## Summary of Plan Provisions of Minneapolis Employees Retirement Fund (MERF)

Following is a summary of the major plan provisions used in the valuation of this report. PERA is solely responsible for the validity, accuracy and comprehensiveness of this information. If any of the plan provisions shown below are not accurate and complete, the valuation results may differ significantly from those shown in this report and may require a revision of this report.

<b>Plan year</b>	July 1 through June 30																				
<b>Eligibility/employee rule</b>	<p>An employee of the City of Minneapolis, the Metropolitan Airports Commission, the Met Council/Environmental Services, the Municipal Employees Retirement Fund, and Special School District No. 1 if covered prior to July 1, 1978. Employees covered July 1, 1978 or later are covered by the Public Employees Retirement Association (PERA) Plan.</p> <p>Effective July 1, 1992, licensed peace officers and firefighters who are employed by the Metropolitan Airports Commission and covered by the Minneapolis Employees Retirement Fund will receive the greater of retirement, disability, or survivor benefits under:</p> <p>a) The Minneapolis Employees Retirement Fund; or</p> <p>b) The Public Employees Retirement Association (PERA) Police &amp; Fire Plan.</p>																				
<b>Full consolidation</b>	The MERF Division fully merged with PERA's General Employees Retirement Plan, effective January 1, 2015. Upon consolidation, state and employer contributions were revised as shown herein.																				
<b>Contributions</b>																					
Member	9.75% of salary																				
Employer	9.75% of salary (Employer Regular Contributions)																				
	Employer Regular and Additional Contributions will be paid as long as there are active members.																				
	Employer Supplemental Contribution equals \$21,000,000 in calendar years 2017 and 2018 and \$31,000,000 in calendar years 2019 to 2031.																				
<b>Contribution allocation</b>	Employer Supplemental Contributions are allocated to the employers in proportion to their share of the actuarial accrued liability of MERF on July 1, 2009, as follows:																				
	<table border="1"> <thead> <tr> <th>Employer</th> <th>Allocation</th> </tr> </thead> <tbody> <tr> <td>City of Minneapolis</td> <td>54.78%</td> </tr> <tr> <td>Minneapolis Park Board</td> <td>10.33%</td> </tr> <tr> <td>Met Council</td> <td>1.74%</td> </tr> <tr> <td>Metropolitan Airport Commission</td> <td>5.76%</td> </tr> <tr> <td>Municipal Building Commission</td> <td>1.08%</td> </tr> <tr> <td>Minneapolis School District No. 1</td> <td>23.04%</td> </tr> <tr> <td>Hennepin County</td> <td>3.17%</td> </tr> <tr> <td>MnSCU</td> <td>0.10%</td> </tr> <tr> <td>Total</td> <td>100.00%</td> </tr> </tbody> </table>	Employer	Allocation	City of Minneapolis	54.78%	Minneapolis Park Board	10.33%	Met Council	1.74%	Metropolitan Airport Commission	5.76%	Municipal Building Commission	1.08%	Minneapolis School District No. 1	23.04%	Hennepin County	3.17%	MnSCU	0.10%	Total	100.00%
Employer	Allocation																				
City of Minneapolis	54.78%																				
Minneapolis Park Board	10.33%																				
Met Council	1.74%																				
Metropolitan Airport Commission	5.76%																				
Municipal Building Commission	1.08%																				
Minneapolis School District No. 1	23.04%																				
Hennepin County	3.17%																				
MnSCU	0.10%																				
Total	100.00%																				

## Actuarial Basis

### Summary of Plan Provisions of Minneapolis Employees Retirement Fund (MERF) (Continued)

---

<b>State contributions</b>	The State's contribution equals \$16,000,000 in 2017 and 2018, and \$6,000,000 thereafter.  The State's contributions are payable by September 30 each year and end on September 15, 2031.
<b>Allowable service</b>	Service during which member contributions were made. Allowable Service may also include certain leaves of absence, military service and service prior to becoming a member. Allowable service also includes time on duty disability provided that the member returns to active service if the disability ceases.
<b>Salary</b>	All amounts of salary, wages or compensation.
<b>Average salary</b>	Average of the five highest calendar years of salary out of the last ten calendar years.
<b>Retirement</b>	
<u>Normal retirement benefit</u>	
Age/service requirement	Age 60 and 10 years of employment. Any age with 30 years of employment. Proportionate retirement annuity is available at age 65 and one year allowable service.
Amount	2.00% of average salary for the first 10 years of allowable service plus 2.50% of average salary for each subsequent year of allowable service.

---

# Actuarial Basis

## Summary of Plan Provisions of Minneapolis Employees Retirement Fund (MERF) (Continued)

---

<b>Disability</b>	
<u>Disability benefit</u>	
Age/service requirement	Total and permanent disability before age 60 with five years of allowable service, or no allowable service if a work-related disability.
Amount	2.00% of average salary for the first 10 years of disability service plus 2.50% of average salary for each subsequent year of disability service. Disability service is the greater of (a) or (b) where:  (a.) equals allowable service plus service projected to age 60, subject to a maximum of 22 years, and (b.) equals allowable service.  Benefit is reduced by Workers' Compensation benefits.  Payments stop at age 60 or earlier if disability ceases or death occurs. Benefits may be reduced on resumption of partial employment.
<u>Disability after separation</u>	
Age/service requirement	Total and permanent disability after electing to receive a retirement benefit but before age 60.
Amount	Actuarial equivalent of total credit to member's account.
<u>Retirement after disability</u>	
Age/service requirement	Total and permanent disability after electing to receive a retirement benefit but before age 60. Employee is still disabled after age 60.
Amount	Benefit continues according to the option selected.

---

# Actuarial Basis

## Summary of Plan Provisions of Minneapolis Employees Retirement Fund (MERF) (Continued)

---

### Death

#### Pre-retirement survivor's

##### spouse benefit

Age/service  
requirement

Active member with 18 months of allowable service.

Amount

30% of salary averaged over the last six months to the surviving spouse plus 10% of salary averaged over the last six months to each surviving child. Maximum benefit is \$900 per month.

#### Pre-retirement survivor's

##### spouse annuity

Age/service  
requirement

Active member or former member who dies before retirement with 20 years of allowable service.

Amount

Actuarial equivalent of a single life annuity which would have been paid as a retirement benefit on the date of death without regard to eligibility age for retirement benefit. If there is no surviving spouse, the designated beneficiary may be a dependent child or dependent parent.

#### Refund of accumulated city contributions

Age/service  
requirement

Active member or former member dies after 10 years of allowable service and prior to retirement.

Amount

Present value of the City's annual installments of \$60 or, in the case of a former member, the net accumulation of city deposits. This benefit is not payable if survivor's benefits are paid.

#### Lump sum

Age/service  
requirement

Death prior to service or disability retirement without an eligible surviving beneficiary.

Amount

\$750 with less than 10 years allowable service, or \$1,500 with 10 or more years of allowable service.

#### Refund of member contributions at death

Age/service  
requirement

Active member or former member dies before retirement.

Amount

The excess of the member's contributions (exclusive of the contributions to the survivor's account) plus interest to the date of death.

---

# Actuarial Basis

## Summary of Plan Provisions of Minneapolis Employees Retirement Fund (MERF) (Concluded)

---

<b>Termination</b>	
<u>Deferred benefit</u>	
Age/service requirement	Three years of allowable service.
Amount	Benefit computed under law in effect at termination and increased by the following percentage (augmentation), compounded annually:  (a.) 0.00% prior to July 1, 1971, (b.) 5.00% from July 1, 1971 to January 1, 1981, and (c.) 3.00% thereafter until the annuity begins.  Amount is payable at or after age 60.
<u>Refund of member contributions upon termination</u>	
Age/service requirement	Termination of public service.
Amount	Member's contributions with interest. A deferred annuity may be elected in lieu of a refund if vested.

---

<b>Form of payment</b>	<ul style="list-style-type: none"><li>▪ Life annuity.</li><li>▪ Life annuity with 3, 5, 10 or 15 years guaranteed.</li><li>▪ Life annuity with lump sum death benefit.</li><li>▪ Joint &amp; Survivor (with or without bounce back feature).</li></ul>
------------------------	--

---

<b>Optional form conversion factors</b>	1986 PET mortality table with a one-year setback, blended 50% male and 50% female, and 5% interest.
---	---

---

<b>Two dollar bill and annuity</b>	Optional Two Dollar Bill money purchase annuity available at age 55 with 20 years of service if member had service prior to June 28, 1973. According to PERA, this option is rarely utilized. We have assumed that remaining active members will not elect this optional benefit.
------------------------------------	---

---

<b>Benefit increases</b>	Benefit recipients receive future annual 1.00% benefit increases. If the accrued liability funding ratio of the General Employees Retirement Plan reaches 90% (on a market value of assets basis) for two consecutive years, the benefit increase will change to 2.50%. If, after reverting to a 2.50% benefit increase, the funding ratio declines to less than 80% for one year or less than 85% for two consecutive years, the benefit increase will decrease to 1.00%.
--------------------------	--

---

<b>Changes in plan provisions</b>	The Employer Supplemental Contribution changed from \$21,000,000 to \$31,000,000 in calendar years 2019 to 2031. The state's contribution changed from \$16,000,000 to \$6,000,000 in calendar years 2019 to 2031.
-----------------------------------	--

---

2018	16.18					

<sup>1</sup> Information prior to 2012 provided by prior actuary. See prior reports for additional detail.

<sup>2</sup> Includes contributions from other sources (if applicable).

<sup>3</sup> Assumed equal to actual member contributions divided by 6.125%.

<sup>4</sup> Assumed equal to actual member contributions divided by 6.25%.

<sup>5</sup> Assumed equal to actual member contributions divided by 6.375%.

<sup>6</sup> Assumed equal to actual member contributions divided by 6.500%.

## Glossary of Terms

<b><i>Accrued Benefit Funding Ratio</i></b>	The ratio of assets to Current Benefit Obligations.
<b><i>Accrued Liability Funding Ratio</i></b>	The ratio of assets to Actuarial Accrued Liability.
<b><i>Actuarial Accrued Liability (AAL)</i></b>	The difference between the Actuarial Present Value of Future Benefits, and the Actuarial Present Value of Future Normal Costs.
<b><i>Actuarial Assumptions</i></b>	Assumptions about future plan experience that affect costs or liabilities, such as: mortality, withdrawal, disablement, and retirement; future increases in salary; future rates of investment earnings; future investment and administrative expenses; characteristics of members not specified in the data, such as marital status; characteristics of future members; future elections made by members; and other items.
<b><i>Actuarial Cost Method</i></b>	A procedure for allocating the Actuarial Present Value of Future Benefits between the Actuarial Present Value of future Normal Costs and the Actuarial Accrued Liability.
<b><i>Actuarial Equivalent</i></b>	Of equal Actuarial Present Value, determined as of a given date and based on a given set of Actuarial Assumptions.
<b><i>Actuarial Present Value (APV)</i></b>	The amount of funds required to provide a payment or series of payments in the future. It is determined by discounting the future payments with an assumed interest rate and with the assumed probability each payment will be made.
<b><i>Actuarial Present Value of Projected Benefits</i></b>	The Actuarial Present Value of amounts which are expected to be paid at various future times to active members, retired members, beneficiaries receiving benefits, and inactive, non-retired members entitled to either a refund or a future retirement benefit. Expressed another way, it is the value that would have to be invested on the valuation date so that the amount invested plus investment earnings would provide sufficient assets to pay all projected benefits and expenses when due.
<b><i>Actuarial Valuation</i></b>	The determination, as of a valuation date, of the Normal Cost, Actuarial Accrued Liability, Actuarial Value of Assets, and related Actuarial Present Values for a plan. An Actuarial Valuation for a governmental retirement system typically also includes calculations of items needed for compliance with GASB No. 25, such as the Funded Ratio and the Annual Required Contribution (ARC).
<b><i>Actuarial Value of Assets</i></b>	The value of the assets as of a given date, used by the actuary for valuation purposes. This may be the market or fair value of plan assets or a smoothed value in order to reduce the year-to-year volatility of calculated results, such as the funded ratio and the actuarially required contribution (ARC).

## Glossary of Terms (Continued)

<b><i>Amortization Method</i></b>	A method for determining the Amortization Payment. Under the Level Percentage-of-Pay method, the Amortization payment is one of a stream of increasing payments, whose Actuarial Present Value is equal to the UAAL. The stream of payments increases at the rate at which total covered payroll of all active members is assumed to increase.
<b><i>Amortization Payment</i></b>	That portion of the plan contribution or ARC which is designed to pay interest on and to amortize the Unfunded Actuarial Accrued Liability.
<b><i>Amortization Period</i></b>	The period used in calculating the Amortization Payment.
<b><i>Annual Required Contribution (ARC)</i></b>	The employer's periodic required contributions, expressed as a dollar amount or a percentage of covered plan compensation, determined under GASB No. 25. The ARC consists of the Employer Normal Cost and Amortization Payment.
<b><i>Augmentation</i></b>	Annual increases to deferred benefits.
<b><i>Closed Amortization Period</i></b>	A specific number of years that is reduced by one each year, and declines to zero with the passage of time. For example if the amortization period is initially set at 30 years, it is 29 years at the end of one year, 28 years at the end of two years, etc.
<b><i>Current Benefit Obligations</i></b>	The present value of benefits earned to the valuation date, based on current service and including future salary increases to retirement (comparable to a Projected Unit Credit measurement).
<b><i>Employer Normal Cost</i></b>	The portion of the Normal Cost to be paid by the employer. This is equal to the Normal Cost less expected member contributions.
<b><i>Expected Assets</i></b>	The present value of anticipated future contributions intended to fund benefits for current members.
<b><i>Experience Gain/Loss</i></b>	A measure of the difference between actual experience and that expected based upon a set of Actuarial Assumptions, during the period between two actuarial valuations. To the extent that actual experience differs from that assumed, Unfunded Actuarial Accrued Liabilities emerge which may be larger or smaller than projected. Gains are due to favorable experience, e.g., the assets earn more than projected, salaries do not increase as fast as assumed, members retire later than assumed, etc. Favorable experience means actual results produce actuarial liabilities not as large as projected by the actuarial assumptions. On the other hand, losses are the result of unfavorable experience, i.e., actual results that produce Unfunded Actuarial Accrued Liabilities which are larger than projected.

## Glossary of Terms (Concluded)

<b><i>GASB</i></b>	Governmental Accounting Standards Board.
<b><i>GASB No. 25 and GASB No. 27</i></b>	These are the governmental accounting standards that set the accounting rules for public retirement systems and the employers that sponsor or contribute to them. Statement No. 27 sets the accounting rules for the employers that sponsor or contribute to public retirement systems, while Statement No. 25 sets the rules for the systems themselves.
<b><i>GASB No. 50</i></b>	The accounting standard governing a state or local governmental employer's accounting for pensions.
<b><i>GASB No. 67 and GASB No. 68</i></b>	Statements No. 67 and No. 68, issued in June 2012, replace the requirements of Statements No. 25 and No. 27, respectively. Statement No. 68, effective for the fiscal year beginning July 1, 2014, sets the accounting rules for the employers that sponsor or contribute to public retirement systems, while Statement No. 67, effective for the fiscal year beginning July 1, 2013, sets the rules for the systems themselves. Accounting information prepared according to Statements No. 67 and No. 68 will be provided in a separate report.
<b><i>Normal Cost</i></b>	The annual cost assigned, under the Actuarial Cost Method, to the current plan year.
<b><i>Projected Benefit Funding Ratio</i></b>	The ratio of the sum of Actuarial Value of Assets and Expected Assets to the Actuarial Present Value of Projected Benefits. A Ratio less than 100% indicates that contributions are insufficient.
<b><i>Unfunded Actuarial Accrued Liability</i></b>	The difference between the Actuarial Accrued Liability and Actuarial Value of Assets.
<b><i>Valuation Date</i></b>	The date as of which the Actuarial Present Value of Future Benefits are determined. The benefits expected to be paid in the future are discounted to this date.
