The Board of Trustees
Missouri State Employees' Retirement System
907 Wildwood Drive
Jefferson City, MO 65109

Dear Board Members:

It is again with great pleasure that I submit this year's annual report of the Missouri State Employees' Retirement System (MOSERS).

Fiscal Year 2002 Highlights

Last fiscal year, MOSERS staff began work on the implementation of legislation that provided for a Deferred Retirement Option Provision (BackDROP) for general state employees, which became effective January 1, 2002. As of June 30, 2002, 308 members elected to retire utilizing the BackDROP feature and received \$19,162,726 in BackDROP payments.

Included in these totals were 198 members who chose to directly rollover \$12,739,639 of their payments into another qualified plan or IRA and eleven members who opted to receive their BackDROP payment in three annual installments with \$291,981 being paid in the current fiscal year and \$583,963 to be paid in the future. Additional information regarding the BackDROP option is included in this annual report and on our web site.

New federal legislation also went into effect January 1, 2002, that enabled members to directly rollover funds from their deferred compensation plan to purchase service credit in MOSERS. This resulted in a significant

increase in service purchases processed by MOSERS staff. For the six months ending June 30, 2002, MOSERS received \$3,243,763 for the purchase of service credit, and of that total, \$2,459,427 came from direct rollovers. For the same time period ending June 30, 2001, MOSERS only received \$901,369 for the purchase of service credit.

With the passage of Senate Bill 371 last year, a mandatory defined contribution plan for new "education employees" hired at the regional colleges and universities became effective July 1, 2002. Staff worked in conjunction with our external asset consultant, Summit Strategies, to conduct a formal search and hire a third-party administrator for the new plan. After a thorough search and complete review of investment offerings, educational programs, administrative capabilities, and costs, the Teachers Insurance & Annuity Association – College Retirement Equities Fund (TIAA-CREF) was selected from a competitive pool of candidates as the third-party administrator. Staff worked with TIAA-CREF and the regional colleges and universities throughout Missouri to implement this new plan and will continue to make refinements to the administration of the plan.

Report Contents and Structure

MOSERS is considered a component unit of the state of Missouri for financial reporting purposes and, as such, the financial statements contained in this report are also included in the *State of Missouri Comprehensive Annual Financial Report*. The financial information presented in this report is the responsibility of the management of MOSERS, and sufficient internal accounting controls exist to provide reasonable assurance regarding the safekeeping of assets and fair presentation of the financial statements, supporting schedules, and statistical tables. The report is also designed to comply with the reporting requirements of Sections 104.480, 104.1006, and 105.661 of the Revised Statutes of Missouri (RSMo) as amended. The report is divided into the following five sections:

- the **Introductory Section**, which contains general information regarding the operations of MOSERS.
- the **Financial Section**, which contains the financial statements, schedules, and supplementary financial information regarding the funds administered by MOSERS.
- the **Investment Section**, which contains information pertaining to the management of the investments of the Pension Trust Funds.
- the **Actuarial Section**, which contains information regarding the financial condition and financial position of the retirement plans administered by the system.
- the **Statistical Section**, which contains general statistical information regarding system participants and finances.

Summary of Financial Information

The following schedule is a summary of the Pension Trust Funds' additions and deductions for the years ended June 30, 2002, and June 30, 2001.

| | <u>June 30, 2002</u> | <u>June 30, 2001</u> |
|------------|-------------------------|-------------------------|
| Additions | \$ (113,571,787) | \$ 128,977,714 |
| Deductions | (291,085,249) | (239,464,885) |
| Net Change | <u>\$ (404,657,036)</u> | <u>\$ (110,487,171)</u> |

Additions decreased by \$242,549,501 primarily due to a decrease in net investment income of \$237,832,244. Deductions increased by \$51,620,364 primarily due to an increase of \$51,611,866 in benefit payouts for the year.

The following schedule is a summary of the revenues and expenses of the Internal Service Fund (insurance activity) for the years ended June 30, 2002, and June 30, 2001.

| | <u>June 30, 2002</u> | <u>June 30, 2001</u> |
|-----------------------|----------------------|----------------------|
| Operating revenues | \$ 25,190,197 | \$ 23,649,880 |
| Operating expenses | (25,192,940) | (23,596,435) |
| Nonoperating revenues | 47,767 | 81,717 |
| Net Change | <u>\$ 45,024</u> | <u>\$ 135,162</u> |

Operating revenues increased by \$1,540,317 primarily as a result of an increase in basic life premiums due to the increase in coverage, effective January 1, 2001. The basic life coverage afforded active employees increased from \$15,000 per employee to one times annual salary subject to a floor of \$15,000 of coverage. Likewise, operating expenses increased by \$1,596,505 primarily as a result of transmitting increased premiums to the insurance company, offset by a reduction of \$626,637 in the amount of premium refunds issued. In the fiscal year ended June 30, 2001, there was an unusually high volume of refunds issued as a result of the conversion from premiums paid in advance to premiums paid in arrears and the state of Missouri's conversion to a lag payroll system. The decrease in nonoperating revenues resulted primarily from a continuing decline in interest rates during the fiscal year.

Plan Financial Condition

The funding objective of MOSERS' Pension Trust Funds is to meet long-term benefit promises through contributions, which remain approximately level as a percent of member payroll over decades of time. Historical information relating to progress in meeting this objective is presented on pages 36-41. During the year ended June 30, 2002, the funded ratio of the Missouri State Employees' Plan, which covers 92,375 participants, decreased from 97% to 95.9%, primarily as the result of plan investment experience. The funded ratio of the Administrative Law Judges and Legal Advisors' Plan, which covers 102 participants, decreased from 85.7% to 83.5%, primarily as the result of plan investment experience. Funding of the Judicial Plan, which covers 838 participants, began on July 1, 1998. During the year ended June 30, 2002, the funded ratio of the Judicial Plan increased from 9.1% to 11.6%, primarily as the result of favorable experience in the aggregate. Additional information regarding the financial condition of the Pension Trust Funds can be found in the Actuarial Section of this report.

Investment Activity

MOSERS' investment portfolio produced a total return, net of expenses, of -6.2% for the year ended June 30, 2002. Even though the return was negative again this year, we are pleased that the MOSERS' investment policies in place have worked as intended. The policy benchmark return for the year was off by -8.8%, which indicates MOSERS' practices resulted in a +2.6% value added versus the markets for the year. The fund has achieved its goal of adding value over its policy benchmark and, for the longer term, has continued to exceed the actuarial target rate of a 5% real return. Additional information regarding the investment results for the year is included in the Investment Section of this report.

Legislation Enacted During the 2002

Legislative Session

On July 11, 2002, Governor Bob Holden signed into law HB 1455 – legislation that involved minor modifications to and clarifications of the Missouri State Employees' Plan, the Administrative Law Judges and Legal Advisors' Plan, and the Judicial Plan. These changes were designed to enable MOSERS to more effectively administer these plans as well as ease some of the administrative burden associated with members and their beneficiaries applying for and receiving benefits. There were no benefit increases enacted in the fiscal year ended June 30, 2002.

Certificate of Achievement for Excellence in Financial Reporting

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a *Certificate of Achievement for Excellence in Financial Reporting* to MOSERS for its Comprehensive Annual Financial Report (CAFR) for the fiscal year ended June 30, 2001. The Certificate of Achievement is a prestigious national award, recognizing conformance with the highest standards for preparation of state and local government financial reports. In order to be awarded a Certificate of Achievement, a governmental unit must publish an easily readable and efficiently organized CAFR conforming to program standards. The CAFR must satisfy both generally accepted accounting principles and applicable legal requirements. A Certificate of Achievement is valid for a period of one year only. MOSERS has received a Certificate of Achievement for the last thirteen consecutive years (fiscal years ended 1989-2001). We believe our current report continues to conform to the Certificate of Achievement program requirements, and we are submitting it to GFOA for evaluation.

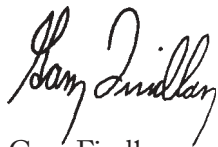

Conclusion

This report is a product of the combined efforts of the MOSERS' staff and advisors functioning under your leadership. It is intended to provide complete and reliable information, that will facilitate the management decision process; serve as a means for determining compliance with legal requirements; and allow for the evaluation of responsible stewardship of the funds of the system. As in the past, MOSERS received an unqualified opinion from our independent auditors on the financial statements included in this report. The opinion of the independent auditor can be found on page 18.

Copies of this report are provided to the Governor, State Auditor, Joint Committee on Public Employee Retirement of the General Assembly, and all state agencies. These agencies form the link between MOSERS and its members, and their cooperation contributes significantly to the success of MOSERS. We hope all recipients of this report find it informative and useful.

I would like to take this opportunity to express my gratitude to you, the staff, the advisors, and other people who have worked so diligently to assure the continued successful operation of the system.

Respectfully submitted,

Gary Findlay
Executive Director

Letter From The Chairman

September 26, 2002

Dear Members:

On behalf of the board of trustees, I am pleased to present the *MOSERS' Comprehensive Annual Financial Report* for the fiscal year ended June 30, 2002. This report provides information on the financial status of your retirement system while also highlighting significant changes that occurred during the year.

Your retirement system remains well funded and your promised benefits are secure despite the difficult investment environment and sluggish economy. Although the fund generated a loss of -6.2% net of expenses this fiscal year, it outperformed the policy benchmark by 2.6% – a small but welcomed feat in a very volatile investment market. The board policy of preserving system assets and maximizing the long-term growth of those assets through diversification will continue to be our primary focus as we move into the next fiscal year.

The board experienced some turnover this past year due to the retirements of Senator John Scott, and Steve Price, Director of House Appropriations. Mike Hartmann also resigned from the board after leaving his position as Commissioner of Administration to become

the Governor's Chief of Staff. On behalf of the board, staff and membership, I would like to express our collective thanks to these dedicated and experienced individuals for their many contributions to the system and for serving our membership so well. The board also welcomed Senator Ed Quick and Lori Strong-Goeke this year, and we look forward to serving and working with them.

In closing, I would like to thank the staff at MOSERS for continuing to maintain a high level of commitment and service to our plan participants. If you have any questions regarding this report, please contact us at MOSERS, PO Box 209, Jefferson City, MO 65102 or by calling 1-800-827-1063.

Sincerely,

A handwritten signature in cursive script, appearing to read "Bill Skaggs".

About MOSERS

MOSERS was established September 1, 1957, and is governed by laws of the state of Missouri.

Purpose

MOSERS provides retirement, survivor and disability benefits, and life insurance to its members.

MOSERS administers retirement benefits for most state employees, including members of the Missouri General Assembly, elected state officials, administrative law judges and legal advisors, and judges. MOSERS is responsible for administering the law in accordance with the expressed intent of the Missouri General Assembly and bears a fiduciary obligation to the state employees who are its members and beneficiaries.

MOSERS Mission

To play an integral role in the future financial security of plan participants by promptly and courteously delivering quality benefits and information which members value and trust through professional plan administration and prudent management of system assets.

Administration

State law provides that responsibility for the administration of MOSERS is vested in an eleven member board of trustees. The board is comprised of:

- Two members of the Senate appointed by the President Pro Tem of the Senate.
- Two members of the House of Representatives appointed by the Speaker of the House.
- Two members appointed by the Governor.
- The State Treasurer.
- The Commissioner of Administration.
- Three other members of the system: two active members elected by the active and terminated-vested members, and one retiree elected by the retired members.

The day-to-day management of MOSERS is delegated to the executive director who is appointed by the board and serves at its pleasure. The executive director acts as advisor to the board on all matters pertaining to the system and, contracts for professional services and employs the remaining staff needed to operate the system.

Organization

The executive director, deputy executive director - chief operations officer, and the deputy executive director - chief investment officer are responsible for planning, organizing, and administering the operations of the system under the broad policy guidance and direction of the board.

MOSERS' office is divided into eight administrative sections that perform specific functions for the system.

Executive Services

The executive services team provides administrative support by assisting the executive director and chief operations officer in the major legal, operational, and oversight functions of the retirement, benefit, and communication programs.

Accounting

This section is responsible for all financial records of the programs administered by MOSERS, including the preparation of financial and statistical reports. Accounting performs the purchasing functions for MOSERS and interfaces with the investment custodian, investment managers, Office of Administration accounting, various payroll/personnel departments, life insurance companies, actuaries, banks, and the IRS.

About MOSERS

Benefit Services

Benefit services is responsible for all contact with the membership regarding the benefit programs administered by MOSERS, which include retirement, life insurance, and long-term disability.

Communications

Communications is responsible for providing clearly written and attractively designed publications and educational seminars needed to inform all members about benefit programs administered by MOSERS. Communications and the information technology section are jointly responsible for MOSERS' web site.

Information Technology

Utilizing an IBM AS400 minicomputer and high-end work stations, information technology provides all computer and technical design support for MOSERS' data processing activities. This group is responsible for establishing and updating computer programs to implement plan changes and also maintains members' folder information on FileNet - an optical disk image system that allows information to be stored and processed using computer displayed images of original documents. Information technology is also responsible for administration of the personal computer network and the telephone system. Information technology and the communications section are jointly responsible for MOSERS' web site.

Investments

The primary functions of the investment staff are to provide internal investment management and consulting services to the board and the executive director. Other functions include hiring and terminating external investment managers, analyzing and rebalancing the overall asset allocation and portfolio, serving as a liaison to the investment community, and informing and advising the board and executive director on financial, economic, and political developments which may affect the system. The investments staff also works with the asset consultant and the executive director in selecting and monitoring external money managers. Information regarding the investment professionals who provide services to MOSERS can be found on pages 59-71 of the Investment Section.

Member Services

Member services is responsible for establishing and maintaining all membership records - including maintenance of the data on the electronic imaging system, balancing payroll deductions for insurance, and entering the payroll, service, and leave data into the system's computerized database.

Staff Services

Staff services provides clerical support, mail services, and general building maintenance for MOSERS' personnel. Human resources is also represented in this section.

Management's Responsibility for Financial Reporting

September 26, 2002

Management has prepared the basic financial statements of the Missouri State Employees' Retirement System (MOSERS), and is responsible for the integrity and fairness of the information presented. Some amounts included in the financial statements may be based on estimates and judgments. These estimates and judgments were made utilizing the best business practices available. The accounting policies followed in the preparation of these basic financial statements conform with generally accepted accounting principles. Financial information presented throughout the annual report is consistent with the basic financial statements.

Ultimate responsibility for the basic financial statements and annual report rests with the board of trustees. The executive director and the rest of MOSERS staff assist the board in its responsibilities. Systems of internal control and supporting procedures are maintained to provide assurance that transactions are authorized, assets safeguarded, and proper records maintained. These controls include standards in hiring and training of employees, the establishment of an organizational structure, and the communications of policies and guidelines throughout the organization. These internal controls are reviewed by internal audit programs. All internal audit reports are submitted to the board of trustees.

The system's external auditors, KPMG LLP, have conducted an independent audit of the basic financial statements in accordance with generally accepted auditing standards. This audit is described in their *Independent Audit Report* on page 18. Management has provided the external auditors with full and unrestricted access to MOSERS staff to discuss their audit and related findings as to the integrity of the plan's financial reporting and the adequacy of internal controls for the preparation of financial statements.

Independent Auditors' Report

August 16, 2002

The Board of Trustees
Missouri State Employees' Retirement System
907 Wildwood Drive
Jefferson City, MO 65109

Dear Board Members:

We have audited the accompanying basic financial statements of the Missouri State Employees' Retirement System, a component unit of the state of Missouri, as of and for the year ended June 30, 2002, as listed in the accompanying table of contents. These financial statements are the responsibility of the retirement system's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements of the Missouri State Employees' Retirement System's pension trust funds present fairly, in all material respects, the plan net assets as of June 30, 2002, and the related changes in plan net assets for the year then ended in conformity

with accounting principles generally accepted in the United States of America. Also in our opinion, the financial statements of the Missouri State Employees' Retirement System's Internal Service Fund present fairly, in all material respects, its financial position as of June 30, 2002, and the changes in its financial position and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

Our audit was conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The supplementary management discussion and analysis on pages 19-21 and the supplementary schedules of funding progress and employer contributions on pages 36-41 are not a required part of the basic financial statements of the Missouri State Employees' Retirement System, but are supplementary information required by the accounting principles generally accepted in the United States of America. The supplementary information included on pages 42-48 is presented for purposes of additional analysis and is not a required part of the basic financial statements of the Missouri State Employees' Retirement System. Such information, included on pages 19-21 and 36-48 has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

KPMG LLP

Required Supplementary Information Management Discussion and Analysis

The basic financial statements contained in this section of the Comprehensive Annual Financial Report consist of:

The *Statements of Plan Net Assets*, which reports the pension trust funds assets, liabilities, and resultant net assets where $\text{Assets} - \text{Liabilities} = \text{Net Assets}$ available at the end of the fiscal year. It can be thought of as a snapshot of the financial position of the pension trust funds of MOSERS at that specific point in time.

The *Statements of Changes in Plan Net Assets*, which reports the pension fund transactions that occurred during the fiscal year where $\text{Additions} - \text{Deductions} = \text{Net Change in Net Assets}$. It can be thought of as a movie that has recorded the action that occurred over the specified time period of a fiscal year, and supports the change that has occurred to the prior year's net asset value on the *Statements of Plan Net Assets*.

The *Balance Sheet* of the Internal Service Fund is similar to the *Statement of Net Assets* in that it also is a snapshot of the financial position of the Internal Service Fund where $\text{Assets} = \text{Liabilities} + \text{Net Assets}$.

The *Statement of Revenues, Expenses, and Changes in Net Assets* of the Internal Service Fund is similar to the *Statements of Changes in Plan Net Assets* in that it also reports the activity that occurred over the period of the fiscal year where $\text{Revenues} - \text{Expenses} = \text{Net Income}$ and supports the change to the prior year's net assets.

The *Statement of Cash Flows* of the Internal Service Fund reports the transactions for the fiscal year of the Internal Service Fund on a cash basis. It is similar to the *Statement of Revenues, Expenses, and Changes in Net Assets*, however, the focus of this statement is on the change to cash balances with accrued income and expense items eliminated.

The *Notes to the Financial Statements* are an integral part of the above financial statements and include additional information not readily evident in the statements themselves.

This *Required Supplementary Information and the Required Supplementary Information and Schedules* following the *Notes to the Financial Statements*, provide added historical and detailed information considered useful in evaluating the condition of the plans administered by MOSERS.

The following pages 20-21 contain summary comparative statements of MOSERS' pension trust funds and Internal Service Fund.

Pension Trust Funds
Summary Comparative Statements of Plan Net Assets

| | As of June 30, 2002 | As of June 30, 2001 | Percentage Change |
|--|-------------------------|-------------------------|----------------------|
| Cash and short-term investments | \$ 378,842,984 | \$ 84,964,687 | 345.88% |
| Receivables | 103,682,194 | 105,896,105 | (2.09) |
| Investments | 4,881,498,067 | 5,370,228,746 | (9.10) |
| Invested securities lending collateral | 1,008,874,150 | 1,177,002,348 | (14.28) |
| Fixed assets | 3,901,893 | 4,004,611 | (2.56) |

| Net assets end of year | <u>\$ 5,062,282,646</u> | <u>\$ 5,466,939,682</u> | (7.40)% |

The increase in cash and short-term investments was primarily a result of preparing for a new allocation model being implemented at the end of June 2002. Investments decreased due to a continuation of the general market downturn and the buildup of cash and short-term investments noted above. Payables for investment purchases increased primarily due to the end of June 2002 implementation of the new investment allocation.

The decrease in contributions was primarily attributable to a freeze on statewide salaries and employee attrition. The increase in the investment losses was attributable to the continuation of the general market decline noted in the prior year. Benefit payments increased as a result of a net increase in benefit recipients and the implementation of the BackDROP benefit payment feature on January 1, 2002.

During the fiscal year ended June 30, 2002, an error was discovered in the amount recorded as securities lending rebates for the fiscal year ended June 30, 2001. Rebates in the amount of \$4,068,350 were not recorded until fiscal year 2002 as a result of the transition of investment custodians at the end of fiscal year 2001. Although this error was not deemed to be material to the financial statements as a whole, when comparing the total net income from securities lending activities for fiscal years 2001 and 2002, those amounts would have been reported as \$5,835,058 and \$4,909,595, respectively.

| Cash balances beginning of year | 0 | 0 | 0.0 |
| Cash balances end of year | <u>\$ 0</u> | <u>\$ 0</u> | 0.0 % |

The decrease in premiums receivable was attributable to the state of Missouri's conversion from monthly to semi-monthly payrolls, one half of June monthly premiums were received in June. Likewise, the investments reported at June 30, 2002, increased over the previous year because the half-month of premiums were invested until paid to the insurance company in July. The decrease in other liabilities was primarily due to the timing of payments to the retirement funds for expenses allocated to the Internal Service Fund.

The decrease in premium refunds was attributable to the abnormally high volume of refunds noted in last year's report, which was a result of the conversion from premiums paid in advance to premiums paid in arrears at the time the state of Missouri converted to a lag payroll system. The decrease in investment income earned over the prior year was primarily attributable to the decrease in interest rates during the period.

The cash flow changes are primarily related to the timing of the premiums receipts and investment of those receipts noted above.

Notes to the Financial Statements

As of June 30, 2002

1. Plan Descriptions

Missouri State Employees' Plan (MSEP)

The MSEP is a single-employer, public employee retirement plan with two benefit structures known as the MSEP (closed plan) and MSEP 2000 (new plan) which are administered by the Missouri State Employees' Retirement System (MOSERS) in accordance with Sections 104.010 and 104.312 to 104.1215 of the Revised Statutes of Missouri (RSMo). As established under Section 104.320, RSMo, MOSERS is a body corporate and an instrumentality of the state. In the system are vested the powers and duties specified in sections 104.010 and 104.312 to 104.1215, RSMo and such other powers as may be necessary or proper to enable it, its officers, employees, and agents to carry out fully and effectively all the purposes of sections 104.010 and 104.312 to 104.1215, RSMo.

Responsibility for the operation and administration of the system is vested in the MOSERS Board of Trustees. Due to the nature of MOSERS' reliance on funding from the state of Missouri and the overall control of the plan document by the legislative and executive branches of state government, the MSEP is considered a component unit of the state of Missouri financial reporting entity and is included in the state's financial reports as a pension trust fund.

Generally, all full-time state employees hired before July 1, 2000, who were not covered under another state-sponsored retirement plan are eligible for membership in the closed plan. All full-time state employees hired on or after July 1, 2000, are eligible for membership in the new plan. Members in the closed plan have the option at retirement to choose between the benefit structure of the closed plan or new plan.

As of June 30, 2002, membership in the MSEP consisted of the following:

| | | |
|-----------------------------------|---------------|----------------------|
| Retirees and beneficiaries | | |
| currently receiving benefits | | 21,502 |
| Terminated employees entitled to, | | |
| but not yet receiving benefits | | 12,257 |
| Active: | | |
| Vested | 35,217 | |
| Nonvested | <u>23,399</u> | <u>58,616</u> |
| Total membership | | <u><u>92,375</u></u> |

The MSEP provides for retirement, survivor, and disability benefits.

MSEP (Closed Plan)

General state employees are fully vested for benefits upon receiving five years of credited service. Under the closed plan, general employees may retire with full benefits upon the earliest of attaining:

- Age 65 and active with 4 years of service
- Age 65 with 5 years of service
- Age 60 with 15 years of service
- Age 50 with age and service equaling 80 or more (Rule of 80)

General employees may retire early at age 55 with at least 10 years of service with reduced benefits.

The base benefit of the general employees in the closed plan is equal to 1.6% multiplied by the final average pay multiplied by years of credited service.

For members hired prior to August 28, 1997, cost-of-living adjustments (COLAs) are provided annually based on 80% of the change in the consumer price index (CPI) with a minimum rate of 4%, and maximum rate of 5%, until the cumulative amount of COLAs equals 65% of the original benefit. Thereafter, the 4% minimum rate is eliminated. For members hired on or after August 28, 1997, COLAs are provided annually based on 80% of the change in the CPI up to a maximum rate of 5%.

Qualified, terminated-vested members may make a one-time election to receive the present value of their benefit in a lump sum payment. To qualify, a member must have terminated with at least 5, but less than 10 years of service, be less than age 60, and have a benefit present value of less than \$10,000.

MSEP 2000 (New Plan)

General state employees are fully vested for benefits upon receiving five years of credited service. Under the new plan, general employees may retire with full benefits upon the earliest of attaining:

- Age 62 with 5 years of service
- Age 50 with age and service equaling 80 or more (Rule of 80)

General employees may retire early at age 57 with at least 5 years of service with reduced benefits.

The base benefit of the general employees in the new plan is equal to 1.7% multiplied by final average pay multiplied by years of credited service. For those retiring under Rule of 80, an additional temporary benefit equivalent to 0.8% multiplied by final average pay multiplied by years of credited service is payable until age 62.

COLAs are provided annually based on 80% of the change in the CPI up to a maximum rate of 5%.

For a more detailed summary of benefits for general employees and a description of benefits available to legislators and elected officials under MSEP, refer to the *Summary Plan Provisions* contained in the Actuarial Section of this report on page 96.

The state of Missouri is required to make all contributions to the MSEP. Prior to September 1, 1972, contributions by members were required. Accumulated employee contributions made prior to that time, plus interest through August 28, 1997, are refundable to the member or designated beneficiaries.

Administrative Law Judges and Legal Advisors' Plan (ALJLAP)

The ALJLAP is a single-employer, public employee retirement plan administered in accordance with Sections 287.812 to 287.856, RSMo. Responsibility for the operation and administration of the system is vested in the MOSERS Board of Trustees. Due to the nature of MOSERS' reliance on funding from the state of Missouri and the overall control of the plan document by the legislative and executive branches of state government, the ALJLAP is considered a component unit of the state of Missouri financial reporting entity and is included in the state's financial reports as a pension trust fund.

Individuals appointed or employed as administrative law judges or legal advisors in the Division of Workers' Compensation, members of the Labor and Industrial Relations Commission and their attorneys, the chairperson of the State Board of Mediation, and administrative hearing commissioners are eligible for membership in the ALJLAP.

On June 30, 2002, membership in the ALJLAP consisted of the following:

| | | |
|-----------------------------------|----|-----|
| Retirees and beneficiaries | | |
| currently receiving benefits | | 25 |
| Terminated employees entitled to, | | |
| but not yet receiving benefits | | 19 |
| Active: | | |
| Vested | 58 | |
| Nonvested | 0 | 58 |
| Total membership | | 102 |

The ALJLAP provides retirement, death, and disability benefits. Members are immediately eligible for benefits.

Under the ALJLAP, members may retire with full benefits upon the earliest of attaining:

- Age 62 with 12 years of service
- Age 60 with 15 years of service
- Age 55 with 20 years of service

Employees may retire early at age 65 with less than 12 years of service with a reduced benefit that is based upon years of service relative to 12 years.

In the ALJLAP, the base benefit for members with 12 or more years of service is equivalent to 50% of the average highest 12 consecutive months of salary.

For members hired prior to August 28, 1997, COLAs are provided annually based on 80% of the change in the CPI with a minimum rate of 4%, and maximum rate of 5%, until the cumulative amount of COLAs equals 65% of the original benefit. Thereafter, the 4% minimum rate is eliminated. For members hired on or after August 28, 1997, COLAs are provided annually based on 80% of the change in the CPI up to a maximum rate of 5%.

Qualified, terminated-vested members may make a one-time election to receive the present value of their benefit in a lump sum payment. To qualify, a member must have terminated with at least 5, but less than 10 years of service, be less than age 60, and have a benefit present value of less than \$10,000.

For a more detailed summary of benefits for members of the ALJLAP, refer to the *Summary Plan Provisions* contained in the Actuarial Section of this report on page 100.

The state of Missouri is required to make all contributions to the ALJLAP.

Judicial Plan

The Judicial Plan is a single-employer, public employee retirement plan administered in accordance with Sections 476.445 to 476.690, RSMo. Responsibility for the operation and administration of the Judicial Plan is vested in the MOSERS Board of Trustees. Due to the nature of MOSERS' reliance on funding from the state of Missouri and the overall control of the plan document by the legislative and executive branches of state government, the Judicial Plan is considered a component unit of the state of Missouri financial reporting entity and is included in the state's financial reports as a pension trust fund.

Judges and commissioners of the supreme court or the court of appeals, judges of the circuit court, probate court, magistrate court, court of common pleas, court of criminal corrections, or a justice of the peace, or a commissioner or

deputy commissioner of the circuit court appointed after February 29, 1972, are eligible for membership in the Judicial Plan.

On June 30, 2002, membership in the Judicial Plan consisted of the following:

| | | |
|-----------------------------------|-----|------------|
| Retirees and beneficiaries | | |
| currently receiving benefits | | 383 |
| Terminated employees entitled to, | | |
| but not yet receiving benefits | | 63 |
| Active: | | |
| Vested | 392 | |
| Nonvested | 0 | 392 |
| Total membership | | <u>838</u> |

The Judicial Plan provides retirement, death, and disability benefits. Members are immediately eligible for benefits.

Under the Judicial Plan, members may retire with full benefits upon the earliest of attaining:

- Age 62 with 12 years of service
- Age 60 with 15 years of service
- Age 55 with 20 years of service

Employees may retire early at age 62 with less than 12 years of service or age 60 with less than 15 years of service with a reduced benefit that is based upon years of service relative to 12 or 15 years.

In the Judicial Plan, the base benefit for members with 12 or more years of service is equivalent to 50% of the final average pay.

For members hired prior to August 28, 1997, COLAs are provided annually based on 80% of the change in the CPI with a minimum rate of 4%, and maximum rate of 5%, until the cumulative amount of COLAs equals 65% of the original benefit. Thereafter, the 4% minimum rate is eliminated. For members hired on or after August 28, 1997, COLAs are provided annually based on 80% of the change in the CPI up to a maximum rate of 5%.

Qualified, terminated-vested members may make a one-time election to receive the present value of their benefit in a lump sum payment. To qualify, a member must have terminated with at least 5, but less than 10 years of service, be less than age 60, and have a benefit present value of less than \$10,000.

For a more detailed summary of benefits for members of the Judicial Plan, refer to the *Summary Plan Provisions* contained in the Actuarial Section of this report on page 101.

Funding of the Judicial Plan on an actuarial basis began on July 1, 1998. The state of Missouri is required to make all contributions to the Judicial Plan.

Missouri State Insurance Plan

The Missouri State Insurance Plan is accounted for as an Internal Service Fund of the state of Missouri and is administered by MOSERS. It provides basic life insurance in an amount equal to one-times annual salary while actively employed (with a \$15,000 minimum) to the following:

- Eligible members of the MSEP (except employees of the Missouri Department of Conservation, and the state colleges and universities)
- Members of the ALJLAP
- Members of the Judicial Plan
- Certain members of the Public School Retirement System (PSRS)

The plan also provides duty-related death benefits, optional life insurance for active employees and retirees who are eligible for basic coverage, and a long-term disability plan for certain eligible members. For a more detailed description of insurance benefits, refer to *Life Insurance Plans* in the Actuarial Section of this report on page 102.

Due to the nature of MOSERS' reliance on funding from the state of Missouri and the overall control of the plan document by the legislative and executive branches of state government, the Missouri State Insurance Plan is considered a component unit of the state of Missouri financial reporting entity and is included in the state's financial reports as an Internal Service Fund.

2. Summary of Significant Accounting Policies and Plan Asset Matters

Basis of Accounting

The financial statements of the MSEP, the ALJLAP, the Judicial Plan, and the Missouri State Insurance Plan were prepared using the

accrual basis of accounting. Contributions are recognized as revenues in the period in which employee services are performed, and expenses are recorded when the corresponding liabilities are incurred, regardless of when contributions are received or payment is made. The direct method of reporting cash flows is used. For its proprietary activities, MOSERS applies all Financial Accounting Standards Board (FASB) statements and interpretations issued after November 30, 1989, except for those that conflict with or contradict Governmental Accounting Standards Board (GASB) pronouncements.

Cash

Cash balances represent both operating cash accounts held by the banks and investment cash on deposit with the investment custodian. To maximize investment income, the float caused by outstanding checks is invested, thus causing a possible negative book balance. The negative book balance has been reflected in the liabilities section of the balance sheet of the Internal Service Fund. The negative book balance has been included in the cash and short-term investments on the *Statements of Plan Net Assets* of the pension trust funds. The following is a schedule of the aggregate book and bank balances of all cash accounts. All deposits are fully insured by the Federal Deposit Insurance Corporation (FDIC). In addition to the FDIC insurance coverage on the accounts of MOSERS, the bank pledged the following securities to MOSERS on June 30, 2002, as collateral for overnight repurchase agreements:

- \$1,000,000 FFCB Discount Note (Maturity Date 07/01/2002)
- \$939,852 Small Business Association Pool # 505639 (Maturity Date 10/01/2011)
- \$1,105,086 Small Business Association Pool # 504889 (Maturity Date 01/25/2012)
- \$950,470 Small Business Association Pool # 503520 (Maturity Date 06/01/2016)
- \$978,015 Small Business Association Pool # 505528 (Maturity Date 12/01/2020)
- \$753,663 Small Business Association Pool # 504354 (Maturity Date 11/25/2023)

| | Cash Balances | |
|-----------------------|----------------------|-------------|
| | Book | Bank |
| Pension Trust Funds | \$(7,306,100) | \$2,167,942 |
| Internal Service Fund | \$(5,520) | \$366 |

Method Used to Value Investments

Investments of the pension trust funds and the Internal Service Fund are reported at fair value.

The schedule on the following page provides a summary of the fair values of the investments as reported on the *Statements of Plan Net Assets* of the Pension Trust Funds and *Balance Sheet* of the Internal Service Fund. Fair values for the equity real estate investments are based on appraisals. Fair values of the venture capital investments are based on valuations of the underlying companies of the limited partnerships. Fair value of the EAFE index fund is determined based on the underlying assets in the fund. The remaining assets are primarily valued by the investment custodian using the last trade price information supplied by various pricing data vendors. On June 30, 2002, the system did not have investments in any one organization, other than those issued by the U.S. government, which represented greater than 5% of plan net assets.

Categories of Asset Risks

All investments are governed primarily by an investment doctrine known as the prudent person rule. The prudent person rule, as set forth by state law, establishes a standard for all fiduciaries, which includes anyone who has authority with respect to the funds. The Governmental Accounting Standards Board Statement Number 3 requires disclosure of investment securities within the following three categories of custodial credit risk. Category 1 includes investments that are insured or registered or which are held by the system or its agent in the system's name. Category 2 includes uninsured and unregistered investments, which are held by the counterparty's trust departments or agent in the system's name. Category 3 includes uninsured and unregistered investments, which are held by the counterparty, its trust department, or agent but not in the system's name.

A security, for purposes of classification in the above categories, is a transferable financial instrument that evidences ownership or creditorship. Securities do not include investments made with another party, real estate, or direct investments in mortgages and other loans. Investments in open-end mutual funds, annuity contracts, and guaranteed investment contracts are also not considered securities for purposes of custodial credit risk classification. Such investments are shown as not subject to classification.

Derivatives

In accordance with its investment policy, MOSERS, through its external investment managers, holds investments in futures contracts, swap contracts, and forward foreign currency exchange contracts. The tables on pages 32-33 detail the various contracts in the portfolio as of June 30, 2002.

MOSERS does not anticipate additional significant market risk from the swap arrangements. Forward foreign currency exchange contracts are used primarily to hedge against changes in exchange rates related to foreign equities, primarily denominated in European and Asian currencies.

MOSERS could be exposed to risk if the counterparties to the contracts are unable to meet the terms of the contracts. MOSERS' investment managers seek to control this risk through counterparty credit evaluations and approvals, counterparty credit limits, and exposure monitoring

procedures. MOSERS anticipates that the counterparties will be able to satisfy their obligations under the contracts.

MOSERS invests in mortgage-backed securities which are reported at fair value in the *Statements of Plan Net Assets* and are based on the cash flows from interest and principal payments by the underlying mortgages. As a result, they are sensitive to prepayments by mortgagees, which may result from a decline in interest rates, thereby reducing the value of these securities.

Securities Lending Program

The board of trustees' investment policy permits the pension trust funds to participate in a securities lending program. Certain securities of the pension trust funds are loaned to participating brokers who provide collateral in the form of cash, U.S. Treasury or government agency securities, or letters of credit issued by approved banks. Collateral must be provided in the amount of 102% of market value for domestic loans and 105% of market value for international loans. Securities on loan at fiscal year end for cash collateral are presented as not subject to classification in the schedule on page 31; securities on loan for non-cash collateral are classified according to the category pertaining to the collateral. On June 30, 2002, MOSERS had no credit risk exposure to borrowers because the amounts MOSERS owes the borrowers exceed the amounts the borrowers owe MOSERS.

As of June 30, 2002, Credit Suisse/First Boston, New York Branch (CSFBNY), served as the agent for the fixed income securities lending program. In this capacity, CSFBNY lends the fixed income securities to a diverse group of dealers on behalf of MOSERS. Indemnification against dealer default is provided by CSFBNY, a "AA-rated" bank. As with each of MOSERS' securities lending programs, the majority of the fixed income loans are open loans and can be terminated on demand by either MOSERS or the borrower. Net income from the fixed income securities lending program is split on an 80/20 basis between MOSERS and CSFBNY respectively.

As of June 30, 2002, CSFB Corporation (CSFB Corp.), a broker-dealer, was the exclusive borrower of MOSERS' international equity securities. In this program MOSERS receives a fee from CSFB Corp. that is guaranteed by CSFBNY, the "AA-rated" parent bank. Guaranteed net income in this program is calculated as a fixed percentage of the international equity securities available for loan.

As of June 30, 2002, Lehman Brothers, a broker-dealer, was the exclusive borrower of the MOSERS' domestic equity securities. In this program, MOSERS receives a fixed annual fee from Lehman Brothers that is guaranteed. The guaranteed fee is renegotiated on a periodic basis to adjust for changes in the securities lending business climate.

Daily monitoring of securities that are on loan ensure proper collateralization levels and mitigate counterparty risk. Cash collateral from all three programs is commingled and invested in a separately managed short-term investment fund for MOSERS. This cash collateral fund is managed by CSFBNY. On June 30, 2002, the cash collateral fund had a market value of \$1,011,313,160 and a weighted average maturity of 25 days. For all of the securities lending operational services, the custodian is paid an annual fee, which is netted out against MOSERS' earnings in the securities lending programs managed by Lehman Brothers and CSFB.

During the fiscal year ended June 30, 2002, an error was discovered in the amount recorded as securities lending rebates for the fiscal year ended June 30, 2001. Rebates in the amount of \$4,068,350 were not recorded until fiscal year 2002 as a result of the transition of investment custodians at the end of fiscal year 2001. Although this error was not deemed to be material to the financial statements as a whole, when comparing the total net income from securities lending activities for fiscal years 2001 and 2002, those amounts would have been reported as \$5,835,058 and \$4,909,595, respectively.

Office Building, Equipment, and Fixtures

Office building, equipment, and fixtures are capitalized at cost when acquired. Improvements, which increase the useful life of the property, are capitalized. Maintenance and repairs are charged to expense as incurred. Depreciation is computed using the straight-line method over the estimated useful life of the related assets according to the following schedule:

- 5 years for furniture, fixtures, equipment
- 40 years for building

3. Contributions and Reserves

The MSEP, the ALJLAP, and the Judicial Plan are pension plans covering substantially all state of Missouri employees, administrative law judges and legal advisors in the Division of Workers' Compensation, and judges. The state of Missouri is obligated by state law to make all required contributions to the plans. The required contributions are expressed as a level percentage of covered payroll and are actuarially determined using an individual entry-age actuarial cost method. The unfunded accrued liabilities are amortized over a closed 33-year period. Costs of administering the plans are financed from the assets of the pension trust funds.

4. Other Post-employment Benefits (OPEB)

In addition to the retirement benefits provided through MOSERS, the state of Missouri also funds, either partially or in its entirety, OPEB for eligible retirees as follows:

Retiree Life Insurance

Members, who retire on or after October 1, 1985, are eligible for \$5,000 of state-sponsored, basic life insurance coverage if they retire directly from active employment. As of June 30, 2002, 10,822 retirees were eligible and participating in the program. The coverage is financed on a pay-as-you-go basis and is purchased as a group policy through competitive bids at a current cost of \$10.35 per month per eligible participant (\$1,283,090 for the year ended June 30, 2002). Premiums are paid entirely by the state as provided for by Section 104.515, RSMo.

Retirees of the Department of Labor and Industrial Relations (DOLIR), who retired prior to January 1, 1996, are eligible for state-sponsored life insurance coverage in the same

amount of coverage they were receiving through the DOLIR. As of June 30, 2002, 612 retirees were eligible and participating in the program. The coverage is financed on a pay-as-you-go basis and is purchased as a group policy through competitive bids at a current cost of \$2.07 per thousand dollars of coverage, per month, per eligible participant (\$69,549 for the year ended June 30, 2002). Premiums are paid entirely by the DOLIR as provided for by Section 228.225, RSMo. Retirees of the DOLIR who retired on or after January 1, 1996, are eligible for \$5,000 of state-sponsored life insurance coverage if they retire directly from active employment. They are included in the group described in the preceding paragraph.

5. Plan Termination

MOSERS and its related plans are administered in accordance with Missouri statutes. The statutes do not provide for termination of the plans under any circumstances.

6. Contingencies

Included in MOSERS' real estate investments is a property located in Kansas City, Missouri, which has been found to have hazardous substance contamination. MOSERS is currently participating in the Petroleum Storage Tank Insurance Fund administered by the Missouri Department of Natural Resources in order to delineate the scope and magnitude of the contamination and determine what appropriate remedial action is needed. Based on the available information, the system's management believes it is not reasonably possible to predict the amount of additional expense MOSERS may incur. Accordingly, no provision has been made in the accompanying financial statements for this matter.

Notes to the Schedules of Required Supplementary Information June 30, 2002

Actuarial Methods and Assumptions for Valuations Performed June 30, 2002

The entry-age actuarial cost method of valuation is used in determining liabilities and normal cost. Differences in the past between assumed experience and actual experience (actuarial gains and losses) become part of actuarial accrued liabilities. Unfunded, actuarial accrued liabilities are amortized to produce payments (principal and interest), which are expressed as a percent of payroll. A closed 33-year amortization period was used for the June 30, 2002, valuations. The actuarial value of assets is based on a method that fully recognizes expected investment return and averages unanticipated market return over a 5-year period. The investment return rate assumption used is 8.5% per year, compounded annually (net after investment expenses). The price inflation assumption used is 3.5% per year. Projected salary increase assumptions are based on 4% per year for wage inflation plus an additional 0% to 2.7% per year for the MSEP and 0% to 1.6% per year for the ALJLAP and the Judicial Plan (depending on age, attributable to seniority, and/or merit increases). The assumption used for annual post-retirement benefit increases is 4% (on a compound basis), when a minimum COLA of 4% is in effect, and 2.8% (on a compound basis), when no minimum COLA is in effect.

Factors That Have Significantly Affected Trends

1997 - During the year ended June 30, 1997, the MSEP experienced a net change of \$1,043,921,000 in the actuarial accrued liability. Of the change, \$660,195,000 was attributable to plan amendments, and \$53,365,000 was attributable to a change in actuarial assumptions.

During the year ended June 30, 1997, the ALJLAP experienced a net change of \$1,150,818 in the actuarial accrued liability. Of the change, \$1,055,550 was attributable to plan amendments.

During the year ended June 30, 1997, the Judicial Plan experienced a net change of \$35,738,463 in the actuarial accrued liability. Of the change, \$23,140,721 was attributable to plan amendments.

The actuarial valuations as of June 30, 1997, reflected the following changes to the computed contribution rates for fiscal year ending June 30, 1999.

| | <u>Amount</u> | <u>Percent of Payroll</u> |
|---|---------------|---------------------------|
| MSEP | | |
| Change in benefits and assumptions | \$ 44,188,842 | 3.25% |
| Experience and nonrecurring items | (14,548,326) | (1.07) |
| ALJLAP | | |
| Change in benefits and assumptions | 45,565 | 1.59 |
| Experience and nonrecurring items | (73,076) | (2.55) |
| Judicial Plan | | |
| First year for funding of benefits previously paid on a pay-as-you-go basis | 16,404,653 | 51.81 |

1998 - The actuarial valuations as of June 30, 1998, reflected the following changes to the computed contribution rates for fiscal year ending June 30, 2000.

| | <u>Amount</u> | <u>Percent of Payroll</u> |
|-----------------------------------|----------------|---------------------------|
| MSEP | | |
| Experience and nonrecurring items | \$ (9,780,072) | (0.67)% |
| ALJLAP | | |
| Experience and nonrecurring items | 39,290 | 1.40 |
| Judicial Plan | | |
| Experience and nonrecurring items | 684,614 | 2.11 |

1999 - The actuarial valuations as of June 30, 1999, reflected the following changes to the computed contribution rates for fiscal year ending June 30, 2001.

| | <u>Amount</u> | <u>Percent of Payroll</u> |
|-----------------------------------|---------------|---------------------------|
| MSEP | | |
| Change in benefits | \$ 6,258,206 | 0.40% |
| Experience and nonrecurring items | (11,264,771) | (0.72) |
| ALJLAP | | |

Chief Investment Officer's Report

Dear Members:

It is a privilege to present this year's Investment Section of the *MOSERS Comprehensive Annual Financial Report*. The following are a few MOSERS investment facts:

- As of June 30, 2002, MOSERS was one of the 200 largest defined benefit plans in the United States with total assets of just over \$5 billion.
- While the fund generated a return of -6.2% net of expenses for the year, on a relative basis the fund had a very good year, outperforming the policy benchmark by 2.6% and outperforming the S&P 500 by about 12%.
- During the year, the fund spent approximately \$10.0 million for management of the assets, which was approximately \$9.0 million less than the median fund in our peer group.
- MOSERS' internal investment department manages approximately \$1.6 billion in assets or about 32% of the fund. All of these internally managed portfolios have met or exceeded expectations, with very low management costs.
- In the last two years MOSERS has been able to generate a return of 5.2% per annum in excess of the return of our policy benchmark. In real dollars these results have produced an extra \$600 million for the fund that would not have been achieved had the assets been invested passively in index funds.

While most of the above mentioned facts are positive, on an absolute basis the fund has produced results of approximately -4.2% per annum for the last two years and it has not been pleasant for any of the fiduciaries who are responsible for investing your money.

Unfortunately, even with an extremely well diversified portfolio, losses on equities have been unavoidable given this bear market which, to date, has sent the S&P 500 down 18% during FY02 and down just over 30% over the last two years. (Please refer to our consultant's letter, immediately following my letter, for further information on just how bad the last two years have been for U.S. stocks.)

Given the tenacity of this bear market and its toll on our portfolio, I have developed a few questions that I would want answered if I were on the outside looking in, together with answers to those questions.

Is the retirement benefit that I have been promised in jeopardy?

The quick answer is no. Let me explain why. MOSERS is structured as a "defined benefit" plan. Notice the words "defined benefit," which means that your benefit is defined by law and the state of Missouri is responsible for seeing that the benefit promised to you is honored. As part of this promise, the state of Missouri bears the investment risk associated with investment of the assets that have been placed in the "MOSERS Trust" for the benefit of all state employees. What this means is that if our performance over five-year rolling periods does not meet or exceed the 8.5% assumed rate of return, then it is likely that the state will need to contribute more money to MOSERS on behalf of all state employees, all else being equal. On the other hand, if our performance is well above the assumed rate, then the contribution rate will likely fall. The point is

“in no way will your promised retirement benefit be impacted by what is happening in the markets.” Notice the distinct difference between what I just described and an investment you make on your behalf in a “defined contribution” plan such as an Individual Retirement Account (IRA) or the Missouri Deferred Compensation Plan. In a defined contribution plan, the individual participant bears the investment risk. Losses from any cause will directly affect the amount of money you have in your account for retirement.

If my MOSERS benefit is not impacted by the ups and downs of the financial markets, then why should I care how the pension fund performs?

I believe you might care for a couple of reasons. The first focuses on cause and effect. If MOSERS is able to achieve returns in excess of those being assumed, then, over time, the contribution rate that the state is required to make to fund promised benefits will fall. As this rate falls, money will be freed up in the state’s budget to pay for other employee benefits, other goods and services, or to be returned to the taxpayer. The decision regarding what happens to these excess funds rests ultimately with the lawmakers. On the flip side, if MOSERS is unable to achieve returns in excess of those being assumed, then, over time, the contribution rate will gradually increase. The bottom line is how the fund performs over long periods of time will have an impact on the state contribution rate to fund the plan that, in turn, will likely affect other budgetary items, some of which can directly impact employees.

The second reason you might care is to gain additional knowledge regarding how to take advantage of some of the various investment strategies MOSERS utilizes in building a very well diversified portfolio. One way to stay abreast of what we are doing and thinking is to check out the Investment Section of the MOSERS web site at www.mosers.org. There you will find recent and longer-term

performance information about our fund, the various managers we employ with links to their web sites, and last but not least, our investment newsletters called *Value Added*. These newsletters are developed to keep our board informed of new strategies we are evaluating as well as other timely topics.

How has the fund fared through this very difficult stretch for the equity markets?

We entered this bear market phase with roughly 75% of our portfolio in stocks. In hindsight, to state the obvious, we wish it had been lower. With that said, we have maintained a majority of the portfolio in stocks since the early 1990’s and, without a doubt, the fund is much better off as the result of such significant commitments to the U.S. equity market, inclusive of the poor performance in the last two years. As I mentioned earlier, on a relative basis, our portfolio did extremely well in the last two years, outperforming our policy benchmark by over \$600 million.

Our ten-year total return through June 30, 2002, was 9% per annum, inclusive of the last two years. This exceeds the 8.5% rate that is being assumed in determining the state’s contribution rate required to fund your benefits. MOSERS is focused on long-term results because many of the retirement promises that have been made will not be paid for 30 years or more. Because of our long-term focus, we do not need the majority of this money available immediately and can therefore assume more risk in an effort to achieve higher returns. While equity and equity-like investments are clearly more risky than investments in bonds, over long periods of time we believe that the fund will be compensated for accepting the additional risk.

In light of what has happened to the stock market in the last few years, what structural changes would you expect to see made in order to improve the investment results of the MOSERS’ portfolio going forward?

The decade of the 1990's was all about playing "offense." In investment terminology, playing offense is all about concentration, momentum, greed, global harmony, and companies beating analysts' expectations every quarter, whatever the cost. In this environment, buying and holding the riskiest assets (equities) was the answer. It is obvious that the decade of the 2000's has started in a much different fashion. So far, this decade has been one of playing "defense." Playing defense is all about diversification, valuation, cynicism, fear, war, and corporate fraud. In my letter last year, I talked of a huge pendulum and how its height at one extreme would likely dictate its height on the opposite side. The 1990's positive side swing was an extreme and to date it seems as though the negative side swing will be equally extreme.

For well over a year, we have been working with the MOSERS board to identify asset classes and strategies that will likely contribute to our efforts to diversify the portfolio, some of which will be more effective in a decade where "defense" rules the day. This effort, culminating in an asset liability study that was conducted in the fourth quarter of FY02 and presented to the board in late June 2002, resulted in the addition of several new asset classes to the MOSERS' portfolio, including timberland, real estate, distressed debt and private equity. While the specifics of how all of these pieces will fit together remains to be determined, I can, at this time, provide you with some of the philosophies behind these decisions that will guide our program into the future.

- Diversification is critical because the future is unknown.
 - Spend more time thinking about what can go wrong than what can go right.
 - Forecasting short-term market direction has a high likelihood of failure.
 - A big dose of humility is critical to long-term success.
 - Establish reasonable expectations; return expectations that are too high will promote equally high risk taking.

- Cycles are real and almost every type of investment goes through them.
 - High returns attract capital investments, which generate competition, which leads to lower future returns.
 - Low returns dissuade capital investment, which leads to divestiture, bankruptcies, and less competition, and inevitably better future returns.
 - Picking exact tops and bottoms in these cycles is very difficult, however, picking entry and exit points that are near these tops and bottoms is achievable more times than not.
- While valuation will not matter during some shorter periods of time, over longer periods of time it is one of the most important drivers of investment returns.
 - Try to avoid the big losers by requiring a large "margin of safety" in the analysis of valuation.
 - Don't get great companies confused with great investments.
 - Do homework and be prepared to live through periods where things move in directions other than as expected – because they certainly will.
- Be a contrarian and a skeptic.
 - Once you have asked every question imaginable -- ask five more.
 - There are no "Holy Grails" or "Silver Bullets" in investing.
 - Following the herd is easy, but it usually leads to the slaughterhouse.
 - What the wise person does in the beginning for all the right reasons, the fool does in the end for all the wrong ones.

Until next year,

Rick Dahl
Chief Investment Officer

Investment Consultant's Report

Summit Strategies Group

September 26, 2002

The Board of Trustees
Missouri State Employees' Retirement System
907 Wildwood Drive
Jefferson City, MO 65109

Dear Board Members:

The stock market, as represented by the S&P 500, has been down 10% or more in a calendar year, 12 times since World War II. Economic booms followed by busts followed by booms have been the pattern for as long as people have been recording these kinds of things. But the bear market of 2000-2002 is significant for at least a couple of reasons. First, as of the fiscal year ended June 30, 2002, it is both the longest and deepest bear market since the Great Depression of 1929-1932. The previous post-war bear market, that everyone in the investment business talked about, was 1973-1974, and, unfortunately, with the big market sell-off in June 2002 after the WorldCom fraud revelations, our current bear market has now exceeded 1973-74's decline.

I am struck as I write that last statement. We've now exceeded the decline of 1973-74! In 1973-74, we were extracting ourselves from a debt financed war that had proven to be very divisive for the country, the OPEC oil cartel was holding us hostage with high gasoline prices and long lines at service stations, inflation was heading toward double digits for the first time in 100 years, the Cold War was raging, and Nixon was being run out of office. I mean, there was some pretty ugly stuff going on. I can see why the market was off over 40%. And the market loss of 2000-2002 just exceeded that amount. The terrorist attack of last September and the fraud of Enron and WorldCom are major events, of course, but we

have "stability" in Washington, we are the world's only superpower, and inflation is a non-event. Consumers are buying a little too much foreign-produced "stuff" and putting a little too much on their credit cards, but this is fixable, right? And yet we just exceeded the market decline of 1973-74.

When I talk to people who seem to have a pretty good handle on this kind of thing, they point to the fact that the market's decline is not based on a lot of things being wrong (although terrorist attacks and corporate misdeeds are certainly wrong and have definitely contributed to this decline) but rather that things were "too good" for "too long." In other words, the party went a little too long, the music was a little too loud, and the drinks flowed a little too easily. And now it's the next morning! This isn't a two aspirin and a cup of coffee deal. It is bigger than that.

With the benefit of hindsight, it's pretty obvious. We had companies going on buying sprees using their over-priced stock to pay too much for other companies. In the middle of all this were corporate boards and officers caught up in all of this and milking it all the way to the bank. We had Wall Street in greed heaven creating securities to fund all this activity and lying to the world about what great opportunities they had just created (for a handsome commission). Because the market kept going up, the idea that stocks were risky was forgotten and the belief that stocks could levitate above the gravity of economic reality

forever became accepted fact. And the idea that a company had to actually make something and sell it for a profit was replaced by a good story about how the Internet was going to change the world. In the middle of this, pension benefits were increased and/or contributions to pension funds were cut because the stock market would pay for it all. And as long as all was well, then we consumers thought, "Why not buy that 7th VCR for the house?" Now that I think about it, it really was a great party and I really miss it.

Look at the data. The four years ending in 1999 were the highest returning years for the S&P 500 in history. While earnings were OK, the truth is that this extraordinary period of market returns was almost entirely based on people being willing to pay ever increasing prices for the same company. Like tulips in Holland in the 1600's, the Internet and, in fact, the entire large cap U.S. stock market, proved to be nothing more than the Greater Fool Theory, in which the value of a company was based solely on what someone would pay for it tomorrow. Of course, what is so obvious after the fact is never clear as it is happening or it would not have happened. And so it was. Yet the reason capitalism works is it is a self-correcting system and what we have been experiencing recently is the latest version of this self-correction.

Stock prices are down. Merger activity is down. Poorly managed or fraudulently managed companies are disappearing. Wall Street has been discredited and fined. The "freebies" of the rising stock market, whether they were stock options for management or benefit increases or contribution holidays, will now be viewed as the real expenses that they are. Companies will have to prove they are profitable, well run, and prudent to regain investors' confidence. And folks who thought they would throw some money in the stock market and retire early are looking at a normal career again. And so it goes. Even the best parties must end.

MOSERS has been affected by the market's correction. In dollars and cents, the fund declined in value by \$380 million in the past fiscal year. It was a very volatile year as well.

The fund lost over \$500 million in the first quarter, recovered nearly all of this by the end of March and then lost nearly \$300 million in the quarter ending June 30, 2002. This is a decline of 6.2% for the year. Obviously, years like this one and the last have brought down longer-term results. For three and five years the returns have been -0.2% and 5.2% annualized, respectively. Longer-term results, which include the poor recent years, are still strong and above the actuarial assumptions. All returns are calculated in accordance with the Association for Investment Management Research performance presentation standards. On a relative basis, the fund has held up well. In all periods, the total fund has outperformed its benchmarks, which means that the actual results have exceeded the returns of the markets. In a world where no one can control markets, the efforts of staff, the investment managers, and ourselves become focused on adding value above the benchmarks. In that regard, these efforts have been quite successful.

The negative total fund returns of the last three years obviously will impact funding levels and required contributions going forward, but as a member this is not your concern as your benefits are guaranteed. It does create an issue for the state, as it could require an increase in annual contributions. Our collective focus is to earn the highest return possible within an acceptable level of risk. In markets such as this, the return portion is a challenge and the risk element is ever-present. We all foresee a market place driven far more by reality than the "party" that was the 18-year bull market that ended in early 2000. This means working harder for what should be less reward. It also means that this kind of attention and focus are more important than they've been in a long, long time. So it goes.

All of us at Summit appreciate the opportunity to be of continued service to the board and the system.

Sincerely,

Stephen P. Holmes, CFA
President

Total Fund Review

Value of the Fund

Fiduciary Responsibility

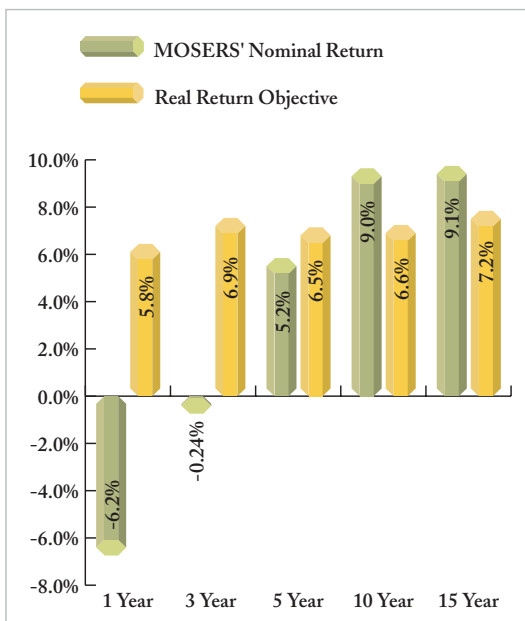

The MOSERS Board of Trustees bears the ultimate fiduciary responsibility for the investment of system assets. Members of the board must adhere to state law and prudent standards of diligence with respect to their duties as investment fiduciaries. Accordingly, they are required to discharge their duties in the interest of plan participants. They must also act with the same care, skill, prudence, and diligence under the circumstances then prevailing that a prudent person acting in a similar capacity and familiar with those matters would use in the conduct of a similar enterprise with similar aims.¹

Overall Investment Objective

The board's overall objectives with respect to the investment of the MOSERS' assets are to:

- Develop a Real Return Objective² (RRO) that will:
 - Keep contribution rates reasonably level over long periods of time.
 - Maintain contribution rates consistent with historical levels ranging from 10% to 12% of covered payroll.
 - Provide the state of Missouri with the option to reduce the unfunded liability ahead of schedule, ultimately reducing the state's contributions for retirement benefits and producing savings which could be allocated to wages and other benefits for state employees.
- Establish an asset allocation policy that is expected to meet the RRO with the least amount of short-term volatility.
- Minimize costs associated with the efficient implementation of the asset allocation through the use of internal and external resources.

Return vs. Real Return Objective⁴

Real Return Objective (RRO)

The MOSERS' actuarial funding objective is to produce nominal returns that exceed the rate of inflation by 5% per year. The best known measure of inflation is the Consumer Price Index (CPI). From the graph on the left, one can see the MOSERS' investment returns have exceeded the RRO over long time periods since the mid 1980s.³

1 Section 105.688, RSMo - Investment Fiduciaries, Duties.
 2 The real return objective is the rate by which the total return exceeds the inflation rate as measured by the CPI, U.S. city Average for all Urban Consumers (CPI-U).
 3 Performance returns were calculated using a time-weighted rate of return based on market values.
 4 CPI Source: United States Department of Labor, Bureau of Labor Statistics (not seasonally adjusted). MOSERS' real return is the excess return over the CPI utilizing the formula:
 $Real = (1 + Nominal)/(1 + CPI) - 1$.

Market Value

As of June 30, 2002, the MOSERS' investment portfolio had a market value of \$5.06 billion.

Policy Asset Allocation

Summary of Policy Asset Allocation

MOSERS' assets are divided into three broad asset classes: domestic and international equities, and a diversification pool consisting of assets with low absolute volatility and/or whose price movements historically have had very little or no relationship to the price movements of equities. The assets that currently make up this pool are intermediate, high quality nominal bonds, real bonds, commodities, and cash.

The resulting portfolio is intended to produce the required real rate of return necessary to fund the pension liabilities within prudent levels of risk. (Real return is the amount by which actual return exceeds the rate of inflation.) The pie chart above depicts the MOSERS' current policy asset allocation, adopted by the board in March 2000.

Actual Asset Allocation

Due to the fact that different asset classes seldom move in lock step with each other, it is reasonable to expect that over time the actual allocation will differ from the policy mix. The pie chart to the left depicts the MOSERS' actual asset mix as of June 30, 2002.

Actual Strategy Allocation

Strategy Asset Allocation

Strategic biases within asset classes are employed in an effort to further diversify the overall portfolio and enhance long-term returns within each asset class. A strategic decision should be thought of as any decision that might cause MOSERS' actual portfolio to differ from the policy mix benchmarks. The graph to the left depicts MOSERS' actual strategy mix as of June 30, 2002.

Total Fund Return and Benchmark Comparisons

In addition to comparing the actual returns of the fund to the Real Return Objective, the board also compares fund returns to the following three benchmarks: the MOSERS' Policy Benchmark, the MOSERS' Strategy Benchmark and, to a lesser extent, the median return generated by a peer group of public pension funds.

- The policy benchmark provides an indication of the returns that could be achieved (excluding transaction costs) by a portfolio invested passively in the broad market with percentage weights allocated to each asset class in MOSERS' policy asset allocation.
- The strategy benchmark reflects decisions made by the board to strategically deviate from the broad asset classes. The strategy benchmark is more narrowly defined and focuses on any specific "bets" made relative to the policy benchmark. Examples of strategic decisions in the MOSERS' portfolio would be the overweight to small capitalization and value stocks in the domestic equity portfolio.
- The Independent Consultants Cooperative (ICC) median public fund return reflects a universe of public pension plans with assets in excess of \$1 billion.⁵

Total Fund Returns

By comparing the strategy benchmark with the policy benchmark, the board will, over time, be able to judge the success or failure of all decisions made to deviate from the policy allocation. Value is being created from the strategy decision if the strategy return exceeds the policy return.

Similarly, by comparing the actual return to the strategy benchmark, the board will, over time, be able to judge the success or failure of the staff and consultant in implementing the board's strategy. Returns attributed to implementation may take on several forms including active manager selection, the effects of the rebalancing policy, and in general the staff effect. Value is being added from implementation if the actual return exceeds the strategy return.

The graph to the left shows total fund return comparisons for 1-, 3-, 5-, and 10-year periods. Strategy benchmarks were not clearly defined prior to 1995, which was when MOSERS formally adopted strategic biases.

⁵ The UCC is a cooperative of 13 independent investment consultants from across the United States and one major custodial bank that collectively provide performance data in order to create a universe for peer returns. The observed median return is gross of investment management fees and reflects 33 participating funds.

Domestic Equity Review

Domestic Equity

Market Value

As of June 30, 2002, the MOSERS' Domestic Equity Portfolio had a market value of \$2.37 billion, representing 46.9% of MOSERS' total assets.

Summary of Domestic Equity Investments

MOSERS maintains a significant allocation to publicly held shares of corporations domiciled in the United States. Domestic equities are held in broadly diversified portfolios, and they represent 50% of the MOSERS' policy asset allocation. Equity investments are expected to contribute significantly to the fund's achievement of a long-term real rate of return in excess of the 5% real return objective set by the board, because of their historic return premiums over inflation. The graph

to the left depicts the performance of the domestic equity portfolio since 1982 by showing how a \$1.00 investment in the portfolio had grown to \$14.22 by June 30, 2002.

Domestic Equity Portfolio Structure

The Domestic Equity Portfolio consists of eleven separate portfolios: one passive, three enhanced and seven active. The passive and enhanced portfolios provide broad market diversification and make up 55.3% of the total domestic equity. The passive and enhanced allocations provide low cost exposure to the equity market. One of the enhanced portfolios provides the total portfolio with its strategic overweight to small capitalization and value stocks relative to the broad U.S. equity market. The active portfolios are managed in a concentrated manner containing only a manager's best investment ideas. The composite of the active managers represents 44.7% of the domestic allocation.

Domestic Equity Portfolio (by size)

Policy Benchmark (by size)

Domestic Equity Portfolio (by style)

Policy Benchmark (by style)

The pie charts to the left compare the MOSERS' Domestic Equity Portfolio to the Policy Benchmark (the Russell 3000), first by market capitalization (size), then by style. As observed, there is a strategic bias toward non-large and value investment styles, which has been established relative to the Policy Benchmark.

INVESTMENT SECTION

Domestic Equity Portfolio Statistics

The following table displays the statistical characteristics of the MOSERS' Domestic Equity Portfolio as of June 30, 2002, with comparisons shown to the portfolio's policy benchmark and to the same portfolio as of the end of the prior fiscal year.

| Characteristics | June 30, 2002 | June 30, 2002 | June 30, 2001 |
|----------------------------|-----------------------|----------------|-----------------------|
| | MOSERS U.S. Stocks | Russell 3000 | MOSERS U.S. Stocks |
| Number of securities | 1,238 | 3,000 | 1,198 |
| Avg. market capitalization | \$48.8 billion | \$70.3 billion | \$67.2 billion |
| Portfolio yield | 2.12% | 1.59% | 1.50% |
| Portfolio P/E | 19.8x | 26.0x | 19.7x |
| Portfolio beta vs. S&P 500 | 0.83 | 0.89 | 0.99 |
| Price/book ratio | 1.8x | 3.0x | 2.7x |

The following table displays MOSERS' ten largest domestic equity holdings as of June 30, 2002, and the ten largest holdings one year prior.

| Ten Largest Holdings June 30, 2002 ⁶ | Market Value | % of Total MOSERS U.S. Stocks | Ten Largest Holdings June 30, 2001 | Market Value | % of Total MOSERS U.S. Stocks |
|--|--------------|----------------------------------|---------------------------------------|--------------|----------------------------------|
| General Electric | \$33,354,920 | 1.4% | Microsoft | \$57,671,460 | 2.1% |
| Microsoft | 31,170,029 | 1.3 | General Electric | 56,860,538 | 2.1 |
| Pfizer | 30,921,240 | 1.3 | Pfizer | 47,289,919 | 1.7 |
| Citigroup | 23,022,615 | 1.0 | Citigroup | 38,646,331 | 1.4 |
| Exxon Mobil | 19,728,760 | 0.8 | Exxon Mobil | 36,601,484 | 1.3 |
| American Intl. Group | 19,528,040 | 0.8 | Intel | 30,974,580 | 1.1 |
| Cisco Systems | 18,643,226 | 0.8 | American Intl. Group | 29,513,262 | 1.1 |

⁶ A complete list of holdings is available upon request.

Domestic Equity Portfolio Investment Advisors

As of June 30, 2002, MOSERS had contracts with 9 external investment advisors targeted to manage 69.3% of the domestic equity portfolio; the remaining 30.7% of the domestic equity portfolio is managed internally by MOSERS' staff.

The table below displays the external firms that were under contract with MOSERS during FY02 for management of domestic equity securities. In addition, it shows all internally managed domestic equity portfolios, the managers' investment styles, FY02 ending portfolio market values, and the managerial fees paid for the fiscal year.

During FY02, MOSERS hired one new enhanced investment advisor and three new active advisors while terminating one active advisor.

| Investment Advisor | Investment Style | Portfolio Market Value as of June 30, 2002 | FY02 Management Fee |
|--------------------------------|----------------------------|---|------------------------|
| Internal Staff | Passive S&P 500 Index | \$ 472,453,457 | |
| | Active REIT Portfolio | \$ 254,099,153 | \$ 152,080 |
| BlackRock | High Yield Bond | 247,462,588 | 381,237 |
| NISA | BBB Bond | 49,621,605 | |
| Dimensional Fund Advisors | Passive Non-Large Value | 500,461,109 | 584,233 |
| OakBrook | Enhanced S&P 500 Index | 167,014,312 | 250,000 |
| Oak Associates | Active All-Cap Growth | 125,538,683 | 1,296,897 |
| Legg Mason Capital Management | Active All-Cap | 130,488,292 | 636,472 |
| Zak Capital, Inc. | Active All-Cap Growth | 0 | 231,317 |
| Capital Guardian Trust Company | Active All-Cap Core | 122,469,873 | 418,491 |
| AmeriCap Advisers | Active All-Cap Core | 129,841,342 | 393,604 |
| Advanced Investment Management | Enhanced S&P 500 Index | 168,817,748 | 187,500 |
| Total | | <u>\$ 2,368,268,162⁷</u> | <u>\$ 4,531,831</u> |

⁷ Does not include NISA rebalancing.

Domestic Equity Investment Returns

MOSERS' Policy Benchmark, the Russell 3000 Index, lost 17.2% for the year. The strategy to intentionally diversify holdings, particularly with smaller capitalization and relatively less

expensive stocks, added value in FY02. This can be observed by comparing the -17.2% return generated by the policy benchmark to the -13.2% return generated by the strategy benchmark. The MOSERS' actual return of -15.8% was below the strategy benchmark and reflects the negative results of the manager mix.

Domestic Equity Returns

The graph to the left shows 1-, 3-, and 5-year results as described above and also includes the actual return compared with the policy benchmark for the 10-year period. The strategy benchmark was not clearly defined before 1995, which was when MOSERS formally adopted strategic biases.

Brokerage Commissions

In the fiscal year ended June 30, 2002, MOSERS generated the following commissions through the purchase and sale of domestic equity securities.

| Brokerage Firms | Shares Traded | Dollar Volume of Trades | Commission | |
|--|--------------------|-------------------------|--------------------|-----------------|
| | | | Dollar Amount | Value Per Share |
| U.S. Clearing | 30,241,000 | \$ 755,292,427 | \$ 941,722 | \$0.031 |
| Guzman & Company | 14,019,969 | 419,967,281 | 153,101 | 0.011 |
| Instinet Corporation | 13,191,159 | 337,911,310 | 364,537 | 0.028 |
| State Street | 8,235,686 | 164,494,966 | 102,946 | 0.012 |
| Jefferies & Company | 4,428,569 | 138,069,508 | 152,170 | 0.034 |
| Montgomery Secs | 7,120,200 | 133,604,468 | 211,665 | 0.030 |

| Others (including 45 brokerage firms) | 7,146,224 | 163,041,219 | 360,589 | 0.050 |
| Totals | 105,534,118 | \$2,535,895,806 | \$2,979,506 | \$0.028 |
| Zero commission trades excluded from above | 17,252,240 | \$ 366,467,373 | | |

Soft Dollar Expenditures

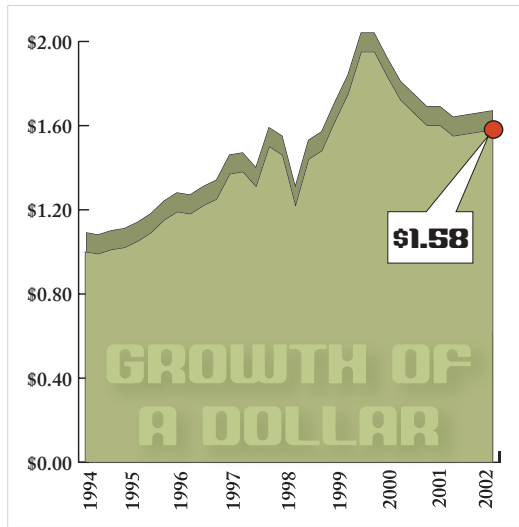

In the fiscal year ended June 30, 2002, MOSERS' domestic equity managers declared \$402,734 of the commissions generated were utilized to acquire a variety of services and research information. These expenditures, referred to as soft dollars (expendable excess commissions), are permitted under current SEC investment advisor guidelines, and represent 13.5% of MOSERS' agency commissions.

| Type of Service Acquired | Commissions Used | Percentage of Total |
|-------------------------------|------------------|---------------------|
| Trading and analytic systems | \$226,331 | 56.2% |
| Research services | 97,891 | 24.3 |
| Consulting/benchmarks | 11,002 | 2.7 |
| Portfolio management systems | 19,948 | 5.0 |
| Exchange fees, other services | 7,606 | 1.9 |
| Pricing services | 18,574 | 4.6 |
| Market research | 9,834 | 2.4 |
| Transaction cost analysis | 9,377 | 2.3 |
| Proxy Services | 2,171 | 0.6 |
| Total | \$402,734 | 100.0% |

International Equity Review

International Equities

Market Value

As of June 30, 2002, the MOSERS' International Portfolio had a market value of \$1.25 billion, representing 24.7% of the total fund.

Summary of International Equity Investments

International stocks, with a target allocation of 25.0%, are employed by the fund primarily because their historical return premiums versus inflation, if realized in the future, will help preserve and enhance the fund's ability to achieve a long-term real rate of return in excess of the 5% real return objective set by the board.

International stocks are also attractive for the diversification benefits they provide to the portfolio. By incorporating these stocks into the asset mix, MOSERS expects to achieve overall equity returns which are comparable to that of a

domestic stock portfolio while reducing overall portfolio volatility. The graph above depicts the performance of the international equity portfolio since 1994, by showing how a \$1.00 investment in the portfolio had grown to \$1.58 by June 30, 2002.

International Equity Portfolio Structure

As of June 30, 2002, 36% of the international portfolio was managed in an enhanced index fashion with the balance of 64% being managed actively. International stock investments consist of a Morgan Stanley Capital International Europe, Australia, and Far East (MSCI EAFE) Enhanced Index Portfolio, a Morgan Stanley Capital International Emerging Markets Free

(MSCI EMF) Enhanced Index Portfolio and two active portfolios. In July 1995, the board hired an active developed market manager with a value tilt to complement the EAFE Index Portfolio. In May of 2000, a second active developed markets manager was hired with a growth tilt. The MOSERS' policy allows the active managers to hedge currency up to 25%, while the enhanced portfolios are unhedged.

Policy Benchmark

Actual Portfolio

The pie charts to the left show the breakdown of investments in developed markets and emerging markets in the international portfolio compared to the policy and strategy benchmark, Morgan Stanley Capital International EAFE + EMF Index.

International Equity Portfolio Statistics

The following table displays the statistical characteristics of the MOSERS' International Stock Portfolio as of June 30, 2002, with comparisons shown to the portfolio's policy benchmark and to the same portfolio as of the end of the prior fiscal year.

| Characteristics | June 30, 2002 MOSERS International Equity | June 30, 2002 MSCI EAFE & EMF | June 30, 2001 MOSERS International Equity |
|----------------------------|---|----------------------------------|---|
| Number of securities | 1,434 | 1,719 | 1,379 |
| Avg. market capitalization | \$22.0 billion | \$35.2 billion | \$5.2 billion |
| Portfolio yield | 2.20% | 2.30% | 2.53% |
| Portfolio P/E | 22.4x | 28.8x | 16.2x |
| Price/book ratio | 1.8x | 1.9x | 1.4x |

The following table displays MOSERS' ten largest holdings in International Equity as of June 30, 2002, as well as the ten largest holdings at the end of the prior fiscal year.

| Ten Largest Holdings June 30, 2002 ⁸ | Market Value | % of International Stocks | Ten Largest Holdings June 30, 2001 | Market Value | % of International Stocks |
|---|-----------------|---------------------------------|--|-----------------|---------------------------------|
| Talisman Energy (Canada) | \$21,459,103 | 1.7% | Diageo (UK) | \$19,330,770 | 1.6% |

INVESTMENT SECTION

International Equity Portfolio Investment Advisors

As of June 30, 2002, MOSERS had contracts with three external investment advisors for the management of four international stock portfolios. Two firms are managing active portfolios in the developed markets that are expected to add incremental return over an established benchmark through stock selection, country selection, and small amounts of currency hedging. The third manager has two enhanced index portfolios that are expected to add a small amount of return while matching country weights with the index. One enhanced portfolio is for the developed markets and the other is for the emerging markets.

The following table displays the external firms that were under contract with MOSERS during FY02 for management of international stocks. Also displayed are the managers' investment styles, FY02 ending portfolio market values and the managerial fees paid for the fiscal year.

| Investment Advisor | Investment Style | Portfolio Market Value as of June 30, 2002 | FY02 Management Fee |
|-------------------------------------|-------------------|---|------------------------|
| Silchester International Investors | Active value | | |
| | Developed markets | \$398,377,358 | \$1,654,117 |
| Mastholm Asset Management | Active growth | | |
| | Developed markets | 401,272,422 | 1,549,623 |
| Merrill Lynch Quantitative Advisors | Enhanced | | |
| | Developed markets | 294,028,371 | 431,830 |
| Merrill Lynch Quantitative Advisors | Enhanced | | |
| | Emerging markets | 153,223,545 | 160,650 |
| Total | | <u>\$1,246,901,696⁹</u> | <u>\$3,796,220</u> |

⁹ This total excludes the impact of the rebalancing account on the total international portfolio.

International Equity Investment Returns

The MOSERS' Policy Benchmark, the MSCI EAFE + EMF Index lost 8.2% for the year. As of June 30, 2002, there were no strategic "bets" in place in the international portfolio, therefore the strategy benchmark and the policy benchmark are the same. MOSERS' actual return of -1.9%

added significant value relative to both benchmarks. A large part of the out-performance was due to the value manager's 14.8% return which exceeded the benchmark by over 20% for the year. The two enhanced portfolios also added to the positive performance relative to the benchmark.

International Equity Returns

The graph to the left shows 1-, 3-, and 5-year results as described above. MOSERS' first allocation to international stocks did not occur until July 1994; therefore, 10-year returns are not applicable.

The chart below displays the MOSERS' country exposure relative to the policy benchmark on June 30, 2002.

Soft Dollar Service Expenditures

For the fiscal year ended June 30, 2002, MOSERS' current international equity managers declared that \$20,385 of the commissions generated were utilized to acquire a broad variety of services and research information. Soft dollars represented less than 1% of the total agency commissions.

| Type of Service Acquired | Commissions Used | Percentage of Total |
|------------------------------|------------------|---------------------|
| Trading and analytic systems | \$20,385 | 100.0% |
| Total | \$20,385 | 100.0% |

Diversification Pool Review

Diversification Pool¹⁰

Market Value

As of June 30, 2002, the MOSERS' Diversification Pool had a market value of \$1.4 billion, representing 28.5% of the total fund.

Summary of the Diversification Pool Investments

The Diversification Pool, with a target allocation of 25%, serves to offset or dampen the equity risk component within the fund. The pool is primarily comprised of nominal bonds or traditional fixed income instruments, real return bonds or TIPS¹¹, and a commodities exposure. Targets for these classes are 50%, 40% and 10% respectively within the pool (see below). All three of these security classes have exhibited consistently low and, at times, even negative correlations to equities over long periods of time, a factor which provides excellent diversification properties to the fund's

75% allocation to equities. Residual cash amounts are not significant and have no target allocation.

The nominal bond portion of the pool has been structured with an intermediate maturity profile and a significant bias towards high credit quality and good liquidity. The nominal bonds provide sufficient and predictable cash flow, and are structured in such a way as to perform well in periods of a stable, low inflationary environment and in a disinflationary or deflationary trend. TIPS will perform well in periods of rising inflation when nominal bonds will not be performing as well. Finally, commodities exposure protects the fund in those situations when inflation is unanticipated and is rising rapidly. Commodities

exposure is somewhat unique in that it tends to be a very good diversifier to both stocks and nominal bonds. That is, in periods of inflation surprises, both stocks and nominal bonds are likely to do poorly and commodities will act as a buffer to their fall. Conversely, commodities are likely to lag in periods of disinflation when stocks and nominal bonds tend to perform well. In short, the primary function of the Diversification Pool is to diversify away a portion of the equity risk in the overall fund, yet there are also diversification elements within the pool itself that should provide steady performance in most investment scenarios.

Diversification Pool Portfolio Targets

¹⁰ The area graph above depicts the performance of the diversification pool since 1982 (all fixed income prior to the 4th quarter of 1998, followed by a blend of fixed income, TIPS, and commodities to the present) by showing how a \$1.00 investment in the portfolio had grown to \$9.86 by June 30, 2002.

¹¹ "TIPS" is an acronym for Treasury Inflation Protected Securities. These securities are a "full faith and credit" guarantee of the U.S. Government. They pay lower rates of interest, but the bondholder is protected against inflation for the life of the bond by means of a mechanism that adjusts the maturing principal amount of the bond higher, according to changes in the CPI.

INVESTMENT SECTION

Diversification Pool Portfolio Structure

As of June 30, 2002, 56.1% of the diversification portfolio by market value was passively managed. Another 32.9% was managed in an enhanced index style, which allows for some limited trading flexibility with the expectation of capturing additional return relative to the benchmark. A 9.8% portion was managed in an active duration management style, and other assets comprised 1.2%.

A significant expansion of the Diversification Pool was implemented in the second quarter of FY00. Because of the diversification properties of both fixed income and commodities, a plan was put into place to essentially merge the two asset classes into one pool. The major changes to the pool included an increase in the TIPS allocation from 2.5% to 10% and a substantial reduction in the maturity profile of the nominal bond component, while simultaneously increasing the portfolio's credit quality. Nominal bonds were also significantly reduced as a percentage of the overall fund. Given the acceptance of more equity risk in the fund, it was deemed appropriate and prudent to reduce risk in the nominal bond component of the Diversification Pool. With each separately managed portfolio being confined to one specific fixed income sector, MOSERS is able

to capitalize on each manager's area of expertise. Duration of the nominal bond portfolio can fluctuate from approximately 2.5 years to approximately 3.9 years, where it stands as of June 30, 2002, depending upon the portfolio profile of the active duration manager. The commodity allocation continues to be managed with the same target weighting and management style as in the prior fiscal year.

IBRD=International Bank for Reconstruction & Development

USTB=U.S. Treasury Bond

USTN=U.S. Treasury Note

U.S. TIPS=U.S. Treasury Inflation Protected Securities

¹² The policy benchmark, as of the end of the fiscal year, is a composite of 40% of the TIPS portfolio return, 16% Lehman Mortgage Index, 8% Lehman Asset-backed Index, 16% Lehman Credit Index (AAA/AA segment only), 10% Lehman Intermediate Treasury, 10% Goldman Sachs Commodity Index less 50 basis points. In order to derive benchmark characteristics, the Commodity Index is excluded because of its smaller contribution to the benchmark and its lack of comparability in terms of the portfolio characteristics being reported.

¹³ A complete list of holdings is available upon request.

INVESTMENT SECTION

Diversification Pool Portfolio Investment Advisors

As of June 30, 2002, MOSERS had contracts with three external investment advisors designated to manage 44% of the Diversification Pool. Internal management of 56% of the Diversification Pool, which includes cash reserves and miscellaneous, enables passive participation in a very significant segment of the Diversification Pool assets at a very low cost.

The following table displays the external firms that were under contract with MOSERS during FY02 for management of diversification assets. In addition, it shows all internally managed Diversification Pool assets, the managers' investment styles, ending portfolio market values for FY02 and the managerial fees paid for the fiscal year.

| Investment Advisor | Investment Style | Portfolio Market Value as of June 30, 2002 | FY02 Management Fee |
|--|--|--|------------------------|
| BlackRock Financial Management, Inc. | Enhanced index Mortgage and asset-backed securities | \$ 348,389,512 | \$ 347,116 |
| Hoisington Investment Management Co. | Active duration Treasury securities | 140,990,086 | 200,000 |
| NISA Investment Advisors, LLC | Enhanced index Commodities index overlay Cash investment portfolio | 127,323,068 | 216,947 |
| Internal Staff (All passive management) | Government TIPS Lehman High Quality Corporate Index Cash reserves Illiquid assets | 584,825,671 225,711,384 7,776,386 6,607,687 | 152,539 |
| Total | | \$ 1,441,623,794 ¹⁴ | \$ 916,602 |

¹⁴ This total excludes the impact of the rebalancing account on the Diversification Pool Portfolio.

Diversification Pool Investment Returns

The MOSERS' Diversification Pool returned 7.6% for the year, falling short of both the Policy Benchmark return and the Strategy Benchmark return, both of which were 8.3% for the fiscal year. The active duration manager's yield curve positioning as well as an overweight to medium quality corporates within the internally managed corporate portfolio were the primary reasons for

underperformance. Performance in those security classes was offset, to some degree, by superior performance in the commodities portfolio and a small amount of value added in the enhanced index mortgage and asset-backed portfolio. From a longer term perspective, 3-year returns were equal to or exceeded the benchmarks while 5-year returns remain above benchmark returns, with the 5-year Diversification Pool return exceeding the policy and the strategy benchmarks by 50 and 30 basis points respectively. This is, in large part, due to the active duration manager's selection of a long portfolio in a period in which interest rates have declined very substantially.

Diversification Pool Returns

The graph to the left shows these results.

Brokerage Activity

In FY02, MOSERS generated the following fixed income brokerage activity, ranked by percentage of total, through the purchase and sale of Diversification Pool assets.

| Broker/Dealer Firms | Par Amount Traded | Market Value Traded | Percent of Total Trading Volume by Market Value |
|--|------------------------|------------------------|---|

STRENGTH

Actuary's Certification Letter

September 26, 2002

The Board of Trustees
Missouri State Employees' Retirement System
907 Wildwood Drive
Jefferson City, Missouri 65109

Dear Board Members:

The basic financial objective of the Missouri State Employees' Retirement System (MOSERS) is to establish and receive contributions, which

- (1) when expressed in terms of percents of active member payroll will remain approximately level from generation to generation of Missouri citizens, and which
- (2) when combined with present assets and future investment return will be sufficient to meet the present and future financial obligations of MOSERS.

In order to measure progress toward this fundamental objective, MOSERS has annual actuarial valuations performed. The valuations (i) measure present financial position, and (ii) establish contribution rates that provide for the current cost and level percent of payroll amortization of unfunded actuarial accrued liabilities over a reasonable period. The latest completed actuarial valuations were based upon data and assumptions as of June 30, 2002. These valuations indicate that the contribution rates for the fiscal year ending June 30, 2004, established by the board of trustees for the benefits scheduled to be in effect on July 1, 2002, meet the basic financial objective. These contribution rates are 9.35% of payroll for 58,616 general state employees, 20.12% of payroll for 58 administrative law judges, and 51.68% of payroll for 392 judges other than administrative law judges.

The actuarial valuations are based upon financial and participant data, which is prepared by retirement system staff, assumptions regarding future rates of investment return and inflation, and rates of retirement, turnover, death, and disability among MOSERS' members and their beneficiaries. The data is reviewed by us for internal and year-to-year consistency as well as general reasonableness prior to its use in the actuarial valuations. It is also summarized

and tabulated for the purpose of analyzing trends. The demographic assumptions were adopted by the board of trustees and were based upon actual experience of MOSERS during the years 1995-1999. The economic assumptions were adopted by the board of trustees in September 2001. Assets are valued according to a method that fully recognizes expected investment return and averages unanticipated market return over a five-year period. The assumptions and methods utilized in this valuation, in our opinion, meet the parameters established by Governmental Accounting Standards Board Statement No. 25.

The current benefit structure is outlined in the Actuarial Section. The changes made since the previous valuation are highlighted on page 104. We provided the information used in the supporting schedules in the Actuarial Section and the *Schedules of Funding Progress* in the Financial Section, as well as the employer contribution rates shown in the *Schedule of Employer Contributions* in the Financial Section.

Based upon the valuation results, it is our opinion that the Missouri State Employees' Retirement System continues in sound condition in accordance with actuarial principles of level percent of payroll financing.

Respectfully submitted,

A handwritten signature in black ink that reads 'Norman L. Jones'.

Summary of Actuarial Assumptions

June 30, 2002

Economic Assumptions

The investment return rate used in the valuations was 8.5% per year, compounded annually (net after investment expenses). This assumption is used to account for the fact that equal amounts of money payable at different points in time in the future do not have the same value presently.

Pay increase assumptions for individual active members are shown for sample ages on page 76. Part of the assumption for each age is for merit and/or seniority increase, and the other 4% recognizes wage inflation. This assumption is used to project a member's current salary to the salaries upon which benefits will be based.

The active member payroll is assumed to increase 4% annually, which is the portion of the individual pay increase assumptions attributable to inflation.

The annual COLA is assumed to be 4% per year on a compounded basis when a minimum COLA of 4% is in effect and 2.8% per year on a compounded basis when no minimum COLA is in effect.

The number of active members in the MSEP is assumed to remain constant although certain new hires on or after July 1, 2002, will participate in the College and University Retirement Plan (CURP). The number of active members in the ALJLAP and Judicial Plan is assumed to continue at the present number. Active and retired member data is reported as of May 31. It is assumed for valuation purposes that there is no turnover among members and no new entrants during the month of June.

Noneconomic Assumptions

The mortality table, for post-retirement mortality, used in evaluating allowances to be paid was the 1971 Group Annuity Mortality Table, projected to the year 2000 with a 1-year age setback for men and a 7-year age setback for women. Related values are shown on page 77. This assumption is used to measure the probabilities of each benefit payment being made after retirement.

The probabilities of age and service retirement are shown on page 78. The first two years of eligibility if prior to age 70, were halved due to the expected emerging effect of the BackDROP. It was assumed that each member will be granted one half year of service credit for unused leave upon retirement and military service purchases.

The probabilities of withdrawal from service, death-in-service, and disability are shown for sample ages on page 76. For disability retirement, impaired longevity was recognized by use of special mortality tables.

The entry age normal actuarial cost method of valuation was used in determining liabilities and normal cost. The normal cost was based on the benefit provisions affecting new employees (MSEP 2000). Differences in the past between assumed experience and actual experience (actuarial gains and losses) become part of actuarial accrued liabilities. Unfunded actuarial accrued liabilities are amortized to produce payments (principal and interest), which are a level percent of payroll contributions.

Employer contribution dollars were assumed to be paid in equal installments throughout the employer fiscal year.

The asset valuation method fully recognizes expected investment return and averages unanticipated market return over a five-year period.

The data about persons now covered and about present assets was furnished by the system's administrative staff. Although examined for general reasonableness, the data was not audited by the actuary.

It is assumed that, among active members, 80% are married at retirement, 70% of those dying in active service are married, and men are three years older than their spouses.

The liabilities for active members hired on or after July 1, 2000, were based on MSEP 2000 benefits. The liabilities for active members hired before July 1, 2000, were based on MSEP 2000 benefits for male general employees with an age at hire of 35 years or less, for female general employees, for contract employees, for elected officials, and for general assembly members. All others were based on MSEP benefits. The BackDROP was only explicitly valued for those assumed to receive MSEP 2000 benefits.

The actuarial valuation computations were made by or under the supervision of a Member of the American Academy of Actuaries (MAAA).

Summary of Actuarial Assumptions

Miscellaneous and Technical Assumptions

June 30, 2002

Pay Increase Timing

Middle of fiscal year.

Decrement Timing

Decrements of all types are assumed to occur mid-year.

Eligibility Testing

Eligibility for benefits is determined based upon the age nearest birthday and service nearest whole year on the date the decrement is assumed to occur.

Benefit Service

Exact fractional service is used to determine the amount of benefit payable.

Decrement Relativity

Decrement rates are used directly from the experience study without adjustments for multiple decrement table effects.

Decrement Operation

Disability and turnover decrements do not operate during the first five years of service. They also do not operate during retirement eligibility.

Normal Form of Benefit

The assumed normal form of benefit is the straight life form for the MSEP 2000 with 50% continuing to an eligible surviving spouse for the MSEP. No adjustment has been made for post-retirement option election changes.

Loads

No loads were used.

Incidence of Contributions

Contributions are assumed to be received continuously throughout the year based upon the computed percent of payroll shown in the report, and the actual payroll payable at the time contributions are made. New entrant normal cost contributions are applied to the funding of new entrant benefits.

Derivation of Experience Gain (Loss)

MSEP

Actual experience will never coincide exactly with assumed experience (except by coincidence). Gains and losses may offset each other over a period of years, but sizeable year-to-year variations from assumed experience are common. Detail on the derivation of the experience gain (loss) is shown below.

| | | \$ Millions |
|------|--|-------------|
| (1) | UAAL* at beginning of year | \$183.9 |
| (2) | Normal cost | 144.5 |
| (3) | Actual employer contributions | 209.5 |
| (4) | Interest accrual: $(1) \times .085 + [(2) - (3)] \times (.085/2)$ | 12.9 |
| (5) | Expected UAAL before changes: $(1) + (2) - (3) + (4)$ | 131.8 |
| (6) | Change from any changes in benefits, assumptions, or methods | (103.5) |
| (7) | Expected UAAL after changes: $(5) + (6)$ | 28.3 |
| (8) | Actual UAAL at end of year | 261.1 |
| (9) | Gain (loss) $(7) - (8)$ | (232.8) |
| (10) | Gain (loss) as a percent of actuarial accrued liabilities at start of year (\$6,065) | (3.8)% |

* Unfunded actuarial accrued liability.

| Valuation Date June 30 | Actuarial Gain (Loss) as a Percentage of Beginning Accrued Liabilities |
|---------------------------|---|
| 1994 | 2.9% |
| 1995 | 0.6 |
| 1996 | 0.4 |
| 1997 | 5.5 |
| 1998 | 5.5 |
| 1999 | 4.7 |
| 2000 | 2.7 |
| 2001 | (4.4) |
| 2002 | (3.8) |

Derivation of Experience Gain (Loss)

ALJLAP

The actuarial gains or losses realized in the operation of the retirement system provide an experience test. Gains and losses are expected to cancel each other over a period of years but sizable year-to-year fluctuations are common. Detail on the derivation of the actuarial gain (loss) is shown below, along with a year-by-year comparative schedule.

| | | \$ Millions |
|------|--|-------------|
| (1) | UAAL* at beginning of year | \$ 2.40 |
| (2) | Normal cost | .82 |
| (3) | Employer contributions | 1.07 |
| (4) | Interest | |
| | a. on (1) | .20 |
| | b. on (2) | .03 |
| | c. on (3) | .05 |
| | d. total [a+b+c] | .18 |
| (5) | Expected UAAL end of year before changes | 2.33 |
| (6) | Change in UAAL end of year | |
| | a. amendments | 0 |
| | b. assumptions | 0 |
| | c. methods | (.32) |
| | d. total | (.32) |
| (7) | Expected UAAL after changes: (5)+(6d.) | 2.01 |
| (8) | Actual UAAL at end of year | 3.00 |
| (9) | Gain (loss) (7)-(8) | (.99) |
| (10) | Gain (loss) as a percent of actuarial accrued liabilities at start of year (\$16,809,962) | (5.9)% |

* Unfunded actuarial accrued liability.

| Valuation Date June 30 | Actuarial Gain (Loss) as a Percentage of Beginning Accrued Liabilities |
|---------------------------|---|
| 2000 | 0.3% |
| 2001 | (1.3) |
| 2002 | (5.9) |

Summary Plan Provisions*

As of June 30, 2002

MSEP and MSEP 2000

(Comparison of Plans for General State Employees)

| Plan Provision | MSEP | MSEP 2000 |
|--|---|---|
| Membership eligibility | Members who work in a position normally requiring at least 1,000 hours of work a year. | Members hired for the first time on or after July 1, 2000, in a position normally requiring at least 1,000 hours of work a year. Members who left state employment prior to becoming vested and return to work on or after July 1, 2000, in a position normally requiring at least 1,000 hours of work a year. |
| Normal retirement eligibility | Age 65 and active with 4 years of service, Age 65 with 5 years of service, Age 60 with 15 years of service, or "Rule of 80" - minimum age 50. | Age 62 with 5 years of service or "Rule of 80" - minimum age 50. |
| Early retirement eligibility | Age 55 with 10 years of service. | Age 57 with 5 years of service. |
| Benefit | | |
| Life benefit | 1.6% x final average pay (FAP) x service. | 1.7% x FAP x service. |
| Temporary benefit | Not available. | 0.8% x FAP x service (until age 62 - only if retiring under "Rule of 80"). |
| Vesting | 5 years of service. | 5 years of service. |
| In-service cost-of-living adjustment (COLA) | COLA given for service beyond age 65. COLA provisions are determined by employment date. | Not available. |
| COLA | If hired before August 28, 1997, annual COLA is equal to 80% of the change in the consumer price index (CPI) with a minimum of 4% and a maximum of 5% until reaching 65% cap. Thereafter, the rate is based on 80% of the change in the CPI with maximum rate of 5%. If hired on or after August 28, 1997, annual COLA is equal to 80% of the change in the CPI with a maximum rate of 5%. | Annual COLA is equal to 80% of the change in the CPI with a maximum rate of 5%. |
| Survivor benefit (Death before retirement) | | |
| Non duty-related death | Survivor benefit to eligible spouse calculated using the Joint & 100% Survivor Option or 80% of the member's Life Income Annuity paid to eligible children. | Survivor benefit to eligible spouse calculated using the Joint & 100% Survivor Option or 80% of the member's Life Income Annuity paid to eligible children. |
| Duty-related death | Survivor benefit to eligible spouse or children no less than 50% of current pay (no service requirement). | Survivor benefit to eligible spouse or children no less than 50% of current pay (no service requirement). |
| Optional forms of payment (Death after retirement) | Survivor benefit to eligible spouse based on payment option elected at retirement. Payment options include: - Life Income Annuity - Unreduced Joint & 50% Survivor - Joint & 100% Survivor - 60 or 120 Guaranteed Payments - BackDROP | Survivor benefit to eligible spouse based on payment option elected at retirement. Payment options include: - Life Income Annuity - Joint & 50% Survivor - Joint & 100% Survivor - 120 or 180 Guaranteed Payments - BackDROP |

* This summary describes the plan provisions of the Revised Statutes of Missouri (RSMo), as amended, that governed the programs, which MOSERS administered during the period covered by this report. It does not overrule any applicable statute or administrative rule and, in the event of a conflict, the applicable statute or rule would apply. The MSEP 2000 became effective July 1, 2000.

Summary Plan Provisions As of June 30, 2002

MSEP and MSEP 2000 (Comparison of Plans for Elected State Officials)

| Plan Provision | MSEP | MSEP 2000 |
|---|---|---|
| Membership eligibility | Elected to state office. | Elected to state office on or after July 1, 2000. |
| Normal retirement eligibility | Age 65 with 4 years of service, Age 60 with 15 years of service, or "Rule of 80" - minimum age 50. | Age 55 with 4 years of service or "Rule of 80" - minimum age 50. |
| Early retirement eligibility | Age 55 with 10 years of service. | Not available. |
| Benefit Life benefit | <u>12 or more years of service</u> 50% of current pay for highest position held. <u>Less than 12 years of service</u> 1.6% x FAP x service. | (Monthly base pay ÷ 24) x service capped at 12 years or 50% of pay. |
| Temporary benefit | Not available. | Not available. |
| Vesting | 4 years of service. | 4 years of service. |
| In-service COLA | COLA provisions determined by amount of service relative to 12 years and date of employment. | Not available. |
| COLA | <u>12 or more years of service</u> COLA is equal to the percentage increase in the current pay of an active elected state official in the highest position held. <u>Less than 12 years of service</u> If hired before August 28, 1997, annual COLA is equal to 80% of the change in the CPI with a minimum of 4% and a maximum of 5% until reaching 65% cap. Thereafter, the rate is based on 80% of the change in the CPI with maximum rate of 5%. If hired on or after August 28, 1997, annual COLA is equal to 80% of the change in the CPI with a maximum rate of 5%. | Benefit adjusted each year based on the percentage increase in the current pay for an active elected state official in the highest position held. |
| Survivor benefit (Death before retirement) Non duty-related death | Survivor benefit to eligible spouse calculated using the Joint & 100% Survivor Option or 80% of the member's Life Income Annuity paid to eligible children. | Survivor benefit to eligible spouse calculated using the Joint & 100% Survivor Option or 80% of the member's Life Income Annuity paid to eligible children. |
| Duty-related death | Survivor benefit to eligible spouse or children no less than 50% of current pay (no service requirement). | Survivor benefit to eligible spouse or children no less than 50% of current pay (no service requirement). |
| Optional forms of payment (Death after retirement) | Survivor benefit to eligible spouse based on payment option elected at retirement. Payment options include: - Life Income Annuity - Unreduced Joint & 50% Survivor - Joint & 100% Survivor - 60 or 120 Guaranteed Payments | Survivor benefit to eligible spouse based on payment option elected at retirement. Payment options include: - Life Income Annuity - Unreduced Joint & 50% Survivor - Joint & 100% Survivor - 120 or 180 Guaranteed Payments |

Summary Plan Provisions As of June 30, 2002

ALJLAP

| Plan Provision | Requirement |
|---|--|
| Membership eligibility | Administrative law judge or legal advisor in the Division of Workers' Compensation, a member or legal counsel of the Labor and Industrial Relations Commission, chairperson of the State Board of Mediation, or an administrative hearing commissioner. |
| Normal retirement eligibility | Age 62 with 12 years of service, Age 60 with 15 years of service, or Age 55 with 20 years of service. |
| Reduced retirement eligibility | Age 65 with less than 12 years of service with reduced benefit, based upon years of service relative to 12 years. |
| Benefit formula | <u>12 or more years of service</u> 50% of the average highest 12 consecutive months of salary. |
| Vesting | Immediate. |
| In-service COLA | Not available. |
| COLA | If hired before August 28, 1997, annual COLA is equal to 80% of the change in the CPI with a minimum of 4% and a maximum of 5% until reaching 65% cap. Thereafter, the rate is based on 80% of the change in the CPI with maximum rate of 5%. If hired on or after August 28, 1997, annual COLA is equal to 80% of the change in the CPI with a maximum rate of 5%. |
| Survivor benefit (Death before retirement) | Survivor benefit to eligible spouse equal to 50% of the benefit the member would have received based on service to age 70. |
| Survivor benefit (Death after retirement) | Survivor benefit to eligible spouse equal to 50% of the member's annuity at the time of death. |

Summary Plan Provisions

As of June 30, 2002

Judicial Plan

| Plan Provision | Requirement |
|---|--|
| Membership eligibility | Must be a judge or commissioner of the supreme court or of the court of appeals, or a judge of any circuit court, probate court, magistrate court, court of common pleas, or court of criminal corrections, or a justice of the peace, or a commissioner or deputy commissioner of the circuit court appointed after February 29, 1972. |
| Normal retirement eligibility | Age 62 with 12 years of service, Age 60 with 15 years of service, or Age 55 with 20 years of service. |
| Early retirement eligibility | Age 62 with less than 12 years of service or age 60 with less than 15 years of service with a reduced benefit based on years of service relative to 12 or 15 years. |
| Benefit formula | <u>12 or more years of service</u> 50% of the FAP. <u>Less than 12 or 15 years of service</u> If between age 60 and 62 (years of service ÷ 15) x 50% of compensation on the highest court served. If age 62 (years of service ÷ 12) x 50% of compensation on the highest court served. |
| Vesting | Immediate. |
| In-service COLA | Judges who are at least age 60 and work beyond the date first eligible for unreduced benefits will receive COLAs for each year worked beyond normal retirement eligibility. COLA provisions are determined by date of employment. |
| COLA | If hired before August 28, 1997, annual COLA is equal to 80% of the change in the CPI with a minimum of 4% and a maximum of 5% until reaching 65% cap. Thereafter, the rate is based on 80% of the change in the CPI with maximum rate of 5%. If hired on or after August 28, 1997, annual COLA is equal to 80% of the change in the CPI with a maximum rate of 5%. |
| Survivor benefit (Death before retirement) | Survivor benefit to eligible spouse equal to 50% of the benefit the member would have received based on service to age 70. |
| Survivor benefit (Death after retirement) | Survivor benefit to eligible spouse equal to 50% of the member's annuity at the time of death. |

Contributions

The plans previously described are noncontributory with the entire cost paid by the state of Missouri. The contribution rate paid by the state for the general state employees, uniformed members of the water patrol, legislators, and elected state officials retirement plan for FY02 was 11.59% of the membership payroll. The contribution rate paid by the state for the ALJLAP for FY02 was 22.32% of the membership payroll. The contribution rate paid by the state for the Judicial Plan for FY02 was 55.30% of the membership payroll.

Summary Plan Provisions

As of June 30, 2002

Life Insurance Plans

(MOSERS administers basic and optional term life insurance plans for eligible state employees and retirees.)

| Active Members* | Requirement | Retired Members | Requirement |
|--|--|--|--|
| <p><u>Basic Life Insurance</u> An amount equal to one-times annual salary (with a minimum of \$15,000) while actively employed.</p> | Actively employed in an eligible state position resulting in membership in MOSERS. | <p><u>Basic Life Insurance at Retirement</u> \$5,000 basic life insurance during retirement.</p> | Must retire directly from active employment. |
| <p><u>Duty-Related Death Benefit</u> Duty-related death benefit equivalent to two-times the annual salary the member was earning at the time of death in addition to the basic life insurance amount of one-times annual salary.</p> | Actively employed in an eligible state position resulting in membership in MOSERS. | <p><u>Optional Life Insurance at Retirement (MSEP)</u> An employee may retain up to the lesser of \$60,000 or the amount of optional life insurance coverage held at time of retirement at the group rate and may convert any remaining basic and optional life insurance at individual rates.</p> | Must retire directly from active employment. |
| <p><u>Optional Life Insurance</u> Additional life insurance may be purchased in multiples of annual salary up to six-times annual salary (maximum of \$800,000) or in a flat amount in multiples of \$1,000 not to exceed the maximum. Spouse coverage may be purchased in multiples of \$1,000 up to a maximum of \$100,000; however, the amount of spouse coverage cannot exceed the amount of optional coverage the member has purchased. Coverage for children is available in a flat amount of \$10,000 per child.</p> | Actively employed in an eligible state position resulting in membership in MOSERS. | <p><u>Optional Life Insurance at Retirement (MSEP 2000)</u> Under "Rule of 80" an employee may retain the current amount of coverage prior to retirement until age 62 at which time coverage is reduced to \$60,000, and may convert any remaining basic and optional life insurance at individual rates. Coverage for spouse and/or children ends at member's retirement and may be converted at individual rates.</p> | Must retire directly from active employment. |

*Terminating employees may convert coverage up to the amount they had as an active employee at individual rates.

Summary Plan Provisions

As of June 30, 2002

Long-Term Disability (LTD) Plan

(MOSERS administers the LTD Plan for eligible state employees who become disabled during active employment.)

| Plan | Provision |
|--|---|
| <p><u>General State Employees, Legislators, and Elected State Officials</u> Members of MOSERS in a position normally requiring 1,000 hours of work a year are covered under the LTD plan, unless they work for a state agency which has its own LTD plan.</p> | <p>Long-Term Disability - Eligible participants receive 60% of their compensation minus primary social security, workers' compensation, and employer provided income. Benefits commence after 90 days of disability or after sick leave expires, whichever occurs last. LTD benefits cease upon the earliest of (i) when disability ends, (ii) when the member is first eligible for normal retirement benefits or is receiving early retirement benefits, (iii) when the member returns to work, or (iv) upon the member's death.</p> <p>Partial Disability - A member may be considered partially disabled during the benefit waiting period and the 24 months following that period if the member is working in an occupation, but as a result of physical disease, injury, pregnancy, or mental disorder, is unable to earn more than 80% of pre-disability earnings. After the first 24 months, a member may be considered partially disabled if working in an occupation but unable to earn more than 60% of the member's pre-disability earnings. In both instances, work earnings are used to reduce the LTD benefit.</p> |
| <u>Water Patrol</u> | <p>Uniformed members who are eligible for statutory occupational disability receive benefits equal to 50% of compensation with no offset for social security at the time of disability. For nonoccupational disabilities, eligible participants receive the same benefit as general employees.</p> |
| <u>Judges</u> | <p>In addition to the disability benefits provided to general employees, judges also receive benefits under the state constitution. Participants receive 50% of salary until the current term expires.</p> |

Changes in Plan Provisions

On July 11, 2002, Governor Bob Holden signed into law HB 1455 – legislation that involved minor modifications to and clarifications of the Missouri State Employees’ Plan, the Missouri State Employees’ Plan 2000, the Administrative Law Judges and Legal Advisors’ Plan, and the Judicial Plan. These changes were designed to enable MOSERS to more effectively administer these plans as well as ease some of the administrative burden associated with members and their beneficiaries applying for and receiving benefits. There were no benefit increases enacted in FY02.

STABILITY

The strength to stand and endure

Summary

Plan Membership

Membership in the pension trusts administered by MOSERS increased 1,967. Active members increased 197, retired members and their beneficiaries increased 1,268, and terminated-vested members increased by 502. Membership data for the last ten years ended June 30, 2002, can be found on page 110. Page 111 depicts the location of benefit recipients, showing that the majority remain in the state of Missouri after retirement.

Net Assets vs. Liabilities

The charts on page 112 graphically represent the funding progress of the pension plans for the ten years ended June 30, 2002. The area

chart on the left of the page shows the portion of the pension liabilities that are unfunded compared to the portion covered by assets in the trust funds. The chart on the right of the page illustrates the funded ratio of the plans for the ten years ended June 30, 2002.

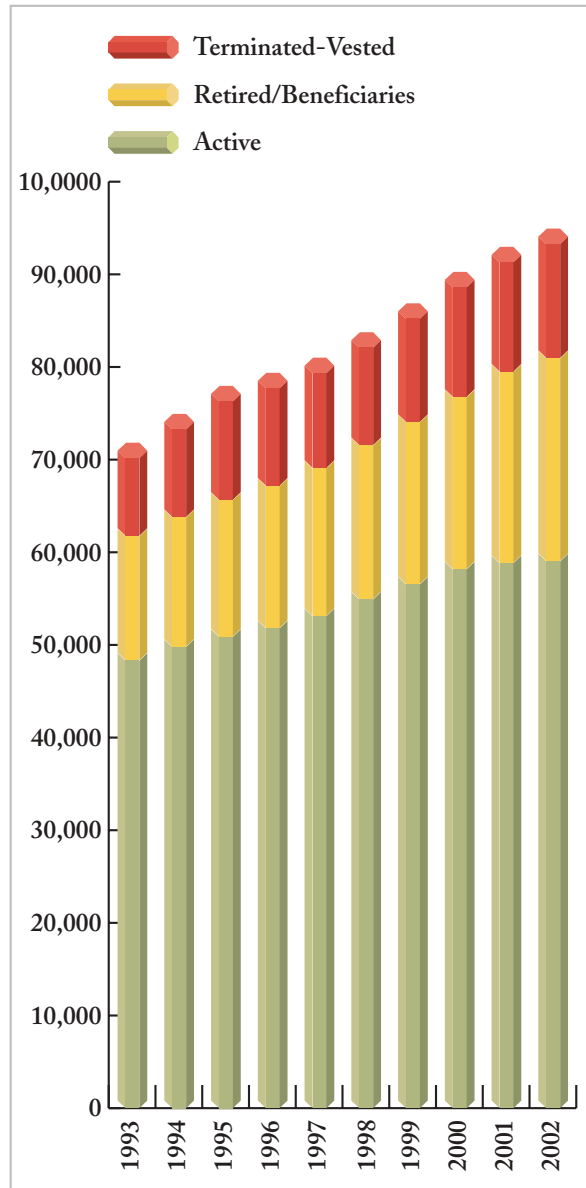

The existence of the unfunded actuarial accrued liabilities is not necessarily an indication of financial problems, but the fluctuations are important and should be monitored and controlled.

The remainder of this section contains various statistical and historical data considered useful in evaluating the condition of the plans.

Membership in Retirement Plans Last Ten Fiscal Years
