TO: Board of Trustees and Members of the Retirement Systems:

We are pleased to present the combined annual financial reports of The Public School Retirement System (PSRS) and the Non-Teacher School Employee Retirement System of Missouri (NTRS) for the 1999-00 fiscal year. The Board of Trustees has fiduciary, administrative and fiscal responsibility for both systems. Thus, the combined presentation of this report better conforms with accounting standards.

Report Contents

This Comprehensive Annual Financial Report (CAFR) is designed to provide you with information on the financial operations of the systems, the stewardship of the funds and compliance with all legal requirements. Management is responsible for the accuracy of the contents and the completeness and fairness of the presentation of this CAFR. The enclosed information is accurate in all material respects and is reported in a manner to fairly present the financial position and the results of the operations of the system. We hope this CAFR will enhance your understanding of the purpose, structure and operations of PSRS and NTRS.

This report is presented in five sections:

- The Introductory Section contains general information about the retirement systems.
- The Financial Section contains financial information about the operations of the systems during the fiscal year.
- The Investment Section shows how the funds of the system were invested and information regarding the return on those investments.
- The Actuarial Section reports the funded condition of both systems.
- The Statistical Section contains general information concerning finances and participants of the systems.

Overview of the Retirement Systems

The Public School Retirement System of Missouri, a cost-sharing multiple employer retirement system, was established in 1946 by an act of the Missouri legislature to provide retirement, disability and death benefits to full-time, certificated employees in the public schools and four-year regional universities. It has been amended to include part-time employees of public schools and no longer accepts new employees of the regional universities.

The Non-Teacher School Employee Retirement System of Missouri, also a cost-sharing multiple employer retirement system, was established in 1965 by an act of the legislature to provide retirement, disability and death benefits to non-certificated school employees in the public schools, community colleges and junior colleges who have elected to join the system.

ntroductory Section

Both systems are funded on an actuarial reserve basis, with money contributed by members and school districts, combined with investment income, to provide income for benefits before those benefits are paid. The additions and deductions to the funds of the systems during the 1999-00 fiscal year are shown in the tables below:

Financial Information

(Dollars in millions)

	<u>PSRS</u>	<u>NTRS</u>	<u>1999-00 TOTAL</u>	<u>1998-99 TOTAL</u>	<u>INC (DEC)</u>
Additions					
Contributions	\$ 625	\$ 69	\$ 694	\$ 650	7%
Net Investment Income	<u>1,455</u>	<u>114</u>	<u>1,569</u>	<u>1,933</u>	(19%)
Total	\$2,080	\$183	\$2,263	\$2,583	(12%)
Deductions					
Monthly Benefits	\$ 639	\$ 42	\$ 681	\$ 569	20%
Lump-sum Refunds	36	10	46	38	21%
Administrative Expenses	<u>4</u>	<u>2</u>	<u>6</u>	<u>5</u>	20%
Total	\$ 679	\$ 54	\$ 733	\$ 612	20%

The increase in contributions and refunds is attributable to the general increase in employee salaries. The increase in monthly benefits can be attributed to the 2,152 new service retirees added to the PSRS monthly rolls and the 960 NTRS retirees added to the monthly rolls. The increase in administrative expenses resulted from increased postage and printing costs and higher personnel costs.

Management is responsible for designing and maintaining a system of adequate and effective internal accounting controls. These controls protect and safeguard the assets of the systems and provide for the reliability of financial records.

All financial statements are prepared using the accrual basis of accounting. Both member and employer contributions are required by state statute and are recognized in the period in which the employees' services are performed. Benefits and refunds are recognized when due and payable in accordance with the terms of the plans. Expenses are recognized when the liability is incurred, regardless of when payment is made and cash and cash equivalents (1%).

Investment Activities

Fiscal year 1999-00 was again a solid period for investors with the continuation of a volatile, yet favorable global environment. The Systems' investment portfolios remain a diversified mix of domestic stocks (38%), international stocks (16%), fixed income (45%), and cash and cash equivalents (1%). This portfolio, when combined with various investment approaches as used by the Systems, continues to provide comparable returns at a lower risk than policy benchmarks.

The PSRS and NTRS investment portfolios generated a 7.7% return for the fiscal year, falling below the actuarially required rate of return of 8%. However, for the five-year period ending June 30, 2000, PSRS has an annualized rate of return of 13.6%, while NTRS's annualized rate of return for the same period was 13.5%.

Funding Status

PSRS and NTRS are defined benefit retirement systems. This means that a formula made up of credit (years of service) times final average salary, times a multiplier (2.5% for PSRS and 1.45% for NTRS for every year of credit) creates each member's retirement benefit. The systems are also known as actuarial reserve retirement systems, which means a level contribution payment in conjunction with a moveable amortization period determines the relative health of the systems. As of June 30, 2000, PSRS is 106% funded, while NTRS is 109%

funded. The actuarial value of the assets of PSRS is \$19,437,223,000 while the accrued liability is \$18,279,113,000. The actuarial value of the assets of NTRS is \$1,522,660,000 while the accrued liability is \$1,395,300,000.

Major Initiatives During 1999-00

Legislation enacted during the 2000 General Assembly was contained in CCS/SS/SCS/HB 1808 and provided for the following in PSRS: a) the extension of the 25-and-out option through July 1, 2003; b) an increase to the lifetime COLA limit from 75% to 80% of the original benefit; c) the reduction of the waiting period before a member is eligible for COLA increases from the 4th January following retirement to the 3rd January following retirement (for those members who retire on or after July 1st, 2000); and d) a 3.5% increase in the benefits of those retired prior to July 1, 2000.

Improvements to NTRS were also contained in CCS/SS/SCS/HB 1808 and included the following; a) the benefit multiplier was increased from 1.45% to 1.51%; b) the final average salary period was lowered from five years to three years, allowing for a higher average salary to be used when calculating benefits; c) the 25-and-out option was continued through July 1, 2003 with appropriate increases to the multipliers based upon a full multiplier of 1.51%; d) the "Rule of 80" was added which allows the use of the 1.51% formula when a retiree's age and service equal 80; e) a new benefit of .4% for each year of credit was added for those individuals under the age of 62 at retirement who retire under the auspices of the "Rule of 80" or "30-and-out." This temporary multiplier increase is only paid while the retiree is less than age 62; f) the maximum allowable contribution required to NTRS was increased from 4.5% to 5.0%, but will not become effective until July 1, 2001; and g) a 3.4% increase was added to the benefit of all those retired prior to July 1, 2000.

The retirement systems, along with all business partners, successfully planned for, and implemented Y2K readiness. Successful testing of all systems was completed well before January 1, 2000, and allowed for uninterrupted continuation of all services.

During 1997-98, the Employers' Monthly Electronic Reporting System (EMERS) was designed to accept data from employers' payroll systems, edit the information and transmit the data to the retirement system after each payroll period. The system was tested at beta sites during 1998-99. During 1999-2000, the system successfully went live with approximately 200 employers reporting electronically by year end.

The construction of a new facility for NTRS and PSRS began in June of 2000. The new facility will be located at 3210 West Truman Boulevard in Jefferson City and is expected to be completed in August or September of 2001. When completed, the new facility will provide an attractive, spacious waiting area for our members who come to the retirement offices to conduct business; individual counseling offices to provide the needed privacy for important, personal conversations; easy access from any direction; increased employee work stations and needed parking spaces; updated board room facilities; space for transitioning from the current paper environment to a more modern image environment; much needed and improved conference space; space for an information center designed specifically to address questions from members; space for technology training and formatting; and meeting space for use by the educational community.

Awards

The Government Finance Officers Association of the United States and Canada awarded a Certificate of Achievement for Excellence in Financial Reporting to both the Public School Retirement System and to the Non-Teacher School Employee Retirement System for their comprehensive annual financial reports for the fiscal year ended June 30, 1999. In order to be awarded a Certificate of Achievement, a governmental unit must publish an easily readable and efficiently organized comprehensive annual financial report, the contents of which conform to program standards. Such reports must satisfy both generally accepted accounting principles and applicable legal requirements. We believe this report continues to conform to the Certificate of Achievement program requirements and we are submitting it to the Government Finance Association to determine its eligibility for another certificate.

Professional Services

Certain professional services are provided to the retirement systems by retained consultants. The required opinion letters from two of those consultants, Gabriel, Roeder, Smith and Company, actuaries, and KPMG, independent certified public accountants, are contained elsewhere in this report.

Investment consulting services, as well as investment manager search assistance and investment performance analysis has been provided by Strategic Investment Solutions, of San Francisco, CA.

Acknowledgements

We express our thanks and gratitude to the staff, Board of Trustees and consultants who have worked diligently to produce this report and to ensure the successful operation of this retirement system.

Respectfully submitted,

Joel Walters

Independent Auditors' Report

The Board of Trustees
Public School Retirement System of Missouri
Non-Teacher School Employee Retirement System of Missouri:

We have audited the accompanying statement of plan net assets of the Public School Retirement System of Missouri and the Non-Teacher School Employee Retirement System of Missouri (the System) as of June 30, 2000 and the related statement of changes in plan net assets for the year then ended. These financial statements are the responsibility of the System's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the plan net assets of the Public School Retirement System of Missouri and the Non-Teacher School Employee Retirement System of Missouri at June 30, 2000 and the changes in plan net assets for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

Our audit was made for the purpose of forming an opinion on the financial statements taken as a whole. The supplementary schedules of funding progress and employer contributions on pages 11 and 12 are not a required part of the basic financial statements of the System, but are required by the Governmental Accounting Standards Board (GASB). The supplementary information included on pages 13 and 14 is presented for purposes of additional analysis and is not a required part of the basic financial statements of the System. Such information, included on pages 11 through 14, has been subjected to the auditing procedures applied in the audit of the financial statements and, in our opinion, is fairly stated in all material respects in relation to the financial statements taken as a whole.

KPMG LLP

September 8, 2000

KPMG LLP (KPMG LLP) a U.S. limited liability partnership, is a member of KPMG International, a Swiss association.

Notes to the Financial Statements

June 30, 2000 and 1999

Note 1 — Plan Descriptions

The Board of Trustees of The Public School Retirement System administers two separate retirement systems, The Public School Retirement System (PSRS) and the Non-Teacher School Employee Retirement System (NTRS). The Board of Trustees consists of seven members, three of whom are elected PSRS active members, one an elected active member of NTRS and three persons appointed by the Governor, one of whom must be a retired member of either PSRS or NTRS.

The funds of the two systems are invested in conjunction with each other but each system retains title to its own investments. Each system's assets may be used only for the payment of benefits to the members of the separate system in accordance with the statutes governing that system.

The Public School Retirement System

The Public School Retirement System of Missouri (PSRS) is a mandatory cost-sharing multiple employer retirement system for all full-time certificated employees and certain part-time certificated employees of all public school districts in Missouri (except the school districts of St. Louis and Kansas City) and all public community colleges. The system also includes certificated employees of PSRS, Missouri State Teacher's Association, Missouri State High School Activities Association, and certain employees of the State of Missouri who elected to remain covered by PSRS under legislation enacted in 1986, 1987 and 1989.

PSRS was established as an independent trust fund by an Act of the Missouri General Assembly effective August 1, 1945. Statutes governing the retirement system are found in Sections 169.010-169.141 and Sections 169.560-169.595 RSMo. It is a defined benefit plan providing service retirement, death and disability benefits to its members. Service retirement benefits vest after 5 years of creditable service. Members who retire with 5 years of service (on or after age 60), 25 years of service (on or after age 55) or 30 years of service are entitled to an allowance for life determined using a 2.5% formula factor. Members who qualify under the "rule of 80" (service credit and age total at least 80) can also retire using a 2.5% factor. Actuarially reduced retirement benefits are available with 5 to 24.9 years of service at age 55 or with 25 years of service (if not yet age 55). Members who have not yet reached age 55 and do not qualify under the "rule of 80" but who have between 25 and 29.9 years of credit may retire with a lesser benefit formula during a window that will close July 1, 2003. Annual cost-of-living adjustments (COLAs) are provided for eligible service and disability retirees and for surviving beneficiaries receiving payments under optional retirement plans, up to a lifetime maximum of 75% of the original benefit amount.

Contributions — PSRS members were required to contribute 10.5% of their annual covered salary during both fiscal years. The employing districts were required to match the contributions made by employees. The contribution rate is set each year by the Board of Trustees upon the recommendation of the independent actuary within the maximum contribution limit set in Section 169.030 RSMo. Administrative costs are financed through investment earnings. Contributions for employees of the State of Missouri were made by the state in accordance with the actuarially determined contribution rate needed to fund current costs and prior service costs of state employees as authorized in Section 104.342.8 RSMo.

Members — The number of PSRS membership and benefit recipients served by the system at June 30 was:

	<u>2000</u>	<u>1999</u>
Retirees and beneficiaries receiving benefits	27,238	25,748
Inactive members entitled to but not yet receiving benefits	3,852	3,684
Active members:		
Vested	49,286	45,014
Non-vested	<u>22,420</u>	<u>25,078</u>
Total active members	71,706	70,092
Other inactive members	<u>3,887</u>	<u>3,593</u>
Total	<u>106,683</u>	<u>103,117</u>

Employers — PSRS had 548 contributing employers during both fiscal years.

The Non-Teacher School Employee Retirement System

The Non-Teacher School Employee Retirement System of Missouri (NTRS) is a mandatory cost-sharing multiple employer retirement system for all public school district employees (except the school districts of St. Louis and Kansas City) and community college district employees (except the Community College of St. Louis). Employees of covered districts who work 20 or more hours on a regular basis and who are not contributing members of The Public School Retirement System of Missouri (PSRS) must contribute to NTRS. Employees of PSRS who do not hold Missouri teaching certificates also contribute to NTRS.

NTRS was established as a trust fund by an Act of the Missouri General Assembly effective October 13, 1965. Statutes governing the retirement system are found in Sections 169.600 - 169.715 and Sections 169.560-169.595 RSMo. The statutes place responsibility for the operation of NTRS on the Trustees of The Public School Retirement System.

NTRS is a defined benefit plan providing service retirement, death and disability benefits to its members. Service retirement benefits vest after 5 years of creditable service. Members who retire with 5 years of service (on or after age 60), 25 years of service (on or after age 55), or 30 years of service are entitled to an allowance for life. After June 30, 2000, members who qualify under the "rule of 80" (service credit and age total at least 80) may also retire under the full formula. Actuarially reduced retirement benefits are available with 5 years of service at age 55. Members who have not reached age 55 but who have between 25 and 29.9 years of credit may retire with a lesser benefit formula within a window that will end July 1, 2003. Annual cost-of-living adjustments (COLAs) up to a lifetime maximum of 75% of the original benefit amount are provided for eligible service and disability retirees and for surviving beneficiaries receiving payments under optional retirement plans.

Contributions — NTRS members were required to contribute 4.5% of their annual covered salary during 1999-2000 and 4.3% during 1998-99. The employing districts were required to match the contributions made by their employees. The contribution rate is set each year by the Board of Trustees upon the recommendation of the independent actuary within the contribution restrictions in Section 169.620 RSMo. Administrative costs proportional to its membership size are reimbursed by NTRS to The Public School Retirement System and are financed through investment earnings.

Members — The number of NTRS membership and benefit recipients served by the system at June 30 was:

	<u>2000</u>	<u>1999</u>
Retirees and beneficiaries receiving benefits	13,061	12,461
Inactive members entitled to but not yet receiving benefits	2,184	1,889
Active members:		
Vested	18,540	18,089
Non-Vested	<u>24,993</u>	<u>23,510</u>
Total active members	43,533	41,599
Other inactive members	<u>9,827</u>	<u>8,168</u>
Total	<u>68,605</u>	<u>64,117</u>

Employers — NTRS had 535 contributing employers during both fiscal years.

Note 2 — Summary of Significant Accounting Policies

Basis of Accounting — The financial statements of both systems were prepared using the accrual basis of accounting. For both systems, member and employer contributions are required by state statute and are recognized in the period in which the employee services are performed. Benefits and refunds are recognized when due and payable in accordance with the statutes governing the systems. Expenses are recognized when the liability is incurred, regardless of when payment is made.

Deposits — Cash includes the operating balances held by the depository banks. These deposits are fully insured by the FDIC and collateralized as required under Sections 169.045 and 169.640 RSMo at June 30, 2000 and 1999.

PSRS has an agreement with its depository bank to sweep available funds into an overnight repurchase agreement. The overnight repurchase agreement was for \$2,972,354 on June 30, 2000 and \$2,326,946 on June 30, 1999. These amounts were fully collateralized with insured or registered securities held by a third-party agent in the name of PSRS.

Likewise, NTRS has an overnight repurchase agreement with its depository bank. The overnight repurchase agreement was for \$1,910,774 on June 30, 2000 and for \$772,345 on June 30, 1999. These amounts were fully collateralized with insured or registered securities held by a third-party agent in the name of NTRS.

Short-term securities held by the custodial bank to meet future system obligations are classified as cash. PSRS had \$37,671,648 in such short-term investments at June 30, 2000 and \$67,500,658 at June 30, 1999. NTRS short-term investments were \$11,368,409 on June 30, 2000 and \$13,744,427 at June 30, 1999. These short-term securities are not required to be categorized as described in Note 4.

Short-term securities in portfolios where the primary purpose is to facilitate the placement of funds in long-term investments are classified as investments.

Receivables — Receivables consist primarily of contributions owed and yet to be remitted by the employing districts, pending investment trades and interest and dividends payable to the systems as of the end of each fiscal year.

Method Used to Value Investments — Investments are reported at fair value on a trade date basis. Securities traded on international exchanges are valued at the last reported sales price at current exchange rates. Mortgages are valued on the basis of future principal and interest payments and are discounted at prevailing interest rates for similar instruments. Investments that do not have an established market are reported at estimated fair value.

Fixed Assets — The building and most other fixed assets are owned by PSRS and are stated at cost less depreciation accumulated since acquisition. The stated value does not purport to represent replacement or realized value. Costs of major additions and improvements are capitalized. Expenditures for maintenance and repairs are charged to operations as incurred. Depreciation is calculated using the straight-line method, with estimated lives ranging from three to forty years in the following major classes: computers and software, three years; vehicles, five years; equipment, five years; building and land improvements, 15 years; building, 40 years.

NTRS owns office equipment purchased before 1997 and follows the same guidelines for depreciation. NTRS reimburses PSRS for the use of fixed assets used by the two systems on a proportional basis. The amount of this reimbursement was \$168,668 in 2000 and \$140,369 in 1999.

Capital Lease — PSRS entered into a three-year lease agreement during 1997-98 for a color copier. In 1998-99, an enhancement was added and recorded at the present value of the enhancement. These agreements qualify as capital leases for accounting purposes, and therefore, have been recorded at the lower of fair market value or the present value of the future minimum lease agreements. The future minimum lease obligations and the net present value of these payments as of June 30, 2000 were \$19,012.

“Memorandum Only” Total Columns — Total columns are presented to facilitate financial analysis. Data in these columns do not present plan net assets or changes in plan net assets in conformity with generally accepted accounting principles. Such data are not comparable to a consolidation since interfund eliminations have not been made.

The financial statements include total column information for the prior fiscal year ended June 30, 1999. Such information for the prior year does not include sufficient, comparative detail by plan to constitute a presentation in conformity with generally accepted accounting principles, but has been presented for informational purposes.

Note 3 — Designations of Net Assets Held in Trust for Pension Benefits

The systems designate the net assets held in trust for pension benefits for specific purposes:

PSRS

	<u>2000</u>	<u>1999</u>
<i>Designated for Members' Contributions (Member Reserves) —</i> Accumulation of active and terminated member contributions plus interest.	\$ 3,986,130,419	\$ 3,776,231,244
<i>Designated for the Payment of Benefits to Present Retirees —</i> Transfers from Member Reserves at retirement and an actuarially determined transfer from Operating Reserves to fund the system's obligation for benefit payments and cost-of-living adjustments to current retirees and beneficiary recipients.	7,800,384,625	6,601,538,782
<i>Designated for Additional Deposit Annuities —</i> Accumulation of the additional deposits over and above the contributions required by law. Defined contribution annuity payments are made to current retirees from this reserve.	1,460,237	1,609,558
<i>Designated for Operating Expenses/Benefits to Future Retirees (Operating Reserves) —</i> Accumulation of employer contributions and investment income used to fund future benefit payments, interest on member accounts and administration and maintenance expenses of the system.	8,931,221,735	8,938,807,941
Net Assets Held In Trust For Pension Benefits	<u>\$20,719,197,016</u>	<u>\$19,318,187,525</u>

NTRS

	<u>2000</u>	<u>1999</u>
<i>Designated for Members' Contributions (Member Reserves) —</i> Accumulation of active and terminated member contributions plus interest.	\$ 275,343,498	\$ 251,137,974
<i>Designated for the Payment of Benefits to Present Retirees —</i> Transfers from Member Reserves at retirement and an actuarially determined transfer from Operating Reserves to fund the system's obligation for benefit payments and cost-of-living adjustments to current retirees and beneficiary recipients.	467,652,620	396,846,296
<i>Designated for Operating Expenses/Benefits to Future Retirees (Operating Reserves) —</i> Accumulation of employer contributions and investment income used to fund future benefit payments, interest on member accounts and administration and maintenance expenses of the system.	881,674,917	847,387,074
Net Assets Held In Trust For Pension Benefits	<u>\$ 1,624,671,035</u>	<u>\$ 1,495,371,344</u>

Note 4 — Investments

Authorization of Investments — Funds for both systems that are in excess of a safe operating balance are invested by the investment agents under policies and procedures established by the Board of Trustees. Chapter 160.040 RSMo as amended effective August 13, 1984, authorizes any investment which a prudent person acting in a like capacity and familiar with similar matters would use in the conduct of an enterprise of a like character and with like aims. Any person with fiduciary responsibility with respect to the retirement systems is covered by this "prudent person" rule.

Categories of Custodial Credit Risk — The Governmental Accounting Standards Board Statement No. 3 requires disclosure of custodial credit risk. Category 1 includes investments that are insured or registered or for which the securities are held by the systems' custodial agent in the name of each system. Category 2 includes uninsured and unregistered investments for which the securities are held by the custodial agent in the systems' names. Category 3 includes uninsured and unregistered investments which are held by the custodial agent, but not in the systems' names.

A security for purposes of credit risk disclosure is a transferable financial instrument that evidences ownership or creditorship. "Securities" do not include investments made in open-end pooled funds or securities on loan to broker-dealers under the security lending program. Such investments are shown as "not categorized."

PSRS

All categorized investments were in the risk category 1 for both fiscal years.

Derivatives — The retirement systems are parties to certain financial investments with off-balance sheet risk used in the normal course of business to generate earnings and reduce exposure to fluctuations in market conditions. International security managers are authorized to engage in forward contracts to exchange different currencies at a specified date and rate. These forward contracts involve elements of custodial and market risk in excess of the amount recognized in the Statement of Plan Net Assets. The forward exchange contracts purchased/sold in effect at June 30 are shown below.

<u>2000</u>	<u>Purchase Value</u>	<u>Fair Value</u>
PSRS	\$ 95,669,597	\$ 95,796,542
NTRS	8,046,598	8,054,715
<u>1999</u>	<u>Purchase Value</u>	<u>Fair Value</u>
PSRS	\$ 95,787,281	\$ 96,624,650
NTRS	7,357,010	7,421,938

The “Net Appreciation in Fair Value of Investments” found on the Statement of Changes in Plan Net Assets includes for PSRS a net loss on forward contracts and currency disposal of \$3,090,097 during 1999-2000 and \$15,547,418 during 1998-99. NTRS had a similar net loss of \$214,973 during 1999-2000 and \$1,191,061 in 1998-99.

The retirement systems also participate in three pooled index funds that use off-balance-sheet financing instruments. The derivatives in the S&P 500 index fund are S&P 500 futures and those in the Russell 1000 Value Fund are S&P Barra Value futures, both of which are used to accommodate cash flows and to equitize receivables while maintaining tight tracking to the index. The derivatives in the developed country portion of the ACWI World ex-U.S. Fund are also index futures used for the same purposes as in the domestic equity fund. In some emerging market countries, equity swaps are used to achieve part of the exposure. As of June 30, 2000, these off-balance-sheet financial instruments comprised 0.82% of the \$82.5 billion S&P 500 Index Fund, 2.5% of the \$5.5 billion Russell 1000 Value Fund, and 1.88% of the \$31.7 billion ACWI World ex-U.S. Fund. PSRS’ participation in these funds was 2.92%, 11.51%, and 2.57%, respectively. The NTRS exposure was 0.23%, 0.89%, and 0.20%.

On June 30, 1999 the S&P 500 Index Fund had \$77.3 billion in assets of which 5.98% was in derivatives and the ACWI World ex-U.S. fund had \$27.7 million in assets with 2.12% held in derivatives. PSRS’ exposure at that date in the S&P 500 Index Fund was 3.07% and in the ACWI World ex-U.S. fund was 2.52%. NTRS’ exposure was 0.24% and 0.19% respectively.

Neither the percentages of participation in the funds nor the funds’ exposure to derivatives differed substantially from the June 30 figures throughout either year.

Security Lending Activity – Under the “prudent person” authority of the governing statutes and in accordance with the policies set by the Board of Trustees, the systems lend securities to broker-dealers and banks pursuant to a form of loan agreement. The systems’ custodial bank is authorized to lend available securities to approved broker-dealers and banks subject to the receipt of acceptable collateral.

During the fiscal year, the systems lent securities and received cash (both U.S. and foreign currency), securities issued or guaranteed by the U.S. government or its agencies, sovereign debt of foreign countries, and irrevocable bank letters of credit as collateral. The systems did not have the ability to pledge or sell noncash collateral absent borrower default. Borrowers were required to deliver collateral for each loan equal to: (1) in the case of loaned securities denominated in U.S. dollars or whose primary trading market was located in the United States, or sovereign debt issued by foreign governments, 102% of the fair value of the loaned securities; and (2) in the case of loaned securities not denominated in U.S. dollars or whose primary trading market was not located in the United States, 105% of the fair value of the loaned securities.

The systems did not impose any restrictions during the fiscal year on the amount of the loans that the custodial bank made on their behalf. There were no failures by any borrowers to return loaned securities or pay distributions thereon during the year. There were no losses during the year resulting from a default of the borrowers or the custodial bank.

The systems and borrowers each maintained the right to terminate all securities lending transactions on demand. The cash collateral received on each loan was invested, together with the cash collateral of other qualified tax-exempt plan lenders in a collective investment pool. The average duration of such investment pool as of June 30, 2000 was 74 days and an average weighted maturity of 485 days. Because the loans were terminable at will, their duration did not match the duration of the investments made with cash collateral. On June 30, 2000 the systems had no credit risk exposure to borrowers because the amounts the systems owe the borrowers exceed the amounts the borrowers owe the systems.

The collateral held (including both cash collateral recognized in the "Statement of Plan Net Assets" and non-cash collateral) and the fair value of securities on loan for PSRS were \$1,791,900,256 and \$1,736,958,631 for June 30, 2000 and \$2,064,225,277 and \$2,010,367,527 for June 30, 1999. Net security lending income was \$9,622,204 for the 1999-2000 fiscal year and \$10,633,010 for the 1998-99 fiscal year.

The collateral held (including both cash collateral recognized in the "Statement of Plan Net Assets" and non-cash collateral) and the fair value of securities on loan for NTRS were \$158,036,140 and \$154,272,485 for June 30, 2000 and \$151,516,993 and \$148,017,519 for June 30, 1999. Net security lending income was \$767,733 for the 1999-2000 fiscal year and \$813,140 for the 1998-99 fiscal year.

The collective investment pool in which the collateral received from security lending loans is invested has the following characteristics. The fair value of the investments held by the pooled fund is based upon valuations provided by a recognized pricing service. Because the pooled fund does not meet the requirements of Rule 2a-7 of the Investment Company Act of 1940, the fund's investments are valued at fair market value for reporting purposes. The pooled fund is not registered with the Security and Exchange Commission. The custodial bank and, consequently, the investment vehicles it sponsors (including the pooled fund) are subject to the oversight of the Federal Reserve Board and the Massachusetts Commissioner of Banks. The fair value of the systems' position in the pooled fund is not the same as the value of the fund shares. The systems had no involuntary participation in an external investment pool through this fund and no income from one fund was assigned to another fund by the custodial bank during either fiscal year.

Note 5 – Additional Deposits Program

Section 169.035 RSMo provides for an additional deposits program for PSRS members. Members may make payments above the required defined benefit contribution amount to the retirement system in order to provide a monthly annuity at retirement based on the total of the deposits and interest.

This annuity is in addition to the defined benefit allowance provided by the system. Contributions to the program are tax-sheltered. As of September 1, 1996 new deposits to the program were limited to members currently with deposits in the program. No additional deposits were made during 1999-2000. The deposits and interest of the five members who have not yet retired totaled \$10,722 as of June 30, 2000.

The deposits to the program are included in the investment program of the PSRS defined benefit plan. The additional deposits, program's basis of accounting, and the asset valuation are identical to the defined benefit plan.

Note 6 – Retirement Plan

All full-time retirement system employees holding a valid Missouri teaching certificate are covered by PSRS. All other eligible employees are members of NTRS. Both systems provide retirement and disability benefits, annual cost-of-living adjustments and death benefits to plan members and beneficiaries. Chapter 169 RSMo contains the statutory provisions of both systems.

PSRS members were required to contribute 10.5% of their annual covered salary during both years. PSRS, as the employer, was required to match that amount. The contribution rate is established and may be amended by the Board of Trustees. Employer contributions to PSRS totaled \$55,447 for the 1999-2000 fiscal year and \$45,275 for 1998-99. The amounts for these years are equal to the required contributions.

NTRS members were required to contribute 4.5% of their annual covered salary during 1999-2000 and 4.3% during 1998-99. PSRS, as the employer, was required to match that amount. The contribution rate is established and may be amended by the Board of Trustees. Employer contributions to NTRS totaled \$96,440 for the 1999-2000 fiscal year and \$92,123 for 1998-99. The amounts for these years are equal to the required contributions.

Note 7 — Risk Management

The retirement systems are exposed to various risks of loss related to natural disasters, errors and omissions, loss of assets, torts, etc. The systems have chosen to cover such losses through the purchase of commercial insurance. There have been no material insurance claims filed or paid during the past three years.

The systems have a disaster recovery plan that provides for continued computer operations at a remote location should the retirement office be unavailable for normal operations.

Note 8 – Commitments and Contingencies

PSRS was committed to the future purchase of investments at a cost of \$1,676,347,259 on June 30, 2000 and to the future purchase of \$589,338,554 in investments on June 30, 1999. NTRS had investment commitments of \$133,209,698 on June 30, 2000 and \$44,670,083 on June 30, 1999.

Certain legal proceedings are pending against PSRS arising from normal activities which, based on the advice of legal counsel, will not have a material effect on the financial statements.

October 23, 2000

To the Members of the Board:

I am pleased to report that the performance of the Systems' investments for Fiscal Year 2000 was good. The world financial markets were very unsettled during the fiscal year. While the PSRS/NTRS investments have been structured to control excessive risk, the System's assets were not immune to the volatility in the U.S. markets during this fiscal period.

The Total Fund return for the fiscal year ended June 30, 2000 for PSRS was 7.7 percent, and 11.9 percent for the past three years. The NTRS returned 7.7 percent for the fiscal year, and 11.8 percent for the past three years. Both funds slightly trailed the policy index for the fiscal year and for the three-year period. The PSRS Total Fund slightly trailed its 8.0 percent actuarial target for the fiscal year, but exceeded it by 3.9 percent for the three-year period. The NTRS Total Fund also slightly trailed the 8.0 percent actuarial target return, but exceeded it by 3.8 percent for the three-year period.

Asset class performance for the fiscal year was mixed. The U.S. equity return for PSRS was 5.9 percent, and 6.0 percent for NTRS, while both funds recorded a 4.5 percent return for the fixed income assets. The international equity return for PSRS was 22.7 percent, and 22.8 percent for NTRS. All performance results were calculated in compliance with AIMR Performance Presentation Standards.

The above average growth of the Systems' assets has compelled us to take the steps needed to manage this welcomed growth. The implementation of the E-MAP program (a domestic equity fund with several "smaller" managers) should help to continue the efforts to diversify the overall risk and improve the prospects of maintaining competitive returns.

Sincerely,

Michael R. Beasley

November 1, 2000

To the Members of the System:

On behalf of the PSRS and NTRS internal investment staff, I am pleased to present the following reports on the Systems' investments for the fiscal year ending June 30, 2000. The combined PSRS and NTRS Retirement Systems ended the year as one of the 50 largest defined benefit plans in the United States with total invested assets of \$22.2 billion. The total assets invested in the financial markets for both Systems increased by approximately \$1.5 billion from the previous fiscal year.

The Total Fund performance for the fiscal year ending June 30, 2000, was 7.7 percent for both PSRS and NTRS while the Total Fund performance for the five-year period was 13.6 percent for PSRS and 13.5 percent for NTRS. The Systems' basic investment objective is to achieve a total return that exceeds the actuarial assumption of 8.0 percent over rolling five-year periods. Thus, while PSRS and NTRS fell short of the 8.0 percent assumption this past year, the objective was clearly achieved over the most recent five-year period. The excellent long-term results are due, for the most part, to the ability of the Board of Trustees to operate under long-term policies. This long-term focus allows the Board to adhere to sound investment principles during periods of short-term volatility (such as this past fiscal year) when the markets have lower or even negative returns.

In addition to meeting an investment objective of 8.0 percent, the Systems also expect that over the long term, both PSRS and NTRS will produce returns comparable to those of other public pension funds. The Systems have accomplished this goal as well. The one-year, three-year and five-year returns for both PSRS and NTRS ranked in the top 60.0 percent of the Independent Consultants Cooperative Universe of public funds. Thus, the Systems investment returns over the last several years were better than 40.0 percent of the 85 funds in a relative peer group, despite a more conservative asset allocation. In simple terms, PSRS and NTRS earned investment returns comparable to other public funds while accepting lower levels of risk.

The main determinant of a pension fund's long-term success is related to its asset allocation. The Board of Trustees adopted an asset allocation of 47.0 percent fixed income, 38.0 percent domestic equities and 15.0 percent international equities in 1995. Within that asset allocation, the internal staff and the external asset consultant, Strategic Investment Solutions (SIS), have worked to further diversify the fund by style and investment strategy. This diversified investment approach has provided the Systems with consistent risk adjusted returns. The resurgence of the international equity markets in fiscal year 2000, after several years of strong large capitalization domestic equity performance, underscores the importance of diversification for

funds with longer time horizons as a means for moderating risks. For example, in the PSRS and NTRS portfolios this past fiscal year, international stocks soared (up over 22.7 percent for both Systems) while domestic stocks and bonds were disappointments (returns below 6.0 percent).

The internal investment staff and SIS regularly review various aspects of the investment program to ensure that every effort is made to achieve the highest return possible commensurate with an acceptable level of risk at a reasonable cost. To that end, the money market portfolio, which was being managed by an outside service provider, was moved to internal staff in fiscal year 2000. This internalization of a portion of the Systems' assets has resulted in significant cost savings to both PSRS and NTRS. Additionally, staff, in conjunction with SIS, hired seven "smaller" U.S. stock managers to create an equity manager "fund of funds" this past year. It is anticipated that this fund will offer diversification benefits to the existing domestic equity structure while providing the opportunity for excess returns.

The Systems have benefited significantly from the increase in assets over the past decade. Although the extraordinary returns of recent years have begun to moderate, we do anticipate a continuation of the growth in the size and the health of the Systems through continued investments in the capital markets. I look forward to the new millennium and the opportunities that it will bring to further strengthen and build your Retirement Systems.

Sincerely,

Craig A. Husting, CFA
Chief Investment Officer

Investment Highlights

Through June 30, 2000

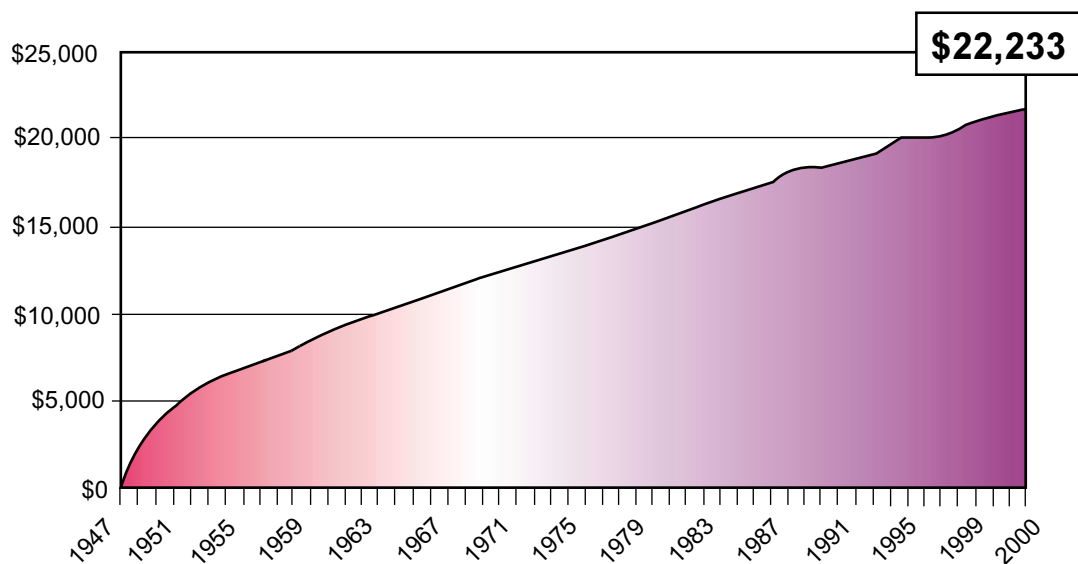

The Board of Trustees of The Public School & the Non-Teacher School Employee Retirement Systems (PSRS and NTRS) is charged with the responsibility of investing the assets of the Systems in a manner consistent with the fiduciary standards set forth in the “prudent man” rule. To that end, the Board has adopted the following principles to guide all investment-related decisions:

- (1) Act in exclusive interest of the members of the System,
- (2) Maximize total return within prudent risk parameters,
- (3) Preserve the long-term purchasing power of the fund.

The investment portfolios of PSRS and NTRS represent all contributions to the plans, from both members and their employers, as well as all net earnings on these assets. These funds are held in support of both future and current liabilities. Total assets as of June 30, 2000 grew to \$22.2 billion from \$20.7 billion as of June 30, 1999, increasing by approximately \$1.5 billion. The growth in assets since the inception of PSRS in 1946 and NTRS in 1965 is shown in the graph below.

53 Years of Growth

(dollar amounts in millions)

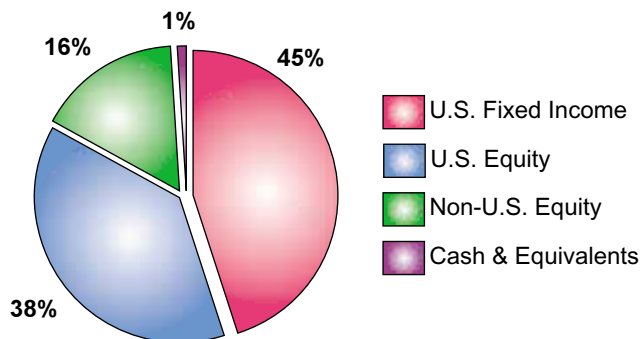

PSRS/NTRS Asset Allocation

As of June 30, 2000

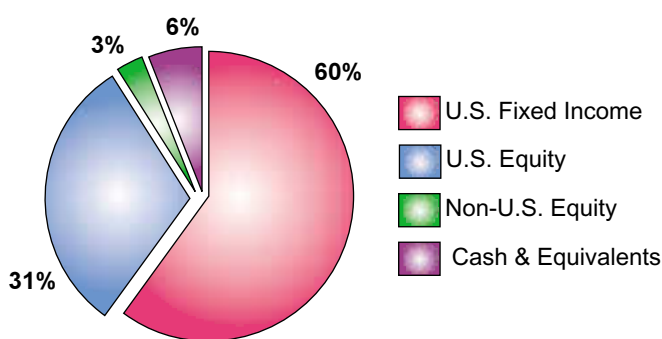

The time horizon of the Systems' investment portfolio reflects the long-term nature of the PSRS/NTRS pension obligations. Accordingly, diversification among investments displaying unique risk and return characteristics provides the framework for selecting an asset allocation that is expected, in the aggregate, to give the funds the highest long-term return within a prudent risk level.

In late 1995, the Board adopted a set of asset allocation targets that increased the exposure to domestic and non-U.S. equities. Those targets were reaffirmed in 1998. The pie charts below demonstrate the evolutionary nature of the asset allocation by presenting the current asset mix of the portfolio for comparison with that of five years ago on a market value basis.

ASSET ALLOCATION 6/30/00

ASSET ALLOCATION 6/30/95

Asset Type	PSRS Market Value	NTRS Market Value	Combined Funds	Percent of Total	Target Allocation
U.S. Fixed Income	\$ 9,368,515,809	\$ 730,076,091	\$ 10,098,591,900	45.4%	47.0%

Total Fund Review

Periods Ended June 30, 2000

Total Fund Investment Returns*

The Board has established a long-term goal to achieve a total investment return of at least 8.0 percent per year, or a real rate of return of at least 4.5 percent per year. The real rate of return is the rate by which the long-term total return exceeds the inflation rate.

The one-year total return for both PSRS and NTRS fell just below the long-term investment objective of 8.0 percent. However, over the past five years, the annualized investment return of 13.6 percent for PSRS and 13.5 percent for NTRS far exceeded the 8.0 percent objective.

	Fiscal Year	Last 3 Years	Last 5 Years
PSRS	7.7%	11.9%	13.6%
NTRS	7.7%	11.8%	13.5%
Public Fund Median **	8.5%	12.0%	13.7%
Policy Benchmark ***	8.7%	11.7%	13.3%

* Returns were prepared using a time-weighted return in accordance with AIMR's Performance Presentation Standards.

** The Public Fund Median is the median return for a large group of Public Funds monitored by the PSRS/NTRS external asset consultant Strategic Investment Solutions, Inc.

*** The policy benchmark is comprised of 38% Russell 3000 Index, 47% Lehman Aggregate Index, and 15% MS All Country World – ex U.S. Free Index.

Fixed Income Review

As of June 30, 2000

Market Value

As of June 30, 2000, the combined PSRS and NTRS fixed income portfolio had a market value of just over \$10 billion, representing 45.4 percent of the total funds.

Fixed Income Review

As of June 30, 2000

Fixed Income Structure

As of June 30, 2000, 40.0 percent of the PSRS/NTRS fixed income portfolio was passively managed by State Street Global Advisors while the remaining 60.0 percent was managed actively by four separate external managers. The basic fixed income portfolio structure was implemented in July 1996. There was one strategic investment change in February 2000 when the Board selected a “core plus” bond manager to further diversify the fixed income portfolio. The “core plus” assignment allows an external investment manager to invest in all major sectors of the fixed income market within defined guidelines.

The pie charts below depict the fixed income composite by showing the current sector allocation of the portfolio compared with that of five years ago on a market value basis.

SECTOR ALLOCATION 6/30/00

SECTOR ALLOCATION 6/30/95

Fixed Income Investment Advisors

The following firms were under contract with PSRS/NTRS during all or some portion of FY 00 for management of fixed income securities.

Investment Advisor	Combined Portfolio Market Value Investment Style	Market Value	% of Total As of June 30, 2000
Agincourt Capital Management	Active Core	\$ 0	0.0%

Wellington Management Company	Active Core	\$ 1,540,049,267	6.9%
Total		\$ 10,101,728,976	45.4%

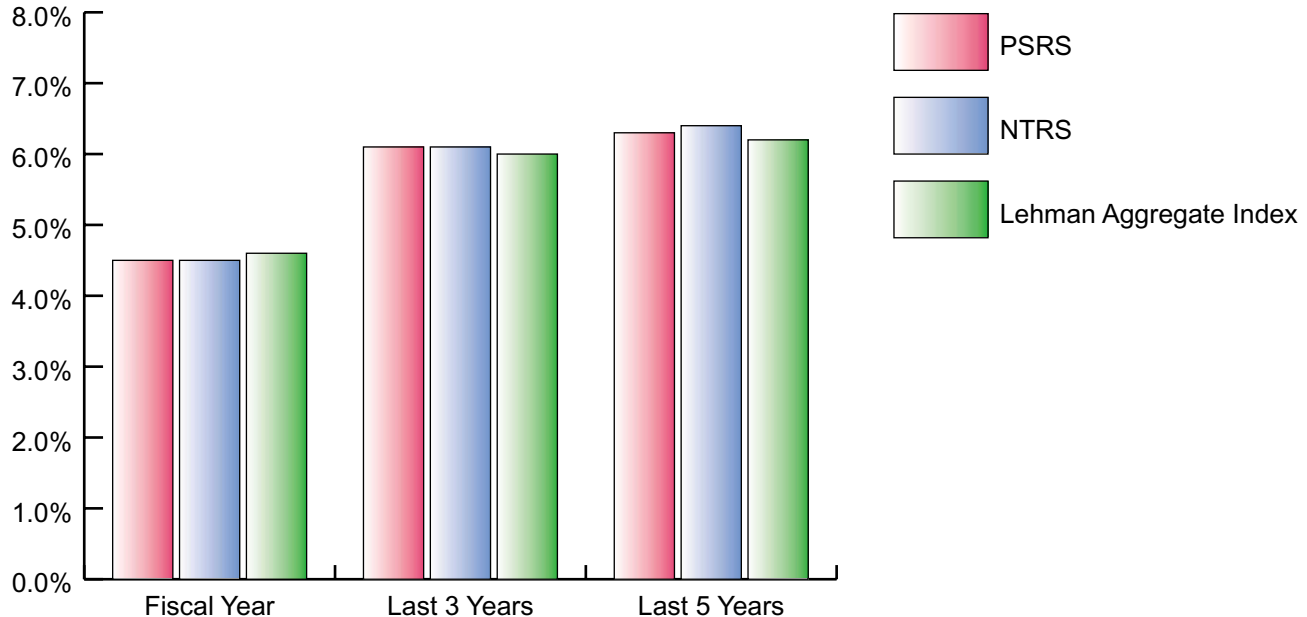

Fixed Income Review

Periods Ended June 30, 2000

Fixed Income Returns

The total return on the PSRS and NTRS bond portfolios for the fiscal year was 4.5 percent, slightly below the program's benchmark of 4.6 percent. This below-average performance was caused by a moderate increase in interest rates and wider credit and liquidity risk premiums. Over the five-year period ending June 30, 2000, PSRS has returned 6.3 percent and NTRS 6.4 percent compared to the benchmark return of 6.2 percent.

	Fiscal Year	Last 3 Years	Last 5 Years
PSRS	4.5%	6.1%	6.3%
NTRS	4.5%	6.1%	6.4%
Lehman Aggregate Index	4.6%	6.0%	6.2%

Domestic Equity Review

As of June 30, 2000

Market Value

As of June 30, 2000, the combined PSRS and NTRS domestic equity portfolio had a market value of almost \$8.4 billion, representing 37.7 percent of the total funds.

Domestic Equity Statistics

The following table displays the statistical characteristics of the PSRS/NTRS domestic equity portfolio as of June 30, 2000 with comparisons shown to the portfolio's policy benchmark (Russell 3000). Additionally, the top U.S. stock holdings as of June 30, 2000 are compared to the top ten holdings of five years ago.

Domestic Equity Review

As of June 30, 2000

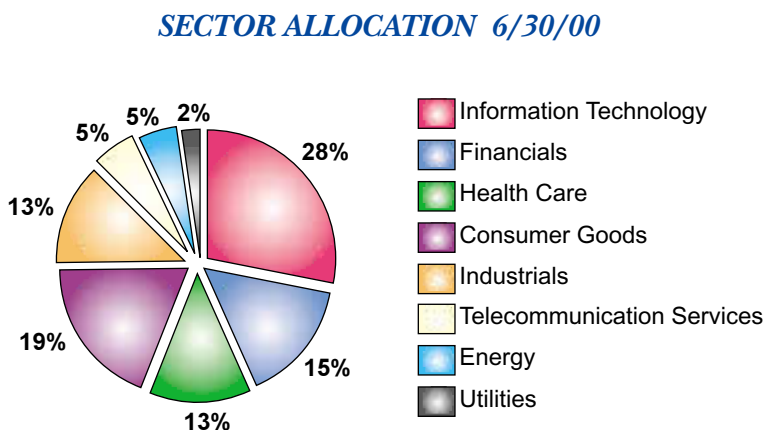

Domestic Equity Structure

As of June 30, 2000, 40.0 percent of the PSRS/NTRS domestic equity portfolio was passively managed. Another 19.0 percent was managed in an enhanced index style, in which the managers' guidelines permitted limited flexibility with the expectation of capturing additional return relative to the benchmark. The remainder of the portfolio was actively managed and diversified across a broad range of investment styles. The basic domestic equity portfolio structure was implemented in July 1996.

The pie charts below depict the domestic equity portfolio by presenting the current asset mix (by style) of the portfolio for comparison with that of five years ago on a market value basis.

The following pie chart shows the allocation to sectors within the domestic equity market for the PSRS/NTRS portfolio as of June 30, 2000.

Domestic Equity Review

Periods Ended June 30, 2000

Domestic Equity Returns

The total return on the PSRS and NTRS domestic equity portfolios was 5.9 percent and 6.0 percent respectively compared to the benchmark return of 9.6 percent for the fiscal year ended June 30, 2000. The shortfall can be primarily attributed to the underperformance of the Systems' active large cap value managers and a market that was carried by narrow outperformance in a select few mid-capitalization growth companies.

While the underperformance relative to the broad market is never easy to accept, the board and staff believe that diversification across all capitalization ranges and styles as well as a balance between active and passive managers remains a primary fiduciary responsibility.

	Fiscal Year	Last 3 Years	Last 5 Years
PSRS	5.9%	17.3%	21.5%
NTRS	6.0%	17.4%	21.6%
Russell 3000 Index	9.6%	19.2%	22.8%

Non-U.S. Equity Review

As of June 30, 2000

Market Value

As of June 30, 2000, the combined PSRS and NTRS non-U.S. equity portfolio had a market value of just over \$3.5 billion, representing 16.0 percent of the total funds.

Non-U.S. Equity Statistics

The following table displays the top ten non-U.S. stock holdings as of June 30, 2000 as compared to the top ten holdings of five years ago.

Top Ten Largest Holdings* June 30, 2000	Combined Market Value	% of Total Non-U.S. Equities	Top Ten Largest Holdings* June 30, 1995	PSRS** Market Value	% of Total Non-U.S. Equities

* Includes only actively managed separate accounts.

** NTRS did not have non-U.S. equity holdings as of June 30, 1995
 A complete list of portfolio holdings is available upon request.

Non-U.S. Equity Review

As of June 30, 2000

Non-U.S. Equity Structure

As of June 30, 2000, approximately 25.0 percent of the PSRS/NTRS non-U.S. equity portfolio was passively managed by State Street Global Advisors while the remaining 75.0 percent was managed actively by three separate external managers. The basic non-U.S. stock portfolio structure was implemented in July 1996. There was one strategic investment change in April 1999 when the Board decreased the passive exposure to non-U.S. equities from 33 percent to 25 percent and selected a third active manager.

The pie chart below presents a breakdown of investments in developed and emerging markets in the non-U.S. equity portfolio and the bar graph depicts the specific country exposure within the broad international market.

Market Allocation

Country Allocation

Non-U.S. Equity Investment Advisors

The following firms were under contract with PSRS/NTRS during FY 00 for management of non-U.S. equity securities.

Investment Advisor	Combined Portfolio Market Value Investment Style	% of Total As of June 30, 2000	Market Value
Bank of Ireland Asset Management	Active Core	\$ 933,994,482	4.2%
NVESCO Global Asset Management	Active Value	\$ 903,585,133	4.1%
Oechsle International Advisors	Active Core	\$ 904,826,522	4.1%

Total		\$ 3,626,095,170	16.4%

Non-U.S. Equity Review

Periods Ended June 30, 2000

Non-U.S. Equity Returns

The total return on the PSRS and NTRS non-U.S. equity portfolios was 22.7 percent and 22.8 percent respectively compared to the benchmark return of 18.1 percent for the year ended June 30, 2000. Both Systems benefited from extraordinary returns in the non-U.S. equity markets and superior performance by the active non-U.S. equity managers. The three year results for NTRS and the three and five year results for PSRS placed the Systems' portfolio in the top 30.0 percent of the ICC (large Public Fund) International Equity universe monitored by the PSRS/NTRS external asset consultant, Strategic Investment Solutions.

	Fiscal Year	Last 3 Years	Last 5 Years
PSRS	22.7%	13.9%	16.7%
NTRS	22.8%	14.0%	N/A*
MSCI All Country World - ex U.S. Free	18.1%	8.0%	10.4%

* NTRS did not have non-U.S. equity holdings in FY 96.

Board of Trustees
Public School Retirement System of Missouri
Non-Teacher School Employee Retirement System of Missouri
701 W. Main
PO Box 268
Jefferson City, MO 65102

Re: Certification of Actuarial Results

Dear Members of the Board:

At your request, we have performed actuarial valuations of The Public School Retirement System and the Non-Teacher School Employee Retirement System of Missouri as of June 30, 2000. An actuarial valuation of each system is performed annually.

The actuarial valuation is based upon:

- a. *Data relative to the members of the Systems* - Data for all members of each system was provided by the staff. Such data is tested for reasonableness by the actuary but is used unaudited.
- b. *Assets of the Fund* - The values of the trust fund assets for each system are provided by the staff. The market value of assets is used to develop actuarial results.
- c. *Actuarial Method* - The actuarial method utilized for each system is the Entry Age Normal Cost Method. The objective of this method is to finance the benefits of the systems as a level percentage of pay over the entire career of each member. Any Unfunded Actuarial Accrued Liability (UAAL) under this method is separately financed. All actuarial gains and losses under this method are reflected in the UAAL.
- d. *Actuarial Assumptions* - The actuarial assumptions used in the valuation of each system are summarized in the next few pages. This set of assumptions was adopted by the Board effective June 30, 1997.

The actuarial assumptions and methods used are in accordance with paragraph 36 of GASB Statement Number 25.

The trend data in the Financial Section and the schedules and other data in this Section are prepared by the staff with our guidance.

BOARD OF TRUSTEES

-2-

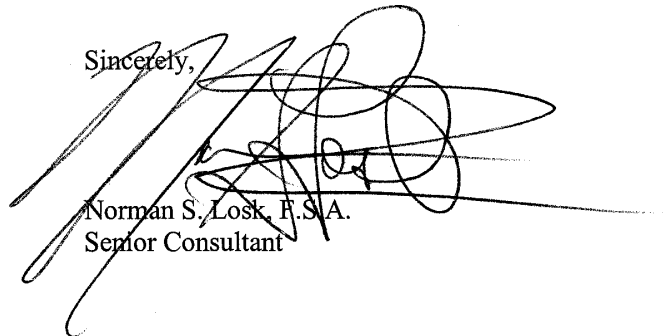

NOVEMBER 3, 2000

The Board's statement of funding policy provides that:

1. The Board of Trustees shall adopt actuarial assumptions, each of which individually represents a reasonable long-term estimate of anticipated experience under the system, derived from experience studies conducted every fifth year.
2. The actuarial funding method used shall be the Entry Age Normal Method with normal costs calculated as a percentage of payroll.
3. It shall be the general objective to maintain an amortization period of 30 years or less in the funding of the Unfunded Actuarial Accrued Liability. Whenever a change is made in a system's benefit and contribution rate structures, the amortization period for the system after this change should not exceed 30 years initially.
4. If an escalation in future payroll is assumed in determining the amortization payments toward the Unfunded Actuarial Accrued Liability, then the annual rate of such escalation shall not exceed the expected rate of expansion in total system payroll based upon the actuarial assumptions.
5. Assets used in the actuarial valuation shall be valued using adjusted market values averaged over a period of five years.
6. Annual actuarial valuations shall be made of the system's assets and liabilities. The contribution rate shall be established based on the results of these valuations.

The results of the valuations are based on the data and actuarial techniques described above and on the provisions of each system at the valuation date. Based on these items, we certify these results to be true and correct.

Sincerely,

Norman S. Losk, F.S.A.
Senior Consultant

PSRS Summary of Actuarial Assumptions and Methods

Mortality -

Sample rates per 1,000 members by ages: (effective 6/30/97)

Active and Service Retired Members, Beneficiaries and Survivors

<u>Age</u>	<u>Male</u>	<u>Female</u>
20	0.507	0.284
40	0.999	0.652
60	7.090	3.863
80	55.861	35.362
100	301.298	256.712

Interest -

8% per annum compound, net of expenses. (1980)

Termination -

Illustrate per 1000 members (male and female): (1994)

<u>Age</u>	<u>First Year</u>	<u>Second Year</u>	<u>Third Year</u>	<u>After Three Years</u>
20	140	110	100	35
30	120	100	80	31
40	100	90	60	21
50	90	70	40	8

Salary Increases -

Sample annual rates varying by age: (effective 6/30/97)

<u>Age</u>	<u>Increase</u>	<u>Age</u>	<u>Increase</u>
20	10.5%	50	5.5%
30	8.0	60	5.0
40	6.5		

Retirement Rates -

Sample rates per 1000 eligible members: (effective 6/30/97)

<u>(1) Age 60</u>		<u>(2) Below 60</u>		<u>(3) Below 60, Less Than 30 Years</u>	
<u>Age</u>	<u>5 Years</u>	<u>Service</u>	<u>With 30 Years</u>	<u>Before (1) or (2), After 55/25</u>	
60	250	30	300	First Year Eligible	200
62	200	31 & over	150	Thereafter	150
65	400				
67	300				
70+	1000				

Asset Valuation -	Based on five year average of adjusted market values. (1994)
Payroll Increase -	Total covered payroll is assumed to increase 5.0% per year. (effective 6/30/97) Membership is not assumed to increase.
Inflation -	3.5% per annum compound. (effective 6/30/97)
Actuarial Method -	Entry Age Normal Funding Method is used. Gains and losses are reflected immediately in the unfunded actuarial accrued liability of the System, and amortized in the future as a level percentage of payroll. (1947)
Other -	In addition to the above, other assumptions are made with respect to the incidence of disability, the rates of retirement under a special temporary program, mortality of disabled lives, the probability that a member has a spouse, minor children and the ages of the children. (effective 6/30/97)
COLA -	3.5% per year. (effective 6/30/97)

PSRS Summary Plan Description

The Public School Retirement System of Missouri (PSRS) became operative July 1, 1946. It was established by an Act of the Missouri Legislature and is governed by Chapter 169 of the *Revised Statutes of Missouri*. Its purpose is to provide benefits to members and their dependents at retirement or in the event of death or disability prior to retirement.

PSRS is a defined benefit plan funded on an actuarial reserve basis, which guarantees availability of funds to pay benefits as prescribed by law. The system is established as an independent trust fund and is not subject to direction by any state agency. Administrative expenses are paid entirely out of investment earnings.

Administration

The administration of PSRS is vested in a seven-member Board of Trustees, composed of three elected PSRS members, one elected Non-Teacher School Employee Retirement System (NTRS) member, and three appointed trustees. The four elected trustees are selected by vote of the members and retirees of both systems. Two are elected each even-numbered calendar year to serve four-year terms. The three appointed trustees, one of whom must be a PSRS or an NTRS retiree, are named by the governor. The appointed trustees must be residents of school districts included in the retirement system but not employees of such districts nor state employees nor a state elected official. The Board appoints an Executive Director who is responsible for employment of the retirement office staff, routine operation of the system, and advising the Board on all matters pertaining to the system.

Member Participation

PSRS membership is automatic, regardless of position, for certificated, full-time employees of public school districts in Missouri (except the St. Louis and the Kansas City school districts), public junior college districts in Missouri, and of PSRS. Certificated, part-time employees whose services would qualify them for membership in the Non-Teacher School Employee Retirement System are contributing members of PSRS unless NTRS membership is elected.

Members working in covered employment are considered *active* members. Such members contribute 10.5 percent of gross salary to PSRS. The contributions are deducted and remitted by the employer and are credited by PSRS to individual member accounts. Since July 1, 1989, member contributions have been tax-deferred for federal and state income tax purposes under IRS 414(h)(2). Contributions are not considered income for such purposes until they are paid as a lump sum refund or monthly benefits.

Members not working in covered employment are considered *inactive* members.

Interest at a rate set each year by the Board of Trustees is credited to individual member accounts each June 30 on the previous June 30 balance. The rate credited on June 30, 2000 was 6%.

In addition to credit earned for covered service, members may purchase credit in various categories including several types of leave, outside school service, other public and private employment, active U.S. military duty, and service under the federal Uniformed Services Employment and Re-employment Rights Act of 1994 (USERRA).

Employer Participation

The employers served by PSRS withhold members' contributions from salary payments and match those contributions at a current rate of 10.5 percent of payroll. Employer contributions and investment earnings on those funds are placed by PSRS in a general reserve account to pay monthly benefits to retirees and to beneficiaries of deceased members. Employers are responsible for remitting contributions promptly and for furnishing contribution information and new membership records to PSRS. Employers also provide record data when members apply for benefits or for refunds upon termination of employment.

Survivor Benefits

The designated beneficiary of a member who dies before retirement is eligible for a lump sum refund of the member's contributions and interest. If the beneficiary is an eligible dependent and the member dies while in covered employment with at least two years of credit for such service, or while eligible for disability retirement benefits, monthly survivor benefits based on a percentage of the member's salary for the last full year of covered service can be elected instead of the contribution refund.

In lieu of a lump sum refund or monthly survivor benefits, survivors with an insurable interest and disability retirees may elect to receive monthly benefits under the Option 2 retirement plan. Such benefits are payable when the member would have been eligible for early or normal retirement.

Refund of Contributions

Member contributions and interest are fully refundable upon termination of service or death. All credit and benefit rights are forfeited upon voluntary withdrawal or automatic termination of membership.

A member may, upon returning to covered employment, reinstate the credit forfeited through termination of a previous membership by repaying the money refunded plus interest.

Membership Termination

Membership is terminated by death, retirement, withdrawal of contributions, or absence from covered employment by a non-vested member for five consecutive school years.

Disability Retirement Benefits

Disability retirement benefits are payable to eligible members who because of permanent disability are unable to earn a livelihood in any occupation. In most instances, the disability retirement benefit is calculated at 50 percent of the member's salary for the last full year of creditable service.

Service Retirement Benefits

Service retirement benefits are payable to members who have terminated covered employment and have met certain eligibility requirements.

Benefit Formula—All service retirement benefits are based on a formula which multiplies final average salary by the applicable formula factor, by the years of credit and, in the case of early retirement, by an age reduction factor. Final average salary is obtained by dividing the total salaries for the 3 highest consecutive years of service by 36; the applicable factor is determined by the type of retirement eligibility; total credit is the amount accumulated at retirement for covered service and purchased credit; and the age factor, where applicable, is determined by the age at retirement.

Normal Retirement—A member may retire with benefits calculated under the standard (.025) formula factor at age 60 with 5 years of credit, at any age with 30 years of credit, or when a combination of age and service credit equals 80. A special provision in effect until July 1, 2003 allows members under age 55 with 25.0 – 29.9 years of credit to retire with benefits calculated under a modified formula factor ranging from .022 to .024 but with no age reduction factor applied.

Early Retirement—A member may retire with benefits calculated under the standard (.025) formula with an age reduction factor applied, at age 55 with 5 years of credit or at any age with 25 years of credit.

Payment Options—A retiring member may elect to receive the maximum benefits payable under the Single Life option, or may elect to receive a reduced benefit under one of three Joint-and-Survivor options or under one of two Term-Certain options, to provide survivor benefit coverage in varying degrees after the retiree's death.

Certain benefit minimums apply to normal or early retirement with 15 or more years of credit. The minimums for 15 but fewer than 25 years of credit are reduced if a Joint-and-Survivor or a Term-Certain option is elected and/or if an age factor is applicable because of early retirement. The minimums for 25 or more years of credit are reduced only if a Joint-and-Survivor or a Term-Certain option is elected.

Post-Retirement Increases

Cost-of-living adjustments (COLAs) are provided beginning the third January after retirement to service and disability retirees, and to Joint-and-Survivor beneficiaries of deceased retirees. The third January COLA eligibility pertains to those individuals who began receiving benefits effective July 1, 2000, or after. The annual COLA, not to exceed 5%, is based on the increase in the cost of living as measured by the Department of Labor Consumer Price Index for the previous fiscal year and is applied to the current benefit of each eligible recipient. Lifetime COLAs are limited to 80% of the original retirement benefit. The 80% lifetime COLA limit became effective July 1, 2000.

Benefits Guide

A benefits guide containing detailed information concerning the retirement program can be obtained from the retirement office upon request.

NTRS Summary Plan Description

The Non-Teacher School Employee Retirement System of Missouri (NTRS) was established by an Act of the Missouri Legislature effective November 1, 1965, and is governed by Chapter 169 of the *Revised Statutes of Missouri*.

The plan's purpose is to provide benefits to members and their dependents at retirement or in the event of death or disability. The plan is funded on an actuarial reserve basis, which guarantees availability of funds to pay benefits as prescribed by law.

Administration

The statutes provide that the responsibility for the operation and administration of the retirement system is vested in The Public School Retirement System (PSRS) Board of Trustees sitting as the Board of Trustees for NTRS. The Board is comprised of three elected PSRS members, one elected Non-Teacher School Employee Retirement System (NTRS) member and three appointed trustees. The four elected trustees are selected by vote of the members and retirees of both systems. Two are elected each even-numbered calendar year to serve four-year terms. The three appointed trustees, one of whom must be a PSRS or an NTRS retiree, are named by the governor. The appointed trustees must be residents of school districts included in the retirement system but not employees of such districts nor state employees nor a state elected official.

The Board appoints an Executive Director who is responsible for employment of the retirement office staff and routine operation of the system, and who acts as advisor to the Board on all matters pertaining to the system.

Member Participation

Active Members—are currently working in covered employment. Beginning in 1999-2000, employees contribute 4.5 percent of their gross salary to a member contribution account. These amounts are deducted by the employing district and then forwarded to NTRS by the payroll officer and applied to the member's account in the NTRS. NTRS membership is automatic, regardless of position, for all persons not covered by The Public School Retirement System who are regularly employed for 20 or more hours a week by the public school districts in Missouri (except the St. Louis and the Kansas City school districts), public junior college districts in Missouri, and of the retirement system.

NTRS membership can be elected by employees with Missouri teaching certificates who work ***in any position*** for 20 or more hours weekly but less than full time; however, PSRS membership is automatic if NTRS election is not made. The election to join NTRS must be filed with the Board of Trustees within 90 days after entering first time, part-time employment.

Since July 1, 1989, member contributions have been tax-deferred for federal and state income tax purposes under IRC 414(h)(2). Contributions are not considered as income for federal or state income tax purposes until they are paid in a lump-sum refund or in monthly benefits.

Individual accounts are maintained for all contributory members. Interest is credited each June 30 on the previous June 30 balance. The interest rate set annually by the Board of Trustees was 6 percent on June 30, 2000. Since NTRS is a defined benefit plan, benefits are based upon the member's final average salary and years of creditable service. The amount of interest credited to a member's account has no bearing on the monthly benefit amount payable at retirement.

Inactive Members—have contributions on deposit with NTRS but are not currently working in covered employment.

Member's Survivors—When a member dies before retirement, the designated beneficiary becomes eligible for a lump sum refund of the employee's contributions and interest. In lieu of the lump sum refund, beneficiaries with an insurable interest and disability retirees may elect to receive monthly benefits under the Option 2 retirement plan. Benefits are payable to the beneficiary under the Option 2 plan when the member would have been eligible for early or normal retirement.

Membership Termination

Membership in the System is terminated by withdrawal of contributions, unemployment in a covered position for five consecutive school years if the member is not vested, death, or retirement.

Employer Participation

The employers served by NTRS withhold members' contributions from salary payments and match employee contributions at a current rate of 4.5 percent of payroll. Employer contributions and investment earnings on those funds are placed in a general reserve account to pay monthly benefits to retirees and to beneficiaries of deceased members. It is the responsibility of the employers to remit contributions to the retirement system promptly and to supply NTRS with new membership records and members' contribution information. Employers also provide needed data when member's apply for benefits or refund of contributions upon termination of employment.

Refund of Contributions

Member contributions plus interest are fully refundable upon termination of service or death. All credit and benefit rights are forfeited upon voluntary withdrawal or automatic membership termination. Voluntary withdrawal is available to members who cease covered employment. Automatic termination occurs when a non-vested member is absent from covered employment for five consecutive years. Only the money the member has contributed and accrued interest are refundable.

A member may, upon returning to covered employment, reinstate the credit forfeited through termination of a previous membership by repaying the money withdrawn plus interest.

Service Retirement Benefits

Service retirement benefits are payable to persons who have terminated employment and who have met age and service requirements.

Benefit Formula—All service retirement benefits are based on a formula which multiplies final average salary by the applicable formula factor, by the years of credit and, in the case of early retirement, by an age reduction factor. Final average salary is obtained by dividing the total salaries for the three highest consecutive years of service (effective 7/1/00) by 36 (effective 7/1/00); the applicable factor is determined by the type of retirement eligibility; total credit is the amount accumulated at retirement for covered service and purchased credit; and the age factor, where applicable, is determined by the age at retirement.

Because of the conversion of the system from a formula integrated with Social Security to the present basis, a special "frozen benefit" is in effect for certain members for service prior to July 1, 1973.

Normal Retirement—A member may retire with benefits calculated under the standard (.0151) formula (effective 7/1/00) at age 60 with 5 years of credit, at less than age 50 with at least 30 years of service, and at the point where the member's age plus creditable service equals or exceeds 80 (Rule of 80). Effective 7/1/00, a member may retire under the standard (.0151) formula when the member qualifies for Rule of 80 or 30 and out AND will receive an additional .4 multiplier until he/she qualifies for Social Security benefits (currently age 62). A special provision in effect until July 1, 2003 allows members under age 55 with 25.0-29.9 years of credit to retire with benefits calculated under a modified formula factor ranging from .0141 to .0149 but with no age reduction factor applied.

Early Retirement—A member may retire with benefits calculated under the standard (.0151) formula (effective 7/1/00) with an age reduction factor applied, at age 55 with 5 but fewer than 25 years of credit

Options— A retiring member may elect to receive the maximum benefits payable under the Single Life option, or may elect to receive a reduced benefit under one of three Joint-and-Survivor options or under one of two Term-Certain options, to provide survivor benefit coverage in varying degrees after the retiree's death.

Creditable Service—Credit is allowed for eligible service both before and after the system began on November 1, 1965. *Prior service credit* is granted for complete years of eligible service before November 1, 1965. The credit is

allowed without contributions, but it does require filing a claim. *Membership service credit* is allowed for services after November 1, 1965 for which retirement contributions are remitted or credit is purchased. In addition to credit earned for covered service, members may purchase credit in various categories including several types of leave, outside school service, other public and private employment, active U.S. military duty, and service under the federal Uniformed Services Employment and Re-employment Rights Act of 1994 (USERRA).

Disability Retirement Benefits

Disability retirement benefits are payable to persons who have met age, service, and eligibility requirements and who because of permanent disability are unable to earn a livelihood in any occupation. The disability retirement benefit is calculated at 90 percent of the normal service retirement.

Cost-of-Living Adjustments

Cost-of-living adjustments (COLAs) are provided starting the fourth January after retirement. The annual COLA is not to exceed 5 percent, is based on the Department of Labor Consumer Index for the previous fiscal year and is applied each January to current benefit payments for eligible retirees and beneficiaries. Total lifetime COLAs are limited to 75 percent of the original retirement benefit.

Handbook

A handbook which furnishes more complete information concerning provisions of the NTRS law and regulations can be obtained from the retirement office.
