

**Comprehensive
Annual Financial Report
for the year ended
June 30, 2001**

Mission Statement

The Public School Retirement System of Missouri and the Non-Teacher School Employee Retirement System of Missouri (PSRS and NTRS) work in partnership with the member school districts of this state to provide eligible employees and their beneficiaries with a significant source of income based on the employee's length of service and compensation in order to enhance retirement, disability and death benefits received from other sources.

It is the fiduciary responsibility of those charged with administration of PSRS and NTRS to:

- ❖ effectively collect contributions,
- ❖ prudently invest the assets to obtain optimum returns,
- ❖ equitably provide benefits, and
- ❖ impartially and in accordance with applicable law administer the benefit programs.

The Board of Trustees and staff are committed to providing services to the members and beneficiaries professionally, promptly, courteously, and efficiently.

Mission Statement Principles

- ❖ We will conduct the business of the retirement systems in accordance with the mission statement.
- ❖ We will act as fiduciaries in the management of all funds for the exclusive benefit of our members.
- ❖ We will adhere to our investment policy to ensure the highest possible investment return consistent with the prudent investment of plan assets.
- ❖ We will have as our goal the replacement of 80% of a member's final average salary after a 30-year career through the combination of income from public pensions and, where applicable, the federal social security system.
- ❖ We shall have as our goal the retention of purchasing power of the initial retirement benefit through the retirement years.
- ❖ We will maintain an independent retirement system that retains the power of the trustees to set actuarial assumptions, appoint consultants, employ staff, establish a budget and conduct all business of the retirement systems.
- ❖ We will prepare and distribute an annual financial report that adheres to generally accepted accounting principles.
- ❖ We will provide prompt, courteous and accurate service to our members.
- ❖ We will provide clear and complete information to the members and the districts through the use of a summary plan document, newsletters, an annual member account statement and any other documents deemed necessary.
- ❖ We will adhere to the highest standards of ethical conduct.

TO: Board of Trustees and Members of the Retirement Systems:

I am pleased to present the *Comprehensive Annual Financial Report* of the Public School Retirement System of Missouri (PSRS) and the Non-Teacher School Employee Retirement System of Missouri (NTRS) for the fiscal year ended June 30, 2001. The management and staff of the systems are responsible for the accuracy and completeness of this report and for ensuring that all material disclosures have been made. To the best of our knowledge, the information presented is a fair and accurate portrayal of the financial position and operations of PSRS and NTRS as of June 30, 2001.

Report Contents

This report is presented in five sections:

- The Introductory Section contains general information about the retirement systems;
- The Financial Section contains the independent auditors' report, the financial statements and related notes, and required supplemental schedules;
- The Investment Section contains a summary of the investment activities during the year, including investment performance;
- The Actuarial Section reports the funded condition of both systems, including a summary of major actuarial assumptions; and
- The Statistical Section contains general information concerning members, benefit recipients and finances.

Overview of the Retirement Systems

The Public School Retirement System of Missouri, a cost sharing multiple employer retirement system, was established in 1946 by an act of the Missouri legislature to provide retirement, disability and death benefits to full-time, certificated employees in the public schools and four-year regional universities. It has been amended to include part-time employees of public schools and no longer accepts new employees of the regional universities.

Introductory Section

The Non-Teacher School Employee Retirement System of Missouri, also a cost-sharing multiple employer retirement system, was established in 1965 by an act of the Missouri legislature to provide retirement, disability and death benefits to non-certificated school employees in the public schools, community colleges and junior colleges who have elected to join the system.

Financial Information

The systems' financial statements are prepared in accordance with generally accepted accounting principles (GAAP) within the guidelines established by the Governmental Accounting Standards Board (GASB). A system of internal controls is in place to help monitor and safeguard assets and promote efficient operations. An independent certified public accounting firm selected by the Board of Trustees performs a financial audit each year. In addition, the systems employ an internal auditor who performs operational reviews to ensure that control systems are functioning effectively and as intended.

Revenue sources include contributions by members, matching contributions from employers, and investment income. During 2000-2001, PSRS members contributed 10.5% of their earnings and NTRS members contributed 4.5% of their earnings to their respective retirement system. These contributions, as well as the employer matching contributions, are required by state statute. Expenses include the payment of benefits, refunds of member contributions, and administrative expenses. The Board of Trustees approves a budget for administrative expenses before the beginning of each fiscal year.

The additions and deductions to the funds of the systems during the 2000-01 fiscal year are shown in the tables below:

(Dollars in millions)

	<u>PSRS</u>	<u>NTRS</u>	<u>2000-01 TOTAL</u>	<u>1999-00 TOTAL</u>	<u>INC (DEC)</u>
<u>Additions</u>					
Contributions	\$ 660	\$ 75	\$ 735	\$ 693	6%
Net Investment Income	<u>(407)</u>	<u>(29)</u>	<u>(436)</u>	<u>1,569</u>	(128%)
Total	<u>\$ 253</u>	<u>\$ 46</u>	<u>\$ 299</u>	<u>\$2,262</u>	(87%)
<u>Deductions</u>					
Monthly Benefits	\$ 750	\$ 49	\$ 799	\$ 681	17%
Lump-sum Refunds	35	9	44	46	(4%)
Administrative Expenses	<u>4</u>	<u>2</u>	<u>6</u>	<u>6</u>	0%
Total	<u>\$ 789</u>	<u>\$ 60</u>	<u>\$ 849</u>	<u>\$ 733</u>	16%

During the year, 2,628 new service retirees were added to the PSRS monthly rolls, while 978 were added to the NTRS monthly rolls.

Introductory Section

Investment Activities

The past fiscal year proved to be a difficult period for all institutional investors, including PSRS/NTRS. However, our disciplined investment approach and conservative strategy allowed PSRS/NTRS to outperform most of our peers during this period.

The PSRS investment portfolios generated a -1.9% return for the fiscal year while NTRS generated a -1.7% return. Although this return fell below our actuarially assumed rate of 8%, our annualized rate of return for the five-year period ending June 30, 2001 was 10.5% for both systems. Information regarding investment policies and strategies is included in the investment section of this report.

Funding Status

PSRS and NTRS are defined benefit retirement systems. This means that a formula made up of credit (years of service) times final average salary, times a multiplier (2.5% for PSRS and 1.61% for NTRS) creates each member's retirement benefit. The systems are also known as actuarial reserve retirement systems. Thus, a level contribution payment in conjunction with a moveable amortization period determines the relative health of the systems. As of June 30, 2001, PSRS is 99.4% funded, while NTRS is 103.1% funded. The actuarial value of the assets of PSRS is \$21.1 billion while the accrued liability is \$21.3 billion. The actuarial value of the assets of NTRS is \$1.7 billion while the accrued liability is \$1.6 billion.

Major Initiatives During 2000-2001

HB 660

Legislation enacted during the 2001 General Assembly was contained in SCS/HCS//HB 660 and provided for the following benefit increases in PSRS:

- Increased the benefit multiplier from 2.5% to 2.55% for all years of service for members retiring with 31 or more years of credit beginning July 1, 2001 and ending July 1, 2008;
- Increased benefits by \$3 per year of creditable service for members retired before July 1, 2001; and
- Extended remaining benefits to surviving spouses of members of PSRS who remarried before August 28, 1995.

Improvements to NTRS were also contained in SCS/HCS//HB 660 and provided for the following benefit increases:

- Increased the formula factor from 1.51% to 1.61% with coordinating adjustments to the 25 and out factor;
- Increased the temporary benefit from 0.4% to 0.8%;
- Raised the cost-of-living cap from 75% to 80% of the retirement allowance; and
- Added a one-time special consultant benefit of 7.1% for members retired prior to July 1, 2001.

In addition to the above benefit improvements, this bill authorized noncertified employees of statewide, nonprofit educational organizations that serve the active membership of NTRS to

Introductory Section

become members of the system. The bill also directed the four retirement systems serving teacher and nonteacher employees of public schools in Missouri to promulgate joint rules for the recognition of service toward retirement eligibility under any of the systems.

New Facility

Construction on a new facility at 3210 West Truman Boulevard continued throughout the 2000-2001 fiscal year, with the PSRS and NTRS administrative staff moving into the new building in October 2001. The new facility provides easy access from any direction and allows us to better serve our members through an increase in office space. We now have private counseling offices; adequate parking and waiting areas; updated facilities for hosting Board of Trustee meetings; improved conference space; and a technology training area. We are very proud of this new facility and extend an invitation to our members to stop by for a tour when in Jefferson City.

Awards

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to PSRS and NTRS for the Comprehensive Annual Financial Report for the fiscal year ended June 30, 2000. The Certificate of Achievement is a prestigious national award recognizing excellence in the preparation of state and local government financial reports. To be awarded the Certificate of Achievement, a government unit must publish an easily readable and efficiently organized comprehensive annual financial report whose contents meet or exceed program standards. This report must satisfy both generally accepted accounting principles and applicable legal requirements. A Certificate of Achievement is valid for only one year. We believe our current report continues to meet the Certificate of Achievement program requirements and are submitting it to GFOA for consideration again this year.

Professional Services

Certain professional services are provided to the retirement systems by retained consultants. The required opinion letters from two of those consultants, Gabriel, Roeder, Smith and Company, actuaries, and Williams Keepers LLC, independent certified public accountants, are contained elsewhere in this report.

Investment consulting services, as well as investment manager search assistance and investment performance analysis, has been provided by Strategic Investment Solutions, of San Francisco, CA.

Acknowledgements

I would like to express my thanks and gratitude to the Board of Trustees, staff, and consultants who have worked diligently to produce this report and to ensure the successful operation of this retirement system. In addition, I would like to extend my best wishes to Joel Walters who retired in June 2001 from the position of Executive Director after serving the retirement systems for 19 years.

Respectfully submitted,

M. Steve Yoakum
Executive Director

MEXICO

INDEPENDENT AUDITORS' REPORT

The Board of Trustees
Public School Retirement System of Missouri
Non-Teacher School Employee Retirement System of Missouri

We have audited the accompanying statement of plan net assets of the Public School Retirement System of Missouri and the Non-Teacher School Employee Retirement System of Missouri (the System) as of June 30, 2001 and the related statement of changes in plan net assets for the year then ended. These financial statements are the responsibility of the System's management. Our responsibility is to express an opinion on these financial statements based on our audit. The financial statements of the System as of June 30, 2000, were audited by other auditors whose report dated September 8, 2000, expressed an unqualified opinion on those statements.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. These standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the plan net assets of the Public School Retirement System of Missouri and the Non-Teacher School Employee Retirement System of Missouri at June 30, 2001 and the changes in plan net assets for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

Our audit was made for the purpose of forming an opinion on the financial statements taken as a whole. The supplementary schedules of funding progress and employer contributions on pages 28 and 29 are not a required part of the basic financial statements of the System, but are required by the Governmental Accounting Standards Board (GASB). The supplementary information included on pages 30 through 32 is presented for purposes of additional analysis and is not a required part of the basic financial statements of the System. Such information, included on pages 28 through 32, has been subjected to the auditing procedures applied in the audit of the financial statements and, in our opinion, is fairly stated in all material respects in relation to the financial statements taken as a whole.

Financial Section

Notes to the Financial Statements

June 30, 2001

(with Comparative Information for June 30, 2000)

Note 1 — Plan Descriptions

The Board of Trustees of the Public School Retirement System administers two separate retirement systems, the Public School Retirement System (PSRS) and the Non-Teacher School Employee Retirement System (NTRS). The Board of Trustees consists of seven members, three of whom are elected PSRS active members, one an elected active member of NTRS and three persons appointed by the Governor, one of whom must be a retired member of either PSRS or NTRS.

The funds of the two systems are invested in conjunction with each other but each system retains title to its own investments. Each system's assets may be used only for the payment of benefits to the members of the separate system in accordance with the statutes governing that system.

The Public School Retirement System

The Public School Retirement System of Missouri (PSRS) is a mandatory cost-sharing multiple employer retirement system for all full-time certificated employees and certain part-time certificated employees of all public school districts in Missouri (except the school districts of St. Louis and Kansas City) and all public community colleges. The system also includes certificated employees of PSRS, Missouri State Teachers' Association, Missouri State High School Activities Association, and certain employees of the State of Missouri who elected to remain covered by PSRS under legislation enacted in 1986, 1987 and 1989.

PSRS was established as an independent trust fund by an Act of the Missouri General Assembly effective August 1, 1945. Statutes governing the retirement system are found in Sections 169.010-169.141 and Section 169.560-169.595 RSMo. It is a defined benefit plan providing service retirement, death and disability benefits to its members. Service retirement benefits vest after 5 years of creditable service. Members who retire with 5 years of service (on or after age 60), 25 years of service (on or after age 55) or 30 years of service are entitled to an allowance for life determined using a 2.5% formula factor. Members who qualify under the "rule of 80" (service credit and age total at least 80) can also retire using a 2.5% factor. Actuarially reduced retirement benefits are available with 5 to 24.9 years of service at age 55 or with 25 years of service (if not yet age 55). Members who have not yet reached age 55 and do not qualify under the "rule of 80" but who have between 25 and 29.9 years of credit may retire with a lesser benefit formula during a window that will close July 1, 2003. Annual cost-of-living adjustments (COLAs) are provided for eligible service and disability retirees and for surviving beneficiaries receiving payments under optional retirement plans, up to a lifetime maximum of 80% of the original benefit amount.

Contributions — PSRS members were required to contribute 10.5% of their annual covered salary during both fiscal years. The employing districts were required to match the contributions made by employees. The contribution rate is set each year by the Board of Trustees upon the recommendation of the independent actuary within the maximum contribution limit set in Section 169.030 RSMo. Administrative costs are financed through investment earnings. Contributions for employees of the State of Missouri were made by the state in accordance with the actuarially determined contribution rate needed to fund current costs and prior service costs of state employees as authorized in Section 104.342.8 RSMo.

Members — The number of PSRS membership and benefit recipients served by the system at June 30 was:

	<u>2001</u>	<u>2000</u>
Retirees and beneficiaries receiving benefits	29,234	27,238
Inactive members entitled to but not yet receiving benefits	4,203	3,852
Active members: Vested	49,471	49,286
Non-vested	<u>23,217</u>	<u>22,420</u>
Total active members	72,688	71,706
Other inactive members	<u>4,727</u>	<u>3,887</u>
Total	<u>110,852</u>	<u>106,683</u>

Employers — PSRS had 548 contributing employers during both fiscal years.

Financial Section

The Non-Teacher School Employee Retirement System

The Non-Teacher School Employee Retirement System of Missouri (NTRS) is a mandatory cost-sharing multiple employer retirement system for all public school district employees (except the school districts of St. Louis and Kansas City) and community college employees (except the Community College of St. Louis). Employees of covered districts who work 20 or more hours per week on a regular basis and who are not contributing members of the Public School Retirement System of Missouri (PSRS) must contribute to NTRS. Employees of PSRS who do not hold Missouri teaching certificates also contribute to NTRS.

NTRS was established as a trust fund by an Act of the Missouri General Assembly effective October 13, 1965. Statutes governing the retirement system are found in Sections 169.600 - 169.715 and Sections 169.560-169.595 RSMo. The statutes place responsibility for the operation of NTRS on the Trustees of the Public School Retirement System.

NTRS is a defined benefit plan providing service retirement and disability benefits to its members. Service retirement benefits vest after 5 years of creditable service. Members who retire with 5 years of service (on or after age 60), 25 years of service (on or after age 55) or 30 years of service are entitled to an allowance for life. Members who qualify under the "rule of 80" (service credit and age total at least 80) may also retire under the full formula. Beginning July 1, 2000, members qualifying for "Rule of 80" or "30 and out" are entitled to a temporary .4% benefit multiplier until reaching minimum Social Security age (currently age 62). Beginning July 1, 2001, this temporary benefit increased to .8%. Actuarially reduced retirement benefits are available with 5 years of service at age 55. Members who have not reached age 55 but who have between 25 and 29.9 years of credit may retire with a lesser benefit formula within a window that will end July 1, 2003. Annual cost-of-living adjustments (COLAs) up to a lifetime maximum of 80% of the original benefit amount are provided for eligible service and disability retirees and for surviving beneficiaries receiving payments under optional retirement plans.

Contributions — NTRS members were required to contribute 4.5% of their annual covered salary during both fiscal years. The employing districts were required to match the contributions made by their employees. The contribution rate is set each year by the Board of Trustees upon the recommendation of the independent actuary within the contribution restrictions in Section 169.620 RSMo. Administrative costs proportional to its membership size are reimbursed by NTRS to the Public School Retirement System and are financed through investment earnings.

Members – The number of NTRS membership and benefit recipients served by the system at June 30 was:

	<u>2001</u>	<u>2000</u>
Retirees and beneficiaries receiving benefits	13,673	13,061
Inactive members entitled to but not yet receiving benefits	2,498	2,184
Active members: Vested	19,022	18,540
Non-Vested	<u>26,495</u>	<u>24,993</u>
Total active members	45,517	43,533
Other inactive members	<u>11,493</u>	<u>9,827</u>
Total	<u>73,181</u>	<u>68,605</u>

Employers — NTRS had 535 contributing employers during both fiscal years.

Financial Section

Note 2 — Summary of Significant Accounting Policies

Basis of Accounting — The financial statements of both systems were prepared using the accrual basis of accounting. For both systems, member and employer contributions are required by state statute and are recognized in the period in which the employee services are performed. Benefits and refunds are recognized when due and payable in accordance with the statutes governing the systems. Expenses are recognized when the liability is incurred, regardless of when payment is made.

Deposits — Cash balances include the operating balances held by the depository banks. These deposits were fully insured by the FDIC and collateralized as required under Sections 169.045 and 169.640 RSMo at June 30, 2001 and 2000. To maximize investment income, the float caused by outstanding checks is invested in overnight repurchase agreements, thus causing a possible negative book balance. These overnight repurchase agreements are reflected on the Schedule of Investments in Note 4. Cash balances also include short-term securities that are held by the custodial bank to meet future system obligations. The following are the balances of these accounts at June 30:

	<u>2001</u> <u>Book</u>	<u>2001</u> <u>Bank</u>	<u>2000</u> <u>Book</u>	<u>2000</u> <u>Bank</u>
PSRS				
Depository Bank	\$ 18,443,621	\$ 19,943,690	\$ 13,201,473	\$ 15,852,885
Custodial Bank	\$ 23,929,749	\$ 23,929,749	\$ 37,671,648	\$ 37,671,648
NTRS				
Depository Bank	\$ (561,288)	\$ -	\$ (585,598)	\$ -
Custodial Bank	\$ 15,009,127	\$ 15,009,127	\$ 11,368,409	\$ 11,368,409

Receivables — Receivables consist primarily of contributions owed and yet to be remitted by the employing districts, pending investment trades and interest and dividends payable to the systems as of the end of each fiscal year.

Method Used to Value Investments — Investments are reported at fair value on a trade date basis. Securities traded on international exchanges are valued at the last reported sales price at current exchange rates. Mortgages are valued on the basis of future principal and interest payments and are discounted at prevailing interest rates for similar instruments. Investments that do not have an established market are reported at estimated fair value.

Fixed Assets — The building and most other fixed assets are owned by PSRS and are stated at cost less depreciation accumulated since acquisition. The stated value does not purport to represent replacement or realized value. Costs of major additions and improvements are capitalized. Expenditures for maintenance and repairs are charged to operations as incurred. Depreciation is calculated using the straight-line method, with estimated lives ranging from three to forty years in the following major classes: computers and software, three years; vehicles, five years; equipment, five years; building and land improvements, fifteen years; building, forty years.

NTRS owns office equipment purchased before 1997 and follows the same guidelines for depreciation. NTRS reimburses PSRS for the use of fixed assets used by the two systems on a proportional basis. The amount of this reimbursement was \$226,639 in 2001 and \$168,668 in 2000.

Capital Lease — PSRS entered into a three-year lease agreement during 1997-98 for a color copier. In 1998-99 an enhancement was added and recorded at the present value of the enhancement. These agreements qualify as capital leases for accounting purposes, and therefore, have been recorded at the lower of fair market value or the present value of the future minimum lease agreements. The future minimum lease obligations and the net present value of these payments as of June 30, 2001 were \$2,175.

Financial Section

Note 3 — Designations of Net Assets Held in Trust for Pension Benefits

The systems designate the net assets held in trust for pension benefits for specific purposes. All categories are 100% funded except as noted:

PSRS

	<u>2001</u>	<u>2000</u>
<i>Designated for Members' Contributions (Member Reserves) —</i> Accumulation of active and terminated member contributions plus interest.	\$ 4,141,256,015	\$ 3,986,130,419
<i>Designated for the Payment of Benefits to Present Retirees —</i> Transfers from Member Reserves at retirement and an actuarially determined transfer from Operating Reserves to fund the system's obligation for benefit payments and cost-of-living adjustments to current retirees and beneficiary recipients.	9,503,551,714	7,800,384,625
<i>Designated for Additional Deposit Annuities —</i> Accumulation of the additional deposits over and above the contributions required by law. Defined contribution annuity payments are made to current retirees from this reserve.	1,369,729	1,460,237
<i>Designated for Operating Expenses/Benefits to Future Retirees (Operating Reserves) —</i> Accumulation of employer contributions and investment income used to fund future benefit payments, interest on member accounts and administration and maintenance expenses of the system.	6,537,511,175 ¹	8,931,221,735 ²
Net Assets Held In Trust For Pension Benefits	<u>\$20,183,688,633</u>	<u>\$20,719,197,016</u>
Note: ¹ 98.3% funded ² 117.8% funded		

NTRS

	<u>2001</u>	<u>2000</u>
<i>Designated for Members' Contributions (Member Reserves) —</i> Accumulation of active and terminated member contributions plus interest.	\$ 303,324,367	\$ 275,343,498
<i>Designated for the Payment of Benefits to Present Retirees —</i> Transfers from Member Reserves at retirement and an actuarially determined transfer from Operating Reserves to fund the system's obligation for benefit payments and cost-of-living adjustments to current retirees and beneficiary recipients.	565,125,714	467,652,620
<i>Designated for Operating Expenses/Benefits to Future Retirees (Operating Reserves) —</i> Accumulation of employer contributions and investment income used to fund future benefit payments, interest on member accounts and administration and maintenance expenses of the system.	741,595,084 ³	881,674,917 ⁴
Net Assets Held In Trust For Pension Benefits	<u>\$ 1,610,045,165</u>	<u>\$ 1,624,671,035</u>
Note: ³ 106.5% funded ⁴ 119.5% funded		

Note 4 — Investments

Authorization of Investments — Funds for both systems that are in excess of a safe operating balance are invested by the investment agents under policies and procedures established by the Board of Trustees. Chapter 160.040 RSMo as amended effective August 13, 1984, authorizes any investment which a prudent person acting in a like capacity and familiar with similar matters would use in the conduct of an enterprise of a like character and with like aims. Any person with fiduciary responsibility with respect to the retirement systems is covered by this "prudent person" rule.

Financial Section

Categories of Custodial Credit Risk — The Governmental Accounting Standards Board Statement No. 3 requires disclosure of custodial credit risk. Category 1 includes investments that are insured or registered or for which the securities are held by the systems' custodial agent in the name of each system. Category 2 includes uninsured and unregistered investments for which the securities are held by the bank's custodial agent in the name of each system. Category 3 includes uninsured and unregistered investments, which are held by the custodial agent, but not in the systems' names.

A security for purposes of credit risk disclosure is a transferable financial instrument that evidences ownership or creditorship. "Securities" do not include investments made in open-end pooled funds or securities on loan to broker-dealers under the security lending program. Such investments are shown as "not categorized."

Derivatives — The retirement systems are parties to certain financial investments with off-balance sheet risk used in the normal course of business to generate earnings and reduce exposure to fluctuations in market conditions. International security managers are authorized to engage in forward contracts to exchange different currencies at a specified date and rate. These forward contracts involve elements of custodial and market risk in excess of the amount recognized in the Statement of Plan Net Assets. The forward exchange contracts purchased/sold in effect at June 30 are shown below.

	<u>2001</u>	<u>Purchase Value</u>	<u>Fair Value</u>
PSRS	\$ 54,761,282		\$ 53,935,159
NTRS	4,528,267		4,459,761
		<u>2000</u>	<u>Purchase Value</u>
PSRS	\$ 95,669,597		\$ 95,796,542
NTRS	8,046,598		8,054,715

Financial Section

The “Net Appreciation in Fair Value of Investments” found on the Statement of Changes in Plan Net Assets includes for PSRS a net gain on forward contracts and currency disposal of \$9,890,190 during 2000-2001 and a net loss of \$3,090,097 during 1999-2000. NTRS had a similar net gain of \$798,393 during 2000-2001 and a net loss of \$214,973 in 1999-2000.

The retirement systems also participate in three pooled index funds that use off-balance-sheet financing instruments. The derivatives in the S&P 500 Index Fund are S&P 500 futures and those in the Russell 1000 Value Fund are S&P Barra Value futures, both of which are used to accommodate cash flows and to equitize receivables while maintaining tight tracking to the index. The derivatives in the developed country portion of the ACWI World ex-US Fund are also index futures used for the same purposes as in the domestic equity fund. In some emerging market countries, equity swaps are used to achieve part of the exposure. As of June 30, 2001, these off-balance-sheet financial instruments comprised 1.02% of the \$64.4 billion S&P 500 Index Fund, 0.84% of the \$5.1 billion Russell 1000 Value Fund, and 1.42% of the \$10.6 billion ACWI World ex-US Fund. PSRS’ participation in these funds was 3.61%, 13.28%, and 5.88%, respectively. The NTRS exposure was 0.29%, 1.05%, and 0.46%.

On June 30, 2000, off balance sheet financial instruments comprised 0.82% of the \$82.5 billion S&P 500 Index Fund, 2.5% of the \$5.5 billion Russell 1000 Value Fund, and 1.88% of the \$31.7 billion ACWI World ex-US Fund. PSRS’ participation in these funds was 2.92%, 11.51%, and 2.57%, respectively. The NTRS exposure was 0.23%, 0.89%, and 0.20%.

Neither the percentages of participation in the funds nor the funds’ exposure to derivatives differed substantially from the June 30 figures throughout either year.

Security Lending Activity – Under the “prudent person” authority of the governing statutes and in accordance with the policies set by the Board of Trustees, the systems lend securities to broker-dealers and banks pursuant to a form of loan agreement. The systems’ custodial bank is authorized to lend available securities to approved broker-dealers and banks subject to the receipt of acceptable collateral.

During the fiscal year, the systems lent securities and received cash (both U.S. and foreign currency), securities issued or guaranteed by the U.S. government or its agencies, sovereign debt of foreign countries, and irrevocable bank letters of credit as collateral. The systems did not have the ability to pledge or sell noncash collateral absent borrower default. Borrowers were required to deliver collateral for each loan equal to: (1) in the case of loaned securities denominated in U.S. dollars or whose primary trading market was located in the United States, or sovereign debt issued by foreign governments, 102% of the fair value of the loaned securities; and (2) in the case of loaned securities not denominated in U.S. dollars or whose primary trading market was not located in the United States, 105% of the fair value of the loaned securities.

The systems did not impose any restrictions during the fiscal year on the amount of the loans that the custodial bank made on their behalf. There were no failures by any borrowers to return loaned securities or pay distributions thereon during the year. There were no losses during the year resulting from a default of the borrowers or the custodial bank.

The systems and borrowers each maintained the right to terminate all securities lending transactions on demand. The cash collateral received on each loan was invested; together with the cash collateral of other qualified tax-exempt plan lenders in a collective investment pool. The average duration of such investment pool as of June 30, 2001 was 75 days and an average weighted maturity of 548 days. Because the loans were terminable at will, their duration did not match the duration of the investments made with cash collateral. On June 30, 2001 the systems had no credit risk exposure to borrowers because the amounts the systems owe the borrowers exceed the amounts the borrowers owe the systems.

The collateral held (including both cash collateral recognized in the “Statement of Plan Net Assets” and non-cash collateral) and the fair values of securities on loan for PSRS were \$1,703,681,787 and \$1,655,307,037 for June 30, 2001 and \$1,791,900,256 and \$1,736,958,631 for June 30, 2000. Net security lending income was \$12,156,898 for the 2000-2001 fiscal year and \$9,622,204 for the 1999-2000 fiscal year.

The collateral held (including both cash collateral recognized in the “Statement of Plan Net Assets” and non-cash collateral) and the fair values of securities on loan for NTRS were \$167,706,214 and \$141,284,215 for June 30, 2001 and \$158,036,140 and \$154,272,485 for June 30, 2000. Net security lending income was \$1,006,220 for the 2000-2001 fiscal year and \$767,733 for the 1999-2000 fiscal year.

Financial Section

The collective investment pool in which the collateral received from security lending loans is invested has the following characteristics. The fair value of the investments held by the pooled fund is based upon valuations provided by a recognized pricing service. Because the pooled fund does not meet the requirements of Rule 2a-7 of the Investment Company Act of 1940, the fund's investments are valued at fair market value for reporting purposes. The pooled fund is not registered with the Securities and Exchange Commission. The custodial bank and, consequently, the investment vehicles it sponsors (including the pooled fund) are subject to the oversight of the Federal Reserve Board and the Massachusetts Commissioner of Banks. The fair value of the systems' position in the pooled fund is not the same as the value of the fund shares. The systems had no involuntary participation in an external investment pool through this fund and no income from one fund was assigned to another fund by the custodial bank during either fiscal year.

Note 5 – Additional Deposits Program

Section 169.035 RSMo provides for an additional deposits program for PSRS members. Members may make payments above the required defined benefit contribution amount to the retirement system in order to provide a monthly annuity at retirement based on the total of the deposits and interest.

This annuity is in addition to the defined benefit allowance provided by the system. Contributions to the program are tax-sheltered. As of September 1, 1996 new deposits to the program were limited to members currently with deposits in the program. No additional deposits were made during 2000-2001. The deposits and interest of the two members who have not yet retired totaled \$4,978 as of June 30, 2001.

The deposits to the program are included in the investment program of the PSRS defined benefit plan. The additional deposits, program's basis of accounting, and the asset valuation are identical to the defined benefit plan.

Note 6 – Retirement Plans

Section 401 (a) Defined Benefit Plan

All full-time retirement system employees holding a valid Missouri teaching certificate are covered by PSRS. All other eligible employees are members of NTRS. Both systems provide retirement and disability benefits, annual cost-of-living adjustments and death benefits to plan members and beneficiaries. Chapter 169 RSMo contains the statutory provisions of both systems.

PSRS members were required to contribute 10.5% of their annual covered salary during both years. PSRS, as the employer, was required to match that amount. The contribution rate is established and may be amended by the Board of Trustees. Employer contributions to PSRS totaled \$46,644 for the 2000-2001 fiscal year and \$48,122 for 1999-2000. The amounts for these years are equal to the required contributions.

NTRS members were required to contribute 4.5% of their annual covered salary during both years. PSRS, as the employer, was required to match that amount. The contribution rate is established and may be amended by the Board of Trustees. Employer contributions to NTRS totaled \$132,876 for the 2000-2001 fiscal year and \$115,429 for 1999-2000. The amounts for these years are equal to the required contributions.

Section 457 Deferred Compensation Plan

A Section 457 deferred compensation plan is also administered to provide additional retirement benefits for employees. Participation in this plan is voluntary. The level of contributions is elected by the employee, subject to limitations of IRC Section 457. The system matches the employee contributions up to a set maximum. For members of PSRS, the system will match up to \$50 per month. For members of NTRS, the system will match \$50 plus 1.29% of salary per month. Members immediately vest in the matching contributions. Employer matching contributions totaled \$62,189 for the 2000-2001 fiscal year and \$51,325 for the 1999-2000 fiscal year.

Financial Section

Maintenance of individual member accounts and custody of assets have been contracted to a third party administrator and investment custodian. Member contributions are sent directly to the third party administrator by the system. Members can self-direct investments of their contributions and their respective share of matching contributions in a number of investment options. Because the system does not hold the plan's assets and does not have significant administrative responsibilities, the plan's assets and changes in net assets are not reported in the systems' financial statements.

Note 7 — Risk Management

The retirement systems are exposed to various risks of loss related to natural disasters, errors and omissions, loss of assets, torts, etc. The systems have chosen to cover such losses through the purchase of commercial insurance. There have been no material insurance claims filed or paid during the past three years.

The systems have a disaster recovery plan that provides for continued computer operations at a remote location should the retirement office be unavailable for normal operations.

Note 8 – Commitments and Contingencies

PSRS was committed to the future purchase of investments at a cost of \$801,538,387 on June 30, 2001 and to the future purchase of \$1,676,347,259 in investments on June 30, 2000. NTRS had investment commitments of \$73,286,180 on June 30, 2001 and \$133,209,698 on June 30, 2000.

Certain legal proceedings are pending against PSRS and NTRS arising from normal activities which, based on the advice of legal counsel, will not have a material effect on the financial statements.

PSRS is in the process of constructing a new administration building. The total construction contract amount is \$5,657,383. Of this amount, \$4,619,891 has been paid leaving \$1,037,492 outstanding at June 30, 2001.

September 13, 2001

To the Members of the Board:

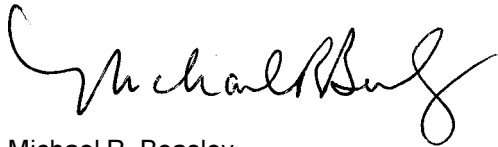

I am pleased to report the performance of the Systems' investments for Fiscal Year 2000-2001, a period of very unsettled worldwide financial markets. While the PSRS/NTRS investments have been structured to control excessive risk, the System's assets were not immune to the decline in the stock markets of the world during this fiscal year.

The Total Fund return for the fiscal year ended June 30, 2001 for PSRS was -1.9 percent, 5.3 percent for the past three years, and 10.5 percent for the past five years. The NTRS returned -1.7 percent for the fiscal year, 5.3 percent for the past three years, and 10.5 percent for the past five years. Both funds exceeded the policy index. The PSRS and NTRS Total Funds trailed its 8 percent actuarial target for the fiscal year, but exceeded it by 2.5 percent for the five-year period.

Asset class performance for the fiscal year was mixed. The US equity return was -9.3 percent for PSRS and -9.4 percent for NTRS, while the fixed income assets returned 11.3 percent and 11.2 percent, respectively. The international equity return was -21.4 percent for PSRS and -21.3 percent for NTRS. All performance results were calculated in compliance with the AIMR Performance Presentation Standards.

The Board spent part of the fiscal year preparing for an asset allocation and liability study that will be conducted in Fiscal Year 2002. The study will review the financial condition of the two Funds and may result in asset mix changes to enhance the funded status. As always, thank you for giving us the opportunity to participate in this partnership with you.

Sincerely,

Michael R. Beasley
Managing Director

Investment Section

November 1, 2001

To the Members of the System:

On behalf of the PSRS and NTRS internal investment staff, I am pleased to present the following reports on the Systems' investments for the fiscal year ending June 30, 2001. The combined PSRS and NTRS Retirement Systems ended the year as one of the 50 largest defined benefit plans in the United States with total assets of \$21.7 billion.

After an 18-year bull market in equities, the world equity markets slumped considerably in the last fiscal year. U.S. stock markets were down 14 percent, the worst single fiscal year performance since 1970. International equity markets were down 24 percent, the worst fiscal year performance since 1974. As a diversified long-term investor, the Systems were not immune to this downturn in the markets and PSRS and NTRS recorded the first negative return since 1994. The total fund performance for the fiscal year ending June 30, 2001 was -1.9 percent for PSRS and -1.7 percent for NTRS while the total annualized fund performance for the five-year period was 10.5 percent for both PSRS and NTRS. The Systems' basic investment objective is to achieve a total return that exceeds the actuarial assumption of 8 percent over rolling five-year periods. Thus, while PSRS and NTRS fell well short of the 8 percent assumption this past year, the objective was clearly achieved over the most recent five-year period. The solid long-term results are due, for the most part, to the ability of the Board of Trustees to operate under long-term policies. This long-term focus allows the Board to adhere to sound investment principles during periods of short-term volatility (such as this past fiscal year) when the markets have low or even negative returns.

The Board and staff strive to achieve superior investment performance within appropriate risk levels and at reasonable cost. To that end, PSRS and NTRS continue to manage the assets of the Systems at a very low cost as the total investment expenses for fiscal year 2001 were approximately \$24 million, or 11 cents per \$100 managed. While \$24 million is meaningful in an absolute sense, the Systems' total expenses were significantly less than the public fund average of 20 cents per \$100 managed.

Fiscal year 2001 proved to be a continuation of the slide in the markets that began at the peak of the technology bubble in March of 2000. From a broad perspective, the right course of action in times of economic uncertainty (for an institutional investor such as the Retirement Systems) is to continue to follow a long-term disciplined investment strategy. The main determinant of a pension fund's long-term success is related to its asset allocation. The Board adopted a diversified allocation in 1995 of 47 percent fixed income, 38 percent domestic equities and 15 percent international equities (that was reaffirmed by the Board in 1998). It is particularly important to note (in light of today's economy) that this is one of the most conservative asset allocations of any public retirement system in the country. Thus, while our total fund return is negative for the year, the diversified portfolio that has been implemented has provided substantial downside protection against the falling equity markets. Furthermore, the implementation of the asset allocation (specifically the active managers employed by the Systems) provided additional protection as the total fund outperformed the policy benchmark by \$475 million or 2.2 percent during the last fiscal year.

The Systems have benefited significantly from the increase in assets over the past decade. However, the world has changed. Today's challenges were unthinkable two years ago. Remember the stock market's aura of invincibility? Inflation had been overcome. The economic cycle had been repealed. Stocks minted double-digit annual gains with ease. Obviously, the investment horizon that now lies ahead is more challenging and more uncertain. Thus, it has

Investment Section

become increasingly important for the Board and staff to make solid investment decisions going forward. To meet that challenge, the Board of Trustees, the internal investment staff and the Systems' asset consultant have spent the last year researching different asset classes and conducting in-depth analyses to restructure the asset allocation. The objective of this process is to ensure the optimal allocation of funds among asset classes given the Systems' return requirements, risk tolerance and liability stream. The challenge for any plan sponsor is to develop an allocation strategy with a high probability of meeting all of the fund's objectives. In today's environment, declining asset growth and economic uncertainty further exasperates this challenge. The asset allocation study will be completed in the coming year and will most likely include subtle changes to the allocation. As always, the decisions will not be made in a vacuum, but instead will be based on reliable information and an accurate understanding of the Retirement Systems' liabilities.

We fully expect a continuation of the health of the Systems through a disciplined investment strategy in a diversified portfolio of securities. In the end, it's about paying the benefits that you, the member, have been promised. Rest assured that the Board and staff are continually working to ensure that the Systems' assets are positioned to provide long-term financial security to the members of the Retirement Systems.

Sincerely,

Craig A. Husting, CFA
Chief Investment Officer

Investment Highlights

As of June 30, 2001

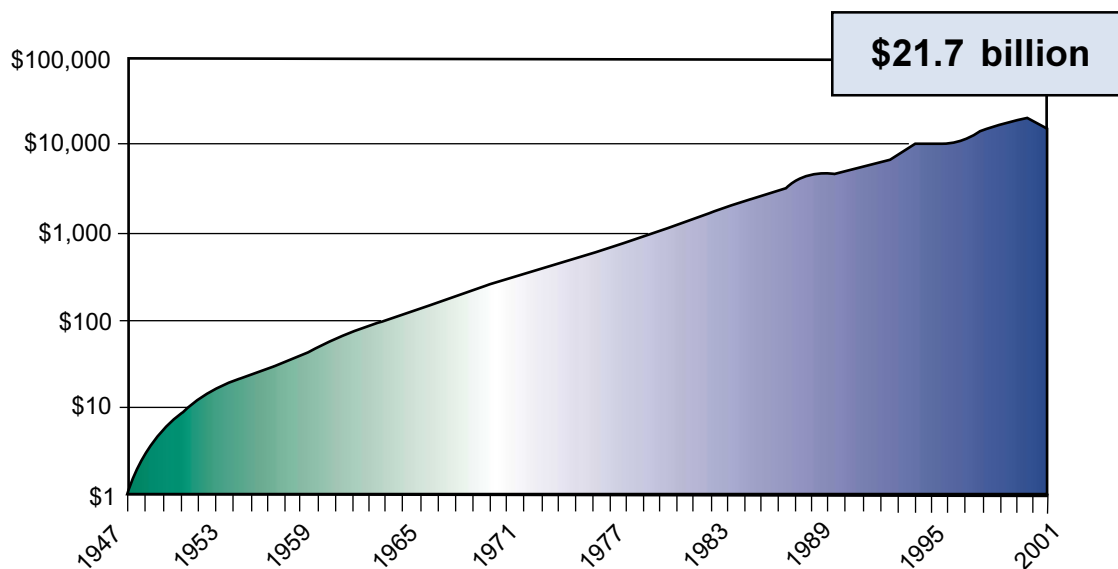

The Board of Trustees of the Public School & the Non-Teacher School Employee Retirement Systems (PSRS/NTRS) is charged with the responsibility for investing the assets of the Systems in a manner consistent with the fiduciary standards set forth in the 'prudent person' rule. To that end, the Board has adopted the following principles to guide all investment-related decisions:

- (1) Act in exclusive interest of the members of the System,
- (2) Maximize total return within prudent risk parameters,
- (3) Preserve the long-term purchasing power of the fund.

The investment portfolios of PSRS/NTRS represent all contributions to the plans, from members and their employers, as well as all net earnings on these assets. These funds are held in support of both future and current liabilities. Total assets as of June 30, 2001 were \$21.7 billion in comparison to \$22.2 billion as of June 30, 2000, decreasing by approximately \$0.5 billion due to depreciating equity markets and benefit payments in excess of current contributions. The long-term growth in assets since the inception of PSRS in 1946 and NTRS in 1965 is shown in the graph below.

54 Years of Growth

(dollar amounts in millions)

Investment Section

PSRS/NTRS Asset Allocation

As of June 30, 2001

The time horizon of the Systems' investment portfolio reflects the long-term nature of the PSRS/NTRS pension obligations. Accordingly, diversification among investments displaying unique risk and return characteristics provides the framework for selecting an asset allocation that is expected, in the aggregate, to give the funds the highest long-term return within a prudent risk level.

In late 1995, the Board adopted the asset allocation targets of 47 percent U.S. Fixed Income, 38 percent U.S. Equity and 15 percent Non-U.S. Equity. This represented a significant increase in the percentage of assets invested in domestic and international stocks when compared to previous allocations. These targets were reaffirmed in 1998. In accordance with the Systems' Investment Policy, the asset allocation is reviewed formally every three years and will again be examined in late 2001 and early 2002. The pie chart below shows the allocation of assets as of June 30, 2001.

Asset Allocation 6/30/01

Asset Type	PSRS Market Value	NTRS Market Value	Combined Funds*	% of Total	Target Allocation
U.S. Fixed Income	\$ 9,205,131,664	\$ 729,895,989	\$ 9,935,027,653	45.9%	47.0%

Total Fund Review

Periods Ended June 30, 2001

Total Fund Investment Returns*

The Board has established a long-term goal to achieve a total investment return of at least 8.0 percent per year and a real rate of return of at least 4.5 percent per year. The real rate of return is the rate by which the long-term total return exceeds the inflation rate.

The one-year total returns of -1.9 percent for PSRS and -1.7 percent for NTRS were below the long-term investment objective of 8.0 percent due to a difficult market environment. However, over the past five years the annualized investment return of 10.5 percent for PSRS and NTRS easily exceeded both the 8.0 percent nominal return objective and the 4.5 percent real rate of return goal (the Consumer Price Index was an annualized 2.6 percent over the five year period).

Total Fund Investment Returns 6/30/01

	Fiscal Year	Last 3 Years	Last 5 Years
PSRS	-1.9%	5.3%	10.5%
NTRS	-1.7%	5.3%	10.5%
Policy Benchmark**	-4.1%	5.0%	9.5%
Public Fund Median***	-3.8%	5.5%	10.3%

* Returns were prepared using a time-weighted return in accordance with the Association for Investment Management and Research (AIMR) Performance Presentation Standards.

** The Policy Benchmark is comprised of 47% Lehman Aggregate Index, 38% Russell 3000 Index and 15% MSCI All Country World – ex U.S. Free Index.

*** The Independent Consultants Cooperative (ICC) median fund return reflects a universe of public pension plans with assets in excess of \$1 billion.

Fixed Income Review

As of June 30, 2001

Fixed Income Structure

As of June 30, 2001, approximately 40 percent of the PSRS/NTRS fixed income portfolio was passively managed by State Street Global Advisors while the remaining 60 percent was actively managed by four separate external managers. The basic fixed income portfolio structure was implemented in July 1996. There was one strategic investment change in February 2000 when the Board selected a 'core plus' bond manager to further diversify the fixed income portfolio. The 'core plus' assignment allows an external investment manager to invest in all major sectors of the fixed income market within defined guidelines.

The pie charts below depict the fixed income composite by showing the current sector allocation of the portfolio compared with that of five years ago on a market value basis.

Fixed Income Investment Advisors

The following firms were under contract with PSRS/NTRS during fiscal year 2001 for management of fixed income securities.

Investment Advisor	Investment Style	Combined Portfolio Market Value*	% of Total Market Value
BlackRock Financial Management	Active Mortgages	\$ 1,561,049,812	7.2%

Domestic Equity Review

As of June 30, 2001

Domestic Equity Structure

As of June 30, 2001, 38.6 percent of the PSRS/NTRS domestic equity portfolio was passively managed. Another 17.5 percent was managed in an enhanced index style, in which the managers' guidelines permitted limited flexibility with the expectation of capturing additional return relative to the benchmark. The remainder of the portfolio was actively managed and diversified across a broad range of investment styles. The basic domestic equity portfolio structure was implemented in July 1996.

The pie charts below depict the domestic equity portfolio by presenting the current style structure of the portfolio for comparison with that of five years ago on a market value basis.

The following pie chart shows the allocation to sectors within the domestic equity market for the PSRS/NTRS portfolio as of June 30, 2001.

Domestic Equity Review

Periods ended June 30, 2001

Domestic Equity Investment Returns

The total return on the PSRS and NTRS domestic equity portfolios was -9.3 percent and -9.4 percent, respectively, compared to the benchmark return of -13.9 percent for the fiscal year ended June 30, 2001. This outperformance, on a relative basis, can primarily be attributed to the value added by the Systems' active management strategies.

While a negative absolute return is never easy to accept, the Board and staff believe that diversification across all capitalization ranges and styles as well as a balance between active and passive managers remains a primary fiduciary responsibility.

Domestic Equity Investment Returns 6/30/01

	Fiscal Year	Last 3 Years	Last 5 Years
PSRS	-9.3%	4.3%	14.3%
NTRS	-9.4%	4.3%	14.4%

Non-U.S. Equity Review

As of June 30, 2001

Non-U.S. Equity Structure

As of June 30, 2001, approximately 22 percent of the PSRS/NTRS non-U.S. equity portfolio was passively managed by State Street Global Advisors while the remaining 78 percent was managed actively by three separate external managers. The basic non-U.S. stock portfolio structure was implemented in July 1996. There was one strategic investment change in April 1999 when the Board decreased the passive exposure to non-U.S. equities from 33 percent to 25 percent and selected a third active manager.

The pie chart below presents a breakdown of investments in developed and emerging markets in the non-U.S. equity portfolio and the bar graph depicts the specific country exposure.

Market Allocation 6/30/01

Country Allocation 6/30/01

Non-U.S. Equity Investment Advisors

The following firms were under contract with PSRS/NTRS during fiscal year 2001 for management of non-U.S. equity securities.

Investment Advisor	Investment Style	Combined Portfolio Market Value* As of June 30, 2001	% of Total Market Value
Bank of Ireland Asset Management	Active Core	\$ 792,926,161	3.7%
INVESCO Global Asset Management	Active Value	810,781,294	3.7%

State Street Global Advisors	Passive Core	674,722,230	3.1%
Total		\$ 3,052,635,101	14.1%

* Includes manager cash.

Non-U.S. Equity Review

Periods ended June 30, 2001

Non-U.S. Equity Investment Returns

The total return on the PSRS and NTRS non-U.S. equity portfolios was -21.4 percent and -21.3 percent, respectively, compared to the benchmark return of -23.7 percent for the fiscal year ended June 30, 2001. Both Systems suffered from the depreciation in non-U.S. equity markets over the past fiscal year but have benefited greatly from active management in this area. The annual returns for both funds for the three time periods illustrated below show substantial outperformance relative to the policy benchmark (MSCI All Country World – ex U.S. Free Index).

Investment Returns 6/30/01

	Fiscal Year	Last 3 Years	Last 5 Years
PSRS	-21.4%	1.7%	7.3%
NTRS	-21.3%	1.7%	7.4%
MSCI All Country World - ex U.S. Free	-23.7%	-0.4%	2.5%

Public School Retirement System of Missouri
Non-Teacher School Employee Retirement System of Missouri
701 W. Main
PO Box 268
Jefferson City, MO 65102

Re: Certification of Actuarial Results

Dear Members of the Board:

At your request, we have performed actuarial valuations of the Public School Retirement System and the Non-Teacher School Employee Retirement System of Missouri as of June 30, 2001. An actuarial valuation of each system is performed annually.

The actuarial valuation is based upon:

- a. *Data relative to the Members of the Systems* - Data for all members of each system was provided by the staff. Such data is tested for reasonableness by the actuary but is used unaudited.
- b. *Assets of the Fund* - The values of the trust fund assets for each system are provided by the staff. The market value of assets is used to develop actuarial results.
- c. *Actuarial Method* - The actuarial method utilized for each system is the Entry Age Normal Cost Method. The objective of this method is to finance the benefits of the systems as a level percentage of pay over the entire career of each member. Any Unfunded Actuarial Accrued Liability (UAAL) under this method is separately financed. All actuarial gains and losses under this method are reflected in the UAAL.
- d. *Actuarial Assumptions* - The actuarial assumptions used in the valuation of each system are summarized in the next few pages. The Board adopted this set of assumptions effective for the actuarial valuation as of June 30, 2001.

The actuarial assumptions and methods used are in accordance with paragraph 36 of GASB Statement Number 25.

The trend data in the Financial Section and the schedules and other data in this Section are prepared by the staff with our guidance.

BOARD OF TRUSTEES

-2-

NOVEMBER 19, 2001

The Board's statement of funding policy provides that:

1. The Board of Trustees shall adopt actuarial assumptions, each of which individually represents a reasonable long-term estimate of anticipated experience under the system, derived from experience studies conducted every fifth year.
2. The actuarial funding method used shall be the Entry Age Normal Method with normal costs calculated as a percentage of payroll.
3. It shall be the general objective to maintain an amortization period of 30 years or less in the funding of the Unfunded Actuarial Accrued Liability. Whenever a change is made in a system's benefit and contribution rate structures, the amortization period for the system after this change should not exceed 30 years initially.
4. If an escalation in future payroll is assumed in determining the amortization payments toward the Unfunded Actuarial Accrued Liability, then the annual rate of such escalation shall not exceed the expected rate of expansion in total system payroll based upon the actuarial assumptions.
5. Assets used in the actuarial valuation shall be valued using adjusted market values averaged over a period of five years.
6. Annual actuarial valuations shall be made of the systems' assets and liabilities. The contribution rate shall be established based on the results of these valuations.

The results of the valuations are based on the data and actuarial techniques described above and on the provisions of each system at the valuation date. Based on these items, we certify these results to be true and correct.

Sincerely,

Norman S. Losk, F.S.A.
Senior Consultant

PSRS Summary Plan Description

The Public School Retirement System of Missouri (PSRS) became operative July 1, 1946. It was established by an Act of the Missouri Legislature and is governed by Chapter 169 of the *Revised Statutes of Missouri*. Its purpose is to provide benefits to members and their dependents at retirement or in the event of death or disability prior to retirement.

PSRS is a defined benefit plan funded on an actuarial reserve basis, which guarantees availability of funds to pay benefits as prescribed by law. The system is established as an independent trust fund and is not subject to direction by any state agency. Administrative expenses are paid entirely out of investment earnings.

Administration

The administration of PSRS is vested in a seven-member Board of Trustees, composed of three elected PSRS members, one elected Non-Teacher School Employee Retirement System (NTRS) member, and three appointed trustees. The four elected trustees are selected by vote of the members and retirees of both systems. Two are elected each even-numbered calendar year to serve four-year terms. The three appointed trustees, one of whom must be a PSRS or an NTRS retiree, are named by the governor. The appointed trustees must be residents of school districts included in the retirement system but not employees of such districts nor state employees nor a state elected official. The Board appoints an Executive Director who is responsible for employment of the retirement office staff, routine operation of the system, and advisement of the Board on all matters pertaining to the system.

Member Participation

PSRS membership is automatic, regardless of position, for certificated, full-time employees of public school districts in Missouri (except the St. Louis and the Kansas City school districts), public junior college districts in Missouri, and of PSRS. Certificated, part-time employees whose services would qualify them for membership in the Non-Teacher School Employee Retirement System are contributing members of PSRS unless NTRS membership is elected.

Members working in covered employment are considered *active* members. Such members contribute 10.5 percent of gross salary to PSRS. The contributions are deducted and remitted by the employer and are credited by PSRS to individual member accounts. Since July 1, 1989, member contributions have been tax-deferred for federal and state income tax purposes under IRS 414(h)(2). Contributions are not considered income for such purposes until they are paid as a lump sum refund or monthly benefits.

Members not working in covered employment are considered *inactive* members.

Interest at a rate set each year by the Board of Trustees is credited to individual member accounts each June 30 on the previous June 30 balance. The rate credited on June 30, 2001 was 6%.

In addition to credit earned for covered service, members may purchase credit in various categories including several types of leave, outside school service, other public and private employment, active U.S. military duty, and service under the federal Uniformed Services Employment and Re-employment Rights Act of 1994 (USERRA).

Employer Participation

The employers served by PSRS withhold members' contributions from salary payments and match those contributions at a current rate of 10.5 percent of payroll. Employer contributions and investment earnings on those funds are placed by PSRS in a general reserve account to pay monthly benefits to retirees and to beneficiaries of deceased members. Employers are responsible for remitting contributions promptly and for furnishing contribution information and new membership records to PSRS. Employers also provide record data when members apply for benefits or for refunds upon termination of employment.

Survivor Benefits

The designated beneficiary of a member who dies before retirement is eligible for a lump sum refund of the member's contributions and interest. If the beneficiary is an eligible dependent and the member dies while in covered employment with at least two years of credit for such service, or while eligible for disability retirement benefits, monthly survivor benefits based on a percentage of the member's salary for the last full year of covered service can be elected instead of the contribution refund.

In lieu of a lump sum refund or monthly survivor benefits, survivors with an insurable interest and beneficiaries of disability

Actuarial Section

retirees may elect to receive monthly benefits under the Option 2 retirement plan. Such benefits are payable when the member would have been eligible for early or normal retirement.

Refund of Contributions

Member contributions and interest are fully refundable upon termination of service or death. All credit and benefit rights are forfeited upon voluntary withdrawal or automatic termination of membership.

A member may, upon returning to covered employment, reinstate the credit forfeited through termination of a previous membership by repaying the money refunded plus interest.

Membership Termination

Membership is terminated by death, retirement, withdrawal of contributions, or absence from covered employment by a non-vested member for five consecutive school years.

Disability Retirement Benefits

Disability retirement benefits are payable to eligible members who because of permanent disability are unable to earn a livelihood in any occupation. In most instances, the disability retirement benefit is calculated at 50 percent of the member's salary for the last full year of creditable service.

Service Retirement Benefits

Service retirement benefits are payable to members who have terminated covered employment and have met certain eligibility requirements.

Benefit Formula—All service retirement benefits are based on a formula which multiplies final average salary by the applicable formula factor, by the years of credit and, in the case of early retirement, by an age reduction factor. Final average salary is obtained by dividing the total salaries for the 3 highest consecutive years of service by 36; the applicable factor is determined by the type of retirement eligibility; total credit is the amount accumulated at retirement for covered service and purchased credit; and the age factor, where applicable, is determined by the age at retirement.

Normal Retirement—A member may retire with benefits calculated under the standard (.025) formula factor at age 60 with 5 years of credit, at any age with 30 years of credit, or when a combination of age and service credit equals 80. Between 7/1/2001-6/30/2008, a member may retire with a .0255 formula factor with 31 or more years of service. A special provision in effect until July 1, 2003 allows members under age 55 with 25.0 – 29.9 years of credit to retire with benefits calculated under a modified formula factor ranging from .022 to .024 but with no age reduction factor applied.

Early Retirement—A member may retire with benefits calculated under the standard (.025) formula with an age reduction factor applied, at age 55 with 5 years of credit or at any age with 25 years of credit, as long as they do not qualify for Rule of 80 (after 7/1/2003).

Payment Options—A retiring member may elect to receive the maximum benefits payable under the Single Life option, or may elect to receive a reduced benefit under one of three Joint-and-Survivor options or under one of two Term-Certain options, to provide survivor benefit coverage in varying degrees after the retiree's death.

Certain benefit minimums apply to normal or early retirement with 15 or more years of credit. The minimums for 15 but fewer than 25 years of credit are reduced if a Joint-and-Survivor or a Term-Certain option is elected and/or if an age factor is applicable because of early retirement. The minimums for 25 or more years of credit are reduced only if a Joint-and-Survivor or a Term-Certain option is elected.

Post-Retirement Increases

Cost-of-living adjustments (COLAs) are provided beginning the second January after retirement (7/1/01) to service and disability retirees, and to Joint-and-Survivor beneficiaries of deceased retirees. The annual COLA, not to exceed 5%, is based on the increase in the cost of living as measured by the Department of Labor Consumer Price Index for the previous fiscal year and is applied to the current benefit of each eligible recipient. Lifetime COLAs are limited to 80% of the original retirement benefit. The 80% lifetime COLA limit became effective July 1, 2000.

Benefits Guide

A benefits guide containing detailed information concerning the retirement program can be obtained from the retirement office upon request.

Actuarial Section

NTRS Summary Plan Description

The Non-Teacher School Employee Retirement System of Missouri (NTRS) was established by an Act of the Missouri Legislature effective November 1, 1965, and is governed by Chapter 169 of the *Revised Statutes of Missouri*.

The plan's purpose is to provide benefits to members and their dependents at retirement or in the event of death or disability. The plan is funded on an actuarial reserve basis, which guarantees availability of funds to pay benefits as prescribed by law.

Administration

The statutes provide that the responsibility for the operation and administration of the retirement system is vested in The Public School Retirement System (PSRS) Board of Trustees sitting as the Board of Trustees for NTRS. The Board is comprised of three elected PSRS members, one elected Non-Teacher School Employee Retirement System (NTRS) member and three appointed trustees. The four elected trustees are selected by vote of the members and retirees of both systems. Two are elected each even-numbered calendar year to serve four-year terms. The three appointed trustees, one of whom must be a PSRS or an NTRS retiree, are named by the governor. The appointed trustees must be residents of school districts included in the retirement system but not employees of such districts nor state employees nor a state elected official.

The Board appoints an Executive Director who is responsible for employment of the retirement office staff and routine operation of the system, and who acts as advisor to the Board on all matters pertaining to the system.

Member Participation

Active Members—are currently working in covered employment. Employees contribute 4.5 percent of their gross salary to a member contribution account. These amounts are deducted by the employing district and then forwarded to NTRS by the payroll officer and applied to the member's account in the NTRS. NTRS membership is automatic, regardless of position, for all persons not covered by The Public School Retirement System who are regularly employed for 20 or more hours a week by the public school districts in Missouri (except the St. Louis and the Kansas City school districts), public junior college districts in Missouri, and of the retirement system.

NTRS membership can be elected by employees with Missouri teaching certificates who work *in any position* for 20 or more hours weekly but less than full time; however, PSRS membership is automatic if NTRS election is not made. The election to join NTRS must be filed with the Board of Trustees within 90 days after entering first time, part-time employment.

Since July 1, 1989, member contributions have been tax-deferred for federal and state income tax purposes under IRC 414(h)(2). Contributions are not considered as income for federal or state income tax purposes until they are paid in a lump-sum refund or in monthly benefits.

Individual accounts are maintained for all contributory members. Interest is credited each June 30 on the previous June 30 balance. The interest rate set annually by the Board of Trustees was 6 percent on June 30, 2001. Since NTRS is a defined benefit plan, benefits are based upon the member's final average salary and years of creditable service. The amount of interest credited to a member's account has no bearing on the monthly benefit amount payable at retirement.

Inactive Members—have contributions on deposit with NTRS but are not currently working in covered employment.

Member's Survivors—When a member dies before retirement, the designated beneficiary becomes eligible for a lump sum refund of the employee's contributions and interest. In lieu of the lump sum refund, beneficiaries with an insurable interest and beneficiaries of disability retirees may elect to receive monthly benefits under the Option 2 retirement plan. Benefits are payable to the beneficiary under the Option 2 plan when the member would have been eligible for early or normal retirement.

Actuarial Section

Membership Termination

Membership in the System is terminated by withdrawal of contributions, unemployment in a covered position for five consecutive school years if the member is not vested, death, or retirement.

Employer Participation

The employers served by NTRS withhold members' contributions from salary payments and match employee contributions at a current rate of 4.5 percent of payroll (5 percent effective 7/1/01). Employer contributions and investment earnings on those funds are placed in a general reserve account to pay monthly benefits to retirees and to beneficiaries of deceased members. It is the responsibility of the employers to remit contributions to the retirement system promptly and to supply NTRS with new membership records and members' contribution information. Employers also provide needed data when members apply for benefits or refund of contributions upon termination of employment.

Refund of Contributions

Member contributions plus interest are fully refundable upon termination of service or death. All credit and benefit rights are forfeited upon voluntary withdrawal or automatic membership termination. Voluntary withdrawal is available to members who cease covered employment. Automatic termination occurs when a non-vested member is absent from covered employment for five consecutive years. Only the money the member has contributed and accrued interest are refundable.

A member may, upon returning to covered employment, reinstate the credit forfeited through termination of a previous membership by repaying the money withdrawn plus interest.

Service Retirement Benefits

Service retirement benefits are payable to persons who have terminated employment and who have met age and service requirements.

Benefit Formula—All service retirement benefits are based on a formula which multiplies final average salary by the applicable formula factor, by the years of credit and, in the case of early retirement, by an age reduction factor. Final average salary is obtained by dividing the total salaries for the three highest consecutive years of service by 36; the applicable factor is determined by the type of retirement eligibility; total credit is the amount accumulated at retirement for covered service and purchased credit; and the age factor, where applicable, is determined by the age at retirement.

Because of the conversion of the system from a formula integrated with Social Security to the present basis, a special "frozen benefit" is in effect for certain members for service prior to July 1, 1973.

Normal Retirement—A member may retire with benefits calculated under the standard (.0151) formula at age 60 with 5 years of credit, at any age with at least 30 years of service, and at the point where the member's age plus creditable service equals or exceeds 80 (Rule of 80). A member may retire under the standard (.0151) formula when the member qualifies for Rule of 80 or 30 and out and will receive an additional .004 multiplier until he/she qualifies for Social Security benefits (currently age 62). A special provision in effect until July 1, 2003 allows members under age 55 with 25.0-29.9 years of credit to retire with benefits calculated under a modified formula factor ranging from .0141 to .0149 but with no age reduction factor applied. **Note:** Effective 7/1/01 the standard formula increased to .0161 and the temporary benefit increased to .008.

Early Retirement—A member may retire with benefits calculated under the standard (.0161) formula with an age reduction factor applied, at age 55 with 5 but fewer than 25 years of credit.

Options—A retiring member may elect to receive the maximum benefits payable under the Single Life option, or may elect to receive a reduced benefit under one of three Joint-and-Survivor options or under one of two Term-Certain options, to provide survivor benefit coverage in varying degrees after the retiree's death. Another option, the Accelerated Payment Plan (APP), allows members to receive a higher NTRS benefit prior to minimum Social Security eligibility age (currently age 62). When the minimum Social Security eligibility age is attained, the member's NTRS benefit will be reduced and will remain at a reduced level for the remainder of their retirement.

Actuarial Section

Creditable Service—Credit is allowed for eligible service both before and after the system began on November 1, 1965. *Prior service credit* is granted for complete years of eligible service before November 1, 1965. The credit is allowed without contributions, but it does require filing a claim. *Membership service credit* is allowed for services after November 1, 1965 for which retirement contributions are remitted or credit is purchased. In addition to credit earned for covered service, members may purchase credit in various categories including several types of leave, outside school service, other public and private employment, active U.S. military duty, and service under the federal Uniformed Services Employment and Re-employment Rights Act of 1994 (USERRA).

Disability Retirement Benefits

Disability retirement benefits are payable to persons who have met service and eligibility requirements and who because of permanent disability are unable to earn a livelihood in any occupation. The disability retirement benefit is calculated at 90 percent of the normal service retirement.

Cost-of-Living Adjustments

Cost-of-living adjustments (COLAs) are provided starting the fourth January after retirement. The annual COLA is not to exceed 5 percent, is based on the Department of Labor Consumer Index for the previous fiscal year and is applied each January to current benefit payments for eligible retirees and beneficiaries. Total lifetime COLAs are limited to 80 percent of the original retirement benefit.

Handbook

A handbook which furnishes more complete information concerning provisions of the NTRS law and regulations can be obtained from the retirement office.
