# *Public Education Employee Retirement System of Missouri*

Actuarial Valuation as of  
June 30, 2021

November 9, 2021

Board of Trustees  
Public Education Employee Retirement System of Missouri  
3210 W. Truman Blvd.  
Jefferson City, MO 65109

**Re: Certification of the Actuarial Valuation of the Public Education Employee Retirement System of Missouri  
as of June 30, 2021**

Dear Board of Trustees:

An actuarial valuation is performed annually for the Public Education Employee Retirement System of Missouri ("PEERS") defined benefit pension plan ("Plan"). The results of the latest actuarial valuation were prepared as of June 30, 2021 and are presented herein pursuant to the engagement letter between PEERS and PricewaterhouseCoopers LLP ("PwC"), dated July 11, 2019. This report is intended to provide the Board of Trustees ("Board") with information on the funded status of the Plan, development of the actuarially determined contribution rates, and certain financial statement disclosure information.

**Financing Objectives and Funding Policy**

Under Missouri statutes, contribution rates are adopted annually by the Board. The actuarially determined contribution presented herein was based on the funding policy, actuarial assumptions, and actuarial methods adopted by the Board.

In setting contribution rates, the principal objectives of the Board's funding policy are:

- To set contribution rates such that the funded ratio will reach 100% over a closed 30-year period.
- To set contribution rates such that they remain stable over time.
- To set contribution rates such that they promote intergenerational equity.
- To provide a reasonable margin for adverse experience to help offset risks of not meeting the above target.

**Progress Toward Realization of Financing Objectives**

The funded ratio (the ratio of the actuarial value of assets to the actuarial accrued liability) is a measure of a Plan's funded status. Absent changes in plan provisions and actuarial assumptions and methods, it should increase over time until it reaches 100% under the current funding policy, though adverse experience could prevent this from being achieved. The funded ratio for the Plan is 87.7% as of June 30, 2021, compared to 86.3% as of June 30, 2020. The increase is due to significantly higher than expected investment returns of 28.5%, partially offset by changes in the actuarial assumptions as a result of the 2021 experience study and the January 1, 2022 COLA being 5.00% compared to the 2.00% COLA assumed. Over time, we expect the annual gains/losses to be offsetting.

**Benefit Provisions**

The benefit provisions reflected in the valuation reports are those which were in effect at June 30, 2021, as set forth in the related Missouri statutes. It is our understanding that there have been no changes in benefit provisions since the prior valuation. We note that the temporary removal of the working after retirement limitations was extended into the 2021-2022 school year; however, this is not reflected in our valuation of the benefit liabilities as it is our understanding this is a temporary change included in an emergency order from the Governor in response to the COVID-19 pandemic.

**Assets and Member Data**

The valuation was based on asset values of the trust fund and member census data as of June 30, 2021. All asset information and member data were provided by PEERS. While we performed certain checks for reasonableness relative to the prior year's data, the data was used unaudited. The accuracy of the results presented in this report is dependent upon the accuracy and completeness of the underlying asset and census information.

**Actuarial Assumptions and Methods**

The actuarial assumptions used in the June 30, 2021 valuations were adopted by the Board pursuant to an experience study completed in May 2021. The economic and demographic assumptions were reviewed and certain assumptions were updated, where appropriate, based on the results of the experience study. The next experience study is scheduled to be completed prior to the June 30, 2026 valuation.

We believe the actuarial assumptions and methods are reasonable for the purposes of this valuation report, were developed in accordance with the Actuarial Standards of Practice, and comply with the parameters set forth in Statements No. 67 and No. 68 (as amended) of the

Governmental Accounting Standards Board ("GASB"). Different assumptions and methods may be reasonable for other purposes. As such, the results presented in the valuation report should only be relied upon for the intended purpose.

### **Certification**

We certify that the information presented herein is accurate and fairly portrays the actuarial position of the Plan administered by PEERS as of June 30, 2021 based on the underlying census data, asset information and selected assumptions and methods.

This report contains certain accounting information required to be included in the System's Annual Comprehensive Financial Report. This information has been prepared in accordance with our understanding of GASB No. 67, as amended. This report also contains employer accounting information prepared in accordance with our understanding of GASB No. 68, as amended.

In preparing the results presented herein, we have used and evaluated actuarial models in accordance with Actuarial Standards of Practice ("ASOP") No. 56. PwC uses the ProVal valuation system developed by Winklevoss Technologies, LLC in performing valuations of pension and postretirement benefit plans. We have utilized the ProVal software to prepare the valuation results presented herein. ProVal is used to value participant data through projecting retirement benefits and applying plan specific assumptions, methods and plan provisions under applicable accounting and funding standards. PwC is not aware of any material limitations or known weaknesses in the ProVal software.

A range of results, different from those presented in this report could be considered reasonable. Future actuarial measurements may differ significantly from the current measurement presented in this report due to a number of factors including but not limited to: plan experience differing from that anticipated by the economic and demographic assumptions; increases or decreases expected as part of the natural operation of the methods used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); rounding conventions; and changes in plan provisions or applicable law. Due to the limited scope of this report, an analysis of the potential range of such future measurements has not been performed.

To the best of our knowledge this actuarial statement is complete and accurate and has been prepared in accordance with generally accepted actuarial principles and practices and with the Actuarial Standards of Practice issued by the Actuarial Standards Board. Our calculations also reflect our understanding of the requirements of Missouri state law. The undersigned actuaries are members of the Society of Actuaries and other professional organizations, including the American Academy of Actuaries, and meet the Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States relating to pension plans. There is no relationship between the PwC practitioners involved in this engagement and PEERS that may impair our objectivity.

The content of this document is limited to the matters specifically addressed herein and does not address any other potential tax consequences, or the potential application of tax penalties, to any matter other than as set forth herein. Our conclusions are not binding upon any taxing authority or the courts and there is no assurance that any relevant taxing authority will not successfully assert a contrary position. In addition, no exceptions (including the reasonable cause exception) are available for any federal or state penalties imposed if any portion of a transaction is determined to lack economic substance or fails to satisfy any similar rule of law, and our advice will not protect you from any such penalties. This document supersedes all prior written or oral advice with respect to the issues addressed in this document and all such prior communications should not be relied upon by any person for any purpose. This document has been prepared pursuant to an engagement letter between PEERS and PwC, and is intended solely for the use and benefits of PEERS and not for reliance by any other person.

Respectfully submitted,

---

Ms. Cindy Fraterrigo  
Member, American Academy of Actuaries  
Fellow of the Society of Actuaries  
Enrolled Actuary (No. 20-06229)

## SECTION I - EXECUTIVE SUMMARY

### **HIGHLIGHTS OF THE ACTUARY'S REPORT**

This report presents the results of the actuarial valuation of the Public Education Employee Retirement System of Missouri ("PEERS") defined benefit plan ("Plan") as of June 30, 2021 and has been prepared to present the current funded status of the Plan, contribution requirements for fiscal year 2023 (July 1, 2022 through June 30, 2023), and certain financial statement disclosure information. The valuation was performed using census data for plan members as of June 30, 2021 provided by PEERS and summarized in Section IV of this report, asset information as of June 30, 2021 provided by PEERS and summarized in Sections II and III, the actuarial assumptions and methods approved by the Board and summarized in Section V, and the plan provisions effective June 30, 2021 summarized in Section VI.

#### **Contributions**

The Board sets, at its discretion, but subject to certain statutory restrictions, the applicable employer and member contribution rates upon considering the results of the actuarial valuation and other analysis as appropriate. Based on the objectives of the Board's funding policy, the assumptions and methods approved by the Board, and our valuation of the Actuarially Determined Contribution Rate, the contribution rate approved by the Board is 13.72% (6.86% for employers and 6.86% for members) for fiscal year 2023. A contribution rate of 13.72% represents no change from the rate currently in effect for fiscal year 2022. The contribution rate approved by the Board becomes effective on July 1, 2022. Therefore, the dollar cost will depend on the actual payroll during fiscal year 2023.

Members of PEERS pay half of the total contribution rate, currently 6.86% of pay. If a member terminates employment with less than 5 years of service, their accumulated contributions with interest can be withdrawn as a lump sum, or the member may direct PEERS to make a direct rollover of the distribution amount. When a member becomes vested with at least 5 years of service, the member also has the option to leave their contributions in the Plan and select from various retirement annuity options commencing at retirement age.

#### **Funded Status**

The funded status of PEERS is measured as the ratio of assets available for benefits to a benefit liability measure for the System. While there are several such measures that could be appropriately used, the benefit liability measure that ties most closely to the funding strategy is the Actuarial Accrued Liability ("AAL") computed in accordance with assumptions and methods summarized in Section V. The funded status is an indicator of future contribution requirements in that a funded status below 100% results in an Actuarially Determined Contribution rate that includes contributions towards the deficit. The funded status measured on this basis is not intended to represent the sufficiency of plan assets for settling the plan's benefit obligations and should not be relied on for that purpose or any other purpose not mentioned above in isolation.

Using the Actuarial Value of Assets ("AVA"), a smoothed asset value that recognizes 20% of the total investment gain or loss on the AVA for each of the preceding five (5) years, the PEERS AAL funded ratio is 87.7% as of June 30, 2021, compared to 86.3% as of June 30, 2020. The increase is due to significantly higher than expected investment returns of 28.5%, partially offset by changes in the actuarial assumptions as a result of the 2021 experience study and the January 1, 2022 COLA being 5.00% compared to the 2.00% COLA assumed. Over time, we expect the annual gains/losses to be offsetting. The funded status is 98.4% when based on the market value of assets rather than the actuarial value of assets.

#### **Investment Experience**

The market value of the assets available for benefits has increased from \$5.12 billion as of June 30, 2020 to \$6.45 billion as of June 30, 2021. The actuarial value of assets increased from \$5.26 billion as of June 30, 2020 to \$5.76 billion as of June 30, 2021. The actuarial value of assets is less than the market value by \$0.7 billion and the difference will be recognized over the next four years.

The assets of the Plan returned 28.5% (net of all expenses) for the year ended June 30, 2021. Based on the Actuarial Value of Assets, the approximate return for the same period was 11.3%. The return on actuarial value is different due to the smoothing of returns greater or less than expected returns over five years. For GASB accounting purposes, the money-weighted return, net of investment expenses only, was 28.4%.

---

## SECTION I - EXECUTIVE SUMMARY

### **HIGHLIGHTS OF THE ACTUARY'S REPORT (Continued)**

#### **Funding Policy**

The Board has adopted a formal funding policy with the objective of fully funding the system over a closed 30-year period while adhering to the applicable statutes of the State of Missouri, as well as sound financial principles, such as maintaining contribution rate stability and intergenerational equity. The policy sets forth certain actions, actuarial assumptions, and actuarial methods that are to be utilized in executing the funding strategy. Key principles and objectives of the funding policy are summarized in Section II.

The funding policy is updated every five years in conjunction with an experience study. Other changes to the funding policy may be considered in the interim as deemed appropriate by the Board or as recommended by the actuary. The funding policy was most recently amended at the June 8, 2021 Board meeting, with all changes effective for the June 30, 2021 actuarial valuations.

#### **Governmental Accounting Standards**

This report contains certain financial statement information, including notes and required supplemental information, prepared in accordance with our understanding of Governmental Accounting Standards No. 67 and No. 68 ("GASB 67" and "GASB 68"), as amended. Information prepared in accordance with GASB 67 is intended to assist PEERS with the preparation of its Annual Comprehensive Financial Report. Information shown in this report prepared in accordance with GASB 68 are the collective amounts for all participating employers in aggregate. Further calculation is required to determine the proportionate share applicable to each participating employer. PEERS is responsible for confirming the accuracy and completeness of any financial reporting information contained herein.

#### **Changes in Actuarial Assumptions**

The Board elected to update the following assumptions for the fiscal year 2021 to reflect the experience study completed in May 2021:

- The **long-term inflation** assumption decreased from 2.25% to 2.00% per year.
- The **payroll growth** assumption decreased from 3.25% to 2.50% per year.
- The **future salary increase** assumption decreased from 4.00%-11.00%, depending on service to 3.25%-9.75%, depending on service.
- The **investment return** assumption decreased from 7.50% to 7.30% per year.
- The **active mortality** assumption changed from 75% of the RP-2006 Total Dataset mortality table with static projection to 2028 using the 2014 SSA improvement scale to the experience-adjusted PubG-2010(B) (General Employees, Below-Median Income) mortality table for employees with generational projection using the MP-2020 improvement scale.
- The **retiree mortality** assumption changed from the experience-adjusted RP-2006 Total Dataset mortality table with static projection to 2028 using the 2014 SSA improvement scale to the experience-adjusted PubG-2010(B) (General Employees, Below-Median Income) mortality table for retirees with generational projection using the MP-2020 improvement scale.
- The **beneficiary mortality** assumption changed from the experience-adjusted RP-2006 Total Dataset mortality table with static projection to 2028 using the 2014 SSA improvement scale to the experience-adjusted PubG-2010(B) (General Employees, Below-Median Income) mortality table for contingent survivors with generational projection using the MP-2020 improvement scale.
- The **disabled retiree mortality** assumption changed from the RP-2006 Disabled Retiree mortality table with static projection to 2028 using the 2014 SSA improvement scale to the experience-adjusted PubG-2010 (General Employees) mortality table for disabled participants with generational projection using the MP-2020 improvement scale.

---

## SECTION I - EXECUTIVE SUMMARY

### **HIGHLIGHTS OF THE ACTUARY'S REPORT (Continued)**

#### **Changes in Actuarial Assumptions (Continued)**

- The **retirement** assumption is an age and service based table of rates. The rates at certain age and service combinations were adjusted to reflect recent experience.
- The **cost of living adjustment (COLA)** assumption changed this year. In the prior year, the COLA assumption increased from 1.35% to 1.65% over six years beginning January 1, 2022. This year, a 2.00% COLA is assumed for January 1, 2022, January 1, 2023, and January 1, 2024 and a 1.35% COLA is assumed thereafter. This COLA assumption reflects an assumption that general inflation will be higher than 2.00% in the near-term, but will return to the long-term inflation assumption of 2.00% thereafter.

Since the actual increase in the CPI-U index from June 2020 to June 2021 was 5.39%, the Board approved an actual COLA as of January 1, 2022 of 5.00%, in accordance with the Board's funding policy and Missouri statutes, compared to the assumed COLA of 2.00%. Since the actual COLA for January 1, 2022 is known, it has been reflected in the June 30, 2021 liability valuation.

Please refer to the experience study report dated April 12, 2021, and the experience study addendum dated May 24, 2021 for more details.

#### **Changes in Plan Provisions**

A temporary waiver removing the hours and earnings limitations for PEERS members working after retirement was included in the Governor's state of emergency order in 2020 in response to the Coronavirus pandemic. The waiver was intended to mitigate the anticipated shortage of qualified substitute and temporary employees that would be needed by school districts during the pandemic. To date, the waiver has been extended through December 31, 2021. We did not include this provision in our valuation of the liabilities as of June 30, 2021 since it is our understanding that the waiver is a temporary change to the working after retirement provisions and the limitations will continue to be implemented after December 31, 2021.

It is our understanding that all other provisions are the same as the prior year.

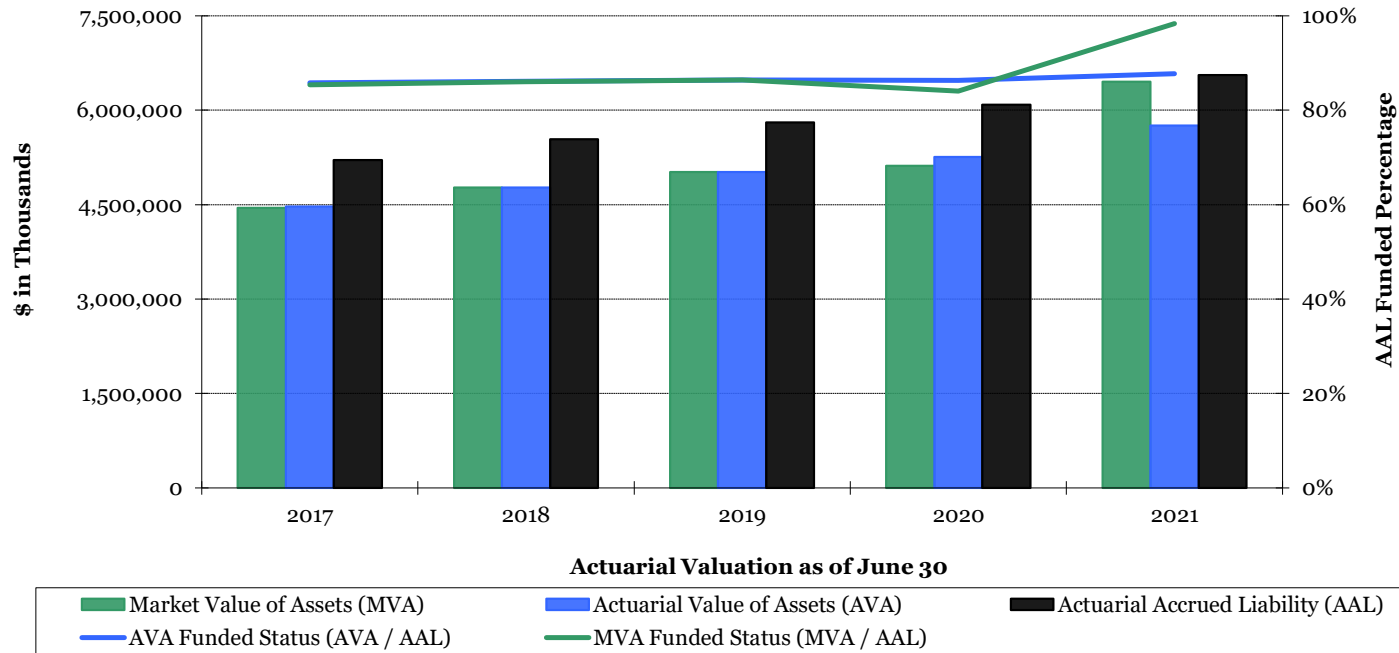

#### **Changes in Actuarial Methods**

There were no changes in the actuarial methods for the June 30, 2021 valuation.

SECTION I - EXECUTIVE SUMMARY

HISTORICAL SUMMARY

5-Year History of Funded Status

Actuarial Valuation as of June 30:

(\$ in '000's)

	<u>2017</u>	<u>2018</u>	<u>2019</u>	<u>2020</u>	<u>2021</u>

## SECTION II - FUNDING

### **A. Summary of Funding Policy**

#### **Introduction**

The Board of Trustees (Board) for the Public Education Employee Retirement System of Missouri (PEERS) has adopted a funding policy to record the Board's funding objectives, including the systematic funding of future benefit payments for members of PEERS. The Board, through its funding policy, adopts the actuarial assumptions and methods to be used in performing the actuarial valuation, which is the basis for determining the annual contribution rate for both employers and members. The funding policy is updated every five years in conjunction with an experience study. Other changes to the funding policy may be considered in the interim as deemed appropriate by the Board or as recommended by the actuary. The funding policy was most recently amended at the June 8, 2021 Board meeting, with all changes effective for the June 30, 2021 actuarial valuations.

The "Funding" results presented in this section of the report were prepared in accordance with the funding policy.

#### **Funding Objective**

The funding objective set by the Board is to achieve a funded ratio of 100% over a closed 30-year period. For this purpose, the funded ratio is defined as the Actuarial Value of Assets divided by the Actuarial Accrued Liability determined under the Entry Age Normal Level Percent cost method and the actuarial assumptions adopted by the Board.

#### **Principles of Funding**

The Board has identified the following principles to guide its funding policy:

1. Maintain adequate assets so that current plan assets plus future contributions and investment earnings should be sufficient to fund all benefits expected to be paid to members and their beneficiaries.
2. Maintain stability of contribution rates, consistent with other funding objectives.
3. Maintain public policy goals of accountability and transparency. Each policy element is clear in intent and effect, and each should allow an assessment of whether, how, and when the funding requirements of the plan will be met.
4. Promote intergenerational equity. Each generation of members and employers should incur the cost of benefits for the employees who provide services to them, rather than deferring those costs to future members and employers.
5. Provide a reasonable margin for adverse experience to help offset risks.
6. Review the investment earning assumption in conjunction with the periodic asset liability study and in consideration of the Board's risk profile.
7. Review demographic and economic assumptions in conjunction with an experience study performed by an actuary.
8. Continue progress of systematic reduction of the Unfunded Actuarial Accrued Liabilities (UAAL) while keeping the member and employer contribution rates at or near 6.86% of pay, the contribution rate first paid during 2011-2012.

---

## SECTION II - FUNDING

### A. Summary of Funding Policy (Continued)

#### Annual Actuarial Valuation to Set Contribution Rates

In accordance with statute, annual actuarial valuations of the System's assets and liabilities shall be performed by an actuary. The contribution rate shall be established based on the results of these valuations. The funding policy requires that the Actuarially Determined Contribution ("ADC") Rate is equal to the sum of the employer Normal Cost Rate and the Unfunded Actuarial Accrued Liability ("UAAL") Amortization Rate. The Normal Cost Rate is the portion of the Present Value of Future Benefits allocated to the year following the Actuarial Valuation Date by the Actuarial Cost Method, expressed as a percentage of anticipated payroll. The Unfunded Actuarial Accrued Liability (UAAL) Amortization Rate is the portion of the difference between the Actuarial Accrued Liability and Actuarial Value of Assets as of the valuation date, that is to be amortized, expressed as a percentage of anticipated payroll. The contribution rates shall be approved by the Board no later than December 31st for the upcoming school year.

The Board, at its discretion, but subject to certain statutory restrictions, may authorize a change in the member and employer contribution rates from one year to the next should the actuary determine that the contribution rates currently in effect are more or less than required to fully fund the plan over the weighted-average period of the existing UAAL amortization bases established in accordance with the funding policy. The decision by the Board will be based on the expected number of years required to fully fund under the current contribution rates. By statute, the contribution rates cannot be increased by more than 0.5% (0.25% for employers and 0.25% for members) per year.

SECTION II - FUNDING

**B. Development of Funded Status**

	<b>June 30, 2020</b>	<b>June 30, 2021</b>

<sup>2</sup> Administrative expenses exclude \$608,466 of contributions for system employees other than investment staff, but includes (\$11,954) of interest and other adjustments to employer contributions.

<sup>3</sup> Gross of \$257,053 of contributions for system investment staff.

SECTION III - ACCOUNTING

**NOTES TO THE FINANCIAL STATEMENTS UNDER GASB #67 AND #68**

**F. Selected Notes to the Financial Statements under GASB #67 and #68**

1. The Public Education Employee Retirement System of Missouri is a cost-sharing multiple-employer plan for GASB accounting purposes.
2. Significant actuarial assumptions and other inputs used to measure the total pension liability:
  - Measurement Date June 30, 2021
  - Valuation Date June 30, 2021
  - Experience Study The Board of Trustees adopts actuarial assumptions, each of which individually represents a reasonable long-term estimate of anticipated experience under the System, derived from experience studies conducted every fifth year. The most recent comprehensive experience study was completed in May 2021. All economic and demographic assumptions were reviewed and updated, where appropriate, based on the results of the study and effective with the June 30, 2021 valuation. The next experience study is scheduled to be completed prior to the June 30, 2026 valuation.
  - Inflation 2.00% per annum
  - Total Payroll Growth 2.50% per annum, consisting of 2.00% inflation, 0.25% real wage growth due to the inclusion of active health care costs in pensionable earnings, and 0.25% of real wage growth due to productivity.
  - Future Salary Increases 3.25% - 9.75%, depending on service and including 2.00% inflation, 0.25% real wage growth due to the inclusion of active health care costs in pensionable earnings, and 0.25% of real wage growth due to productivity.
  - Cost-of-Living Increases Given that the actual increase in the CPI-U index from June 2020 to June 2021 was 5.39%, the Board approved an actual cost-of-living adjustment (COLA) as of January 1, 2022 of 5.00%, in accordance with the Board's funding policy and Missouri statutes, compared to an assumed COLA of 2.00%. Future COLAs assumed in the valuation are 2.00% as of January 1, 2023 and January 1, 2024, and 1.35% each January 1 thereafter. This COLA assumption is based on the 20-year stochastic analysis of inflation performed in the 2021 experience study, the application of the board's COLA policy, and the short-term expectations of COLA due to recent CPI activity. It is also based on the current policy of the Board to grant a COLA on each January 1 as follows:
    - If the June to June change in the CPI-U is less than 2% for consecutive one year periods, a cost-of-living increase of 2% will be granted when the cumulative increase is equal to or greater than 2%, at which point the cumulative increase in the CPI-U will be reset to zero. For the following year, the starting CPI-U will be based on the June value immediately preceding the January 1 at which the 2% cost-of-living increase is granted.
    - If the June to June change in the CPI-U is greater than or equal to 2%, but less than 5%, a cost-of-living increase of 2% will be granted.
    - If the June to June change in the CPI-U is greater than or equal to 5%, a cost-of-living increase of 5% will be granted.The COLA is effective each January 1, beginning on the fourth January after retirement, and capped at 80% lifetime increase.
  - Mortality Assumption
    - Actives: Experience-adjusted PubG-2010(B) (General Employees, Below-Median Income) base mortality table for employees with generational projection using the MP-2020 improvement scale.
    - Non-Disabled Retirees: Experience-adjusted PubG-2010(B) (General Employees, Below-Median Income) base mortality table for retirees with generational projection using the MP-2020 improvement scale.

SECTION III - ACCOUNTING

**NOTES TO THE FINANCIAL STATEMENTS UNDER GASB #67 AND #68**

**F. Selected Notes to the Financial Statements under GASB #67 and #68 (Continued)**

- Mortality Assumption (Continued)

Non-Disabled Beneficiaries and Survivors: Experience-adjusted PubG-2010(B) (General Employees, Below-Median Income) base mortality table for contingent survivors with generational projection using the MP-2020 improvement scale.

Disabled Retirees: Experience-adjusted PubG-2010 (General Employees) base mortality table for disabled participants with generational projection using the MP-2020 improvement scale.

A summary of mortality rates are shown in Section V of the report.

- Discount Rate The discount rate used to measure the total pension liability was 7.30% as of June 30, 2021, and is equal to the long-term expected return on plan investments. Consistent with the Board's funding policy, we have assumed that the employer contributions would be made at a rate consistent with the actuarially determined rate, computed in accordance with assumptions and methods stated in the funding policy. The funding policy requires payment of the normal cost and amortization of the unfunded actuarially accrued liability as a level percent of employee payroll in installments over 30 years utilizing a closed period, layered approach. Based on this policy, which has been followed for the past several years, the pension plan's fiduciary net position would be sufficient to make all projected future benefit payments of current plan members.

	<u>1% Decrease (6.30%)</u>	<u>Current Rate (7.30%)</u>	<u>1% Increase (8.30%)</u>
Net Pension Liability (Asset)	\$ 911,938,897	\$ 107,692,392	\$ (563,469,120)

3. Classes of plan members covered:

- Retired members, beneficiaries and disabled members receiving benefits:	34,671
- Inactive members (vested and non-vested):	26,107
- Former members:	15,141
- Active Plan Members:	49,572
- Total membership:	125,491

4. Money-weighted rate of return:

The money-weighted rate of return equals the investment performance, net of pension plan investment expenses, and adjusted for the changing amounts actually invested. For the fiscal year ending June 30, 2021, the money-weighted return on the plan assets, as provided by PEERS, is 28.4%.

5. The components of the Net Pension Liability for the Public Education Employee Retirement System of Missouri as of June 30, 2021, are as follows:

- Total Pension Liability	\$ 6,560,854,343
- Plan Fiduciary Net Position	6,453,161,951
- Net Pension Liability	\$ 107,692,392
- Plan Fiduciary Net Position as a Percentage of the Total Pension Liability	98.4%

<sup>1</sup> As allowable under GASB #68, PEERS elected to prepare the information prospectively from June 30, 2013.

<sup>2</sup> The service cost shown for fiscal years ending on or before June 30, 2016 is mid-year and includes a 1.50% load for anticipated losses on service purchases. The service cost shown for fiscal year ending on or after June 30, 2017 is as of the beginning of the year and includes a 1.50% load for anticipated losses on service purchases. As a suggestion noted in the 2016 actuarial audit, this methodology was refined beginning with the June 30, 2016 valuation and approved by PEERS.

<sup>3</sup> Reflects actual benefit payments. The interest cost shown for fiscal year ending June 30, 2016 includes an adjustment due to changes from mid-year to beginning-of-year and from simple to compound interest. As a suggestion noted in the 2016 actuarial audit, this methodology was refined beginning with the June 30, 2016 valuation and approved by PEERS.

<sup>4</sup> Includes refunds of accumulated member contributions and other interfund transfers.

<sup>5</sup> Includes contributions for reciprocity and RSMo 169.655 transfers, contributions for system employees, and interest and other adjustments.

<sup>6</sup> Includes contributions for service purchases and reinstatements.

<sup>7</sup> Includes contributions for system employees other than investment staff.

<sup>1</sup> Valuation results prior to June 30, 2009 were computed by the prior actuary.

<sup>2</sup> Includes 1,138 members who retired in July 2021.

<sup>3</sup> Excludes pay for the 1,138 members who retired in July 2021.

SECTION IV - CENSUS DATA

**D. Distribution of Active Members by Salary**<sup>1</sup>

Salary	Number	Percent
Under \$5,000	757	1.56%
\$5,000 - 9,999	1,487	3.07%
\$10,000 - 14,999	2,627	5.42%
\$15,000 - 19,999	3,611	7.46%
\$20,000 - 24,999	6,053	12.50%
\$25,000 - 29,999	6,816	14.07%
\$30,000 - 34,999	5,785	11.94%
\$35,000 - 39,999	5,285	10.91%
\$40,000 - 44,999	4,052	8.37%
\$45,000 - 49,999	3,038	6.27%
\$50,000 - 54,999	2,616	5.40%
\$55,000 - 59,999	1,855	3.83%
\$60,000 - 64,999	1,300	2.68%
\$65,000 - 69,999	865	1.79%
\$70,000 - 74,999	579	1.20%
\$75,000 & Over	1,708	3.53%
Total	48,434	100.00%

<sup>1</sup> Excludes 1,138 members who retired in July 2021.

	<u>Page</u>
A. Actuarial Assumptions	45
B. Assumptions Rationale	53
C. Actuarial Methods	54
D. Assessment of Risk Associated with Measurement of Pension Liability and Contributions	55

SECTION V - ACTUARIAL ASSUMPTIONS AND METHODS

**A. Actuarial Assumptions**

The assumptions used in the valuation were selected and approved by the PEERS Board of Trustees. The demographic assumptions are reviewed every five years through a study of actual experience. In this way, the actuary provides guidance to the Board in selecting the assumptions. The actuary and other economic and investment professionals also provide advice for selecting the economic assumptions as determined by the Board. There was a comprehensive experience study completed in May 2021. All economic and demographic assumptions were reviewed and certain assumptions were updated, where appropriate, based on the results of the study and effective with the June 30, 2021 valuation. In our opinion, the assumptions are reasonable for purposes of this valuation.

Inflation 2.00% per annum

Payroll Growth 2.50% per annum, consisting of 2.00% inflation, 0.25% real wage growth due to the inclusion of active health care costs in pensionable earnings, and 0.25% of real wage growth due to productivity.

 Accounting: 7.30% per annum (net of investment expenses).

SECTION V - ACTUARIAL ASSUMPTIONS AND METHODS

**A. Actuarial Assumptions (Continued)**

Cost of Living Adjustments (COLA)      Given that the actual increase in the CPI-U index from June 2020 to June 2021 was 5.39%, the Board approved an actual cost-of-living adjustment (COLA) on January 1, 2022 of 5.00%, in accordance with the Board's funding policy and Missouri statutes, compared to an assumed COLA of 2.00%. Future COLAs assumed in the valuation are 2.00% as of January 1, 2023 and January 1, 2024, and 1.35% each January 1 thereafter. This COLA assumption is based on the 20-year stochastic analysis of inflation performed in the 2021 experience study, the application of the board's COLA policy, and the short-term expectations of COLA due to recent CPI activity. It is also based on the current policy of the Board to grant a COLA on each January 1 as follows:

- If the June to June change in the CPI-U is less than 2% for consecutive one year periods, a cost-of-living increase of 2% will be granted when the cumulative increase is equal to or greater than 2%, at which point the cumulative increase in the CPI-U will be reset to zero. For the following year, the starting CPI-U will be based on the June value immediately preceding the January 1 at which the 2% cost-of-living increase is granted.
- If the June to June change in the CPI-U is greater than or equal to 2%, but less than 5%, a cost-of-living increase of 2% will be granted.
- If the June to June change in the CPI-U is greater than or equal to 5%, a cost-of-living increase of 5% will be granted.

The COLA is effective each January 1, beginning on the fourth January after retirement, and capped at 80% lifetime increase.

The COLA assumption applies to service retirements and beneficiary annuities. The COLA does not apply to the benefits for in-service death payable to spouses (where the spouse is over age 60). Future COLAs for current benefit recipients reflect actual cumulative adjustments granted at the time of valuation.

Mortality Rates      Actives: Experience-adjusted PubG-2010(B) (General Employees, Below-Median Income) base mortality table for employees with generational projection using the MP-2020 improvement scale. The Plan-specific experience adjustments are equivalent to the experience adjustment factors used for the retiree mortality rates and are as follows:

<u>Male</u>	<u>Female</u>
1.13	0.94

Illustrative rates per 1,000 members at select ages are as follows:

<u>Age</u>	<u>Male</u>	<u>Female</u>
20	0.470	0.130
30	0.760	0.228
40	1.277	0.488
50	2.319	0.965
60	5.494	2.348
70	10.908	5.384

**A. Actuarial Assumptions (Continued)**

Mortality Rates (Continued):

Retirees: Experience-adjusted PubG-2010(B) (General Employees, Below-Median Income) base mortality table for retirees with generational projection using the MP-2020 improvement scale. The Plan-specific experience adjustments are as follows:

<u>Male</u>	<u>Female</u>
1.13	0.94

Illustrative rates per 1,000 members at various ages are as follows:

<u>Age</u>	<u>Male</u>	<u>Female</u>
40	1.277	0.488
50	7.670	3.790
60	12.769	5.259
70	22.199	10.211
80	62.227	32.768
90	175.692	110.953
100	355.852	257.795
110	558.367	444.356

Beneficiaries: Experience-adjusted PubG-2010(B) (General Employees, Below-Median Income) base mortality table for contingent survivors with generational projection using the MP-2020 improvement scale. The Plan-specific experience adjustments are as follows:

<u>Male</u>	<u>Female</u>
1.01	1.07

Illustrative rates per 1,000 members at various ages are as follows:

<u>Age</u>	<u>Male</u>	<u>Female</u>
40	1.141	0.555
50	8.663	5.516
60	13.099	10.345
70	23.551	17.440
80	55.798	43.418
90	146.001	125.260
100	318.062	293.448
110	499.071	505.809

SECTION V - ACTUARIAL ASSUMPTIONS AND METHODS

**A. Actuarial Assumptions (Continued)**

Mortality Rates (Continued): Disabled Retirees: Experience-adjusted PubG-2010 (General Employees) base mortality table for disabled participants with generational projection using the MP-2020 improvement scale. The Plan-specific experience adjustments are equivalent to the experience adjustment factors used for the retiree mortality rates and are as follows:

	<u>Male</u>		<u>Female</u>
	1.13		0.94

Illustrative rates per 1,000 members at various ages are as follows:

<u>Age</u>	<u>Male</u>	<u>Female</u>
40	8.576	6.526
50	17.075	13.383
60	29.511	19.302
70	41.514	24.579
80	77.407	53.811
90	175.692	124.644
100	355.852	257.795
110	558.367	444.356

Withdrawal Rates Termination of membership prior to eligibility for retirement from all causes other than death, disability or retirement, whether resulting in a refund or a deferred benefit, is assumed in accordance with the following illustrative rates per 1,000 members:

<u>Years of Service</u>	<u>Rate</u>
0	350
1	230
2	180
3	150
4	125
5	100
10	55
15	33
20	18
25+	0

Disability Rates Retirement for disability prior to age 60 is assumed in accordance with the following illustrative rates per 1,000 eligible members:

<u>Age</u>	<u>Male and Female Rates</u>
30	0.08
35	0.16
40	0.32
45	0.64
50	1.22
55	2.10

SECTION V - ACTUARIAL ASSUMPTIONS AND METHODS

**A. Actuarial Assumptions (Continued)**

Retirement Rates

Retirement is assumed in accordance with the following rates per 1,000 eligible members:

<u>Age</u>	<u>Service</u>										
	<u>&lt;=20</u>	<u>21</u>	<u>22</u>	<u>23</u>	<u>24</u>	<u>25</u>	<u>26</u>	<u>27</u>	<u>28</u>	<u>29</u>	<u>&gt;=30</u>

SECTION V - ACTUARIAL ASSUMPTIONS AND METHODS

**A. Actuarial Assumptions (Continued)**

Refund of Contributions	<p>For active members assumed to terminate employment with less than five years of service, regardless of age, 100% are assumed to take an immediate refund of their contributions.</p> <p>For active members assumed to terminate employment with five or more years of service, but prior to satisfying the age and service requirements for service retirement, 100% are assumed to select the option that has the greater present value between an immediate refund and a deferred annuity.</p> <p>For active members assumed to terminate employment with five or more years of service and satisfy the age and service requirements for service retirement upon termination, 100% are assumed to elect an immediate lifetime annuity benefit.</p> <p>For inactive members with less than five years of service, regardless of age, 100% are assumed to take a immediate refund of their contributions.</p> <p>For inactive members with five or more years of service, 100% are assumed to select the option that has the greater present value between an immediate refund and a deferred annuity.</p>
Interest on Member Accounts	1.00% per annum.
Service Purchases	A 1.50% load is added to the Normal Cost to account for anticipated losses resulting from service purchases and reinstatements.
Provisions for Expenses	There is no specific provision for expenses. The implicit assumption for funding purposes is that investment and administrative expenses are paid from investment income in excess of 7.30% per annum. For accounting purposes the expected return is assumed to be net of investment expenses. Administrative expenses are included in the current year expense.
Dependent Assumptions (Pre-Retirement)	<p>70% of male and female members are assumed to be married.</p> <p>Beneficiaries are assumed to be of the opposite sex from the member.</p> <p>Male spouses are assumed to be 2 years older than female spouses.</p>
Beneficiary Age (Post-Retirement)	Members are assumed to be 3 years older than their joint annuitant.
Return of Unused Member Account Balance	The cash refund is explicitly valued.
Form of Payment	For active members assumed to terminate employment with five or more years of service, benefits are assumed to be paid in the form of a single life annuity since all optional forms are actuarially equivalent using the same interest and mortality assumptions that are used in the valuation.

---

SECTION V - ACTUARIAL ASSUMPTIONS AND METHODS

**A. Actuarial Assumptions (Continued)**

Data Assumptions

Active and inactive members without a date of birth provided are assumed to be 30 years old. Pensionable pay for valuation purposes is assumed to be the greater of the current year's salary, the previous year's salary and \$5,000. Pensionable pay for active members hired in the current year is assumed to be the greater of annualized pay and \$5,000. Pensionable pay for valuation purposes for inactive members is assumed to be the greater of the two most recent years of salary history provided and \$5,000.

Assumption Changes  
Since the Prior Valuation

An assumption study was completed in May 2021 resulting in an update to the following assumptions:

The inflation assumption decreased from 2.25% to 2.00% per year.

The payroll growth assumption decreased from 3.25% to 2.50% per year.

The future salary increase assumption decreased from 4.00%-11.00%, depending on service to 3.25%-9.75%, depending on service.

The investment return assumption decreased from 7.50% to 7.30% per year.

The active mortality assumption changed from 75% of the RP-2006 Total Dataset mortality table with static projection to 2028 using the 2014 SSA improvement scale to the experience-adjusted PubG-2010(B) (General Employees, Below-Median Income) mortality table for employees with generational projection using the MP-2020 improvement scale.

The retiree mortality assumption changed from the experience-adjusted RP-2006 Total Dataset mortality table with static projection to 2028 using the 2014 SSA improvement scale to the experience-adjusted PubG-2010(B) (General Employees, Below-Median Income) mortality table for retirees with generational projection using the MP-2020 improvement scale.

The beneficiary mortality assumption changed from the experience-adjusted RP-2006 Total Dataset mortality table with static projection to 2028 using the 2014 SSA improvement scale to the experience-adjusted PubG-2010(B) (General Employees, Below-Median Income) mortality table for contingent survivors with generational projection using the MP-2020 improvement scale.

The disabled retiree mortality assumption changed from the RP-2006 Disabled Retiree mortality table with static projection to 2028 using the 2014 SSA improvement scale to the experience-adjusted PubG-2010 (General Employees) mortality table for disabled participants with generational projection using the MP-2020 improvement scale.

SECTION V - ACTUARIAL ASSUMPTIONS AND METHODS

**A. Actuarial Assumptions (Continued)**

Assumption Changes  
Since the Prior Valuation  
(Continued)

The retirement assumption is an age and service based table of rates. The rates at certain age and service combinations were adjusted to reflect recent experience.

The cost of living adjustment (COLA) assumption changed this year. In the prior year, the COLA assumed increased from 1.35% to 1.65% over six years beginning January 1, 2022. This year, a 2.00% COLA was assumed for January 1, 2022, January 1, 2023, and January 1, 2024 and a 1.35% COLA was assumed thereafter. This COLA assumption reflects an assumption that general inflation will be higher than 2.00% in the near-term, but will return to the long-term inflation assumption of 2.00% thereafter.

Since the actual increase in the CPI-U index from June 2020 to June 2021 was 5.39%, the COLA reflected as of January 1, 2022 is 5.00%, in accordance with the Board's funding policy and Missouri statutes, compared to the assumed COLA of 2.00%.

Please refer to the experience study report dated April 12, 2021, and the experience study addendum dated May 24, 2021 for more details.

Gains and Losses for each  
Assumption Change

Below is a breakout of the gains and losses on the Actuarial Accrued Liability (for funding purposes) and the Total Pension Liability (for GASB reporting purposes) due to each individual assumption change based on the experience study conducted in May 2021:

	(Gain) / Loss	Percent Change in Liability
Discount Rate	145,099,623	2.3%
Mortality	69,117,466	1.1%
Retirement	21,234,974	0.3%
COLA Assumption	(68,247,398)	-1.1%
Inflation, Payroll, and Salary Merit	(82,959,521)	-1.3%
 Total (Gain) / Loss due to Assumption Changes	 84,245,144	 1.3%

---

## SECTION V - ACTUARIAL ASSUMPTIONS AND METHODS

### **B. Assumptions Rationale**

#### Investment Return

The investment return assumption is based on analysis completed by the PEERS investment advisor and an independent, high-level analysis completed by PwC as part of the 2021 experience study using a "building block" approach that considered the target asset allocation from the Board's investment policy and capital market forecasts from various investment professionals. It is also based on the Board's funding policy, which was most recently amended at the June 8, 2021 Board meeting to adopt assumption changes pursuant to the experience study.

#### Cost of Living Adjustments

Given that the actual increase in the CPI-U index from June 2020 to June 2021 was 5.39%, the Board approved an actual cost-of-living adjustment (COLA) as of January 1, 2022 of 5.00%, in accordance with the Board's funding policy and Missouri statutes, compared to an assumed COLA of 2.00%. Future COLAs assumed in the valuation are 2.00% as of January 1, 2023 and January 1, 2024, and 1.35% each January 1 thereafter. This COLA assumption is based on the 20-year stochastic analysis of inflation performed in the 2021 experience study, the application of the board's COLA policy, and the short-term expectations of COLA due to recent CPI activity. It is also based on the current policy of the Board to grant a COLA on each January 1 as follows:

- If the June to June change in the CPI-U is less than 2% for consecutive one year periods, a cost-of-living increase of 2% will be granted when the cumulative increase is equal to or greater than 2%, at which point the cumulative increase in the CPI-U will be reset to zero. For the following year, the starting CPI-U will be based on the June value immediately preceding the January 1 at which the 2% cost-of-living increase is granted.
- If the June to June change in the CPI-U is greater than or equal to 2%, but less than 5%, a cost-of-living increase of 2% will be granted.
- If the June to June change in the CPI-U is greater than or equal to 5%, a cost-of-living increase of 5% will be granted.

The COLA is effective each January 1, beginning on the fourth January after retirement, and capped at 80% lifetime increase.

#### Other Assumptions

The Board of Trustees adopts actuarial assumptions, each of which individually represents a reasonable long-term estimate of anticipated experience under the System, derived from experience studies conducted every fifth year. The most recent comprehensive experience study was completed in May 2021. The economic and demographic assumptions were reviewed and certain assumptions were updated, where appropriate, based on the historical experience observed during the study and expectations for the future.

---

## SECTION V - ACTUARIAL ASSUMPTIONS AND METHODS

### **C. Actuarial Methods**

The actuarial methods used in the valuation for funding purposes and noted below were selected and approved by the PEERS Board of Trustees. The actuarial methods are generally reviewed in conjunction with experience studies of the assumptions. In this way, the actuary provides guidance to the Board in selecting the methods. The actuarial methods used for financial reporting purposes and noted below are prescribed by GASB 67 and 68.

Actuarial Cost Method	<p>The actuarial cost method is Entry Age Normal - Level Percent of Payroll.</p> <p>The Normal Cost is calculated separately for each active member and is equal to the level percentage of payroll needed as an annual contribution from entry age to retirement age to fund projected benefits. The Actuarial Accrued Liability on any valuation date is the accumulated value of such Normal Costs from entry age to the valuation date.</p>
Amortization of Unfunded Actuarial Accrued Liability	<p>For funding, gains and losses occurring from census experience different than assumed and assumption changes are amortized over a 30-year period as a level percent of payroll. A new gain or loss base is established each year based on the additional gain or loss during that year and that base is amortized over a new 30-year period. The purpose of the method is to give a smooth progression of the costs from year to year and, at the same time, provide for an orderly funding of the unfunded liabilities.</p> <p>Increases in the Actuarial Accrued Liability caused by changes in the benefit provisions are amortized over 20 years, as determined in the 2007 session of the Legislature.</p> <p>For accounting, gains and losses occurring from census experience different than assumed and assumption changes are amortized into expense over the average expected future service of all plan participants (actives and inactives). Gains and losses occurring from investment experience different than assumed are amortized into expense over a 5-year period. The effect of plan changes on the plan liability are fully recognized in expense in the year in which they occur.</p>
Asset Valuation Method	<p>The Actuarial Value of Assets is a smoothed value of assets. The actuarial value at June 30, 2020 was projected by increasing the amount with 7.50% interest, adding contributions made during the year with 7.50% interest for half the year, and subtracting benefit payments made during the year with 7.50% interest for half the year to arrive at a preliminary June 30, 2021 Actuarial Value of Assets. 20% of the difference between the actual returns on market value for the year and the expected 7.50% return from the projection of the prior year Actuarial Value, along with corresponding amounts from each of the prior four years, is added to the preliminary value to arrive at the final June 30, 2021 Actuarial Value of Assets.</p> <p>For accounting purposes, market value was used as required under GASB 67 and 68.</p>
Changes Since the Prior Valuation	<p>There have been no changes in the actuarial methods since the June 30, 2020 valuation.</p>

## SECTION V - ACTUARIAL ASSUMPTIONS AND METHODS

### **D. Assessment of Risk Associated with Measurement of Pension Liability and Contributions**

The actuarial valuation results presented herein are based on a single set of actuarial assumptions; however, there is a risk that emerging results may differ significantly if actual experience proves to be different than expected by the current assumptions.

In accordance with Actuarial Standard of Practice No. 51 we have assessed the risks related to the measurement of the Plan's obligations and determination of contributions, and have identified the following as being the most significant risks:

- Investment risk
- Interest rate risk
- Inflation / COLA risk
- Asset/Liability mismatch risk
- Longevity and other demographic risks
- Contribution risk

**Investment risk:** *The potential that investment returns will be different than expected.*

Poor investment performance decreases the Plan's funded position and could increase the funding deficiency and future contribution amounts.

**Interest rate risk:** *The potential that interest rates will be different than expected.*

The risk that future interest rates negatively affect investment returns. This risk is linked to investment risk as both accounting and funding results use a discount rate that is equal to the expected investment return.

**Inflation / COLA risk:** *The potential that inflation will be different than expected resulting in cost of living adjustments and wages different than expected.*

All economic assumptions used in the actuarial valuation including payroll growth, individual salary growth, and investment return assumptions are directly impacted by inflation. Based on the current board policy, the COLA assumption is also directly impacted by the annual June-to-June inflation change as indicated by the CPI-U index. To the extent future inflation is higher than expected, this could result in higher than expected COLAs being provided which could decrease the funded status and increase the unfunded actuarial accrued liability.

**Asset/Liability mismatch risk:** *The potential that changes in asset values are not matched by changes in the value of liabilities.*

For assets that are not liability hedged, asset/liability mismatch exists to the extent that market fluctuations do not have the same impact on assets and liabilities. This impacts the funded status of the plan and the unfunded actuarial accrued liability that needs to be funded in the future.

**Longevity and other demographic risks:** *The potential that mortality or other demographic experience will be different than expected.*

For participants whose benefits are paid as lifetime annuities, living longer than expected could increase the UAAL of the Plan. Similarly, turnover, retirement, and other demographic experience different than assumed could result in an increase in UAAL of the Plan.

SECTION V - ACTUARIAL ASSUMPTIONS AND METHODS

**D. Assessment of Risk Associated with Measurement of Pension Liability and Contributions (Continued)**

**Contribution risk:** *The potential of actual future contributions deviating from expected future contributions.*

The Board has adopted a formal funding policy with the objective of fully funding the system over a closed 30-year period while adhering to the applicable statutes of the State of Missouri, as well as sound financial principles, such as maintaining contribution rate stability and intergenerational equity. The risks noted above could trigger changes in the UAAL of the Plan, thus requiring additional funding. In addition, the financial viability and cash position, as well as applicable law of the State of Missouri, could change over time. Finally, the funding method currently assumes a stable payroll growth into the future. To the extent future covered payroll declines, this would lead to a higher contribution rate. For the reasons noted, there is risk that the Actuarially Determined Contribution could increase and/or that some/all employers and members may not fully contribute at the rates established by the Board.

A numerical assessment of investment and inflation risk is presented below. A numerical assessment of the other risks identified was beyond the scope of this engagement, though we encourage such an assessment be performed to better understand exposure to these risks.

	Impact of 0.5% Increase in COLA Assumption	Impact of One-time 1.0% COLA Greater than Assumed	Impact of 0.5% Decrease in Investment Return Assumption	Impact of One-time 1.0% Investment Return Less Than Assumed
UAAL (\$)	\$246M	\$25M	\$402M	\$58M
Funded %	(3.17%)	(0.33%)	(5.07%)	(0.76%)
ADC Rate	1.17%	0.10%	2.51%	0.20%

SECTION V - ACTUARIAL ASSUMPTIONS AND METHODS

**D. Assessment of Risk Associated with Measurement of Pension Liability and Contributions (Continued)**

As the population ages and the plan matures, the level of risk associated with funding the plan increases. Below are some plan maturity measures that are significant to understanding the risks associated with the plan.

**Ratio of Market Value of Assets to Active Participant Payroll:** The amount of plan assets relative to covered payroll is a significant indicator of contribution risk for the plan since the size of the market value of assets will increase relative to active payroll as the plan matures. A higher ratio means that the PEERS contribution rate would be more sensitive to investment returns that are higher or lower than expected.

Valuation Date	Market Value of Assets (a)	Covered Payroll (b)	Ratio (c) = (a)/(b)
6/30/2017	\$ 4,446,418,007	\$ 1,558,183,433	2.85
6/30/2018	\$ 4,769,765,289	\$ 1,636,007,948	2.92
6/30/2019	\$ 5,018,523,615	\$ 1,665,654,047	3.01
6/30/2020	\$ 5,118,843,873	\$ 1,732,243,294	2.96
6/30/2021	\$ 6,453,161,951	\$ 1,758,535,339	3.67

**Ratio of Retired Life Actuarial Accrued Liability to Total Actuarial Accrued Liability:** As the plan matures, the percentage of the liability attributable to retirees will grow. When more of the total liability is associated with retirees, volatility of investment returns has a impact on the funding of PEERS as it becomes more challenging to recover from investment losses when there is less active payroll to spread costs over. A higher retiree AAL percentage means that the PEERS contribution rate would be more sensitive to investment returns that are higher or lower than expected.

Valuation Date	Retiree AAL (a)	Total AAL (b)	Retiree AAL Percentage (c) = (a)/(b)
6/30/2017	\$ 2,453,877,197	\$ 5,209,368,865	47.11%
6/30/2018	\$ 2,678,123,569	\$ 5,542,477,610	48.32%
6/30/2019	\$ 2,861,160,127	\$ 5,809,484,699	49.25%
6/30/2020	\$ 3,071,099,312	\$ 6,089,401,204	50.43%
6/30/2021	\$ 3,430,561,254	\$ 6,560,854,343	52.29%

**Ratio of Contributions Less Benefit Payments to Market Value of Assets:** When a plan has negative cash flows, meaning benefit payments are greater than contributions, and has a year with lower than expected investment returns, there will then be less total assets that can be reinvested to earn higher returns in future years.

Year Ending / Valuation Date	Contributions (a)	Benefit Payments (b)	Net Cash Flow (c) = (a) - (b)	Market Value of Assets (d)	Ratio (e) = (c)/(d)
6/30/2017	\$ 229,686,375	\$ 269,268,101	\$ (39,581,726)	\$ 4,446,418,007	-0.89%
6/30/2018	\$ 236,570,993	\$ 287,634,108	\$ (51,063,115)	\$ 4,769,765,289	-1.07%
6/30/2019	\$ 246,651,151	\$ 310,242,399	\$ (63,591,248)	\$ 5,018,523,615	-1.27%
6/30/2020	\$ 255,880,705	\$ 330,337,694	\$ (74,456,989)	\$ 5,118,843,873	-1.45%
6/30/2021	\$ 261,201,579	\$ 350,520,890	\$ (89,319,311)	\$ 6,453,161,951	-1.38%

## SECTION VI - SUMMARY OF PLAN PROVISIONS

### A. Summary of Benefit Provisions

Below is a summary of the plan provisions that are pertinent to the valuation herein and may exclude certain provisions that are not deemed relevant to our calculations. This summary is based on our understanding of the plan provisions set forth in the applicable statutes of the State of Missouri. If there is a discrepancy between the summary below and the applicable statutes, the applicable statutes shall govern.

Member Contributions	Half the total PEERS contribution rate. For fiscal year 2021, the total PEERS contribution rate was 13.72%.
Normal (Unreduced) Retirement	
Eligibility	Attainment of age 60 with at least five years of Creditable Service, or at any age after completion of 30 years of Creditable Service, or at any age when age plus Creditable Service is at least 80.
Benefit	1.61% of Final Average Salary for each year of Membership Service. A year of Prior Service is treated as 0.6 year of Membership Service. Any person retiring prior to age 62 under the Rule of 80 or with 30 years of creditable service will receive an additional benefit payable to attainment of age 62. This benefit is equal to 0.8% of Final Average Salary for each year of Membership Service.
Compensation	All regular earnings as an employee of a PEERS-covered employer. Compensation or salary includes, but is not limited to, payments for extra duties, overtime payments and employer-paid medical, dental and vision insurance premiums for the member.
Final Average Salary	Average monthly salary over the Member's three highest consecutive years of service. Effective August 28, 2007, the maximum increase in the annual compensation used for the final average salary shall not exceed twenty percent.
Membership Service	Service while a participating member of PEERS. Service is measured each year in relation to minimum salary for 20 hours per week in the position for that year.
Prior Service	Service rendered in a covered position prior to November 1, 1965.
Creditable Service	Membership Service plus any Prior Service.
Normal Form of Benefit	Single Life Annuity  Options available include joint and survivor (50%, 75%, or 100%), term certain (60 or 120 months) and life thereafter, partial lump sum option (PLSO), and accelerated payment plan (APP).

SECTION VI - SUMMARY OF PLAN PROVISIONS

A. Summary of Benefit Provisions (Continued)

Early (Age Reduced) Retirement

Eligibility                      Attainment of age 55 and under age 60 with at least five years of creditable service.

Benefit                              Normal retirement benefit accrued to the date of early retirement, actuarially reduced from age 60.

Special Early Retirement Under Modified Formula

Eligibility                      Retirement at an age under 55 and with at least 25 years of creditable service but not eligible for the Rule of 80.

Benefit                              Based on a percentage of final average salary per year of creditable service. Percentages are as follows:

<u>Years of Service</u>	<u>Benefit Percentage</u>
25-25.9	1.51%
26-26.9	1.53%
27-27.9	1.55%
28-28.9	1.57%
29-29.9	1.59%

COLA Adjustments

Applicable statutes provide the Board with limited discretion in granting COLAs. The Board has established a policy of granting a COLA on each January 1 as follows, which is compliant with current statutes:

- If the June to June change in the CPI-U is less than 2% for consecutive one year periods, a cost-of-living increase of 2% will be granted when the cumulative increase is equal to or greater than 2%, at which point the cumulative increase in the CPI-U will be reset to zero. For the following year, the starting CPI-U will be based on the June value immediately preceding the January 1 at which the 2% cost-of-living increase is granted.
- If the June to June change in the CPI-U is greater than or equal to 2%, but less than 5%, a cost-of-living increase of 2% will be granted.
- If the June to June change in the CPI-U is greater than or equal to 5%, a cost-of-living increase of 5% will be granted.

For any member such adjustments commence in the fourth January after commencement of benefits. The total of such increases may not exceed 80% of the original benefit for any member.

---

SECTION VI - SUMMARY OF PLAN PROVISIONS

**A. Summary of Benefit Provisions (Continued)**

Disability Benefits

Definition of Disability	Incapacity for performance of gainful employment after completion of five years of creditable service and before age 60.
Benefit	Lifetime benefit equal to 90% of accrued normal retirement benefit.
Form of Benefit	If eligible, surviving spouse may elect a survivor benefit. COLA adjustments similar to those provided to retirees are provided on this benefit.

Vesting

Eligibility	Completion of five years of creditable service.
Benefit	Accrued normal retirement benefit payable at earliest retirement age based on service at date of termination. Benefit is based on formula in effect at commencement of benefit.

Death/Survivor Benefits

Refund	Refund of accumulated member contributions with interest.
Survivor Benefits	<p>If the member has at least 5 years of creditable service at date of death, the spouse may receive a survivor benefit based on 100% J&amp;S equivalent of the benefit accrued to date of death. The benefit may commence:</p> <ol style="list-style-type: none"><li>1. Immediately if member is eligible to retire at date of death, or</li><li>2. At a future retirement date of the deceased member.</li></ol> <p>The benefit may be reduced for early commencement if the deceased member would not have been eligible for unreduced retirement at that date based on service to date of death.</p> <p>COLA adjustments similar to those provided to retirees are provided on these benefits.</p>

SECTION VI - SUMMARY OF PLAN PROVISIONS

**A. Summary of Benefit Provisions (Continued)**

Changes in Benefit Provisions

A temporary waiver removing the hours and earnings limitations for PEERS members working after retirement was included in the state of emergency order in 2020 in response to the Coronavirus pandemic. The waiver was intended to mitigate the anticipated shortage of qualified substitute and temporary employees that would be needed by school districts during the pandemic. The waiver was extended through December 31, 2021. We did not include this provision in our valuation of the liabilities as of June 30, 2021 since it is our understanding that the waiver is a temporary change to the working after retirement provisions and the limitations will continue to be implemented after December 31, 2021.

It is our understanding that all other provisions are the same as the prior year.
