Board Members<br>North Dakota Public Employees Retirement System<br>Bismarck, North Dakota<br>Members of the Board:

We are pleased to provide our formal annual Actuarial Valuation Report as of July 1, 2017, for the North Dakota Public Employees Retirement System ("NDPERS"). The actuarial valuation was performed at the request of the Board and is intended for use by the Board and NDPERS and those designated by the Board and NDPERS. This report may be provided to parties other than the Board and NDPERS only in its entirety and only with the permission of the Board and NDPERS. GRS is not responsible for unauthorized use of this report.

This report provides, among other things, the actuarial employer contribution to the NDPERS for the Plan Year commencing July 1, 2017, and ending on June 30, 2018. This actuarial valuation also provides information required by GASB Statement No. 67. Information required by GASB Statement No. 68 and the employer allocation of the Net Pension Liability are provided in a separate report. This report should not be relied on for any purpose other than the purpose described herein.

The actuarial valuation was based upon information furnished by the NDPERS Staff, concerning benefits provided by the North Dakota Public Employees Retirement System, financial transactions, plan provisions and census data for active members, terminated members, retirees and beneficiaries as of July 1, 2017. We checked for internal and year-to-year consistency, but did not audit the data. We are not responsible for the accuracy or completeness of the information provided by the NDPERS Staff.

The Board approved the following changes to the actuarial assumptions beginning with the July 1, 2017 actuarial valuation:

- The investment return assumption was lowered from 8.00 percent to 7.75 percent;
- The price inflation assumption was lowered from 3.50 percent to 2.50 percent;
- The payroll growth assumption used in calculating the amortization of the unfunded liability contribution for the actuarial contribution rate was lowered from 4.50 percent to 3.75 percent for Main System and Law Enforcement and from 4.00 percent to 3.25 percent for Judges;
- The asset valuation method was updated to smooth total investment gains or losses compared to the investment return assumption over a five-year period. Net deferred asset gains attributable to fiscal years 2016 and prior were fully recognized as of July 1, 2017

All other actuarial assumptions and the actuarial cost method are unchanged from the last actuarial valuation as of July 1, 2016. They were based on an experience review for the five-year period ending July 1, 2014, which

## Board Members

North Dakota Public Employees Retirement System
Page 2
was performed by the prior actuary, and were first adopted for use commencing with the July 1, 2015, actuarial valuation.

Contributions to PERS are based on fixed statutory contribution rates. Based on the current actuarial valuation and the current actuarial assumptions and methods and benefit provisions, the current statutory employer contribution rate of $7.12 \%$ for the Main System is not expected to ever amortize the unfunded liability. The funded ratio is projected to ultimately decrease from the current funded ratio of about 70 percent. We recommend an increase to the Main System statutory employer contribution rate (to at least $\mathbf{9 . 6 2 \%}$ ) such that the unfunded liability is amortized over a period of no longer than $\mathbf{3 0}$ years and the funded ratio will increase toward 100\%.

The plan provisions are unchanged from the last actuarial valuation as of July 1, 2016.

To the best of our knowledge the information contained in this report is accurate and fairly presents the actuarial position of the North Dakota Public Employees Retirement System as of the valuation date. All calculations have been made in conformity with generally accepted actuarial principles and practices, and with the Actuarial Standards of Practice issued by the Actuarial Standards Board.

Lance J. Weiss and Amy Williams are Members of the American Academy of Actuaries and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein.

The signing actuaries are independent of the plan sponsor.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law.

We will be pleased to review this report with you at your convenience.
Respectfully submitted,
Gabriel, Roeder, Smith \& Company

Lance J. Weiss, E.A., M.A.A.A., F.C.A. Senior Consultant and Team Leader

Ms. Sharon Schiermeister, NDPERS

## Section A

## Actuarial Valuation Results

## Comments on the Actuarial Valuation

## Purpose

At your request, we have performed an actuarial valuation of the North Dakota Public Employees Retirement System as of July 1, 2017:

- To determine the funding status of the System as of the actuarial valuation date;
- To determine the actuarial employer contribution rate for the fiscal year beginning July 1, 2017; and
- To provide other data required by NDPERS.

Pension plan financial reporting under GASB Statement No. 67 is provided in Section D of this report. Employer financial reporting under GASB Statement No. 68 is provided in a separate report.

## Membership Data

We received the data from the North Dakota Public Employees Retirement System Staff. We performed certain checks for reasonableness and found the data to be complete and reliable for actuarial valuation purposes. However, we did not audit the data.

A total of 23,243 active members (including the Main System, Judges and Law Enforcement) were included in the actuarial valuation as of July 1, 2017. Between the 2016 and 2017 actuarial valuations, the number of active employees decreased by 173 members, or 0.7 percent. The average annual valuation pay increased by 2.2 percent, from $\$ 44,779$ to $\$ 45,750$ between the 2016 and 2017 actuarial valuations. There were 6,283 active members who were eligible for retirement (normal, early or Rule of 85) as of July 1, 2017.

The number of benefit recipients (excluding three members receiving benefits under the Special Prior Service Plan as of July 1, 2016) increased from 10,515 to 11,103 , or 5.6 percent, since the last actuarial valuation. The average monthly benefit increased by 4.0 percent, from $\$ 1,135$ to $\$ 1,181$. During the year ending June 30, 2017, there were 904 members awarded a benefit.

There were 5,903 inactive members as of July 1, 2017, who were vested and elected to receive a deferred benefit. The average monthly deferred benefit is $\$ 531$. There were 5,751 inactive members as of July 1 , 2017, who were not vested or elected to receive a refund of contributions.

Section C summarizes the membership data.

## Plan Provisions

Section F outlines the principal benefit provisions of the System. There were no changes since the previous valuation.

## Comments on the Actuarial Valuation (Continued)

## Actuarial Assumptions and Methods

The Board approved the following changes to the actuarial assumptions beginning with the July 1, 2017 actuarial valuation:

- The investment return assumption was lowered from 8.00 percent to 7.75 percent;
- The price inflation assumption was lowered from 3.50 percent to 2.50 percent;
- The payroll growth assumption used in calculating the amortization of the unfunded liability contribution for the actuarial contribution rate was lowered from 4.50 percent to 3.75 percent for Main System and Law Enforcement and from 4.00 percent to 3.25 percent for Judges;
- The asset valuation method was updated to smooth total investment gains or losses compared to the investment return assumption over a five-year period. Net deferred asset gains attributable to fiscal years 2016 and prior were fully recognized as of July 1, 2017.

All other actuarial assumptions used in the actuarial valuation as of July 1, 2017, were based on an experience review for the five-year period ending July 1, 2014, which was performed by the prior actuary, and were first adopted for use commencing with the July 1,2015 , valuation.

Section E outlines the actuarial assumptions and methods used in the actuarial valuation. The assumption for administrative expenses is equal to the prior years' administrative expenses, adjusted for inflation. In total, this amount has increased from $\$ 2,626,622$ to $\$ 2,672,424$.

The actuarial contribution rate is calculated using a 20-year open period, level percentage of payroll amortization method. The remaining amortization period will be reset to 20 years in each future actuarial valuation.

## Plan Asset Return

On a market value basis, NDPERS assets had an investment return of approximately 12.90 percent (net of investment expenses). On an actuarial value of asset basis, NDPERS assets had an investment return of approximately 8.98 percent on an actuarial value of assets basis, which compares to the prior year assumed rate of return of 8.00 percent.

The actuarial value of assets is currently 96.1 percent of the market value of assets. There is $\$ 94,636,957$ in net asset gains currently being deferred that will be phased into the actuarial value of assets over the next four years.

## Gain/Loss Analysis

During the plan year ending June 30, 2017, the unfunded actuarial accrued liability ("UAAL") decreased from $\$ 1,131,287,826$ as of July 1,2016 , to $\$ 1,093,616,455$ as of July 1,2017 , which is a decrease of $\$ 37,671,371$. The key factors contributing to the decrease in the UAAL were changes in actuarial assumptions. The unfunded actuarial accrued liability based on the market value of assets increased from $\$ 981,669,810$ to $\$ 998,979,497$.

## Comments on the Actuarial Valuation (Continued)

## Funded Ratio

The funded ratio measures the portion of the actuarial accrued liability (calculated based on the actuarial assumptions disclosed in this report) that is currently funded. The total PERS funded ratio is 70.7 percent on an actuarial value of assets basis and 73.2 percent on a market value of assets basis as of July 1, 2017.

The funded ratio for the Main System is 69.9 percent, the funded ratio for the Judges System is 117.4 percent, the funded ratio for the Law Enforcement with prior Main System service plan is 80.0 percent and the funded ratio for the Law Enforcement without prior Main System service plan is 100.5 percent as of July 1,2017 . The funded ratios based on the market value of assets are approximately 2 to 4 percentage points higher than the funded ratios based on the actuarial value of assets.

The funded ratio and unfunded actuarial accrued liability are appropriate for assessing the need for and the amount of future unfunded liability contributions (excludes normal cost contributions). They are not appropriate for assessing the sufficiency of plan assets to cover the estimated cost of settling the System's benefit obligations.

## Employer Contributions

The actuarially determined contribution rate is calculated as the normal cost contribution (to fund benefits accruing during the year) plus a contribution to amortize the unfunded liability. The unfunded liability contribution rate is calculated using a 20 -year open period, level percentage of payroll amortization method. The remaining amortization period will be reset to 20 years in each future actuarial valuation. If employers contributed the actuarial contribution rate, the contribution rate would be expected to gradually decrease using a 20 -year open amortization period as the funded ratio gradually increased. An open amortization period is expected to gradually improve the funded ratio. However, the funded ratio is not expected to reach 100 percent under this method (assuming no actuarial gains or losses) because the remaining unfunded liability at each future valuation date is re-amortized over a new 20-year period.

The contributions that are made by employers are based on fixed contribution rates that are set by statute (and not based on the actuarially determined rate). The statutory contribution rate is significantly lower than the actuarial contribution rate for the Main System, significantly higher than the actuarial contribution rate for Judges and higher than the actuarial rate for the Law Enforcement Systems. Because the Main System comprises the majority of the liability and contribution requirement for the Combined System, the statutory contribution rate for the total PERS is also significantly lower than the actuarial contribution rate.

The portion of the statutory contribution that is applied toward the unfunded liability is the statutory contribution rate minus the employer normal cost rate. The unfunded liability contribution rate from the statutory contribution is significantly lower than the rate calculated using the 20-year level percentage of payroll amortization period. The unfunded liability contribution rate from the statutory contribution for the Main System rate is not high enough to amortize the unfunded liability over any period of time.

Because the statutory employer rate is higher than the actuarial employer rate (based on a 20-year amortization period) for the Judges and Law Enforcement Systems, the statutory employer rate amortizes the unfunded liability over a period shorter than 20 years.

We recommend an increase to the statutory contribution rate such that the unfunded liability is amortized over a period of no longer than 30 years. Based on the current actuarial valuation and the current actuarial assumptions and methods and benefit provisions, the current statutory employer contribution rate of $\mathbf{7 . 1 2 \%}$ for the Main System is not expected to ever amortize the unfunded liability. The funded ratio is projected to ultimately decrease from the current funded ratio of about 70 percent. We recommend an increase to the Main System statutory employer contribution rate (to at least 9.62\%) such that the unfunded liability is amortized over a period of no longer than $\mathbf{3 0}$ years and the funded ratio will increase toward $100 \%$.

## Historical Trends

The funded ratio (based on the actuarial value of assets) for the total PERS declined during the past 10 years from a high of 92.6 percent in 2008, to a low of 62.0 percent in 2013, and increased to the current funded ratio of 70.7 percent.

# Summary of Actuarial Valuation Results (Total PERS) 

${ }^{1}$ Equals the ratio of the actuarial value of assets to the total actuarial accrued liability.

Market value of assets by plan provided by NDPERS Staff.
Actuarial value of assets by plan allocated based on the proportion of the market value of assets as of the valuation date. Beginning with the valuation as of July 1 , 2017, the market value of assets for Highway Patrol is not combined with market value of assets for PERS to allocate the actuarial value of assets. The market value of assets for Highway Patrol is disclosed in a separate actuarial valuation report for Highway Patrol.

## Section D

## GASB Statement 67 Schedules

## Discussion

## Accounting Standard

For pension plans that are administered through trusts or equivalent arrangements, Governmental Accounting Standards Board (GASB) Statement No. 67 establishes standards of financial reporting for separately issued financial reports and specifies the required approach for measuring the pension liability. Similarly, GASB Statement No. 68 establishes standards for state and local government employers (as well as non-employer contributing entities) to account for and disclose the net pension liability, pension expense and other information associated with providing retirement benefits to their employees (and former employees) on their basic financial statements.

The following discussion provides a summary of the information that is required to be disclosed under these accounting standards. A number of these disclosure items are provided in this report. However, certain non-actuarial information, such as notes regarding accounting policies and investments, is not included in this report and the retirement system and/or plan sponsor will be responsible for preparing and disclosing that information to comply with these accounting standards.

## Financial Statements

Pension plans that prepare their own, stand-alone financial statements are required to present two financial statements - a statement of fiduciary net position and a statement of changes in fiduciary net position in accordance with GASB Statement No. 67. The statement of fiduciary net position presents the assets and liabilities of the pension plan at the end of the pension plan's reporting period. The statement of changes in fiduciary net position presents the additions, such as contributions and investment income, and deductions, such as benefit payments and expenses, and net increase or decrease in the fiduciary net position.

## Notes to Financial Statements

GASB Statement No. 68 requires the notes of the employer's financial statements to disclose the total pension expense, the pension plan's liabilities and assets, and deferred outflows and inflows of resources related to pensions.

GASB Statement Nos. 67 and 68 require the notes of the financial statements for the employers and pension plans to include certain additional information. The list of disclosure items should include:

- A description of benefits provided by the plan;
- The type of employees and number of members covered by the pension plan;
- A description of the plan's funding policy, which includes member and employer contribution requirements;
- The pension plan's investment policies;
- The pension plan's fiduciary net position, net pension liability and the pension plan's fiduciary net position as a percentage of the total pension liability;
- The net pension liability using a discount rate that is $1 \%$ higher and $1 \%$ lower than used to calculate the total pension liability and net pension liability for financial reporting purposes;
- Significant assumptions and methods used to calculate the total pension liability;
- Inputs to the discount rates; and
- Certain information about mortality assumptions and the dates of experience studies.

## GASB Statement No. 67 (Continued)

Retirement systems that issue stand-alone financial statements are required to disclose additional information in accordance with GASB Statement No. 67. This information includes:

- The composition of the pension plan's board and the authority under which benefit terms may be amended;
- A description of how fair value is determined;
- Information regarding certain reserves and investments, which include concentrations of investments greater than or equal to $5 \%$, receivables and insurance contracts excluded from plan assets; and
- Annual money-weighted rate of return.

## Required Supplementary Information

GASB Statement No. 67 requires a 10-year fiscal history of:

- Sources of changes in the net pension liability;
- Information about the components of the net pension liability and related ratios, including the pension plan's fiduciary net position as a percentage of the total pension liability, and the net pension liability as a percent of covered-employee payroll; and
- A comparison of the actual employer contributions to the actuarially determined contributions based on the plan's funding policy.

## Timing of the Actuarial Valuation

An actuarial valuation to determine the total pension liability is required to be performed at least every two years. The net pension liability and pension expense should be measured as of the pension plan's fiscal year end (measurement date) on a date that is within the employer's prior fiscal year. If the actuarial valuation used to determine the total pension liability is not calculated as of the measurement date, the total pension liability is required to be rolled forward from the actuarial valuation date to the measurement date.

The total pension liability shown in this report is based on an actuarial valuation performed as of June 30, 2017, and a measurement date of June 30, 2017.

## Single Discount Rate

Projected benefit payments are required to be discounted to their actuarial present values using a Single Discount Rate that reflects (1) a long-term expected rate of return on pension plan investments (to the extent that the plan's fiduciary net position is projected to be sufficient to pay benefits) and (2) a taxexempt municipal bond rate based on an index of 20-year mixed maturity general obligation bonds with an average Standard \& Poor's Corp.'s AA credit rating (which is published by Fidelity) as of the measurement date (to the extent that the contributions for use with the long-term expected rate of return are not met).

## GASB Statement No. 67 (Continued)

For the purpose of this valuation, the expected rate of return on pension plan investments is $7.75 \%$; the municipal bond rate is $3.56 \%$ (based on the most recent date available on or before the measurement date of the "20-year Municipal GO Index" from Fidelity); and the resulting Single Discount Rate is $6.44 \%$.

## Effective Date and Transition

GASB Statement Nos. 67 and 68 are effective for fiscal years beginning after June 15, 2013, and June 15, 2014, respectively.

## Sensitivity of Net Pension Liability to the Single Discount Rate Assumption

The following presents the net pension liability/(asset) of the PERS, calculated using the current discount rate of $6.44 \%$, as well as what the PERS' net pension liability/(asset) would be if it were calculated using a discount rate that is 1-percentage point lower (5.44\%) or is 1-percentage point higher ( $7.44 \%$ ) than the current rate.

|  | Current Single Discount |  |  |
| :--- | :---: | :---: | :---: |
|  | $\mathbf{1 \%}$ Decrease | Rate Assumption | $\mathbf{1 \% ~ I n c r e a s e ~}$ |
| System | $\mathbf{5 . 4 4 \%}$ | $\mathbf{6 . 4 4 \%}$ | $\mathbf{7 . 4 4 \%}$ |
| Main System | $\$ 2,181,997,191$ | $\$ 1,607,328,180$ | $\$ 1,129,227,525$ |
| Judges | 775,578 | $(3,787,110)$ | $(7,708,973)$ |
| Law Enforcement |  |  |  |

| Total PERS | $2,218,162,831$ | $1,626,536,101$ | $1,134,481,805$ |

## System Asset Allocation

| Asset Class | Target Allocation | Long-Term Expected Real Rate of Return | Allocation-Weighted <br> Long-Term Expected <br> Real Rate of Return |
| :---: | :---: | :---: | :---: |
| Domestic Equities | 31.00 \% | 6.05 \% | 1.88 \% |
| International Equities | 21.00 \% | 6.70 \% | 1.41 \% |
| Private Equity | 5.00 \% | 10.20 \% | 0.51 \% |
| Domestic Fixed Income | 17.00 \% | 1.43 \% | 0.24 \% |
| Int'I Fixed Income-Developed Investment Grade | 5.00 \% | (0.45)\% | (0.02)\% |
| Global Real Assets | 20.00 \% | 5.16 \% | 1.03 \% |
| Cash Equivalents | 1.00 \% | 0.00 \% | 0.00 \% |
| Total | 100.00 \% |  | 5.05 \% |

Expected return by asset class and target allocation provided by investment consultant.
The discount rate used to measure the total pension liability was $6.44 \%$. The projection of cash flows used to determine the discount rate assumed plan member and statutory/Board approved employer contributions will be made at rates equal to those based on the July 1, 2017, and July 1, 2016, PERS actuarial valuation reports. For this purpose, only employer contributions that are intended to fund benefits of current plan members and their beneficiaries are included. Projected employer contributions that are intended to fund the service costs of future plan members and their beneficiaries are not included. Based on those assumptions, the pension plan's fiduciary net position was projected to be sufficient to make all projected future benefit payments through the year of 2061. Therefore, the longterm expected rate of return on pension plan investments was applied to projected benefit payments through the year 2061, and the municipal bond rate was applied to all benefit payments after that date.

GASB Statement No. 67 (Continued)

## Schedule of Contributions Multiyear

[^3]Values prior to July 1, 2016, were calculated by the prior actuary.
Retirement
Consulting

Valuation Date:
Notes

July 1, 2017
The actuarially determined contribution amount is calculated as of June 30,12 months prior to the end of the fiscal year in which the contributions are reported.

Methods and Assumptions Used to Determine Actuarially Determined Contribution Rates:

| Actuarial Cost Method | Entry Age Normal |
| :--- | :--- |
| Amortization Method | Level Percentage of Payroll, Open Period |

| Amortization Method | Level Percentage of Payroll, Open Period |
| :--- | :--- |
|  | Assumed annual payroll growth of $3.75 \%$ ( $3.25 \%$ for Judges) beginning with the fiscal year 2018 contribution, $4.50 \%$ ( $4.00 \%$ for | Judges) for contributions prior to fiscal year 2018.

Remaining Amortization Period
Asset Valuation Method
Inflation
20 years
5-Year smoothed market
2.50 percent beginning with the fiscal year 2018 contribution, $3.50 \%$ for contributions prior to fiscal year 2018.

Salary Increases
Investment Rate of Return
Retirement Age
Mortality
4.00 percent to 20.00 percent including inflation
$7.75 \%$ beginning with the fiscal year 2018 contribution, $8.00 \%$ for contributions prior to fiscal year 2018.
Age-based table of rates that are specific to the type of eligibility condition.
RP 2000 Combined Healthy Mortality table, sex-distinct, with rates set back 2 years for males and 3 years for females. RP 2000 Disabled Mortality table, sex-distinct, with rates set back 1 years for males (no setback for females), with rates multiplied by $125 \%$ for post-retirement disabled mortality. Mortality rates are projected from 2014 using the Social Security Administration (SSA) Intermediate Cost scale.

Other Information:
Notes There were no benefit changes during the year.
First effective with the actuarial valuation as of July 1, 2017, investment return assumption was lowered from 8.00 percent to 7.75 percent and price inflation rate was lowered from 3.00 percent to 2.50 percent. Annual payroll growth was lowered from 4.50 percent to 3.75 percent ( 4.00 percent to 3.25 percent for Judges). Asset smoothing method is updated to 5 -year smoothed market. All other actuarial assumptions were first adopted by the Board and are based on an experience study covering the period July 1 , 2009, through June 30, 2014.

The employer rates to the System are the statutory/Board approved contribution rates of $7.12 \%$ of payroll for the Main System, $17.52 \%$ for the Judges System, $9.81 \%$ for Law Enforcement with prior Main System service System, and $7.93 \%$ for Law Enforcement without prior Main System service System.

Methods and Assumptions Used to Determine GASB 67/68 Net Pension Liability:
Actuarial Cost Method Entry Age Normal

Asset Valuation Method Plan Fiduciary Net Position (Market value of assets, no asset smoothing)

Inflation
Salary Increases

## Actuarial Valuation Procedures

## Actuarial Assumptions in the Actuarial Valuation Process

Normal cost and the allocation of benefit values between service rendered before and after the valuation date were determined using the Individual Entry Age Normal actuarial cost method having the following characteristics:

- The normal cost for each individual active member, payable from the date of employment to the date of retirement, is sufficient to accumulate the value of the member's benefit at the time of retirement; and
- Each annual normal cost is a constant percentage of the member's year by year projected covered pay.

Financing of Unfunded Actuarial Accrued Liabilities. The unfunded actuarial accrued liability is amortized using 20-year open level-percentage of pay amortization of the unfunded liability as of the valuation date for purposes of calculating the actuarial contribution rate.

Actuarial Value of Pension Plan Assets. The calculated value is determined by adjusting the market value of assets to reflect the investment gains and losses (the difference between the actual investment return and the expected investment return) during each of the last five years at the rate of 20 percent per year. This asset smoothing method was adopted by the Board for use beginning with the July, 1 2017, actuarial valuation. Net deferred asset gains attributable to fiscal years 2016 and prior were fully recognized as of July 1, 2017.

Actuarial Valuation Assumptions. The contribution and benefit values of the System are calculated by applying actuarial assumptions to the benefit provisions and census information furnished, using the actuarial cost method described above.

The principal areas of financial risk which require assumptions about future experiences are:

- Long-term rates of investment return to be generated by the assets of the Plan;
- Patterns of pay increases to members;
- Rates of mortality among members, retirees and beneficiaries;
- Rates of withdrawal of active members;
- Rates of disability among members; and
- The age patterns of actual retirement.

In an actuarial valuation, the monetary effect of each assumption is calculated for as long as a present covered person survives; a period of time which can be as long as a century.

Actual experience of the Plan will not coincide exactly with assumed experience. Each valuation provides a complete recalculation of assumed future experience and takes into account all past differences between assumed and actual experience. The result is a continual series of adjustments (usually small) to the computed contribution rate.

## Actuarial Assumptions in the Actuarial Valuation Process (Continued)

From time-to-time it becomes appropriate to modify one or more of the assumptions, to reflect experience trends (but not random year-to-year fluctuations). Thus, an experience review of the North Dakota Public Employees Retirement System for the period July 1, 2009, to July 1, 2014, was performed by the prior actuary to compare the demographic and economic experience against the actuarial assumptions used in the valuations. Most of the actuarial assumptions described in this section were adopted by the Board for use beginning with the July 1, 2015, valuation.

Additional information regarding the rationale for the assumptions based on the prior actuary's experience study may be found in the 2015 experience review report. All actuarial assumptions are expectations of future experience, not current market measures.

Prior to the July 1, 2017, actuarial valuation, GRS performed an economic study to review the key economic actuarial assumptions and the asset valuation method. Additional information regarding the rationale for the assumptions based on the GRS economic study may be found in the report dated February 20, 2017.

Except where noted, most actuarial assumptions described in this section were adopted by the Board for use beginning with the July 1, 2015, valuation.

The assumptions were provided by, and are the responsibility of, the NDPERS Board. GRS was unable to judge the reasonableness of the assumptions and methods without performing a substantial amount of additional work beyond the scope of the assignment, and did not do so.

## Current Actuarial Valuation Assumptions and Methods

The assumed rate of investment return used was 7.75 percent, net of investment expenses, annually. This assumption was adopted by the Board for use beginning with the July 1, 2017, actuarial valuation.

The assumed rate of price inflation is 2.50 percent. This assumption was adopted by the Board for use beginning with the July 1, 2017, actuarial valuation.

No Cost of Living Adjustments (COLA) are provided to benefits recipients. Therefore, there is no COLA assumption for this valuation.

The rates of annual salary increase used for individual members are in accordance with the following table. This assumption is used to project a member's current salary to the salaries upon which benefit amounts will be based.

| Service At <br> Beginning of Year | Main System |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | State <br> Employee | Non-State Employee | Law <br> Enforcement | Judges |
| 0 | 12.00\% | 15.00\% | 20.00\% |  |
| 1 | 9.50\% | 10.00\% | 20.00\% |  |
| 2 | 7.25\% | 8.00\% | 20.00\% |  |
| 3 |  |  | 10.00\% |  |
| 4 |  |  | 10.00\% |  |
| Age* |  |  |  |  |
| Under 30 | 7.25\% | 10.00\% | 7.25\% | 4.00\% |
| 30-39 | 6.50\% | 7.50\% | 6.50\% | 4.00\% |
| 40-49 | 6.25\% | 6.75\% | 6.25\% | 4.00\% |
| 50-59 | 5.75\% | 6.50\% | 5.75\% | 4.00\% |
| 60+ | 5.00\% | 5.25\% | 5.00\% | 4.00\% |

*Age-based salary increase rates apply for employees with three or more years of service in the Main System, five or more years of service in the Law Enforcement Systems and for all employees in the Judges System.

The assumed rate of total payroll growth used in amortizing the unfunded liability as a level percentage of pay is:

Main System and Law Enforcement: 3.75 percent
Judges: 3.25 percent
This assumption was adopted by the Board for use beginning with the July 1, 2017 actuarial valuation.

## Actuarial Valuation Assumptions (Continued)

The mortality assumptions are as follows:

|  | Male <br> Setback | Female <br> Setback |
| :--- | :---: | :---: |
| RP-2000 Combined Healthy <br> Mortality Table (healthy mortality) | 2 years | 3 years |
| RP-2000 Disabled Retiree Mortality <br> Table (disabled post retirement)* | 1 year | 0 years |

*Rates multiplied by 125 percent.
To provide a margin for future mortality improvements, generational mortality improvements from the year 2014 using the Social Security Administration (SSA) 2014 Intermediate Cost scale were assumed.

Following is a table with the life expectancies by age as of the valuation date.

| Age | Healthy Mortality |  | Disabled Mortality |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Future Life |  | Future Life |  |
|  | Expectancy (years) in 2017 |  | Expectancy (years) in 2017 |  |
|  | Men | Women | Men | Women |
| 20 | 67.75 | 72.15 | 32.53 | 49.96 |
| 25 | 62.35 | 66.74 | 30.59 | 46.09 |
| 30 | 56.96 | 61.32 | 28.56 | 42.15 |
| 35 | 51.59 | 55.91 | 26.39 | 38.13 |
| 40 | 46.27 | 50.54 | 24.01 | 33.98 |
| 45 | 41.01 | 45.21 | 21.30 | 29.66 |
| 50 | 35.80 | 39.93 | 18.42 | 25.41 |
| 55 | 30.67 | 34.73 | 15.88 | 21.64 |
| 60 | 25.72 | 29.65 | 13.67 | 18.33 |
| 65 | 21.06 | 24.80 | 11.63 | 15.32 |
| 70 | 16.82 | 20.31 | 9.67 | 12.54 |
| 75 | 13.00 | 16.20 | 7.81 | 10.04 |
| 80 | 9.67 | 12.54 | 6.19 | 7.87 |
| 85 | 6.92 | 9.35 | 4.87 | 6.04 |
| 90 | 4.83 | 6.75 | 3.68 | 4.55 |
| 95 | 3.44 | 4.93 | 2.59 | 3.44 |
| 100 | 2.61 | 3.88 | 1.95 | 2.78 |
| 105 | 2.17 | 3.15 | 1.62 | 2.16 |

## Actuarial Valuation Assumptions (Continued)

Rates of separation from active membership are represented by the following table (rates do not apply to members eligible to retire and do not include separation on account of death or disability). This assumption measures the probabilities of members terminating employment.

| Service Beginning of Year | Service and Age-Based Rates For First Five Years of Service |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Main System |  |  | Law Enforcement |  |  |
|  | Age |  |  |  |  |  |
|  | Under 30 | 30-39 | 40+ | Under 30 | 30-39 | 40+ |
| 0 | 22.00\% | 16.00\% | 12.00\% | 25.00\% | 20.00\% | 17.00\% |
| 1 | 18.00\% | 14.00\% | 10.00\% | 23.00\% | 17.00\% | 15.00\% |
| 2 | 16.00\% | 12.00\% | 10.00\% | 20.00\% | 15.00\% | 12.00\% |
| 3 | 14.00\% | 12.00\% | 8.00\% | 17.00\% | 13.00\% | 10.00\% |
| 4 | 14.00\% | 11.00\% | 7.00\% | 15.00\% | 11.00\% | 7.00\% |
| Age | Age-Based Rates Only After First Five Years of Service |  |  |  |  |  |
|  | Main System |  |  | Law Enforcement |  |  |
| 20-24 | 8.80\% |  |  | 8.80\% |  |  |
| 25-29 | 8.80\% |  |  | 8.80\% |  |  |
| 30-34 | 5.50\% |  |  | 5.50\% |  |  |
| 35-39 | 4.70\% |  |  | 4.70\% |  |  |
| 40-44 | 3.90\% |  |  | 3.90\% |  |  |
| 45-49 | 3.70\% |  |  | 3.70\% |  |  |
| 50-54 | 3.40\% |  |  | 3.40\% |  |  |
| 55-59 | 0.10\% |  |  | 0.10\% |  |  |
| 60+ | 0.20\% |  |  | 0.20\% |  |  |

No pre-retirement termination is assumed for Judges.
Vested participants who terminate are assumed to elect the option with the greater present value:

1) A refund of their accumulated contributions with interest or
2) A deferred benefit.

Withdrawal rates end upon eligibility for early retirement.
Early retirement eligibility is as follows:
Main System: Earlier of (i) age 55 and 3 years of service, and (ii) eligibility for Rule of 85 . For members hired on or after 1/1/2016, earlier of (i) age 55 and 3 years of service, and (ii) eligibility for Rule of 90.

Law Enforcement: Age 50 and 3 years of service.
Account Balance Due to Vested Employer Contribution (PEP): Participation Under Chapter 54-52.2: If not elected: None. If elected: $100 \%$ of active members of the Main System and Law Enforcement. Contribution: Maximum allowed, based on service at the beginning of the Plan year.

## Actuarial Valuation Assumptions (Continued)

Rates of disability:
Before age 65: Males: 20\% of OASDI disability incidence rates. Females: $10 \%$ of OASDI disability incidence rates.

Age 65 and later: $0.25 \%$ per year.
Rates of disability were as follows:

| Age | All Plans |  |
| :---: | :---: | :---: |
|  | Male | Female |
| 20 | 0.0120\% | 0.0060\% |
| 25 | 0.0171\% | 0.0085\% |
| 30 | 0.0220\% | 0.0110\% |
| 35 | 0.0295\% | 0.0147\% |
| 40 | 0.0440\% | 0.0220\% |
| 45 | 0.0719\% | 0.0360\% |
| 50 | 0.1212\% | 0.0606\% |
| 55 | 0.2018\% | 0.1009\% |
| 60 | 0.3254\% | 0.1627\% |
| 65 | 0.2500\% | 0.2500\% |

Social Security Disability (for Judges' disability benefit offset):

Eligibility:
Consumer Price Index Increases:
Wage Base Increases:

50\%
3.5\% per annum
5.0\% per annum

Workers' Compensation (for Judges' disability benefit offset):

None assumed.

## Actuarial Valuation Assumptions (Continued)

Rates of retirement for members eligible to retire during the next year were as follows:

| Age | Main System |  | Law Enforcement Unreduced | Judges Unreduced |
| :---: | :---: | :---: | :---: | :---: |
|  | Reduced | Unreduced |  |  |
| 50 |  | 30.00\% | 25.00\% |  |
| 51 |  | 10.00\% | 25.00\% |  |
| 52 |  | 10.00\% | 25.00\% |  |
| 53 |  | 10.00\% | 25.00\% |  |
| 54 |  | 10.00\% | 25.00\% |  |
| 55 | 1.00\% | 10.00\% | 10.00\% | 10.00\% |
| 56 | 1.00\% | 8.00\% | 10.00\% | 10.00\% |
| 57 | 1.00\% | 8.00\% | 10.00\% | 10.00\% |
| 58 | 1.00\% | 8.00\% | 10.00\% | 10.00\% |
| 59 | 1.00\% | 8.00\% | 10.00\% | 10.00\% |
| 60 | 2.00\% | 8.00\% | 10.00\% | 10.00\% |
| 61 | 5.00\% | 15.00\% | 10.00\% | 10.00\% |
| 62 | 10.00\% | 30.00\% | 50.00\% | 10.00\% |
| 63 | 10.00\% | 30.00\% | 50.00\% | 10.00\% |
| 64 | 10.00\% | 20.00\% | 50.00\% | 10.00\% |
| 65 |  | 30.00\% | 50.00\% | 20.00\% |
| 66 |  | 20.00\% | 20.00\% | 20.00\% |
| 67 |  | 15.00\% | 20.00\% | 20.00\% |
| 68 |  | 15.00\% | 20.00\% | 20.00\% |
| 69 |  | 15.00\% | 20.00\% | 20.00\% |
| 70 |  | 15.00\% | 20.00\% | 20.00\% |
| 71 |  | 15.00\% | 20.00\% | 20.00\% |
| 72 |  | 15.00\% | 20.00\% | 20.00\% |
| 73 |  | 15.00\% | 20.00\% | 20.00\% |
| 74 |  | 15.00\% | 20.00\% | 20.00\% |
| 75+ |  | 100.00\% | 100.00\% | 100.00\% |

## Actuarial Valuation Assumptions (Continued)

## Assumed Service Credit:

## Form of Payment

 Election Assumption:Benefit Service:

Decrement Timing: Retirement is assumed to occur at the beginning of the year. All decrements are assumed to occur at the middle of the year.

Decrement Operation: Turnover decrements do not operate after the member reaches retirement eligibility (early or normal).

Eligibility Testing: Eligibility for benefits is determined based upon the age nearest birthday and service on the date the decrement is assumed to occur.

Pay Increase Timing: Beginning of (fiscal) year.

## Expenses:

Assumed administrative expenses were added to the Normal Cost and are based on the prior year's expenses, adjusted for inflation. The assumed amount added to the Normal Cost is:

|  |  |  | Law Enforcement |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Expenses | Main System | Judges | With Prior | Without | Total |  |  |
| Assumed FY 2017 | $\$ 2,568,029$ | $\$$ | 12,094 | $\$$ | 38,513 | $\$$ | 7,986 |
| $\$$ | $2,626,622$ |  |  |  |  |  |  |
| Actual FY 2017 | $2,550,631$ |  | 11,685 |  | 37,211 |  | 7,716 |
|  | $2,607,243$ |  |  |  |  |  |  |
| Assumed FY 2018 | $2,614,397$ | 11,977 | 38,141 | 7,909 | $2,672,424$ |  |  |

## Assumptions for Missing or Incomplete Data:

Pay was annualized for active members who have an entry date after the last valuation date of July 1, 2016. Pay was annualized by dividing the provided pay by the maximum of one month and calculated service (based on entry date). A minimum pay amount of $\$ 10,000$ was assumed for all members. Active members in the Main System with $\$ 0$ pay provided were assumed to have pay of $\$ 32,359$, the average of non-zero annualized salary of newly hired members.

## Changes in Actuarial Valuation Assumptions and Methods Since the Previous Valuation

The Board approved the following changes to the actuarial assumptions beginning with the July 1, 2017 actuarial valuation:

- The investment return assumption was lowered from 8.00 percent to 7.75 percent;
- The price inflation assumption was lowered from 3.50 percent to 2.50 percent;
- The payroll growth assumption used in calculating the amortization of the unfunded liability contribution for the actuarial contribution rate was lowered from 4.50 percent to 3.75 percent for Main System and Law Enforcement and from 4.00 percent to 3.25 percent for Judges;
- The asset valuation method was updated to smooth total investment gains or losses compared to the investment return assumption over a five-year period. Net deferred asset gains attributable to fiscal years 2016 and prior were fully recognized as of July 1, 2017.

All other actuarial assumptions and the actuarial cost method are unchanged from the last actuarial valuation as of July 1, 2016.

## Section F

## Benefit Provisions

## Benefit Provisions

This Section summarizes the major benefit provisions of the North Dakota Public Employees Retirement System as included in the actuarial valuation. It is not intended to be, nor should it be, interpreted as a complete statement of all plan provisions.

## 1. Normal Service Retirement:

> Eligibility:
Main System and Judges:
Attainment of age 65, or at any age with age plus service equal to at least 85 (Rule of 85).

For members enrolled after December 31, 2015, into the Main System, attainment of age 65 , or at age 60 with age plus service equal to at least 90 (Rule of 90).

Law Enforcement:
Attainment of age 55 and three consecutive years of service, or if not former National Guard, at any age with age plus service equal to at least 85 (Rule of 85). Former National Guard is eligible for Rule of 85 on August 1, 2015.
> Benefit:

Main System and Law Enforcement:
2.00\% of final average salary multiplied by service.

Judges:
$3.50 \%$ of final average salary for each of the first ten years of service, $2.80 \%$ for each of the next ten years of service and $1.25 \%$ for service in excess of twenty years.
2. Early Retirement:
> Eligibility:
Main System:
Attainment of age 55 with three years of service.
Judges:
Attainment of age 55 with five years of service.
Law Enforcement:
Attainment of age 50 with three years of service.

## > Benefit:

## Main System:

The Normal Service Retirement Benefit as determined in the preceding section. A benefit that begins before age 65 (or Rule of 85, if earlier) is reduced by one-half of one percent for each month before the earlier of age 65 or the age at which the Rule of 85 is met.

For members enrolled after December 31, 2015, into the Main System, a benefit that begins before age 65 (or Rule of 90 , if earlier) is reduced by $2 / 3 \%$ of one percent for each month before the earlier of age 65 or the age at which the Rule of 90 is met.

Judges:
The Normal Service Retirement Benefit as determined in the preceding section. A benefit that begins before age 65 (or Rule of 85 , if earlier) is reduced by one-half of one percent for each month before age 65 or the age at which the Rule of 85 is met.

Law Enforcement:
The Normal Service Retirement Benefit as determined in the preceding section. A benefit that begins before age 55 (or Rule of 85 , if earlier) is reduced by one-half of one percent for each month before age 55 or the age at which the Rule of 85 is met.
3. Disability Benefit:
(Eligibility:

Six months of service and inability to engage in any substantial gainful activity.
> Benefit:

Main System and Law Enforcement:
$25 \%$ of the member's final average salary at disability minus workers' compensation benefits, with a minimum of $\$ 100$ per month.

Judges:
$70 \%$ of the member's final average salary at disability minus Social Security and Workers' Compensation benefits paid.

## Benefit Provisions (Continued)

4. Deferred Vested Retirement:

- Eligibility:

Main System and Law Enforcement:
Three years of service.

Judges:
Five years of service.
> Benefit:

Main System and Judges:

The Normal Service Retirement Benefit payable at age 65 or the Rule of 85, if earlier. Reduced early retirement benefits can be elected upon attainment of age 55 .

Law Enforcement:
The Normal Service Retirement Benefit payable at age 55 or the Rule of 85, if earlier. Reduced early retirement benefit can be selected upon attainment of age 50 .
5. Pre-Retirement Death Benefits:
(a) Vested participants with a surviving spouse
> Eligibility:
Main System and Law Enforcement:

Three years of service.
Judges:

Five years of service.
> Benefit:

Main System and Law Enforcement:
One of the following options:

- Lump sum payment of member's accumulated contributions with interest.

## Benefit Provisions (Continued)

- $50 \%$ of the member's accrued benefit (not reduced on account of age) payable for the surviving spouse's lifetime.
- Continuation portion of $100 \%$ joint and survivor annuity (only if participant was eligible for normal retirement).
- A partial lump sum payment in addition to the one of the annuity options above.

Judges:
One of the following options:

- Lump sum payment of member's accumulated contributions with interest.
- $100 \%$ of the member's accrued benefit (not reduced on account of age) payable for the spouse's lifetime.
(b) Non-vested members or vested members without a surviving spouse
> Eligibility:
Main System, Judges and Law Enforcement:
Non-vested or no surviving spouse.
> Benefit:
Main System, Judges and Law Enforcement:
Lump sum payment of member's accumulated contributions with interest.

6. Refund of Member Contributions:

Paid to terminated non-vested members and terminated vested members who choose a refund of employee contributions in lieu of a monthly retirement benefit.

## Benefit Provisions (Continued)

7. Accumulated Member Contributions:

Member contributions accumulate with interest at the following rates:

Time Period
Through June 30, 1981
July 1, 1981, to June 30, 1986
After June 30, 1986

Per Annum Interest Rate
5.0\%
6.0\%
$0.5 \%$ less than the actuarial interest rate assumption
8. Standard and Optional Forms of Payment:

Standard form of payment:

## Main System and Law Enforcement:

Monthly benefit for life with a refund to beneficiary at death of the remaining balance (if any) of accumulated member contributions.

## Judges:

Monthly benefit for life, with $50 \%$ payable to an eligible survivor.

Optional forms of payment:
> Life annuity (for Judges).
$>50 \%$ joint and survivor annuity with pop-up (for Main System and Law Enforcement).
$>100 \%$ joint and survivor annuity with pop-up.
> Twenty-year certain and life annuity.
$>$ Ten-year certain and life annuity.
> Social Security level income annuity.
$\Rightarrow$ A partial lump sum payment in addition to one of the annuity options above.
> An actuarially equivalent graduated benefit option with either a one percent or two percent increase to be applied the first day of January of each year. Not available for disability or early retirements or in combination with a partial lump sum option, a deferred normal retirement option, or a Social Security level income annuity.
9. Final Average Salary:

Average of the highest salary received by the member for any 36 months employed during the last 180 months of employment.
10. Contributions:

Contribution rates specified in the Century Code (except employer rate for Law Enforcement); differ between permanent employees and temporary employees. Rates are as follows:

|  | Rates Set by Statute |  | Rates <br> Determined by the Board of Retirement |
| :---: | :---: | :---: | :---: |
|  | Member | Employer | Employer |
| Main System Permanent Employees | 7.00\% | 7.12\% |  |
| Main System Temporary Employees | 14.12\% | 0.00\% |  |
| Judges | 8.00\% | 17.52\% |  |
| Law Enforcement with prior Main System service | 5.50\% |  | 9.81\% |
| > BCI Employees | 6.00\% |  | 9.81\% |
| > National Guard members | 5.50\% |  | 9.81\% |
| Law Enforcement without prior Main System service | 5.50\% |  | 7.93\% |

Effective January 1, 2000:

A member's account balance includes vested employer contributions equal to the member's contributions to the deferred compensation Plan under chapter 54-52.2. The vested employer contribution may not exceed:

1. For months one through 12 of service credit, $\$ 25$ or $1 \%$ of the member's monthly salary, whichever is greater.
2. For months 13 through 24 of service credit, $\$ 25$ or $2 \%$ of the member's monthly salary, whichever is greater.
3. For months 25 through 36 of service credit, $\$ 25$ or $3 \%$ of the member's monthly salary, whichever is greater.
4. For service exceeding 36 months, $\$ 25$ or $4 \%$ of the member's monthly salary, whichever is greater.

## Benefit Provisions (Continued)

Vested employer contributions are credited monthly to the member's account balance.
11. Rollovers:

The fund may accept rollovers from other qualified plans under rules adopted by the Board for the purchase of additional service credit.

## Changes in Plan Provisions Since the Previous Actuarial Valuation

There have been no changes in plan provisions since the previous valuation as of July 1, 2016.

## Section G

Calculation of the Single Discount Rate

GASB Statement No. 67 includes a specific requirement for the discount rate that is used for the purpose of the measurement of the Total Pension Liability. This rate considers the ability of the System to meet benefit obligations in the future. To make this determination, employer contributions, employee contributions, benefit payments, expenses and investment returns are projected into the future. The current employer and employee fixed rate contributions are assumed to be made in each future year. The Plan Net Position (assets) in future years can then be determined and compared to its obligation to make benefit payments in those years. As long as assets are projected to be on hand in a future year, the assumed valuation discount rate is used. In years where assets are not projected to be sufficient to meet benefit payments, the use of a municipal bond rate is required, as described in the following paragraph.

The Single Discount Rate (SDR) is equivalent to applying these two rates to the benefits that are projected to be paid during the different time periods. The SDR reflects (1) the long-term expected rate of return on pension plan investments (during the period in which the fiduciary net position is projected to be sufficient to pay benefits) and (2) a tax-exempt municipal bond rate based on an index of 20-year general obligation bonds with an average AA credit rating as of the measurement date (to the extent that the contributions for use with the long-term expected rate of return are not met).

For the purpose of this valuation, the expected rate of return on pension plan investments is $7.75 \%$; the municipal bond rate is $3.56 \%$; and the resulting Single Discount Rate is $6.44 \%$.

The tables in this section provide detailed information on the development of the Single Discount Rate.
The Projection of Contributions table shows the development of expected contributions in future years. Normal Cost contributions for future hires are not included (nor are their liabilities).

The Projection of Plan Fiduciary Net Position table shows the development of expected asset levels in future years.

The Present Values of Projected Benefit Payments table shows the development of the Single Discount Rate (SDR). It breaks down the benefit payments into present values for funded and unfunded portions and shows the equivalent total at the SDR.

As shown on Page G-7, the sum of the present value of (1) the funded portion of projected benefit payments using the expected $7.75 \%$ rate of return on assets plus (2) the present value of the unfunded projected benefit payments using a tax-exempt municipal bond rate of $3.56 \%$ is equal to the present value of all projected benefit payments using a single equivalent discount rate of $6.44 \%$.

Projection of Plan Net Position and Benefit Payments

## Section H

 Glossary of Terms
## Glossary of Terms

Actuarial Accrued Liability (AAL). The difference between (i) the actuarial present value of future plan benefits, and (ii) the actuarial present value of future normal cost. Sometimes referred to as "accrued liability" or "past service liability."

Actuarial Assumptions. Estimates of future plan experience such as investment return, expected lifetimes and the likelihood of receiving a pension from the Pension Plan. Demographic, or "people" assumptions, include rates of mortality, retirement and separation. Economic, or "money" assumptions, include expected investment return, inflation and salary increases.

Actuarial Cost Method. A mathematical budgeting procedure for allocating the dollar amount of the "actuarial present value of future plan benefits" between the actuarial present value of future normal cost and the actuarial accrued liability. Sometimes referred to as the "actuarial funding method."

Actuarial Present Value of Future Plan Benefits. The amount of funds presently required to provide a payment or series of payments in the future. It is determined by discounting the future payments at a predetermined rate of interest, taking into account the probability of payment.

Actuarial Value of Assets (AVA). Smoothed value of assets that recognizes the difference between the expected investment return using the valuation assumption of 7.50 percent and the actual investment return over a five-year period. Dampens volatility of asset value over time.

Amortization. Paying off an interest-bearing liability by means of periodic payments of interest and principal, as opposed to paying it off with a lump sum payment.

Annual Required Contribution. The sum of the normal cost and amortization of the unfunded actuarial accrued liability.

Asset Return. The net investment return for the asset divided by the mean asset value. Example: if $\$ 1.00$ is invested and yields $\$ 1.08$ after a year, the asset return is 8.00 percent.

Funded Ratio. The actuarial value of assets divided by the actuarial accrued liability. Measures the portion of the actuarial accrued liability that is currently funded.

Market Value of Assets (MVA). The value of assets currently held in the trust available to pay for benefits of the Pension Plan. Each of the investments in the trust is valued at market price which is the price at which buyers and sellers trade similar items in the open market.

Normal Cost (NC). The annual cost assigned, under the actuarial funding method, to current and subsequent plan years. Sometimes referred to as "current service cost." Any payment toward the unfunded actuarial accrued liability is not part of the normal cost.

Unfunded Actuarial Accrued Liability (UAAL). The difference between the actuarial accrued liability and valuation assets. Sometimes referred to as "unfunded accrued liability."

[^0]:    Values prior to July 1, 2016, were calculated by the prior actuary.

[^1]:    * Includes Rule of 85 , Rule of 88 and Rule of 90.
    ** Includes alternate payees.
    *** Total excluding beneficiaries.

[^2]:    * Includes Rule of 85 , Rule of 88 and Rule of 90.
    ** Includes alternate payees.
    *** Total excluding beneficiaries.

[^3]:    ${ }^{1}$ The actuarially determined contribution was based on an investment return assumption of $8.00 \%$ and a payroll growth assumption of $4.50 \%$ ( $4.00 \%$ for Judges) for fiscal years ending 2014 through 2017.
    ${ }^{2}$ Prior to the valuation as of July 1, 2016, annual payroll is based on projected annual compensation for the upcoming year. Beginning with the valuation as of July 1, 2016, annual payroll and average annual pay are based on annualized payroll as of the valuation date.
