Board of Trustees
Public Employees' Retirement System
of New Jersey
Trenton, New Jersey

Members of the Board:

The report that follows summarizes the results of the sixtieth annual valuation of the assets and liabilities of the Public Employees' Retirement System of New Jersey. The valuation represents the ninety-third annual valuation of retirement benefits provided by the State and other public employers in New Jersey if the valuations made under the provisions of the State Employees' Retirement System of New Jersey, which was superseded by the present System, are included. The valuation provides information concerning the financial condition of the System as of July 1, 2014 and sets forth the basis for determining the appropriation payable by the employers for the State fiscal year beginning July 1, 2015.

The valuation reflects Chapter 78, P.L. 2011, which increased the member contribution rate from 5.5% to 6.5% of compensation effective October 2011. Further, beginning July 2012, the member contribution rate will increase by 1/7th of 1% each July until a 7.5% member contribution rate is reached in July 2018. Chapter 78, P.L. 2011 also increased the member contribution rate for members who are eligible to retire under the Prosecutors Part of the Retirement System as provided by Chapter 366, P.L. 2001 from 8.5% to 10.0% of compensation with the increase effective October 2011.

As required under Chapter 84, P.L. 1954, experience studies are performed once in every three year period. The valuation was prepared on the basis of the demographic assumptions recommended on the basis of the July 1, 2008 – June 30, 2011 Experience Study and approved by the Board of Trustees at the September 19, 2012 Board meeting. These assumptions will be reviewed in a June 30, 2014 experience study and will remain in effect for valuation purposes until such time as the Board of Trustees adopts revised assumptions.

The valuation reflects the economic assumptions recommended by the Treasurer, which include a rate of investment return of 7.90% per annum and assumed future salary increases, based on the most recent economic study, reduced by 2.00% per annum for fiscal years through 2021 and 1.00% per annum for fiscal years ending 2022 and thereafter. These assumptions will remain in effect for valuation purposes until such time the Board of Trustees or the Treasurer recommends revised economic assumptions.

In my opinion, the actuarial assumptions used are appropriate for purposes of the valuation and are reasonably related to the experience of the System and to reasonable long-term expectations. These assumptions were selected in accordance with applicable Actuarial Standards of Practice published by the Actuarial Standards Board.

The valuation reflects the reduction in the fiscal year 2014 recommended State Pension contribution of \$993,064,820 to \$141,154,573. In addition, the valuation also reflects a reduction in the fiscal year 2015 State Pension contribution from \$1,058,157,699 to \$138,151,208.

The State of New Jersey's Division of Pensions and Benefits reported the individual data for members of the Public Employees' Retirement System of New Jersey as of the valuation date for use in the preparation of this report. While we did not verify the data at their source, we did perform tests for internal consistency and reasonableness. The amount of assets in the trust fund taken into account in the valuation was based on statements prepared for us by the Division of Pensions and Benefits. The accuracy of the results presented in this report is dependent on the accuracy of the data.

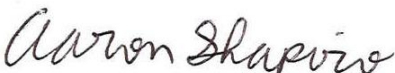

Future actuarial measurements may differ significantly from current measurements due to plan experience differing from that anticipated by the economic and demographic assumptions, increases or decreases expected as part of the natural operation of the methodology used for these measurements, and changes in plan provisions or applicable law. An analysis of the potential range of future results is beyond the scope of this valuation.

Use of this report for any other purpose or by anyone other than the the Board of Trustees or staff of the State of New Jersey's Division of Pensions and Benefits may not be appropriate and may result in mistaken conclusions because of failure to understand applicable assumptions, methods, or inapplicability of the report for that purpose. No one may make any representations or warranties based on any statements or conclusions contained in this report without Buck Consultants' prior written consent.

I am a Fellow of the Society of Actuaries and a Member of the American Academy of Actuaries. I meet the Qualification Standards of the Academy to render the actuarial opinions contained herein. This report has been prepared in accordance with all applicable Actuarial Standards of Practice, and I am available to answer questions concerning it.

Section I—Summary of Key Results

The Public Employees' Retirement System of New Jersey, which began operation January 2, 1955, was established under Chapter 84 of the Laws of 1954. It supersedes the State Employees' Retirement System of New Jersey, which began operating as of January 1, 1922. - The recommended contribution could be subject to reduction in accordance with the provisions of the Appropriation Act for fiscal year 2015.
- Does not reflect the provisions of Chapter 1, P.L. 2010

The major benefit and contribution provisions of the statute as reflected in the valuation are summarized in Appendix A. The valuation reflects the following:

- The final Appropriation Act of fiscal year 2014, which reduced the recommended State Pension contribution of \$993,064,820 to \$141,154,573. This amount excludes the Workers Compensation Judges Part contribution of \$674,009, which is payable by fund transfer from the Second Injury Fund and the Non-Contributory Group Insurance Premium of \$29,291,923. Accordingly, a fiscal year 2014 employer contribution of \$141,828,582 (\$141,154,573 plus the Workers Compensation Judges Part transfer of \$674,009) was recognized for purposes of this valuation.
- The preliminary Appropriation Act of fiscal year 2015, which allows the State Treasurer to reduce the recommended State normal and accrued liability contribution for fiscal year 2015 from \$1,058,157,699 to \$138,151,208. This amount excludes the Workers Compensation Judges Part contribution of \$679,374 which is payable by fund transfer from the Second Injury Fund and the Non-Contributory Group Insurance Premium of \$34,999,000. Accordingly, a fiscal year 2015 receivable employer contribution of \$138,830,582 (\$138,151,208 plus Workers Compensation Judges Part transfers of \$679,374) were recognized for purposes of this valuation. The fiscal year 2015 pension contribution amount may be subject to change per the requirements of the final Appropriation Act for 2015.
- Chapter 19, P.L. 2009, which provides that the State Treasurer will reduce the normal and accrued liability contributions for Local employers to 50 percent of the amount certified for the State fiscal year 2009. The resulting additional unfunded liability will be paid by Local employers in level annual payments over a period of 15 years, with the first payment due in the fiscal year ending June 30, 2012. The additional unfunded liability will be adjusted annually by the rate of return on the actuarial value of assets. The legislation also provides that a Local employer may opt to pay 100 percent of the recommended contribution for fiscal year 2009. Employers making this election will be credited with the full payment. In addition, certain Local employers who were eligible to defer 50% of their fiscal year 2009 pension contributions but instead paid 100% of the fiscal year 2009 pension contributions are permitted to elect to defer 50% of the recommended 2010 fiscal year pension contributions. The resulting additional unfunded liability will be paid by Local employers in level annual payments over a period of 15 years, with the first payment due in the fiscal year ending June 30, 2012. The additional unfunded liability will be adjusted annually by the rate of return on the actuarial value of assets. The legislation also provides that a Local employer may opt to pay 100 percent of the recommended contribution for fiscal year 2010. Employers making this election will be credited with the full payment.
- The unauthorized early retirement incentive programs offered by certain Local employers, which were first recognized during the July 1, 2011 valuation. The additional liability incurred by the System due to these programs is included as a receivable contribution.
- Chapter 42, P.L. 2002, which allowed Local employers to issue refunding bonds to retire the unfunded accrued liability of the Local employer owed to the System as a consequence of granting enhanced early retirement benefits to employees of the Local employer. Refunding bonds may be issued to retire the pension liabilities for a Local employer's participation in various early retirement incentive programs.
- Chapter 78, P.L. 2011, which increased the member contribution rate from 5.5% to 6.5% of compensation effective October 2011. Further, beginning July 2012, the member contribution rate will increase by 1/7th of 1% each July until a 7.5% member contribution rate is reached in July 2018. Chapter 78, P.L. 2011 also increased the member contribution rate for members who are eligible to retire under the Prosecutors Part of the Retirement System as provided by Chapter 366, P.L. 2001 from 8.5% to 10.0% of compensation with the increase effective October 2011. Effective with the July 1, 2012 actuarial valuation, the determination of the State and Local employers' normal cost contributions have been revised to reflect the use of all member contributions as an offset to the gross normal cost. This was the methodology used to determine the State and Local employers' normal cost contribution prior to the enactment of Chapter 78, P.L. 2011 and is consistent with the

methodology typically used by contributory public-sector retirement systems to calculate the employer's normal cost contribution.

There were no other changes to the benefit and contribution provisions since the previous valuation.

As required under Chapter 84, P.L. 1954, experience studies are performed once in every three-year period. The valuation was prepared using demographic assumptions recommended on the basis of the July 1, 2008 – June 30, 2011 Experience Study and approved by the Board of Trustees at the September 19, 2012 Board meeting. These assumptions will remain in effect for valuation purposes until such time as the Board adopts revised demographic assumptions.

The valuation reflects future increases in the compensation limits imposed on certain member tiers. For Class B members the compensation limit for 2014 is \$260,000 and is assumed to increase by 3% annually. The compensation limit for Classes D, E, F, and G for 2014 is \$117,000 and is assumed to increase by 4% annually.

Lastly, the employer receivable contribution included in the Market Value of Assets (MVA) and the Actuarial Value of Assets (AVA) has been discounted at the valuation rate of 7.9% from the expected payable date of June 30, 2015 to the valuation date for the State's MVA and AVA, and from the expected payable date of April 1, 2015 to the valuation date for the Local's MVA and AVA.

There were no other changes to the actuarial assumptions and methods from those used in the prior valuation. The actuarial assumptions and methods used in this valuation are summarized in Appendix B.

The combination of the plan provisions, actuarial assumptions and member and beneficiary data is used to generate the overall required level of employer contributions. These contributions are composed of two separate portions, an "accrued liability contribution" and a "normal contribution". The contributions payable are discussed in detail in Section V.

The valuation also generates a balance sheet, which summarizes in some detail the total present and prospective assets and liabilities of the System. Table III of Section VI presents the detailed balance sheet as of July 1, 2014. The remainder of Section VI of this report analyzes the balance sheet. A summary comparison of the balance sheets as of July 1, 2014 and July 1, 2013 is set forth in the following table, ("Table 1").

Section II—Employee Data

The data employed for the valuations were furnished to the actuaries by the Division of Pensions and Benefits. While the actuaries did not verify the data at their source, they did perform tests for internal consistency and reasonableness. The accuracy of the results presented in this report is dependent on the accuracy of the data. Table IV of Section X summarizes the membership as of June 30, 2014 by various categories. Section IV—Comments Concerning the Valuation

The variation in liabilities and contributions reflects the System’s actual experience during the year. The increase in the unfunded accrued liability is primarily the result of liability losses, revision of the 2014 State appropriations and the investment return slightly below expected levels (approximately 7.60% on an actuarial value of asset basis, rather than the 7.90% expected).

State

The following table outlines the effect of the various items of actuarial experience on the increase in the actual contribution rate (normal contribution plus accrued liability contribution as presented on page 30) for basic allowances from 22.99% to 25.77%.

Investment Loss	+0.17%
Loss on account of new members	-0.04%

The number of active contributing members decreased by about 1.9% between valuations and compensation used for contribution purposes decreased by about 0.3%.

The number of pensioners and beneficiaries receiving benefits and the amount of benefits payable increased between the two valuations. The average benefit payable increased from about \$2,074 per month to about \$2,100 per month. The increase reflects the higher benefits payable to new retirees and the deaths of older pensioners with lower benefits. Cost of living increases after retirement are reflected in both amounts.

Local Employers

The following table outlines the effect of the various items of actuarial experience on the increase in the actual contribution rate (normal contribution plus accrued liability contribution as presented on page 30) for basic allowances from 11.16% to 11.83%.

Investment Loss	+0.16%
Gain on account of new members	-0.03%
Pay increases greater than expected	+0.05%

Other experience	+0.43%
Total	+0.67%

The number of active contributing members decreased by about 2.6% between valuations while compensation used for contribution purposes increased by about 0.1%.

Total number of pensioners and beneficiaries receiving benefits and the amount of benefits payable increased between the two valuations. The average benefit payable also increased from about \$1,338 per month to about \$1,370 per month. The increase reflects the higher benefits payable to new retirees and the deaths of older pensioners with smaller benefits. Cost-of-living increases after retirement are reflected in both amounts.

Funded Ratios

The following table presents the System's funded ratios based on the actuarial value of assets (including receivables) and market value basis (including receivables).

¹ Statutory funded ratio.

There is a difference on a market value basis since the actuarial value smoothes the investment gains and losses over time.

A. State

The State's statutory funded ratio is 48.1% and 43.8% as of June 30, 2013 and June 30, 2014, respectively. For purposes of Chapter 78, P.L. 2011, the "target funded ratio" is 77.142% and 77.856% for June 30, 2013 and June 30, 2014, respectively. Therefore, the State's statutory funded ratio did not reach the "target funded ratio" for June 30, 2013 and remained below the "target funded ratio" for June 30, 2014.

Since July 1, 2000, the funded ratio on a market value basis has decreased by 87.9%. This decrease is primarily due to investment losses experienced over the period, State contributions less than the GASB Annual Required Contribution, the increase in benefits due to Chapter 133, P.L. 2001 and Chapter 353, P.L. 2001, early retirement incentive programs under Chapter 23 P.L. 2002 and Chapter 21, P.L. 2008, and the strengthening of actuarial assumptions.

As of June 30, 2014, the market value of assets is less than the actuarial liability attributable to retirees. Furthermore, if the assets contained in the Annuity Savings Fund (ASF) of \$5,217,157,819 are excluded, the ratio of the remaining market value of assets to the actuarial accrued liability for retirees is 30.0%.

As of June 30, 2014, the ratio of market value of assets to the prior year's benefit payment is 6.5. This is an approximate indication of the number of years that the assets can cover benefit payments, excluding future State and member contributions, and investment income. This ratio decreased by 3.0% from the previous year's ratio of 6.7. If ASF assets are excluded, since they represent accumulated contributions from active and inactive members, the ratio is 2.6.

B. Local Employers

The Local employers' statutory funded ratio is 74.0% and 73.5% as of June 30, 2013 and June 30, 2014, respectively. For purposes of Chapter 78, P.L. 2011, the "target funded ratio" is 77.142% and 77.856% for June 30, 2013 and June 30, 2014, respectively. Therefore, the Local employers' statutory funded ratio fell short of the "target funded ratio" for June 30, 2013 and for June 30, 2014.

Since July 1, 2000, the funded ratio on a market value basis has decreased by 66.6%. This decrease is primarily due to investment losses experienced over the period, Local employer contributions less than the GASB Annual Required Contribution, the increase in benefits due to Chapter 133, P.L. 2001 and Chapter 353, P.L. 2001, and the strengthening of actuarial assumptions.

As of June 30, 2014, the market value of assets is greater than the actuarial liability attributable to retirees. However, if the assets contained in the Annuity Savings Fund (ASF) of \$7,690,589,973 are excluded, the ratio of the remaining market value of assets to the actuarial accrued liability for retirees is 80.9%.

As of June 30, 2014, the ratio of market value of assets to the prior year's benefit payment is 11.8. This is an approximate indication of the number of years that the assets can cover benefit payments, excluding future State and member contributions, and investment income. This ratio increased by 6.3% from the previous year's ratio of 11.1. If ASF assets are excluded, since they represent accumulated contributions from active and inactive members, the ratio is 7.3.

C. Schedule of Assets and Liabilities

The following presents ten-year schedules of the assets, liabilities, and funded ratio. The assets and funded ratios are provided on a market value (including receivables) basis and actuarial value of assets (including receivables) basis.

Section V— Contributions Payable by the State and Local Employers

Employers' contributions to the System consist of two components, a normal contribution and an accrued liability contribution (if applicable). The normal contribution for basic allowances and COLA is defined under the Projected Unit Credit funding method as the present value of the benefits accruing during the current year. The unfunded accrued liability (surplus) for basic allowances and COLA is determined as the difference between the accrued liability and the actuarial value of assets on hand. Chapter 78, P.L. 2011 defines the methodology used to amortize the unfunded accrued liability. Beginning with the July 1, 2010 actuarial valuation, the accrued liability contribution shall be computed so that if the contribution is paid annually in level dollars, it will amortize the unfunded accrued liability over an open 30 year period. Beginning with the July 1, 2019 actuarial valuation, the accrued liability contribution shall be computed so that if the contribution is paid annually in level dollars it will amortize the unfunded accrued liability over a closed 30 year period (i.e., in each subsequent actuarial valuation, the amortization period shall decrease by one year). Beginning with the July 1, 2029 actuarial valuation when the remaining amortization period reaches 20 years, any increase or decrease in the unfunded accrued liability as a result of actuarial losses or gains for subsequent valuation years shall serve to increase or decrease, respectively, the amortization period for the unfunded accrued liability, unless an increase in the amortization period will cause it to exceed 20 years. If an increase in the amortization period as a result of actuarial losses for a valuation year would exceed 20 years, the accrued liability contribution shall be computed for the valuation year using a 20 year amortization period.

On the basis of the contribution rates applicable to State employees and the current year's payroll, the contributions for the fiscal year beginning July 1, 2015 payable by the State and the agencies, which pay the same contribution rates as the State, are shown in Table II.

Based on Table II, the total contribution payable, by the State to the Contingent Reserve Fund is \$1,182,717,104 for the year beginning July 1, 2015. This figure includes (a) the additional cost due to Chapter 259, P.L. 2001 of \$673,848 payable by fund transfers from the Second Injury Fund, (b) in accordance with the provision of Chapter 366, P.L. 2001, an additional contribution of \$9,078,321 payable by the State on behalf of Local employers with members enrolled under the Prosecutors' Part provisions of the System, and (c) the State Chapter 366 contribution of \$2,069,018. In addition, the total contribution payable by the State to the Non-Contributory Group Insurance Premium Fund is \$34,616,000.

¹ Required contribution reflects an offset of 10.00% prosecutor member contribution rate as provided by Chapter 366, P.L. 2001. The above represent residual amounts from additional cost to State (\$2,069,018) and Local employers (\$9,078,321) due to this legislation.

² Required contribution amounts are payable by funds to be transferred from the Second Injury Fund to the System in accordance with Chapter 259, P.L. 2001.

³ Appendix G presents a summary of the fiscal year July 1, 2015 cost allocation for the State Colleges.

The certifications of the appropriations required of the Local employers are submitted separately. They were based upon a payroll of \$6,898,049,131 for 156,101 active members. The total appropriations by Local employers, including ERI contributions, are shown below.

¹ The additional normal contribution attributable to Chapter 133, P.L. 2001 is covered by assets available in the Benefit Enhancement Fund. The additional normal cost attributable to Chapter 366, P.L. 2001 is first offset by the additional prosecutor member contribution (to a total member contribution of 10.00%) and the residual amount of \$1,076,775 is payable by the State.

² The additional required accrued liability contribution of \$8,001,546 due to Chapter 366, P.L. 2001 is payable by the State.

Section VI – Valuation Balance Sheet

The valuation balance sheet showing the assets and liabilities of the System as of July 1, 2014 is presented on the following Table III. The amounts of the present assets credited to the various funds were furnished by the Division of Pensions and Benefits, State of New Jersey.

This valuation was prepared using assumptions chosen on the basis of the experience study for the period July 1, 2008, through June 30, 2011. In determining the liabilities of the Contingent Reserve Funds, Retirement Reserve Fund and Benefit Enhancement Fund, an interest rate of 7.90% was used.

*The present value of ERI benefits for the State, including the additional accrued liability attributable to Chapter 23, P.L. 2002 of \$1,200,329,260 and Chapter 21, P.L. 2008 of \$268,465,665 are reflected in the present value of benefits payable from the Retirement Reserve Fund.

The valuation balance sheet indicates the following facts regarding the various funds.

1. Retirement Reserve Fund

When a member retires, or when he dies and an allowance is payable to his beneficiary, the allowance including cost of living adjustments is paid from this fund. The member's own contributions with interest are transferred from the Annuity Savings Fund and the balance of the reserve on the total allowance is transferred from the Contingent Reserve Fund. On the valuation date, the Retirement Reserve Fund has present assets of \$ 26,212,975,766. The liabilities of the fund amount to \$ 27,381,124,645 so that there is a deficit of \$ 1,168,148,879 in the fund on the valuation date. It is recommended that the fund be put in balance as of June 30, 2014 by a transfer of assets from the Contingent Reserve Fund equal to \$1,168,148,879 and this transfer is shown in the balance sheet.

2. Annuity Savings Fund and Contingent Reserve Fund

The Annuity Savings Fund, which is the fund to which members' contributions with interest are credited, has assets amounting to \$12,907,747,792 as of June 30, 2014. The Contingent Reserve Fund is the fund to which contributions made by employers to provide the benefits paid from retirement system monies are credited. The assets creditable to the Contingent Reserve Fund amount to \$(10,599,141,664) as of June 30, 2014 after adjustments are made on account of the amounts transferable to the Retirement Reserve Fund and from the Benefit Enhancement Fund.

If a member withdraws from active service before qualifying for retirement, the amount of his accumulated deductions is paid to him from the Annuity Savings Fund. If he dies before retirement and no survivorship benefit is payable, his accumulated deductions are paid to his beneficiary from the Annuity Savings Fund. If he retires, or if he dies leaving a beneficiary eligible for a survivorship benefit, his accumulated deductions are transferred from the Annuity Savings Fund to the Retirement Reserve Fund, and the reserve on the allowance, which is not provided by his own deductions is transferred from the Contingent Reserve Fund to the Retirement Reserve Fund. Any lump sum benefit payable upon the death of a member before or after retirement is paid by The Prudential Insurance Company of America.

3. Benefit Enhancement Fund

Chapter 133, P.L. 2001 established the Benefit Enhancement Fund to fund the additional annual normal contribution for the increase in benefits under this law. The Benefit Enhancement Fund is funded by excess valuation assets transferable from the Contingent Reserve Fund. The amount of excess valuation assets transferable to the fund is limited to the amount of member contributions for the fiscal year in which the additional normal contributions are payable. The fund balance is limited to the present value of expected additional normal contributions for the increased benefits over the expected working lives of the active members for the valuation period. No additional excess valuation assets will be transferred to the fund after the maximum amount is attained. The Appropriation Acts of 2003, 2005 and 2006 further expanded the use of the Benefit Enhancement Fund by allowing residual required State contributions to be covered by assets available from this fund. On the valuation date, the Benefit Enhancement Fund has present assets of \$205,169,021 after adjustment for assets transferred to the Contingent Reserve Fund to cover the additional normal contributions for the increased benefits of \$46,175,141.

The June 30, 2014 valuation balance sheet shows on the liabilities side that the prospective benefits for which reserves are being accumulated in the Annuity Savings Fund and the Contingent Reserve Fund have a present value of \$21,716,643,493. To meet the benefit payments, the System has present assets of \$2,308,606,128, consisting of \$12,907,747,792 in the Annuity Savings Fund and \$(10,599,141,664) in the Contingent Reserve Fund. If this amount is subtracted from the sum of \$21,716,643,493, the present value of prospective benefits, there exists a deficit of \$19,408,037,365. When the assets in the Special Reserve Fund amounting to \$0 are applied to this amount, the deficit remains at \$19,408,037,365. In addition, in accordance with Chapter 133, P.L. 2001, \$205,169,021 has been accumulated in the Benefit Enhancement Fund to fund the

additional annual employer normal contributions attributable to this legislation. Adding this amount to the deficit of \$19,408,037,365 yields a net deficit of \$19,202,868,344.

In accordance with the provisions of Chapter 385, P.L. 1987, Chapter 41, P.L. 1992 and Chapter 62, P.L. 1994, the contributions of the employers to the Contingent Reserve Fund consist of two components, a normal contribution and an accrued liability contribution. The normal contribution is the present value of the benefits accruing during the current year. In accordance with Chapter 78, P.L. 2011, beginning with the July 1, 2010 actuarial valuation, the accrued liability contribution shall be computed so that if the contribution is paid annually in level installments, it will amortize the unfunded liability over an open 30 year period.

On these bases, the following future contribution rates, prior to any adjustments, are required to meet the employers' obligations:

Item	Rate ¹

¹ Rates exclude contributions required under Chapter 366, P.L. 2001 and Chapter 259, P.L. 2001.

*Actual contribution will depend on the payment schedule chosen by each location.

**Rate varies by location.

Chapter 133, P.L. 2001 provided for the establishment of the Benefit Enhancement Fund, from which any additional normal cost due to the increase in benefits under this legislation is paid. If assets in this fund are insufficient to cover the additional normal contribution for the increased benefits for a valuation period, the State will pay the amount of the additional normal contribution not covered by the fund for both the State and Local employers.

Section VII—Experience

Records are maintained with regard to developing mortality, service and compensation experience of members and beneficiaries of the System as compared to the anticipated experience based on the current assumptions that were developed on the basis of the three-year experience investigation for the period ended June 30, 2011. In accordance with the provisions of Section 19 of Chapter 84 of the Laws of 1954, as amended and supplemented, once in every three-year period significant deviations are noted and revised assumptions are recommended so that the funding requirements of the System can be properly anticipated.

3. Contributions

By Members

Members enrolling in the retirement system on or after July 1, 1994 will contribute 5% of compensation. Members enrolled prior to July 1, 1994 will contribute 5% of compensation to the retirement system effective July 1, 1995 unless they previously had contributed less than 6% in which case they will contribute 4% of compensation beginning July 1, 1995 and 5% of compensation beginning July 1, 1996. Chapter 103, P.L. 2007 increases the contribution rate to 5.5% of compensation effective, generally, July 1, 2007 for State employees and July 1, 2008 for Local employees. Chapter 78, P.L. 2011 increases the contribution rate from 5.5% to 6.5% of compensation with the increase effective October 2011. Further, beginning July 2012, the member contribution rate will increase by 1/7th of 1% each July until a 7.5% member contribution rate is reached in July 2018.

A 7.50% member contribution rate for members who are eligible to retire under the Prosecutors Part of the Retirement System as provided by Chapter 366, P.L. 2001 was used prior to July 1, 2008. Effective July 1, 2008 the member contribution rate was increased to 8.50%. Chapter 78, P.L. 2011 increases the contribution rate from 8.5% to 10.0% of compensation with the increase effective October 2011.

By Employers

Normal Contribution

The State and Local employers pay annually a normal contribution to the retirement System. This contribution is determined each year on the basis of the annual valuation and represents the value of the benefits to be earned in the year following the valuation date. The normal contributions for active members' COLA are being phased in. Chapter 78, P.L. 2011 suspended future COLAs for current and future retirees and beneficiaries until reactivated as permitted by law.

In accordance with the provisions of Chapter 79, P.L. 1960, the monies appropriated for payment of the non-contributory life insurance coverage shall be held separate from the retirement System monies.

In accordance with the provisions of Chapter 133, P.L. 2001, the Benefit Enhancement Fund (BEF) was established to fund the additional annual employer normal contribution due to the law's increased benefits. (Chapter 353, P.L. 2001 extended this coverage to this law's additional annual employer normal contribution.) If the assets in the BEF are insufficient to cover the normal contribution for the increased benefits for a valuation period, the State will pay such amount for both the State and local employers.

In accordance with the provisions of Chapter 259, P.L. 2001, the additional normal contributions for increased benefits to judges of compensation for a valuation period will be funded by transfers from the Second Injury Fund.

Chapter 19, P.L. 2009 provides that the State Treasurer will reduce for Local employers the normal contribution to 50% of the amount certified for fiscal year 2009. This unfunded liability will be paid by the Local employers in level annual payments over a period of 15 years with the first payment due in the fiscal year ending June 30, 2012. The unfunded liability will be adjusted by the rate of return on the actuarial value of assets. The legislation also provides that a Local employer may pay 100% of the recommended contribution for fiscal year 2009. Local employers who were eligible but did not elect to take advantage of Chapter 19, P.L. 2009 were permitted to elect to defer 50% of the 2010 fiscal year required contribution with the first payment due in the fiscal year ending June 30, 2012.

Accrued Liability Contributions

The State and Local employers pay contributions to cover any unfunded accrued liability. An unfunded accrued liability was established for active life COLAs. The amortization periods for funding these liabilities were set initially at 40 years. Experience gains or losses for the 10 valuation years following the March 31, 1992 valuation will increase or decrease the unfunded accrued liability. Thereafter, actuarial gains or losses will increase or decrease the amortization period unless an increase will cause it to exceed 30 years. Chapter 78, P.L. 2011 suspended future COLAs for current and future retirees and beneficiaries until reactivated as permitted by law and changed the methodology used to amortize the unfunded accrued liability. Beginning with the July 1, 2010 actuarial valuation, the accrued liability contribution shall be computed so that if the contribution is paid annually in level dollars, it will amortize the unfunded accrued liability over an open 30 year period. Beginning with the July 1, 2019 actuarial valuation, the accrued liability contribution shall be computed so that if the contribution is paid annually in level dollars it will amortize the unfunded accrued liability over a closed 30 year period (i.e., for each subsequent actuarial valuation, the amortization period shall decrease by one year). Beginning with the July 1, 2029 actuarial valuation when the remaining amortization period reaches 20 years, any increase or decrease in the unfunded accrued liability as a result of actuarial losses or gains for subsequent valuation years shall serve to increase or decrease, respectively, the amortization period for the unfunded accrued liability, unless an increase in the amortization period will cause it to exceed 20 years. If an increase in the amortization period as a result of actuarial losses for a valuation year would exceed 20 years, the accrued liability contribution shall be computed for the valuation year using a 20 year amortization period.

Chapter 366, P.L. 2001 requires the State be liable for any increase in pension costs to a county that results from the enrollment of prosecutors in the Prosecutors Part. Any increase in the unfunded accrued liability in the Retirement System arising from the benefits established for the Prosecutors Part are to be amortized over a period of 30 years in the manner provided for other such liability in the Retirement System.

In accordance with the provisions of Chapter 259, P.L. 2001, the additional accrued liability contribution for increased benefits to judges of compensation for a valuation period will be funded by transfers from the Second Injury Fund.

Chapter 19, P.L. 2009 provides that the State Treasurer will reduce for Local employers the accrued liability contribution to 50% of the amount certified for fiscal year 2009. This unfunded liability will be paid by the Local employers in level annual payments over a period of 15 years with the first payment due in the fiscal year ending June 30, 2012. The unfunded liability will be adjusted by the rate of return on the actuarial value of assets. The legislation also provides that a Local employer may pay 100% of the recommended contribution for fiscal year 2009. Local employers who were eligible but did not elect to defer 50% of the 2009 fiscal year contribution were permitted to elect to defer 50% of the 2010 fiscal year contribution with the first payment due in the fiscal year ending June 30, 2012.

Deaths After Retirement

The RP-2000 Combined Healthy Male and Female Mortality Tables (set back 1 year for males and females) for service retirement and beneficiaries of former members. The RP-2000 Disabled Mortality Tables (set back 3 years for males and set back 1 year for females) are used to value disabled retirees. In addition, the tables for service retirement and beneficiaries of former members provide for future improvements in mortality from the base year of 2012 using a generational approach based on Projection Scale AA. Illustrative rates of mortality unadjusted for Projection Scale AA are shown below:

Marriage

Husbands are assumed to be 3 years older than wives. Among the active population, 100% of participants are assumed married.

Valuation Method

Projected Unit Credit Method. This method essentially funds the System's benefits accrued to the valuation date. Experience gains or losses are recognized in future accrued liability contributions. In accordance with Chapter 78, P.L. 2011, beginning with the July 1, 2010 actuarial valuation, the accrued liability contribution shall be computed so that if the contribution is paid annually in level dollars, it will amortize the unfunded accrued liability over an open 30 year period. Beginning with the July 1, 2019 actuarial valuation, the accrued liability contribution shall be computed so that if the contribution is paid annually in level dollars it will amortize the unfunded accrued liability over a closed 30 year period (i.e., for each subsequent actuarial valuation, the amortization period shall decrease by one year). Beginning with the July 1, 2029 actuarial valuation when the remaining amortization period reaches 20 years, any increase or decrease in the unfunded accrued liability as a result of actuarial losses or gains for subsequent valuation years shall serve to increase or decrease, respectively, the amortization period for the unfunded accrued liability, unless an increase in the amortization period will cause it to exceed 20 years. If an increase in the amortization period as a result of actuarial losses for a valuation year would exceed 20 years, the accrued liability contribution shall be computed for the valuation year using a 20 year amortization period.

Receivable Contributions

State contributions expected to be paid the June 30th following the valuation date are discounted by the valuation interest rate of 7.90% to the valuation date.

Local contributions expected to be paid the April 1st, following the valuation are discounted by the valuation interest rate of 7.90% to the valuation date

Asset Valuation Method

A five year average of market values with write-up was used. This method takes into account appreciation (depreciation) in investments in order to smooth asset values by averaging the excess of the actual over the expected income, on a market value basis, over a five-year period.
