October 27, 2011
The Retirement Board
Public Employees Retirement Association
Santa Fe, New Mexico
Members of the Board:

We have conducted the annual actuarial valuation of the Public Employees Retirement Association (PERA) of New Mexico as of June 30, 2011; the results of the valuation are contained in the following report. The annual valuation is used to determine the sufficiency of the statutory contribution rates and, if necessary, the amount required to fund the annual normal cost and amortize the unfunded actuarial accrued liability over a 30 -year period. The results of this valuation apply to the fiscal year beginning July 1, 2011 and ending June 30, 2012 (FY 2012). Information contained in our report for plan years prior to June 30, 2010 is based upon valuations performed by the association's prior actuary.

In performing the valuation, we relied on data supplied by the Public Employees Retirement Association (PERA) and performed limited tests on the data for consistency and reasonableness. In determining the Fund's liabilities, future events, such as investment returns, deaths, retirements, etc., are anticipated based upon the set of actuarial assumptions as approved by the Board. Based on a recent study of the economic assumptions used in the valuation, the investment rate of return was decreased from $8.00 \%$ to $7.75 \%$ for the June 30, 2011 valuation. The valuation results also include the following changes in plan provisions since the previous valuation was completed:

- Employee contribution rates will be increased by $3.25 \%$ for State Employees earning more than $\$ 20,000$ in accordance with HB 668. The contribution rate changes are as follows:
$>$ Extends the $1.5 \%$ contribution shift from employer to employee (implemented for FY 2010 and FY 2011) for another two years;
$>$ Adds an additional 1.75\% contribution shift for FY 2012 and FY 2013; and
$>$ Adds a temporary provision to allow the FY 2013 shift to sunset contingent on two general fund revenue forecasts at mid-year FY 2012 being met.
- For State General and Municipal General Members first hired on or after July 1, 2010, normal retirement age and service requirements were changed as follows:
$>$ Any age with 30 or more years of service credit;
$>$ Age 67 with 5 or more years of service credit; or
$>$ Any age if the sum of the member's age and years of service credit equals at least 80.

Future actuarial results may differ significantly from the current results presented in this report due to such factors as the following: fund experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; and changes in plan provisions or applicable law. Since the potential impact of such factors is outside the scope of a normal annual actuarial valuation, an analysis of the range of results is not presented herein.

This is to certify that the undersigned are members of the American Academy of Actuaries and have experience in performing valuations for public retirement systems, that the valuation was prepared in accordance with principles of practice prescribed by the Actuarial Standards Board, and that the actuarial calculations were performed by qualified actuaries in accordance with accepted actuarial procedures, based on the current provisions of the Fund.

Respectfully submitted,

John J. Garrett, ASA, FCA, MAAA
Principal and Consulting Actuary

Jonathan T. Craven, ASA, EA, FCA, MAAA Senior Actuary

| Amount Remaining to Amortize UAAL | 4.26 \% | $4.41 \%$ |
| Amortization Period | Infinite | Infinite |
| Increase in Statutory Rate Necessary to Amortize UAAL over 30 Years | 9.38 \% | 4.24 \% |

## Section I: Board Summary

## Summary of Key Findings - PERA

An objective of the Board's funding policy is to maximize the stability in the statutory contribution rates while maintaining the adequacy of funding necessary for the actuarial soundness of each Division in the Fund. The Board has set forth criteria for measuring actuarial soundness and making recommendations for adjustments to the statutory rates of each Division. The funding method for PERA determines the sufficiency of statutorily required contribution rates to fund the annual normal cost plus an amount to fully amortize the unfunded actuarial accrued liability (UAAL) over 30 years for each Division.

The investment earnings of PERA is allocated on the basis of each Divisions' share of the total PERA Fund balance as of the valuation date. Therefore, each Division shares in the asset experience of the total Fund.

- The total PERA Fund experienced a gain on the market value of assets of approximately $\$ 2.2$ billion as a result of the $22.46 \%$ investment return. The actuarial value of assets smooth the unexpected portion of the market return over a four year period. The return on the actuarial value of assets was $-1.18 \%$ due to the recognition of approximately $\$ 1.5$ billion in combined investment losses deferred from the 2008 and 2009 plan years. As of June 30, 2011, the actuarial value of assets is $99.0 \%$ of market value. Table III-4 provides the development of the actuarial value of assets.
- The total actuarial loss due to the investment experience of the total PERA Fund is $\$ 1,109$ million. This loss was partially offset by non-investment related gains that total $\$ 73$ million. The net loss due to the plan's experience was $\$ 1,036$ million. As a result of the Board's adoption of changes to the economic assumptions, the actuarial liabilities increased by $\$ 392$ million.
- The total increase to the UAAL of PERA is $\$ 1,614$ million and reflects a decrease to the funded ratio from $78.5 \%$ to $70.5 \%$. The funded ratio was expected to decline to $77.0 \%$.

The summary of results and discussion of key findings for each Division begins on the following page.

Table I-1(b): Comparative Summary of Principal Results (State General Division)

| Valuation Date | June 30, 2011 | June 30, 2010 |

## Section I: Board Summary

## Summary of Key Findings - State General Division

The UAAL increased from $\$ 1,934$ million to $\$ 2,600$ million and results in a $5.44 \%$ of payroll increase to the annual amount necessary to amortize the UAAL over a 30 -year period. The funded ratio was expected to decrease from $72.3 \%$ to $72.2 \%$ over the plan year but due to the net actuarial experience loss, the ratio has decreased to $65.3 \%$. Table IV-3 provides the reconciliation of the UAAL. In the course of preparing the valuation report, we note the following key findings:

- The State General Division experienced a net actuarial loss of $\$ 383.5$ million and a $5.4 \%$ decrease to the expected funded ratio during the plan year ended June 30, 2011. The loss is primarily comprised of a $\$ 431.4$ million investment related loss which was partially offset by a $\$ 47.9$ million gain due to non-investment related experience. The changes to the economic assumptions resulted in an additional increase in actuarial liabilities of $\$ 165.7$ million and a decrease of $1.5 \%$ to the funded ratio. Table IV-4 provides the detailed information on the sources and magnitude of actuarial gains and losses.
- The financing period for the unfunded liability based upon the statutory contribution rates is an infinite period for the third consecutive year and therefore does not satisfy the Board's funding objectives. In accordance with the Board's Funding and Contribution Policies, a recommendation to increase the State General Division statutory rates is necessary.
- We recommend the Board consider a $2 \%$ annual increase in the statutory rates for each year over a four-year period which is the maximum allowed for consideration under the Board's policies.

Table I-1(c): Comparative Summary of Principal Results (State Police/Corrections Division)

| Valuation Date | June 30, 2011 | June 30, 2010 |
| :---: | :---: | :---: |

| Amortization Period | 0 | 0 |

## Section I: Board Summary

## Summary of Key Findings - State Police/Corrections Division

The current actuarial value of assets in excess of liabilities decreased from $\$ 105.7$ million to $\$ 14.9$ million. The normal cost rate increased from $31.26 \%$ to $32.13 \%$ which in turn decreased the margin in the statutory rates to $0.28 \%$ of payroll. The funded ratio was expected to decline slightly from $113.5 \%$ to $112.7 \%$ over the plan year but due to a net actuarial experience loss the ratio has decreased further to $101.8 \%$. Table IV-3 provides the reconciliation of the UAAL. In the course of preparing the valuation report, we note the following key findings:

- The State Police/Corrections Division experienced a net actuarial loss of $\$ 67.9$ million and a decrease of $8.0 \%$ in the expected funded ratio during the plan year ended June 30, 2011. The loss is comprised of an $\$ 83.8$ million investment related loss which was partially offset by a $\$ 15.9$ million gain due to non-investment related experience. The changes to the economic assumptions resulted in an additional increase in actuarial liabilities of $\$ 23.5$ million and a decrease of $2.9 \%$ to the funded ratio. Table IV-4 provides the detailed information on the sources and magnitude of actuarial gains and losses for the State Divisions.
- This Division does not meet the criteria to recommend adjusting the statutory rates.

| Amortization Period | Infinite | 44 years |
| Increase in Statutory Rate Necessary to Amortize UAAL over 30 Years | 4.95 \% | 1.00 \% |

## Summary of Key Findings - Municipal General Division

The UAAL increased from $\$ 778$ million to $\$ 1,275$ million and results in an increase to the amortization period from 44 years to an infinite period. As of the June 30, 2011 valuation, the current statutory contribution rates would require a $4.95 \%$ of payroll increase in order to amortize the UAAL over a 30 -year period. The funded ratio was expected to increase from $83.6 \%$ to $84.1 \%$ over the plan year but due to the net actuarial experience loss, the ratio has decreased to $75.1 \%$. Table IV-3 provides the reconciliation of the UAAL. In the course of preparing the valuation report, we note the following key findings:

- The Municipal General Division experienced a net actuarial loss of $\$ 365.0$ million and a $7.3 \%$ decrease to the expected funded ratio during the plan year ended June 30, 2011. The loss is comprised of a $\$ 372.7$ million investment related loss which was partially offset by a $\$ 7.7$ million gain due to non-investment related experience. The changes to the economic assumptions resulted in an additional increase in actuarial liabilities of $\$ 112.8$ million and a decrease of $1.7 \%$ to the funded ratio. Table IV-5 provides the detailed information on the sources and magnitude of actuarial gains and losses.
- The financing period for the unfunded liability based upon the statutory contribution rates exceeds the 30 -year period of the Board's funding objectives for the second year but only exceeds the 30 year period by at least 15 years for one year. In accordance with the Board's Funding and Contribution Policies, this Division does not meet the criteria to recommend adjusting the statutory rates. However, we project that under current statutory rates, the criteria will be established next year and the funded position of this Division is expected to deteriorate long-term without increases to the statutory rates.
- We recommend the Board consider a $2 \%$ annual increase in the statutory rates for each year over a four-year period which is the maximum allowed for consideration under the Board's policies.

## Section I: Board Summary

## Summary of Key Findings - Municipal Police Division

The UAAL increased from $\$ 391.5$ million to $\$ 620.3$ million and results in a $7.10 \%$ of payroll increase to the annual amount necessary to amortize the UAAL over a 30 -year period. The funded ratio was expected to remain at $80.1 \%$ over the plan year but due to the net actuarial experience loss, the ratio has further decreased to $71.1 \%$. Table IV-3 provides the reconciliation of the UAAL. In the course of preparing the valuation report, we note the following key findings:

- The Municipal Police Division experienced a net actuarial loss of $\$ 145.2$ million and a $7.0 \%$ decrease to the expected funded ratio during the plan year ended June 30, 2011. The loss is comprised of a $\$ 148.6$ million investment related loss which was partially offset by a $\$ 3.4$ million gain due to non-investment related experience. The changes to the economic assumptions resulted in an additional increase in actuarial liabilities of $\$ 58.0$ million and a decrease of $2.0 \%$ to the funded ratio. Table IV-5 provides the detailed information on the sources and magnitude of actuarial gains and losses.
- The financing period for the unfunded liability based upon the statutory contribution rates is an infinite period for the third consecutive year and therefore does not satisfy the Board's funding objectives. In accordance with the Board's Funding and Contribution Policies, a recommendation to increase the Municipal Police Division statutory rates is necessary.
- We recommend the Board consider a $2 \%$ annual increase in the statutory rates for each year over a four-year period which is the maximum allowed for consideration under the Board's policies.

## Section I: Board Summary

## Summary of Key Findings - Municipal Fire Division

The UAAL increased from $\$ 360.6$ million to $\$ 490.9$ million and results in a $6.93 \%$ of payroll increase to the annual amount necessary to amortize the UAAL over a 30 -year period. The funded ratio was expected to decline from $68.0 \%$ to $67.8 \%$ over the plan year but due to the net actuarial experience loss, the ratio has decreased further to $60.0 \%$. Table IV-3 provides the reconciliation of the UAAL. In the course of preparing the valuation report, we note the following key findings:

- The Municipal Fire Division experienced a net actuarial loss of $\$ 74.5$ million and a $6.2 \%$ decrease to the expected funded ratio during the plan year ended June 30, 2011. The loss is comprised of a $\$ 72.8$ million investment related loss and a $\$ 1.7$ million loss due to non-investment related experience. The changes to the economic assumptions resulted in an additional increase in actuarial liabilities of $\$ 31.4$ million and a decrease of $1.6 \%$ to the funded ratio. Table IV-5 provides the detailed information on the sources and magnitude of actuarial gains and losses.
- The financing period for the unfunded liability based upon the statutory contribution rates is an infinite period for the third consecutive year and therefore does not satisfy the Board's funding objectives. In accordance with the Board's Funding and Contribution Policies, a recommendation to increase the Municipal Fire Division statutory rates is necessary.
- We recommend the Board consider a $2 \%$ annual increase in the statutory rates for each year over a four-year period which is the maximum allowed for consideration under the Board's policies.

Section II of the report provides summarized information on the membership data used in the valuation. Section III covers the Fund's assets and Section IV covers the Fund's liabilities. The results of the valuation are provided in Section V and the accounting information is in Section VI. The appendices provide additional information on A) the Fund members; B) the actuarial assumptions and methods; and C) the summary of the benefit provisions of the Fund. It is important to note that all information contained in this report for periods prior to June 30, 2010 were produced by a prior actuarial consulting firm.

## Section II: Membership Data

Data regarding the membership of the Fund for use in the valuation were furnished by PERA. The following tables summarize the membership data as of June 30, 2011.

Table II-1: Summary of Membership Data as of June 30, 2011

| Group | Count |  |  |  |  |  |

| State General | $\$ 8,883,299,367$ | $\$$ |
| State Police/Corrections | $862,058,143$ | $889,620,284$ |
| Municipal General | $3,845,662,093$ | $3,960,653,469$ |
| Municipal Police | $1,527,062,745$ | $1,575,381,241$ |
| Municipal Fire | $737,135,025$ | $764,888,462$ |
| Total Actuarial Value of Assets | $\mathbf{\$ 1 1 , 8 5 5 , 2 1 7 , 3 7 3}$ | $\mathbf{\$ 1 2 , 2 4 3 , 7 1 2 , 8 5 0}$ |

The following tables provide information on the PERA's assets at market value and cash flow.
Table III-3: Market Value Reconciliation (Total PERA with Legislature)

|  | June 30, 2011 |  | June 30, 2010 |  |
| :---: | :---: | :---: | :---: | :---: |
| Beginning of Year Market Value |  | 10,015,925,839 | \$ | 8,795,819,080 |
| Audit Adjustment |  | - |  | 3,523,053 |
| Revised Beginning of Year Market Value | \$ | 10,015,925,839 | \$ | 8,799,342,133 |
| Revenues: |  |  |  |  |
| a. Member Contributions |  | 216,940,922 |  | 224,330,056 |
| b. Employer Contributions |  | 283,376,830 |  | 291,117,878 |
| c. Purchases of Service |  | 15,525,391 |  | 6,185,738 |
| d. Investment Income |  |  |  |  |
| 1. Adjustments of investments to market value |  | 1,573,881,319 |  | 854,033,811 |
| 2. Interest, dividends, etc. |  | 240,372,230 |  | 251,031,884 |
| 3. Realized gains (losses) |  | 417,019,522 |  | 158,891,910 |
| 4. Security lending |  | $(21,840,202)$ |  | 147,575,251 |
| e. Other Income |  | 46,881,672 |  | 201,793 |
| f. Total Revenues | \$ | 2,772,157,684 | \$ | 1,933,368,321 |
| Expenditures: |  |  |  |  |
| a. Benefit Payments |  | 716,679,792 |  | 653,727,922 |
| b. Refunds of Member Contributions |  | 43,107,776 |  | 32,734,673 |
| c. Administrative and Investment Expenses |  | 33,841,256 |  | 30,322,020 |
| d. Total Expenditures | \$ | 793,628,824 | \$ | 716,784,615 |
| End of Year Market Value | \$ | 11,994,454,699 | \$ | 10,015,925,839 |

The market value rate of return for the plan year is $22.46 \%$. PERA's cash flow is $-2.52 \%$ as a percentage of average market value. A mature system such as PERA is expected to exhibit negative net cash flow as the number of members receiving benefit payments becomes a larger portion of total membership. There are 1.68 contributing active members for each member receiving a benefit as of June 30, 2011. We expect this measure to decline over future years and result in an increase in the percentage of negative cash flow.

## Section III: PERA Assets

The actuarial value of assets represents a "smoothed" value developed with the purpose of dampening the impact of market volatility on the assets used in determining valuation results. The actuarial value of assets has been calculated by spreading the recognition of excess investment income over four years. The amount of excess investment income in each year is the difference between expected actuarial value investment income and actual market value investment income. Table III-4 provides the calculation of the amount of the current year excess investment income to be phased-in as well as the amount of deferred investment income from the prior years.

Table III-4: Development of Actuarial Value of Assets as of June 30, 2011 (Total PERA with Legislative Division)

* The actuarial value adjustment is the difference between the actuarial value of assets derived in Table III-4 and the total fund balance at market value. It was allocated to each group in proportion to the Total PERA Fund Balance. Please note that the Legislature Division accounted for approximately $0.20 \%$ of the Total PERA Fund Balance and is detailed in a separate report.

## Section III: PERA Assets

The actuarial valuation assumes the rate of investment return on the assets of the Fund is $7.75 \%$ annually beginning with the June 30, 2011 valuation; the assumed rate of return was $8.00 \%$ for the prior valuation. This assumption is based upon the reasonable long-term expected return on the assets. In each year, the Fund will experience actuarial gains and losses due to the actual investment return of the assets. Table III-6 provides the calculation of the gain or loss due to the investment experience on the actuarial value of assets for the year ending June 30, 2011.

Table III-6: Actuarial Investment Gain (Loss) for the Year Ending June 30, 2011 (Dollar Amounts in Millions)

|  | State General |  | State Police/ <br> Corrections |  | Municipal General | Municipal Police | Municipal Fire | Total |

## Statutory Reserve Transfers

Each year following receipt of the report of the annual actuarial valuation, the excess, if any, of the actuarial present value of pensions and refunds being paid or likely to be paid to members and survivors over the balance in the retirement reserve fund (RRF) shall be transferred to the retirement reserve fund from the employers accumulation fund (EAF). Table III-7 shows the necessary transfer amounts.

Table III-7: Statutory Reserve Transfers as of June 30, 2011

| Division | Reported Fund Balances | Actuarial Present Value of Pensions Being Paid | Transfer |

| Employers Accumulation Fund | 143,852,033 |  | (358,660,176) |
| Retirement Reserve Fund | 454,137,058 | 812,797,234 | 358,660,176 |
| Total End of Year Market Value | \$ 11,970,717,468 |  |  |

The total actuarial present value of benefits is the value as of the valuation date of all future benefits expected to be paid to current members of the Fund. An actuarial cost method allocates each individual's present value of benefits to past and future years of service. The actuarial accrued liability includes the portion of the active member present value of benefits allocated to past service as well as the entire present value of benefits for retirees, beneficiaries and inactive members. The portion of the actuarial present value allocated to the future service of active members is called the present value of future normal costs. Table IV-1 presents the calculation and allocation of the actuarial present value of benefits.

Table IV-1: Calculation and Allocation of the Actuarial Present Value as of June 30, 2011

|  |  | arial Accrued <br> Liability |  | esent Value of uture Normal Cost | Total Actuarial Present Value |  |

| Disability Retirements |  | 187,536,116 |  |  |  | 187,536,116 |
| Total for Retirees and |  |  |  |  |  |  |
| Beneficiaries |  | 10,232,641,488 |  |  | \$ | 10,232,641,488 |
| Total |  | 6,826,392,409 |  | 3,422,897,429 |  | 0,249,289,838 |

Under the valuation funding method, an unfunded actuarial accrued liability (UAAL) exists to the extent that the actuarial accrued liability exceeds the actuarial value of assets as presented in Section III. The calculation of the UAAL by Division as of the valuation date is shown in Table IV-2 on the following page.

Table IV-2: Calculation of the Unfunded Actuarial Accrued Liability and Funded Ratio (Dollar Amounts in Millions)

|  | State General |  | State Police/ Corrections |  | Municipal General | $\begin{array}{\|c} \text { Municipal } \\ \text { Police } \\ \hline \end{array}$ | Municipal Fire |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1. Actuarial Accrued Liability | \$ | 7,483.4 | \$ | 847.1 | \$ 5,120.5 | \$ 2,147.4 | \$ | 1,228.0 |
| 2. Actuarial Value of Assets |  | 4,883.3 |  | 862.0 | 3,845.7 | 1,527.1 |  | 737.2 |
| 3. Unfunded Actuarial Accrued Liability (1-2) |  | 2,600.1 |  | (14.9) | 1,274.8 | 620.3 |  | 490.9 |
| Funded Ratio (2/1) |  | 65.3\% |  | 101.8\% | 75.1\% | 71.1\% |  | 60.0\% |

Although the terminology used to describe the excess of PERA's actuarial accrued liability over the actuarial value of assets is call the "unfunded" actuarial accrued liability, the calculated annual contribution rates in the valuation include an annual amortization payment required to fully amortize the UAAL within 30 years. In some cases, the current statutory rates are less than these calculated rates.

The funded ratio is the ratio of the actuarial value of assets (Table III-2) divided by the actuarial accrued liability (Table IV-1) as of the valuation date. As of June 30, 2011, the funded ratio of PERA is $70.46 \%$ as compared to a ratio of $78.48 \%$ as of June 30, 2010. Due to the recognition of the investment losses from the 2008 and 2009 plan years, there has been a general decline in the funded ratio across all divisions. The ratio is a commonly used measure of the funding progress and can be useful in reviewing the historical trend of a Fund's funding progress. Such a review should also consider the impact to this measure over the historical period due to changes to fund benefits, changes to the actuarial assumptions and methods, and the significant impact that investment experience can have on the ratio over short-term periods. We caution that no single "point in time" measure can provide a universal basis for comparing one plan's funded status to another.

## Section IV: PERA Liabilities

The calculation of PERA's actuarial assets and liabilities requires the use of several assumptions concerning the future experience of PERA and its members. In each annual valuation, the latest year of actual experience is compared to that expected by the prior valuation. The differences are actuarial gains and losses which decrease or increase the UAAL. Table IV-3 provides the reconciliation of the UAAL.

Table IV-3: Reconciliation of the UAAL (Dollar Amounts in Millions)

|  | State General |  | State Police/ Corrections |  | Municipal General |  | Municipal Police |  | Municipal Fire |  |

## Section V: Actuarial Valuation Results

Section IV of this report presented PERA's actuarial accrued liability as the portion of the present value of benefits allocated to past years of service. The portion of the active members' present value of benefits allocated to future years of service is funded through annual normal cost contributions comprised of both active member and employer contributions.

The annual required contribution rate is the percentage of valuation payroll necessary to fund the annual normal cost of the Fund and fully amortize the UAAL over 30 years in accordance with the Board's funding objectives. The calculated rate is expected to remain constant over the remaining amortization period and is provided in Table V-1.

Table V-1(a): Valuation Results for State General Division

* PERA financial records do not provide an asset breakdown by coverage plan which necessitates the use of a weighted average contribution rate for the purpose of comparing assets to the actuarial accrued liability and determining the financing period for the unfunded actuarial accrued liability. Contribution rates are weighted by payroll.

The tables provided in this section present disclosure information necessary to comply with GASB requirements and are relevant for the annual financial reporting of PERA.

## Actuarial Assumptions Used for the Valuation

Assumed Rate of Investment Return. $7.75 \%$ per annum net of administrative and investment expenses. The investment assumption was changed from $8.00 \%$ to $7.75 \%$ effective June 30, 2011 based on a recent study of the economic assumptions used in the valuation.

The estimates of future inflation, real investment return in excess of inflation and salary increases are used in combination with the demographic estimates to determine the present value of amounts expected to be paid in the future.

Price Inflation. 3.5\% per annum, compounded annually, effective June 30, 2011.

Real Investment Return. $4.25 \%$ over price inflation ( $3.75 \%$ over wage growth), effective June 30, 2011. This is the rate of return (net of administrative and investment expenses) to be produced by investing a pool of assets in an inflation-free environment.

Salary Increases. Salary increases occur in recognition of (i) individual merit and longevity, (ii) inflation-related depreciation of the purchasing power of salaries, and (iii) other factors such as productivity gains and competition from other employers for personnel. These rates were first used for the June 30, 2005 actuarial valuation. Sample rates follow:

|  | Annual Rates of Salary Increase for Sample Years of Service |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Attributable to: | $\mathbf{1}$ | $\mathbf{5}$ | $\mathbf{1 0}$ | $\mathbf{1 5}$ | $\mathbf{2 0}$ |
|  |  |  |  |  |  |
| General Increase in Wage Level Due to: |  |  |  |  |  |
| Inflation | $3.5 \%$ | $3.5 \%$ | $3.5 \%$ | $3.5 \%$ | $3.5 \%$ |
| Other Factors | 0.5 | 0.5 | 0.5 | 0.5 | 0.5 |
|  |  |  |  |  |  |
| Increase Due to Merit/Longevity: |  |  |  |  |  |
| State General | 8.0 | 2.0 | 0.5 | 0.5 | 0.5 |
| State Police | 13.5 | 9.0 | 6.8 | 4.5 | 2.3 |
| State Corrections | 15.0 | 3.5 | 3.5 | 3.5 | 3.5 |
| Municipal General | 2.5 | 1.5 | 0.5 | 0.5 | 0.5 |
| Municipal Police | 9.5 | 4.0 | 2.8 | 2.0 | 1.8 |
| Municipal Fire | 10.0 | 5.5 | 2.7 | 1.3 | 1.5 |

In the following schedules, State Corrections includes Adult Corrections Officers and Juvenile Corrections Officers and Municipal General includes Municipal Detention Officers.

Mortality Assumption. For active members, mortality rates are shown for sample ages in the following schedule. No provision was made for future mortality improvement.

## Appendix B: Summary of Actuarial Assumptions \& Methods

For inactive members, mortality rates are based on the 2000 Group Annuity Mortality Table ( 1971 GAM projected), set back 3 years for men and 7 years for women for healthy lives. Special disabled mortality is used for disabled lives. All deaths-in-service are assumed to be non-duty.

Post-retirement and post-disablement mortality rates are shown for sample ages in the following schedule.

| Post-Retirement and Post-Disablement Mortality Rates <br> Post-retirement <br> Female |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
| Age | Male | Post-disablement <br> Male | Female |  |
|  |  |  |  |  |

## Appendix B: Summary of Actuarial Assumptions \& Methods

Rates of Retirement. The following rates apply to State General and Municipal General (Plan 1-4) members who were first hired before July 1, 2010 and all State Police, State Corrections, Municipal Detention, Municipal Police, and Municipal Fire members. These rates are used to measure the probability of members retiring at the indicated ages or indicated service.

| Percents Retiring at Indicated Ages (by Coverage Plan) |  |  |  |  |  |  |  |  |

*Includes Adult Corrections Officers and Municipal Detention Officers.

## Appendix B: Summary of Actuarial Assumptions \& Methods

Rates of Retirement. The following rates apply to State General and Municipal General (Plan 1-4) members who were first hired on or after July 1, 2010. These rates are used to measure the probability of members retiring at the indicated ages or indicated service.

| Percents Retiring at Indicated Ages (by Coverage Plan)* <br> Retirement <br> Ages | State General |  | Municipal General |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Male | Female | Male | Female |
|  | $75 \%$ | $70 \%$ | $75 \%$ | $75 \%$ |

Rates of Separation From Active Membership. The rates are used to measure probabilities of active members terminating that status for a reason other than disability or death. The rates do not apply to members who are within the retirement rate range. Separation rates are presumed to be service related during the first 5 to 8 years of employment and age related thereafter.

Administrative and Investment Expenses. All expenses are deducted from gross investment income.
Active Member Group Size. The valuation is based on a stationary group size.

## Miscellaneous and Technical Assumptions

| Marriage Assumption: | $100 \%$ of males and $100 \%$ of females are assumed to be <br> married for purposes of death-in-service benefits. Male <br> spouses are assumed to be three years older than female <br> spouses. |
| :--- | :--- |
| Pay Increase Timing: | Beginning of (Fiscal) year. This is equivalent to assuming <br> that reported pays represent amounts paid to members during <br> the year ended on the valuation date. |
| Decrement Timing: | All decrements are assumed to occur in the middle of the <br> fiscal year. |
| Eligibility Testing: | Eligibility for benefits is determined based upon the age <br> nearest birthday and service nearest whole year on the date <br> the decrement is assumed to occur. |
| Decrement Relativity: | Decrement rates are used directly from the experience study, <br> without adjustment for multiple decrement table effects. |
| Decrement Operation: | Disability and mortality decrements do not operate during the <br> first 5 years of service. Neither disability nor withdrawal <br> decrements operate during retirement eligibility. |
| Loads: | Retiree liabilities were increased by 1\% to account for the <br> pop-up provision. |
| Incidence of Contributions: | Contributions are assumed to be received continuously <br> throughout the year based upon the computed percent of <br> payroll shown in this report and the actual payroll payable at <br> the time contributions are made. |
| Denefit Service: | A straight life payment is the assumed normal form of benefit. |
| Data Changes: | Exact fractional service is used to determine the amount of <br> mears younger if the member was male and 3 |
| menefit payable. |  |

## Definitions of Technical Terms

Actuarial Accrued Liability. The difference between the actuarial present value of future benefits payments and the actuarial present value of future normal costs.

Actuarial Cost Method. A mathematical procedure for allocating the dollar amount of the "actuarial present value of future benefit payments" between future normal cost and actuarial accrued liability.

Actuarial Present Value. The amount of funds currently required to provide a payment or series of payments in the future. It is determined by discounting future payments at predetermined rates of interest and by probabilities of payment.

Amortization. Paying off an interest-discounted amount with periodic payments of interest and principal - as opposed to paying off with a lump sum payment.

Experience Gain (Loss). The difference between actual actuarial costs and anticipated actuarial costs - during the period between two valuation dates.

Normal Cost. The actuarial cost allocated to the current year by the actuarial cost method.

Unfunded Actuarial Accrued Liability. The difference between the actuarial accrued liability and the actuarial value of assets. Sometimes referred to as "unfunded accrued liability."

## Appendix C: Summary of Plan Provisions

## Normal Retirement Eligibility Conditions

Applicable to State General and Municipal General (Plan 1-4) members who were first hired before July 1, 2010 and all State Police, State Corrections, Municipal Detention, Municipal Police, and Municipal Fire members:

- Any age with 25 or more years of credited service; or
- Age 60 or older with 20 or more years of credited service; or
- Age 61 or older with 17 or more years of credited service; or
- Age 62 or older with 14 or more years of credited service; or
- Age 63 or older with 11 or more years of credited services or
- Age 64 or older with 8 or more years of credited service; or
- Age 65 or older with 5 or more years of credited service.

Applicable to State General and Municipal General (Plan 1-4) members who were first hired on or after July 1, 2010:

- Any age with 30 or more years of credited service; or
- Age 67 or older with 5 or more years of credited service;
- Any age if the sum of the member's age and years of service credit equals at least 80

Applicable to police and fire members under one of the following coverage plans:
Municipal Police Coverage Plan 3
Municipal Police Coverage Plan 4
Municipal Police Coverage Plan 5
Municipal Fire Coverage Plan 3
Municipal Fire Coverage Plan 4
Municipal Fire Coverage Plan 5

- Any age with 20 or more years of credited service.

## Normal Retirement Pension Amount

The amount of normal retirement pension is based on:

- Final average salary, which is the average of salary for the 36 consecutive months of credited service producing the largest average;
- Credited service (years and months); and the
- Coverage plan.

## Appendix C: Summary of Plan Provisions

The pension accrual factor and maximum pension, as a percent of final average salary, under each coverage plan are:

| Coverage Plan | Pension Factor Per Year of Credited Service | Maximum Pension as Percent of Final Average Salary |
| :---: | :---: | :---: |
| State General Member Coverage Plan 3 | 3.0\% | 80\% |
| State Police and Adult Corrections Officers Member Coverage Plan 1 | 3.0 | 80 |
| Hazardous Duty (Juvenile Corrections Officer) Coverage Plan 2 | 3.0 | 100 |
| Municipal General Member Coverage Plan 1 | 2.0 | 60 |
| Coverage Plan 2 | 2.5 | 75 |
| Coverage Plan 3 | 3.0 | 80 |
| Coverage Plan 4 | 3.0 | 80 |
| Municipal Detention Officer Coverage Plan 1 | 3.0 | 80 |
| Municipal Police Member |  |  |
| Coverage Plan 1 | 2.0 | 60 |
| Coverage Plan 2 | 2.5 | 100 |
| Coverage Plan 3 | 2.5 | 100 |
| Coverage Plan 4 | 3.0 | 80 |
| Coverage Plan 5 | 3.5 | 80 |
| Municipal Fire Member |  |  |
| Coverage Plan 1 | 2.0 | 60 |
| Coverage Plan 2 | 2.5 | 100 |
| Coverage Plan 3 | 2.5 | 100 |
| Coverage Plan 4 | 3.0 | 80 |
| Coverage Plan 5 | 3.5 | 80 |

## Appendix C: Summary of Plan Provisions

## Vested Termination of Membership (Employment)

Termination of employment and membership with at least 5 years of credited service. Accumulated member contributions must be left on deposit. Payment of the pension is available upon eligibility for normal retirement. In addition, certain disability and survivor pension provisions apply.

## Normal and Optional Forms of Payment

The normal form of payment is for life. Optional contingent survivor beneficiary forms of payment are available on an actuarial equivalent basis. Total pension payments can never be less than the member's accumulated contributions.

## Survivor Pensions - Death in the Line of Duty

Pensions are paid to the eligible spouse and eligible children if survivor coverage has not been elected under the Elective Survivor Pension Beneficiary provision. The amount of pension payable for life to an eligible spouse is the greater of 1) $50 \%$ of final average salary or 2) the accrued normal retirement pension reduced for option B election. The amount of pension payable to each eligible child is an equal share of $25 \%$ of final average salary. If there is not an eligible spouse or the eligible spouse dies, and if there are 2 or more eligible children, the amount of pension payable to each eligible child is an equal share of $50 \%$ of final average salary. An eligible child is an unmarried natural or adopted child who is under age 18. A child's pension terminates upon death, marriage or reaching age 18. The pension of any remaining eligible children is recalculated whenever a child's pension is terminated.

## Survivor Pensions - Death Not in the Line of Duty

Requires 5 years of credited service. Benefit applies to members and vested former members who have not elected coverage under the Elective Survivor Pension Beneficiary provision. Pensions are paid to an eligible spouse OR eligible children. The amount of pension payable for the life of an eligible spouse is the greater of 1) $30 \%$ of final average salary or 2 ) accrued normal retirement pension reduced for option B election. An eligible child pension is paid if there is not an eligible spouse or following the death of an eligible spouse. The amount of pension payable to each eligible child is an equal share of $25 \%$ of final average salary or, if greater, $50 \%$ of accrued normal retirement pension. An eligible child is an unmarried natural or adopted child who is under age 18. A child's pension terminates upon death, marriage or reaching age 18. The pension of any remaining eligible children is recalculated whenever a child's pension is terminated.

## Appendix C: Summary of Plan Provisions

## Elective Survivor Beneficiary Pension

Applicable to members with 5 or more years of credited service and vested former members who have elected option B and designated a survivor pension beneficiary who has an insurable interest. The amount of pension is the amount of accrued normal retirement pension under optional form of payment B (100\% continuation to beneficiary).

## Disability Retirement

Applicable to members and vested former members with 5 or more years of credited service. The 5 year credited service requirement is waived if the disability is incurred in line of duty. The amount of disability pension is the accrued normal retirement pension at time of disability retirement. If the disability is in line of duty, the credited service used is the amount that would have been acquired when first eligible for normal retirement.

## Cost-of-Living Increases

Pensions are increased each July 1 by $3 \%$ if retirement has been in effect for at least 2 full calendar years. If retired on account of disability or if at least age 65, the 2 calendar year waiting period is reduced to 1 full calendar year.

## Service Credit

Members in the State Police and Adult Corrections Officers Coverage Plan and members in the Municipal Detention Officers Coverage Plan receive 1.2 years of credited service for each year of service rendered.

## Appendix C: Summary of Plan Provisions

## Contributions by Members and Employers

Contributions by members and affiliated public employers are at the following rates.

| Coverage Plan | Percent of Salary <br> Member | Contribution Rate <br> Employer |
| :--- | :---: | :---: |
| State General Member Coverage Plan 3* | $10.67 \%$ | $13.34 \%$ |
| State Police Member and Adult Correctional |  |  |
| $\quad$ Officer Member Coverage Plan 1* | 10.85 | 21.85 |
| Hazardous Duty (Juvenile Corrections) Member |  |  |
| $\quad$ Coverage Plan 2* | 8.03 | 22.47 |
| Municipal General Member Coverage Plan 1 | 7.00 | 7.00 |
| Municipal General Member Coverage Plan 2 | 9.15 | 9.15 |
| Municipal General Member Coverage Plan 3 | 13.15 | 9.15 |
| Municipal General Member Coverage Plan 4 | 15.65 | 11.65 |
| Municipal Detention Officer Member | 16.65 | 16.65 |
| $\quad$ Coverage Plan 1 | 7.00 | 10.00 |
| Municipal Police Member Coverage Plan 1 | 7.00 | 15.00 |
| Municipal Police Member Coverage Plan 2 | 7.00 | 18.50 |
| Municipal Police Member Coverage Plan 3 | 12.35 | 18.50 |
| Municipal Police Member Coverage Plan 4 | 16.30 | 18.50 |
| Municipal Police Member Coverage Plan 5 | 8.00 | 11.00 |
| Municipal Fire Member Coverage Plan 1 | 8.00 | 17.50 |
| Municipal Fire Member Coverage Plan 2 | 8.00 | 21.25 |
| Municipal Fire Member Coverage Plan 3 | 12.80 | 21.25 |
| Municipal Fire Member Coverage Plan 4 | 16.20 | 21.25 |
| Municipal Fire Member Coverage Plan 5 |  |  |

Interest is credited to member contributions on each June 30 at the rates set annually by the Retirement Board. The current rate is $5.25 \%$.
*Includes a temporary 1.5\% of pay shift from the employer statutory rate effective July 1, 2009. This contribution shift is currently effective for 4 years. Also includes additional $1.75 \%$ of pay shift from the employer statutory rate effective July 1, 2011. This contribution shift is currently effective for 2 years.

[^0]:    * Includes Co-Payees
