October 25, 2018
The Retirement Board
Public Employees Retirement Association
Santa Fe, New Mexico
Members of the Board:
We have conducted the annual actuarial valuation of the Public Employees Retirement Association (PERA) of New Mexico as of June 30, 2018; the results of the valuation are contained in the following report. The annual valuation is used to determine the sufficiency of the statutory contribution rates and, if necessary, the amount required to fund the annual normal cost and amortize the unfunded actuarial accrued liability over a 30 -year period. The results of this valuation apply to the fiscal year beginning July 1, 2018 and ending June 30, 2019 (FY 2019). Information contained in our report for plan years prior to June 30, 2010 is based upon valuations performed by the association's prior actuary.

In performing the valuation, we relied on data supplied by the Public Employees Retirement Association (PERA) and performed limited tests on the data for consistency and reasonableness. In determining the Fund's liabilities, future events, such as investment returns, deaths, retirements, etc., are anticipated based upon the set of actuarial assumptions as approved by the Board. New economic assumptions were adopted for the June 30, 2018 valuations as follows:

| Assumption | Previous | Current |
| :--- | :---: | :---: |
| Rate of Inflation | $2.25 \%$ select and $2.75 \%$ <br> ultimate | $2.50 \%$ static |
| Investment Rate of Return | $7.25 \%$ select and $7.75 \%$ <br> ultimate | $7.25 \%$ static |
| Rate of Payroll Growth | $2.75 \%$ select and $3.25 \%$ <br> ultimate | $3.00 \%$ static |
| Administrative Expenses | $0.45 \%$ of payroll | $0.50 \%$ of payroll |

In addition, new demographic assumptions and methods were adopted for the June 30, 2018 valuation as follows:

|  | Summary of Changes |
| :--- | :--- |
| Withdrawal | Minor changes to Muni Police and Muni Fire divisions which <br> reduce rates after 7 years of service. |
| Retirement | Changes to current assumed rates of retirement that reduce the number of <br> expected retirements. |
| Mortality | Adoption of the RPH-2014 Blue Collar mortality table with female ages set <br> forward one year. Future improvement in mortality rates is assumed using <br> 60\% of the MP-2017 projection scale generationally. |
| Disability | Lowered rates for State Police, Muni General males, and Muni Police <br> divisions. |
| Salary Increase <br> Above Wage <br> Inflation | Changes to the service based rates of salary increases which generally <br> reflect lower rates of salary growth. |

Future actuarial results may differ significantly from the current results presented in this report due to such factors as the following: fund experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; and changes in plan provisions or applicable law. Since the potential impact of such factors is outside the scope of a normal annual actuarial valuation, an analysis of the range of results is not presented herein.

This actuarial valuation was performed to determine the adequacy of statutory contributions to fund the plan. The asset values used to determine unfunded liabilities and funded ratios are not market values but less volatile market related values. A smoothing technique is applied to market values to determine the market related values. The unfunded liability amounts and funded ratios using the market value of assets would be different. The interest rate used for determining liabilities is based on the expected return on assets. Therefore, liability amounts in this report cannot be used to assess a settlement of the obligation.

This is to certify that the undersigned are members of the American Academy of Actuaries and have experience in performing valuations for public retirement systems, that the valuation was prepared in accordance with principles of practice prescribed by the Actuarial Standards Board, and that the actuarial calculations were performed by qualified actuaries in accordance with accepted actuarial procedures, based on the current provisions of the Fund.

Respectfully submitted,

John J. Garrett, ASA, FCA, MAAA Principal and Consulting Actuary

Jonathan T. Craven, ASA, EA, FCA, MAAA Consulting Actuary

| Total Normal Cost | 16.59 \% | 15.81 \% |
| Less Administrative Expenses | 0.50 \% | 0.45 \% |
| Amount Remaining to Amortize UAAL | 9.75 \% | 10.50 \% |
| Amortization Period | Infinite | 55 years |
| Increase in Statutory Rate Necessary to Amortize UAAL over 30 Years | 5.73 \% | 2.93 \% |

## Section I: Board Summary

## Summary of Key Findings - PERA

An objective of the Board's funding policy is to maximize the stability in the statutory contribution rates while maintaining the adequacy of funding necessary for the actuarial soundness of each Division in the Fund. The Board has set forth criteria for measuring actuarial soundness and making recommendations for adjustments to the statutory rates of each Division. The funding method for PERA determines the sufficiency of statutorily required contribution rates to fund the sum of the annual normal cost, administrative expenses and an amount to fully amortize the unfunded actuarial accrued liability (UAAL) over no more than 30 years for each Division.

The investment earnings of PERA is allocated on the basis of each Divisions' share of the total PERA Fund balance as of the valuation date. Therefore, each Division shares in the asset experience of the total Fund and will demonstrate similar experience.

- The total PERA Fund experienced an investment return of approximately $\$ 1.00$ billion on the market value of assets. The actuarial value of assets smooth the unexpected portion of the market return over a four year period. The return on the actuarial value of assets was $4.85 \%$ compared to an expected return of $7.25 \%$. As of June 30, 2018, the actuarial value of assets is $100.6 \%$ of market value. Table III-4 provides the development of the actuarial value of assets.
- Based a recent experience study for the five-year period ending June 30, 2017, the economic and demographic assumptions were updated for this valuation. The changes in assumptions resulted in an increase of $\$ 564.0$ million to Fund liabilities and a decrease of $1.95 \%$ to the funded ratio.
- The total actuarial loss due to the investment experience of the total PERA Fund is $\$ 356.5$ million. The gain on non-investment related items totaled $\$ 55.9$ million. The net loss due to the plan's experience was $\$ 300.6$ million.
- The total increase to the UAAL of PERA is $\$ 990.1$ million since the previous valuation and the funded ratio decreased from 74.9\% to 71.6\%.
- The financing period for the unfunded liability based upon the statutory contribution rates is an infinite period.

The summary of results and discussion of key findings for each Division begins on the following page.

Table I-1(b): Comparative Summary of Principal Results (State General Division)

| Valuation Date | June 30, 2018 | June 30, 2017 |

## Section I: Board Summary

## Summary of Key Findings - State General Division

The UAAL increased from $\$ 2.98$ billion to $\$ 3.40$ billion. The funded ratio decreased from $66.2 \%$ to $63.1 \%$. Table IV-3 provides the reconciliation of the UAAL. In the course of preparing the valuation report, we note the following key findings:

- The State General Division experienced a net actuarial loss of $\$ 41.7$ million during the plan year ended June 30, 2018. The non-investment related gain of $\$ 99.1$ million is primarily due to lower than expected salary increases and service credit changes. In addition the plan experienced a $\$ 140.8$ million loss due to investment related experience. Table IV-4 provides the detailed information on the sources and magnitude of actuarial gains and losses.
- The adoption of new economic and demographic assumptions resulted in a $\$ 250.9$ million increase in the UAAL.
- The financing period for the unfunded liability based upon the statutory contribution rates is an infinite period for the tenth consecutive year.

Table I-1(c): Comparative Summary of Principal Results (State Police/Corrections Division)

| Valuation Date | June 30, 2018 | June 30, 2017 |

## Section I: Board Summary

## Summary of Key Findings - State Police/Corrections Division

As of June 30, 2018, the actuarial value of assets exceeded accrued liabilities by $\$ 286.0$ million. As of June 30, 2017, the actuarial value of assets exceeded accrued liabilities by $\$ 286.5$ million. This represents an increase in the UAAL of about $\$ 0.5$ million from the previous year. The funded ratio decreased from $131.5 \%$ to $130.2 \%$. Table IV-3 provides the reconciliation of the UAAL. In the course of preparing the valuation report, we note the following key findings:

- The State Police/Corrections Division experienced a net actuarial loss of $\$ 4.3$ million during the plan year ended June 30, 2018. The actuarial loss is comprised of a $\$ 27.1$ million investment related loss and a $\$ 22.8$ million gain due to non-investment related experience, primarily due to salary increases greater than expected. Table IV-4 provides the detailed information on the sources and magnitude of actuarial gains and losses.
- The adoption of new economic and demographic assumptions resulted in a $\$ 26.8$ million increase in the UAAL.

Table I-1(d): Comparative Summary of Principal Results (Municipal General Division)

| Increase in Statutory Rate Necessary to Amortize UAAL over 30 Years | 1.56 \% | N/A |

## Section I: Board Summary

## Summary of Key Findings - Municipal General Division

The UAAL increased from $\$ 1.29$ billion to $\$ 1.61$ billion. The current statutory rate will amortize the UAAL over a 43 -year period. The funded ratio decreased from $79.9 \%$ to $76.3 \%$. Table IV-3 provides the reconciliation of the UAAL. In the course of preparing the valuation report, we note the following key findings:

- The Municipal General Division experienced a net actuarial loss of $\$ 158.9$ million during the plan year ended June 30, 2018. The actuarial loss is comprised of a $\$ 118.8$ million investment related loss and a $\$ 40.1$ million loss due to non-investment related experience.
- The adoption of new economic and demographic assumptions resulted in a $\$ 157.6$ million increase in the UAAL.
- The amortization period increased from 26 years to 43 years.
- Table IV-5 provides the detailed information on the sources and magnitude of actuarial gains and losses.

## Section I: Board Summary

## Summary of Key Findings - Municipal Police Division

The UAAL increased from $\$ 535.2$ million to $\$ 692.0$ million. The funded ratio decreased from $79.1 \%$ to $74.8 \%$. Table IV-3 provides the reconciliation of the UAAL. In the course of preparing the valuation report, we note the following key findings:

- The Municipal Police Division experienced a net actuarial loss of $\$ 65.5$ million and a 4.3\% decrease to the funded ratio during the plan year ended June 30, 2018. The loss is comprised of a $\$ 47.2$ million investment related loss and an $\$ 18.3$ million loss due to noninvestment related experience. Table IV-5 provides the detailed information on the sources and magnitude of actuarial gains and losses.
- The adoption of new economic and demographic assumptions resulted in an $\$ 86.8$ million increase in the UAAL.
- The financing period for the unfunded liability based upon the statutory contribution rates is infinite compared to 42 years for the plan year ended June 30, 2017.

## Section I: Board Summary

## Summary of Key Findings - Municipal Fire Division

The UAAL increased from $\$ 553.4$ million to $\$ 645.7$ million and the funded ratio decreased from 63.5 \% to $60.2 \%$. Table IV-3 provides the reconciliation of the UAAL. In the course of preparing the valuation report, we note the following key findings:

- The Municipal Fire Division experienced a net actuarial loss of $\$ 30.2$ million. The loss is comprised of a $\$ 22.2$ million investment related loss and an $\$ 8.0$ million loss due to non-investment related experience. Table IV-5 provides the detailed information on the sources and magnitude of actuarial gains and losses.
- The adoption of new economic and demographic assumptions resulted in a $\$ 41.9$ million increase in the UAAL.
- The financing period for the unfunded liability based upon the statutory contribution rates is an infinite period for the tenth consecutive year.

Section II of the report provides summarized information on the membership data used in the valuation. Section III covers the Fund's assets and Section IV covers the Fund's liabilities. The results of the valuation are provided in Section V and the accounting information is in Section VI. The appendices provide additional information on A ) the Fund members, B) the actuarial assumptions and methods, and C) the summary of the benefit provisions of the Fund. It is important to note that all information contained in this report for periods prior to June 30, 2010 were produced by a prior actuarial consulting firm.

## Section II: Membership Data

Data regarding the membership of the Fund for use in the valuation were furnished by PERA. The following tables summarize the membership data as of June 30, 2018.

Table II-1: Summary of Membership Data as of June 30, 2018

|  | Count |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Total Actuarial Value of Assets | $\mathbf{\$ 1 5 , 2 5 2 , 8 6 0 , 6 7 2}$ | $\mathbf{\$ 1 5 , 1 2 4 , 1 6 7 , 2 9 7}$ |

The following tables provide information on PERA's assets at market value and cash flow.
Table III-3: Market Value Reconciliation (Total PERA with Legislature)

|  | June 30, 2018 | June 30, 2017 |
| :---: | :---: | :---: |
| Beginning of Year Market Value | \$ 14,798,917,909 | \$ 13,826,658,367 |
| Audit Adjustment | $(745,145)$ | 6,447,404 |
| Revised Beginning of Year Market Value | \$ 14,798,172,764 | \$ 13,833,105,771 |
| Revenues: |  |  |
| a. Member Contributions | \$ 273,679,996 | \$ 264,939,116 |
| b. Employer Contributions | 319,499,468 | 331,473,332 |
| c. Appropriations | - | 1,000,000 |
| d. Purchases of Service | 9,167,491 | 7,889,996 |
| e. Investment Income |  |  |
| 1. Interest, dividends, etc. | 367,541,008 | 313,099,791 |
| 2. Realized/Unrealized gains (losses) | 694,887,277 | 1,240,713,990 |
| 3. Security lending and other gains (losses) | 3,462,298 | 3,965,163 |
| f. Other Income | 2,109,772 | 470,441 |
| g. Settlement Award | - | 1,024 |
| h. Total Revenues | \$ 1,670,347,310 | \$ 2,163,552,853 |
| Expenditures: |  |  |
| a. Benefit Payments | \$ 1,133,417,826 | \$ 1,084,818,276 |
| b. Refunds of Member Contributions | 50,288,373 | 44,396,305 |
| c. Investment Expenses | 61,663,978 | 57,020,360 |
| d. Administrative Expenses | 12,667,256 | 11,505,774 |
| e. Total Expenditures | \$ 1,258,037,433 | \$ 1,197,740,715 |
| End of Year Market Value | \$ 15,210,482,641 | \$ 14,798,917,909 |

The market value rate of return for the plan year is $6.92 \%$ on both an adjusted basis and an unadjusted basis. This return is based on a simplified dollar-weighted basis which may not match more precise time-weighted return calculations. PERA's cash flow is (3.94)\% as a percentage of average market value. A mature system such as PERA is expected to exhibit negative net cash flow as the number of members receiving benefit payments becomes a larger portion of total membership. There are 1.23 contributing active members for each member receiving a benefit as of June 30, 2018. We expect this measure to decline over future years and result in an increase in the percentage of negative cash flow.

## Section III: PERA Assets

The actuarial value of assets represents a "smoothed" value developed with the purpose of dampening the impact of market volatility on the assets used in determining valuation results. The actuarial value of assets has been calculated by spreading the recognition of excess investment income over four years. The amount of excess investment income in each year is the difference between expected actuarial value investment income and actual market value investment income. Table III-4 provides the calculation of the amount of the current year excess investment income to be phased-in as well as the amount of deferred investment income from the prior years.

Table III-4: Development of Actuarial Value of Assets as of June 30, 2018 (Total PERA with Legislative Division)

* The actuarial value adjustment is the difference between the actuarial value of assets derived in Table III-4 and the total fund balance at market value. It was allocated to each group in proportion to the Total PERA Fund Balance. Please note that the Legislature Division accounted for approximately $0.28 \%$ of the Total PERA Fund Balance and is detailed in a separate report.

## Section III: PERA Assets

The actuarial valuation assumes the rate of investment return on the assets of the Plan is $7.25 \%$ annually. This assumption is based upon the reasonable long-term expected return on the assets. In each year, the Fund will experience actuarial gains and losses due to the actual investment return of the assets. Table III-6 provides the calculation of the gain or loss due to the investment experience on the actuarial value of assets for the year ended June 30, 2018.

Table III-6: Actuarial Investment Gain (Loss) for the Year Ending June 30, 2018 (Dollar Amounts in Millions)

## Section III: PERA Assets

## Statutory Reserve Transfers

Each year following receipt of the report of the annual actuarial valuation, the excess, if any, of the actuarial present value of pensions and refunds being paid or likely to be paid to members and survivors over the balance in the retirement reserve fund (RRF) shall be transferred to the retirement reserve fund from the employers accumulation fund (EAF). Table III-7 shows the necessary transfer amounts.

Table III-7: Statutory Reserve Transfers as of June 30, 2018

| Division | Reported Fund Balances | Actuarial Present Value of Pensions Being Paid | Transfer |
| :---: | :---: | :---: | :---: |

| Total End of Year Market Value | \$ 15,168,116,441 |  |  |

The total actuarial present value of benefits is the value as of the valuation date of all future benefits expected to be paid to current members of the Fund. An actuarial cost method allocates each individual's present value of benefits to past and future years of service. The actuarial accrued liability includes the portion of the active member present value of benefits allocated to past service as well as the entire present value of benefits for retirees, beneficiaries and inactive members. The portion of the actuarial present value allocated to the future service of active members is called the present value of future normal costs. Table IV-1 presents the calculation and allocation of the actuarial present value of benefits.

Table IV-1: Calculation and Allocation of the Actuarial Present Value as of June 30, 2018

|  | Actuarial Accrued Liability | Present Value of Future Normal Cost | Total Actuarial Present Value |
| :---: | :---: | :---: | :---: |
| Active Members |  |  |  |

| Total for Retirees and |  |  |  |
| Beneficiaries | \$ 14,463,144,438 |  | \$ 14,463,144,438 |
| Total | \$ 21,313,451,183 | \$ 2,775,770,418 | \$ 24,089,221,601 |

Under the valuation funding method, an unfunded actuarial accrued liability (UAAL) exists to the extent that the actuarial accrued liability exceeds the actuarial value of assets as presented in Section III. The calculation of the UAAL by Division as of the valuation date is shown in Table IV-2 on the following page.

Table IV-2: Calculation of the Unfunded Actuarial Accrued Liability and Funded Ratio (Dollar Amounts in Millions)

|  | State General |  | State Police/ <br> Corrections |  | Municipal General |  | Municipal Police |  | Municipal Fire |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1. Actuarial Accrued Liability | \$ | 9,195.4 | \$ | 946.0 | \$ | 6,798.1 | \$ | 2,750.4 | \$ | 1,623.5 |
| 2. Actuarial Value of Assets |  | 5,799.9 |  | 1,232.0 |  | 5,184.8 |  | 2,058.4 |  | 977.8 |
| 3. Unfunded Actuarial Accrued Liability (1-2) |  | 3,395.5 |  | (286.0) |  | 1,613.3 |  | 692.0 |  | 645.7 |
| Funded Ratio (2 1 1) |  | 63.1\% |  | 130.2\% |  | 76.3\% |  | 74.8\% |  | 60.2\% |

Although the terminology used to describe the excess of PERA's actuarial accrued liability over the actuarial value of assets is call the "unfunded" actuarial accrued liability, the calculated annual contribution rates in the valuation include an annual amortization payment required to fully amortize the UAAL within 30 years. In some cases, the current statutory rates are less than these calculated rates.

The funded ratio is the ratio of the actuarial value of assets (Table III-2) divided by the actuarial accrued liability (Table IV-1) as of the valuation date. As of June 30, 2018, the funded ratio of PERA is $71.6 \%$ as compared to a ratio of $74.9 \%$ as of June 30 , 2017. The ratio is a commonly used measure of the funding progress and can be useful in reviewing the historical trend of a Fund's funding progress. Such a review should also consider the impact to this measure over the historical period due to changes to fund benefits, changes to the actuarial assumptions and methods, and the significant impact that investment experience can have on the ratio over short-term periods. We caution that no single "point in time" measure can provide a universal basis for comparing one plan's funded status to another.

The calculation of PERA's actuarial assets and liabilities requires the use of several assumptions concerning the future experience of PERA and its members. In each annual valuation, the latest year of actual experience is compared to that expected by the prior valuation. The differences are actuarial gains and losses which decrease or increase the UAAL. Table IV-3 provides the reconciliation of the UAAL.

Table IV-3: Reconciliation of the UAAL
(Dollar Amounts in Millions)

|  | State General | State Police/ <br> Corrections | Municipal General | Municipal Police | Municipal Fire |
| :---: | :---: | :---: | :---: | :---: | :---: |

[^3]Section IV of this report presented PERA's actuarial accrued liability as the portion of the present value of benefits allocated to past years of service. The portion of the active members' present value of benefits allocated to future years of service is funded through annual normal cost contributions comprised of both active member and employer contributions.

The annual required contribution rate is the percentage of valuation payroll necessary to fund the annual normal cost of the Fund and fully amortize the UAAL over 30 years in accordance with the Board's funding objectives. The calculated rate is expected to remain constant over the remaining amortization period and is provided in Table V-1.

| Fire Coverage Plans |  |  |
| Plan 1 | 9.50 \% | 11.40 \% |
| Plan 2 | 9.50 \% | 17.90 \% |
| Plan 3 | 9.50 \% | 21.65 \% |
| Plan 4 | 14.30 \% | 21.65 \% |
| Plan 5 | 17.70 \% | 21.65 \% |
| Weighted Average* | 17.55 \% | 21.55 \% |

* PERA financial records do not provide an asset breakdown by coverage plan which necessitates the use of a weighted average contribution rate for the purpose of comparing assets to the actuarial accrued liability and determining the financing period for the unfunded actuarial accrued liability. Contribution rates are weighted by payroll.

## Section VI: Additional Disclosure Information

The tables provided in this section present information relevant for the annual financial reporting of PERA. GASB Statement No. 67 required disclosure information will be provided in a separate supplemental report. Additional disclosure information is provided below.

Table VI-1: Schedule of Funding Progress

## Appendix B: Summary of Actuarial Assumptions and Methods

## Actuarial Cost Methods Used for the Valuation

An actuarial cost method is a procedure for allocating the actuarial present value of benefits and expenses to time periods. The method used for this valuation is known as the individual entry-age actuarial cost method and has the following characteristics:
(i) The annual normal costs for each individual active member are sufficient to accumulate the value of the member's pension at the time of retirement.
(ii) Each annual normal cost is a constant percentage of the member's year-by-year projected compensation.

The individual entry-age actuarial cost method allocates the actuarial present value of each member's projected benefits on a level basis over the member's compensation between the entry-age of the member and the expected exit ages. The expected annual administrative expenses are included in the determination of the actuarially determined contributions.

The portion of the actuarial present value allocated to the valuation year is called the normal cost. The portion of the actuarial present value not provided for by the actuarial present value of future costs is called the actuarial accrued liability. Deducting actuarial value of assets from the actuarial accrued liability determines the unfunded actuarial accrued liability. Unfunded actuarial accrued liability was amortized as a level percent of payroll over 30 years to determine the actuarial determined contribution. This period is consistent with the policy established by the Retirement Board in October 1996.

Active member payroll was projected to increase $3.00 \%$ per year for the purpose of determining the contribution needed to amortize the unfunded actuarial accrued liability. This estimate is consistent with the base rate of increase in salaries used to calculate actuarial present values.

The actuarial value of assets used for funding purposes is derived as follows: prior year actuarial value of assets is increased by contributions and expected investment income and reduced by refunds, benefit payments and expenses. To this amount $25 \%$ of the difference between expected and actual investment income for each of the previous four years is added.

## Appendix B: Summary of Actuarial Assumptions and Methods

## Actuarial Assumptions Used for the Valuation (effective with June 30, 2018 Valuation, except as otherwise noted)

Assumed Rate of Investment Return. 7.25\% per annum net of investment expenses. The administrative expenses are now loaded to the normal cost developed in each annual valuation.

Administrative Expenses. 0.50 \% of payroll.

Price Inflation. 2.50\% per annum, compounded annually.

Real Investment Return. 4.75\% over price inflation (4.00\% over wage growth). This is the expected rate of return (net of investment expenses) above the rate of price inflation.

Salary Increases. Salary increases occur in recognition of (i) individual merit and longevity, (ii) inflation-related depreciation of the purchasing power of salaries, and (iii) other factors such as productivity gains and competition from other employers for personnel. Sample rates follow:

|  | Annual Rates of Salary Increase for Sample Years of |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Attributable to: | 1 | 5 | 10 | 15 | 20 |
| General Increase in Wage Level Due to: |  |  |  |  |  |
| Inflation | $2.50 \%$ | $2.50 \%$ | $2.50 \%$ | $2.50 \%$ | $2.50 \%$ |
| Other Factors | 0.75 | 0.75 | 0.75 | 0.75 | 0.75 |
|  |  |  |  |  |  |
| Increase Due to Merit/Longevity: |  |  |  |  |  |
| State General | 5.00 | 1.25 | 0.50 | 0.00 | 0.00 |
| State Police | 10.25 | 5.75 | 1.25 | 1.25 | 1.25 |

| Municipal Police | 7.75 | 2.75 | 1.50 | 0.75 | 0.75 |
| Municipal Fire | 7.75 | 2.75 | 1.50 | 1.25 | 1.25 |

[^4]
## Appendix B: Summary of Actuarial Assumptions and Methods

In the following schedules, State Corrections includes Adult Corrections Officers, Juvenile Corrections Officers and Municipal Detention Officers unless otherwise noted.

Mortality Assumption. The mortality assumptions are based on the RPH-2014 Blue Collar mortality table with female ages set forward one year. Future improvement in mortality rates is assumed using $60 \%$ of the MP-2017 projection scale generationally. For non-public safety groups, $25 \%$ of in-service deaths are assumed to be duty related and $35 \%$ are assumed to be duty-related for public safety groups.

Rates are shown for sample ages in the following schedule. Note that sex distinct mortality rates are used solely for determining the funded status and contribution rate adequacy. All benefit amounts are based on merged gender mortality rates.

| Sample Mortality Rates (Base Rates) |  |  |  |  |  |  |  |  |

[^5]
## Appendix B: Summary of Actuarial Assumptions \& Methods

Rates of Withdrawal from Active Membership. The rates are used to measure probabilities of active members terminating for a reason other than disability or death. The rates do not apply to members who are within the retirement rate range. Assumptions for State General and Municipal General are gender distinct and both based on age and service. Assumptions for all other plans are not gender distinct and are service related only; these rates do not vary by age.

| State General Males |  |  |  |  |  |  |

## Miscellaneous and Technical Assumptions

| Marriage Assumption: | $100 \%$ of males and $100 \%$ of females are assumed to be married <br> for purposes of death-in-service benefits. Male spouses are <br> assumed to be three years older than female spouses. It is assumed <br> that spouses have no eligible children for purposes of death-in- <br> service benefits. |
| :--- | :--- |
| Pay Increase Timing: | Beginning of plan year. This is equivalent to assuming that <br> reported pays represent amounts paid to members during the year <br> ended on the valuation date. |
| Decrement Timing: | All decrements are assumed to occur at the beginning of the plan <br> year. |
| Eligibility Testing: | Eligibility for benefits is determined based upon the age nearest <br> birthday and service nearest whole year on the date the decrement <br> is assumed to occur. |
| Decrement Relativity: | Decrement rates are used directly from the experience study, <br> without adjustment for multiple decrement table effects. |
| Decrement Operation: | Neither disability nor withdrawal decrements operate during <br> retirement eligibility. |
| Lncidence of Contributions: | Retiree liabilities were increased by 1\% to account for the pop-up <br> provision. |
| Contributions are assumed to be received continuously throughout |  |
| the year based upon the computed percent of payroll shown in this |  |
| report and the actual payroll payable at the time contributions are |  |
| made. |  |

## Appendix B: Summary of Actuarial Assumptions \& Methods

## Definitions of Technical Terms

Actuarial Accrued Liability. The difference between the actuarial present value of future benefits payments and the actuarial present value of future normal costs.

Actuarial Cost Method. A mathematical procedure for allocating the dollar amount of the "actuarial present value of future benefit payments" between future normal cost and actuarial accrued liability.

Actuarial Present Value. The amount of funds currently required to provide a payment or series of payments in the future. It is determined by discounting future payments at predetermined rates of interest and by probabilities of payment.

Amortization. Paying off an interest-discounted amount with periodic payments of interest and principal - as opposed to paying off with a lump sum payment.

Experience Gain (Loss). The difference between actual actuarial costs and anticipated actuarial costs - during the period between two valuation dates.

Normal Cost. The actuarial cost allocated to the current year by the actuarial cost method.

Unfunded Actuarial Accrued Liability. The difference between the actuarial accrued liability and the actuarial value of assets. Sometimes referred to as "unfunded accrued liability."

## Appendix C: Summary of Plan Provisions

## Benefit Tier

Effective July 1, 2013, Senate Bill 27 establishes two tiers of benefits under each PERA coverage plan:

## Tier 1

- Current active members employed by a PERA affiliate on June 30, 2013
- Inactive members who did not receive a refund and have employee contributions on account on June 30, 2013
- Currently retired or will retire on or before June 30, 2013

Note: State and Municipal General members hired between July 1, 2010 and June 30, 2013 are grandfathered into Tier 1 coverage plans.

## Tier 2

- Active members first hired on or after July 1, 2013
- Members who received a refund of employee contributions on or before June 30, 2013 and return to work for a PERA affiliate on or after July 1, 2013

## Normal Retirement Eligibility Conditions

## Tier 1

Applicable to all members:

- Any age with 25 or more years of credited service; or
- Age 60 or older with 20 or more years of credited service; or
- Age 61 or older with 17 or more years of credited service; or
- Age 62 or older with 14 or more years of credited service; or
- Age 63 or older with 11 or more years of credited services or
- Age 64 or older with 8 or more years of credited service; or
- Age 65 or older with 5 or more years of credited service.

Applicable to Municipal Police (Plans 3, 4, \& 5) and Municipal Fire (Plans 3, 4, \& 5) members:

- Any age with 20 or more years of credited service

## Appendix C: Summary of Plan Provisions

## Normal Retirement Eligibility Conditions (cont.)

## Tier 2

Applicable to State General and Municipal General (Plan 1-4) members:

- Age 65 or older with 8 or more years of credited service; or
- Any age if the sum of the member's age and years of credited service equals at least 85, provided member has at least 8 years of credited service.

Applicable to State Police Officers, Adult Correctional Officers, Peace Officers, Juvenile Correctional Officers, Municipal Police, Municipal Fire, and Municipal Detention Officers:

- Age 60 or older with 6 or more years of credited service; or
- Any age with 25 or more years of credited service

## Normal Retirement Pension Amount

The amount of normal retirement pension is based on:

- Final average salary:
o For Tier 1 members, the average of salary for the 36 consecutive months of credited service producing the largest average;
o For Tier 2 members, the average of salary for the 60 consecutive months of credited service producing the largest average;
- Credited service (years and months); and the
- Coverage plan.

## Appendix C: Summary of Plan Provisions

The pension accrual factor and maximum pension, as a percent of final average salary, under each coverage plan are shown below:

| Coverage Plan | Pension Factor <br> Per Year of Credited Service |  | Maximum Pension as Percent of Final Average Salary |
| :---: | :---: | :---: | :---: |
|  | Tier 1 | Tier 2 | Tier 1 \& Tier 2 |
| State General Member Coverage Plan 3 | 3.0\% | 2.5\% | 90\% |
| Peace Officers Coverage Plan 3 | 3.0 | 3.0 | 90 |
| State Police and Adult |  |  |  |
| Corrections Officers Member Coverage Plan 1 | 3.0 | 3.0 | 90 |
| Hazardous Duty (Juvenile Corrections Officer) Coverage Plan 2 | 3.0 | 3.0 | 90 |
| Municipal General Member <br> Coverage Plan 1 | 2.0 | 2.0 | 90 |
| Coverage Plan 2 | 2.5 | 2.0 | 90 |
| Coverage Plan 3 | 3.0 | 2.5 | 90 |
| Coverage Plan 4 | 3.0 | 2.5 | 90 |
| Municipal Detention Officer Coverage Plan 1 | 3.0 | 3.0 | 90 |
| Municipal Police Member |  |  |  |
| Coverage Plan 1 | 2.0 | 2.0 | 90 |
| Coverage Plan 2 | 2.5 | 2.0 | 90 |
| Coverage Plan 3 | 2.5 | 2.0 | 90 |
| Coverage Plan 4 | 3.0 | 2.5 | 90 |
| Coverage Plan 5 | 3.5 | 3.0 | 90 |
| Municipal Fire Member |  |  |  |
| Coverage Plan 1 | 2.0 | 2.0 | 90 |
| Coverage Plan 2 | 2.5 | 2.0 | 90 |
| Coverage Plan 3 | 2.5 | 2.0 | 90 |
| Coverage Plan 4 | 3.0 | 2.5 | 90 |
| Coverage Plan 5 | 3.5 | 3.0 | 90 |

## Appendix C: Summary of Plan Provisions

## Vested Termination of Membership (Employment)

Termination of employment and membership with at least 5 years of credited service for Tier 1 members. For Tier 2 State General and Municipal General (Non-Public Safety) members, vesting is 8 years. Tier 2 Public Safety members (State Police Officers, Adult Correctional Officers, Peace Officers, Juvenile Correctional Officers, Municipal Police, Fire, Detention Officers) are vested with at least 6 years of credited service. Accumulated member contributions must be left on deposit. Payment of the pension is available upon eligibility for normal retirement. In addition, certain disability and survivor pension provisions apply.

## Normal and Optional Forms of Payment

The normal form of payment is for life. Optional contingent survivor beneficiary forms of payment are available on an actuarial equivalent basis. Total pension payments can never be less than the member's accumulated contributions.

## Survivor Pensions - Death in the Line of Duty

Pensions are paid to the eligible spouse and eligible children if survivor coverage has not been elected under the Elective Survivor Pension Beneficiary provision. The amount of pension payable for life to an eligible spouse is the greater of 1) $50 \%$ of final average salary or 2 ) the accrued normal retirement pension reduced for option B election. The amount of pension payable to each eligible child is an equal share of $25 \%$ of final average salary. If there is not an eligible spouse or the eligible spouse dies, and if there are 2 or more eligible children, the amount of pension payable to each eligible child is an equal share of $50 \%$ of final average salary. An eligible child is an unmarried natural or adopted child who is under age 18. A child's pension terminates upon death, marriage or reaching age 18. The pension of any remaining eligible children is recalculated whenever a child's pension is terminated.

## Appendix C: Summary of Plan Provisions

## Survivor Pensions - Death Not in the Line of Duty

Requires 5 years of credited service for Tier 1 members, 6 years for Tier 2 Public Safety, and 8 years for Tier 2 Non-Public Safety. Benefit applies to members and vested former members who have not elected coverage under the Elective Survivor Pension Beneficiary provision. Pensions are paid to an eligible spouse OR eligible children. The amount of pension payable for the life of an eligible spouse is the greater of 1) $30 \%$ of final average salary or 2 ) accrued normal retirement pension reduced for option B election. An eligible child pension is paid if there is not an eligible spouse or following the death of an eligible spouse. The pension is payable to each child in equal shares. An eligible child is an unmarried natural or adopted child who is under age 18. A child's pension terminates upon death, marriage or reaching age 18. The pension of any remaining eligible children is recalculated whenever a child's pension is terminated.

## Elective Survivor Beneficiary Pension

Applicable to Tier 1 members with 5 years of credited service, Tier 2 Public Safety with 6 years, and Tier 2 Non-Public Safety with 8 years. Also applicable to vested former members who have elected option B and designated a survivor pension beneficiary who has an insurable interest. The amount of pension is the amount of accrued normal retirement pension under optional form of payment B ( $100 \%$ continuation to beneficiary).

## Disability Retirement

Applicable to Tier 1 members with 5 years of credited service, Tier 2 Public Safety with 6 years, and Tier 2 Non-Public Safety with 8 years. Also applicable to vested former members. The credited service requirement is waived if the disability is incurred in line of duty. The amount of disability pension is the accrued normal retirement pension at time of disability retirement. If the disability is in line of duty, the credited service used is the amount that would have been acquired when first eligible for normal retirement.

## Appendix C: Summary of Plan Provisions

## Cost-of-Living Increases

For Tier 1 Members, pensions are increased each July 1 by 2\% subject to the following eligibility periods:

- If member retires prior to July 1, 2014, Cost-of-Living Adjustment (COLA) is payable after retirement has been in effect for at least 2 full calendar years.
- If member retires on or after July 1, 2014 but prior to July 1, 2015, COLA is payable after retirement has been in effect for at least 3 full calendar years.
- If member retires on or after July 1, 2015 but prior to July 1, 2016, COLA is payable after retirement has been in effect for at least 4 full calendar years.
- If member retires on or after July 1, 2016, COLA is payable after retirement has been in effect for at least 7 full calendar years.
- If retired on account of disability or if at least age 65 , the waiting period is reduced to 1 full calendar year.

For Tier 2 Members, pensions are increased each July 1 by 2\% subject to the following eligibility periods:

- COLA is payable after retirement has been in effect for at least 7 full calendar years.
- If retired on account of disability or if at least age 65 , the waiting period is reduced to 1 full calendar year.

For certain Tier 1 and Tier 2 retirees, pensions are increased each July 1 by $2.5 \%$ subject the eligibility periods listed above, provided the conditions below are met:

- Retirees who retired with at least 25 years of service and whose annual pension is $\$ 20,000$ or less.
- Disabled retirees whose annual pension is $\$ 20,000$ or less.

## Service Credit

Tier 1 Members in the State Police and Adult Corrections Officers Coverage Plan and members in the Municipal Detention Officers Coverage Plan receive 1.2 years of credited service for each year of service rendered. All other members receive 1.0 year of credited service for each year of service rendered.

## Appendix C: Summary of Plan Provisions

## Contributions by Members and Employers

Contributions by members and affiliated public employers are at the following rates shown below.

| Coverage Plan | Percent of Salary <br> Member* | Contribution Rate <br> Employer |
| :--- | :---: | :---: |
| State General Member Coverage Plan 3 | $8.92 \%$ | $16.99 \%$ |
| State Police Member and Adult Correctional |  |  |
| $\quad$ Officer Member Coverage Plan 1 | 9.10 | 25.50 |
| Hazardous Duty (Juvenile Corrections) Member |  |  |
| $\quad$ Coverage Plan 2 | 6.28 | 26.12 |
| Municipal General Member Coverage Plan 1 | 8.50 | 7.40 |
| Municipal General Member Coverage Plan 2 | 10.65 | 9.55 |
| Municipal General Member Coverage Plan 3 | 14.65 | 9.55 |
| Municipal General Member Coverage Plan 4 | 17.15 | 12.05 |
| Municipal Detention Officer Member | 18.15 | 17.05 |
| $\quad$ Coverage Plan 1 | 8.50 | 10.40 |
| Municipal Police Member Coverage Plan 1 | 8.50 | 15.40 |
| Municipal Police Member Coverage Plan 2 | 8.50 | 18.90 |
| Municipal Police Member Coverage Plan 3 | 13.85 | 18.90 |
| Municipal Police Member Coverage Plan 4 | 17.80 | 18.90 |
| Municipal Police Member Coverage Plan 5 |  | 11.40 |
| Municipal Fire Member Coverage Plan 1 | 9.50 | 17.90 |
| Municipal Fire Member Coverage Plan 2 | 9.50 | 21.65 |
| Municipal Fire Member Coverage Plan 3 | 9.50 | 21.65 |
| Municipal Fire Member Coverage Plan 4 | 14.30 | 21.65 |
| Municipal Fire Member Coverage Plan 5 | 17.70 |  |

Interest is credited to member contributions on each June 30 at the rates set annually by the Retirement Board. Effective July 1, 2012, the interest crediting rate for member contributions is 2\%.

[^6]
[^0]:    * Beginning with the 2016 valuation, annual payroll reflects the change from total to pensionable earnings.

[^1]:    * Beginning with the 2016 valuation, annual payroll reflects the change from total to pensionable earnings.

[^2]:    * Impact on Contribution Rate based on 30 year period and valuation payroll.

[^3]:    * Impact on Contribution Rate based on 30 year period and valuation payroll.

[^4]:    * Includes Municipal Detention Officers

[^5]:    * Rates are $70 \%$ at 30 years of service for all ages except State General and Municipal General Tier 2 uses $75 \%$ at 36 years of service and Municipal Police Tier 1 uses $75 \%$ at 26 years of service.
    ** Rates for State Police Tier 1 are $45 \%$ at 27 years of service, $55 \%$ at 28 years of service, and $65 \%$ at 29 years of service.
    *** Rates for Municipal Police Tier 1 are $35 \%$ at 21 years of service, $40 \%$ at 22 years of service, and $45 \%$ at 23 years of service, $55 \%$ at 24 years of service, and $65 \%$ at 25 years of service.
    *** Rates for Municipal Police Tier 2 are $35 \%$ at 25 years of service, $40 \%$ at 26 years of service, and $45 \%$ at 27 years of service, $55 \%$ at 28 years of service, and $65 \%$ at 29 years of service.

[^6]:    * For employees whose annual salary is $\$ 20,000$ or less, the employee contribution rates shown above are reduced by 1.5\%
