Introduction

Office of the New York State Comptoller **Alan G. Hevesi** <u>New York State and Local Retirement System</u> Employees' Retirement System Police and Fire Retirement System 110 State Street, Albany, New York 12244-0001

September 30, 2004

I am pleased to present this Comprehensive Annual Financial Report (CAFR) for the New York State and Local Retirement System (the System), for the fiscal year ended March 31, 2004. The System is responsible for both the accuracy of the presented information and the completeness and fairness of the presentation, including all disclosures made within this report.

This CAFR was prepared to conform with the principles of governmental accounting and reporting set forth by the Governmental Accounting Standards Board. The System's transactions are reported on the accrual basis of accounting. Sufficient internal accounting controls exist to provide reasonable assurance regarding the safekeeping of assets and fair presentation of the financial statements and supporting schedules.

The CAFR is divided into five sections:

- Introduction Section contains this letter of transmittal, an organization chart, the Deputy Comptroller's report, and a summary of System highlights
- Financial Section contains the Independent Auditors' Report, Management's Discussion & Analysis, the System's financial statements, and required supplementary information
- Investment Section contains a report on investment activity, investment policies, investment results, and various investment schedules
- Actuarial Section contains an Actuary's Certification Letter and the results of the annual actuarial valuation
- Statistical Section contains significant data pertaining to the System

The New York State Employees' Retirement System (ERS) was established in 1921. In 1966, the State Legislature created the Police and Fire Retirement System (PFRS). Together, they make up the System. The assets of ERS and PFRS are held in the Common Retirement Fund and managed by the Division of Pension Investment and Cash Management.

The System offers retirement benefits for members who reach specific ages or have completed a specified number of years of service, depending on the system and plan they are enrolled in. At the end of fiscal year 2003-04, there were a total of 970,078 members, retirees and beneficiaries, and 2,985 participating employers.

Funding

The System's funding objective is to meet long-term benefit promises through employer contributions that remain level as a percent of member payroll. Annual employer contributions are determined on an actuarial basis and actual employer contributions are the greater of a minimum contribution of 4.5 percent of member payroll or actuarial contributions. Employer contributions are returning to their designed long-term levels after many years of very small contributions. The System remains well-funded and a detailed discussion of its funding is provided in the Actuarial Section of this report.

Investments

To meet our obligations to pensioners, members and beneficiaries, the Fund's assets are diversified over a number of investments, and a host of different investment strategies are employed to control risk. In the past year, the Fund returned 28.83 percent, dramatically exceeding the 20-year annual average of 11.97 percent.

Additionally, to maximize the value of stock owned by the Fund, I have been at the forefront of corporate reform, working with various companies and corporate boards on a host of different issues ranging from environmental and labor principles to accounting and executive compensation standards.

Accounting Practices

My staff is responsible for identifying control objectives relating to the protection of assets and ensuring that all transactions are properly recorded to permit the preparation of financial statements in accordance with generally accepted accounting principles. We are responsible for the design, implementation and maintenance of adequate internal controls to provide reasonable assurance that control objectives are achieved. The internal control system includes the organization plan, the appropriate segregation of duties and responsibilities, sound practices in the performance of duties, and personnel with capabilities commensurate with their responsibilities. We believe the internal controls in effect during the fiscal year ended March 31, 2004, adequately safeguard the System's assets and provide reasonable assurance regarding the proper recording of financial transactions.

GASB Statement No. 34 requires that we provide a narrative introduction, overview and analysis of the System's financial activities in the form of a Management's Discussion and Analysis (MD&A). This Letter of Transmittal is designed to complement the MD&A and should be read in conjunction with it. The MD&A can be found in the Financial Section, immediately following the report of the independent auditor.

Major Initiatives

In the past year, we have undertaken several major initiatives to improve service to our members. Highlights of these initiatives are included in the report from the Deputy Comptroller for the Retirement System.

Acknowledgements

This report was prepared by the Divisions of Retirement Services and Pension Investment and Cash Management. It is intended to provide complete and reliable information as a basis for making management decisions, for determining compliance with legal provisions, and determining responsible stewardship of the System's assets.

I would like to take this opportunity to express my gratitude to my staff and advisors who work so diligently to assure the successful operation of the System.

Sincerely,

1 Heven

Alan G. Hevesi

New York State and Local Retirement System Organizational Chart

REPORT FROM DEPUTY COMPTROLLER LAURA ANGLIN

Under the leadership of State Comptroller Alan Hevesi, the Division of Retirement Services oversees and administers all aspects of the New York State and Local Retirement System (NYSLRS).

During the past year, we expanded our efforts to improve service levels and standards for members, retirees and employers. Below are some of the major initiatives we undertook in fiscal year (FY) 2003-04.

New Projects

Loan Deferment Program Implemented for Military Members

Comptroller Hevesi directed us to implement provisions of the Patriot Plan, enabling members on active duty to temporarily suspend their loan repayments until they return. If members chose to do this, their loans would not default while on active duty, interest would continue to accrue, and the maximum fiveyear repayment period would be extended by the length of time served on military duty. In addition, if loans were granted prior to a member entering active military service, the interest rate was reduced to six percent while the member was on active military duty, providing that the rate was higher at the loan's inception.

Information and Options for Members Regarding New IRS Regulations Affecting Loans

On January 1, 2004, new Internal Revenue Service (IRS) regulations went into effect changing the method for determining the taxability of refinanced loans granted by us. While members could still refinance existing loans with new ones, the new IRS calculation to determine what portion of the loan was taxable could result in a higher amount being subject to Federal income tax.

To minimize these taxes, we allow members to take out a new loan and have it treated separately, so each loan has its own minimum repayment amount, repayment period, interest charges and loan insurance premium. Members can now choose between re-financing and taking multiple loans. The IRS changes required us to launch a major informational campaign to inform our members about the new law. Letters and special bulletins were sent to employers requesting they be distributed to employees, information was posted on the website, a special e-mail was sent to all those on the E-News mailing list, and our automated information line (IVR) was changed and updated.

Internet Reporting Programs for Employers

We are dedicated to strengthening our partnership with employers. One way we do this is by offering programs to make employers' jobs easier. Several years ago, we created the Retirement Internet Reporting (RIR) program, allowing employers to report their employees' salary and service information via the Internet. The program was the first one of its kind among public retirement systems in the country. At the end of FY 2004, 717 employers were using the service, doubling the 343 users in FY 2003.

With the success of RIR, we launched another Internet-based program for employers, the Retiring Employees Acknowledgement Program (REAP). This program provides e-mail notification to employers when their employees retire and offers employers a secure server to submit final salary, vacation and sick leave information online. Employers have already given us positive feedback on this latest Internet reporting program.

Redesigned Pre-Retirement Seminars and Presentations

We redesigned our pre-retirement seminars for both ERS and PFRS members. Employers can now request custom-designed presentations for their employees within five years of retirement. This enables us to create and bring a tailor-made seminar presentation to locations throughout the State. We work with employers to coordinate the topics and issues and provides benefit projections and consultations for employees when requested.

Multi-Media Pre-Retirement Planning

We produced and distributed our "Preparing for Retirement" multi-media presentation. The presentation features seven short video segments filled with information members need to know before they retire, such as how to receive service credit and how to properly fill out their retirement application. The video is available on our website, along with a slide show and text version of the presentation. CD and VHS copies of the presentation have also been made available to employers' personnel offices.

On-Going Projects

In addition to these new initiatives, ongoing programs enable us to improve our service to members. The following is an update on continuing initiatives and programs.

Consultations By Appointment Provide Better Service

Based on positive feedback from members, we expanded our "appointments only" policy to more of our 16 consultation sites throughout the State. By the end of FY 2004, almost half of our consultation sites required appointments for those who wanted personal consultations. The policy cut down on wait times for members and helped Information Representatives be better prepared, thereby providing more rewarding consultation experiences for members. We also extended the number of days some of the consultation sites were open based on the traffic at certain sites.

Automated Information Line (IVR) Enhancements

The number of members using the IVR line (866-805-0990) continued to increase. During FY 2004, 935,789 calls were placed to the automated menu, up from 864,274 in the previous fiscal year. Of these, 443,543 were relayed to our Call Center, up from 427,878 in the previous fiscal year.

In addition, we continued to expand the services and capabilities of our IVR line. In FY 2004, a menu dedicated to Police and Fire Retirement System members was added, as well as options for those seeking information about the Patriot Plan and new IRS regulations involving our loan program. A membership information line on the IVR for employers was also launched. It enables employers to dial into the IVR, enter identifying employer and employee information and determine if an employee is already a member of ERS or PFRS. They are given the member's registration number, date of birth, tier status and contributory rate, if any. Correspondence is then automatically sent to the employer the following day, confirming information provided by the IVR line. Employers can then include current members on monthly reports right away, eliminating the need to submit adjustment forms.

E-News – Keeps Members Informed via E-mail

In FY 2003, we launched an electronic newsletter, E-News, which focused on the latest news for members and employers. By the end of FY 2003, approximately 16,300 members and employers were on the E-News e-mail list. At the end of FY 2004, the mailing list reached 22,628.

E-News has become an important part of how we communicate with members and employers, especially when crucial information must get to members and employers in a timely manner.

Website Retirement Benefit Calculator – A Member Favorite

The Retirement Benefit Calculator continues to be one of our most popular services on our website. It allows members to estimate their pension by entering different retirement dates, service credit and final average salary figures. In FY 1999, there were 11,207 visitors to the calculator; in FY 2004, there were 192,288 hits.

A Look Ahead

While we continue to improve our existing customer service-focused programs, we look to the future with excitement. Work has already begun on a plan we call "Transforming NYSLRS," the goal of which is to dramatically improve our service levels. Some of the Transforming NYSLRS programs we are currently working on include:

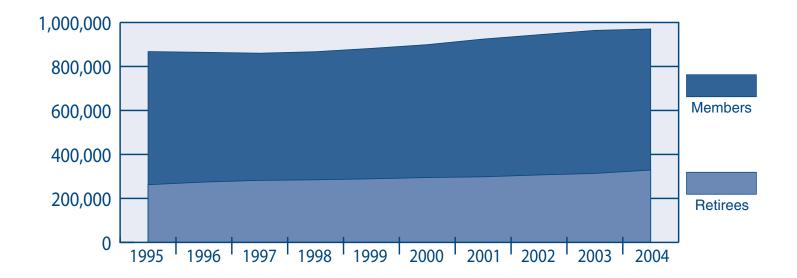

- A Business Process Redesign program that will improve the way we do business and upgrade the core technologies we rely on to provide better service.
- □ A web-based self-service program that will enable members and pensioners to access their personal information via the Internet.
- Developing an Employer Partnership plan designed to better understand employers' needs and provide additional services to make their retirement system-related tasks easier to manage.
- □ A scanning and imaging project that will speed up our record filing and retrieval process, and decrease our reliance on paper documents.
- Expanding the function of the automated information line to include providing benefit projections for members.
- □ A pilot webcasting program whereby members will be able to participate in "live" and interactive retirement presentations from their desks, via the Internet.
- Preparing and distributing information kits tailored for those important segments of our membership: new members, established members and those preparing to retire. The kits include booklets and CDs with video and other multi-media content.
- Continuing to survey more and more of our membership on a variety of topics to learn how we can better improve our services and communication with them.

Members and Retirees

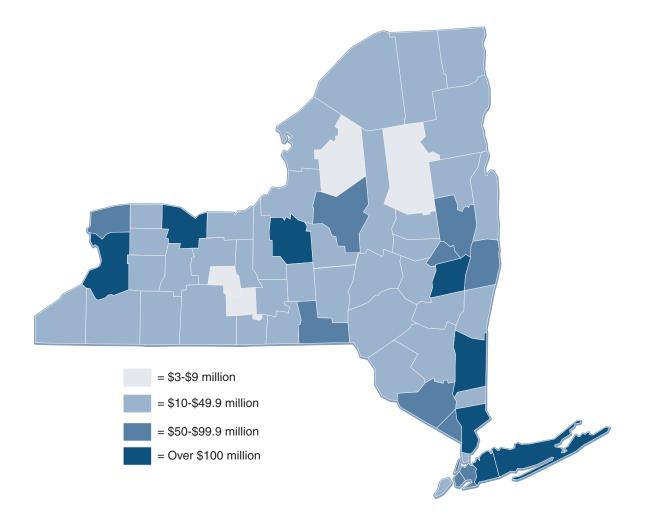

Overall membership in NYSLRS exceeds 970,000. This includes 641,721 members and 328,357 retirees and beneficiaries. Both of these numbers continue to climb, with the number of retirees increasing more quickly than members. For example, in 1990, retirees represented 26 percent of the System's members. In FY 2004, that number rose to approximately 34 percent.

The value of the pension fund's investments at the end of the fiscal year was \$119.2 billion.

Benefit payments continue to rise, reflecting improvements in final average salaries over the past decades, cost of living adjustment (COLA) payments and benefit improvements enacted over the years. For example, in 1994, benefit payments were approaching \$2.4 billion, while this year's payments totaled more than \$5.3 billion.

Of the 328,357 retirees and beneficiaries in the System, 257,302 (78 percent) remain New York State residents. As such, benefit payments approaching \$4.3 billion this year alone reaches the State's communities and businesses, representing the System's greatest impact on the State's economy.

INDEPENDENT AUDITORS' REPORT

Trustee New York State and Local Retirement System:

We have audited the accompanying statement of plan net assets of the New York State and Local Retirement System (the "System") as of March 31, 2004, and the related statement of changes in plan net assets for the year then ended. These financial statements are the responsibility of the management of the System. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, such financial statements present fairly, in all material respects, the plan net assets of the System as of March 31, 2004, and the changes in plan net assets for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The Management's Discussion and Analysis and 2004 and 2003 Required Supplementary Information as listed in the foregoing Table of Contents is not a required part of the basic financial statements but is supplementary information required by the Governmental Accounting Standards Board. This supplementary information is the responsibility of the System's management. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the 2004 and 2003 supplementary information. However, we did not audit the information and do not express an opinion on it. The Required Supplementary Information for the years ended March 31, 1999 through 2002 were reported on by other auditors whose report stated that they did not audit this information and did not express an opinion on it.

The introduction, investment, actuarial and statistical sections of this report have not been subjected to the auditing procedures applied in our audit of the 2004 basic financial statements and, accordingly, we express no opinion on them.

Deloute & Touche Lip

July 7, 2004

MANAGEMENT'S DISCUSSION AND ANALYSIS

The following overview of the financial activity of the New York State and Local Retirement System (the "System") for the fiscal year ended March 31, 2004 is intended to provide the reader with an analysis of the System's overall financial position. This Management's Discussion and Analysis ("MD&A") should be read in conjunction with the basic financial statements of the System which follow.

Financial Highlights

- □ The net assets of the System held in trust to pay pension benefits were \$120,799 million as of March 31, 2004. This amount reflects an increase of \$23,426 million from the prior fiscal year. This change is primarily the result of the net appreciation of the fair value of the investment portfolio.
- □ The System's funding objective is to meet longterm benefit obligations through member and employer contributions and investment earnings.

Overview of the Financial Statements

The financial statements consist of the statement of plan net assets, statement of changes in plan net assets, and the notes to the financial statements. The required supplementary information that appears after the notes to the financial statements are not a required part of the financial statements but present supplementary information required by the Government Accounting Standards Board.

The statement of plan net assets includes information about the System's assets, liabilities and net assets as of the close of the System's fiscal year. This statement provides information about the fair value and composition of net assets.

The statement of changes in plan net assets presents the changes to the System's net assets for the fiscal year including investment income and appreciation from the investment portfolio and contributions from members and employers. Benefits paid and administrative expenses paid by the System are included under the deductions section of the statement. The notes to the financial statements and the required supplementary information are an integral part of the basic financial statements and provide additional information about the Plans of the System, significant accounting policies and contributions and reserves to the System.

The required supplementary schedules include information about the aggregate actuarial funding method, which is utilized by the System to maintain a fully funded System, the cost of living adjustment made available to pensioners and significant actuarial assumptions used to determine employer contributions. In addition, the funding progress, with the actual employer contributions for the previous six years, is reported.

Analysis of Overall Financial Position of the System

The purpose of the System's investments is to provide for the long-term growth, while also insuring a reliable cash flow that meets the funding requirements of the near-term pension obligation. To achieve these goals, the investments are efficiently allocated to a variety of asset types and strategies so that they meet the current funding needs and future growth requirements of the pension liability. Equity investments are included for their long-term return and growth characteristics, while fixed income assets are added to the allocation for their ability to control investment risk and provide for a reliable cash flow that meets the funding requirements of the pension payments. Statement of Plan Net Assets as of March 31, 2004 as compared to March 31, 2003 follows:

		(In thousands)		
	2004	2003	Dollar Change	Percentage Change
Assets: Investments Securities lending collateral, invested Receivables and other assets Total assets	\$119,245,006 14,846,332 <u>2,350,290</u> <u>136,441,628</u>	\$95,598,305 9,037,112 <u>2,578,299</u> <u>107,213,716</u>	\$23,646,701 5,809,220 (228,009) 29,227,912	24.7% 64.3% (8.8)% 27.3%
Liabilities: Securities lending collateral, due Other liabilities Total liabilities	14,846,332 <u>796,290</u> 15,642,622	9,037,112 <u>803,935</u> 9,841,047	5,809,220 (7,645) 5,801,575	64.3% (1.0)% 59.0%
Net assets held in trust for pension benefits	<u>\$120,799,006</u>	<u>\$97,372,669</u>	<u>\$23,426,337</u>	24.1 %

The plan net assets of the System totaled \$120,799 million as of March 31, 2004, an increase of \$23,426 million from the prior fiscal year.

The table below shows the detail of the invested assets portion of all plan assets. These invested assets totaled \$119,245 million as of March 31, 2004.

		(In thousands)		
Investment Category	2004	2003	Dollar Change	Percentage Change
Short-term investments	\$1,879,098	\$771,160	\$1,107,938	143.7%
Government bonds	19,922,443	21,732,943	(1,810,500)	(8.3)%
Corporate bonds	9,768,784	10,286,738	(517,954)	(5.0)%
Domestic stocks	59,265,786	41,566,093	17,699,693	42.6%
International stocks	15,610,652	9,790,937	5,819,715	59.4%
Alternative investments	6,738,800	5,564,864	1,173,936	21.1%
Real property	4,529,429	4,161,973	367,456	8.8%
Mortgage loans	<u> </u>	<u>1,723,597</u>	<u>(193,583</u>)	(11.2)%
Total investments		<u>\$95,598,305</u>	<u>\$23,646,701</u>	24.7%

The largest contributor to the dollar increase in invested assets of \$23,647 million was the domestic equity assets, which represented approximately 50% of the total investments and increased \$17,700 million from the previous fiscal year. International equity assets also contributed to the increase. Representing approximately 13% of the total investments, international equity assets increased \$5,820 million from the previous fiscal year. The increase in these assets is primarily attributable to the positive performance in world equity markets. Statement of Changes in Plan Net Assets for the year ending March 31, 2004 as compared to year ending March 31, 2003 follows:

		(In thousands)		
	2004	2003	Dollar Change	Percentage Change
Additions: Net investment income (loss) Total contributions Net additions	\$27,334,752 <u>1,585,474</u> <u>28,920,226</u>	\$(11,235,815) <u>980,853</u> <u>(10,254,962</u>)	\$38,570,567 <u>604,621</u> <u>39,175,188</u>	343.3 % 61.6 % 382.0 %
Deductions: Total benefits paid Administrative expenses Net deductions	(5,424,277) (<u>69,612</u>) (<u>5,493,889</u>)	(5,029,766) (<u>67,496)</u> (<u>5,097,262</u>)	(394,511) (<u>2,116)</u> (<u>396,627</u>)	7.8 % 3.1 % 7.8 %
Net increase (decrease)	23,426,337	(15,352,224)	38,778,561	252.6 %
Net assets held in trust for pension benefits, beginning of year	<u>97,372,669</u>	<u>112,724,893</u>	<u>(15,352,224</u>)	(13.6)%
Net assets held in trust for pension benefits, end of year	<u>\$120,799,006</u>	<u>\$97,372,669</u>	<u>\$23,426,337</u>	24.1 %

The increase in net investment income is due to the positive performance in domestic and international equities.

The increase in total contributions is primarily due to Chapter 49 of the Laws of 2003, which required employers to contribute 4.5% of payroll.

The increase in total benefits paid is due to additional retirees as a result of the retirement incentive program and the annual cost of living adjustment to benefits paid.

Economic Factors and Rates

As displayed by the tables and related narrative discussion, during the System's 2003-2004 fiscal year, investments (particularly those in the equity category) increased as a result of economic and market conditions. The Common Retirement Fund experienced significant, positive returns for the year with a total return of 28.83%. This year's investment performance reflects economic growth and rising corporate profitability around the globe. The Fund's performance also benefited from the broad-based rally in the world's equity markets. The domestic equity portfolio returned 39.1% for the year; while the Fund's international equity holdings returned 57.68%. The fixed income portfolio, which represents approximately 28% of the Fund's total assets and provides the cash required by the pension payments, returned 8.88% for the year. The private equity and real estate portfolios also experienced positive returns. They returned 21.11% and 26.04% respectively.

Employer contribution rates, beginning in fiscal year 2004, were significantly influenced by enacted legislation. On May 14, 2003, Chapter 49 of the Laws of 2003 of the State of New York was enacted which made the following changes to the System:

- Required minimum contributions by employers of 4.5% of payroll every year, including years in which the investment performance would make a lower contribution possible.
- Changed the cycle of annual billing such that the contribution for a given fiscal year is based on the value of the pension fund on the prior April 1st (e.g., billings due December of 2004 are based on the pension fund value as of April 1, 2003).

Requests for Information

This financial report is designed to provide a general overview of the New York State and Local Retirement System finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the New York State and Local Retirement System, 110 State Street, Albany, New York 12236-0001.

1. Description of Plans

The Comptroller of the State of New York serves as sole trustee of the Common Retirement Fund (the "Fund") and administrative head of the New York State and Local Employees' Retirement System ("ERS"), the New York State and Local Police and Fire Retirement System ("PFRS"), and the Public Employees' Group Life Insurance Plan ("GLIP"). GLIP provides death benefits in the form of life insurance. These entities are collectively referred to as the New York State and Local Retirement System (the "System"). All net assets of the System are held in the Common Retirement Fund (the "Fund") which was established to hold all net assets and changes in net plan assets allocated to the System. In these statements, GLIP amounts are apportioned and included in either ERS or PFRS.

System benefits are provided under the provisions of the New York State Retirement and Social Security Law and are guaranteed by the State Constitution. Once a public employer elects to participate in the System, the election is irrevocable. The System cannot be terminated and plan benefits cannot be diminished or impaired. Benefits can be reduced for future members only by an act of the State Legislature.

Generally, members of the System are employees of New York State (the "State") and employees of its municipalities, other than New York City. Employees of non-State participating employers constituted approximately 63% for ERS and 84% for PFRS of the April 1, 2003 System membership.

The ERS and the PFRS are cost-sharing multipleemployer defined benefit pension plans. At March 31, 2004, there were 2,985 participating government employers in the System, including the State. The number of members and benefit recipients as of April 1, 2003, the date of the most recent actuarial valuation, were:

	ERS	PFRS	Total
Retirees and beneficiaries currently receiving benefits	287,341	26,256	313,597
Inactive members vested	62,047	2,031	64,078
Active members	<u>552,508</u>	<u>33,957</u>	<u>586,465</u>
	<u>901,896</u>	<u>62,244</u>	<u>964,140</u>

Membership, benefits, and employer and employee obligations to contribute are described in the New York State Retirement and Social Security Law and are outlined as follows:

Membership Tiers—Pension legislation enacted in 1973, 1976, and 1983 established distinct classes of membership. For convenience, the System uses a tier concept to distinguish these groups, generally:

Tier 1—Those persons who last became members of the ERS before July 1, 1973 or PFRS before July 31, 1973.

Tier 2—The ERS – those persons who last became members on or after July 1, 1973, but before July 27, 1976; or PFRS – those persons who became members on or after July 31, 1973.

Tier 3—The ERS – generally those persons who are State correction officers who last became members on or after July 27, 1976, and all others who last became members on or after July 27, 1976, but before September 1, 1983.

Tier 4—The ERS – generally, except for correction officers, those persons who last became members on or after September 1, 1983.

Vesting—Members with 5 years or more of service are 100% vested.

Benefits—

(1) Tier 1 and Tier 2

Most Tier 1 and Tier 2 members are on a plan with minimum retirement age of 55, which provides for 1.67% of final average salary for each year of service less than 20 years. Generally, the benefit with more than 20 years is 2% of final average salary for each year of service. Tier 2 members retiring between ages 55 to age 62, with less than 30 years of service receive reduced benefits. As a result of Article 19 of the Retirement and Social Security Law, eligible Tier 1 and Tier 2 members, whose date of membership is prior to July 27, 1976, will receive an additional month of service credit for each year of credited service they have at retirement, up to a maximum of 24 months.

(2) Tier 3 and Tier 4

Except for Tier 3 correction officers, generally the benefit is 1.67% of final average salary for each year of service if the service is less than 20 years. For 20 to 30 years service, the benefit is 2% of final average salary. An additional benefit of 1.5% of final average salary is applied for each year of service over 30 years. A member must be age 62 with 5 years of service or at least age 55 with 30 years service to retire with full benefits. Reduced retirement benefits are available if retirement occurs from age 55 to 62.

(3) Special Plans

The 25 Year Plans allow a retirement after 25 years of service of one-half of final average salary and the 20 Year Plans allow a retirement after 20 years of service of one-half of final average salary. These plans are available to certain PFRS members, sheriffs, and correction officers.

(4) Ordinary Disability Benefits

Generally, ordinary disability benefits, usually 1/3 of salary, are provided after 10 years of service; in some cases, after 5 years.

(5) Accidental Disability Benefits

For all eligible Tier 1 members and Tier 2 ERS members, the benefit is a pension of 75% of final average salary with offset for any worker's compensation benefits received. For Tier 1 and Tier 2 PFRS members, the benefit is a pension of 75% of final average salary with offset for any worker's compensation benefits received. The Tier 3 and Tier 4 ERS benefit is the ordinary benefit with the years of service eligibility requirement dropped.

(6) Ordinary Death Benefits

Death benefits are payable upon the death, before retirement, of a member who meets eligibility requirements as set forth by law. The first \$50,000 of an ordinary death benefit is paid in the form of group term life insurance. The benefit is generally three times salary. For most members there is also a reduced post-retirement death benefit.

(7) Post-retirement Benefit Increases

A cost of living adjustment is provided to: (i) all pensioners who have attained age 62 and have been retired for five years; (ii) all pensioners who have attained age 55 and have been retired for ten years; (iii) all disability pensioners regardless of age who have been retired for five years; and (iv) ERS recipients of an Accidental Death Benefit regardless of age who have been receiving such benefit for five years. This cost of living adjustment is a percentage of the annual retirement allowance of the eligible member as computed on a base benefit amount not to exceed \$18,000 of the annual retirement allowance. The cost of living percentage shall be 50% of the annual Consumer Price Index as published by the U.S. Bureau of Labor.

2. Summary of Significant Accounting Policies

Basis of Accounting—The accompanying financial statements are prepared using the accrual basis of accounting. Revenue is recognized when earned and liabilities are recognized when incurred. Employer contributions are recognized when billed. The amounts

shown on the financial statements are allocated between ERS and PFRS based on each system's equity in the Common Retirement Fund.

Adoption of New Accounting Standards—During the year ended March 31, 2004, the System adopted Government Accounting Standards Board Statement No. 40, Deposit and Investment Risk Disclosures (an amendment of GASB Statement No.3) ("GASB 40"). The adoption of GASB 40 required the System to include a presentation of Deposit and Investment Risk Disclosures. The adoption of GASB 40 did not have an impact on the System's financial statements.

Investments—Investments are reported at fair value. Stocks traded on a national or international exchange are reported at market value at current exchange rates. Bonds are primarily reported at market values obtained from independent pricing services. Mortgages are valued on the basis of future principal and interest payments, and are discounted at prevailing interest rates for similar instruments. The fair value of real estate investments is based on independent appraisals made every three years or according to the fund agreement. Investments that do not have an established market are reported at estimated fair value. The Fund trades in foreign exchange contracts in the normal course of its investing activities in order to manage exposure to market risks. Such contracts, which are generally for a period of less than one year, are used to purchase and sell foreign currency at a guaranteed future price. These contracts are recorded at market value using foreign currency exchange rates.

Securities Lending—Section 177-D of the New York State Retirement and Social Security Law authorizes the Fund to enter into security loan agreements with broker/dealers and New York State or national banks. The Fund has designated its master custodian bank to manage a securities lending program. This program is subject to a written contract between the Fund and the Custodian who acts as Security Lending Agent for the Fund. The Custodian is authorized to lend securities within the borrower limits and guidelines established by the Fund. Types of collateral received from borrowers for securities loaned are cash and government securities. The Custodian is authorized to invest the cash collateral in short-term investments that are legal for the Fund. These include domestic corporate and bank notes, U.S. Treasuries, obligations of federal

agencies, and repurchase agreements. All rights of ownership to government securities pledged as collateral remain with the borrower except in the event of default. The Fund has not experienced any losses resulting from the default of a borrower or lending agent during the year ended March 31, 2004 or in the history of the program.

The Fund lends domestic fixed income, domestic equity, and international equity securities to brokers/ dealers approved by the Fund. Collateral for securities loaned equals 102% of fair market value for domestic securities and 105% for international securities. Investment guidelines provided to the Custodian by the Fund minimize the risk that the cash collateral could be invested in securities which may default. The Custodian acknowledges responsibility to reimburse the Fund for losses, which might arise from managing the program in a manner inconsistent with the contract. The Fund manages its credit risk by recording investments at market value daily and maintaining the value of the collateral held by the Fund in excess of the value of the securities loaned. At March 31, 2004, the Fund had no credit risk resulting from Securities Lending.

All security loans can be terminated on demand by either the Fund or borrower. The average term of the open security loans is one day while the overall average term to maturity of invested collateral for the Fund's open loans is 14 days. To provide sufficient liquidity, the policy of the Fund is to maintain a minimum of 10% of collateral in overnight investments.

Member Loan Programs—Members are entitled to participate in a loan program that allows them to borrow up to 75% of their member contributions. Repayment of outstanding amounts is generally made through payroll deductions within five years. The interest rate charged for member loans is fixed at 1% below the actuarial interest rate at the time the loan is granted. The current loan rate as of March 31, 2004 was 7%.

Benefits Payable—Benefits payable represent payments due on account of death and retirement on or before March 31, 2004, for which final calculations had not been completed and paid as of that date. **Other Liabilities**—Other liabilities include a cash managed balance maintained on a daily basis, which represents disbursements issued on previous business days, which are funded when presented for payment at the issuing bank.

Use of Estimates—The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingencies. Estimates also affect the reported amounts of income/ additions and expenses/deductions during the reporting period. Actual results could differ from those estimates.

3. Deposit and Investment Risk Disclosure

Custodial Credit Risk—Equity and fixed income investments owned directly by the Fund are held at the Fund's custodian in the name of the Comptroller of the State of New York in Trust for the Common Retirement Fund. Directly held investments include: short term and long term fixed income, and domestic and global equity separately managed accounts. The aforementioned investments have the lowest custodial risk. Equity investments held indirectly by the Fund via limited partnerships, commingled investment funds, joint ventures and other similar vehicles are held in custody by an organization contracted with by the general partner and/or the investment management firm responsible for the management of each investment organization. Title to real property is either held by a real estate holding company or a real estate investment fund. Ownership of mortgage assets is documented by the Fund's holding of original mortgage and note documents by the Office of the State Comptroller ("OSC"), Division of Pension Investment and Public Finance.

The following table summarizes the custody of investments for the Fund (in thousands):

	<u>March 31, 2004</u>		Asset	
Asset Type	Market Value	Fund Total	Type as a Percent	Custodian
Short Term Investments	\$1,879,098	\$1,879,098	1.6 %	Held in the name of the Fund by the Fund's custodian bank.

Notes:

* U.S. Treasury Bonds, Notes, Strips and Inflation Indexed Securities are obligations of the U.S. government or explicitly guaranteed by the U.S. government and therefore are not considered to have credit risk.

** These securities were rated Aa or higher when purchased.

*** These securities are not individually rated. The U.S. government sponsored enterprises which issued and guarantees these securities are rated Aaa.

Concentration of Credit Risk–Section 177 of the New York State Retirement and Social Security Law establishes limits for the various investments held by the Fund. No investments in any one organization represent 5% of Fund net assets.

Foreign Currency Risk–The System's investment policies permit it to invest up to 15 percent of its assets in publicly traded international equity investments. The System's current position in such equity securities, invested in directly and through commingled funds, is 13.3 percent of invested assets.

Non-U.S. Dollar denominated equity investments at March 31, 2004 are as follows (in thousands):

Currency	Market Value

Approximate total investments made outside the United States	<u>\$17,751,881</u>

4. Contributions

Contributions Required—Participating employers are required under the New York State Retirement and Social Security Law to contribute annually to the System.

Funding Policy—The funding of the System is accomplished through member and employer contributions and the investment earnings on these contributions, according to the New York State Retirement and Social Security Law. The aggregate actuarial funding method is used by the System.

Generally, participating employers that have adopted the same benefit plans contribute at the same rate of payroll. The total employer contribution rate as a percentage of salary includes rates for administrative expenses, GLIP, and supplemental benefits. GLIP is a one-year term insurance plan. Consequently the GLIP rates are determined so as to pay for the current year's GLIP costs. Similarly, the administrative rates are determined so as to pay the current year's administrative expenses. Employers may make other contributions due to legislation, such as retirement incentives, the 17-year amortization and deficiency payments (which an employer may incur when joining the System and are payable for up to 25 years). The average employer contribution rates below exclude certain contributions such as the 17-year amortization. The average employer contribution rate for PFRS for fiscal year ended March 31, 2004 was approximately 5.8% of payroll. The average contribution rate for ERS for fiscal year ended March 31, 2004, including incentive contributions, was approximately 5.9% of payroll.

Changes to employer contribution requirements during the year ended March 31, 2004 were as follows:

- Required minimum contributions by employers of 4.5% of payroll every year, including years in which the investment performance would make a lower contribution possible.
- Changed the cycle of annual billing such that the contribution for a given fiscal year is based on the value of the pension fund on the prior April 1st (e.g., billings due December of 2004 are based on the pension fund value as of April 1, 2003).

Required Contribution Rates—Tier 3 and 4 members must contribute 3% of their salary. As a result of Article 19, of the New York State Retirement and Social Security Law, eligible Tier 3 and Tier 4 employees, with a membership date on or after July 27, 1976, who have ten or more years of membership or credited service with the System, are not required to contribute. Less than 1% of other members are contributory. Members cannot be required to begin making contributions or make increased contributions beyond what was required when membership began.

Retirement Incentives—During each of the fiscal years 2000 and 2002, early retirement incentives were offered to members of the System. Employers were allowed to pay the cost immediately or amortize it over 5 years.

Contributions Receivable—Employers' contributions receivable are presented net of withdrawals, refunds, advance employer payments, and credits due employers.

Incentive program costs receivable from New York State as of March 31, 2004 totaled \$196 million. In addition, receivable amounts from participating employers include \$94 million for the incentive program and \$76 million for new plan adoptions and past service cost.

Annual bills for employer contributions accrue interest at the actuarial interest rate applicable during the year. With regards to the above receivables, for fiscal year ended March 31, 2004, the applicable interest rate was 8%. Interest on amounts amortized over a fixed number of years remains at the fixed rate in effect at the time the payment schedule was established.

5. System Reserves

The legally required reserves maintained by the System are fully funded and are described below:

- Pension Reserve Funds—The funds from which pensions are paid, totaled \$37,669 million for ERS and \$7,673 million for PFRS, as of March 31, 2004.
- Annuity Reserve Funds—The fund from which member contribution annuities are paid. The balance at March 31, 2004 for ERS was \$184 million and \$17 million for PFRS.

There are certain other additional funds maintained by the System.

6. Contingencies

The System is a defendant in litigation involving individual benefit payments, participant eligibility and other issues arising from its normal activities. Management of the System believes there will be no material adverse effect on the basic financial statements as a result of the outcome of these matters.

Schedule of Funding Progress – Year Ended March 31, 2004 (Unaudited)

The System uses the aggregate actuarial funding method that does not identify or separately amortize unfunded actuarial liabilities, therefore no schedule of funding progress is provided. The average employer contribution rates below exclude certain contributions such as the 17-year amortization. The average employer contribution rate for PFRS for fiscal year ended March 31, 2004 was approximately 5.8% of payroll. The average contribution rate for ERS for fiscal year ended March 31, 2004, including incentive contributions, was approximately 5.9% of payroll.

Section 78 of the New York State Retirement and Social Security Law provides for a cost of living adjustment to: (i) all pensioners who have attained age 62 and have been retired for five years; (ii) all pensioners who have attained age 55 and have been retired for ten years; (iii) all disability pensioners regardless of age who have been retired for five years; and (iv) ERS recipients of an Accidental Death Benefit regardless of age who have been receiving such benefit for five years. This cost of living adjustment is a percentage of the annual retirement allowance of the eligible member as computed on a base benefit amount not to exceed \$18,000 of the annual retirement allowance. The cost of living percentage shall be 50% of the annual Consumer Price Index as published by the U.S. Bureau of Labor.

Significant actuarial assumptions used in the April 1, 2002 valuation to determine employer contributions for the year ended March 31, 2004 were:

Interest rate		8%
Salary scale	ERS PFRS	5.9% 6.9%
Decrement tables	4/1/95-3/31/00 System' experience	
Inflation rate		3.0%

The actuarial asset value for domestic bonds and mortgages is amortized value. Short-term investments are at market value. All other investments use a fiveyear moving average of market values method assuming a 7% rate of expected appreciation. This method immediately recognizes regular investment income (interest and dividends) while phasing in unexpected appreciation/depreciation over a five-year period. It treats realized and unrealized gains (or losses) in the same manner.

Schedule of Employer Contributions

(UNAUDITED) (In Thousands)

Employees' Retirement System Employer Contributions								
Year ended March 31	Percentage Contribution							
1999	\$41,468	\$193,202	\$234,670	100%				
2000	7,568	74,546	82,114	100%				
2001	14,443	111,331	125,774	100%				
2002	57,462	196,951	254,413	100%				
2003	265,662	317,555	583,217	100%				
2004	435,404	690,116	1,125,520	100%				

For fiscal year ended March 31, 2002, the Annual Required Contributions (ARC) exceeded the Employers' Contributions as shown on the statement of Changes in Plan Net Assets due to a prior year adjustment.

Police and Fire Retirement System Employer Contributions									
Annual Required Contributions									
Year ended March 31									
1999	\$1,056	\$50,956	\$52,012	100%					
2000	308	49,387	49,695	100%					
2001	1	38,339	38,340	100%					
2002	304	35,464	35,768	100%					
2003	8,712	60,002	68,714	100%					
2004	\$19,391	\$141,544	\$160,935	100%					

The ARC includes the employers' normal cost, the GLIP amounts, and other supplemental amounts amortized over the collection period. In addition, due to statutory contribution provisions, State contributions may vary from the ARC to allow for under/over payment of amounts for a one year period.

We are...

keeping the Common Retirement Fund strong and secure

Investment Section

Overall Objectives and Performance

The Division of Pension Investment and Cash Management manages the assets of the Common Retirement Fund. Its goal is to grow the assets to meet the System's pension liability and ensure a reliable cash flow that provides for the funding requirements of near-term pension obligations. To achieve these goals, the Division allocates the Fund's assets to a variety of asset types and strategies. Generally, equity investments are included for their long-term return and growth characteristics, while fixed income assets are added for their ability to control investment risk and provide for a reliable cash flow that meets the System's funding requirements.

After several years of poor corporate profitability, a weak global economy, uncertainty resulting from the war in Iraq and the lack of investor trust caused by corporate accounting scandals, the world's financial markets enjoyed strong growth during the Fund's 2003-04 fiscal year. Greatly improved corporate profitability and economic growth reversed three years of lackluster market returns and helped the Fund achieve its best returns since 1998, while increased government oversight of corporations helped restore confidence and trust in the financial markets.

Investment returns during Fiscal Year (FY) 2003-04 significantly outperformed the Fund's long-term annual average of 11.97 percent (measured since 1983). With a total annual return of 28.83 percent, the Fund reversed the negative and less than robust returns of the past three years. Certain asset classes, including domestic equity and real estate, performed better than their benchmark indices, while fixed income, international equity and private equity performed well on an absolute basis and helped the Fund achieve its outstanding results for the year. The Fund's successful long-term performance confirms the importance of asset diversification and controlling investment risk within each asset class.

Domestic Equities

The Fund's domestic equity portfolio was one of the largest contributors to the 2004 fiscal year's strong positive performance. Representing approximately 49 percent of total assets, the Fund's domestic equity portfolio returned 39.10 percent for the year, versus 38.19 percent for the domestic equity market as measured by the Russell 3000 Index – a broad market index. All the domestic equity strategies were able to outperform their respective benchmarks as evidenced by the following returns in large capitalization, medium capitalization and small capitalization strategies. Large capitalization strategies, which account for 79 percent of the domestic equity portfolio, returned 35.40 percent; medium capitalization strategies, which account for 13 percent of the domestic equity portfolio, returned 50.80 percent; and small capitalization strategies, which account for 8 percent of the total domestic equity portfolio, returned 63.94 percent.

During the past year, the Fund's staff continued to implement the current domestic equity structure strategy that resulted from the most recent best practices study. Within domestic equity, 73 percent is managed in passive strategies, 20 percent in active strategies, and 7 percent in enhanced index strategies.

The internally managed S&P 500 and S&P 400 index funds continue to provide low cost and efficient exposure to the domestic equity markets for the Fund. With the expanded use of trade-crossing networks and alternative trading systems, the Fund continued to lower trading costs.

The Fund also continued to use minority and womenowned brokerage service providers when trading for the internally managed assets. For the fiscal year, these brokers accounted for approximately 32 percent of the total commissions. In addition, the Fund's external equity managers used women and minorityowned brokers for 14 percent of their total commissions.

International Equities

The Fund's international and global equity holdings represented approximately 13.7 percent of total assets as of the end of the fiscal year. The established economies of the international stock market, as measured by the Morgan Stanley Europe, Australia and Far East Index, returned 57.54 percent. Because of its international equity structure, which employs a variety of active and passive investment strategies, the Fund's passive component outperformed the market with a return of 58.25 percent while the active component returned 53.04 percent for the same period. The world's emerging economies, as measured by the Morgan Stanley Emerging Market Index, returned 82.16 percent versus the Fund's 80.70 percent.

During the past year, the Fund's staff continued the implementation of the international equity structure recommendations adopted as a result of last year's best practices study. Within international equities, 70 percent is managed in core international markets, 16 percent in global equity markets and 14 percent in emerging markets.

The Fund has continued to pursue an international equity strategy for risk reduction and diversification. As of March 31, 2004, investments in developed non-U.S. markets totaled 9.5 percent, emerging markets exposure totaled 2.2 percent and global strategies totaled 2.0 percent of total assets. Given the continued uncertainty of the current investment environment, the Fund's broadly diversified portfolio structure continues to be the appropriate strategy.

Fixed Income

The Fund's long-term fixed income portfolio includes extensive holdings in U.S. government guaranteed bonds, government guaranteed inflation indexed securities, as well as investment grade corporate and government sponsored agency securities. These assets provide a reliable funding source for the System's pension liabilities and offset the greater return volatility of the Fund's equity holdings. The Fund's short-term portfolio is invested primarily in high quality commercial paper and is a source of liquidity for monthly pension payments and funding for investments in other asset classes. Both portfolios are managed internally with assistance from a fixed income advisor. Continued lackluster economic activity combined with deflationary fears led to a Federal Funds rate reduction from 1.25 percent to 1.00 percent early in the fiscal year. Encouraged by increased economic activity and fearful of inflation, the Federal Reserve refrained from any further rate adjustments during the Fund's fiscal year. The Fund's fixed income portfolio fared well in this environment, returning 8.88 percent for the year, versus 5.41 percent for the shorter duration Lehman Brothers Aggregate Index and 7.23 percent for the Salomon Long Pension Index.

The Fund was a net buyer of Treasury Inflation Protected Securities (TIPS), ending the year with a total portfolio allocation just over the 7 percent target recommended by the latest asset/liability study. TIPS contributed greatly to the Fund's fixed income performance, returning 15.77 percent for the year, well ahead of all other fixed income sectors. Corporate bond holdings also fared well, returning 9.28 percent for the year, while the government sponsored agency sector returned 4.31 percent.

The Fund continued its commitment to qualified women and minority owned brokerage firms. Thirtyseven percent of long-term broker initiated trades were executed with women or minority owned firms.

The Fund's securities lending program earned \$18 million in revenue in the fiscal year. Revenue from fixed income loans declined while earnings from both domestic and international equity loans increased. Total income decreased from the previous fiscal year, a reflection of the low interest rate environment.

Real Estate

The real estate portfolio provided a total return of 26.04 percent and continues to enhance overall investment returns, while providing a level of diversification to equity investments. Additionally, income generated from the portfolio is a funding source for the System's pension liabilities. The real estate portfolio comprises assets accumulated from acquisitions and developments through joint venture relationships, real estate opportunity funds, and from purchases in the Fund's directly-owned real estate portfolio.

The real estate equity markets in FY 2003-04 exhibited powerful demand for institutional-quality product in major American markets. Acquiring Class A properties challenged all buyers. However, the Fund was the beneficiary of enhanced access to the real estate markets through its joint venture relationships, particularly in the multi-family sector. The Fund took advantage of the increased demand for real estate from domestic, foreign, public and private investors by selling non-strategic and mature assets, taking profits and improving the overall quality of the portfolio.

In FY 2003-04, the Fund added a new joint venture relationship with Avalon Bay Communities, which is developing an apartment community in New York City. Twenty percent of its units will be set aside for families meeting Federal affordable housing criteria. Through its existing relationships and selective additions to the joint venture program and directlyowned portfolio, the Fund is well-positioned to respond quickly to attractive acquisition proposals.

Real estate mortgage investments contribute to enhancing the long-term investment return of the Fund's fixed income portfolio. This portfolio consists of \$1.3 billion secured by a diversified commercial real estate portfolio.

Alternative Investments

The Fund's private equity portfolio is designed to provide returns that exceed those of public equities. The added return is accompanied by increased risk and illiquidity. Private equity makes up a relatively small portion of the Fund's total investments. The Fund's private equity portfolio accounted for 5.7 percent of total assets as of March 31, 2004.

Private equity generally involves investments in companies not publicly traded. Strategies include investments in new companies, categorized as venture capital, established companies seeking capital for expansion, categorized as corporate finance, special situations funds that invest in specific industries, such as energy and power, or follow other strategies. Finally, the Fund's international portfolio includes both venture capital and corporate finance strategies in companies located outside of the United States. The Fund also invests in funds-of-funds, which are pooled investments in a portfolio of private equity funds. The funds-of-funds strategy has two primary objectives: (1) to expand the broad diversification objective and (2) to supplement the core private equity portfolio with small funds.

The Fund employs a broadly diversified strategy for its private equity portfolio to reduce risk. Investments are made in a variety of strategies, with a number of different private equity managers and in funds initiated at different points in time. This approach reduces the risk to the Fund.

Other Programs

New York State Mortgage Pass-Through Program

The Fund's New York State Mortgage Pass-Through Program has provided home ownership opportunities for more than 62,300 New York State residents since it was established in 1981. Over the last 23 years, the Fund has purchased nearly \$6.6 billion in New York State mortgages. Along with benefiting State residents, this program has provided the Fund with a reliable source of income.

Under the current program structure, the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation create and insure pools of single-family mortgage loans originated by traditional mortgage lenders. In FY 2003-04, the Fund purchased \$400 million in mortgages, allowing 3,039 New York State individuals and families to buy homes.

Affordable Housing Permanent Loan Program

Since 1991, the Fund has played a major role in improving the lives of thousands of New York State residents while strengthening their neighborhoods. Through programs with the Community Preservation Corporation (CPC) and the JP Morgan Chase Community Development Corporation, the Fund has been able to provide moderate income and low-income families across the State with the opportunity to rent affordable housing. By purchasing permanent mortgages, the Fund provides for the production of affordable new multi-family housing and the revitalization of deteriorated or obsolete housing units. Special housing for the State's senior citizens is also part of the program. In 2004, the Fund increased its program to purchase mortgages from the Community Preservation Corporation from \$300 million to \$400 million.

Since the inception of this program, 5,876 units have been completed and 3,054 are in the pipeline. To date, the Fund has invested \$175 million in mortgages and committed an additional \$150 million to the CPC program. In FY 2003-04, the Fund invested in affordable housing throughout the State, including Albany, Bronx, Dutchess, Erie, Nassau, Onondaga, Rensselaer, Saratoga, Schenectady, Suffolk, Warren, Washington and Westchester Counties.

Helping NY/Equity Real Estate Investments

The Fund has invested in commercial real estate and owns properties throughout New York State, including shopping centers, office buildings, residential properties and storage facilities. Under the real estate joint venture program, the Fund has been able to develop new buildings and acquire properties in need of re-leasing, repositioning and upgrading. As a result of such intensive management efforts, property values have increased. The Fund's joint venture program focusing on development and re-development projects within New York State, the Excelsior Real Estate Fund, has created new housing units and contributed to the Fund's overall performance returns.

New York Business Development Corporation Program

The Fund provides the New York Business Development Corporation (NYBDC) with funds to make loans to small businesses for working capital, equipment, or real property. NYBDC has a goal of making at least one-third of its loans to woman or minority owned businesses. With its focus on small-business lending, NYBDC can frequently offer more favorable terms than other lenders.

In 1998, the Fund renewed its relationship with NYBDC to provide an additional \$100 million in capital. Since the program began in 1987, NYBDC has made 563 loans totaling \$162.2 million to businesses that employ over 10,000 New Yorkers. During FY 2003-04, NYBDC made 33 loans totaling \$13.1 million.

Financing for Emerging Businesses in New York State

The Fund's private equity and real estate opportunity fund portfolio includes investments in 198 New York businesses with a value of \$502 million. This figure reflects only the Fund's share of these investments; the total value of New York companies held by the Fund's partnerships was \$5.7 billion as of December 31, 2003 (the most recent data available). Companies in the private equity portfolio include: The NewsMarket in New York City, Concentrix in Pittsford, Latham International in Latham, Reichert in Buffalo, Q-RNA in New York City and Acorda Therapeutics in Hawthorne.

In 2000, the Fund initiated the New York State Private Equity Investment Program. The Program is designed to provide investment returns consistent with the risk of private equity investing, while also expanding the availability of capital for New York businesses. By the end of FY 2003-04, the Fund had made commitments to nine different private equity managers totaling \$253 million. The nine managers currently in the program are:

- Summer Street Capital Partners, a growth equity investment fund in Buffalo;
- FA Technology Ventures, a venture capital fund focusing on information and energy technology in Albany;
- Ascend Ventures, a technology venture fund in New York City;
- Wheatley Partners, a technology venture fund with a focus on information and medical technology in New York City and Long Island;
- DeltaPoint Capital, a growth equity fund in Rochester;
- The HL New York Coinvestment Fund, a special fund that provides capital statewide for other private equity managers making investments in New York;
- High Peaks Ventures, a Troy and Saratoga-based early stage venture capital fund;
- □ Founders Equity, a New York City-based fund that makes growth equity investments; and

Easton Hunt Capital Partners, a New York Citybased fund that pursues a broad strategy of investing in companies in a wide range of industries and stages of development.

Subsequent to the close of FY 2003-04, the Fund completed two additional commitments totaling \$45 million, bringing the total commitment under the in-state program to \$298 million.

ASSET ALLOCATION – MARCH 31, 2004*

The Fund's decision on how it diversifies its investments among the various asset classes – domestic and international equity, fixed income, real estate and private equity – largely determines its long-term investment performance. Since this is the most critical decision in asset management, the Fund reviews its asset allocation policy frequently. During the 2003-04 fiscal year, the Fund conducted a formal Asset Liability Analysis with the help of an investment consultant. The purpose of the analysis was to identify the best mix of assets that will meet the growth requirements of pension benefits while controlling the risk of volatile asset returns and the potential for higher employer contributions.

Asset Type	Target	Maximum	Actual
Equity	70.0%	75.0%	72.3%
Domestic	57.0%	62.0%	58.6%
Publicly Traded	43.0%		49.3%

The Common Retirement Fund is the second largest public pension fund in the United States. As sole trustee, the Comptroller is responsible for managing, preserving and growing the assets of the Fund. To meet his obligations to the Fund's 970,078 pensioners, members and beneficiaries, the Fund invests in a number of asset classes to maximize returns, including bonds and stocks of publicly traded companies in the U.S. and abroad.

Comptroller Hevesi's role as a fiduciary keeps him engaged in discussions and negotiations with management and boards of directors of companies in the Fund's portfolio regarding corporate governance and accountability. Profitability and social responsibility of corporations must strike a fine balance to maximize investment rewards over time. As a long-term investor, the Comptroller promotes policies that will allow companies and communities to thrive together in symbiotic relationships. Since he took Office in January of 2003, Comptroller Hevesi has confronted corporations about their business practices, ranging from environmental and labor principles to accounting and executive compensation standards, and what those practices mean to shareholder value.

In recent years, as corporate scandals contributed to a downward spiraling market, Congress acted by presenting investors and corporations with the Sarbanes-Oxley Act of 2002 (by Senator Paul Sarbanes of Maryland and Congressman Michael Oxley of Ohio) in a major effort to reform corporate behavior. The Securities and Exchange Commission has the responsibility of enforcing the new rules it created to implement the corporate governance standards that the new legislation demands of corporations. Comptroller Hevesi offered his comments on corporate goverance reform to the Commission as well as the Financial Accounting Standards Board during this time of analysis. As a shareholder representing the Fund, Comptroller Hevesi has similarly aligned his proxy-voting guidelines to the Sarbanes-Oxley Act, keeping his expectations high for companies' responsiveness to the new corporate governance standards.

Comptroller Hevesi's experience as a former New York City Comptroller brings with him a unique and important network of established relationships within the investor community. In addition to reaching out to other State Treasurers and Comptrollers to debate good corporate governance policies, he has kept the New York State Common Retirement Fund an active member of the Council of Institutional Investors, where institutional investors, both public and private, productively exchange ideas on investment policies and shareholder rights.

Highlights of Comptroller Hevesi's achievements as a shareholder activist in FY 2003-04 include:

- □ Comptroller Hevesi called for Dick Grasso to resign as Chairman of the New York Stock Exchange after it was publicly revealed that he had negotiated an exorbitant compensation package with the Exchange Board. Within hours of statements from Mr. Hevesi and California Treasurer Philip Angelides calling on Mr. Grasso to step down, he announced his resignation. Comptroller Hevesi, along with other members of the National Coalition for Corporate Reform (NCCR), successfully lobbied the U.S. Securities and Exchange Commission and the NYSE for corporate governance changes on the Exchange board.
- □ The Comptroller lobbied and met with U.S. Securities and Exchange Commission Chairman William Donaldson seeking a rule to automatically grant shareholders the right to nominate their own candidate for election to corporate boards of directors. This issue is still being debated by the Commission.
- □ Comptroller Hevesi joined with New York State Attorney General Eliot Spitzer and North Carolina State Treasurer Richard Moore in drafting and recommending a set of principles for mutual fund companies and managers to abide by in order to look after shareholder interests in the wake of the ongoing mutual fund scandals.

- □ The Comptroller continues to co-sponsor, with the New York City Comptroller representing the New York City Teachers' Retirement System, the New York City Police Pension Fund, and the New York City Fire Department Pension Fund, shareholder resolutions asking Claire's Stores Inc., TJX Companies, Inc., and Interpublic Group of Companies, Inc. to implement the MacBride Principles (affirmative action guidelines for U.S. companies doing business in Northern Ireland to promote equal employment opportunities).
- □ The Comptroller co-sponsored, with the New York City Comptroller representing the New York City Teachers' Retirement System, the New York City Police Pension Fund, and the New York City Fire Department Pension Fund, shareholder resolutions asking El Paso Corporation, Waste Management, Inc., Centex Corporation, and Exxon Mobil to include explicitly in its written Equal Employment Opportunity policy the prohibition of discrimination based on sexual orientation, and make every effort to implement that policy. In addition, the Comptroller requested Regions Financial Corporation to adopt the policy and the company did so this July.
- The Comptroller co-sponsored a shareholder resolution with Domini Social Investments at Devon Energy requesting that the company report on, and develop, ways to mitigate risks of carbon emissions. After successful negotiations, the proposal was withdrawn upon Devon pledging to make a report available this September.
- Comptroller Hevesi, partnering with the Coalition for Environmentally Responsible Economies (CERES), Treasurers Denise Nappier of Connecticut, Philip Angelides of California and others, sponsored the UN Summit on Climate Risk to bring together interested parties in the investment community to raise awareness regarding climate change, risks and liabilities associated with it. Out of the summit, Comptroller Hevesi became a founding member of the Investor Network on Climate Risk (INCR). The purpose of the INCR is to bring the investment community together to explore and examine the risks of climate change. INCR encourages companies in which its members invest to address any

material risks and opportunities to their businesses affected by and/or associated with climate change. Its website is www.incr.com.

- In the wake of the mutual fund scandal at Putnam Funds, Comptoller Hevesi and members of the NCCR, including CalPERS, CalSTRS, and AFS-CME, worked to get a candidate of the shareholders' choosing on the slate of nominees for election to Marsh McLennan Companies' board of directors (Marsh McLennan Companies is the parent company of Putnam Funds). Their efforts paid off and Zachary Carter, a former Federal prosecutor for the Southern District of New York, is now a director on the board.
- Comptroller Hevesi worked with the NCCR to shed light on problems and offer solutions to the boards of Walt Disney Company and Safeway, Inc. regarding the companies' poor performance records and corporate governance structures. The Comptroller is currently working with Walt Disney Company on the composition of its board after the CEO and Chairman Michael Eisner received a 43 percent withhold vote at its annual meeting this year. The NCCR also launched a "Vote No" campaign against CEO and Chairman Steven Burd. Mr. Burd received a 17 percent withhold vote, and the company implemented several corporate governance improvements, including the appointment of a lead director.
- Comptroller Hevesi, as sole trustee and on behalf of the Fund, is the lead plaintiff in shareholder class action litigation against WorldCom (currently MCI) and a related suit against Citigroup.
 Comptroller Hevesi settled the portion of the case against Citigroup for \$2.65 billion.

Actuarial Section

STATEMENT OF THE ACTUARY

Benefit security is the primary concern of an actuarial funding method. Will sufficient assets have been accumulated when an employee or pensioner begins receiving a benefit?

Future pension costs cannot be determined precisely because they depend on future mortality, investment returns, salary increases, etc. Therefore, in their calculations, actuaries must make assumptions about these uncertainties. The actuary performs experience studies, ascertaining how closely each System's experience is conforming to the assumptions used. If significant differences occur that the actuary believes may indicate differences over a long period of time, the actuary may recommend assumption changes to reduce the expected differences.

Since pension data changes over time, e.g. number of employees or amount of service earned, an actuarial valuation is performed each year to ensure that costs are based on the most accurate information. A summary of the actuarial methods and assumptions used in the actuarial valuation is included later in this section.

Chapter 49, Laws of 2003 has changed the actuarial date for determining employer contributions for a fiscal year. Fiscal year ending March 31, 2003 employer contributions were determined using an April 1, 2002 valuation. Chapter 49 states that April 1st will be used to determine the contribution rate applied to salaries of employers for the next succeeding fiscal year. Therefore, the April 1, 2002 valuation was used in determining the FYE March 31, 2004 employer contributions. In addition, Chapter 49 instituted a minimum contribution and the minimum contribution was paid for FYE 2004.

There were no significant benefit improvements enacted during FYE 2003 or 2004. However, the decline in the equity market resulted in a significant drop in actuarial assets for April 1, 2003, and employer contributions will rise significantly. The April 1, 2002 valuation for FYE March 31, 2004, was performed under my direction and supervision using the assumptions recommended by me and adopted by the Comptroller as of April 1, 2001 and the aggregate actuarial funding method. I am the actuary for the New York State and Local Employees' Retirement System (ERS) and the New York State and Local Police and Fire Retirement System (PFRS), a member of the American Academy of Actuaries, and meet its qualification standards for this work. The valuation results, to the best of my knowledge and belief, represent the true financial condition of the System.

Jei & Sandis

Teri E. Landin, M.A.A.A., A.S.A., E.A., M.S.P.A. Actuary New York State and Local Employees' Retirement System

New York State and Local Police and Fire Retirement System

Actuarial Funding

An actuarial funding method is a procedure for allocating the costs of a retirement system to particular time periods. It does not determine how much a system will ultimately cost; rather, it determines that portion of the estimated total cost that is to be allocated to a particular year.

For 70 years, the actuarial funding method used by the System was the aggregate method (AGG). Then, Chapter 210 of the Laws of 1990 changed the funding method to a modified projected unit credit (PUC) method beginning in FYE March 31, 1991 (referred to as fiscal year 1991 here). This law was challenged and the challenge was upheld by the Supreme Court. On appeal, both the appellate division and the Court of Appeals unanimously agreed with the Supreme Court. These decisions allowed the Comptroller to return to the aggregate funding method, beginning with the 1995 fiscal year. To ease the transition in ERS, i.e., to prevent budget crises among participating employers, the Comptroller devised a plan to phase-in non-GLIP (New York State Public Employees' Group Life Insurance Plan) rates beginning in the 1995 fiscal year when the rates were zero. The rates increased by 1.5 percent per year until 1999, when the transition would cease. However, due to excellent investment gains and favorable experience, almost all ERS employer bills were below the transition rates in 1997, and in 1998 all were below the transition rates, so the transition ceased in 1998.

Actuarial Valuation

At the beginning of the fiscal year, the Actuary, by law, determines the actuarial assets and liabilities. The actuarial valuation is important since it determines each year's employer contributions. Chapter 49 of the Laws of 2003 mandates that the actuarial valuation undertaken on the first day of a fiscal year be used to determine contribution rates for the next succeeding fiscal year. Thus, some of the data tables are the same as last year. Each valuation gives a long-term picture of the System currently and over the coming years. In this, it differs markedly from the March 31, point-in-time snapshot of the System provided by the Financial Statements. The two measurements serve different purposes and use different techniques.

Two examples help make this clear:

- □ The actuarial assets for valuation purposes include the current value of all the future contributions employers and employees will make on behalf of current members. The Financial Statement balance sheet asset figure includes only contributions paid or incurred through this fiscal year.
- The actuarial assets smooth out the ups and downs of common stock performance by using a multi-year smoothing procedure. Techniques like this are widely practiced and professionally recommended to protect employers from volatile contribution rates. The Financial Statements, on the other hand, simply present market values of assets on the last day of the last fiscal year.

Aggregate Actuarial Funding Method

Actuarial liabilities are the current values (called the actuarial present values) of the benefits the Retirement System expects to pay to current members, pensioners and beneficiaries. The actuarial present value of benefits is calculated by projecting the amount of future retirement, death and disability benefits (based on past and future service) to be paid and then discounting for interest earnings, employee turnover and other contingencies.

The actuarial present value of the contributions that employers must make to the System to fund the projected benefit payment is equal to the actuarial liabilities, minus the actuarial value of present assets.

Under the aggregate funding method, the difference between the actuarial liabilities above and the actuarial value of present assets is funded as a level percentage of salary over the future working lifetimes of current members.

Actuarial Assumptions

The current actuarial assumptions were adopted effective April 1, 2001. These assumptions and their predecessors are shown below. All assumptions presume ongoing Systems:

Fiscal Year Ending 3/31	Salary Scale*			Interest Rate	Multiple-Decrement Tables based on Systems':
1980-81	Inflation Productivity & Merit	3.0% <u>2.0</u> % 5.0%		5.50%	4/1/71-3/31/76 experience
1982-85	Inflation Productivity & Merit	5.0% <u>3.5</u> % 8.5%		7.50%	4/1/76-3/31/81 experience
1986	Inflation Productivity & Merit	5.0% <u>3.5</u> % 8.5%		8.00%	4/1/76-3/31/81 experience
1987-88	Inflation Productivity & Merit	5.0% <u>2.3</u> % 7.3%		8.00%	4/1/81-3/31/86 experience
1989-92	Inflation Productivity & Merit	5.0% <u>2.0</u> % 7.0%		8.75%	4/1/81-3/31/86 experience
1993-96	Inflation Productivity & Merit	5.0% <u>2.0</u> % 7.0%		8.75%	4/1/86-3/31/91 experience
1997-98	Inflation Productivity & Merit	ERS 4.75% <u>1.25</u> % 6.0%	PFRS 4.75% <u>1.75</u> % 6.5%	8.50%	4/1/90-3/31/95 experience
1999-2000	Inflation Productivity & Merit	3.50% <u>2.50</u> % 6.00%	3.50% <u>3.00</u> 6.50%	8.50%	4/1/90-3/31/95 experience
2001	Inflation Productivity & Merit	3.00% <u>2.50</u> % 5.50%	3.00% <u>3.00</u> % 6.00%	8.00%	4/1/90-3/31/95 experience
2002-04	Inflation Productivity & Merit	3.00% <u>2.90</u> % 5.90%	3.00% <u>3.90</u> % 6.90%	8.00%	4/1/95-3/31/00 experience

* This is an approximate value. Salary scales vary by age and plan and are based on each System's experience.

Selected Actuarial Assumptions used in the April 1, 2002 Valuation

Assumptions are computed by the Actuary and adopted by the Comptroller. They are based on recent NYSLRS member experience.

These illustrations are used to determine the number of people we anticipate will be dying, retiring, becoming disabled, withdrawing, etc.

Demographic assumptions below show central rates of decrement per 10,000 members, not necessarily probabilities.

Actuarial Value of Assets

Most of the assets of the ERS, PFRS, and GLIP are pooled in the Common Retirement Fund for investment purposes. The actuarial asset values for bonds and mortgages are amortized values. Short-term investments are at market value. All other investments (stocks, commingled funds, real estate, business investments, etc.) use a five-year moving average of market values method assuming a 7 percent rate of expected appreciation.

This method immediately recognizes regular investment income (interest and dividends) while phasing in unexpected appreciation/depreciation over a fiveyear period. Unexpected appreciation is the excess of actual appreciation over expected appreciation (assumed to be 7 percent of the market value at the beginning of the year, adjusted for the net cash flow during the year). Realized and unrealized gains are treated in the same manner under this method.

The GLIP values investments at market value. For the fiscal year 2004, the April 1, 2002 valuation of the System and Insurance Plan, the difference between market and actuarial value of smoothed investments was:

	Investment (millions)
Market Value	\$111,168
Actuarial Value	<u>123,373</u>
Difference	(\$12,205)

Administrative Expenses

The cost of administering the System is borne by the State and local employers on a current disbursement basis.

Group Life Insurance Plan (GLIP)

GLIP provides for up to \$50,000 of member and certain post-retirement death benefits to be paid as life insurance. All benefits provided are on a one-year term insurance basis. Participating employers are billed each year based on the aggregate of anticipated claims for the plan year. Premiums are set so that the reserve will, at its lowest amount during any year, be approximately equal to payables. Payables is an estimate of the amount of claims currently being processed, plus claims incurred but not yet reported.

Deficiency Rates

An employer may also have a deficiency rate. When a new employer joins a System, any past service liability is paid for by separate annual payments over a period of up to 25 years. These payments are not affected by the funding method.

Rate and Contribution Comparability

For comparability, unless stated otherwise, rates and contributions assume a payment date of December 15 before the fiscal year end. This is the date on which local government bills are paid. Presenting the State rates and contributions as of this payment date provides for comparability of State and local government rates and costs. Used to determine employer contributions for the fiscal year ending March 31; in millions of dollars, as calculated April 1, 2002

2004 Comprehensive Annual Financial Report

Contributions here may differ from those appearing elsewhere in the Actuarial Section because this section deals only with the contributions attributable to the single year shown. Actual contributions may include adjustments due to previous years, such as amortization payments/credits, reconciliation of other years' bills and application of smoothing credits.

HISTORICAL TRENDS

The State is obligated to pay its bill on March 1, one month before the end of the fiscal year. However, since 1995, the State has paid its bill on September 1, seven months before the end of the fiscal year. Local employers must pay their bills by December 15, three and one-half months before the end of the fiscal year.

For comparability, all rates in the tables below are based on a payment date of December 15 prior to the close of the fiscal year.

Trends in Employer Contributions

(in millions of dollars)

Fiscal	ERS State and Local Contributions Average Attributable Contribution					PFRS State and Local Contributions Attributable	Average Contribution

* Rates reflect actual contributions divided by actual salaries. The salary and contributions depicted here are rounded to the nearest million for readability.

Yearly, the System's experience in many areas (employee salary growth or decrease, investment return, legislative enactments of benefits) is assessed and quantified. Each element exerts an increasing, decreasing or neutral pressure on contributions to be charged for that year.

Analysis of Changes

By source of change. Experience during one fiscal year producing increase or decrease in contributions for following year. (in millions of dollars)

ERS

2004	32	n/a	n/a	n/a	n/a	110	142

(a) The change to the projected unit credit funding method in 1991 created a surplus, causing a significant decrease in contributions. The 1995 amount is due to a change from the projected unit credit funding method back to the aggregate method, and a change in the 5-year asset smoothing method.

(b) This is an estimated figure. Minor adjustments, mostly salary related, result in the final contribution figure for the year as shown in the Contributions Billed Column.

(c) The negative amount does not indicate a refund. The negative contributions can be used to reduce or eliminate certain payments due for the year.

(d) Primarily due to new actuarial decrement tables.

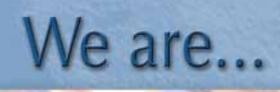

(e) For 1999 and 2000, this represents only a portion of investment gain; the portion necessary to achieve zero normal rates.

New Benefits: ERS

These tables show the average unmodified retirement allowance awarded to Employees' Retirement System members retiring during the fiscal year ending March 31, 2004. The average allowances are shown for groupings based on years of service. The allowance is also expressed as a percentage of the average final average salary (FAS) of the grouping.

* Includes employer premiums to Group Term Life Insurance Plan.

- Combined Systems unless noted; \$ in millions; data as of March 31 fiscal year end.
- (a) Includes active members and inactive members identified with their last employer.
- (b) Beginning in the 2002 fiscal year, Tier 3 and 4 membership statistics are combined.
- (c) Total does not include Employee Contributions Refunded or Other Benefits found in the Financial Statements.
- (d) All rates assume a December 15 payment date prior to the close of the fiscal year. While the State pays on March 1 prior to fiscal year end, the December date is used for comparability. Contributions include Retirement Incentives and other costs.
- (e) Investments for 1995 and later years are shown at (and rate of return is calculated on) market value as required by GASB 25 which the System adopted that year. Pre-1995 fixed income investments are shown at book value, all others at market. Pre-1995 rates of return also reflect this valuation.
