# Certificate of Achievement for Excellence in Financial Reporting

Presented to

## New York State and Local Retirement System

For its Comprehensive Annual  
Financial Report  
for the Fiscal Year Ended  
March 31, 2005

A Certificate of Achievement for Excellence in Financial Reporting is presented by the Government Finance Officers Association of the United States and Canada to government units and public employee retirement systems whose comprehensive annual financial reports (CAFRs) achieve the highest standards in government accounting and financial reporting.

*Carla E. Perry*

President

*Jeffrey R. Egan*

Executive Director

Public Pension Coordinating Council  
**Public Pension Standards**  
***2005 Award***

Presented to

**New York State and Local Retirement System**

In recognition of meeting professional standards for  
plan design and administration as  
set forth in the Public Pension Standards.

*Presented by the Public Pension Coordinating Council, a confederation of*

National Association of State Retirement Administrators (NASRA)  
National Conference on Public Employee Retirement Systems (NCPERS)  
National Council on Teacher Retirement (NCTR)

Alan H. Winkle  
Program Administrator

## Introductory Section

---

Our mission is to fulfill the promise of secure retirement benefits for our members, pensioners and beneficiaries while providing them with the exceptional service they deserve.

September 2006

I am pleased to present this Comprehensive Annual Financial Report (CAFR) for the New York State and Local Retirement System (the System), for the fiscal year ended March 31, 2006. The System is responsible for both the accuracy of the presented information and the completeness and fairness of the presentation, including all disclosures made within this report.

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the System for its CAFR for the fiscal year ended March 31, 2005. The Certificate of Achievement is a prestigious national award recognizing excellence in the preparation of state and local government financial reports.

To be awarded a Certificate of Achievement, a government unit must publish an easily readable and efficiently organized CAFR, whose contents meet or exceed program standards. This report must satisfy both generally accepted accounting principles and applicable legal requirements. A Certificate of Achievement is valid only for one year. This was the second year in a row we applied for and received a Certificate of Achievement. We believe our current report continues to meet the Certificate of Achievement program requirements and are submitting it to the GFOA for consideration again this year.

This CAFR was prepared to conform to the principles of governmental accounting and reporting set forth by the Governmental Accounting Standards Board (GASB). The System's transactions are reported on the accrual basis of accounting. Sufficient internal accounting controls exist to

provide reasonable assurance regarding the safekeeping of assets and fair presentation of the financial statements and supporting schedules.

The CAFR is divided into five sections:

- Introduction Section – contains this letter of transmittal, an organization chart, the Deputy Comptroller's report, and a summary of System highlights
- Financial Section – contains the Independent Auditors' Report, Management's Discussion and Analysis, the System's financial statements, and required supplementary information
- Investment Section – contains a report on investment activity, investment policies, investment results, and various investment schedules
- Actuarial Section – contains an Actuary's Certification Letter and the results of the annual actuarial valuation
- Statistical Section – contains significant data pertaining to the System

The New York State Employees' Retirement System (ERS) was established in 1921. In 1966, the New York State Legislature created the Police and Fire Retirement System (PFRS). Together, they make up the System. The assets of ERS and PFRS are held in the Common Retirement Fund (the Fund) and managed by the Division of Pension Investment and Cash Management.

The System offers retirement benefits for members who reach specific ages or have completed a specified number of years of service, depending on the system and plan they are enrolled in. At the end

of fiscal year 2005-06, there were a total of 995,536 members, retirees and beneficiaries, and 3,001 participating employers.

## Funding

The System's funding objective is to meet long-term benefit promises through employer contributions that remain level as a percent of member payroll. Annual employer contributions are determined on an actuarial basis and actual employer contributions are the greater of a minimum contribution of 4.5 percent of member payroll or actuarial contributions. Employer contributions have returned to their designed long-term levels after many years of very small contributions. The System remains well-funded and a detailed discussion of its funding is provided in the Actuarial Section of this report.

## Investments

To meet our obligations to pensioners, members and beneficiaries, the Fund's assets are diversified over a number of investments, and a host of different investment strategies are employed to control risk. In the past year, the Fund returned 14.59 percent.

Additionally, to maximize the value of stock owned by the Fund, we have been at the forefront of corporate reform, working with various companies and corporate boards on a host of different issues ranging from environmental and labor principles to accounting and executive compensation standards.

## Accounting Practices

Our staff is responsible for identifying control objectives relating to the protection of assets and ensuring that all transactions are properly recorded to permit the preparation of financial statements in accordance with generally accepted accounting principles. We are responsible for the design, implementation and maintenance of adequate internal controls to provide reasonable assurance that control objectives are achieved. The internal control system includes the organization plan, the appropriate segregation of duties and responsibili-

ties, sound practices in the performance of duties, and personnel with capabilities commensurate with their responsibilities. The internal controls in effect during the fiscal year ended March 31, 2006, adequately safeguard the System's assets and provide reasonable assurance regarding the proper recording of financial transactions.

GASB Statement No. 34 requires that we provide a narrative introduction, overview and analysis of the System's financial activities in the form of a Management's Discussion and Analysis (MD&A). This Letter of Transmittal is designed to complement the MD&A and should be read in conjunction with it. The MD&A can be found in the Financial Section, immediately following the report of the independent auditor.

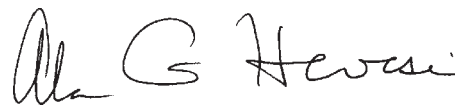

## Major Initiatives

In the past year, we launched new programs and continued working on several major initiatives to improve service to our members and employers. Highlights of these initiatives are included in the report from the Deputy Comptroller for the Retirement System.

## Acknowledgements

This report was prepared by the Divisions of Retirement Services and Pension Investment and Cash Management. It is intended to provide complete and reliable information as a basis for making management decisions, for determining compliance with legal provisions, and determining responsible stewardship of the System's assets. I am very proud and appreciative of the staff and advisors who work so diligently to assure the successful operation of the System.

Sincerely,

Alan G. Hevesi

Chief Actuary  
Metropolitan Life Insurance

# NEW YORK STATE AND LOCAL RETIREMENT SYSTEM ORGANIZATIONAL CHART

# REPORT FROM DEPUTY COMPTROLLER LAURA L. ANGLIN

---

During the past year, we continued to make improving customer service our priority. We launched several new programs, moved forward with major initiatives and made changes to existing services. All of these efforts help us in meeting our goal of providing members with the best services possible.

Following are some of the major projects and initiatives that were either started or continued through FY 2005-06.

## Automated Benefit Projections Now Available

Several years ago, we launched a program enabling members to project their benefits on our website using our benefit projection calculator. While this is still a useful program, these benefit projections are based solely on information supplied by the member. We realized the need to provide our members, especially those nearing retirement, with benefit projections that were more comprehensive and precise. Therefore, we created a new program where members can call our automated information line and request a projection of their benefit based on their Retirement System records.

These projections show members what their final average salary will be, how much they will receive under the various options, what their loan balances are, and who they have designated as beneficiaries, among other things. In addition to providing an estimate of what their pension will be, the projections are an excellent tool for those thinking about retirement because they give members an idea of what information we have in our records while reminding them of the importance of paying off loans or requesting past service credit. The sooner a potential retiree has this information, the better off he or she will be.

## New Feature Improves Employer Reporting

For the past several years, participating employers have been able to use our Retirement Internet Reporting (RIR) program to submit monthly reports with their employees' service, salary and contribution information via the Internet. This past year, we added a feature to this highly popular program – Retirement Adjustment Reporting – which employers can use to submit adjustments to these reports online. Previously, employers had to fill out and mail in a paper report. Now, they can do it electronically which saves time for both employers and us, and helps ensure the accuracy of these reports.

## Focus Groups Result in Stronger Employer Partnership

Strengthening our partnership with employers remained a high priority for us. Since we rely on employers for service and salary information we use to determine benefits for members when they retire, it is vitally important that this relationship remains strong. To find out how employers thought we could improve our services to them, we held focus groups with participating employers throughout the State as a follow-up to surveys we conducted.

In the focus groups, we were able to talk one-on-one with employers and ultimately received more than 100 suggestions on how we can make our working relationship more productive. Some of these, such as providing more online and email information, we anticipate implementing in the near future. Other suggestions will take more time because they require considerable development and testing on our part. We will continue working closely with employers as we move forward with these and other suggestions. The result will be better customer service for their employees – our members.

## Consultations by Appointments Continue to Grow

Our 16 consultation sites throughout New York State provide members with the opportunity to have one-on-one interviews with our Information Representatives. These consultations are especially important to those nearing retirement and who have specific questions about their circumstances. In the past fiscal year, we added appointment scheduling to more sites and plan to provide it at all of our sites by the end of the next fiscal year. This ensures that our Information Representatives have member information accessible for the interview and members are seen in a timely manner.

## Consultation Site Redesign

Approximately 12,000 people visit our Albany, New York consultation site each year, making this our busiest office. While we have been scheduling appointments here for years, we still receive a lot of walk-in customers with routine questions. When we surveyed walk-in members and retirees visiting the office, many said they were concerned about lack of privacy and wait times at the reception desk. In response, we redesigned the space to add more offices and now have staff dedicated solely to assisting walk-in customers.

## Loan Application Revised and Easier to Complete

We processed approximately 82,910 loan applications during FY 2005-06. In the past several years, new laws were enacted resulting in our loan application becoming somewhat more complicated for members to complete. In response to requests from members and employers, we redesigned and reorganized our loan application to be more user-friendly and have now included step-by-step instructions. We removed a lot of the explanatory text from the application and moved it to a new Instructions and Information page. To ensure the new application would be completed correctly, we held several focus groups and made revisions based on their feedback. The response to the new application was extremely positive with more members completing the required information correctly.

## Responding to Our Pensioners' and Beneficiaries' Needs

### Retirement System Employees Reach Out to Hurricane Katrina Victims

Like many other retirement systems in the country, we had pensioners and beneficiaries living in the Gulf Coast region devastated by Hurricane Katrina. In the days following the disaster, we quickly determined how many of our retirees lived in the region and worked with the Postal Service to determine where mail for those in the damaged areas could be routed to or held. By the time we received calls from those who had lived in these areas and did not receive their pension checks, we already had staff prepared to help minimize delays in the issuing of replacement checks. Within a short amount of time, we had either made contact or verified the whereabouts of all of the affected retirees and beneficiaries.

## Moving Forward on Other Major Initiatives

We made substantial progress on several major initiatives that were started in fiscal year 2004-05.

### Self-Service Prepares for Launch

We continued to move forward with this web-based, self-service program and anticipate the project launching in the near future. Once it goes "live," members will be able to view their current contribution balance, beneficiary designations and other personal membership information online. Retirees will be able to view the details of their last pension payment, including deductions and withholding amounts.

### Scanning and Imaging Enters Test Phase

With millions of paper file folders located in multiple facilities, this project is vital to our future. Once member files are scanned, employees will have immediate computer access to electronic member information, enabling them to better serve our customers. Scanning folders will also help to protect and preserve information in the paper folders. Final testing and training started late this past fiscal year and our scanning pilot is scheduled to start in this fiscal year.

## Redesigning Our Technology

We continued to make progress toward the goal of replacing our existing computer system with a new technology system. We began a meticulous analysis of how we currently perform every one of our business processes – our everyday work. Eventually, this information will be used to help us make an informed decision about new computer technology that will serve our business needs far into the future. We do not anticipate having a new system for another few years. However, we are extremely happy about the significant steps we have made so far toward reaching this goal and, ultimately, improving customer service in the future.

## New Laws Affect Members and Retirees

### World Trade Center Aftermath

Chapters 93 and 104 (Laws of 2005) establish a presumption making certain people eligible for an accidental disability retirement benefit. To be eligible, they must have participated in the World Trade Center rescue, recovery or clean up efforts, and contracted certain diseases or become disabled. In response to this law, we created and distributed brochures and applications to participating employers and other interested parties. We also highlighted the information in our newsletters, on our website, where we created an entire section devoted to this issue, and in *E-News*, our electronic newsletter.

### Lung Presumption Available for Firefighters

Chapter 89 (Laws of 2005) amends an existing lung disease presumption for firefighters. It provides an additional presumption that all lung disease-related disabilities and deaths are the result of an accident in the performance-of-duty, unless it can be proven otherwise.

### Benefits for Survivors of Those Serving in Military

Chapter 105 (Laws of 2005) provides death benefits and health insurance coverage to eligible survivors of public employees who are ordered to

active duty, other than for training purposes, with any branch of the armed forces of the United States, and who die while on such active duty. It grants accidental death benefits to eligible survivors by deeming such deaths to have been sustained in the performance-of-duty, and the natural and proximate result of an accident.

### Patriot Plan Extension Provides Loan Repayment Relief

Chapter 150 (Laws of 2005) extends provisions of the Patriot Plan for one year. It allows public retirement systems to suspend loan repayments for members on active military duty. Members can defer loan repayments until their active duty is completed and the loan repayment time is extended by the length of time they served.

### Service Credit for Military Service

Chapter 326 (Laws of 2005) allows certain members who are called to active military duty on or after September 11, 2001 and prior to January 1, 2006, to receive service credit for the time they are serving in the military without making member contributions for this credit.

As you can see, this is an exciting time for our Retirement System. We have made significant customer service improvements and will continue to do more. I look forward to updating you on these and other projects next year.

# BY THE NUMBERS

## Members and Retirees

Overall membership in the System is 995,536. This includes 653,291 members and 342,245 retirees and beneficiaries. Both of these numbers continue to climb, with the number of retirees increasing more quickly than members. For example, in 1990, retirees represented 26 percent of the System's members. By FY 2006, that number had increased to approximately 34 percent.

The value of the pension fund's net assets at the end of the fiscal year was \$142.6 billion.

Benefit payments continue to rise, reflecting improvements in final average salaries over the past decades, cost-of-living adjustment (COLA) payments and benefit improvements enacted over the years. For example, in 1996, benefit payments were approaching \$2.9 billion, while this year's payments totaled more than \$6 billion.

## Retirees in New York State

Of the 342,245 retirees and beneficiaries in the System, 264,096 (77 percent) remain New York State residents. As such, benefit payments surpassing \$4.6 billion this year alone reach the State's communities and businesses, representing the System's greatest impact on the State's economy.

## Annual Benefit Payments Within New York State

As of March 31, 2006

County	Recipients	Annual Payments	County	Recipients	Annual Payments

## Financial Section

---

When new members become part of the Retirement System, we help them understand their retirement benefits and how those benefits contribute to their financial security.

## INDEPENDENT AUDITORS' REPORT

To the Trustee of  
New York State and Local Retirement System:

We have audited the accompanying statement of plan net assets of the New York State and Local Retirement System ("the System") as of March 31, 2006, and the related statement of changes in plan net assets for the year then ended. These financial statements are the responsibility of the System's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the System's internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the plan net assets of the System as of March 31, 2006, and the changes in plan net assets for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The Management's Discussion and Analysis and the Required Supplementary Information as listed in the foregoing table of contents are not a required part of the basic financial statements but are supplementary information required by accounting principles generally accepted in the United States of America. This supplementary information is the responsibility of the System's management. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. However, we did not audit such information and we do not express an opinion on it.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the System's basic financial statements. The Additional Supplementary Information is presented for purposes of additional analysis and is not a required part of the basic financial statements. This supplementary information is the responsibility of the System's management. The Additional Supplementary Information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole. The introduction, investment, actuarial and statistical sections of this report have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on them.

# MANAGEMENT'S DISCUSSION AND ANALYSIS

The following overview of the financial activity of the New York State and Local Retirement System (the "System") for the fiscal year ended March 31, 2006 is intended to provide the reader with an analysis of the System's overall financial position. This Management's Discussion and Analysis ("MD&A") should be read in conjunction with the basic financial statements of the System which follow.

## Financial Highlights

- The net assets of the System held in trust to pay pension benefits were \$142.62 billion as of March 31, 2006. This amount reflects an increase of \$14.58 billion from the prior fiscal year. This change is primarily the result of the net appreciation of the fair value of the investment portfolio.
- The System's funding objective is to meet long-term benefit obligations through member and employer contributions and investment earnings.

## Overview of the Financial Statements

The financial statements consist of the statement of plan net assets, statement of changes in plan net assets, and the notes to the financial statements. The required supplementary information that appears after the notes to the financial statements is not a required part of the financial statements but present supplementary information required by the Government Accounting Standards Board.

The statement of plan net assets includes information about the System's assets, liabilities, and net assets as of the close of the System's fiscal year. This statement provides information about the fair value and composition of net assets.

The statement of changes in plan net assets presents the changes to the System's net assets for the fiscal year including investment income and appreciation from the investment portfolio and

contributions from members and employers. Benefits and administrative expenses paid by the System are included under the deductions section of the statement.

The notes to the financial statements and the required supplementary information are an integral part of the basic financial statements and provide additional information about the plans of the System, significant accounting policies and contributions and reserves to the System.

The required supplementary schedules include information about the aggregate actuarial funding method, which is utilized by the System to maintain a fully funded System, the cost-of-living adjustment made available to pensioners, and significant actuarial assumptions used to determine employer contributions. In addition, the funding progress, with employer contributions for the current year and the previous five years, is reported.

## Analysis of Overall Financial Position of the System

The purpose of the System's investments is to provide for the long-term growth, while also ensuring a reliable cash flow that meets the funding requirements of the near-term pension obligation. To achieve these goals, the investments are efficiently allocated to a variety of asset types and strategies so that they meet the current funding needs and future growth requirements of the pension liability. Equity investments are included for their long-term return and growth characteristics, while fixed income assets are added to the allocation for their ability to control investment risk and provide for a reliable cash flow that meets the funding requirements of the pension payments.

Statement of Plan Net Assets as of March 31, 2006, as compared to March 31, 2005 follows:

(In thousands)				
	2006	2005	Dollar Change	Percentage Change
<b>Assets:</b>				
Investments	\$140,453,287	\$126,083,554	\$14,369,733	11.4%
Securities lending collateral—invested	21,646,548	19,314,532	2,332,016	12.1%
Receivables and other assets	3,597,838	3,449,108	148,730	4.3%
Total assets	165,697,673	148,847,194	16,850,479	11.3%
<b>Liabilities:</b>				
Securities lending collateral, due	21,646,548	19,314,532	2,332,016	12.1%
Other liabilities	1,431,033	1,494,948	(63,915)	(4.3)%
Total liabilities	23,077,581	20,809,480	2,268,101	10.9%
Net assets held in trust for pension benefits	\$142,620,092	\$128,037,714	\$14,582,378	11.4%

The plan net assets of the System totaled \$142.62 billion as of March 31, 2006, an increase of \$14.58 billion from the prior fiscal year.

The table below shows the detail of the invested assets portion of all plan assets. These invested assets totaled \$140.45 billion as of March 31, 2006.

(In thousands)				
Investment Category	2006	2005	Dollar Change	Percentage Change
Short-term investments	\$6,619,284	\$2,602,502	\$4,016,782	154.3%
Government bonds	19,775,579	20,100,078	(324,499)	(1.6)%
Corporate bonds	9,113,416	9,210,738	(97,322)	(1.1)%
Domestic stocks	68,530,310	63,387,726	5,142,584	8.1%
International stocks	20,020,551	17,529,460	2,491,091	14.2%
Alternative investments	9,800,792	7,337,107	2,463,685	33.6%
Real property owned	5,430,685	4,634,083	796,602	17.2%
Mortgage loans	1,162,670	1,281,860	(119,190)	(9.3)%
Total investments	\$140,453,287	\$126,083,554	\$14,369,733	11.4%

The largest contributor to the dollar increase in invested assets of \$14.37 billion was the domestic stock assets, which represented approximately 49% of the total investments and increased \$5.14 billion from the previous fiscal year. International equity assets also contributed to the increase, representing approximately 14% of the total investments. International equity assets increased \$2.49 billion from the previous fiscal year. The increase in these assets is primarily attributable to the positive performance in world equity markets.

Statement of Changes in Plan Net Assets for the year ending March 31, 2006, as compared to year ending March 31, 2005 follows:

(In thousands)				
	2006	2005	Dollar Change	Percentage Change
<b>Additions:</b>				
Net investment income	\$17,615,876	\$9,679,978	\$7,935,898	82.0%
Total contributions	3,117,876	3,314,919	(197,043)	(5.9)%
Total additions	20,733,752	12,994,897	7,738,855	59.6%
<b>Deductions:</b>				
Total benefits paid	(6,072,868)	(5,690,865)	(382,003)	6.7%
Administrative expenses	(78,506)	(65,324)	(13,182)	20.2%
Net deductions	(6,151,374)	(5,756,189)	(395,185)	6.9%
Net increase	14,582,378	7,238,708	7,343,670	101.5%
Net assets held in trust for pension benefits—beginning of year	128,037,714	120,799,006	7,238,708	6.0%
Net assets held in trust for pension benefits—end of year	\$142,620,092	\$128,037,714	\$14,582,378	11.4%

The decrease in total contributions of \$197 million is due to the change in employer contribution rates. ERS rates decreased from 12.9% last year to 11.3% this year. PFRS rates decreased from 17.6% last year to 16.3% this year. Rates are determined utilizing the aggregate actuarial funding method.

## Economic Factors and Rates

As displayed by the tables and related narrative discussion, during the System's 2005-06 fiscal year, investments increased as a result of economic and market conditions. The Common Retirement Fund experienced positive returns for the year with a total return of 14.59%. The performance reflects positive corporate earnings and strong worldwide economic growth despite rising oil prices and interest rates. The domestic equity portfolio returned 14.29% for the year; while the Fund's international equity holdings returned 27.33%. The fixed income portfolio, which represents approximately 26.1% of the Fund's total assets and provides the cash required by the pension payments, returned 1.73% for the year. The private equity and real estate portfolios also experienced positive results. They returned 29.25% and 35.18%, respectively.

## Requests for Information

- This financial report is designed to provide a general overview of the New York State and Local Retirement System finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the New York State and Local Retirement System, 110 State Street, Albany, New York 12244-0001.

# NOTES TO FINANCIAL STATEMENTS

## YEAR ENDED MARCH 31, 2006

---

### 1. Description of Plans

The Comptroller of the State of New York serves as sole trustee of the Common Retirement Fund (the "Fund") and administrative head of the New York State and Local Employees' Retirement System ("ERS"), the New York State and Local Police and Fire Retirement System ("PFRS"), and the Public Employees' Group Life Insurance Plan ("GLIP"). GLIP provides death benefits in the form of life insurance. These entities are collectively referred to as the New York State and Local Retirement System (the "System"). All net assets of the System are held in the Fund which was established to hold all net assets and changes in net plan assets allocated to the System. In these statements, GLIP amounts are apportioned and included in either ERS or PFRS.

System benefits are provided under the provisions of the New York State Retirement and Social Security Law and are guaranteed by the State Constitution. Once a public employer elects to participate in the System, the election is irrevocable. The System cannot be terminated and plan benefits cannot be diminished or impaired. Benefits can be reduced for future members only by an act of the State Legislature.

Generally, members of the System are employees of New York State (the "State") and employees of its municipalities, other than New York City. Employees of non-State participating employers constituted approximately 64% for ERS and 83% for PFRS of the April 1, 2005 System's membership.

The ERS and the PFRS are cost-sharing multiple-employer defined benefit pension plans. At March 31, 2006, there were 3,001 participating government employers in the System, including the State.

The number of members and benefit recipients as of April 1, 2005, the date of the most recent actuarial valuation, was:

	ERS	PFRS	Total
Retirees and beneficiaries currently receiving benefits	306,531	27,720	334,251
Inactive members vested	50,459	1,563	52,022
Active members	561,951	33,785	595,736
Total members and benefit recipients	918,941	63,068	982,009

Membership, benefits, and employer and employee obligations to contribute are described in the New York State Retirement and Social Security Law and are outlined as follows:

**Membership Tiers**—Pension legislation enacted in 1973, 1976, and 1983 established distinct classes of membership. For convenience, the System uses a tier concept to distinguish these groups, generally:

**Tier 1**—Those persons who last became members of the ERS before July 1, 1973, or PFRS before July 31, 1973.

**Tier 2**—The ERS—those persons who last became members on or after July 1, 1973, but before July 27, 1976; or PFRS—those persons who became members on or after July 31, 1973.

**Tier 3**—The ERS—generally those persons who are State correction officers who last became members on or after July 27, 1976, and all others who last became members on or after July 27, 1976, but before September 1, 1983.

**Tier 4**—The ERS—generally, except for correction officers, those persons who last became members on or after September 1, 1983.

**Vesting**—Members with 5 years or more of service are 100% vested.

**Benefits**—

(1) Tier 1 and Tier 2

Most Tier 1 and Tier 2 members are on a plan with minimum retirement age of 55, which provides for 1.67% of final average salary for each year of service less than 20 years. Generally, the benefit with more than 20 years is 2% of final average salary for each year of service. Tier 2 members retiring between ages 55 to age 62, with less than 30 years of service

receive reduced benefits. As a result of Article 19 of the Retirement and Social Security Law, eligible Tier 1 and Tier 2 members, whose date of membership is prior to July 27, 1976, will receive an additional month of service credit for each year of credited service they have at retirement, up to a maximum of 24 months.

(2) Tier 3 and Tier 4

Except for Tier 3 correction officers, generally the benefit is 1.67% of final average salary for each year of service if the service is less than 20 years. For 20 to 30 years service, the benefit is 2% of final average salary for each year of service. An additional benefit of 1.5% of final average salary is applied for each year of service over 30 years. A member must be age 62 with 5 years of service or at least age 55 with 30 years service to retire with full benefits. Reduced retirement benefits are available if retirement occurs from age 55 to 62.

(3) Special Plans

The 25-Year Plans allow a retirement after 25 years of service of one-half of final average salary, and the 20-Year Plans allow a retirement after 20 years of service of one-half of final average salary. These plans are available to certain PFRS members, sheriffs, and correction officers.

(4) Ordinary Disability Benefits

Generally, ordinary disability benefits, usually one third of salary, are provided after 10 years of service; in some cases, after 5 years of service.

(5) Accidental Disability Benefits

For all eligible Tier 1 members and Tier 2 ERS members, the benefit is a pension of 75% of final average salary with offset for any workers' compensation benefits received. For Tier 1 and

Tier 2 PFRS members, the benefit is a pension of 75% of final average salary with offset for any workers' compensation benefits received. The Tier 3 and Tier 4 ERS benefit is the ordinary benefit with the years of service eligibility requirement dropped.

(6) Ordinary Death Benefits

Death benefits are payable upon the death, before retirement, of a member who meets eligibility requirements as set forth by law. The first \$50,000 of an ordinary death benefit is paid in the form of group term-life insurance. The benefit is generally three times salary. For most members, there is also a reduced post-retirement ordinary death benefit.

(7) Post-retirement Benefit Increases

A cost-of-living adjustment is provided to: (i) all pensioners who have attained age 62 and have been retired for 5 years; (ii) all pensioners who have attained age 55 and have been retired for 10 years; (iii) all disability pensioners regardless of age who have been retired for 5 years; and (iv) ERS recipients of an Accidental Death Benefit regardless of age who have been receiving such benefit for 5 years. This cost-of-living adjustment is a percentage of the annual retirement allowance of the eligible member as computed on a base benefit amount not to exceed \$18,000 of the annual retirement allowance. The cost-of-living percentage shall be 50% of the annual Consumer Price Index as published by the US Bureau of Labor, but can not exceed 3%.

## 2. Summary of Significant Accounting Policies

**Basis of Accounting**—The accompanying financial statements are prepared using the accrual basis of accounting. Revenue is recognized when earned and liabilities are recognized when incurred. Benefits and refunds are recognized when due and payable in accordance with the terms of the plan. Employer contributions are recognized when billed. The amounts shown on the financial statements are allocated between ERS and PFRS based on each system's equity in the Common Retirement Fund.

**Investments**—Investments are reported at fair value. Stocks traded on a national or international

exchange are reported at market value at current exchange rates. Bonds are primarily reported at market values obtained from independent pricing services. Mortgages are valued on the basis of future principal and interest payments, and are discounted at prevailing interest rates for similar instruments. The fair value of real estate investments is based on independent appraisals made every three years or according to the fund agreement. Investments that do not have an established market are reported at estimated fair value. The Fund trades in foreign exchange contracts in the normal course of its investing activities in order to manage exposure to market risks. Such contracts, which are generally for a period of less than one year, are used to purchase and sell foreign currency at a guaranteed future price. These contracts are recorded at market value using foreign currency exchange rates.

**Securities Lending**—Section 177-D of the New York State Retirement and Social Security Law authorizes the Fund to enter into security loan agreements with broker-dealers and New York State or national banks. The Fund has designated its master custodian bank to manage a securities lending program. This program is subject to a written contract between the Fund and the Custodian who acts as Security Lending Agent for the Fund. The Custodian is authorized to lend securities within the borrower limits and guidelines established by the Fund. Types of collateral received from borrowers for securities loaned are cash, government securities, and federal instrumentalities. The Custodian is authorized to invest the cash collateral in short-term investments that are legal for the Fund. These include domestic corporate and bank notes, US Treasuries, obligations of Federal agencies, and repurchase agreements. All rights of ownership to government securities pledged as collateral remain with the borrower except in the event of default. The Fund has not experienced any losses resulting from the default of a borrower or lending agent during the year ended March 31, 2006 or in the history of the program.

The Fund lends domestic fixed income, domestic equity, and international equity securities to broker-dealers approved by the Fund. Collateral for securities loaned equals 102% of fair market value for domestic securities and 105% for international

securities. Investment guidelines provided to the Custodian by the Fund minimize the risk that the cash collateral could be invested in securities which may default. The Custodian acknowledges responsibility to reimburse the Fund for losses, which might arise from managing the program in a manner inconsistent with the contract. The Fund manages its market rate risk by recording investments at market value daily and maintaining the value of the collateral held by the Fund in excess of the value of the securities loaned. For the year ended March 31, 2006, the Fund had no credit risk resulting from Securities Lending.

All security loans can be terminated on demand by either the Fund or borrower. The average term of the open security loans is one day while the overall average term to maturity of invested collateral for the Fund's open loans is 22 days. To provide sufficient liquidity, the policy of the Fund is to maintain a minimum of 10% of collateral in overnight investments.

**Member Loan Programs**—Members are entitled to participate in a loan program that allows them to borrow up to 75% of their member contributions. Repayment of outstanding amounts is generally made through payroll deductions within five years. The interest rate charged for member loans is fixed at 1% below the actuarial interest rate at the time the loan is granted. The loan rate as of March 31, 2006 was 7%.

**Benefits Payable**—Benefits payable represents payments due on account of death and retirement on or before March 31, 2006, for which final calculations had not been completed and paid as of that date.

**Other Liabilities**—Other liabilities include a cash managed balance maintained on a daily basis, which represents disbursements issued on previous business days, which are funded when presented for payment at the issuing bank.

**Use of Estimates**—The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingencies. Estimates also affect the reported amounts of income/additions and expenses/deductions during the reporting period. Actual results could differ from those estimates.

### 3. Deposit and Investment Risk Disclosure

**Custodial Credit Risk For Investments**—Investment Securities are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the New York State and Local Retirement System's Common Retirement Fund, or are held either by the counterparty or the counterparty's trust department or agent but not in the name of the Fund.

Equity and fixed income investments owned directly by the Fund which trade in the United States ("US") markets are held at the Fund's custodian, in separate accounts, in the name of the Comptroller of the State of New York in Trust for the Common Retirement Fund. These securities are typically held in electronic form through the Federal Book Entry System and by the Depository Trust Company ("DTC") and its subsidiaries acting as an agent of the Fund's custodian bank. Securities held directly by the Fund, which trade in markets outside the US, are held by a subsidiary of the Fund's custodian bank in the local market, a bank performing custodial services in the local market acting as an agent for the Fund's custodian bank, and in some foreign markets, the securities are held in electronic format by a DTC subsidiary or an organization similar to DTC. Directly held investments include: short-term and long-term fixed income, and domestic and international equity separately managed accounts. The aforementioned investments have the lowest custodial risk.

Equity investments held indirectly by the Fund via limited partnerships, commingled investment funds, joint ventures, and other similar vehicles are held in custody by an organization contracted with by the general partner and/or the investment management firm responsible for the management of each investment organization.

Title to real property invested in by the Fund is held either by a real estate holding company, or a real estate investment fund. Ownership of mortgage assets is documented by the Fund's holding of original mortgage and note documents by the Office of the State Comptroller ("OSC"), Division of Pension Investment and Cash Management.

The following table summarizes the custody of investments for the Fund (in thousands):

Asset Type	March 31, 2006		Asset Type as a Percent	Custodian
	Market Value	Fund Total		
Short-term investments	\$6,619,284	\$6,619,284	4.7%	Held in the name of the Fund by the Fund's custodian bank.
Government bonds	19,775,579	19,775,579	14.1	Held in the name of the Fund by the Fund's custodian bank.
Corporate bonds	9,113,416	9,113,416	6.5	Held in the name of the Fund by the Fund's custodian bank.
Domestic stocks	61,619,285		43.8	Held in the name of the Fund by the Fund's custodian bank.
Commingled domestic stocks	6,911,025		4.9	Custody arrangements contracted by fund managers.
Total domestic stocks		68,530,310		
International stocks	12,863,879		9.2	Held in the name of the Fund by the Fund's custodian bank.
Commingled international stocks	7,156,672		5.1	Custody arrangements contracted by fund managers.
Total international stocks		20,020,551		
Alternative investments	9,800,792	9,800,792	7.0	Custody arrangements contracted by General Partners.
Separate account real estate	4,205,464		3.0	Title to real estate held in the name of real estate holding Entity.
Real estate funds	1,225,221		0.9	Title to real estate held as directed by fund manager.
Total real property owned		5,430,685		
Mortgage loans	1,162,670	1,162,670	0.8	Ownership established by legal documents for each mortgage.
<b>Total</b>	<b>\$140,453,287</b>	<b>\$140,453,287</b>	<b>100.0%</b>	

**Custodial Credit Risk For Deposits** – Deposits are exposed to custodial credit risk if the deposits are not covered by depository insurance or deposits are uncollateralized, collateralized with securities held by the pledging financial institution, or collateralized with securities held by the pledging institution’s trust department or agent but not in the name of the Fund.

The Division of Pension Investment and Cash Management monitors deposit balances for the purpose of determining collateralization levels. Collateral sufficient to cover all uninsured deposits is held at the Fund’s custodial bank.

**Interest Rate Risk** – The risk that changes in interest rates will adversely affect the fair value of the Fund’s fixed income securities.

The price volatility of the Fund’s fixed income holdings are measured by duration. The Fund attempts to mitigate price volatility by matching the duration of the assets with the duration of the retired lives liabilities so that any change in the market value of the assets resulting from a change in interest rates will result in a similar change in the value of the liabilities.

As of March 31, 2006, the duration of the fixed income portfolio is as follows:

<b>Bond Category</b>	<b>Duration (In Years)</b>	<b>Percentage of Bond Portfolio</b>
Treasury	9.68	20.7%
TIPS	13.69	33.7
Agency	3.63	8.1
Mortgage	4.33	10.4
Corporate	5.95	27.1
Total	8.98	100.0%

**Credit Risk**—New York State statutes and the System’s investment policies require that corporate fixed income obligations must be investment grade at the time of their acquisition. Long-term bond ratings as of March 31, 2006, are as follows (in thousands):

	<b>Market Value</b>	<b>Moody’s Rating</b>	<b>Percentage of Bond Portfolio</b>
US Treasury bonds	\$3,732,541	Not Rated <sup>1</sup>	12.9%
US Treasury notes	395,910	Not Rated <sup>1</sup>	1.4

<b>Total</b>	<b>\$28,888,995</b>		<b>100.0%</b>

Notes:

1. US Treasury Bonds, Notes, Strips and Inflation Indexed Securities are obligations of the US government or explicitly guaranteed by the US government and therefore are not considered to have credit risk.
2. These securities were rated Aa or higher when purchased.
3. These securities are not individually rated. The US government sponsored enterprises which issued and guarantees these securities are rated Aaa.

**Concentration of Credit Risk** – The risk of loss attributed to the magnitude of a Fund’s investment in a single issuer.

Issuer limits for investments held by the Fund are established for each investment area by New York State Retirement and Social Security Law, Article 2, Section 13, and Article 4A, Sections 176, 177, and 313, and policy guidelines adopted by the Comptroller of the State of New York, Division of Pension Investments and Cash Management.

Short term fixed income investments are generally limited to the following investment types maturing in one year or less:

Obligations for which the full faith and credit of the United States is pledged to provide payment of interest and principal.

Obligations issued by any federal home loan bank or obligations fully guaranteed as to principal and interest by, the Federal National Mortgage Association, or Federal Home Loan Mortgage Corporation.

Commercial paper which has the highest rating by two nationally recognized rating services. A maximum of 15% or \$500 million of the short term portfolio, whichever is greater, may be invested in any one commercial paper issuer.

Simultaneous purchase and sale of US Treasury obligations may be executed with Primary Government Dealers. A maximum of \$200 million may be invested with any one Primary Government Dealer.

Fixed income investments are generally limited to the following investment types with maturities longer than one year:

Obligations for which the full faith and credit of the United States is pledged to provide payment of principal and interest.

Obligations payable in US dollars issued by any department, agency or political subdivision of the US Government or issued by any corporation, company or other issuer of any kind or description created or existing under the laws of the United States, any state of the United States, District of Columbia or Commonwealth of Puerto Rico and obligations of Canada or any province or city of Canada provided each obligation shall be rated investment grade by two nationally recognized rating services. The aggregate investment by the Fund in the obligations of any one issuer shall not exceed 2% of the assets of the Fund or 5% of the direct liabilities of the issuer.

Interest bearing obligations payable in United States funds which at the time of investment are rated in one of the three highest rating grades by each rating service, which has rated such obligations. The aggregate amount invested in the obligations of any single issuer may not exceed 1% of the assets of the Fund.

Bonds issued or guaranteed by the State of Israel payable in US dollars, not to exceed 5% of the assets of the Fund.

Obligations issued or guaranteed by the international bank for reconstruction and development, inter-American development bank, Asian development bank or the African development bank.

**Foreign Currency Risk**—The System’s investment policies permit it to invest up to 15% of its assets in publicly traded international equity investments. The System’s current position in such equity securities, invested in directly and through commingled funds, is 14.6% of invested assets.

Non-US Dollar denominated equity investments as of March 31, 2006, are as follows (in thousands):

<b>Currency</b>	<b>US Dollar Market Value</b>
Euro	\$4,160,238
Japanese Yen	3,340,351
British Pound Sterling	2,343,881
Swiss Franc	885,544
Australian Dollar	426,725

South Korean Won	16
Other	2
Total	\$39,077

Forward foreign currency contracts to purchase foreign currency entered into by the System as of March 31, 2006, are as follows (in thousands):

US Dollar	\$92,882
Australian Dollar	29,600
Euro	89,692
Japanese Yen	(108,725)
British Pound Sterling	(50,653)
Hong Kong Dollar	(49,573)
Swiss Franc	(2,672)
Total (Net)	\$551

Note: For non-US Dollar currencies, a positive number represents market value of currency contracts to purchase foreign currency in excess of the market value currency contracts to purchase US Dollars with that currency. A negative number represents the market value of contracts to sell foreign currency in excess of contracts to purchase that currency with US Dollars. The positive number for US Dollars represents the amount the market value of contracts to sell US Dollars to purchase foreign currency exceeds the value of contracts to purchase US Dollars by selling foreign currency.

The System classifies as forward contracts those currency contracts for which the settlement date is more than two days after trade date.

Spot currency contracts to purchase foreign currency entered into by the System as of March 31, 2006, are as follows (in thousands):

US Dollar	\$8,176
Euro	2,072
Japanese Yen	2,007
South African Rand	(158)
Danish Krone	(208)
New Zealand Dollar	(220)
Canadian Dollar	(459)
Australian Dollar	(951)
Hong Kong Dollar	(1,052)
British Pound Sterling	(1,251)
Norwegian Krone	(1,260)
Swiss Franc	(6,654)
Total (Net)	\$42

Note: For non-US Dollar currencies, a positive number represents market value of currency contracts to purchase foreign currency in excess of the market value currency contracts to purchase US Dollars with that currency. A negative number represents the market value of contracts to sell foreign currency in excess of contracts to purchase that currency with US Dollars. The positive number for US Dollars represents the amount the market value of contracts to sell US Dollars to purchase foreign currency exceeds the value of contracts to purchase US Dollars by selling foreign currency.

Agreements to purchase or sell foreign currency which settles in two days or less are recorded by the System as direct purchases of currency. As such, no currency gains or losses are recognized related to the change in the foreign exchange spot rates during the settlement period for these transactions.

Foreign denominated alternative investments and real property owned included in the statement of plan net assets as of March 31, 2006, are as follows (in thousands):

<b>Alternative Investments</b>	
Total alternative investments	\$9,800,792
Alternative investments reporting with non-US Dollar financial statements:	
Euro	\$833,999
British Pound Sterling	40,042
Subtotal	874,041
Approximate market value of non-US Dollar investments reported in US Dollar based alternative investments financial statements	1,883,282
Total approximate market value of alternative investments in non-US Dollar based companies	\$2,757,323
Approximate percentage of alternative investments domiciled outside of the United States	28.1%

<b>Real Property Owned</b>	
Total market value of real property owned	\$5,430,685
Real Estate Funds reporting with non-US Dollar financial Statements:	
Euro	\$10,765
Approximate US Dollar market value of real property owned or made outside the United States	429,631
Total approximate market value of real property owned, made or located outside the United States	\$440,396
Approximate percentage of total real property owned, made or located outside the United States	8.1%

The overall portfolio summary of foreign denominated investments as of March 31, 2006, is as follows (in thousands):

<b>Total Portfolio Summary</b>	
Market value of all investments plus net forward currency contracts	\$140,453,838
Approximate total investments made outside the United States	\$23,518,670

## 4. Contributions

**Contributions Required**—Participating employers are required under the New York State Retirement and Social Security Law to contribute annually to the System. Annual bills for employer contributions accrue interest at the actuarial interest rate applicable during the year. For fiscal year ended March 31, 2006, the applicable interest rate was 8%.

**System Expenses**—The System receives an allocation from employer contributions which are designated by law to cover all non-investment

related operating expenses. Investment expenses are offset directly by investment income.

**Funding Policy**—Funding of the System is accomplished through member and employer contributions and the investment earnings on these contributions, according to the New York State Retirement and Social Security Law. The aggregate actuarial funding method is used by the System.

Generally, participating employers that have adopted the same benefit plans contribute at the same rate of payroll. The total employer contribution

rate as a percentage of salary includes rates for administrative expenses, GLIP, and supplemental benefits. GLIP is a one-year term insurance plan. Consequently, the GLIP rates are determined so as to pay for the current year's GLIP costs. Similarly, the administrative rates are determined so as to pay the current year's administrative expenses. Employers may make other contributions due to legislation, such as retirement incentives, the 17-year amortization, the 10-year amortization of part of their FYE 2005 bill, and deficiency payments (which an employer may incur when joining the System and are payable for up to 25 years). The average employer contribution rates below exclude certain contributions such as the 10-year and 17-year amortization. The average employer contribution rate for PFRS for fiscal year ended March 31, 2006 was approximately 16.3% of payroll. The average contribution rate for ERS for fiscal year ended March 31, 2006, including incentive contributions, was approximately 11.3% of payroll.

Changes to employer contribution requirements during the year ended March 31, 2006, were as follows:

- Allowed all employers to amortize over 10 years certain amounts of their fiscal year ending 2006 bill that are over 9.5% of payroll.
- Allows local employers to amortize over 10 years certain amounts of their fiscal year ending 2007 bill that are over 10.5% of payroll.

**Required Contribution Rates**—Tier 3 and 4 members must contribute 3% of their salary. As a result of Article 19 of the New York State Retirement and Social Security Law, eligible Tier 3 and Tier 4 employees, with a membership date on or after July 27, 1976, who have 10 or more years of membership or credited service with a System, are not required to contribute. Less than 1% of other members are contributory. Members cannot be required to begin making contributions or make increased contributions beyond what was required when membership began.

**Contributions Receivable**—Employers' contributions receivable are presented net of withdrawals, refunds, advance employer payments, and credits due employers.

Incentive program costs receivable from the State as of March 31, 2006, totaled \$39 million. In addition, receivable amounts from participating employers include \$32.8 million for the incentive program costs and \$78.3 million for new plan adoptions and retroactive membership.

Chapter 260 of the Laws of 2004 authorized employers to amortize over 10 years, at 5% interest, the portion of their annual bill for fiscal year ended 2005 that exceeded 7% of payroll. The amortized amount receivable from New York State as of March 31, 2006 is \$473.2 million and from participating employers is \$119 million.

Chapter 260 of the Laws of 2004 authorized employers to amortize over 10 years, at 5% interest, the portion of their annual bill for fiscal year ended 2006 that exceeded 9.5% of payroll. The amortized amount receivable from New York State as of March 31, 2006 is \$155.1 million and from participating employers is \$32 million.

## 5. System Reserves

The legally required reserves maintained by the System are fully funded and are described below:

- Pension Reserve Funds—Funds from which pensions are paid, totaled \$41.81 billion for ERS and \$8.81 billion for PFRS, as of March 31, 2006.
- Annuity Reserve Funds—Funds from which member contribution annuities are paid, totaled \$160 million for ERS and \$15 million for PFRS, as of March 31, 2006.

There are certain other additional funds maintained by the System.

## 6. Contingencies

The System is a defendant in litigation involving individual benefit payments, participant eligibility and other issues arising from its normal activities. Management of the System believes there will be no material adverse effect on the basic financial statements as a result of the outcome of these matters.

# REQUIRED SUPPLEMENTARY INFORMATION

## Schedule of Funding Progress – Year Ended March 31, 2006 (Unaudited)

The System uses the aggregate actuarial funding method that does not identify or separately amortize unfunded actuarial liabilities, therefore no schedule of funding progress is provided. The average employer contribution rates below exclude certain contributions such as the 17-year amortization and the 10-year amortization available for the fiscal year ended 2005 bills. The average employer contribution rate for PFRS for fiscal year ended March 31, 2006, was approximately 16.3% of payroll. The average contribution rate for ERS for fiscal year ended March 31, 2006, including incentive contributions, was approximately 11.3% of payroll.

Section 78 of the New York State Retirement and Social Security Law provides for a cost-of-living adjustment to: (i) all pensioners who have attained age 62 and have been retired for 5 years; (ii) all pensioners who have attained age 55 and have been retired for 10 years; (iii) all disability pensioners regardless of age who have been retired for 5 years; and (iv) ERS recipients of an Accidental Death Benefit regardless of age who have been receiving such benefit for 5 years. This cost-of-living adjustment is a percentage of the annual retirement allowance of the eligible member as computed on a base benefit amount not to exceed \$18,000 of the annual retirement allowance. The cost-of-living percentage shall be 50% of the annual Consumer Price Index as published by the US Bureau of Labor, but can not exceed 3%.

Significant actuarial assumptions used in the April 1, 2004 valuation to determine employer contributions for the year ended March 31, 2006 were:

Interest rate		8.0%
Salary scale	ERS	5.4%
	PFRS	6.8%
Decrement tables	4/1/95-3/31/00 System's experience with subsequent adjustment	
Inflation rate		3.0%

The actuarial asset value for domestic bonds and mortgages is amortized value. Short-term investments are at market value. Normally, all other investments use a five-year moving average of market values method assuming a 7% rate of expected appreciation. This method immediately recognizes regular investment income (interest and dividends) while phasing in unexpected appreciation/depreciation over a five-year period. It treats realized and unrealized gains (or losses) in the same manner. For fiscal year 2006, the April 1, 2004 valuation reflects a market restart.

## Schedule of Employer Contributions

(UNAUDITED) (In thousands)

<b>Employees' Retirement System Employer Contributions</b>				
	<b>Annual Required Contributions</b>			
<b>Year ended March 31</b>	<b>New York State</b>	<b>Local Employers</b>	<b>Total</b>	<b>Percentage Contribution</b>
2001	\$14,443	\$111,331	\$125,774	100%
2002	57,462	196,951	254,413	100%
2003	265,662	317,555	583,217	100%
2004	435,404	690,116	1,125,520	100%
2005	1,019,389	1,490,114	2,509,503	100%
2006	994,328	1,354,393	2,348,721	100%

For fiscal year ended March 31, 2002, the Annual Required Contributions ("ARC") exceeded the Employers' Contributions as shown on the Statement of Changes in Plan Net Assets due to a prior year adjustment.

<b>Police and Fire Retirement System Employer Contributions</b>				
	<b>Annual Required Contributions</b>			
<b>Year ended March 31</b>	<b>New York State</b>	<b>Local Employers</b>	<b>Total</b>	<b>Percentage Contribution</b>
2001	\$1	\$38,339	\$38,340	100%
2002	304	35,464	35,768	100%
2003	8,712	60,002	68,714	100%
2004	19,391	141,544	160,935	100%
2005	68,265	387,074	455,339	100%
2006	73,596	359,830	433,426	100%

The ARC includes the employers' normal cost, the GLIP amounts, and other supplemental amounts amortized over the collection period. In addition, due to statutory contribution provisions, State contributions may vary from the ARC to allow for under/over payment of amounts for a one-year period.

## Investment Section

---

When our members decide to retire from public service, we are there to offer assistance, answer questions, and help prepare them for this life-changing experience.

# OVERVIEW BY DEPUTY COMPTROLLER DAVID LOGLISCI

---

## Overall Objectives and Performance

The assets of the Common Retirement Fund are managed by the Division of Pension Investment and Cash Management. Its primary objectives are to grow Fund assets to meet the System's long-term pension liability and ensure sufficient cash flow for the funding requirements of monthly pension obligations. To efficiently achieve these goals, the Fund's assets are invested in a variety of asset types and strategies. Equity investments, which are historically more volatile, are included for their long-term performance and growth characteristics, while fixed income assets, with lower historical volatility, provide a reliable cash flow to meet the System's funding requirements and pension payments.

Investment returns for the fiscal year were over 14 percent, easily exceeding the Fund's 8 percent actuarial earnings assumption. Despite hurricane devastation in the Gulf States, the ongoing turmoil in Iraq and skyrocketing oil prices, the U.S. economy continued to expand and create jobs. The unemployment rate ended the year at its lowest level since July 2001, while consumer confidence rose to its highest level in almost four years. The Federal Reserve, which saw the appointment of a new Chairman, continued its tightening policy, raising the Federal funds target eight times during the Fund's fiscal year. The Fed's vigilance has produced mixed results; inflation as measured by the Consumer Price Index remains well contained, while core Producer and Personal Consumption Expenditure Price indices rose more than expected. Non-US economic growth has been brisk due to recovering economies in Europe and Japan and robust emerging market economies.

The Fund returned 14.59 percent for fiscal year 2005-06. All asset classes provided positive performance on an absolute basis. Certain asset classes including Domestic Equity, Alternative Investments and Real Estate, performed better than their benchmark indices. The Fund's successful long-term

performance record highlights the benefit of diversification and managing risk within each asset class.

## Domestic Equities

Representing approximately 50 percent of the total assets, the Fund's domestic equity portfolio returned 14.29 percent for the year, versus 14.28 percent for the domestic equity market as represented by the Russell 3000 Index – a broad market index. Large capitalization strategies, which account for 79 percent of the domestic equity portfolio, returned 12.27 percent, medium capitalization strategies, which account for 13 percent of the domestic equity portfolio, returned 21.58 percent and small capitalization strategies, which account for 8 percent of the total domestic equity portfolio, returned 23.41 percent.

During the past year, the Fund's staff continued to implement the current domestic equity structure strategy. Within domestic equity, 71 percent is managed in passive strategies, 19 percent is managed in active strategies and 10 percent is managed in enhanced index strategies.

The internally managed S&P 500, S&P 400 and S&P 600 Index Funds continue to provide low cost and efficient exposure to the domestic equity markets for the Fund. With the expanded use of trade crossing networks and alternative trading systems, the Fund continued to lower trading costs.

The Fund also continued to use minority and women-owned brokerage service providers when trading for the internally managed assets. For the fiscal year, these brokers accounted for approximately 33 percent of the total commissions. In addition, the Fund's external equity managers used women and minority-owned brokers for approximately 10 percent of their commission total.

## International Equities

The Fund's international equity portfolio was one of the largest contributors to the 2006 fiscal year's strong positive performance. The Fund's international and global equity holdings represented approximately 14.6 percent of the total assets at the end of the fiscal year. The established economies of the international stock market, as measured by the Morgan Stanley Europe, Australia and Far East (EAFE) Index, returned 24.41 percent versus 25.39 percent for the Fund's EAFE composite. The world's emerging economies, as measured by the Morgan Stanley Emerging Market Index, returned 47.45 percent versus the Fund's 48.26 percent.

During the past year, the Fund's staff continued the implementation of the international equity structure strategy. Within international equities, 83 percent is managed in the core international markets, 5 percent is managed in the global equity markets and 12 percent is managed in the emerging markets.

The Fund has continued to pursue an international equity strategy for the risk reduction and diversification it provides. The Fund's investments in the international and global markets have proven to be an integral part of the portfolio because it provides a full range of investment possibilities and many unique opportunities overseas. As of March 31, 2006, investments in developed non-U.S. markets totaled 12.4 percent, emerging markets exposure totaled 1.9 percent and global strategies totaled 0.7 percent of total assets.

## Fixed Income

The fixed income portfolio represented approximately 26.1 percent of the total assets of the Fund at the end of the fiscal year. The Fund invests in both long-term and short-term assets, each of which addresses different investment needs. The long-term fixed income portfolio provides a reliable stream of income to help address the cash flow needs of the System's pension liabilities. It also moderates the greater return volatility of the Fund's equity portfolio. The short-term fixed income portfolio provides liquidity to meet monthly pension fund payments as well as cash to fund investments in all

of the Fund's asset classes. The Fund internally manages both the long-term and short-term fixed income portfolios with the assistance of a fixed income advisor.

More than half of the long-term fixed income portfolio is held in U.S. Treasury Securities and Treasury Inflation Protected Securities (TIPS). The remainder of the long-term portfolio is comprised of government sponsored agency debentures, corporate bonds, commercial mortgage backed securities, mortgages, Yankee bonds and asset backed securities. The Fund is authorized to invest the short-term fixed income portfolio in high quality commercial paper, U.S. Treasury Bills and Agency Discount Notes.

The U. S. economy continued its healthy growth during fiscal year 2005-06 with Gross Domestic Product reaching 3.5 percent. This economic expansion together with inflationary pressures, including rising energy costs, resulted in the Federal Reserve continuing its course of measured policy tightening. The Fed raised rates from 2.75 percent to 4.75 percent in a series of one-quarter point increases during fiscal year 2005-06. Short-term Treasury yields, which most closely track the Fed Funds rate, increased markedly during the year. Long-term Treasury yields initially increased only slightly resulting in a flat yield curve. Eventually, the yield curve inverted, an event last seen in 2001. By the end of the fiscal year, the yield curve was positively sloped as growing inflationary pressures pushed long rates higher.

The Fund's core long-term fixed income portfolio returned 2.55 percent for the fiscal year ending March 31, 2006, which compares favorably to 2.24 percent for the Salomon Long Pension Fund Index and 2.26 percent for the Lehman Brothers Aggregate Bond Index. Government sponsored agency debentures and mortgage backed securities were the best performing sectors. The Fund's TIPS portfolio, which provides an important avenue for hedging inflation risk, returned .10 percent.

The Fund has relationships with 21 broker-dealer firms, including seven women and minority owned firms. Women and minority owned firms continued to play an important role in the Fund's long-term and short-term fixed income strategy, executing

over 36 percent of all long-term trades and over 20 percent of all short-term broker initiated trades.

For the past twenty years, the Fund has generated additional income by lending a portion of its assets to qualified counter-parties. Fixed income, domestic equity and international equity securities are available for loan. The Fund's Securities Lending Program earned \$39 million in income for fiscal year 2005-06, as compared to \$25 million for the previous fiscal year. All sectors – fixed income, domestic and international equities – increased lending income from the previous year reflecting higher interest rates and equity values as well as increased broker/dealer participation.

## Real Estate

The real estate portfolio provided a total return of 35.18 percent successfully serving to enhance overall investment returns, while adding diversification to the Fund. Additionally, income generated from the portfolio is a funding source for the System's pension liabilities. The real estate portfolio is comprised of income-producing assets accumulated from acquisitions and developments through joint venture relationships, real estate opportunity funds, and from purchases in the Fund's separate account portfolio.

The domestic real estate equity markets in fiscal year 2005-06 demonstrated continued strong demand for institutional-quality product in most American markets. The Fund accessed the real estate markets through its joint venture relationships and larger commitments to domestic opportunity funds. The Fund took advantage of the increased demand for real estate from foreign, public and private investors by selectively selling non-strategic and mature assets, taking profits and improving the overall quality of the portfolio.

In fiscal year 2005-06, international real estate investing played an increased role via sizeable commitments to experienced fund managers that have proven acquisition, leasing, financing and sales track records in the international markets, most notably Asia and Western Europe. The objective of the international investments is two-fold: (1) to diversify the Fund's real estate portfolio and (2)

to earn the higher yields offered by international real estate that has become less available in the domestic markets.

Real estate mortgage investments contribute to enhancing the long-term investment return of the Fund's fixed income portfolio. This portfolio consists of \$1.1 billion secured by a diversified commercial real estate portfolio.

## Alternative Investments

The Fund's private equity portfolio is designed to provide returns that exceed those of public equities. The added return is accompanied by increased risk and illiquidity; as a result, private equity makes up a relatively small portion of the Fund's total investments.

Private equity generally involves investments in companies that are not publicly traded. Strategies include investments in new companies, which are categorized as venture capital; established companies seeking capital for expansion, which are categorized as corporate finance; special situations funds that invest in specific industries, such as energy and power, or follow other strategies. Finally, the Fund's international portfolio includes both venture capital and corporate finance strategies in companies located outside of the United States.

The Fund also invests in fund-of-funds, which are pooled investments in a portfolio of private equity funds. The fund-of-funds strategy has two primary objectives; (1) to expand the broad diversification objective and (2) to supplement the core private equity portfolio with small funds.

The Fund also invests in funds employing absolute return strategies that endeavor to generate positive performance uncorrelated to the equity and fixed income markets. These funds follow a multi-strategy and multi-manager approach to diversification thereby reducing overall risk level and correlation to the general markets.

The Fund employs a broadly diversified strategy for its private equity portfolio to reduce risk. Investments are made in a variety of strategies, with a number of different private equity managers and in funds that were initiated at different points in time. This approach reduces the risk to the Fund.

## Other Programs

### **New York State Mortgage Pass-Through Program**

Since 1981, the New York State Common Retirement Fund has helped provide more than 67,700 New York State residents with home ownership opportunities by purchasing pools of single-family mortgage loans originated within the State. To date, the Fund has invested \$7.3 billion in New York only loans, including \$472.3 million in the 2005-2006 Fiscal Year.

In the program's early years, private conduits pooled and insured loans for the Fund. More recently the Fund has contracted with one or more government sponsored agencies (the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation) to pool and insure loans originated by traditional mortgage lenders for delivery to the Fund.

### **Affordable Housing Permanent Loan Program**

Since 1991, the Fund has played a major role in improving the lives of thousands of residents while strengthening their neighborhoods. Through programs with the Community Preservation Corporation (CPC) and the JP Morgan Chase Community Development Corporation, the Fund has been able to provide moderate income and low-income families across the State with the opportunity to rent affordable housing. By purchasing permanent mortgages, the Fund provides for the production of affordable new multi-family housing and the revitalization of deteriorated or obsolete housing units. Special housing for the State's senior citizens is also part of the program.

Since the inception of this program, 6,976 units have been completed and 3,513 are in the pipeline. The Fund has committed \$400 million to the CPC program and invested \$235 million in mortgages. In fiscal year 2005-06, the Fund invested in affordable housing throughout the State, including Albany, Columbia, Cortland, Dutchess, Erie, Genesee, Monroe, Nassau, Onondaga, Oswego, Schenectady, Suffolk, Sullivan, Ulster and Westchester Counties.

### **Helping NY/Equity Real Estate Investments**

The Fund has invested in commercial real estate and owns properties throughout New York State, including shopping centers, office buildings, residential properties and hotels. Under the real estate joint venture program, the Fund has been able to develop new buildings and acquire properties that are in need of re-leasing, repositioning and upgrading. As a result of such intensive management efforts, property values have been increased. The Fund's joint venture program focuses on development and re-development projects within New York State, the Excelsior Real Estate Fund, has created new housing units and contributed to the pension fund's overall performance returns. The Fund's investments in real estate opportunity funds have expanded the portfolio of New York State assets.

### **New York Business Development Corporation (NYBDC) Program**

The Fund provides the New York Business Development Corporation with funds to make loans to small businesses for working capital, equipment, or real property. NYBDC has a goal of making at least 25 percent of its loans to woman or minority-owned businesses. With its focus on small business lending, NYBDC can frequently offer more favorable terms than other lenders.

In 1998, the Fund renewed its relationship with NYBDC to provide an additional \$100 million in capital. Since the program began in 1987, NYBDC has made 650 loans totaling \$185.2 million to businesses that employ over 13,000 New Yorkers. During Fiscal Year 2005-06, NYBDC made 47 loans totaling \$10.2 million.

### **Financing for Emerging Businesses in New York State**

The Fund's private equity portfolio includes investments in 71 New York businesses with a value of \$526 million. This figure reflects only the Fund's share of these investments; the total value of New York companies held by the Fund's partnerships was \$7.7 billion as of June 30, 2005 (the most recent data available). Companies in the private equity portfolio include: The NewsMarket in New

York City, Concentrix in Pittsford, Reichert in Buffalo, Autotask in Rensselaer, Innovative Stone in Hauppauge, Applied Nanoworks in Watervliet, Q-RNA in New York City, GlobalSpec in Troy, and Acorda Therapeutics in Hawthorne.

In 2000, the Fund initiated the New York State Private Equity Investment Program. The Program is designed to provide investment returns consistent with the risk of private equity investing while also expanding the availability of capital for New York businesses. By the end of fiscal year 2005-06, the Fund had made commitments to fifteen different private equity managers with commitments totaling \$425 million. The \$425 million in commitments is devoted exclusively to New York investment opportunities. The fifteen managers currently in the program are:

- Summer Street Capital Partners, a growth equity investment fund located in Buffalo;
- FA Technology Ventures, a venture capital fund focusing on information and energy technology located in Albany;
- Ascend Ventures, a technology venture fund located in New York City;
- Wheatley Partners, a technology venture fund with a focus on information and medical technology located in New York City and Long Island;
- DeltaPoint Capital, a growth equity fund located in Rochester;
- The Hamilton Lane New York Co-investment Fund, a special fund that provides capital statewide for other private equity managers making investments in New York;
- The CSFB New York Co-investment Fund, that makes investments alongside other private equity funds investing in New York State;
- High Peaks Ventures, a Troy and Saratoga based early stage venture capital fund;
- Founders Equity, a New York City based fund that makes growth equity investments;
- Easton Hunt Capital Partners, a New York City based fund that pursues a broad strategy of investing in companies in a wide range of industries and stages of development;
- Paladin Homeland Security Fund (NY), a Washington, D.C. fund that opened a New York office to invest in companies that address a broad range of government and commercial security needs;
- Trillium Lakefront Partners NY, a Rochester based fund that will focus on investing in technology companies in upstate New York;
- SoftBank Capital, a New York City and Buffalo based fund that invests in broadband technology and technologies that leverage broadband;
- Ascent Biomedical Ventures NY, a New York City based venture capital fund focusing on life sciences; and
- Greenhill SAVP New York, a New York City based early-stage applied technology venture firm focused on investing in business information and technology-enabled services companies.

## ASSET ALLOCATION – MARCH 31, 2006\*

The Fund diversifies its assets among various classes to include domestic and international equity, fixed income, inflation indexed securities, real estate, and alternative investments. Asset liability studies, conducted periodically with help from an investment consultant, identify the optimal mix of assets to meet the growth requirements of pension obligations while controlling risk as measured by return volatility. During the 2005-06 fiscal year, the Fund continued to implement the asset allocation policy adopted in June 2003 and updated in June 2005. The Fund has formal rebalancing guidelines which ensure a disciplined process for meeting asset allocation goals, as well as allocation ranges for individual asset classes which minimize unnecessary turnover.

Asset Type	Target Allocation	Maximum Allocation	Actual Allocation
<b>Equity</b>	<b>70%</b>	<b>75%</b>	<b>73.9%</b>
Domestic	57%	62%	59.3%
Publicly Traded	41.5%		48.7%

# CORPORATE GOVERNANCE

---

As sole trustee, the Comptroller is responsible for managing, preserving and growing the assets of the New York State Common Retirement Fund. In order to meet his obligations to the 995,536 pensioners, members and beneficiaries of the New York State and Local Retirement System, the Common Retirement Fund is invested in a number of asset classes to maximize returns, including bonds and stocks of publicly traded companies in the U.S. and abroad.

Comptroller Hevesi's role as a fiduciary keeps him engaged in discussions and negotiations with management and boards of directors of companies in the Fund's portfolio regarding corporate governance and accountability. Profitability and social responsibility of corporations must strike a fine balance in order to maximize investment rewards over time. As a long-term investor, the Comptroller promotes policies that will allow companies and communities to thrive together in mutually beneficial relationships. Since he took office in January of 2003, Comptroller Hevesi has confronted corporations about their business practices ranging from environmental and labor practices to accounting and executive compensation standards and what those things mean to shareholder value.

In recent years, as corporate scandals contributed to a downward spiraling market, the U.S. Congress acted by presenting investors and corporations with the Sarbanes-Oxley Act of 2002 by Senator Paul Sarbanes of Maryland and Congressman Michael Oxley of Ohio in a major effort to reform corporate behavior. The Securities and Exchange Commission has the responsibility of enforcing the new rules it has created to implement the corporate governance standards that the new legislation demands of corporations. Comptroller Hevesi continues to be actively engaged during this time of ongoing analysis for rule makers with regard to corporate governance reform. As the sole trustee of the Fund, Comptroller Hevesi has similarly aligned his proxy voting guidelines to the Sarbanes-Oxley Act, keeping expectations high for companies' responsiveness to the new corporate governance standards.

Comptroller Hevesi's experience as the Comptroller of the City of New York (1994-2001) and as the Comptroller of the State of New York (since 2003) brings with it a unique and important network of established relationships within the investor community. In addition to reaching out to other State Treasurers and Comptrollers to debate good corporate governance policies, he has kept the New York State Common Retirement Fund an active member of the Council of Institutional Investors where institutional investors, both public and private, productively exchange ideas on investment policies and shareholder rights.

## Highlights of Comptroller Hevesi's achievements as a shareholder activist in fiscal year 2005-06 include:

- The Comptroller voted by proxy the New York State Common Retirement Fund's shares for 5,385 proposals at 1,795 companies' annual and special meetings for the period of April 1, 2005 through March 31, 2006.
- Comptroller Hevesi, as sole trustee and on behalf of the Fund, is the lead plaintiff in the WorldCom shareholder class action litigation. The Comptroller has recovered \$6.06 billion for the WorldCom Investor class and is proceeding with the claims administration process to prepare for distribution of the settlement funds to the claimants.
- Lobbied the U.S. Securities and Exchange Commission for stronger IPO regulation in conjunction with other institutional investors and Attorney General Eliot Spitzer.
- Lobbied U.S. Securities and Exchange Commission for better executive compensation disclosure. Subsequently, the Commission published proposed rules that would enhance disclosure in compensation matters.

- Lobbied the U.S. Securities and Exchange Commission to approve the New York Stock Exchange merger with Archipelago thereby moving the Exchange toward an enhanced electronic trading format and reestablishing it as a publicly traded company.
- Comptroller Hevesi was a featured speaker (as a leading signatory and as a founding member of the Investor Network on Climate Risk) at the launch of the Third Carbon Disclosure Project at JP Morgan in New York City. The Carbon Disclosure Project (CDP) provides a secretariat for the world's largest institutional investor collaboration on the business implications of climate change. CDP represents an efficient process whereby many institutional investors collectively sign a single global request for disclosure of information on Greenhouse Gas Emissions. CDP has historically sent this request to the 500 largest companies in the world.
- The Comptroller co-sponsored a shareholder resolution with Boston Asset Management at Apache Corporation requesting that the company report on and develop ways to mitigate risks of carbon emissions. After successful negotiations, the proposal was withdrawn upon Apache Corporation pledging to report to stakeholders (including the company's Board of Directors and the public at large).
- Re-opened issue with Devon Energy and then withdrew our 2006 shareholder proposal after Devon responded to our proposal by answering our request for information on how they were responding to rising regulatory, competitive, and public pressure to significantly reduce carbon dioxide and other greenhouse gas emissions by reporting their Climate Change position and strategy on their corporate website.
- The Comptroller co-sponsored a shareholder resolution with the New York City Fire Department Pension Fund at Dow Chemical requesting management report to shareholders descriptions of any new initiatives instituted by management to address specific health, environmental and social concerns of survivors of the 1984 Bhopal, India disaster. There are lingering issues of environmental contamination and survivors' ongoing need for health care and economic relief as a result of the 1984 incident.
- The Comptroller once again co-sponsored with Trillium Asset Management a shareholder resolution at ChevronTexaco requesting a report on new initiatives by management to address the specific health and environmental concerns of communities affected by unremediated wastes and other sources of oil-related contamination in the area where Texaco operated in Ecuador.
- Screened the Fund's investment portfolio for companies operating in or having ties to Sudan. The screening resulted in several meetings with companies regarding the nature of their operations and compliance with international and U.S. Federal law, and contemplation of potential New York State law with regard to divestment measures. Also met with Federal representatives including the U.S. SEC and State Department in order to resolve the issue.
- Helped convince Ford Motor Co. to reverse their decision to end advertising in gay or advocacy publications by making an official inquiry into the cost benefit analysis of that move as part of the company's strategy.
- Filed a shareholder resolution at Aquila, Inc. requesting that the company improve its equal employment opportunity policies based on the ten "Equality Principles" which prohibit discrimination based on sexual orientation and gender identity. An agreement was negotiated with the company to change its policies and publish those changes in the employee handbook. Subsequently, the shareholder resolution was withdrawn.
- The Comptroller co-sponsored a shareholder resolution with Sister of Mercy Reg. Community of Detroit Charitable Trust at Eli Lilly and Company for the second year in a row requesting that the company provide shareholders with a report disclosing the company's political contributions, the policies and procedures governing those contributions, the identity of the persons responsible for making those contributions and the business rationale behind those contributions. Eli Lilly has published its contributions and decision-making process.

We are there every step of the way, responding to our members' changing needs and providing them with the information and guidance they need to plan for the future with confidence.

# STATEMENT OF THE ACTUARY

---

## June 2006

Benefit security is the primary concern of an actuarial funding method. Will sufficient assets have been accumulated when an employee or pensioner begins receiving a benefit?

Future pension costs cannot be determined precisely because they depend on future mortality, investment returns, salary increases, etc. Therefore, in their calculations, actuaries must make assumptions about these uncertainties. The actuary performs experience studies, ascertaining how closely each System's experience is conforming to the assumptions used. If significant differences occur that the actuary believes may indicate differences over a long period of time, the actuary may recommend assumption changes to reduce the expected differences.

Since pension data changes over time, i.e., number of employees or amount of service earned, the New York State and Local Retirement System (System) performs an actuarial valuation annually to ensure that costs are based on the most accurate information. We extensively validate the System's data by running reasonableness tests and accounting for every individual on a year-to-year basis. In addition, we review the information contained in the Financial Statements. The System utilizes the aggregate funding method, which has a funding objective of level percent of payroll employer contribution rates. Our funding objective is being realized. Our assumptions and methods meet GASB 25 Standards and a summary is included later in this section.

There were no significant benefit improvements enacted during FYE 2005 or 2006. The April 1, 2004 valuation for FYE March 31, 2006, was performed under my direction and supervision using the assumptions recommended by me and adopted by the Comptroller as of April 1, 2004, and the aggregate actuarial funding method. I am the actuary for the New York State and Local Employees' Retirement System (ERS) and the New York State and Local Police and Fire Retirement System (PFRS), a member of the American Academy of Actuaries, and meet its qualification standards for this work. The valuation results and all other actuarial calculations, to the best of my knowledge and belief, represent the true financial condition of the System.

Teri E. Landin, M.A.A.A., A.S.A., E.A., M.S.P.A.

# ACTUARIAL FUNDING AND VALUATION

## Actuarial Funding

An actuarial funding method is a procedure for allocating the costs of a retirement system to particular time periods. It does not determine how much a system will ultimately cost; rather, it determines that portion of the estimated total cost that is to be allocated to a particular year.

For 70 years, the actuarial funding method used by the System was the aggregate method (AGG). Then, Chapter 210 of the Laws of 1990 changed the funding method to a modified projected unit credit (PUC) method beginning in FYE March 31, 1991 (referred to as fiscal year 1991 here). This law was challenged and the challenge was upheld by the Supreme Court. On appeal, both the appellate division and the Court of Appeals unanimously agreed with the Supreme Court. These decisions allowed the Comptroller to return to the aggregate funding method, beginning with the 1995 fiscal year. To ease the transition in ERS, i.e., to prevent budget crises among participating employers, the Comptroller devised a plan to phase-in non-GLIP (New York State Public Employees' Group Life Insurance Plan) rates beginning in the 1995 fiscal year when the rates were zero. The rates increased by 1.5 percent per year until 1999, when the transition would cease. However, due to excellent investment gains and favorable experience, almost all ERS employer bills were below the transition rates in 1997, and in 1998 all were below the transition rates, so the transition ceased in 1998.

## Actuarial Valuation

At the beginning of the fiscal year, the Actuary, by law, determines the actuarial assets and liabilities. The actuarial valuation is important since it determines each year's employer contributions. Chapter 49 of the Laws of 2003 mandates that the actuarial valuation undertaken on the first day of a fiscal year be used to determine contribution rates for the next succeeding fiscal year.

Each valuation gives a long-term picture of the System currently and over the coming years. In

this, it differs markedly from the March 31, point-in-time snapshot of the System provided by the Financial Statements. The two measurements serve different purposes and use different techniques.

Two examples help make this clear:

- The actuarial assets for valuation purposes include the current value of all the future contributions employers and employees will make on behalf of current members. The Financial Statement balance sheet asset figure includes only contributions paid or incurred through this fiscal year.
- The actuarial assets smooth out the ups and downs of common stock performance by using a multi-year smoothing procedure. Techniques like this are widely practiced and professionally recommended to protect employers from volatile contribution rates. The Financial Statements, on the other hand, simply present market values of assets on the last day of the fiscal year.

## Aggregate Actuarial Funding Method

Actuarial liabilities are the current values (called the actuarial present values) of the benefits the Retirement System expects to pay to current members, pensioners and beneficiaries. The actuarial present value of benefits is calculated by projecting the amount of future retirement, death and disability benefits (based on past and future service) to be paid and then discounting for interest earnings, employee turnover and other contingencies.

The actuarial present value of the contributions that employers must make to the System to fund the projected benefit payment is equal to the actuarial liabilities, minus the actuarial value of present assets.

Under the aggregate funding method, the difference between the actuarial liabilities above and the actuarial value of present assets is funded as a level percentage of salary over the future working lifetimes of current members.

# ELEMENTS OF THE ACTUARIAL VALUATION

## Actuarial Assumptions

The current actuarial assumptions were adopted effective April 1, 2004. These assumptions and their predecessors are shown below. All assumptions presume ongoing Systems:

Fiscal Year Ending 3/31	Salary Scale*			Interest Rate	Multiple-Decrement Tables based on Systems'
1982-85	Inflation Productivity & Merit	5.0% <u>3.5%</u> 8.5%		7.50%	4/1/76-3/31/81 experience
1986	Inflation Productivity & Merit	5.0% <u>3.5%</u> 8.5%		8.00%	4/1/76-3/31/81 experience
1987-88	Inflation Productivity & Merit	5.0% <u>2.3%</u> 7.3%		8.00%	4/1/81-3/31/86 experience
1989-92	Inflation Productivity & Merit	5.0% <u>2.0%</u> 7.0%		8.75%	4/1/81-3/31/86 experience
1993-96	Inflation Productivity & Merit	5.0% <u>2.0%</u> 7.0%		8.75%	4/1/86-3/31/91 experience
1997-98	Inflation Productivity & Merit	ERS 4.75% <u>1.25%</u> 6.00%	PFRS 4.75% <u>1.75%</u> 6.50%	8.50%	4/1/90-3/31/95 experience
1999-2000	Inflation Productivity & Merit	3.50% <u>2.50%</u> 6.00%	3.50% <u>3.00%</u> 6.50%	8.50%	4/1/90-3/31/95 experience
2001	Inflation Productivity & Merit	3.00% <u>2.50%</u> 5.50%	3.00% <u>3.00%</u> 6.00%	8.00%	4/1/90-3/31/95 experience
2002-04	Inflation Productivity & Merit	3.00% <u>2.90%</u> 5.90%	3.00% <u>3.90%</u> 6.90%	8.00%	4/1/95-3/31/00 experience
2005-06	Inflation Productivity & Merit	3.00% <u>2.40%</u> 5.40%	3.00% <u>3.80%</u> 6.80%	8.00%	4/1/95-3/31/00 experience with subsequent adjustments

\*This is an approximate value. Salary scales vary by age and plan and are based on each System's experience.

## Selected Actuarial Assumptions used in the April 1, 2004 Valuation

Assumptions are computed by the Actuary and adopted by the Comptroller. They are based on recent member experience.

These illustrations are used to determine the number of people we anticipate will be dying, retiring, becoming disabled, withdrawing, etc.

Demographic assumptions below show central rates of decrement per 10,000 members, not necessarily probabilities.

### Disability Retirement – Ordinary and Accidental

Age	ERS Ord	ERS Acc	PFRS Ord*	PFRS Acc
35	13	5	17	16
40	18	4	23	18
45	29	3	43	31
50	39	4	107	36

\*includes performance of duty

### Ordinary Death

Age	ERS	PFRS
35	6	5
40	9	7
45	13	10
50	20	19

### Withdrawal

(Ten-year ultimate rates)

Age	ERS	PFRS
35	225	43
40	195	67
45	167	103
50	139	211

## Service Retirement

ERS	Age	Tier 1	Tier 2-4
	55	5,828	847*
	60	2,493	885*
	65	4,389	3,853

\*If 30 years is attained prior to age 62, use the Tier 1 table.

PFRS	Age	20-year	20-year with add'l 60ths
	45	1,131	436
	50	901	604
	55	1,463	1,347

### Service Retirees – Mortality

Age	Male Clerk	Female Clerk	PFRS
55	46	37	40
60	71	53	65
70	167	108	175
80	414	308	480

### Disability Retirees – Mortality

Age	Male Clerk	Female Clerk	PFRS
30	15	12	4
40	121	96	8
60	271	211	70
80	852	533	625

### Salary Scale – Annual Percent Increase

Age	ERS	PFRS
25	8.79	16.47
35	6.14	7.19
45	5.15	5.79
55	4.93	6.06

## Actuarial Value of Assets

Most of the assets of the ERS, PFRS, and GLIP are pooled in the Common Retirement Fund for investment purposes. The actuarial asset values for bonds and mortgages are amortized values. Short-term investments are at market value. Normally, all other investments (stocks, commingled funds, real estate, business investments, etc.) use a five-year moving average of market values method assuming a 7 percent rate of expected appreciation. For FY 2006, the April 1, 2004 valuation reflects a market restart.

The GLIP values investments at market value. For FY 2006, the April 1, 2004 valuation of the System and Insurance Plan, the difference between market and actuarial value of smoothed investments was:

	<b>Investment</b> (millions)
Market Value	\$119,245
Actuarial Value	<u>115,617</u>
Difference	(\$3,628)

## Administrative Expenses

The cost of administering the System is borne by the State and local employers on a current disbursement basis.

## Group Life Insurance Plan (GLIP)

GLIP provides for up to \$50,000 of member and certain post-retirement death benefits to be paid as life insurance. All benefits provided are on a one-year term insurance basis. Participating employers are billed each year based on the aggregate of anticipated claims for the plan year. Premiums are set so that the reserve will, at its lowest amount during any year, be approximately equal to payables. Payables is an estimate of the amount of claims currently being processed, plus claims incurred, but not yet reported.

## Deficiency Costs

An employer may also have a deficiency contribution. When a new employer joins a System, any past service liability is paid for by separate annual payments over a period of up to 25 years. These payments are not affected by the funding method.

## Rate and Contribution Comparability

For comparability, unless stated otherwise, rates and contributions assume a payment date of February 1 before the fiscal year-end. Presenting the State rates and contributions as of this payment date provides for comparability of State and local government rates and costs.

# ACTUARIAL VALUATION BALANCE SHEETS

# LOCAL GOVERNMENT EMPLOYERS FINAL CONTRIBUTION RATES

For the fiscal year ending March 31, 2006, assuming a February 1, 2006 payment.

All rates exclude any contribution rates due to amortization payments, prior years' adjustments, deficiency costs, retirement incentive programs and certain benefits electable by local governments, such as credit for unused sick leave or one-year final average salary. All rates include Group Life Insurance.

# CONTRIBUTION RATE TREND FOR LOCAL GOVERNMENTS

Rates, prior to 2006, are based on a payment date of December 15. Beginning in 2006, the rates are based on a February 1 payment date. Each rate is applied to the salary of members covered by that particular plan. Rates were calculated under the aggregate method. All rates include Group Life Insurance and administrative rates.

Actual costs borne by employers are shown in the Statistical Section.

# EMPLOYER CONTRIBUTIONS

Contributions here may differ from those appearing elsewhere in the Actuarial Section because this section deals only with the contributions attributable to the single year shown. Actual contributions may include adjustments due to previous years, such as amortization payments/credits and reconciliation of other years' bills. In addition, in 2005 and 2006, employers could amortize a portion of their contributions. The following amounts show their total obligation. The contributions and average rates below include normal, administrative, Group Life Insurance, incentive and deficiency contributions.

## Comparison of Employer Contributions\*

For fiscal years ending 2005 and 2006 (in millions of dollars)

	2006 Contributions			2005 Contributions		
	Salary	Contribution	Avg. Rate	Salary	Contribution	Avg. Rate
<b>ERS</b>						
Tier 1	\$1,366	\$207	15.1%	\$1,537	\$267	17.4%

\*Numbers may not add up due to rounding.

## HISTORICAL TRENDS

The State is obligated to pay its bill on March 1, one month before the end of the fiscal year. However, since 1995, the State has paid its bill prior to this March 1 deadline. Through 2004, local employers paid their bills by December 15, three and one-half months before the end of the fiscal year. Beginning in 2005, the payment date for local employers was changed to February 1.

### Trends in Employer Contributions

# CHANGES IN CONTRIBUTIONS

Yearly, the System's experience in many areas (employee salary growth or decrease, investment return, legislative enactments of benefits) is assessed and quantified. Each element exerts an increasing, decreasing or neutral pressure on contributions to be charged for that year.

## Analysis of Changes (by source)

Experience during one fiscal year produces the increase or decrease in contributions for the following year. (in millions)

Year	Contributions Billed for Preceding Year	Salary Growth	Return on Investments <sup>(a)</sup>	Funding Method	Change in Benefits	Other Adjustments	Projected Contributions for Year Shown <sup>(b)</sup>
<b>ERS</b>							
1997	\$793	-\$108	-\$208	n/a	0	\$47	\$524
1998	559	-111	-258	n/a	0	81	271
1999	270	-103	-98	n/a	0	148	217
2000	217	-46	-55	n/a	0	34	150
2001	149	n/a	n/a	n/a	n/a	17	166
2002	166	n/a	-57	n/a	n/a	118	227
2003	228	-69	-30	n/a	n/a	172	301
2004	292	n/a	n/a	\$680	n/a	188	1,160
2005	1,157	-300	1,881	n/a	n/a	-85	2,653
2006	2,652	124	-746	23	n/a	399	2,452
<b>PFRS</b>							
1997	217	-3	-28	n/a	0	-12	174
1998	169	-12	-44	n/a	0	16	129
1999	129	0	-94	n/a	0	13	48
2000	48	22	-37	n/a	0	9	42
2001	39	n/a	n/a	n/a	n/a	-5	34
2002	34	n/a	n/a	n/a	n/a	1	35
2003	36	n/a	n/a	n/a	n/a	-1	35
2004	32	n/a	n/a	102	n/a	8	142
2005	144	-28	339	n/a	n/a	-1	454
2006	446	21	-119	4	n/a	80	432

(a) For 2005, this amount is the investment loss relative to the minimum contribution of 2004.

(b) This is an estimated figure. Minor adjustments, mostly salary-related, result in the final contribution figure for the year as shown in the Contributions Billed column.

# AVERAGE BENEFIT PAY TYPES

## New Benefits: ERS

These tables show the average unmodified retirement allowance awarded to Employees' Retirement System members retiring during the fiscal year ending March 31, 2006. The average allowances are shown for groupings based on years of service. The allowance is also expressed as a percentage of the average final average salary (FAS) of the grouping.

### New Service Retirements

\*Includes employer premiums to Group Term Life Insurance Plan.

# NOTES TO 20-YEAR SUMMARY

---

- \* Combined Systems unless noted; \$ in millions; data as of March 31 fiscal year end.
- (a) Includes active members and inactive members identified with their last employer.
- (b) Tier 3 and 4 membership statistics are combined.
- (c) Total does not include Employee Contributions Refunded or Other Benefits found in the Financial Statements.
- (d) Beginning in the 2006 fiscal year, all rates assume a February 1 payment date prior to the close of the fiscal year. Previous years assume rates based on a December 15 payment date. Contributions include normal, administrative, Group Life Insurance, retirement incentive and deficiency costs.
- (e) Investments for 1995 and later years are shown at (and rate of return is calculated on) market value as required by GASB 25, which the System adopted that year. Pre-1995 fixed income investments are shown at book value, all others at market. Pre-1995 rates of return also reflect this valuation.
