**ACTUARIAL VALUATION
JANUARY 1, 2007**

October 25, 2007

Board of Trustees
Ohio Police & Fire Pension Fund
140 East Town Street
Columbus, Ohio 43215

Members of the Board:

This report presents the results of the annual actuarial valuation of the assets and liabilities of the Ohio Police & Fire Pension Fund (“Fund”) as of January 1, 2007, prepared in accordance with Chapter 742 of the Ohio Revised Code. The valuation takes into account all of the promised benefits to which members are entitled, including pension and survivor benefits.

The principal results of the valuation do not take into account Medicare Part B premium reimbursements or any other health care benefits. However, at the request of the Ohio Retirement Study Committee (ORSC), supplemental results have been prepared that do take into account Medicare Part B premium reimbursements and are presented in a table in the report.

The valuation was based on the actuarial assumptions and methods that have been adopted by the Board of Trustees, including changes in assumptions that were adopted in August 2007 and effective with the January 1, 2007 valuation. The economic assumptions, including the interest rate of 8.25%, were not changed from last year, but member demographic assumptions (withdrawal, disability, retirement, and mortality rates and DROP participation) were changed. These changes were recommended by the actuary and were based on a five-year experience review covering the period 2002-2006.

The actuarial assumptions and methods comply with the parameters set forth in Governmental Accounting Standards Board Statement No. 25.

Assets and Membership Data

The Fund reported to the actuary the individual data for members of the Fund as of the valuation date. While we did not verify the data at their source, we did perform tests for internal consistency and reasonableness. The amount of assets in the trust fund taken into account in the valuation was based on statements prepared for us by the Fund. The assets used in the valuation do not include any assets in the health care fund.

Funding Objectives and Progress

The actuary uses an actuarial cost method to determine the portion of the Fund's liabilities accrued by the members as of the valuation date and the portion that is attributable to future years of service. The rate of contribution necessary to systematically fund the future service liabilities, the normal cost rate, is calculated under the cost method to be a level percentage of active member payroll. The portion of the liabilities accrued as of the valuation date, the actuarial accrued liability, is compared to a market-related value of the Fund's assets. The amount of liabilities in excess of the assets is called the unfunded actuarial accrued liability.

The actuary determines how many years are required by the Fund to completely amortize the unfunded actuarial accrued liability (the funding period), using the member and employer contributions reduced by the amount allocated to health care and the amount of normal cost for the year. For 2007, and each year since 2003, the funding period is infinite years. The infinite funding period is attributable to the less than assumed investment performance of the Fund during the period 2000 through 2002.

Section 742.16 of the Revised Code, as adopted by Senate Bill No. 82, sets forth an objective that the funding period is no more than 30 years. If the funding period exceeds 30 years, a plan shall be developed and presented by the Board of Trustees to reduce the funding period to not more than 30 years. The Board of Trustees presented a plan to the ORSC in April 2006 for the ORSC's consideration. Included in the plan was a reduction in the allocation of employer contributions for retiree health care from 7.75% to 6.75% of covered payroll, a change the Board adopted and implemented effective January 1, 2007. The plan to reach 30-year funding also included increases in member and employer contribution rates, which have not been acted upon by the Ohio legislature and, therefore, are not reflected in this valuation.

It should be noted that the funded ratio (i.e., the ratio of actuarial assets to the actuarial accrued liability) determined as of January 1, 2007 is 78.2%, compared to 78.3% determined as of January 1, 2006. Taking into account the Medicare Part B premium reimbursements, the funded ratio would be 76.5%.

Financial Results and Membership Data

The valuation report shows detailed summaries of the financial results of the valuation and membership data used in preparing this valuation. The actuary prepared supporting schedules included in the Actuarial and Statistical Sections of the Ohio Police & Fire Pension Fund Comprehensive Annual Financial Report. The actuary prepared the trend data schedules included in the Financial Section of the Ohio Police & Fire Pension Fund Comprehensive Annual Financial Report.

Qualified actuaries completed the valuations in accordance with accepted actuarial procedures as prescribed by the Actuarial Standards Board. The qualified actuaries are members of the American Academy of Actuaries and are experienced in performing actuarial valuations of public employee retirement systems. To the best of our knowledge, this report is complete and

OHIO POLICE & FIRE PENSION FUND

**ACTUARIAL VALUATION
JANUARY 1, 2007**

	<u>PAGES</u>
SUMMARY OF RESULTS	1 - 10
TABLES AND EXHIBITS	11 - 81

Introduction

This report presents the results of the actuarial valuation as of January 1, 2007 of pension benefits for the Ohio Police & Fire Pension Fund.

The principal valuation results include:

- The unfunded accrued liability funding period, which is infinity.
- The funded status of the plan determined as of January 1, 2007 based on the accrued liability and the actuarial value of assets as of that date, which is 78.2%.
- The determination of the experience gain or loss as of January 1, 2007, which is a gain of \$131 million.
- Annual disclosure as of January 1, 2007 as required by Statement No. 25 of the Governmental Accounting Standards Board.

The valuation was completed based upon membership and financial data submitted by the Fund.

A separate valuation is performed for all health care benefits. However, at the request of the Ohio Retirement Study Committee (ORSC), this report includes a supplemental table, Table 1A, that shows what the valuation results would be if the liability for Medicare Part B premium reimbursements is included in this valuation.

Changes Since Last Year

Legislative and Administrative Changes

There were no legislative changes or administrative changes that materially affected the funding of the Fund. The benefit and contribution provisions are outlined in Table 10.

Actuarial Assumptions and Methods

The Board of Trustees at the recommendation of the actuary adopted changes to the valuation assumptions effective with the January 1, 2007 valuation. These changes include:

- Increasing the withdrawal rates (for termination reasons other than retirement, disability or death) by 50% from the previous rates
- Decreasing the retirement rates by five percentage points for ages 50 to 55 for police members and 48-64 for fire members, reflecting a trend toward later retirement
- Increasing the disability retirement rates for ages less than 50 and decreasing the rates for ages 50 and over
- Reducing the DROP election percentage from 100% to 85% of active members who upon eligibility for retirement and who do not retire will elect to participate in the DROP
- Updating the mortality rates to reflect recent improvements in mortality experience. The new rates are based on the RP-2000 Combined Mortality Table with varying age lookup adjustments (age set-backs or set-forwards) for police and fire, service and disability retirements , and members and beneficiaries
- Reducing the election percentage for Joint and Survivor annuities from 85% to 20% of retirees

The economic assumptions were not changed, but the “building blocks” underlying the assumptions were changed. The inflation assumption underlying the interest rate, salary increase rates and payroll growth rate assumptions was increased from 3.00% to 3.25%. The increase in the inflation assumption was offset by an equal decrease in the assumed rate of return on assets, net of inflation, from 5.25% to 5.00% that underlies the interest assumption. The salary increase assumption and payroll growth assumptions also were unchanged as the underlying assumed real wage growth assumption was decreased from 1.00% to 0.75%, offsetting the increase in the inflation assumption.

The actuarial assumptions and methods are outlined in Table 9.

Five-Year History of Principal Financial Results

Net Gain (Loss)

The results of the valuation as of January 1, 2007 determine the net gain or loss for the year ended December 31, 2006. There was a gain of \$67 million from the investment return on the actuarial value of assets. The return on the actuarial value of assets reflects investment performance on a market value basis during 2006 and the previous four years. The net gain from the investment return and demographic experience was \$131 million.

The analysis of the net gain for the fiscal year ended December 31, 2006 is shown in Tables 4 and 5. The following table shows a five-year history of the net gains or losses.

Five-Year History of Gains or (Losses)

Fiscal Year Ended December 31	Net Gain or (Loss)
2006	\$ 131,283,861
2005	(297,231,000)
2004	(667,659,000)
2003	184,393,000
2002	(1,694,549,000)

Funding Period

The funding period is the number of years required to liquidate the unfunded accrued liability. The following table shows a five-year history of the funding period along with the member and employer contribution rates:

2004	Infinity	10.00	21.54
2003	Infinity	10.00	21.49

Five-Year History of Funding Period

Funded Ratio

The Fund's funded status is measured by comparing the valuation assets with the accrued liability. The accrued liability is the present value of benefits accumulated to date under the Fund's funding method and reflects future pay increases for active employees.

On this basis, the Fund's funded ratio is 78.2% of January 1, 2007. The funded ratio is based on an actuarial value of assets of \$10,157,969,000 and an actuarial accrued liability of \$12,987,505,000.

Reasons for Change in the Funded Ratio

The funded ratio decreased from 78.3% as of January 1, 2006 to 78.2% as of January 1, 2007. The decrease is due to the net effect of the investment return on the actuarial value of assets, experience gains and losses, and the level of contributions made in 2006.

Funded ratio as of January 1, 2006	78.3%
Net increase (decrease) due to:	
Asset gain based on actuarial value of assets	0.5%
Liability gain due to plan experience	0.4
Change in assumptions	(0.9)
Contribution level	<u>(0.1)</u>
Net increase (decrease)	(0.1)%
Funded ratio as of January 1, 2007	78.2%

GASB No. 25 Disclosure

Statement Number 25 of the Governmental Accounting Standards Board established reporting standards for the annual financial reports of defined benefit pension plans. The statement requires disclosure of the “schedule of funding progress” and the “schedule of employer contributions” in the Fund’s financial statements.

The “schedule of funding progress” shows historical trend information about the Fund’s actuarial value of assets, the actuarial accrued liability and the unfunded actuarial accrued liability. The actuarial funded status is measured by comparing the actuarial value of assets (based on a five-year moving market average value) with the actuarial accrued liability. The actuarial accrued liability is the present value of benefits accumulated to date under the Fund’s funding method and reflects future pay increases for active employees. On this basis, the Fund’s funded ratio is 78.2% as of January 1, 2007. The funded ratio is based on an actuarial value of assets of \$10,157,969,000 and an accrued liability of \$12,987,505,000. Table 6 shows the schedule of funding progress information.

The “schedule of employer contributions” shows historical trend information about the annual required contributions (ARC) of the employer and the percentage of the ARC contributed to the Fund. The ARC is equal to the normal cost plus amortization of the unfunded actuarial accrued liability. The maximum period for amortizing the unfunded actuarial accrued liability permitted by GASB Statement No. 25 is 40 years. For 2007 and later, the maximum amortization period is 30 years. The employer contributions to the Fund for the year ended December 31, 2006, which are based on a funding period of infinity, are equal to 73% of the ARC. Table 7 shows the schedule of employer contributions.

Rate of Return

The investment return of the trust fund on a market value basis (i.e., total return including both realized and unrealized gains and losses) for years ended December 31, 2002 through December 31, 2006 is shown below. The return based on the valuation assets used for determining the Fund’s funded status is also shown.

Year Ended December 31	Rate of Return Based on

2006	16.2%	10.7%
2005	9.1	6.1
2004	13.3	3.3

-------------	----------------------------------

Benefit	Member elects to defer retirement and must remain in the DROP at least three years, but not more than eight years. At retirement, member receives (1) the normal service retirement benefit determined as of the date he entered the DROP, plus cost-of-living adjustments, and (2) his DROP account balance paid in a lump sum or in installments.
---------	---

The DROP account balance is credited until retirement with the member's retirement benefit amount for the year, adjusted for cost-of-living, plus a portion of the member's contribution for the year, plus interest credited at 5% compounded annually. Annual member contributions are credited to the DROP account based on the following schedule:

Years 1 and 2	50% of member's contribution
Year 3	75% of member's contribution
Years 4-8	100% of member's contribution

If the member terminates employment in the first three years of participating in the DROP, the member forfeits all interest credited to his DROP account. If the member terminates after eight years, the member forfeits all DROP benefits and receives a normal service retirement benefit determined as of his termination date, counting service credit for the DROP participation period.

If the member becomes disabled while participating in the DROP, the member can choose to remain in the DROP or receive a disability benefit determined as of his disability date and forfeit all DROP benefits.

TABLE 10**SUMMARY OF BENEFIT AND CONTRIBUTION PROVISIONS**
(Continued)

If the member dies while participating in the DROP, the member's spouse or beneficiary receives the DROP account balance and a monthly survivor benefit of 50% of the benefit the member would have received had the member retired the day before death and elected a 50% joint and survivor annuity. (If the member selected a percentage greater than 50%, that percentage applies.) All other death benefits apply as well.

TABLE 10**SUMMARY OF BENEFIT AND CONTRIBUTION PROVISIONS**
(Continued)**Statutory Death Benefit**

Eligibility

Upon death for any active or retired member.

Benefit

The benefit is paid to the surviving spouse for life, and to any surviving children until they reach age 18 (22 if a full-time student) or marry, which ever occurs first, and to any surviving disabled children for life. If the deceased member leaves no surviving spouse or children, a benefit is paid to any surviving dependent parents during their lifetime or until dependency ceases or until remarriage.

The benefit amount depends on the beneficiary type. The amount is increased each July 1 by 3% of the Base Benefit. The benefit amounts are shown below.

Beneficiary Type	Monthly Benefit Amount		
	Base	Base Plus Increases Through July 1, 2006	Next Increase Effective July 1, 2007
Spouse	\$550	\$661.10	\$16.50
Child	\$150	\$180.30	\$4.50
Parent			
• If one	\$200	\$240.40	\$6.00
• If two	\$100	\$120.20	\$3.00

Note: Spouse's benefit is \$410 if spouse is receiving a full death benefit under the Death Fund Benefit statute.

Lump Sum Death Benefit

Eligibility

Upon death for any retired or disabled member.

Benefit

A lump sum payment of \$1,000.

TABLE 10**SUMMARY OF BENEFIT AND CONTRIBUTION PROVISIONS**

Optional Forms of Benefit

The standard form of benefit is a life annuity. For married members, the standard form of benefit is an actuarially reduced benefit payable under the 50% joint and survivor annuity form, unless the member's spouse provides written consent for a lower survivor benefit.

Retiring members may elect to have actuarially reduced benefits payable under certain and continuous and joint and survivor annuity forms under certain conditions. Such elections may require spousal consent. Elected options may be canceled within one year after benefits commence, with consent of the beneficiary.

COLA or Terminal Pay

Members retiring after January 1, 1989, and who have 15 or more years of service as of January 1, 1989, are allowed to select between (1) a pension calculated on the basis of average salary which is increased to reflect terminal pay adjustments, or (2) a pension based on average salary excluding the terminal pay adjustment, but increasing by 3% of the initial pension each retirement anniversary after July 1, 1988. The additive 3% COLA annuity without terminal pay adjustment is the automatic form for active members with less than 15 years of service as of January 1, 1989.

Medicare Part B

For service and disability retirements, as well as survivors, Ohio Police & Fire reimburses Medicare Part B premiums up to the statutory maximum provided the retiree is not eligible for reimbursement from any other sources. Note: This benefit is not included in the principal valuation results, but is included in the supplemental valuation results summarized in Table 1A.
