## TENTH ANNUAL REPORT OF THE STATE SCHOOL EMPLOYEE'S RETIREMENT BOARD

---

Hon. John S. Fisher,  
Governor of Pennsylvania,  
Harrisburg, Pennsylvania.

Dear Sir:

In compliance with Section 4, Paragraph 9, of the Retirement Act, the State School Employees' Retirement Board hereby submits its Tenth Annual Report. This report is for the year ending June 30, 1929.

The total number of members who had enrolled in the Retirement System on June 30, 1929 was 121,246, of whom 22,691 were Present Employee members and 98,555 were New Entrant members. On that date the number of resignations and withdrawals was 48,321 and deaths 2,171. The number of withdrawals who had returned to service and had been restored to membership was 559. The total active membership on June 30, 1929 was 71,313, of whom 16,605 were Present Employee members and 54,708 were New Entrant members.

A total of 2,864 retirement allowances had been granted up to June 30, 1929, of which 2,136 were for superannuation and 728 were for disability; 471 superannuation annuitants died and 65 returned to active service; 156 disability annuitants died, 160 returned to active service and 25 withdrew from the Retirement System. On June 30, 1929 there were being paid 1,987 retirement allowances, of which 1,600 were for superannuation and 387 were for disability.

To fill the vacancy on the Retirement Board, caused by the death of Dr. Andrew Thomas Smith and the expiration of his term on January 1, 1929, an election was held at the County and District Institutes during 1928. The committee appointed to count the ballots for this election reported that a total of 34,354 ballots were voted, of which Dr. T. T. Allen received 19,654 votes and Superintendent S. Edgar Downs received 14,122 votes; 578 votes were scattered. Dr. T. T. Allen, President of the State Teachers College at East Stroudsburg, Pa., was therefore elected as a member of the Retirement Board to serve for a three year term beginning January 1, 1929.

Hon. Aaron S. Kreider of Annville had been elected as the seventh member of the Retirement Board at the time of the establishment of the Retirement System in 1919 and had been unanimously re-elected each year by the other members of the Board. His wide experience as a banker and business man enabled him to render exceptionally valuable service as a member of the Board. Mr. Kreider's death on May 19, 1929 created a vacancy on the Retirement Board, which was filled by the election of Mr. Warwick M. Ogelsby, President of the Commonwealth Trust Company of Harrisburg, by the unanimous vote of the other members of the Board.

The accounts of the State School Employees' Retirement System consist of the Contingent Reserve Account, State Annuity Reserve Account, State Annuity Reserve Account No. 2, Employees' Annuity Savings Account and Employees' Annuity Reserve Account.

When Retirement Systems for public school employes were first established in this country two different methods were followed in financing them. One method was to have the school employes contribute the entire cost of the retirement allowances and the other method was to have the public contribute the entire cost. The one method of financing was based on the assumption that a Retirement System was designed primarily for the benefit of the school employes and the other method was based on the assumption that a Retirement System was designed primarily for the benefit of the schools.

Experience finally demonstrated that an equitable Retirement System benefited both the school employes and the public, and by the time the Pennsylvania School Employes' Retirement Law was enacted in 1917 it was generally agreed that an equitable plan for financing a

Retirement System was for the school employes and the public to share about equally the cost of the retirement allowances.

The Pennsylvania School Employes' Retirement Law went into effect on July 1, 1919, and the Law provides that one-half of the cost of all retirement allowances based on service rendered after July 1, 1919 shall be paid from contributions by the school employes, and the other half shall be paid by the public. One-half of the public's share is paid by special State Appropriations for that purpose and the other half is paid by the local school districts. The State and local districts share equally the cost of the retirement allowances based on service rendered by retired school employes prior to July 1, 1919.

The Retirement Law classifies all school employes into two groups. The one group includes all school employes who were in service at the time the Retirement Law was enacted and are designated as Present Employes. The other group includes all school employes who entered school service after the Retirement Law was enacted and they are designated as New Entrants. Membership in the Retirement System was made optional for Present Employes and compulsory for New Entrants.

Originally the Present Employe group were given until July 1, 1919 to file an application for membership. The 1923 State Legislature amended the Retirement Law so as to give Present Employes until July 1, 1924 to file an application for membership, and the 1927 State Legislature again amended the Law extending the time for Present Employes to make application for membership to July 1, 1928. Almost all of the Present Employe group are now members, and all New Entrants automatically become members when they enter school service.

Retirement for superannuation is optional any time after the school employe reaches the age of sixty-two and compulsory at age seventy. An employe who has not yet reached the age of sixty-two and who becomes physically or mentally incapacitated for school service may be retired with a disability retirement allowance, provided such an employe has rendered at least ten years of school service.

A superannuation retirement allowance is equal approximately to one-eightieth of the Final Salary multiplied by the number of years of school service, and a disability retirement allowance is equal to one-ninetieth of the Final Salary multiplied by the number of years of school service, provided that in no case shall the disability allowance be less than 30% of the Final Salary. Final Salary as used in the Retirement Law is defined as the average annual salary for the last ten years of school service.

Any school employe who for any reason separates from school service before retirement receives the return of his or her contributions to the Retirement Fund with interest at 4% compounded annually.

Should an employe die before retirement the accumulated contributions of such deceased employe are returned to his or her estate or to a designated beneficiary.

Every retirement allowance is composed of two parts—an Employes' Annuity and a State Annuity. The Employes' Annuity part of the retirement allowance is paid from the employe's own contributions and amounts to just what he would receive if he would withdraw his accumulated contributions from the Retirement Fund and use the money to purchase a life annuity from any standard life insurance company, except that he gets this at a net cost because the State pays the expenses of the System. The State Annuity part of the retirement allowance is paid from the contributions which the State and local school districts make to the Retirement Fund.

Since for all service rendered after July 1, 1919 the employe pays half the cost of the retirement allowance and the State and local school districts pay the other half it follows that in the case of a retired New Entrant one-half of the retirement allowance is paid from the New Entrant's own contributions to the Retirement Fund. In the case of a retired Present Employe member of the Retirement System one-half of the cost of the retirement allowance based on service rendered after July 1, 1919 is paid from the retired member's own contributions, and the other half of the retirement allowance based on service rendered after July 1, 1919 is paid from contributions by the State and local school districts. The entire cost of the part of the retirement allowance based on service rendered before July 1, 1919 is paid from contributions by the State and local school districts.

Service rendered before July 1, 1919 is defined by the Retirement Law as Prior Service. The Retirement System started with about 21,000 Present Employe members and all of these Present Employe members had some Prior Service. Many of them had forty or more years of such service. At retirement they are given credit for this Prior Service when their retirement allowances are computed.

When the Retirement System was established on July 1, 1919 the cost of all this Prior Service was charged against the System as an accrued liability. Had this accrued liability been made up immediately it would have made necessary an excessively large payment into the Retirement Fund by the State and local school districts during the first year of the Retirement System. Instead of providing for the payment of this accrued liability immediately the Retirement Law provides that its payment shall be distributed over a period of thirty years. The Retirement Law further provides that the reserve accumulated to meet this accrued liability shall be kept by the Retirement Board in a separate account designated as State Annuity Reserve Account No. 2.

It is the payments into this State Annuity Reserve Account No. 2 to meet the accrued liability which makes the Retirement System so expensive to the State and local school districts at this time. When this accrued liability has been paid the cost of the Retirement System to the State and local school districts will be greatly reduced. At this time the State and local school districts are paying each year not only their share of the cost of retirement allowances based on the current year's service but also their share of the cost of retirement allowances based on the Prior Service which was rendered prior to the establishment of the Retirement System, and for which no payments were made at the time the service was rendered for the reason that we had no retirement system at that time.

A question of great interest to all of us is—When will the accrued liability which represents the cost of this Prior Service be paid in full? At the time of the establishment of the Retirement System, Mr. George B. Buck, the well known New York City Actuary, whose advice was followed in the preparation of the Retirement Law, estimated that this accrued liability would be made up within thirty years by having the State and local school districts pay into the special accrued liability account, designated as State Annuity Reserve Account No. 2, semi-annually in July and January of each year an amount equal to 2.8% of the total compensation paid all members of the Retirement System for service rendered during the preceding school year.

The Retirement Law provides that at the end of each five-year period there shall be a special actuarial investigation and valuation of the Retirement System to determine whether the rates of contribution by the school employes, the State and the local school districts are accumulating the reserves required to pay the retirement allowances authorized by the Retirement Law. The first five-year period ended June 30, 1924, and during the summer of 1924 this special actuarial investigation and valuation was made by Mr. George B. Buck. The regular actuary of the Retirement Board also made his own actuarial investigation and valuation at the same time, and the result of these two independent actuarial valuations showed that the rates at which the school employes were contributing were actuarially sound and were accumulating the reserve required to pay the Employes' Annuity part of the retirement allowances, but that the 2.8% rate at which the State and local school districts were contributing to the State Annuity Reserve Account No. 2, to meet the accrued liability of the Retirement System, was accumulating a reserve more rapidly than was required to meet the accrued liability in thirty years. The explanation given by the Actuaries was that the salaries of school employes during the five years preceding June 30, 1924 had increased more rapidly than the salary scale used in fixing the original rate of 2.8% had indicated, and

2.8% of the total compensation of the members of the Retirement System was, therefore, larger than expected.

Upon recommendation by the Actuaries and the Retirement Board the 1925 State Legislature amended the Retirement Law so as to reduce the semi-annual payments by the State and local school districts into State Annuity Reserve Account No. 2 from 2.8% to 2% of the total compensation of members of the Retirement System for the preceding school year. This reduction of .8% in the rate decreased by approximately \$500,000 per year the amount which the State pays on account of the accrued liability, and the amount paid by school districts was reduced to the same extent.

The second five-year period of the Retirement System ended on June 30, 1929 and the Retirement Board has again employed Mr. George B. Buck, the New York City Actuary, to make the special actuarial investigation and valuation of the Retirement System. The Actuary of the State Insurance Department is also now engaged in making an actuarial investigation and valuation, and the reports of these two actuarial investigations and valuations will be included in the next printed report of the Retirement Board. It is gratifying to be able to say that every precaution is being taken to assure the continued actuarial soundness of the Pennsylvania School Employes' Retirement System.

At the close of the fiscal year on June 30, 1929 there had been accumulated in the accounts in which the school employes contributions are deposited a total of \$24,583,695.98. In the account to which the State and local school districts contribute to pay the State Annuities of retired New Entrants there had been accumulated a total of \$10,113,574.02. In State Annuity Reserve Account No. 2, which is the accrued liability account, there had been accumulated \$28,929,141.31. The total reserve accumulated in all accounts on June 30, 1929 amounted to \$63,626,411.31.

The Retirement Board has adopted the policy of investing the money of the Retirement System exclusively in Pennsylvania State, County, City, Borough and Township Bonds, with preference for School District Bonds. This wise investment policy insures the Retirement System against loss from bad investments, and also assures many Pennsylvania school districts of a purchaser for their bonds.

JOHN A. H. KEITH, *Chairman.*

H. H. BAISH, *Secretary.*
