Firemen's Pension Fund

**Funding Report as of July 1, 2010
For the Plan Year Ending June 30, 2011
And For The Fiscal Year Ending June 30, 2011**

Actuarial Valuation

Board of Directors
Greenville Fire Department
City Hall
206 South Main Street
Greenville, SC 29601

Gentlemen:

Stanley, Hunt, DuPree & Rhine have prepared an actuarial review for The City of Greenville Firemen's Pension Fund as of July 1, 2010. The financial information presented in this valuation is applicable to the twelve months ending June 30, 2011. The purpose of the review is to:

- determine the existing and projected plan liabilities for benefits earned by active, retiree, and widowed participants.
- determine the sufficiency of current funding levels and investment returns.
- provide disclosures which can be utilized to meet all of the requirements of the Government Accounting Standards Board Statements relating to the Pension Fund.

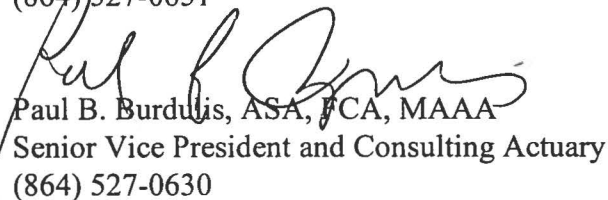

The Table of Contents following this letter outlines the text and tables included in this report.

The information contained herein is not intended or written to be used, and cannot be used, for the purpose of avoiding tax-related penalties.

Sincerely,
Stanley, Hunt, DuPree & Rhine

Traci B. Pennell, CMFC, QKA, QPA
Vice President and Consultant
(864) 527-0651

Paul B. Burdulis, ASA, FCA, MAAA
Senior Vice President and Consulting Actuary

AGE-SERVICE DISTRIBUTION FOR ACTIVE PARTICIPANTS 19

Introduction

In this section, the basis of the valuation is presented and described. This information - the provisions of the plan and census of participants - is the foundation of the valuation, since these are the present facts upon which benefit payments will depend.

The valuation is based upon the premise that the plan will continue in existence, so that future events must also be considered. These future events are assumed to occur in accordance with the actuarial assumptions and concern such events as the earnings of the fund, the number of participants who will remain to retirement, their ages at retirement and expected benefits.

The actuarial assumptions and methods that have been adopted by the Plan sponsor are described in this section.

Summary of Plan Provisions

Effective Date

June 25, 1946

Eligibility Requirements

All regular employees of the Fire Department are eligible for benefits provided by this plan.

Contributions by Participating Employees

Participating employees contributed initially at the rate of 1% of salary. Salary deductions were increased, effective July 1, 1952, to 3% of salary. Deductions remained at this level until June 24, 1975 when they were raised to the current level of 5.775% of salary. Beginning in the 1997 plan year, the City offered to pay 4% of the State-directed contribution level, so that the net rate is now 1.775%.

Contributions from Other Sources

The following sums are also paid into the Fund:

1. Any money, real estate, personal property or other assets made available by gift, devise or bequest;
2. All forfeitures and fines imposed upon any member of the Department by way of discipline;
3. All proceeds from sales of condemned or discarded personal property and equipment in use by the Department;
4. The income from any tax levy imposed by the City Council in order to supplement or support this fund.

The City currently contributes 19.425% of participating payroll.

Summary of Plan Provisions (continued)

Service Retirement Benefits

A member who has attained age 55 and completed at least 25 years of service may retire with a monthly benefit equal to 50% of his monthly compensation at the time of his retirement. For each year of service in excess of 25 years, an additional 2% of final compensation will be provided. In no event will more than 35 years of service be considered for the purpose of benefit determination. An adjustment of up to 6% of the percentage of benefit will be added to the benefit calculation to reflect accrued general leave time.

Disability Retirement Benefits

1. Line of Duty Disability

A member who incurs a disability while engaged in the performance of his duty will be retired with a monthly benefit equal to 50% of his monthly compensation at the time of his disability.

2. Disability Other Than in Line of Duty

- a. A member who becomes disabled other than in the line of duty after the completion of 10 years of service will be retired with a monthly benefit equal to one-third of his monthly compensation at the time of disability.
- b. A member who becomes disabled other than in the line of duty after the completion of 20 years of service will be retired with a monthly benefit equal to one-half of his monthly compensation at the time of disability.

Summary of Plan Provisions (continued)

Death Benefits

1. Upon the death of a retired member, the lawful widow will receive a monthly benefit equal to one-half of the benefit which the member was receiving, plus a lump sum of \$200. Such monthly benefit shall continue during her lifetime regardless of whether she remarries.
2. Upon death of an active member, the lawful widow will receive a monthly benefit equal to one-half of the member's monthly salary at the time of his death, plus a lump sum of \$200. Such monthly benefit shall continue during her lifetime regardless of whether she remarries.
3. If in the case of (1) or (2) above there is no lawful widow, the monthly benefits shall be paid to the surviving children until the youngest child attains age 18.
4. In the case of (2) above, the designated beneficiary may elect to take a refund of the member's contributions with 4% interest thereon in lieu of any monthly pension.
5. The minimum widow's benefit is \$750 per month.

Withdrawal Benefits

A member who leaves the service of the Fire Department prior to becoming eligible for retirement benefits shall be entitled to a refund of his contributions plus four percent interest.

Members have a vested interest in their accrued benefits from the retirement plan of fifty percent after ten years of service. For each year of service beyond ten years, a member shall be entitled to an additional ten percent. A member becomes one hundred percent vested in his accrued retirement benefit after the completion of fifteen years of service.

A member's accrued retirement benefit will be based on earnings and actual service at date of termination. The vested accrual benefit is payable upon Normal Retirement Age, age 55. In lieu of a monthly pension, a vested participant may elect upon termination to take a refund of his contributions with 4% interest.

Actuarial Assumptions

Development of Actuarial Assumptions

In determining costs for a retirement program, it is necessary to make certain assumptions as to the expected future experience that will take place within the program. These assumptions include the rates of mortality to be experienced by both the active, retired and widowed plan participants, the rates of termination of employment prior to retirement, the rates at which plan participants can be expected to take disability retirement, the age at which retirement will actually occur, the rates at which salaries will increase, the rate of investment return to be earned by the fund and the expenses to be incurred. The ultimate cost of any given retirement plan will depend upon actual plan experience.

It is possible to derive actuarial assumptions from the experience of the group under consideration. This is most often the case in very large groups. For plans of this size, the assumptions are best determined from the experience of similar groups, and standard published tables are available which can be used. Changes to assumptions will be considered when actual experience differs substantially and when estimates for the future suggest these changes.

Actuarial Assumptions (continued)

1. Actuarial Assumptions for Valuation of Liabilities

a. Mortality Rate: GAM 83 - Sex Distinct

b. Disability Rate: The following are examples of the probability that a participant will become disabled within one year. A disabled mortality assumption is also utilized. Duty-related disabilities are assumed to be 50% of all disabilities.

Age	Percentage
25	0.068%
40	0.230%
55	1.176%

c. Withdrawal Rate: The following are examples of the probability that a participant will terminate within one year for reasons other than death.

Age	Percentage
25	7.72%
40	5.15%
55	0.94%

d. Salary Scale: Assumes salaries increase at 4% per year. Below is the ratio of salary at normal retirement to salary at the following ages:

Age	Percentage
25	324%
40	180%

e. Rate of Retirement: Assumed 50% retire each year following attainment of age 55 or the completion of 35 years of service, if later, but not beyond age 62.

f. Interest Rate:

Pre-Retirement:	7.0%
Post-Retirement:	7.0%

g. Marriage: It is assumed that 75% of the actives are married at death or retirement with spouses that are three years younger.

h. Other: The inclusion of accrued general leave in the benefit calculation is assumed to increase retirement benefits by 4%.

2. Actuarial Assumptions for Valuation of Assets

Assets are carried at Market Value for valuation purposes.

Actuarial Cost Method

Description of Valuation Method

The valuation method used is known as the Projected Unit Credit Method. The method divides the cost of funding benefits into two parts: normal cost and past service liability. Normal cost is the present value of the projected normal retirement benefit divided by a participant's total service. Past service liability is the present value of the projected retirement benefit multiplied by the ratio of past service over total service. If the past liability were fully funded, the total annual cost would be normal cost.

Because liabilities under a pension plan are based on actuarial assumptions (mortality, investment return, etc.) which will never precisely coincide with actual experience, variations known as actuarial gains and losses will occur, determined each time an actuarial valuation of the plan is made. Such gains or losses are a component of the unfunded liability and are amortized to determine the recommended contribution.

Effective July 1, 2009, the amortization cost for any Unfunded Liability as of each valuation date is determined using a 30 year amortization period.

Changes from Prior Report

1. Plan Provisions

No Changes.

2. Actuarial Cost Method

No Changes.

3. Actuarial Assumptions

No Changes.

Analysis of Results

Investment Return

During our compilation of the plan's accounting over the prior year, we determined the approximate investment return over each period. We have summarized our results below and included results for the past 20 years.

Year	Estimated Annual Rate of Return
1990	8.9%
1991	12.9%
1992	6.9%
1993	7.9%
1994	(2.6)%
Five Year Average	6.7%
1995	16.3%
6/30/1997	7.7%
6/30/1998	8.4%
6/30/1999	3.4%
6/30/2000	2.4%
Five Year Average	7.5%
6/30/2001	10.3%
6/30/2002	6.5%
6/30/2003	3.3%
6/30/2004	7.7%
6/30/2005	7.2%
Five Year Average	7.0%
6/30/2006	4.8%
6/30/2007	12.6%
6/30/2008	(2.1)%
6/30/2009	(12.9)%
6/30/2010	10.9%
Five Year Average	2.2%
Twenty Year Average	5.8%

Analysis of Results (continued)

Actual Salary Increases

Average annual earnings increased by 4.2% . The increase in reported earnings for continuing actives was 2.9% (4.0% was assumed), reflecting both merit and cost of living components..

Retirement

Over the prior year, five participants retired and began receiving payments from the plan. From the retirement rate assumption, one participant was expected to retire. One rehired participant is also receiving pension benefits.

Death

There was one death among active participants. Based on the mortality assumption, there were zero deaths assumed for active participants, two deaths for the retired plan participants and one death among the surviving spouses.

Disabilities

There were no disabilities during the period. Based on the disability assumption, we expect about one disability every three years.

Terminations

Four active participants terminated or transferred before the earliest retirement age. All were paid the amount of their vested benefit. Based on the termination assumption, we expected about seven terminations.

New Participants

During the year ended June 30, 2010, eight new participants entered the Plan. Under closed group valuation methodology, no new participants are expected.

Actuarial Gain/Loss Analysis

Total Actuarial Gain/(Loss) from 7/1/2009 through 6/30/2010 \$ 1,050,539

Components of Gain:

· Gain on assets

Expected assets at 7/1/2010 \$ 30,362,090

Actual assets at 7/1/2010 31,472,141

Gain/(Loss) \$ 1,110,051

· Gain on liabilities

Expected accrued liability at 7/1/2010 \$ 39,679,193

Actual accrued liability at 7/1/2010 39,703,090

Gain/(Loss) \$ (23,897)

Aggregate Gain /(Loss) \$ 1,086,154

Government Accounting Standards Board's (GASB) Statement No. 27

A. Annual Pension Cost for Fiscal Year ending 6/30/2010

1. Annual Required Contribution	\$ 1,986,941
2. Interest on Net Pension Obligation (Asset)	(296,241)
3. Amortization of Net Pension Obligation (Asset)	<u>(582,502)</u>
4. Annual Pension Cost = (1)+(2)-(3)	\$ 2,273,201

B. Net Pension Obligation (Asset) as of 6/30/2010

1. Net Pension Obligation (Asset) at Beginning of Year	\$ (4,232,019)
2. Actual Employer Contribution (including other contributions)	1,423,554
3. Annual Pension Cost	<u>1,451,697</u>
4. Net Pension Obligation 6/30/2010 = (1)-(2)+(3)	\$ (4,203,876)
5. Increase/(Decrease) in NPO from Beginning of Period	\$ 28,143

C. Basic Information

1. Amortization Method: Level Dollar
2. Amortization Period: 30 years
3. Amortization Period: Closed Method
4. The employer funding policy is based upon a 1974 City Ordinance (as subsequently modified) that requires an employer contribution of 19.425% of participating payroll. Employee contributions are mandatory at 1.775% of compensation. Contributions are assumed to be made uniformly throughout the year.
