A boatwright is a person who builds boats and ships. As any boatwright knows, you have to have a plan before you begin your work. This plan helps him build the most airtight, buoyant and efficient boat needed to complete the tasks ahead. He begins by first identifying the purpose of this vessel and then goes to work creating blueprints to guide his work.

Just as the boatwright bases his blueprints on the goals and purpose of his ship, the South Carolina Retirement Systems utilizes all of its resources to administer its five defined benefit plans to provide retirement benefits for the state's public school teachers, police officers, fire fighters, judges, solicitors, National Guard, General Assembly members and state workers.

LETTER OF TRANSMITTAL

November 23, 2011

The Honorable Nikki Haley, Governor and SC Budget and Control Board State of South Carolina

Dear Members of the Budget and Control Board:

We are pleased to present the Comprehensive Annual Financial Report (CAFR) of the South Carolina Retirement Systems for the fiscal year ended June 30, 2011. The South Carolina Retirement Systems is required by Section 9-1-300 of the South Carolina Code of Laws to publish annually a report of the fiscal transactions of the Systems, and this CAFR fulfills that statutory requirement. Since the Retirement Systems is a part of the primary government of the state of South Carolina, the Systems' financial information is also included in the CAFR of the state. Responsibility for both the accuracy of the data, and the completeness and reliability of the presentation, including all disclosures, rests with the management of the Systems. To the best of our knowledge and belief, the enclosed data is accurate in all material respects and is reported in a manner designed to present fairly the financial position and results of the Systems.

The CAFR was prepared to conform to the principles of governmental accounting and reporting set forth by the Governmental Accounting Standards Board (GASB). GASB is an organization established under the Financial Accounting Foundation which establishes and improves governmental standards. GASB is recognized as the official source of generally accepted accounting principles (GAAP) for state and local governments.

Transactions of the Systems are reported on the accrual basis of accounting. Sufficient internal accounting controls exist to provide reasonable assurance regarding the safekeeping of assets and fair presentation of the financial statements and supporting schedules; however, the cost of internal control should not exceed anticipated benefits. The financial statements presented in this CAFR have been independently audited by Clifton Gunderson, LLP, under the direction of the State Auditor's Office. Clifton Gunderson issued an unqualified opinion, which means that based upon the audit, they concluded that the financial statements were fairly presented in all material respects and are free from material misstatement, in conformity with accounting principles generally accepted in the United States of America.

In accordance with Governmental Auditing Standards, as part of obtaining reasonable assurance about whether the Systems' financial statements are free of material misstatement, Clifton Gunderson also considered internal

controls over financial reporting and compliance with certain provisions of laws, regulations, contracts, and other matters. Although independent auditors cannot guarantee the accuracy of the statements, they do have a reasonable basis for the opinion they render. The independent auditor's report is presented as the first component of the financial section of this report. Management's Discussion and Analysis (MD&A), which can also be found in the financial section starting on Page 27, provides a narrative introduction to and analysis of the financial statements. This letter of transmittal is meant to complement the MD&A and should be read in conjunction with it.

Profile of the Systems

The South Carolina Retirement Systems administers five defined benefit pension plans. A defined benefit plan is a retirement plan in which contributions are made to fund a level of retirement income at a future retirement date. Specified monthly service retirement benefits, as well as disability benefits and death benefits are provided to eligible members and/or their surviving beneficiaries. The plans' terms specify the amount of pension benefits to be provided at a future date or after a certain period of time. The benefit amount specified is a function of a formula based on years of service, compensation, and age. Our administrative and reporting structure is outlined in the introductory section of this report.

This report contains information on the following defined benefit pension trust funds:

- The South Carolina Retirement System (SCRS) was established July 1, 1945, to provide retirement and other benefits for teachers and employees of the state and its political subdivisions. SCRS covers employees of state agencies, public school districts, higher education institutions, and other participating local subdivisions of government.
- The Police Officers Retirement System (PORS) was established July 1, 1962, to provide retirement and other benefits to police officers and firefighters. PORS also covers peace officers, coroners, probate judges and magistrates.
- The Retirement System for Members of the General Assembly of the State of South Carolina (GARS) was established January 1, 1966, to provide retirement and other benefits to members of the General Assembly.
- The Retirement System for Judges and Solicitors of the State of South Carolina (JSRS) was established July 1, 1979, to provide retirement and other benefits to state judges and solicitors. JSRS also covers circuit public defenders.
- The National Guard Retirement System (NGRS) was established July 1, 1975, to provide supplemental retirement benefits to members who served in the South Carolina National Guard.

Fiscal Year 2011 Highlights

No legislative changes were enacted during fiscal year 2011; however, the South Carolina Retirement Systems continue to experience many of the same challenges and opportunities that other public pension plans encounter. One of the most basic challenges facing defined benefit plans relates to establishing adequate funding mechanisms to ensure long-term sustainability of providing benefits under the plan, while also providing stakeholders with customer service at a best practices level coupled with reduced administrative costs.

Introductory Section

Administrative Activities

In fiscal year 2011, the Retirement Systems conducted an online customer satisfaction survey which allowed the division to gauge satisfaction with our service among all of our stakeholder groups. In addition to covered employers and retired members, both with satisfaction ratings exceeding 96 percent, satisfaction ratings were obtained from active employees and other members. Other members include retirees, beneficiaries, inactive members, and those survey participants who chose not to identify their category. Ratings for active employees and other members were more than 95 percent, respectively.

Retirement Systems' staff continued efforts to improve efficiencies and implement process improvements in all operational areas while limiting expenditures. During fiscal year 2011, administrative functions were consolidated by creating a Defined Contributions unit that is responsible for management oversight of both the South Carolina Deferred Compensation Program (SCDCP) and the State Optional Retirement Plan (State ORP). This achieved staffing efficiencies by cross-training staff members to perform duties for both programs. Changes were also made to the division's organizational structure in efforts to improve operational efficiencies.

Public Policy Activities

Prompted by the recent recession and compounded by other economic and demographic factors, public pension funds across the country are financially stressed. Many have experienced growth in their plans' unfunded liabilities, and public policymakers are faced with challenges of devising well-reasoned actions to restore the retirement plans' funding and providing adequate retirement benefits in cost efficient and equitable manners.

In February 2011, the S.C. Senate Retirement and Employee Benefits Subcommittee was established to review the five defined benefit plans administered by the Retirement Systems. Committee members were charged with developing long term solutions that would achieve financial sustainability for the plans while being fair to all stakeholders. A subsequent S.C. House Retirement Ad Hoc Study Committee was also established to perform similar reviews and offer solutions.

Operational System Improvements

During fiscal year 2011, significant improvements were implemented in the Retirement Systems' web-based Electronic Employer Services (EES) system which included expanding features and functionality for receiving and updating employer provided data. We also began front-end imaging of incoming enrollment documents to improve the workflow processing and eliminate duplicate handling of paper forms.

Summary of Financial Condition

Actuarial Results

A funding objective of the pension trust funds is to meet future benefit obligations of retirees and beneficiaries through employee and employer contributions and investment earnings. Each year, the external consulting actuaries determine the actuarial soundness of the plans based on long term obligations and the sufficiency of current contribution levels to fund the liabilities of each plan over a reasonable time frame. The most recent valuations dated July 1, 2010, concluded that all systems are operating on an actuarially sound basis. All five systems are considered to be adequately funded within the Governmental Accounting Standards Board's (GASB'S) standards and the SC Budget and Control Board's policy that requires actuarial liabilities be funded over a period not to exceed 30 years.

The current funded ratios of the five plans range from a low of 35.9 percent for NGRS to a high of 74.5 percent for PORS. The funded ratio for SCRS, which represents the largest membership of the five plans, decreased slightly from 67.8 percent to 65.5 percent. The unfunded actuarial liability for SCRS increased from \$11.97 billion to \$13.4 billion. Accordingly, the period for amortizing SCRS' unfunded actuarial accrued liability grew; however, in order to satisfy the 30 year amortization period requirement, the increase was offset through the Budget and Control Board's approval of an employer contribution increase of 0.92 percent effective July 1, 2012. The unfunded actuarial liability for PORS increased from \$1.08 billion to \$1.24 billion. Similarly, an employer contribution increase of .305 percent was approved for PORS effective July 1, 2012. The NGRS has a very low funded ratio because at one time, the plan was not funded on an actuarial sound basis. In 2006, the General Assembly made a commitment to ensure the NGRS plan would be sufficiently funded prospectively and transferred administrative responsibility from the Adjutant General's Office to the South Carolina Retirement Systems. Now recurring funds are set aside each year in the state's annual budget to fund NGRS over an amortization period that does not exceed 30 years, so continued future improvement in the funded ratio is expected.

Because the fiscal year 2010 actuarial valuation highlighted substantial funding requirements for the plans' future sustainability, the Systems' governing board, the SC Budget and Control Board, requested a second opinion. A second actuarial firm was engaged and a parallel valuation was completed with the purpose of obtaining an independent assessment of the plans' assumptions and actuarial soundness, along with other analyses and tools to support the legislative efforts to improve funding and ensure future retirement security. Due to the Board's funding policy, considerable effort was made to match the calculated amortization period based on current contribution rates as well as the contribution necessary to attain a 30 year amortization period. The parallel valuation confirmed the previously calculated actuarial accrued liabilities.

Although the plans experienced an actuarial gain on plan assets for the 2010 fiscal year, which resulted from actual investment returns being greater than the assumed rate of investment return, only a portion of investment gains and losses are recognized each year because actuarial smoothing techniques are utilized to mitigate volatility. Under the smoothing techniques used, the Systems recognized a net actuarial loss on investment returns for the valuation year. Under SCRS, the smoothing methodology resulted in a net amount of \$5.7 billion in excess investment losses being deferred as of the July 1, 2010 valuation. Other non-investment related experience activity such as mortality, salary experience, payroll growth and turnover, which are considered normal within the course of plan experience, contributed to other actuarial gains and losses, as actual experience cannot be precisely predicted and will never exactly match the estimated assumptions. In accordance with Act 311 of the South Carolina Code of Laws and the actuary assumptions that were in effect at that time, up to a 2 percent automatic annual Cost of Living Allowance (COLA) was provided to eligible SCRS and PORS annuitants when certain conditions were satisfied. The Consumer Price Index for Wage Earners and Clerical Workers (CPI-W) for the calendar year ended December 31, 2009, increased from the prior year, resulting in a 2 percent COLA for annuitant payees effective July 1, 2010.

For additional financial information, refer to management's discussion and analysis, financial statements and schedules included in the financial section and the actuarial section of this report.

Investment Performance

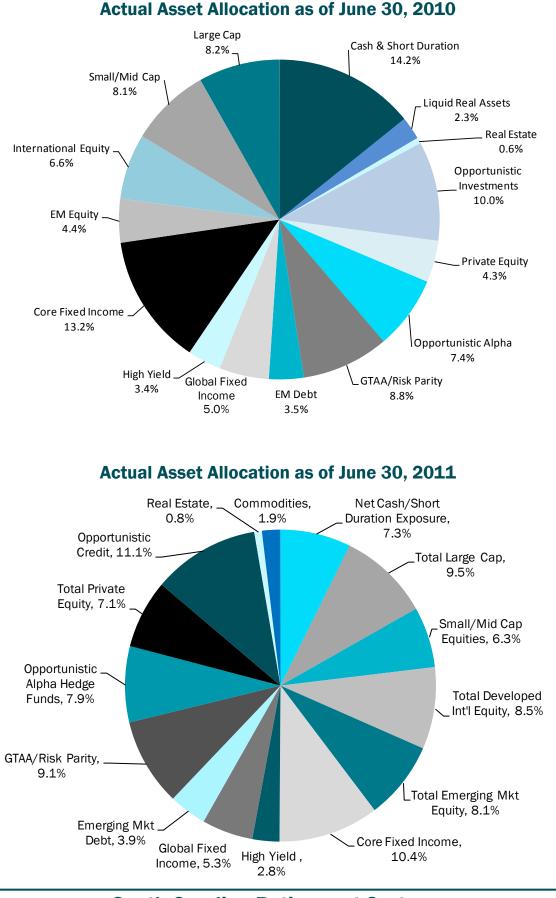

The South Carolina Retirement System Investment Commission (RSIC) faced another challenging year of investing and managing the assets of the retirement trust funds. Uncertainties such as government intervention by the Federal Reserve to stimulate the economy due to fears of a "double dip" recession, the focus of Congress on the U.S. debt ceiling, and concern over the health of the European financial system and potential for a default of their sovereign debt contributed to the RSIC's challenges.

As of June 30, 2011, the Retirement Systems' total assets in the investment portfolio were valued at \$26.2 billion, an increase over the \$22.9 billion of assets one year prior. In addition to this portfolio growth, from a cash flow perspective, a net amount of \$897 million, in excess of incoming contributions, was paid out of the plan for retiree benefit obligations. The portfolio's overall investment performance for the fiscal year ending June 30, 2011, was 18.59 percent. This performance significantly exceeded its benchmarks as well as the 8 percent actuarial assumed rate of investment return.

The plan assets are invested by the Commission in a manner consistent with a long-term investment time horizon. While the financial markets continue to experience significant volatility, the assets of the Retirement Systems are invested in a broadly diversified manner in an effort to mitigate risk. Although member benefits accrued and payable under the Retirement Systems' defined benefit plans are not dependent on individual member account balances, investment returns are a critical overall funding component.

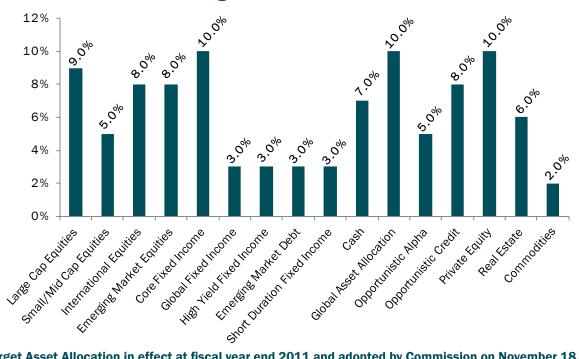

An optimally diversified investment portfolio is designed to generate long-term returns sufficient to ensure the program's financial stability. While the Systems' investment performance was historically limited by state constitution and state statute, the Commission has implemented a diversified asset allocation policy including a wide variety of alternative investments. With the help of the retained investment consultant (NEPC), the RSIC manages investments across a progressive asset allocation designed to generate attractive long-term risk-adjusted returns.

The following charts summarize the diversification progress of the Retirement Systems' trust funds from the prior fiscal year and the target allocation in effect as of fiscal year ended June 30, 2011.

South Carolina Retirement Systems 14

Introductory Section

Target Asset Allocation

Note: Target Asset Allocation in effect at fiscal year end 2011 and adopted by Commission on November 18, 2010.

Investment performance, in comparison to the actuarial assumed rate of investment return, is one of the most significant factors in the actuarial valuations. As previously mentioned, the actuarial asset valuation method utilized dampens year-to-year fluctuations, smoothes the effect of volatility in the market and helps provide a consistent estimate for the actuarial value of assets. Detailed investment results for fiscal year 2011 can be found within both the financial and investment sections of this report.

Certificate of Achievement

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the South Carolina Retirement Systems for its Comprehensive Annual Financial Report (CAFR) for the fiscal year ended June 30, 2010. This was the 24th consecutive year that the Retirement Systems has achieved this prestigious award. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current comprehensive annual financial report continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

Public Pension Standards Award

The South Carolina Retirement Systems received the Public Pension Coordinating Council's Public Pension Standards Award in 2011 for the eighth consecutive year in recognition of meeting professional plan design and administration standards. The Public Pension Coordinating Council is a confederation of the National Association of State Retirement Administrators, the National Conference on Public Employee Retirement Systems, and the National Council on Teacher Retirement.

Acknowledgments

The compilation of this report reflects the combined efforts of the staff of the South Carolina Retirement Systems functioning under your leadership. The report is intended to provide comprehensive and reliable information about the Retirement Systems, to demonstrate compliance with legal provisions, and to allow for the evaluation of responsible stewardship of the trust funds of the Retirement Systems.

We express our gratitude to the members of the Board, the General Assembly, the RSIC, the staff, the consultants, and the many people who have worked so diligently to assure the continued successful operation of the Retirement Systems for the members we serve.

Respectfully submitted, William M. Temen.

Organizational Chart

South Carolina Budget and Control Board

South Carolina Retirement Systems 20

Organizational Description

The structural organization of the Systems is depicted in the organizational chart on Page 20. A brief description of the primary functions performed by each department follows:

Administration

Responsible for managerial, budgetary, and administrative oversight of all division operations; physical plant issues, operations, and maintenance; procurement; human resources activities; communications and public information; accounts payable; postal center operations; and courier services.

Payroll, Financial and Actuarial Reporting

Functioning as chief financial office for the Retirement Systems, responsibilities encompass maintaining comprehensive financial accounting systems, including actuary, investments and disbursements of benefit payments, for the five statutorily defined benefit retirement plans. This department is responsible for preparation of the *Comprehensive Annual Financial Report* and *Popular Annual Financial Report* as well as staffing accounting roles for disbursing funds and reporting of financial data; tax reporting; managing daily financial operations; establishing financial policies and procedures; and communication related to actuarial valuations, legal issues and fiscal impact of proposed legislative changes. Benefit payments are disbursed in the form of monthly annuities, TERI distributions, refunds to terminated members, and death payments to beneficiaries.

Customer Claims

Responsible for the processing of customer claims relating to annuities, refunds, or death claims; the computation of the cost for purchases of prior service for all members of the Retirement Systems; and the auditing of service credit for our membership.

Information Technology

Responsible for the design, implementation and control of all automated applications within the Systems; and the maintenance of complete historical records of each member via digital imaging.

Financial Employer Services

Responsible for determining the average final compensation to be used in calculating a member's annuity benefit at retirement; collecting and allocating member and employer contributions; maintaining membership enrollment and beneficiary information; and the State Optional Retirement Program.

Customer Services

Responsible for member consultations (in person, by telephone, or on-line via the Internet) in all phases of retirement operations. Also responsible for training employers in all aspects of the Retirement Systems' member benefits, reporting procedures, and the Internet-accessed employer information system; meeting with employees as requested to present benefit overviews and pre-retirement education programs; and coordinating and conducting retirement seminars designed to better prepare members whose retirement is imminent.

Defined Contribution Unit

Responsible for the general oversight of the administration of the State Optional Retirement Program and the South Carolina Deferred Compensation Program.

Legal

Responsible for representing the South Carolina Retirement Systems in matters before circuit and appellate courts and administrative bodies, and for providing program support to the management of the South Carolina Retirement Systems.

Internal Audit

Responsible for providing an independent appraisal function to examine and evaluate processes and policies, and for providing assurance to management regarding the internal control structure of the division.

This page contains no other content.

Cargo ships perform an essential role to the nation's economy as they provide a majority of international trade. They ensure that all goods arrive securely and on time. These vessels are specially equipped for heavy duty work such as the organizing and proper loading and unloading of all materials. As the primary vehicle which keeps all trade moving and in order, cargo ships are an important ingredient in a company's financial success.

Similarly, the South Carolina Retirement Systems provides an essential source of income to the state's public servants while also helping impact the state's economy through the disbursement of more than \$2 billion in benefits paid annually to South Carolina residents.

Independent Auditor's Report

The Honorable Nikki Haley, Governor, Members of the State Budget & Control Board, and Richard H. Gilbert, Jr., Deputy State Auditor South Carolina Retirement Systems Columbia, South Carolina

We have audited the accompanying financial statements of the South Carolina Retirement Systems (the Systems) a component unit of the State of South Carolina, as of and for the year ended June 30, 2011, as listed in the table of contents. These financial statements are the responsibility of the Systems' management. Our responsibility is to express an opinion on these financial statements based on our audit. The comparative totals for the year ended June 30, 2010, which are included for additional analysis have been derived from South Carolina Retirement Systems' 2010 financial statements and, in our report dated October 14, 2010, we expressed an unqualified opinion on such information.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Governmental Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the Systems' plan net assets as of June 30, 2011, and the changes in the plan net assets for the year then ended in conformity with accounting principles generally accepted in the United States of America.

In accordance with *Government Auditing Standards*, we have also issued our report dated October 14, 2011 on our consideration of the Systems' internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. The report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

The Management's Discussion and Analysis and Required Supplementary Schedules of Funding Progress and Employer Contributions, as listed in the table of contents, are not required parts of the financial statements, but are supplementary information required by accounting principles generally accepted in the United States of America. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was made for the purpose of forming an opinion on the basic financial statements taken as a whole. The Other Supplementary Information on pages 62 through 68 is presented for purposes of additional analysis and is not a required part of the basic financial statements. This information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, are presented fairly, in all material respects, in relation to the basic financial statements taken as a whole.

The Introductory, Investment, Actuarial and Statistical Sections as listed in the table of contents are presented for purposes of additional analysis and are not a required part of the basic financial statements. The Introductory, Investment, Actuarial and Statistical Sections have not been subject to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on them.

Clifton Sunderson LLP

Baltimore, Maryland October 14, 2011

Management's Discussion and Analysis

This section presents management's discussion and analysis of the South Carolina Retirement Systems' financial position and performance for the year ended June 30, 2011, and is offered as an introduction and analytical overview. This narrative is intended as a supplement and should be read in conjunction with the financial statements and other information presented in the *Comprehensive Annual Financial Report*.

The Retirement Systems' financial statements provide information about the activities of the five defined benefit pension plans administered (listed below), in addition to comparative summary information about the activities of the Retirement Systems as a whole:

- *South Carolina Retirement System (SCRS)* A member contributory multi-employer plan covering teachers, as well as state and municipal employees;
- *Police Officers Retirement System (PORS)* A member contributory multi-employer plan covering state and local law enforcement personnel and firefighters;
- *The Retirement System for Members of the General Assembly (GARS)* A member contributory plan providing benefits to the members of the South Carolina General Assembly;
- *The Retirement System for Judges and Solicitors (JSRS)* A member contributory plan covering Judges, Solicitors and Public Defenders; and
- *The National Guard Retirement System (NGRS)* A non-contributory supplemental benefit plan for members of the South Carolina National Guard.

Overview of the Financial Statements

The South Carolina Retirement Systems represents the collective retirement funds that are held in a group trust and are protected under the constitution. Administrative operations and day to day management of the plans is organizationally aligned under the State Budget and Control Board. The System is considered a division or component unit of the primary government of the state of South Carolina and therefore, trust fund financial information is also included in the comprehensive annual financial report of the state. Financial statements prepared on behalf of the Retirement Systems (Plan), include the following information:

- Statement of Plan Net Assets
- Statement of Changes in Plan Net Assets
- Notes to the Financial Statements
- Required Supplementary Information
- Other Supplementary Information

The *Statement of Plan Net Assets* presents the Plan's assets and liabilities and the resulting net assets, which are held in trust for pension benefits. This statement reflects a year-end snapshot of the Plan's investments, at fair value, along with cash and short-term investments, receivables and other assets and liabilities.

The *Statement of Changes in Plan Net Assets* presents information showing how the Plan's net assets held in trust for pension benefits changed during the year. This statement includes additions for contributions by members and employers and investment earnings and deductions for annuity payments, refunded contributions, death benefit payments and administrative expenses.

Notes to the Financial Statements are an integral part of the basic financial statements and provide additional information that is necessary in order to gain a comprehensive understanding of data reported in the basic financial statements.

Required Supplementary Information presents information concerning the Retirement Systems' funding progress trends and its obligations to provide pension benefits to members. A schedule of required employer contributions is also presented and is useful in evaluating the condition of the plans.

Other Supplementary Information includes Schedules of Changes in Plan Net Assets by system, as well as schedules of administrative expenses, professional and consultant fees and investment expenses.

Financial Highlights

- For the fiscal year ended June 30, 2011, the aggregate rate of return earned on the pooled investments of the consolidated pension trust funds as a whole was 18.59 percent. The return for the combined investment portfolio was again positive, resulting in approximately a four percent increase over the prior fiscal year's return of 14.62 percent and above the 8 percent actuarial investment assumed rate of return for the plans. With the continued volatility in the financial markets, the use of actuarial smoothing methods continue to help mitigate the long-term impact of sharply fluctuating market returns from an actuarial funding perspective. The smoothing methodology is used to offset deferred investment gains and losses against each other, which should produce an actuarial asset value fairly consistent with market value during periods of ordinary investment returns and should also result in a more stable contribution rate and funded status.
- The South Carolina Retirement System Investment Commission (RSIC), created in 2005 as a fiduciary for the Retirement Systems, has exclusive authority to invest and manage the trust funds' assets. The RSIC operates under governance policies that allow for a diverse asset allocation and which afford the chief investment officer discretion and flexibility to quickly react to changes in market conditions. The investment portfolio is structured to focus on ensuring the long-term stability of the plans, seeking superior returns at acceptable levels of risk.
- The Commission is responsible for establishing and maintaining a target asset allocation that manages risk, ensures liquidity, and affords flexibility to quickly react to changes in market conditions. During the fiscal year, the Commission increased funding of short duration investments, funded strategic partnership accounts and emerging market equity accounts and continued to fund various limited partnership commitments as capital was called. These actions resulted in a reduction in the allocation to the cash segment.
- The decrease in securities lending collateral is primarily due to the current low interest rate environment and restrictive guidelines imposed to reduce risk. These guidelines mandate that the re-investment of the cash collateral be restricted to short-term, low risk securities.
- The South Carolina Retirement Systems' total plan net assets increased by \$3.2 billion or 14.1 percent during fiscal year 2011. Total plan net assets represent the trust funds for all five defined benefit plans administered by the South Carolina Retirement Systems. Net assets of the plans are held in trust to meet future benefit obligations. The increase in net assets from \$22.7 billion to \$25.9 billion was primarily due to positive returns in the investment market.

Financial Section

- Although the required percentage contribution rates remained level, there was approximately a one-half percent increase and a one-half percent decrease in the dollar amount of employee and employer contributions respectively. The changes are explained by a significant increase in the amount of employee contributions received for purchased service and a reduction in the overall covered payroll for state departments and public school districts.
- The Teacher and Employee Retention Incentive (TERI) program is a deferred retirement option program under SCRS that allows retired members to accumulate annuity benefits on a deferred basis for up to five years while continuing employment. TERI participants employed by state agencies are exempt from state grievance rights and receive a slightly lower annuity because the calculation of a member's TERI benefit includes no contributions for any unused annual leave payments paid to the member. TERI participants are required to pay the same pre-tax member contribution rate on compensation earned, in the same manner as active members. TERI participants do not earn additional service credit or interest on their TERI account, but are eligible to receive any retiree cost of living increases granted. At the end of the member's TERI participant's benefit is also subsequently recalculated to include payment for up to 45 days of unused annual leave paid at termination. The total amount of assets held in trust for future payment of accrued TERI benefits remained relatively stable with a slight increase from \$322 million to \$363 million during fiscal year 2011. The number of members actively participating in TERI increased slightly as well from 5,641 to 5,862 at fiscal year end.
- The JSRS also provides a deferred retirement option program. A JSRS member who has not yet reached the age of 60 years, but who is eligible to retire and receive the maximum monthly benefit may continue to serve as judge, solicitor, or circuit public defender and the member's normal monthly retirement benefit is deferred and placed in the system's trust fund on behalf of the member. Upon reaching the age of 60 years, the balance of the member's deferred retirement benefit is distributed to the member who may continue working and is not required to terminate their position. As of June 30, 2011, two JSRS members were participating in the deferred retirement option program and benefits held in trust totaled \$632,000.
- The total number of retired members and beneficiaries receiving monthly annuity benefits from the Retirement Systems' plans increased to over 134,000 annuitants during the year. Eligible annuitants under both SCRS and PORS received an automatic 2 percent cost of living allowance effective July 1, 2010; therefore, this benefit increase, coupled with the increase in the number of new annuitants added to the payroll during the year, resulted in an overall 6 percent increase in the dollar amount of annual benefits paid to annuitants. Approximately 2 percent of the increased pension expense was attributable to COLA's and slightly more than 4 percent was the result of a volume increase in the number of annuitants.
- In addition to the deferred retirement options available in SCRS and JSRS, all of the plans (excluding NGRS) include certain provisions that allow retired members to continue covered employment while also receiving a monthly retirement benefit. The defined benefit plans administered by South Carolina have extremely lenient return to work provisions in that a retired member of SCRS and PORS is allowed to return to work for a covered employer after retirement, or after ending their TERI participation (SCRS only), and receive their full monthly benefit, with no limit on the amount of wages they may earn from employment. SCRS, PORS and JSRS retirees who return to work for a covered employer after retirement, or ending participation in the TERI program, are required to pay the same employee contribution as an active member in the same position. A member of the GARS who has reached age 70 or 30 years of service may begin

Financial Section

receiving monthly retirement benefits while continuing to serve in the General Assembly. Retired GARS members who continue to serve receive a reduced salary, but make no further employee contributions to the plan. A JSRS member who is age 60 and eligible to receive the maximum monthly benefit may begin receiving monthly retirement benefits while continuing to serve up until the end of the calendar year in which the member reaches age 72. Under all plans, the employer must pay the corresponding employer contribution for that particular plan. Collectively among the plans, employers report that nearly 22,000 retirees continue covered employment while receiving monthly retirement benefits, thereby making up approximately 8 percent of the total public workforce covered by the Retirement Systems.

- South Carolina state statute allows for retiree cost-of-living allowances (COLAs). Each July 1, eligible retired members of SCRS and PORS receive an automatic COLA equal to the percentage of the annual increase in the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W) as of the previous December 31, up to an increase of 2 percent. If the CPI-W is less than 2 percent, the COLA equals the percentage of the actual increase in the CPI-W. COLAs are awarded only during periods of inflation, so no COLA will be awarded if the CPI-W is negative. The Budget and Control Board, as trustees of the state's pension trust funds, may approve ad hoc COLAs of up to 2 percent in addition to the automatic COLA, but only if stringent funding requirements are met. A 2 percent COLA was applied to eligible annuity benefits effective July 1, 2010.
- Qualified Excess Benefit Arrangement (QEBA) trust funds are maintained for each of the plans administered by the South Carolina Retirement Systems. A QEBA is intended to be a qualified governmental excess benefit arrangement within the meaning of Section 415(m)(3) of the Internal Revenue Code and provides the part of a participant's retirement benefit that would have been paid under the South Carolina Retirement Systems had there been no limitations under Code Section 415(b). The QEBA plans are separate and apart from the funds comprising the Retirement funds and are not commingled with assets of those funds. The QEBA is not prefunded; therefore, no assets or income are accumulated to pay future benefits. The amount of required contributions necessary to pay benefits under the plans is determined and deposited to the trust funds on an as-needed basis. Employer contributions to fund the excess benefits are not credited or commingled with contributions paid into and accumulated in the Retirement funds.
- The most recent actuarial valuation report prepared by Cavanaugh MacDonald Consulting, LLC and accepted as information by the South Carolina Budget and Control Board requires the SCRS employer contribution rate to be increased to 10.6 percent effective July 1, 2012, in order to maintain a 30-year funding period for the 2010 actuarial valuation. Similarly, a total employer contribution increase to 12.3 percent is required for PORS.

Condensed Financial Information

The Retirement Systems' ability to adequately fund retirement benefits payable to members in future years is viable because funds are accumulated and invested on a regular and systematic basis. The five defined benefit funds provide lifetime annuity benefits to vested eligible members who serve as employees of state, public school, higher education institution, local and municipal government, state legislative, judicial, and South Carolina National Guard employers.

The Systems' principal sources of revenue are employee contributions, employer contributions and investment earnings. Required annual contributions for the NGRS are funded through an annual state appropriation. Expenses of the Systems consist primarily of payments of monthly annuities to retired members or their beneficiaries, and refunds of member contributions and interest which are paid subsequent to termination of employment. The defined benefit plans include an incidental death benefit for both active and retired members and an accidental death plan for members of the PORS. The Systems also administer a State Optional Retirement Program (State ORP) which is a defined contribution plan available to newly hired employees of state agencies, higher education and public school districts.

The following summary of comparative financial statements of the pension trust funds are presented on the following page.

Plan Net Assets June 30

Analysis of the Plan's Financial Position and Results of Operations

On a combined basis, the defined benefit Plan net assets were valued at \$25.9 billion at June 30, 2011, representing a 14 percent increase in net assets from the previous fiscal year-end. Investment income, in excess of net benefits paid out, was the primary driver of the increase in Plan net assets for the fiscal year.

The Plan's return for the fiscal year 2011 was 18.59 percent. The largest asset class exposures experienced positive returns for the fiscal year: the total physical equity portfolio, 34.6 percent; the total physical fixed income portfolio, 10.2 percent; and the total alternatives portfolio, 14.3 percent. During the fiscal year, the Plan maintained its target allocation of 10 percent to cash and short duration. Although this allocation restrained the Plan's overall performance, the benefits of maintaining a cash surplus include the ability to take advantage of unscheduled investment opportunities, ensures sufficient cash is on hand to pay benefits, and prevent the possibility of being a forced seller during a market downturn.

The Plan's positive performance relative to the Policy and Strategy benchmarks was driven by solid performance across all asset classes. The opportunistic credit portfolio returned 12.5 percent and non-core fixed income portfolio, which includes high yield, global fixed income and emerging market debt, returned 14.3 percent as of fiscal year-end. Other highlights in fiscal year 2011 were hedge fund and private equity, yielding positive returns of 11.6 percent and 20.2 percent respectively which are also included in the total alternatives portfolio.

During fiscal year 2011, the total dollar amount of retirement annuities paid increased over 6 percent when compared with the previous fiscal year. As mentioned above, the increase was attributable to an automatic 2 percent cost of living allowance granted to eligible SCRS and PORS annuity recipients effective July 1, 2010, along with an increase in the number of new annuitants added to the payroll during the year. Under South Carolina state statute, provided that the actuarial assumed rate of investment return is at least 8 percent, each July 1, eligible SCRS and PORS retirees should receive an automatic COLA. The COLA is equal to the percentage of the annual increase in the CPI-W as of the previous December 31, up to an increase of 2 percent. If the CPI-W is less than 2 percent, the COLA should equal the percentage of the actual increase in the CPI-W. COLAs are awarded only during periods of inflation, so no COLA is availed when the CPI-W is negative. SCRS and PORS retirees did not receive a COLA in fiscal year 2010 as a result of a negative CPI-W.

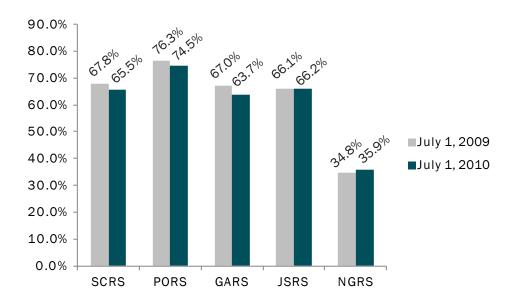

Funding Status

An overall objective in the funding of a defined benefit retirement plan is to accumulate sufficient funds to meet long-term benefit obligations. The primary sources of assets to fund benefits include investment income, member contributions and employer contributions. Beginning with investment performance for the fiscal year ended June 30, 2008, a ten-year smoothing method technique is used to actuarially value assets. This asset valuation method mitigates the impact of market volatility and allows changes in market conditions to be recognized (smoothed) over a period of years. Excess returns and shortfalls determined prior to July 1, 2008, are recognized over a five-year period.

The ratio of actuarial assets to actuarial liabilities provides an indication as to whether sufficient assets are accumulated to pay benefits when due; the greater the level of funding, the larger the ratio of actuarial assets to actuarial accrued liabilities. The most recent actuarial valuations prepared as of July 1, 2010, and accepted by the South Carolina Budget and Control Board indicate that the funded ratios of each of the five individual

Financial Section

plans remained relatively stable from the previous valuations. As of July 1, 2010, funding levels of all the plans are such that annual expected contributions are sufficient for the valuation to find that the plans are actuarially sound. The changes in the levels of funding do not affect the availability of funds or resources for future use and actuarial projections indicate that unfunded liabilities should be amortized and funded within acceptable funding guidelines. The funded ratios of the five plans are presented in the following graph.

Funded Ratios (Actuarial assets as a percentage of actuarial accrued liabilities)

Requests for Information

This financial report is designed to provide a general overview of the Retirement Systems' finances for all interested parties. Questions concerning any of the information provided in this report or requests for additional financial information should be directed as follows:

South Carolina Retirement Systems

Notes to Financial Statements

I. Basis of Presentation and Summary of Significant Accounting Policies

Description of the Entity

The financial statements of the South Carolina Retirement Systems (Systems) presented herein contain the following funds:

Pension Trust Funds

- South Carolina Retirement System (SCRS)
- South Carolina Police Officers Retirement System (PORS)
- Retirement System for Members of the General Assembly of the State of South Carolina (GARS)
- Retirement System for Judges and Solicitors of the State of South Carolina (JSRS)
- National Guard Retirement System (NGRS)

Each pension trust fund operates on an autonomous basis; funds may not be utilized for any purpose other than for the benefit of each plan's participants.

The Retirement Systems are part of the state of South Carolina's primary government and are included in the *Comprehensive Annual Financial Report of the State of South Carolina*. In making this determination, factors of financial accountability, governance and fiduciary responsibility of the state were considered.

Plan Descriptions

The South Carolina Retirement System, a cost–sharing multiple-employer defined benefit pension plan, was established effective July 1, 1945, pursuant to the provisions of Section 9-1-20 of the South Carolina Code of Laws for the purpose of providing retirement allowances and other benefits for public school districts and employees of the state and political subdivisions thereof.

The South Carolina Police Officers Retirement System, a cost–sharing multiple-employer defined benefit pension plan, was established effective July 1, 1962, pursuant to the provisions of Section 9-11-20 of the South Carolina Code of Laws for the purpose of providing retirement allowances and other benefits for police officers and firemen of the state and its political subdivisions.

The Retirement System for Members of the General Assembly of the State of South Carolina, a singleemployer defined benefit pension plan, was created effective January 1, 1966, pursuant to the provisions of Section 9-9-20 of the South Carolina Code of Laws to provide retirement allowances and other benefits for members of the General Assembly.

The Retirement System for Judges and Solicitors of the State of South Carolina, a single-employer defined benefit pension plan, was created effective July 1, 1979, pursuant to the provisions of Section 9-8-20 of the South Carolina Code of Laws for the purpose of providing retirement allowances and other benefits for judges, solicitors, and circuit public defenders of the state.

The National Guard Retirement System, a singleemployer defined benefit pension plan, was created effective July 1, 1975, and is governed by the provisions of Section 9-10-30 of the South Carolina Code of Laws for the purpose of providing supplemental retirement benefits to certain members who served in the South Carolina National Guard. A summary of information related to participating employers who reported wages earned for active members during the fiscal year ended June 30, 2011, follows (dollar amounts expressed in thousands):

	o u u 1			
	State ¹	School	Other	Total

¹Total for retirees and beneficiaries includes 14 participants who retired in place and continued to serve as a judge, solicitor, or circuit public defender pursuant to the provisions of Section 9-8-60 (7)(b) of the South Carolina Code of Laws.

South Carolina	Retirement Systems
	38

Membership and benefit requirements are prescribed in Title 9 of the South Carolina Code of Laws. A brief summary of each is presented below.

Membership scrs

Generally, all employees of covered employers are required to participate in and contribute to the system as a condition of employment. This plan covers general employees and teachers.

State ORP

As an alternative to membership in SCRS, newly hired state, public school, and higher education employees have the option to participate in the State Optional Retirement Program (State ORP), which is a defined contribution plan. State ORP participants direct the investment of their funds into a plan administered by one of four investment providers. The SCRS assumes no liability for State ORP benefits. Rather, the benefits are the liability of the investment providers. For this reason, State ORP programs are not considered part of the Systems for financial statement purposes.

Contributions to the State ORP are at the same rates as SCRS. A direct remittance is required from the employers to the investment providers for the employee contribution (6.50 percent) and a portion of the employer contribution (5 percent). A direct remittance is also required to the SCRS for a portion of the employer contribution (4.24 percent) and a death benefit contribution (.15 percent), which is retained by the SCRS. The activity for the State ORP is as follows:

State ORP Activity Year Ended June 30, 2011 (Dollar amounts expressed in thousands)

Average Number of Contributing Participants	19,681
Annual Covered Payroll	\$960,684
Employer Contributions Retained by SCRS	40,733
Death Benefit Contributions Retained by SCRS	1,441
Employee Contributions to Investment Providers	62,444
Employer Contributions to Investment Providers	48,034

PORS

To be eligible for PORS membership, an employee must be required by the terms of his employment, by election or appointment, to preserve public order, protect life and property, and detect crimes in the state; to prevent and control property destruction by fire; be a coroner in a full-time permanent position; or be a peace officer employed by the Department of Corrections, the Department of Juvenile Justice, or the Department of Mental Health. Probate judges and coroners may elect membership in PORS. Magistrates are required to participate in PORS for service as a magistrate. PORS members, other than magistrates and probate judges, must also earn at least \$2,000 per year and devote at least 1,600 hours per year to this work, unless exempted by statute.

GARS

All members of the Senate and the House of Representatives are required to participate in and contribute to the system upon taking office as a member of the South Carolina General Assembly.

JSRS

All solicitors, circuit public defenders, judges of a Circuit or Family Court and justices of the Court of Appeals and Supreme Court are required to participate in and contribute to the system upon taking office.

NGRS

Membership consists of individuals who serve in the South Carolina National Guard.

Pension Benefits SCRS

A monthly pension is payable at age 65 or with 28 years credited service regardless of age. Reduced pension benefits are payable at age 55 with 25 years of service credit. A member is eligible to receive a reduced deferred annuity at age 60 with five years earned service. Death benefits are also available to active and retired members who have at least one year of service, provided their employer participates in the program.

Each July 1, eligible SCRS retirees should receive an automatic cost-of-living adjustment (COLA) equal to the percentage of the annual increase in the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W) as of the previous December 31, up to an increase of 2 percent. If the CPI-W is less than 2 percent, the COLA should equal the percentage of the actual

increase in the CPI-W. COLAs are awarded only during periods of inflation, so no COLA will be awarded if the CPI-W is negative. Members who retire under the early retirement provisions at age 55 with 25 years of service are not eligible for COLAs until the second July 1 after reaching age 60 or the second July 1 after the date he would have had 28 years of service credit had he not retired.

PORS

A monthly pension is payable at age 55 with a minimum of five years earned service or with 25 years of service regardless of age. A member is eligible to receive a deferred annuity at age 55 with five years earned service. Death benefits are also available to members who have at least one year of service provided their employer participates in the program. An additional accidental death benefit is also offered to members killed in the line of duty while working for a covered employer.

Each July 1, eligible PORS retirees should receive an automatic cost-of-living adjustment (COLA) equal to the percentage of the annual increase in the CPI-W as of the previous December 31, up to an increase of 2 percent. If the CPI-W is less than 2 percent, the COLA should be equal to the percentage of the actual increase in the CPI-W. COLAs are awarded only during periods of inflation, so no COLA will be awarded if the CPI-W is negative.

GARS

A member is eligible for a monthly pension at age 60 or with 30 years credited service. A member who has attained age 70 or has 30 years of service is eligible to retire and draw an annuity while continuing to serve in the General Assembly. A member is eligible to receive a deferred annuity with eight years of service. A death benefit is also provided to members who have at least one year of service. Retirees receive increases in benefits based upon increases in the current salary of their respective active positions.

JSRS

A pension benefit is payable at age 70 with 15 years service, age 65 with 20 years service, age 65 with four years in a JSRS position and 25 years other service with the state, 25 years service regardless of age for a judge or 24 years of service for a solicitor or a circuit public defender regardless of age. A judge is vested in the system after attaining 10 years of earned service in the position of judge, and a solicitor or a circuit public defender is vested in the system after attaining eight years of earned service. A member who has reached maximum eligibility is eligible to retire and draw an annuity while continuing to serve. A death benefit is also provided to members with at least one year of service.

Retirees receive increases in benefits based upon increases in the current salary of their respective active positions.

NGRS

A monthly pension is payable at age 60 provided the member was honorably discharged from active duty with at least 20 years of total creditable military service. Of the 20 years total creditable military service, at least 15 must have been served in the South Carolina National Guard. Additionally, the last 10 years of service must have been served in the South Carolina National Guard. No cost-of-living increases are provided to NGRS retirees.

Summary of Significant Accounting Policies Fund Structure

The Systems' accounts are maintained in accordance with the principles of fund accounting. This is the procedure whereby resources for various purposes are classified for accounting and reporting purposes into funds that are in accordance with specified activities or objectives. Separate pension trust funds (fiduciary fund type) are used to account for the activities of the five public employee retirement systems administered by the Systems.

Basis of Accounting

All funds are accounted for using the accrual basis of accounting. Revenues are recognized when earned and expenses are recognized when incurred. Benefit and refund expenses are recognized when due and payable in accordance with the terms of the plan.

Administrative Expenses

The State Budget and Control Board's Office of Internal Operations maintains an internal service fund to account for the administrative costs of operating the Systems. All accounting and corresponding disclosures related to administrative expenses are the responsibility of the internal service fund administered by the Board. Administrative expenses are funded by both employer contributions and investment earnings and are assessed to each of the pension trust funds based on its respective portion of total assets in order to pay for actual expenses incurred during the year. Administrative expenses of the Systems include employee salaries and associated employee benefits, disability evaluations, fiduciary liability insurance and other professional service fees. In addition, the Retirement Systems Investment Commission, a separate State Agency charged with investing the trust fund assets, is funded entirely from the trust fund. Expenses for the RSIC include salaries and benefits for both investment and administrative staff and other professional service fees.

Cash and Cash Equivalents

The Systems classifies cash on deposit in financial institutions and cash on deposit in the state's internal cash management pool as cash and cash equivalents. The Systems also classifies certain short-term highly liquid securities as cash equivalents if the date of maturity is three months or less from the date of acquisition. Forward contracts and foreign currencies are also classified as cash and cash equivalents.

Contributions

Employee, employer, and state-appropriated contributions are recognized in the period in which they are due, pursuant to formal commitments as well as statutory requirements. Substantially all contributions receivable are collected within 30 days of year-end. All long-term employer contributions receivable are expected to be collected within the next three years.

Investments

The Retirement System Investment Commission, created by the General Assembly in 2005 as fiduciary for the Retirement Systems, has exclusive authority for investing and managing all assets of the plan. Funds of the Systems are invested subject to the terms, conditions, limitations, and restrictions imposed by Section 16, Article X of the South Carolina Constitution and Section 9-1-1310 (B) and Title 9 Section 16 of the South Carolina Code of Laws. The funds and assets of the various state retirement systems are not funds of the State, but are instead held in trust as provided in Section 9-16-20.

The Retirement System Investment Commission is structured as a separate state agency reporting to a group of Commissioners. Commission members are appointed and are comprised of six financial experts, including the State Treasurer and a nonvoting retired member. The RSIC employs a chief investment officer who, under the direction and supervision of the Commission, oversees the investment program for the Retirement Systems' \$25.9 billion pension trust fund. The Commission also retains an independent consultant to provide investment consulting services necessary to fulfill the duties for investing the Systems' portfolio.

As fiduciary on behalf of the Retirement Systems, the Commission enters into individual agreements with various investment managers to invest plan assets seeking superior long-term results at an acceptable level of risk. As of June 30, 2011, legal agreements were in place with 85 investment managers.

For financial statement purposes, investments of the pension trust funds are reported at fair value in the Statement of Plan Net Assets. Short term securities categorized as cash or cash equivalents are reported at fair value. The Systems holds domestic and global equity and fixed income securities which are traded on organized exchanges. These investments are valued by the investment custodian using the last reported sales price on a trade-date basis. Private market investments typically utilize a limited partnership structure and private equity funds normally represent investments in operating companies that are not publicly traded on a stock exchange. The fair values of limited partnership investments are based on valuations of the underlying companies of the limited partnerships. The fair values of alternative investments including private

equity, opportunistic credit, real estate and certain other investments, where current market values are not readily ascertainable, are valued in good faith based on the most recent financial information available for the underlying companies and reported by the investment managers at the measurement date, adjusted for subsequent cash flow activities through June 30, 2011. The estimated fair value of these investments may differ from values that would have been used had a ready market existed.

Investments are combined in a commingled investment pool, with each system owning a percentage of the pool and receiving proportionate investment income in accordance with their respective ownership percentage. Investment income includes realized and unrealized appreciation (depreciation) in the fair value of investments, interest income earned, dividend income earned, less investment expense, plus income from securities lending activities, less deductions for securities lending expenses. Several of the alternative investment managers provide account valuations on a net of fee basis. Those management fees are netted against investment income and because they are not readily separable, amounts are recorded and reported net of fees in the net appreciation (depreciation) in the fair value of investments.

Capital Assets

Capital assets are capitalized at cost and depreciated on a straight-line basis over an estimated useful life of forty years.

II. Contributions and Reserves

Contributions to each of the Plans are prescribed in Title 9 of the South Carolina Code of Laws.

Plan members are required to contribute at statutorily established rates. The rates applicable for fiscal year 2011 follow:

SCRS6.5% of earnable compensationPORS6.5% of earnable compensationGARS10% of earnable compensationJSRS10% of earnable compensationNGRSNon-contributory

Employer contributions are established by the State Budget and Control Board at the actuarially determined rates recommended by the Systems' actuaries.

Contributions for the NGRS are provided by state appropriations based on the annual required contribution determined by the Systems' actuary on an annual basis.

In accordance with provisions of the 2010-2011 State Appropriations Act, an additional employer contribution surcharge of 3.90 percent of covered payroll was added to the contribution rate applicable to state and local governments, and public school entities covered by the Employee Insurance Program. This assessment is for the purpose of providing retiree health and dental insurance coverage and is not a part of the actuarially established contribution rates for retirement funding purposes. Functioning as a collecting agent, SCRS and PORS collected (amounts expressed in thousands) \$268,792 and \$14,491 respectively in retiree insurance surcharges (\$37,434 of which was applicable to the State ORP) and remitted these funds to the Employee Insurance Program. Net Assets of each plan are required to be reserved in the following accounts:

The **Employer Fund** is credited with all employer retirement contributions and investment earnings of the Employee and Employer Funds. Upon retirement, all member account balances and contributions are transferred to the Employer Fund as all annuities and administrative expenses of the Systems are paid from this fund. Annual state appropriations to the NGRS are also credited to the Employer Fund to provide funding for the payment of annuities and administrative expenses.

The **Employee Fund** is credited with all contributions made by active members of the Systems. Interest is credited to each member's individual account at an annual rate of 4 percent by transferring funds from the Employer Fund to the Employee Fund. At termination of employment prior to retirement, employee contributions and accumulated interest may be refunded from this fund to the member. At retirement, employee contributions and interest are transferred from the Employee Fund to the Employer Fund for subsequent payment of benefits.

The **Death Benefit Fund**, formerly referred to as the Group Life Fund, (SCRS and PORS only) is the fund to which participating employers contribute for the

purpose of providing a death benefit to active and retired members of the Systems. Employer contributions and investment earnings are credited to this fund. Death benefit payments and administrative expenses are paid from this fund.

The Accidental Death Fund (PORS only) is the fund to which participating employers contribute for the purpose of providing annuity benefits to beneficiaries of members of PORS killed in the actual performance of their duties. This fund and its benefits are independent of any other retirement benefit available to the beneficiary. Employer contributions and investment earnings are credited to this fund. Monthly survivor annuities and administrative expenses are paid from this fund.

The **Qualified Excess Benefit Arrangement (QEBA) Fund** is the fund from which annuity benefits are paid when a benefit recipient exceeds IRC Section 415(b) limits on the amount an individual may receive annually from a qualified defined benefit pension plan. Employer contributions are credited to this fund on an as-needed basis in an amount equivalent to the amount of benefits being paid out of the QEBA fund due to IRC Section 415(b) limitations.

III. Deposits and Investments

Deposit and Investment Risk Disclosures

The tables presented on Pages 45-48 include disclosures of credit and interest rate risk in accordance with Governmental Accounting Standards Board Statement 40 and are designed to inform financial statement users about investment risks which could affect the Systems' ability to meet its obligations. These tables classify investments by risk type, while the financial statements disclose investments by asset class. The table amounts were provided by the custodian bank and agree to the Statement of Plan Net Assets.

Custodial Credit Risk

Custodial credit risk for deposits is the risk that in the event of a bank failure, the Systems' deposits may not be recovered. As prescribed by South Carolina state statute, the State Treasurer is the custodian of all deposits and is responsible for securing all deposits held by banks. These deposits are secured by deposit insurance, surety bonds, collateral securities, or letters of credit to protect the state against loss in the event of insolvency or liquidation of the institution or for any other cause. Deposits are insured by the Federal Deposit Insurance Corporation (FDIC) up to \$250,000 or collateralized with securities held by the state or its agent in the State Treasurer's name as custodian. The total amount of the Systems' deposits at June 30, 2011, was as follows (amounts expressed in thousands):

	Carrying <u>Amount</u>					
SCRS	\$ 37,809					
PORS	5,575					
GARS	67					
JSRS	110					
NGRS	38					
Total	\$ 43,599					

Actual bank balances at June 30, 2011, totaled \$71,930 (expressed in thousands).

Investments

Custodial credit risk for investments is the risk that, in the event of a failure of the counterparty, the Systems will not be able to recover the value of the investments or collateral securities that are in the possession of an outside party. Investing for the Systems is governed by Section 16, Article X of the South Carolina Constitution and Section 9-1-1310(B) and Title 9 Section 16 of the South Carolina Code of Laws. Funds held in trust for the Retirement Systems may be invested and reinvested in a variety of instruments including, but not limited to, fixed income instruments of the United States, foreign fixed income obligations, swaps, forward contracts, futures and options, domestic and international equity securities, private equity, real estate, and fund of funds. The following table presents the fair value of investments as of June 30, 2011:

South Carolina Retirement Systems 45

Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. While the Systems' have no formal interest rate risk policy, interest rate risk is managed within the portfolio using effective duration, which is a measure of the price sensitivity of a bond or a portfolio of bonds to interest rate movements given a 50 basis point change in interest rates. Effective duration takes into account that expected cash flows will fluctuate as interest rates change and provides a measure of risk that changes proportionately with market rates. Within the investment policy, operational guidelines specify the degree of interest rate risk taken versus the benchmark within each fixed income portfolio.

The Systems invests in mortgage-backed securities which are reported at fair value in the Statement of Plan Net Assets and are based on cash flows from principal and interest payments of the underlying mortgages. These securities are sensitive to prepayments, which are likely in an environment of declining interest rates, and thereby reduce the value of the security. The Systems invests in these securities to diversify the fixed income portfolio and minimize risk. Disclosures for interest rate risk at June 30, 2011, are noted below (amounts expressed in thousands):

Credit Risk of Debt Securities

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations to the Systems. As a matter of practice, there are no overarching limitations for credit risk exposures within the overall fixed income portfolio. Each individual portfolio within fixed income is managed in accordance with operational guidelines that are specific as to permissible credit quality ranges, exposure levels within individual quality tiers, and average credit quality. A quality rating of lower than C is not permissible in any of the fixed income guidelines except in those circumstances of downgrades subsequent to purchase, in which case the investment manager is responsible for communicating the downgrade to the consultant and RSIC staff. The Systems' fixed income investments were rated by Moody's and are presented below:

¹Agency rating is assigned to securities issued by government sponsored enterprises such as Federal National Mortgage Association (FNMA), Federal Home Loan Banks (FHLB), Federal Home Loan Mortgage Corporation (FHLMC) and Federal Farm Credit Banks (FFCB) that do not have a credit rating. These enterprises have an implied guarantee by the U. S. Government.

² NR represents securities that were either not rated or had a withdrawn rating.

South Carolina Retirement Systems 47

Concentration of Credit Risk – Investments

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer. The Systems' policy for reducing this risk is to comply with the Statement of Investment Objectives as amended and adopted by the Commission which states that "except that no limitations on issues and issuers shall apply to obligations of the U.S. Government and Federal Agencies, the domestic fixed income portfolio shall contain no more than 6 percent exposure to any single issuer." As of June 30, 2011 there is no single issuer exposure within the portfolio that comprises 5 percent or more of the overall portfolio. Therefore, there is no concentration of credit risk.

Foreign Currency Risk

Foreign currency risk is the risk that changes in exchange rates will adversely impact the fair value of an investment. The Systems participates in foreign markets to diversify assets, reduce risk and enhance returns. Exposure to foreign investments has, to date, been achieved synthetically using financial futures, forwards and swaps. Currency forwards are used to manage currency fluctuations and are permitted by investment policy. Policy, however, forbids speculating in forwards and other derivatives.

The table below presents the Systems' exposure to foreign currency risk in U.S. dollars as of June 30, 2011, (amounts expressed in thousands):

	Cas	sh & Cash	F	Forward		Futures		Private		Private Alternative			Fixed
Currency	Eq	uivalents	С	ontracts	C	ontracts	Equity		Investments		Income

Derivatives

Derivatives are financial instruments whose value is derived from underlying assets or data. All of the Systems' derivatives are considered investments. Excluding futures, derivatives generally take the form of contracts in which two parties agree to make payments at a later date based on the value of specific assets or indices. Through certain collective trust funds, the Systems may invest in various derivative financial instruments such as futures and options thereon; forward foreign currency contracts; options; interest rate, currency, equity, index, and total return swaps; interest-only strips; and CMOs to enhance the performance and reduce volatility. The Systems' derivatives, consisting of futures, forward contracts and swaps directly managed by the Commission, are presented in the tables on Pages 49-51.

To date, the primary reasons for the Commission's use of derivative contracts have pertained to their ability to facilitate changes to the asset allocation of the total plan and for their low cost of implementation. The Commission uses derivatives for several reasons:

- Asset Allocation: In many cases, synthetic exposures (using derivatives) are placeholders until managers are hired and funded. In time, the Commission may substitute traditional managers for much of the synthetic exposure currently in the portfolio. Efficient markets dictate that in some asset classes, synthetics are the best way to achieve exposure.
- Risk Management: Derivatives allow investors the ability to swiftly and efficiently increase or decrease exposures in order to manage portfolio risk.
- Cost: A synthetic (derivative) solution is often the least expensive way to gain exposure to an asset class or to manage portfolio risk. Derivatives are more beneficial in each of the three major measures of cost: commission costs, market impact of trading, and opportunity costs.

Futures are contractual obligations that require the buyer (seller) to buy (sell) assets at a predetermined date at a predetermined price. These contracts are standardized and traded on an organized exchange with gains and losses settled daily thereby significantly reducing credit and default risk. Gains and losses are included in the net appreciation/(depreciation) in the fair value of investments total of the Statement of Changes in Plan Net Assets. To comply with the requirements of multiple exchanges, securities in the amount of \$139.042 million of various GNMA's were held in trust by the clearing brokers on June 30, 2011, to satisfy the required margin amount to establish the Systems' futures exposure.

The table below presents classification information on the Systems' derivatives at June 30, 2011 (amounts in thousands):

	Changes in Fair Va	alue	Fair Value at 6/30/2011						
	Classification	Gain/(Loss)	Classification	1	Amount				
Investment derivative	es:								
Futures Contracts Forward Contracts	Net appreciation/(depreciation) Net appreciation/(depreciation)	(19,048)	Alternative Investments Cash & Cash Equivalents	\$	75,123 (10,287)				
Swaps	Net appreciation/(depreciation)	130,202	Alternative Investments		(81,443)				

As of June 30, 2011, the Systems had the following exposure via futures contracts (dollar amounts in thousands):

Futures Contracts	Expiration	Long/Short	Quantity	Ν	otional Value*
MTF CAC40 10EU	July 2011	Long	2,218	\$	127,971

Total Large Cap Equit	у				1,288,532
Total				\$	2,619,405

*Notional value is the nominal or face amount that is used to calculate payments made on derivative instruments (futures, forwards, swaps, etc.). This amount generally does not change hands and is thus referred to as notional. The notional amount represents the economic equivalent to an investment in the physical securities represented by the derivative contract.

South Carolina Retirement Systems 49

Forwards are contractual obligations that require the delivery of assets at a fixed price on a predetermined date. These contracts are "over-the-counter" (OTC) instruments, meaning they are not traded on an organized exchange. Currency forwards gains and losses are included in the net appreciation/(depreciation) in the fair value of investments total of the Statement of Changes in Plan Net Assets.

As of June 30, 2011, the Systems had the following forward exposures, listed by counterparty (amounts expressed in thousands):

Broker	N	otional Value	Base G	ain/(Loss)	Base Exposure
JP Morgan Chase Bank	\$	228,063	\$	(1,728)	16.67%
Westpac Banking Corp		228,056		(1,721)	16.67%
Royal Bank of Canada		211,188		(1,855)	15.43%
Deutshe Bank		204,879		(2,000)	14.97%
HSBC Securities		181,738		(2,064)	13.28%
Societe Generale SA		178,402		(905)	13.04%
Credit Suisse AG		89,573		(479)	6.55%
BNP Paribas		46,399		465	3.39%
Totals	\$	1,368,298	\$	(10,287)	100.00%

The Systems has entered into various swap agreements to manage risk exposure. Swaps are OTC agreements to exchange a series of cash flows according to specified terms. The underlying asset can be an interest rate, an exchange rate, a commodity price or any other index.

Total return swaps are primarily used to efficiently achieve a target asset allocation. Exposures to an asset class are typically gained by paying a reference rate such as LIBOR, plus or minus a spread, in exchange for the risk and returns of a desired market index. Similarly, exposures can be reduced by receiving a reference rate in exchange for the economic risks and returns of an index.

Counterparty risk, or default risk, is the risk that a party will not honor its contractual obligations. The Systems seeks to actively manage its counterparty risk by thorough analysis and evaluation of all potential counterparties by investment staff and the independent overlay manager. Risk is further minimized through diversification among counterparties with high credit ratings and collateralizing unrealized gains and losses. The Systems currently does not participate in a master netting agreement. Unrealized gains and losses are not netted across instrument types. At June 30, 2011, the Systems had no credit risk to counterparties due to market conditions placing the Systems in a net payable position; however, sufficient collateral has been posted with each counterparty to satisfy all outstanding liabilities.

The table below reflects the counterparty credit ratings at June 30, 2011, for currency forwards and swap agreements (amounts in thousands):

Quality Rating	Forwards	Swaps	Total
AA1	\$ (3,577)	\$-	\$ (3,577)
AA2	(2,983)	(37,786)	(40,769)
AA3	(3,727)	(25,657)	(29,384)
A1		(18,000)	(18,000)
Total subject to credit risk	\$ (10,287)	\$ (81,443)	\$ (91,730)

Swap market value (or notional value) is calculated based on the actual index value of the benchmark index multiplied by the number of index units. The index value is the level or price of the benchmark index. The index units were determined at commencement of the swap and are detailed in the term sheet. At June 30, 2011, the Systems held swaps as shown in the table below (amounts expressed in thousands):

Counterparty	Total Return Swaps	SCRS Pays	SCRS Receives	Maturity Date	Current Notional	n (Loss) ce Trade
UBS	SP500 Proxy	3 month Libor - 13 bps	S&P 500	7/15/2011	\$ 126,403	\$ 26,403

	Total Return Swap Expos	ures			\$ 2,405,412	\$ 46,820

Alternative Investments

The Alternatives category includes exposure to private equity, global tactical asset allocation, absolute return, opportunistic credit, real estate, derivatives and strategic partnerships. Private equity investments are normally structured as limited partnerships. In this structure, the Systems is one of several limited partners, while the investment manager serves as the general partner. Investing in limited partnerships legally obligates the Systems to invest the committed amount until the investment is fully funded. All other asset classes within the Alternatives category may be housed in a variety of legal structures. The Systems established several strategic partnerships to gain access to the best ideas of the investment manager, to receive favorable economics, and to efficiently take advantage of market opportunities. Our investments within the strategic partnership accounts include allocations to private equity, opportunistic credit, real estate, absolute return strategies and cash. The Systems' allocation to opportunistic credit is designed to take advantage of the dislocations that have occurred in the credit markets. The Systems' intent is to access superior risk adjusted returns through a variety of different credit strategies.

Commitments

The Systems has entered into contractual agreements with numerous alternative investment managers and is committed for future funding of private equity, real estate and opportunistic credit limited partnerships. As of June 30, 2011, the Systems had committed to fund various limited partnerships in the total amount of \$2.929 billion (U.S. dollars) and €218 million (Euros). The total unfunded commitment as of June 30, 2011, was \$1.360 billion (U. S. dollars) and €62 million (Euros). Subsequent to June 30, 2011, the Systems committed to fund an additional \$41.600 million (U. S. dollars) which resulted in a total remaining commitment adjusted for cash flows as of September 16, 2011, of \$1.289 billion (U.S. dollars) and €55 million (Euros). In addition, although legal contractual agreements in place do not necessarily dictate authorized commitment amounts, various other alternative investment fundings will be deployed at the full discretion of the Commission through the use of the strategic partnership accounts. These underlying investments include hedge funds, private equity, real estate, opportunistic credit and short duration fixed income.

Securities Lending

Through a custodial agent, the Systems participate in a securities lending program whereby securities are loaned for the purpose of generating additional income. The Systems lends securities from its investment portfolios on a collateralized basis to third parties, primarily financial institutions. The market value of the required collateral must initially meet or exceed 102 percent of the market value of the securities loaned, providing a margin against a decline in the market value of the collateral, and requires additional collateral if the collateral value falls below 100 percent.

There are no restrictions on the amount of securities that may be loaned. The types of securities available for loan during the year ended June 30, 2011, included U.S. Government securities, U.S. Government agencies, corporate bonds and equities. The contractual agreement with the Systems' custodial bank provides indemnification in the event the borrower fails to return the securities lent or fails to pay the Systems income distribution by the securities' issuers while the securities are on loan. Cash and U.S. Government securities were received as collateral for these loans. The Systems cannot pledge or sell collateral securities without a borrower default. The Systems invests cash collateral received; accordingly, investments made with cash collateral appear as an asset. A corresponding liability is recorded as the Systems must return the cash collateral to the borrower upon the expiration of the loan.

At June 30, 2011, the fair value of securities on loan was \$317.633 million. The fair value of the invested cash collateral was \$229.161 million. Securities lending obligations at June 30, 2011, were \$325.373 million with the unrealized loss in invested cash collateral of \$96.212 million reflected under "Other Liabilities" on the Statement of Plan Net Assets and recorded in the Statement of Changes in Plan Net Assets under "Net appreciation (depreciation) in fair value of investments." The Commission evaluates the securities lending program in order to minimize risk, enhance performance and ensure a cost effective fee structure is in place.

With regard to custodial credit risk, the Systems' cash collateral invested is held by the counterparty and is uninsured. All securities loaned can be terminated on demand by either the Systems or the borrower. At year end the average number of days the loans were outstanding was one day. The average weighted maturity of investments made with cash collateral was one day. At June 30, 2011, there had been no losses resulting from borrower defaults and the Systems had no credit risk exposure to borrowers because the amounts the Systems owed the borrowers exceeded the amounts the borrowers owed the Systems.

The following table presents the fair value (amounts expressed in thousands) of the underlying securities and the total collateral received for securities on loan at June 30, 2011.

	June 30, 2011										June	e 30, 2010

V. Transfers Between Systems

Transfers between systems are statutorily authorized transfers of contributions and service credit from one retirement system to another retirement system that result from members voluntarily initiating the transfer when certain conditions are met.

Transfers made during the fiscal year ended June 30, 2011, were as follows (amounts expressed in thousands):

		Transfers to										
Transfers from	SCRS		PORS	GA	RS	J	SRS	NG	RS	Totals		
SCRS	\$	-	\$ 1,907	\$	1	\$	6	\$	-	\$ 1,914

Totals	\$ -	\$ 458	\$	\$	92	\$ -	\$	550

VI. Related Party Transactions

The pension plans provide pension and other fringe benefits to employees of all state agencies. Revenues attributed to these agencies are recorded in the financial statements as employee and employer contributions and constitute approximately 33 percent of combined contribution revenues. In addition, the Systems receives custodial and related services from the State Treasurer.

At June 30, 2011, liabilities of approximately \$42.9 million were due to other state departments and agencies, and contributions receivable of approximately \$39 million were due from other state departments and agencies.

The National Guard Retirement System received stateappropriated contributions in the amount of \$3.9 million during the fiscal year.

The Retirement System Investment Commission was established in 2005 and is considered a separate state agency; however, the expenses of the RSIC are funded by transfers from the Systems. Transfers in the amount of approximately \$4.9 million were made to the RSIC during the fiscal year.

South Carolina Retirement Systems 54

VII. Deferred Retirement Option Plans

The Teacher and Employee Retention Incentive (TERI) program, implemented effective January 1, 2001, is a deferred retirement option plan available to active SCRS members eligible for service retirement on or after January 1, 2001. When a member enters TERI, the member's status changes from an active member to a retiree even though the employee continues to work at his regular job and earn his regular salary for a period of up to five years. TERI participants who entered the program after June 30, 2005, must continue to contribute at the same rate as active members. Those who entered prior to July 1, 2005, make no employee contributions while participating in TERI. No additional service credit is earned during this period and participants are ineligible for disability retirement benefits. During the TERI participation period, the retiree's monthly benefits are accrued and accumulate in the trust account. Upon termination of employment or at the end of the TERI period (whichever is earlier), the retiree may elect to roll over his funds into a qualified, tax-sheltered, retirement plan or to receive a single-sum distribution (or a combination thereof). No interest is paid on the participant funds accumulated in the TERI account.

A total of 5,862 members were actively participating in the TERI program at June 30, 2011. The activity for this program is reflected in the following schedule:

Schedule of TERI Activity Year Ended June 30, 2011 (Amounts expressed in thousands)

\$ 322,350
155,874
(114,851)
\$ 363,373

A deferred retirement option program has also been established under the Retirement System for Judges and Solicitors (JSRS). A member who has not yet reached the age of 60 years, but who is eligible to retire and receive the maximum monthly benefit, may continue to serve as a judge, a solicitor, or a circuit public defender. The member's normal monthly retirement benefit is deferred and placed in the system's trust fund on behalf of the member. Upon reaching the age of 60 years, the balance of the member's deferred retirement benefit is distributed to the member. As of June 30, 2011, two JSRS members were participating in the deferred retirement option program and benefits held in trust totaled \$632,000.

VIII. Funded Status and Funding Progress - Pension Trust Funds

The funded status of each defined benefit pension plan as of July 1, 2010, the most recent actuarial valuation date, is as follows (dollar amounts expressed in thousands):

System	Actuarial Value of Assets (a)	Actuarial Accrued Liability (AAL) -Entry Age (b)			nfunded AAL (UAAL) (b - a)	Funded Ratio (a/b)	Covered Payroll (c)	UAAL as a Percentage of Covered Payroll ((b - a)/c)
SCRS	\$ 25,400,331	\$	38,774,029	\$	13,373,698	65.5%	\$ 7,769,820	172.1%
PORS	3,612,700		4,850,457		1,237,757	74.5%	1,076,467	115.0%
GARS	43,712		68,671		24,959	63.7%	3,854	647.6%
JSRS	142,871		215,823		72,952	66.2%	18,661	390.9%
NGRS	19,458		54,153		34,695	35.9%	N/A	N/A

The schedules of funding progress, presented as required supplementary information (RSI) following the notes to the financial statements, present multiyear trend information about whether the actuarial values of plan assets are increasing or decreasing over time relative to the AALs for benefits.

Additional information as of the latest actuarial valuation follows:

Summary of Actuarial Methods and Significant Assumptions

¹Beginning the July 1st following one year of receiving benefits, the monthly benefit amount will increase by the calendar year change in CPI but not to exceed 2 percent. No COLA paid during deflation or when CPI is negative. Additional ad hoc COLAs may be paid as approved by the State Budget and Control Board and based upon the financial condition of the System.

²Pending Board approval of a 0.92% contribution rate increase effective July 1, 2012, or alternatively a 0.48% increase effective July 1, 2012, and a 0.48% increase effective July 1, 2013, to maintain a 30 year period.

³Pending Board approval of a 0.305% contribution rate increase effective July 1, 2012, or a 0.158% contribution rate increase effective July 1, 2012, and a 0.157% contribution rate increase effective July 1, 2013, to maintain a 30 year period.

South Carolina Retirement Systems 56

IX. Death Benefit Program

In addition to monthly pension benefits provided through the Retirement Systems, a Death Benefit Program is available to employers. For participating employers, death benefits are provided for active and retired members. These benefits are funded through separate death benefit programs for SCRS and PORS on a cost-sharing, multiple-employer basis. Coverage is provided to eligible active and retired working members as well as non-working retirees under the governing statute. Funding for the plans is collected as a percent of covered payroll as determined by the Systems' actuary and approved by the Budget and Control Board. The current employer contribution rates for the programs are 0.15 percent and 0.20 percent of payroll for SCRS and PORS respectively. These contributions fund both the active and retiree death benefits.

Active Death Benefits

Upon the death of an SCRS or PORS contributing member in service who had at least one full year of membership or who died as a result of an injury arising in the course of performing his duties regardless of length of membership, a death benefit equal to the annual earnable compensation of the member at the time of death is payable apart and separate from the payment of pension benefits.

Retiree Death Benefits

Retired members of SCRS and PORS whose last employer prior to retirement is covered by the program, and who met applicable service credit requirements, are also protected under the state-sponsored death benefit program. Upon the death of a retired member, the beneficiary of a non-working retiree will receive a benefit payment based on the member's total creditable service at the time of retirement.

Years of Ser	vice Credit	
<u>SCRS</u>	PORS	Death Benefit
10 to 19	10 to 19	\$2,000
20 to 27	20 to 24	\$4,000
28 or more	25 or more	\$6,000

Members who work after retirement by either participating in the TERI program or by returning to covered employment as a working retiree are eligible for an increased level of death benefits. Beneficiaries of working retirees are provided with a death benefit equal to the amount of the member's annual earnable compensation in lieu of the standard \$2,000, \$4,000 or \$6,000 retired member benefit.

All benefits provided by the Retirement Systems are included in the valuation, including the Incidental Death Benefit program for SCRS and PORS, which were previously covered under separate valuations. The July 1, 2010, valuations reflect the inclusion of the assets and liabilities of the Incidental Death Benefit program. The impact to SCRS was to increase the UAL by \$75 million, but due to inclusion of the additional 0.15% of payroll contributions, there was no impact to the funding period. Under PORS, there was a slight decrease to the UAL but due to additional expected contributions, the impact decreased the funding period by 2.3 years.

X. Litigation

In addition to the litigation mentioned below, controversies or disputes between the South Carolina Retirement Systems and its members arising out of the provisions of Title 9 of the South Carolina Code of Laws (Retirement provisions) are resolved through the "South Carolina Retirement Systems Claims Procedures Act" established by S.C. Code Ann. §§9-21-10 et seq. Claims brought pursuant to the Claims Procedures Act generally involve matters pertinent to the individual member or beneficiary. Claims may not be brought on behalf of a class under the Claims Procedures Act.

Ahrens et al. v. the South Carolina Retirement System, the South Carolina Retirement System and the State of South Carolina. This case was a class action case alleging that provisions in Act No. 153 of the Acts and Joint Resolutions of the General Assembly for the year 2005 ("Act No. 153") requiring working retirees in the South Carolina Retirement System ("SCRS") to make employee contributions were unconstitutional and illegal. A circuit court judge certified the class in this case and issued an order on the merits in the matter granting the Plaintiffs relief based on the equitable theory of estoppel. The circuit court denied all other claims for relief made by the Plaintiffs, including their contract causes of action. The Retirement Systems and the State of South Carolina appealed the circuit court's order to the South Carolina Supreme Court. On May 4, 2011, the Supreme Court of South Carolina found in favor of SCRS and the state of South Carolina on all claims and reversed the circuit court's order granting plaintiffs' relief.

Arnold et al. v. the South Carolina Police Officers Retirement System, the South Carolina Retirement System and the State of South Carolina. This case was a class action case filed on August 9, 2005, alleging that provisions in Act No. 153 of the Acts and Joint Resolutions of the General Assembly for the year 2005 ("Act No. 153") requiring working retirees in the Police Officers Retirement System ("PORS") to make employee contributions were unconstitutional and illegal. This was the companion case of the Ahrens case above. The same circuit court judge in Ahrens heard the case and certified a class in this case and issued an order on the merits in the matter granting the Plaintiffs relief based on the equitable theory of estoppel. The circuit court denied all other claims for relief made by the Plaintiffs, including their contract causes of action. The PORS and the State of South Carolina appealed the circuit court's order to the South Carolina Supreme Court. On May 4, 2011, the Supreme Court of South Carolina found in favor of PORS and the state of South Carolina on all claims and reversed the circuit court's order granting plaintiffs' relief.

Hutto, et al v. The South Carolina Retirement System, et al. This putative class action was filed in federal court in August, 2010 alleging that provisions in Act No. 153 of the Acts and Joint Resolutions of the General Assembly for the year 2005 ("Act No. 153") requiring working retirees in the South Carolina Retirement System ("SCRS") and the Police Officers Retirement System ("PORS") to make employee contributions are unconstitutional and illegal. The plaintiffs in Hutto all retired after Act 153 was enacted and thus were on notice that they would pay retirement contributions if they chose to return to work. It is too early to offer any opinion about the potential outcome of this case. As of June 30, 2011, the Retirement Systems had collected approximately \$91 million in the form of retirement contributions from members of the Retirement Systems who are retired and returned to work on or after July 1, 2005. The Client intends to vigorously defend this matter.

Anderson County v. Joey Preston and the South Carolina Retirement System ("SCRS"). Defendant Joey R. Preston ("Preston") is a retired member of SCRS who was employed by Plaintiff. Plaintiff's Complaint seeks to rescind a severance agreement entered into by the Plaintiff with Preston. As part of the Severance Agreement, Plaintiff paid approximately \$355,000 to the Defendant SCRS to purchase retirement service credit on behalf of Preston. Plaintiff has named Defendant SCRS in their complaint as a stakeholder and seeks a return of the \$355,000 paid to SCRS. As a result of the service purchase, Preston was able to retire and begin drawing a retirement benefit. The case is currently pending in the Anderson County Circuit Court. SCRS is defending this case to ensure that, regardless of the outcome of Plaintiff's claims related to the severance agreement, SCRS does not suffer any monetary loss as a result of the service purchase.

Schedule of Employer Contributions (Amounts expressed in thousands)

¹ For years prior to June 30, 2010, the Annual Pension Cost (APC) for the National Guard Retirement System includes both the Annual Required Contribution (ARC) and the discounted present value of the balance of the Net Pension Obligation (NPO). The APC for the fiscal year ended June 30, 2010, was calculated as part of the July 1, 2010 actuarial valuation; therefore, the amount listed as of June 30, 2010 contains only the ARC. The NPO is carried as an "Other Liability" in the Financial Statements of the State of South Carolina.

¹Manager hired during fiscal year 2011.

²Contract terminated during fiscal year 2011.

*Several of the alternative investment managers provide account valuations on a net of fee basis. Management fees are netted against investment income and because they are not readily separable for specific investment income, amounts are recorded and reported net of fees.

indsurfing can be a bumpy ride for even the most trained and skilled athlete. Choppy water and unpredictable currents create a challenging task for surfers as they seek to manage the ups and downs of the waves for a smooth experience.

Funding for the state's five pension plans is made up of three sources: employee contributions, employer contributions and investments. The plans are invested by the Retirement System Investment Commission in a variety of funds and asset classes to ensure that the portfolio is well diversified and that we are able to generate significant long-term returns. This also helps the state ride out highs and lows in the market as the funds are spread over a wide variety of investments. Members benefit from having the Commission guide and manage their plan's funding. Allen R. Gillespie, CFA Chairman

November 7, 2011

The Honorable Nikki Haley, Governor Budget and Control Board Members of the General Assembly of South Carolina

Dear Ladies and Gentlemen:

On behalf of the Retirement System Investment Commission (RSIC), it is our pleasure to provide the enclosed report on the investments of the South Carolina Retirement Systems' (Retirement System) portfolio for Fiscal Year Ending 2011 (FYE 2011). The RSIC was created in 2005 as a fiduciary for the Retirement System to assume full responsibility of investing and managing all assets of the Retirement System.

Capital Market Summary

FYE 2011 was another year of government intervention as fears of a "double dip" recession resurfaced later in the year and discussion of the US debt ceiling became a central topic for policymakers. In August 2010, Federal Reserve Chairman Ben Bernanke hinted that the Federal Reserve may implement additional monetary stimulus in order to kick start a somewhat stagnant economy. In November 2010, Chairman Bernanke officially announced a second round of quantitative easing where the Federal Reserve would purchase \$600 billion of Treasury securities by the end of the second quarter in 2011. Furthermore, concern over the health of the European financial system came to the forefront again as default risk increased in Greece and several other European countries. Yet, while economic uncertainty loomed, the global financial markets rallied as interest rates remained at or near historical lows in hopes that this would lead to a more robust recovery.

However, after the close of the fiscal year, our macro-economic concerns were borne out as volatility in risk assets increased and their values declined from June 30, 2011, through September 30, 2011. During this period, the S&P 500 Index was down 13.9%, the MSCI EAFE Index fell 19.0%, and the BarCap US High Yield Index dropped 6.1%, giving back much of the ground that had been gained during the fiscal year. We anticipate the markets to remain volatile over the coming year as fears of an economic slowdown and the potential for a European sovereign debt default remains high.

For FYE 2011, small-mid cap growth equity was the best performing asset class, returning 44.7% as measured by the Russell 2500 Growth Index; and the Barclays Capital US Aggregate Index (core fixed income) was the worst performing, returning 3.9%. However, other fixed income markets hit double digit returns: US High Yield was up 15.6%; Emerging Markets Debt was up 11.4%; and Global Fixed Income returned 10.5%. Large cap US stocks (S&P 500 Index) were up 30.7% and Emerging Market Equity (MSCI EME Index) gained 27.8%.

FYE 2011 Investment Performance Review

The Retirement System investment portfolio (Portfolio) returned 18.3%, net of fees, for FYE 2011, exceeding the Policy benchmark return of 17.1% by 1.2%. As of FYE 2011, the Portfolio's market value was \$26.2 billion, up from \$22.9 billion a year earlier. The net increase of \$3.3 billion included the impact of \$897 million of net cash outflows for retiree obligations. The Portfolio's positive performance relative to the Policy and Strategy Benchmarks was primarily due to superior investment manager performance. It is important to note that the Portfolio tends to have substantially less equity risk and a higher cash allocation than the average public pension fund.

The alternatives portion of the Portfolio continues to perform well. The RSIC's Opportunistic Credit portfolio was up 12.4%, while the Hedge Fund portfolios returned 10.9% in aggregate. On a relative basis, the Portfolios significant underweight to real estate was a detractor to returns as the NCREIF Property Index was up 16.7%.

Asset Allocation Targets

On November 18, 2010, the Commission made several changes to the asset allocation targets, which became effective December 1, 2010. Within equity, the allocation to emerging markets increased to 8% from 5% through a slight reduction to US large cap and developed international equity. The Portfolio's target equity allocation continues to be much lower than most other public pension funds for the two reasons discussed below.

In early 2009, the RSIC recognized an opportunity to earn equity-like returns with far less risk by investing in Opportunistic Credit strategies. As these credit markets recovered significantly throughout 2010, the Commission elected to take profits and reduced the target allocation to these fixed income investments from 10% to 8%. In FYE 2011, these fixed income investments, although having double digit returns, trailed the equity markets.

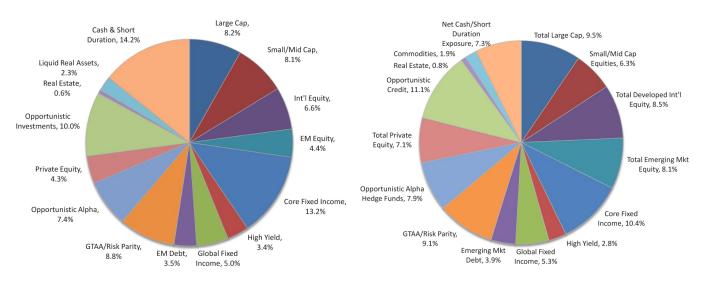

Similarly, the RSIC determined that with credit spreads contracting significantly over the past year that the Global Fixed Income was likely to underperform on a relative basis during the year. The Commission reduced the target exposure to global fixed income by 1%.

The total 4% reduction to credit and other fixed income markets was mostly reallocated to increase the Private Equity target from 7% to 10% as the Portfolio will focus on direct capital opportunities. Also, the Portfolio had very little exposure (about 1% of assets) to Real Estate throughout the year. Due to the extent of the decline in recent years, the RSIC has recently begun to prioritize investments in Real Estate as the market has started to show signs of a recovery, increasing the target allocation to 6% from 5%.

Portfolio Exposure as of June 30, 2010^{1,2}

Portfolio Exposure as of June 30, 2011^{1,2}

¹ Values are rounded for presentation purposes.

² Portfolio exposure may differ from NEPC flash report due to adjustments made for managers that invest across multiple asset classes.

Strategic Planning

In 2009 the Commission approved a three-year strategic plan, which identified a series of goals that are critical elements in building a best-in-class investment management organization. The Commission has completed three of the original seven goals, and has revised the Strategic Plan to address additional initiatives to improve investment and operational performance. These goals are detailed in the *Annual Investment Report*, along with the RSIC's mission, vision, and values statements.

Looking Ahead

While FYE 2011 produced strong, double-digit returns for most financial markets, our expectations are for relatively modest returns over the next several years. The Commission continues to see at least four significant issues which give us concern when calculating the future investment climate. We expect a continued period of extraordinarily low interest rates as the Federal Reserve continues to use its interest rate setting power to try to stimulate economic growth. This, however, leads to a challenging environment for bonds, as the yield on the 10-Year Treasury bond is approximately 2.0%. We continue to expect an extended period of low growth as the deleveraging process continues across the US and developed economies. Further, as of the writing of this letter, there is yet to be resolution to the debt crisis in Europe and a comprehensive European solution to it seems politically challenging at best. Should Europe's economy fall into recession, we feel certain there will be spillover effects into the US economy. Finally, there is reason to believe that China's economy has been fueled by a real estate bubble and that other aspects of its economy are potentially faltering, which gives us reason to be cautious given the magnitude of China's economy in relation to the global economy.

In sum, we are cautious about investment returns in the upcoming years and are positioning the portfolio somewhat defensively as a result. We believe that the best opportunities to achieve higher

PHONE 803.737.6885 | FAX 803.737.7070

returns will be through significant investment in private markets, real estate, and emerging markets. Additionally, we intend to continue our emphasis on controlling the total cost of the Portfolio.

While the challenge at hand is significant, we are committed to serving the best interests of the participants and beneficiaries of the Retirement System, and we will continue to manage the assets of the Portfolio in a prudent and transparent manner, seeking superior returns at acceptable levels of risk. It is a tremendous responsibility and opportunity for us to serve as the Investment Commission's Chairman and CEO/CIO.

Sincerely,

aller M. Muss

Allen Gillespie, CFA Chairman

¹Barclays PLC purchased Lehman Brothers Holdings Inc's benchmark service in 2008, and subsequently changed the beginning of the index names from "Lehman Brothers" to "Barclays Capital."

²Measure of the Consumer Price Index (CPI) - All urban Consumers (all items) represents the year-over-year changes in prices of all goods and services purchased for consumption by urban households and includes expenditures by urban wage earners and clerical workers, professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, retirees and others not in the labor force. This represents about 80 percent of the total U.S. population and is the broadest, most comprehensive measure of changes in prices of goods and services.

³Calculations were prepared using a time-weighted rate of return calculation and follows the Bank Administration Institute's recommendations on cash flows. No returns are stated for periods of time for which the Systems was not invested in specific markets.

⁴Effective July 1, 2004, a two percent (approximately) portion of the aggregate fixed income portfolio was segmented into a liquidity pool of short duration investments to more efficiently manage cash flows.

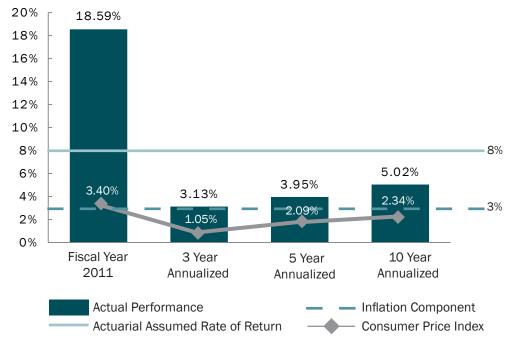

⁵Non-Core Fixed Income is comprised of high yield, global fixed income and emerging market debt.

⁶During FY 2011, the emerging market equity segment was funded; however, results for the full fiscal year are not available.

⁷The returns generated from the synthetic allocations to Domestic Fixed Income, Domestic Equity, and Non U.S. Equity are reflected in the Total Portfolio returns, but they are not specifically included in the individual corresponding asset classes.

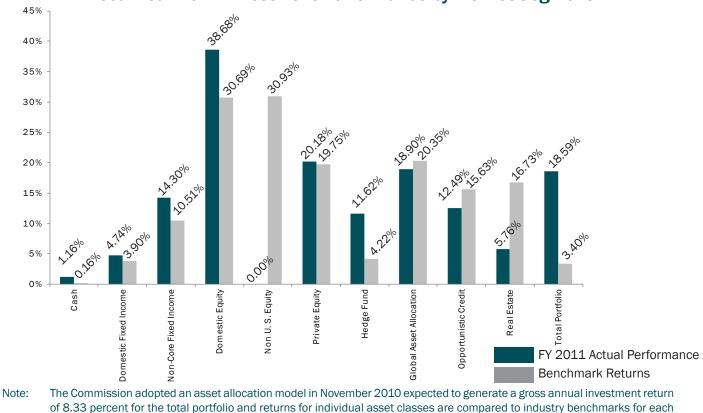

⁸Fiscal year 2009 performance was adjusted for a securities lending loss that was recognized in fiscal year 2009 for financial statement purposes. This adjustment resulted in total performance being restated from -19.04% to -19.60%.

South Carolina Retirement Systems 81

South Carolina Retirement Systems Investment Performance Summary

Note: The actuarial assumed rate of return is 8 percent starting with returns after July 1, 2008, and is composed of an assumed 3 percent inflation rate and a 5 percent real rate of return, net of investment and administrative expenses.

Sailors of sail boats depend a great deal on their calculations. Calculations of the wind, the tide and the weather. They take into consideration all of these factors and more when determining their course and their ability to safely travel the waters.

Similarly, actuaries perform an essential calculation function for all defined benefit plans. Actuaries consider all the factors experienced by the system such as rates of retirement, withdrawal, disability and mortality to help the Systems determine the best course of assumptions to take for future expectations. Actuaries consider risk, behavior and other trends to determine the appropriate funding required to sustain the system.

Actuarial Section

State Budget and Control Board South Carolina Retirement Systems Columbia, South Carolina 29211

Re: Certification and Statement Regarding the Actuarial Valuations as of July 1, 2010

Dear Members of the Board:

Applicable Laws

The law governing the operation of the Retirement Systems provides that actuarial valuation of the assets and liabilities shall be made annually for the South Carolina Retirement System and the Police Officers Retirement System and at least every other year for the General Assembly Retirement System, the Judges and Solicitors Retirement System and the National Guard Retirement System. We have performed the annual actuarial valuations of each of the five separate Retirement Systems as of July 1, 2010.

Funding Objective

A funding objective is that the contribution requirements of each System will remain relatively level over time. Where contribution rates are set by the Board, the valuation is used to determine the sufficiency of the contributions to maintain or improve the measures of the Systems' funding progress (i.e. *funded ratio, funding period*) and provide for the complete funding of all actuarial liabilities within 30 years or less if statutorily required.

Funding Methodology

The entry age normal actuarial cost method determines each System's normal cost, the cost of the current year's benefit accrual. Additionally, the method determines the actuarial liability, the value of benefits already earned by active and retired members due to past service. A smoothing technique is utilized to produce a market-related actuarial value of assets with the goal of dampening the impact of investment return volatility. The *funded ratio* is the actuarial value of assets as a percentage of the actuarial liability.

An unfunded actuarial liability exists to the extent a System's actuarial liability exceeds its actuarial value of assets. The contribution amount in excess of the System's normal cost is the amount available to amortize an unfunded actuarial liability utilizing the System's amortization method. The System's *funding period* is the resulting number of years necessary to fully amortize the unfunded actuarial liability with the available contributions.

Assumptions

Actuarial assumptions are necessary to estimate the future economic and demographic experience of the Systems. Experience studies are performed periodically to review the assumptions and are the basis for recommended changes. The actuarial assumptions used in the valuations are internally consistent and reasonably based on the actual experience of each of the Systems.

3550 Busbee Pkwy, Suite 250, Kennesaw, GA 30144 Phone (678) 388-1700 • Fax (678) 388-1730 www.CavMacConsulting.com Offices in Englewood, CO • Kennesaw, GA • Bellevue, NE • Hilton Head Island, SC

South Carolina Retirement Systems 91

State Budget and Control Board South Carolina Retirement Systems July 27, 2011 Page 2

The current actuarial assumptions are in accordance with the applicable Actuarial Standards of Practice, as well as the parameters set forth in the Governmental Accounting Standards Board (GASB) Statement No. 25, *Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans*.

The results and conclusions of the reports are based on the actuarial valuations as of July 1, 2010. Differences between our projections and actual amounts depend on the extent to which future experience conforms to the assumptions used in this analysis. Actual amounts will differ from projected amounts to the extent that actual experience deviates from expected experience. These deviations will result in actuarial gains and losses to the respective System.

Data Reliance

In preparing the valuations, we, as the actuary, relied on data provided by the Systems. As part of our work, we performed a limited review of the data for consistency and reasonableness and did not find material defects in the census data.

Supporting Schedules

Our firm, as actuary, is responsible for the actuarial trend data in the financial section of the report and the supporting schedules in the actuarial section, beginning with the information for the July 1, 2010 (July 1, 2004 for the National Guard Retirement System). Information for previous years was supplied by other actuarial firms employed by the System at that time.

Certification

Based on the results of the July 1, 2010 valuations, we believe that the valuations appropriately reflect each of the System's long term obligations and the current and scheduled contribution levels are sufficient to fund the liabilities of each System over a reasonable time frame, and based on these criteria may be deemed actuarially sound.

I, John Garrett, Principal, and I, Edward A. Macdonald, President, are qualified actuaries with Cavanaugh Macdonald Consulting, LLC. We are both Members of the American Academy of Actuaries and meet the Qualification Standards to render the actuarial opinion contained herein. On the basis of the foregoing, we certify that, to the best of our knowledge the valuation reports are complete and accurate and have been prepared in accordance with South Carolina's statutes and generally recognized and accepted actuarial principles and practices which are consistent with the principles prescribed by the Actuarial Standards Board (ASB) and the Code of Professional Conduct and Qualification Standards for Public Statements of Actuarial Opinion of the American Academy of Actuaries.

Our firm and its associates are completely independent of the South Carolina Retirement Systems, its officers and key personnel and do not have any relationship with them that would impair our independence.

Respectfully submitted,

and

John J. Garrett, ASA, FCA, MAAA Principal and Consulting Actuary

had Muddel

Edward A. Macdonald, ASA, FCA, MAAA President

South Carolina Retirement System Summary of Actuarial Assumptions and Methods

1. Investment Return to be Earned by Fund

8.00 percent per annum, compounded annually, composed of an assumed 3.00 percent inflation rate and a 5.00 percent real rate of return, net of investment and administrative expenses.

2. <u>Salary Increases</u>

Rates of annual salary increases are assumed to vary for the first 14 years of service due to expected merit and promotional increases which differs by employee group. Beginning with the 15th year of service, the assumed annual rate of increase is 4.00 percent for both groups and for all future years of service. The 4.00 percent rate of increase is composed of a 3.00 percent inflation component and a 1.00 percent real rate of wage increase (productivity) component.

	Annual I	ncrease		Annual Increase				
Years of Service	General Employees	Teachers	Years of Service	General Employees	Teachers			
0	8.00%	8.00%	8	4.50%	4.75%			
1	5.75%	8.00%	9	4.50%	4.75%			
2	5.00%	5.50%	10	4.25%	4.75%			
3	4.75%	5.25%	11	4.25%	4.50%			
4	4.50%	5.00%	12	4.25%	4.40%			
5	4.50%	5.00%	13	4.25%	4.40%			
6	4.50%	5.00%	14	4.25%	4.40%			
7	4.50%	4.75%	15+	4.00%	4.00%			

We have also provided alternative results based upon a lower expectation of the rate salary increase for the short-term future. Under this alternative, the rates above for active members with eight or more years of service are decreased by 2.00 percent for the fiscal year ending June 30, 2011, and 1.00 percent for the fiscal year ending June 30, 2012.

South Carolina Retirement Systems 105

4. Mortality After Retirement

For healthy retirees and beneficiaries, the UP-94 Mortality Table rates is used, with the female rates set back one year. A separate table of mortality rates is used for disabled retirees based upon the RP-2000 Disabled Retiree Mortality Table. The following are sample rates:

		Неа	lthy		Disabled					
	Empl	loyees	Tea	<u>chers</u>	Emple	oyees	Teac	chers		
Age	Male	Female	Male	Female	Male	Female	Male	Female		
50	0.28%	0.14%	0.25%	0.14%	2.46%	1.27%	2.17%	1.27%		
55	0.48%	0.22%	0.43%	0.22%	3.01%	1.82%	2.66%	1.82%

75	4.00%	2.19%	3.66%	2.19%	6.98%	5.75%	6.16%	5.75%		
80	6.67%	3.80%	6.01%	3.80%	9.30%	7.95%	8.20%	7.95%		
85	10.46%	6.56%	9.64%	6.56%	12.04%	11.02%	10.62%	11.02%		

5. <u>Marriage Assumption</u>

One hundred percent of all active members are assumed to be married, with female spouses being three years younger.

6. <u>Asset Valuation Method</u>

The actuarial value of assets is equal to the market value of assets less a ten-year phase in of the excess (shortfall) between expected market investment return (including the return on TERI balances) and actual net investment income (excess returns and shortfalls determined prior to July 1, 2008 remain with a five-year phase in).

7. Actuarial Cost Method

The contribution rate is set by statute for both employees and employers. The funding period is determined, as described below, using the Entry Age Normal actuarial cost method. The Entry Age Normal actuarial cost method allocates the plan's actuarial present value of future benefits to various periods based upon service. The portion of the present value of future benefits allocated to years of service prior to the valuation date is the actuarial accrued liability, and the portion allocated to years following the valuation date is the present value of future normal costs. The normal cost is determined for each active member as the level percent of payroll necessary to fully fund the expected benefits to be earned over the career of each individual active member. The normal cost is partially funded with active member contributions with the remainder funded by employer contributions.

An unfunded accrued liability exists in the amount equal to the excess of accrued liability over valuation assets. The amortization period of the System is the number of years required to fully amortize the unfunded accrued liability with the expected amount of employer contributions in excess of the employers' portion of the normal cost.

The calculation of the amortization period takes into account scheduled increases to contribution rates applicable to future years and payroll growth. Also, the calculation of the amortization period reflects additional contributions the System receives with respect to post 7/1/2005 TERI participants, ORP

South Carolina Retirement Systems 106

participants and return to work retirees. These contributions are assumed to grow at the same payroll growth rate as for active SCRS employees. It is assumed that amortization payments are made monthly at the end of the month.

8. <u>Unused Annual Leave</u>

To account for the effect of unused annual leave on Average Final Compensation, liabilities for active members are increased 2.14 percent.

9. Unused Sick Leave

To account for the effect of unused sick leave on members' final credited service, the service of active members who retire is increased three months.

10. Future Cost-of-Living Increases

Benefits are assumed to increase 2 percent annually beginning on the next July 1st following receipt of 12 monthly payments.

11. Administrative and Investment Expenses

The investment return assumption represents the expected return net of all administrative and investment expenses.

12. Payroll Growth Rate

The total annual payroll of active members (also applies to TERI, ORP and rehired retiree participants) is assumed to increase at an annual rate of 4.00 percent. This rate represents the underlying expected annual rate of wage inflation and does not anticipate increases in the number of members.

13. <u>Changes from Prior Valuation</u>

None.

Police Officers Retirement System Summary of Actuarial Assumptions and Methods

1. Investment Return to be Earned by Fund

8.00 percent per annum, compounded annually, composed of an assumed 3.00 percent inflation rate and a 5.00 percent real rate of return, net of investment and administrative expenses.

2. <u>Salary Increases</u>

Rates of annual salary increase are assumed to vary for the first 11 years of service due to expected merit and promotional increases. Beginning with the 12th year of service, the assumed annual rate of increase is 4.50 percent for both groups and for all future years of service.

The 4.50 percent rate of increase is composed of a 3.00 percent inflation component and a 1.50 percent real rate of wage increase (productivity) component.

Years of <u>Service</u>	Annual Increase	Years of <u>Service</u>	Annual Increase
0	11.50%	7	4.75%
1	6.75%	8	4.75%
2	5.75%	9	4.75%
3	5.50%	10	4.75%
4	5.25%	11	4.75%
5	5.00%	12+	4.50%
6	4.75%		

We have also provided alternative results based upon a lower expectation of the rate of salary increase for the short-term future. Under this alternative, the rates above for active members with three or more years of service are decreased by 3.00 percent for the fiscal year ending June 30, 2011 and 1.50 percent for the fiscal year ending June 30, 2012.

3. Decrement Rates

The following are representative values of the assumed annual rates of withdrawal, inservice mortality, disability, and service retirement.

a. Table below provides a summary of the assumed rates of service retirement, mortality while actively employed, and disability.

	Annual Rate of					
Age	Service Retirement ¹	Mortality	Disability			
20		0.03%	0.12%			
25		0.03%	0.14%			
30		0.04%	0.18%			
35		0.07%	0.35%			
40		0.10%	0.46%			
45	20.00%	0.14%	0.69%			
50	20.00%	0.19%	0.86%			
55	14.00%	0.27%				
60	15.00%	0.44%				
64	25.00%	0.63%				

¹Plus an additional 22 percent for participants under age 55 in year when first eligible for unreduced service retirement.

South Carolina Retirement Systems 109

All employees are assumed to retire at age 65. In addition, 25 percent of disabilities are assumed to be duty-related, and 5 percent of pre-retirement deaths are assumed to be accidental (duty-related).

b. Table below provides a summary of the assumed rates of withdrawal for active members prior to eligibility for retirement.

Years of Service											
Age	0	1	2	3	4	5	6	7	8	9	10+

Probability of Decrement Due to Withdrawal

Note: No probability of withdrawal is applied to members eligible to retire.

4. Mortality After Retirement

For healthy retirees and beneficiaries, the UP-94 Mortality Table rates are used, with female rates set back one year and male rates set forward three years. A separate table of mortality rates is used for disabled retirees. The following are sample rates for the retirees and beneficiaries:

	Healthy Male Female		Disabled
Age			All
50	0.39%	0.14%	2.30%
55	0.68%	0.22%	2.89%
60	1.23%	0.42%	3.62%
65	2.14%	0.82%	4.07%
70	3.35%	1.37%	4.43%
75	5.40%	2.19%	5.05%
80	8.87%	3.80%	6.77%
85	13.65%	6.56%	10.09%

5. Marriage Assumption

One hundred percent of all active members are assumed to be married, with female spouses being four years younger.

6. Asset Valuation Method

The actuarial value of assets is equal to the market value of assets less a ten-year phase in of the excess (shortfall) between expected market investment return and actual net investment income (excess returns and shortfalls determined prior to July 1, 2008, remain with a five-year phase in).

7. Actuarial Cost Method

The contribution rate is set by statute for both employees and employers. The funding period is determined, as described below, using the Entry Age Normal actuarial cost method. The Entry Age Normal actuarial cost method allocates the plan's actuarial present value of future benefits to various periods based upon service. The portion of the present value of future benefits allocated to years of service prior to the valuation date is the actuarial accrued liability, and the portion allocated to years following the

Actuarial Section

valuation date is the present value of future normal costs. The normal cost is determined for each active member as the level percent of payroll necessary to fully fund the expected benefits to be earned over the career of each individual active member. The normal cost is partially funded with active member contributions with the remainder funded by employer contributions.

An unfunded accrued liability exists in the amount equal to the excess of accrued liability over valuation assets. The amortization period of the System is the number of years required to fully amortize the unfunded accrued liability with the expected amount of employer contributions in excess of the employers' portion of the normal cost.

The calculation of the amortization period takes into account scheduled increases to contribution rates applicable to future years and payroll growth. Also, the calculation of the amortization period reflects additional contributions the System receives with respect to return to work retirees. These contributions are assumed to grow at the same payroll growth rate as for active employees. It is assumed that amortization payments are made monthly at the end of the month.

8. <u>Unused Annual Leave</u>

To account for the effect of unused annual leave on Average Final Compensation, liabilities for active members are increased 3.75 percent.

9. Unused Sick Leave

To account for the effect of unused sick leave on members' final credited service, the service of active members who retire is increased three months.

10. Future Cost-of-Living Increases

Benefits are assumed to increase 2 percent annually beginning on the next July 1st following receipt of 12 monthly payments.

11. Administrative and Investment Expenses

The investment return assumption represents the expected return net of all administrative and investment expenses.

12. Payroll Growth Rate

The total annual payroll of active members (also applies to rehired retiree participants) is assumed to increase at an annual rate of 4.00 percent. This rate does not anticipate increases in the number of members.

13. <u>Changes from Prior Valuation</u>

None.

4. Mortality After Retirement

For healthy retirees and beneficiaries, the UP-94 Mortality Table rates, with the female rates set back one year. A separate table of mortality rates is used for disabled retirees. The following are sample rates:

	Healthy		Disa	abled
Age	Male	Female	Male	Female
50	0.28%	0.14%	3.06%	2.31%
55	0.48%	0.22%	3.86%	2.66%
60	0.86%	0.42%	4.82%	2.98%
65	1.56%	0.82%	5.42%	3.33%
70	2.55%	1.37%	5.91%	3.70%
75	4.00%	2.19%	6.74%	4.43%
80	6.67%	3.80%	9.02%	6.71%
85	10.46%	6.56%	13.45%	10.15%

5. <u>Marriage Assumption</u>

One hundred percent of all active and special contributor members are assumed to be married, with female spouses being four years younger.

6. Asset Valuation Method

The actuarial value of assets is equal to the market value of assets less a ten-year phase in of the excess (shortfall) between expected market investment return and actual net investment income (excess returns and shortfalls determined prior to July 1, 2008 remain with a five-year phase in).

7. Actuarial Cost Method

The Actuarial Cost Method is the Entry Age Normal actuarial cost method. The Entry Age Normal actuarial cost method allocates the plan's actuarial present value of future benefits to various periods based upon service. The portion of the present value of future benefits allocated to years of service prior to the valuation date is the actuarial accrued liability, and the portion allocated to years following the valuation date is the present value of future normal costs. The normal cost is determined for each active member as the level percent of payroll necessary to fully fund the expected benefits to be earned over the career of each individual active member. The normal cost is partially funded with active member contributions with the remainder funded by employer contributions.

An unfunded accrued liability exists in the amount equal to the excess of accrued liability over valuation assets. The amortization period of the System is the number of years required to fully amortize the unfunded accrued liability by June 30, 2027.

8. Future Cost-of-Living Increases None assumed.

9. Payroll Growth Rate

None assumed.

10. Administrative and Investment Expenses

The investment return assumption represents the expected return net of all administrative and investment expenses.

11. Changes from Prior Valuation

None.

Any	30	5	12	Any	31	5	15
Any	31 ¹	12 ¹	35	Any	32 ¹	12 ¹	35
Any	32+	12	12	Any	33+	12	15

Normal Retirement Assumption

¹Additionally, the remaining 88 percent of eligible members are assumed to Retire in Place. 100 percent of participants are assumed to retire upon reaching the mandatory retirement age of 72.

6. Marriage Assumption

Ninety-five percent of all active members are assumed to be married with female spouses being four years younger.

7. Asset Valuation Method

The actuarial value of assets is equal to the market value of assets less a ten-year phase in of the excess (shortfall) between expected market investment return and actual net investment income (excess returns and shortfalls determined prior to July 1, 2008 remain with a five-year phase in).

8. <u>Actuarial Cost Methods</u>

The contribution rate is set by statute for both employees and employers. The funding period is determined, as described below, using the Entry Age Normal actuarial cost method. The Entry Age Normal actuarial cost method allocates the plan's actuarial present value of future benefits to various periods based upon service. The portion of the present value of future benefits allocated to years of service prior to the valuation date is the actuarial accrued liability, and the portion allocated to years following the valuation date is the present value of future normal costs. The normal cost is determined for each active member as the level percent of payroll necessary to fully fund the expected benefits to be earned over the career of each individual active member. The normal cost is partially funded with active member contributions with the remainder funded by employer contributions.

An unfunded accrued liability exists in the amount equal to the excess of accrued liability over valuation assets. The amortization period of the System is the number of years required to fully amortize the unfunded accrued liability with the expected amount of employer contributions in excess of the employers' portion of the normal cost. The calculation of the amortization period takes into account scheduled increases to contribution rates applicable to future years and payroll growth. Also, the calculation of the amortization period reflects additional contributions the System receives with respect to return to work retirees. These contributions are assumed to grow at the same payroll growth rate as for active employees. It is assumed that amortization payments are made monthly at the end of the month.

9. Future Cost-of-Living Increases

Benefits are assumed to increase 3.25 percent annually.

10. Administrative and Investment Expenses

The investment return assumption represents the expected return net of all administrative and investment expenses.

11. Payroll Growth Rate

The total annual payroll of active members (also applies to rehired retiree participants) is assumed to increase at an annual rate of 3.25 percent. This rate does not anticipate increases in the number of members.

12. Changes from Prior Valuation

None.

National Guard Retirement System Summary of Actuarial Assumptions and Methods

1. Investment Rate of Return

Assumed annual rate of 8.00% net of investment and administrative expenses composed of a 3.00% inflation component and a 5.00% real rate of return component.

2. Active Member Decrement Rates

a. Table below provides a summary of the assumed rates of mortality and disability while actively employed. No death or disability benefits are payable from the System. No withdrawal from active membership is assumed for members with less than 20 years of service.

Annual Rates of Decrements				
	Pre-Retirement			
<u>Age</u>	<u>Mortality</u>	Disability ¹		
25	0.050/	0.000/		
25	0.05%	0.09%		
30	0.06%	0.11%		
35	0.09%	0.15%		
40	0.12%	0.22%		
45	0.22%	0.36%		
50	0.39%	0.61%		
55	0.61%	1.01%		
60	0.92%	1.63%		

¹Applied only to members with less than 20 years of service.

 b. Service Retirement and Deferred Early Retirement – Regular active members with twenty or more years of service are assumed to retire based upon the age-related rates in the table below. In addition to the tabular rates, members with 30 years of service are assumed to leave service immediately. Those members electing deferred early retirement prior to age 60 are assumed to defer retirement benefits until age 60.

Assumed Rates of Retirement				
	Assumed			
Age	Rate			
40	10%			
45	10%			
50	10%			
55	10%			
60	100%			

3. <u>Post-Retirement Mortality</u>

Assumed rate of mortality for service retirees and deferred early retirees is the 1983 Group Annuity Mortality Table rates for males.

Post-Retirement Mortality Assumption			
Age	Male	Female	
50	0.39%	0.39%	
55	0.61%	0.61%	
60	0.92%	0.92%	
65	1.56%	1.56%	
70	2.75%	2.75%	
75	4.46%	4.46%	
80	7.41%	7.41%	
85	11.48%	11.48%	

4. <u>Marriage Assumption</u>

Not applicable because no death benefits are payable.

5. Asset Valuation Method

The actuarial value of assets is equal to the market value of assets less a ten-year phase in of the excess (shortfall) between expected market investment return and actual net investment income (excess returns and shortfalls determined prior to July 1, 2008, remain with a five-year phase in).

6. Actuarial Cost Method

The Entry Age Normal actuarial cost method allocates the plan's actuarial present value of future benefits to various periods based upon service. The portion of the present value of future benefits allocated to years of service prior to the valuation date is the actuarial accrued liability, and the portion allocated to years following the valuation date is the present value of future normal costs. The normal cost is determined for each active member as the level dollar amount necessary to fully fund the expected benefits to be earned over the career of each individual active member. The normal cost is fully funded by employer contributions.

An unfunded accrued liability exists in the amount equal to the excess of accrued liability over valuation assets. The portion of the unfunded accrued liability due to legislation which allows those guardsmen who became members of the National Guard after June 30, 1993 to become eligible for membership in the System effective January 1, 2007 is being amortized as a level dollar amount over a 15-year period beginning July 1, 2006. The remaining unfunded accrued liability from other sources is being amortized as a level dollar amount over a 30 year period beginning July 1, 2006.

7. Future Cost-of-Living Increases

None assumed.

8. Administrative and Investment Expenses

The investment return assumption represents the expected return net of all administrative and investment expenses.

9. <u>Changes from Prior Valuation</u>

None.

Note: Effective for the 7-1-2000 valuation, eligibility for an unreduced retirement annuity under SCRS was reduced from 30 years of service to 28 years. The SCRS also adopted a deferred retirement option plan.

Effective 7-1-2003, actuarial assumptions were changed as a result of a 5 year experience study. The rates of salary increase assumption, the assumed retirement rates, disability incidence assumptions and withdrawal rate assumptions were revised for both SCRS and PORS. In addition, the assumed mortality rates for retired SCRS members were revised, along with the assumed mortality rates of active and disabled members for PORS.

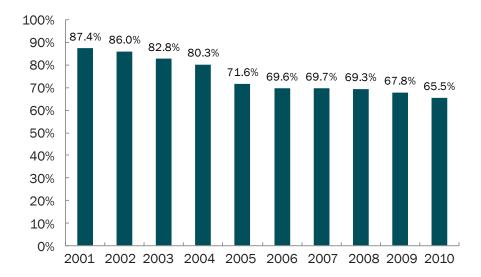

Effective 7-1-2005, actuarial assumptions were changed to include an increase in member contributions to 6.25 percent of earnings for fiscal year 2006 and 6.50 percent beginning fiscal year 2007; all return-to-work retirees and those TERI participants who joined the system after 7-01-2005 contributing at the same rate as active employees; a reduction in the interest rate credited to accumulated employee contributions from 6 percent to 4 percent; and the addition of a guaranteed COLA equal to the change in CPI, but not to exceed 1 percent, for SCRS retirees beginning the July 1st following a full year of annuity payments.

Effective 7-1-2008, actuarial assumptions for SCRS were changed as a result of a 5 year experience study. Changes in the investment return assumptions were adopted by the Board for the 7-01-2008 valuation for all plans.

Note: The 7-1-2002, GARS valuation reflected the change in legislation effective January 1, 2003, which allows a member who has attained the age of 70 or has 30 years of service to retire and draw an annuity while continuing to serve in the General Assembly.

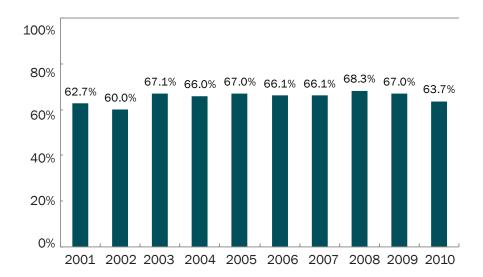

Effective 7-1-2003, actuarial assumptions for GARS and JSRS were changed as a result of a 5 year experience study. The rates of salary increase assumption, the assumed retirement rates, and disability incidence assumptions were revised. Effective 7-1-2005, actuarial assumptions were changed to include updated normal retirement rates based on analysis of historical normal retirement experience.

Changes in the investment return assumptions were adopted by the Board for the 7-01-2008 valuation for all plans.

Note: Effective for the 7-1-2000 valuation, eligibility for an unreduced retirement annuity under SCRS was reduced from 30 years of service to 28 years. The SCRS also adopted a deferred retirement option plan.

Effective 7-1-2003, actuarial assumptions were changed as a result of a 5 year experience study. The rates of salary increase assumption, the assumed retirement rates, disability incidence assumptions and withdrawal rate assumptions were revised for both SCRS and PORS. In addition, the assumed mortality rates for retired SCRS members were revised, along with the assumed mortality rates of active and disabled members for PORS.

Effective 7-1-2005, actuarial assumptions were changed to include an increase in member contributions to 6.25 percent of earnings for fiscal year 2006 and 6.50 percent beginning fiscal year 2007; all return-to-work retirees and those TERI participants who joined the system after 7-01-2005 contributing at the same rate as active employees; a reduction in the interest rate credited to accumulated employee contributions from 6 percent to 4 percent; and the addition of a guaranteed COLA equal to the change in CPI, but not to exceed 1 percent, for SCRS retirees beginning the July 1st following a full year of annuity payments.

Effective 7-1-2008, actuarial assumptions for SCRS were changed as a result of a 5 year experience study. Changes in the investment return assumptions were adopted by the Board for the 7-01-2008 valuation for all plans.

Note: The 7-1-2002, GARS valuation reflected the change in legislation effective January 1, 2003, which allows a member who has attained the age of 70 or has 30 years of service to retire and draw an annuity while continuing to serve in the General Assembly.

Effective 7-1-2003, actuarial assumptions for GARS and JSRS were changed as a result of a 5 year experience study. The rates of salary increase assumption, the assumed retirement rates, and disability incidence assumptions were revised.

Effective 7-1-2005, actuarial assumptions were changed to include updated normal retirement rates based on analysis of historical normal retirement experience.

Changes in the investment return assumptions were adopted by the Board for the 7-01-2008 valuation for all plans.

ing periods of inflation.

actual increase in the CPI.

COLAs are earned only dur-

A retired member of the system who has been retired for at least 15 consecutive calendar days may be hired and return to covered employment without affecting his monthly retirement benefit. The employer and working retiree must remit employer and employee contributions at the same rate as if the member were an active contributing member. Working retirees are not eligible for subsequent disability retirement, will not earn additional service credit, and will have no additional interest credited to their account.

PORS

An active GARS member who has reached age 70 or has 30 years of service credit may retire and begin receiving a GARS retirement annuity while continuing to serve in office. The retired GARS member will receive a retirement annuity in lieu of a per diem salary and additional line item pay for certain positions. Generally, a retired member of GARS may return to work after retirement with no limit on the dollar amount that may be earned as compensation; however, certain conditions and restrictions may apply to employers covered by SCRS, PORS, GARS and JSRS.

A member who is age 60 and eligible to receive the maximum monthly benefit, may retire and receive a retirement benefit while continuing to serve as a judge, solicitor, or circuit public defender until the end of the calendar year in which the member reaches age 72. Employee and employer contributions must continue to be paid as if the retiree was an active contributing member, but no additional service credit accrues and no additional interest is credited to their retirement account. Additionally, a retired judge may continue to receive a retirement benefit while employed by a public institution of education, provided the judge does not contribute to or receive service credit in SCRS.

14. Post Retirement Increase Each July 1, eligible retired members should receive an automatic COLA up to an increase of 2 percent if the Consumer Price Index for Wage Earners and Clerical Workers (CPI) as of the previous December 31 is at least 2 percent. If the CPI is less than 2 percent, the COLA should equal the actual increase in the CPI. COLAs are earned only during periods of inflation.

15. Accidental Death Program

Not applicable

Provides 50% of earnable compensation at time of accidental death in the line of duty as an annuity to either the surviving spouse, children, or parents. The annuity to surviving children ends upon each child's 18th birthday.

Retired member receives benefit based on current salary for member's position.

Not applicable

Retired member receives benefit based on current salary for member's position.

Cost-of-living increases are not provided.

Tugboats are known for their incredible strength and reliable nature. Most barges depend on tug boats to guide their path and lead them to their destination safely. When faced with challenges such as a heavy load to pull or formidable obstacles, tugboats rely on their strong build to help them maneuver to safety.

The South Carolina Retirement Systems seeks to provide reliable and safe retirement plans for its members. SCRS is the oldest of the five plans and has been in existence for 64 years. The Retirement Systems is not only providing for today's retirees, but for future generations of retirees as well.

Statistical Section Summary

The objective of the Statistical Section is to provide financial statement users with additional historical perspective, context, and detail to assist in using information presented in the Financial Statements, Notes to Financial Statements, and Required Supplementary Information to understand and assess the Systems' economic condition. Information reported in the Systems' statistical section is presented in four main categories: Financial Trends Information, Operating Information, Revenue Capacity Information, and Demographic and Economic Information.

Financial Trends Information

Ten Year Summary of Plan Net Assets - All Systems Combined	159
Ten Year Schedule of Changes in Net Assets - SCRS, PORS, GARS, JSRS, NGRS	160-164
Pension Trust Funds Additions by Source - Last Ten Fiscal Years	165
Pension Trust Funds Deductions by Type - Last Ten Fiscal Years	166
Pension Trust Funds Additions and Deductions - Last Ten Fiscal Years	167-169
Pension Trust Funds Benefit Expenses by Type - Last Ten Fiscal Years	170

Operating Information

Retired Members by Type of Benefit - SCRS, PORS, GARS, JSRS, NGRS	172-174
Retired Members by Years of Service - SCRS, PORS, GARS, JSRS, NGRS	175-179
Principal Participating Employers in 2011 and 2002 - SCRS and PORS	180-181

Revenue Capacity Information

Schedule of Employee and Employer Contribution Rates - Most Recent Ten Fiscal Years 183

Demographic and Economic Information

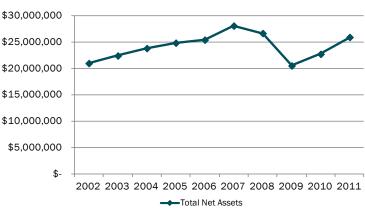

Participating Employers - SCRS and PORS 185-196

Financial Trends Information

Financial Trends Information is intended to assist users in understanding and assessing how the Systems' financial position has changed over time. The ten year summary of plan net assets and ten year schedules of changes in plan net assets as well as the additions by source, deductions by type, and benefit expenses by type for the last ten fiscal years may be considered useful in determining financial trends.

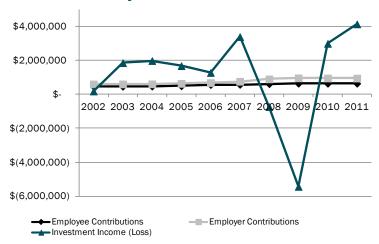

Trend of Total Net Assets

A trend of the total value of plan net assets over the past ten years reflects an overall increase for the period; however, negative investment returns realized during fiscal year 2008 and 2009 caused a significant decline in asset values for the portfolio. Positive investment returns during fiscal year 2011 resulted in an increase in the value of plan net assets of \$3.2 billion from the prior fiscal year.

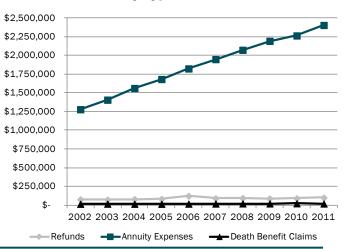

Trend of Total Pension Trust Funds Additions by Source

The overall trend in the dollar amount of employee and employer contributions has gradually increased due to increases in contribution rates and growth in covered payroll; however, employee and employer contributions decreased at several points due to slight declines in the number of active members. During fiscal year 2011, the total dollar amount of employee contributions increased from the prior fiscal year as a result of a significant increase in the amount of employee contributions received for purchased service. Investment income is much more volatile due to its dependence on the market.

Trend of Total Pension Trust Funds Deductions by Type

A rise in the number of annuitant payees and cost of living adjustments granted to annuitants resulted in a steady increase in benefit expenses over the years. Refund expenses spiked during fiscal year 2006 as a result of a negative ruling on litigation in which contributions were required to be refunded to retired participants in the Teacher and Employee Retention Incentive (TERI) program. In addition, a slight growth in death benefit claims occurred over the past couple of years because beneficiaries of working retirees now receive an increased level of incidental death benefits.

Operating Information

Operating Information is intended to provide contextual information about the Systems' operations and resources to assist readers in using financial statement information to comprehend and evaluate the Systems' fiscal state. Schedules containing operating information include retired members by type of benefit and retired members by years of service, and principal participating employers for the current fiscal year and 10 years prior.

Although retirement types include service, disability and beneficiary payees, members retiring at normal retirement based on age and service represent the majority of the systems' annuitant payees. Various payment options are available at retirement; however, the majority of members elect to receive benefits under the maximum benefit level.

Effective January 1, 2001, normal service retirement eligibility was reduced from 30 to 28 years for the South Carolina Retirement System. This resulted in an unusually large number of members being eligible for and electing retirement, and a corresponding reduction in the years of service trend was experienced.

The number of covered employees working for certain participating governmental entities declined due to a number of factors. Eligibility in the State ORP was broadened significantly on July 1, 2002, to a wider variety of the public workforce and resulted in additional participants choosing this option instead of the defined benefit plans. In addition, the continuing economic decline has led to a reduction in hiring and an increase in terminations and retirement incentives. Also, the implementation of TERI and more liberal return-to-work policies under SCRS and PORS has led to more retired members filling positions that were previously performed by active employees.

South Carolina Retirement System Retired Members by Type of Benefit As of June 30, 2011

Note: Benefit amounts represent original monthly benefit at retirement for all retirees and, for comparison purposes, do not include cost-of-living adjustments (COLA's). Although a member's retirement eligibility and AFC may include service from other correlated Systems, the Years of Credited Service in this schedule represents only service credit used for calculating the monthly benefit under this respective System.

²2011 total reflects 379 governmental entities and 2002 total reflects 284 governmental entities.

Revenue Capacity Information

Revenue Capacity Information is intended to assist users in realizing and reviewing the factors that affect the Systems' ability to generate revenues. Employee and employer contribution rates for the most recent ten fiscal years are presented to aid in this category.

Over the past several years, the South Carolina General Assembly took several actions that resulted in the funding of not only a 1 percent automatic annual COLA for SCRS retirees effective July 1, 2005, and an additional 1 percent automatic annual COLA for SCRS retirees and a 2 percent automatic annual COLA for PORS retirees effective July 1, 2008. The 2 percent automatic annual COLAs in both SCRS and PORS are limited to the annual increase in Consumer Price Index for Wage Earners and Clerical Workers (CPI-W) and were funded using increased employee and employer contributions as well as extensive diversification of the trust fund's investment portfolio, which was intended to achieve superior investment returns (at an assumed 8 percent rate of return). The PORS automatic COLA was additionally funded through increasing the unfunded liability amortization period to 29.9 years from 16.3 years.

Employee Contribution Rates¹ Most Recent 10 Fiscal Years

Fiscal Year Ended June 30,	SCRS	PORS	GARS	JSRS
2011	6.50%	6.50%	10.00%	10.00%

¹Employer contributions for the General Assembly Retirement System (GARS) are paid as an annual lump-sum appropriation, in which death benefit contributions are included. Employer contributions for the National Guard Retirement System (NGRS) are paid through an annual State appropriation.

²For employers with retiree insurance coverage, an additional retiree health insurance surcharge is collected by the Retirement Systems and remitted to the Employee Insurance Program; however, these rates are not considered employer retirement contributions and therefore are not included in this schedule.

South Carolina Retirement Systems 183

Demographic and Economic Information

Demographic and Economic Information is intended to assist users in evaluating the socioeconomic environment within which the Systems operate and to provide information that facilitates comparisons of financial statement information over time and among pension plans. Active and retired member data for the past ten fiscal years can be found in the Actuarial Section on Pages 124 -126 and 132 - 134.

A list of the number of employers currently participating in the SCRS and PORS systems is presented in this section. State agencies, institutions of higher education, and public school districts are covered by Statute. The list of participating employers includes a directory of employers covered by separate agreement.
