INTRODUCTORY SECTION

City of Austin Employees' Retirement System

June 12, 2017

Board of Trustees
City of Austin Employees' Retirement System
Austin, Texas

Ladies and gentlemen:

It is our pleasure to submit to you the Comprehensive Annual Financial Report (CAFR) of the City of Austin Employees' Retirement System (COAERS or System or Plan) for the year ended December 31, 2016. COAERS' management is responsible for the accuracy of the data, and the completeness and the fairness of the presentation, including all disclosures in this report.

Plan Profile and Demographic Highlights

COAERS was established in 1941 and has provided retirement benefits to eligible City of Austin employees since that time. Though originally created by city ordinance, COAERS is now governed by state law and administered by an eleven-member board of trustees.

The Plan provides retirement, disability and death benefits to eligible employees of the City of Austin. Both the City of Austin, as employer, and its employees make contributions to COAERS. Retirement benefits are determined by formula considering final average compensation, as defined, and multiplied by the number of years of creditable service. Disability retirement is available pursuant to specific criteria established by statute. A death benefit of \$10,000 is payable upon the death of a retired member of COAERS. Vesting occurs at five years of creditable service.

Membership in COAERS is comprised of two benefit tiers: Group A and Group B.

Group A members qualify for normal retirement benefits at age 62, age 55 with 20 years of creditable service, or any age with 23 years of creditable service. Benefits are determined using a multiplier of 3%.

Group B members qualify for normal retirement benefits at age 65 with five years of creditable service or at age 62 with 30 years of creditable service. Benefits are determined using a multiplier of 2.5%. Reduced early retirement benefits are available for Group B members at age 55 with 10 years of creditable service.

Additional information concerning current COAERS plan provisions is contained in the Summary of Plan Provisions later in this section of the report.

The following charts depict COAERS membership and changes in average salaries and benefits.

Membership Profile

Average Salary and Average Benefit

Audited Financial Statements and Summary

The financial statements included in this CAFR have been prepared by COAERS' management in accordance with generally accepted accounting principles and presented in accordance with guidelines established by the Governmental Accounting Standards Board (GASB). The governing statute requires an annual audit of COAERS' accounts by a Certified Public Accountant. The Board of Trustees has retained KPMG LLP as independent external auditor since 1997. KPMG's 2016 financial audit was conducted in accordance with generally accepted auditing standards and resulted in an unmodified opinion on the financial statements. The Financial Section contains KPMG's audit opinion letter and additional information including Management's Discussion and Analysis (MD&A) that provides a narrative introduction, overview, and analysis of the basic financial statements. The MD&A complements this letter of transmittal and should be read in conjunction with it.

The **Additions to Fiduciary Net Position** consist of employer and employee contributions, investment income, and realized and unrealized gain or loss on investments. The **Deductions from Fiduciary Net Position** consist of annuity payments, refunds to terminating members, Deferred Retirement Option Program (DROP) disbursements, retiree lump-sum annuity disbursements, death benefits and administrative expenses. There was a net increase of \$154.9 million, resulting in total assets held in trust of \$2.3 billion. The table below shows the changes in Fiduciary Net Position.

Changes in Fiduciary Net Position

Additions		Deductions	
Employer contributions	\$ 104,488,291	Retiree annuity payments	\$ 170,031,430
Employee contributions	60,801,253	Refunds to terminating members	3,910,786
Interest, dividends, net securities lending & other income	42,549,983	DROP disbursements	2,731,069
Appreciation in plan investments (net of investment fees)	129,090,032	Retiree lump-sum annuities	966,059
		Death benefits	1,705,035
		General & administrative expenses	2,700,916
Total Additions	\$ 336,929,559	Total Deductions	\$ 182,045,295

The following chart shows the **Total Net Position** at the end of each year since 2007. Net Position increased by \$154.9 million during 2016, resulting in Total Net Position Restricted for Pensions of \$2,299,708,386 at December 31, 2016.

Total Net Position Restricted for Pensions

Internal Controls

The concept of reasonable assurance recognizes, first, the cost of a control should not exceed the benefits likely to be derived, and second, the valuation of costs and benefits requires estimates and judgments by management. A framework of internal controls have been established by COAERS' management to provide reasonable assurance that assets are properly safeguarded, that financial records are fairly and accurately maintained, and that the governing statute and policies are correctly followed. Recognizing, however, that even sound internal controls have their inherent limitations, the Board of Trustees has also authorized an "extended audit" since 1997. This annual review of internal controls, and compliance with operating policies and procedures, is currently conducted by RSM US LLP. Audit findings are reported, and actions of management to implement recommendations are reviewed with the Board of Trustees.

Investments

Essential to COAERS' mission is the responsibility to ensure long-term assets will meet long-term liabilities. This ensures retirement and other benefits will be available for both current and future members. Investments are made with the care, skill, prudence, and diligence under the circumstances then prevailing that a prudent person acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with like aims. Funds of COAERS are invested solely in the interest of the membership and their beneficiaries, and for the exclusive purpose of providing benefits to such membership and their beneficiaries and defraying reasonable expenses of administering COAERS. The Board of Trustees has established an investment policy and guidelines which provide for the delegation of investment authority to professional investment advisors.

COAERS' assets are strategically allocated to maximize returns and reduce risk by using diverse and complementary portfolio structures. COAERS Board **has consistently followed a long-range, conservative investment philosophy.** COAERS employs a full-time Chief Investment Officer to oversee the investment portfolio and assist the Board in devising and implementing strategic investment decisions. The Board also retains Summit Strategies Group to provide independent investment consulting services and long-range asset liability analysis.

At December 31, 2016, the investment portfolio of COAERS consisted of 16 mandates managed by 13 investment management firms. **The strategic portfolio allocation from the most recent asset liability study, which was conducted in 2012, was adopted late in 2012, and was incrementally implemented through 2015.**

COAERS' investments generated a return of 8.06% (net of fees) for 2016, up from -1.97% in 2015. Additional information regarding the investments of the pension trust funds can be found in the Investment Section of this report.

Portfolio Allocation

Investment Style	2016
Domestic Fixed Income	24.50%
International Equities	30.00%
U.S. Equities - Large Cap	26.25%
U.S. Equities - Non-Large Cap	3.75%
Alternative Investments	10.00%
Real Estate	5.50%
	100.00%

During 2016, the Board continued the restructuring of the US Equity portfolio that was begun in 2015 by shifting funding from certain large cap US manager accounts into the Scientific Beta Factor Index. The Board also restructured the Emerging Markets portfolio by funding a Scientific Beta Factor Index and reallocating from the existing Emerging Markets managers into a new Emerging Manager account.

Funding Overview

COAERS is funded by investment income and employer and employee contributions. City employees provide regular contributions equal to 8% of base compensation. The City of Austin contributes 18% of base compensation. Contributions by the City of Austin consist of the statutory base contribution amount of 8%, plus an additional 10% pursuant to a supplemental funding plan first established in 2005 and amended in 2010. Using the entry age actuarial cost method (EAN), COAERS' normal cost is determined as a percentage of payroll. The excess of the total contribution rate over the normal cost rate is used to amortize COAERS' unfunded actuarial accrued liability (UAAL), if any, and the number of years needed to amortize COAERS' UAAL is determined using a level percentage of payroll method. In consultation with its actuary, the Board adopted the use of the Individual Normal Cost EAN method for actuarial valuations. Because COAERS is a two-tier system, the use of the Individual

Normal Cost EAN method means that the normal cost will decline over time and the percentage of pay contributed towards the unfunded liability will increase over time. To better model how this financing will pay off the unfunded liabilities of COAERS, the Board has also adopted the use of an open group projection in the determination of COAERS' funding period.

In March of 2016, the Board initiated an Actuarial Experience Study with its actuary Gabriel Roeder Smith & Company (GRS). Based upon the findings and recommendations of GRS, the Board adopted new actuarial assumptions used for the December 31, 2015 actuarial valuation. Most notably, the Board reduced its nominal investment return assumption from 7.75% to 7.50% to better forecast possible future investment returns. For the December 31, 2016 actuarial valuation, stronger market returns in 2016 in addition to new active membership growth have decreased the period of the Plan's amortization period of unfunded actuarial accrued liability from 33 to 31 years. The overall funded position of COAERS is now 67.5%, down from 68.0% in 2015. The actuarial accrued liability and the actuarial value of assets of COAERS, as of December 31, 2016, amounted to \$3.591 billion and \$2.423 billion, respectively. A detailed discussion of funding is provided in the Actuarial Section of this report.

Major Initiative

In 2012, COAERS launched a Service Delivery & Technology initiative to pursue updated technology for major operational areas, specifically focused in the short-term on pension administration software. Working with consultant LRWL, Inc., a review of the current business processes and technology was completed in 2013. An RFP for a pension administration system and related technologies was issued in February 2014, and a service provider was approved by the Board in September 2014. Product design and implementation are estimated to continue through 2018. Currently, the initiative is on schedule.

Awards

For the eighteenth consecutive year, COAERS was awarded a Certificate of Achievement for Excellence in Financial Reporting for its Comprehensive Annual Financial Report for the fiscal year ended December 31, 2015, by the Government Finance Officers' Association of the United States and Canada (GFOA). COAERS is pleased to have achieved this prestigious award. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized Comprehensive Annual Financial Report. This report must satisfy both generally accepted accounting principles and applicable legal requirements. A Certificate of Achievement is valid for a period of one year only. We believe that our current Comprehensive Annual Financial Report continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

For 2016, COAERS earned the Public Pension Coordinating Council Recognition Award for Funding and Administration. This is the sixth consecutive year that COAERS has met the administrative standards and the fifth year that the funding standards have been achieved. This award is in recognition of meeting professional standards for plan administration as set forth by the Council. The standards reflect minimum expectations for public retirement system management and administration, serving as a benchmark by which to measure public defined benefit plans.

Acknowledgments

This report reflects the combined efforts of the COAERS' staff under the leadership of the Board of Trustees. We express our gratitude to the staff, advisors, and members of the Board who have contributed to the preparation of this report and to the continued successful operation of the City of Austin Employees' Retirement System.

Respectfully submitted,

Jim Williams

SUMMARY OF PLAN PROVISIONS

CITY OF AUSTIN EMPLOYEES' RETIREMENT SYSTEM (COAERS)

Introduction

This is a general overview of the City of Austin Employees' Retirement System (COAERS or System) membership and benefits. In the event of any inconsistency between this general overview and state or federal law as modified, interpreted, and applied from time to time, the state or federal law will govern and control.

COAERS is an IRS tax-qualified 401(a) defined benefit plan governed by Texas state law.

Membership Requirements

City of Austin regular employees working 30 or more hours per week become Members of COAERS on the date of employment as mandated by Statute. Members do not include:

- Temporary employees
- Part-time employees working less than 30 hours per week
- Civil service employees of the Fire Department and the Police Department
- The Mayor and members of the City Council

Contributions

Employee: Members of COAERS contribute 8% of their base pay, calculated on a 40-hour work week. Contributions are made through payroll deduction each pay period (every two weeks). Overtime and special pay are not included.

Employer: By State Statute the employer contributes an amount equal to 8% of the employee's base compensation or a higher rate established by the employer. The current employer contribution, established by a City Council Resolution, is 18% of compensation. The employer contribution will remain at this level until the Resolution is amended or repealed.

RETIREMENT BENEFITS

Retirement Eligibility

Members are eligible for retirement when they meet one of the following age and service requirements for the membership "Group" to which they belong:

Group A Members (Normal Retirement)

- Age 62,
- Age 55 with 20 years of Creditable Service, or
- Any age with 23 years Creditable Service

Group B Members (Normal Retirement)

- Age 65 with 5 years of Creditable Service (excluding Supplementary Service Credit), or
- Age 62 with 30 years of Creditable Service (excluding Supplementary Service Credit)

Group B Members (Early Retirement – Reduced Benefits)

- Age 55 with at least 10 years of Creditable Service (excluding Supplementary Service Credit)

Vesting

Members become vested with COAERS when they have five years of Creditable Service. Members who leave active membership before attaining retirement eligibility must have five years of Creditable Service to be considered vested. Verified service credit with a participating proportionate retirement system(s) or in the limited proportionate service arrangement between COAERS and the Travis County Healthcare District may also be combined with COAERS service credit in determining vested status and eligibility to receive a future benefit. The Member is not entitled to receive the employer contribution at any time. Instead, vesting means that a Member is entitled to receive a lifetime benefit as long as their contributions are on deposit in the System upon reaching retirement eligibility.

Creditable Service

Creditable Service is a combination of Membership Service and other types of Creditable Service described below.

Current Active-Contributing/Vested Members, as of October 1, 1995, were granted service credit for the period between their date of hire and their date of participation, up to six months. All Members hired after October 1, 1995 become Members on their date of hire or on their date of regular employment at 30 or more hours per calendar week.

Types of Creditable Service

Membership Service – The employment period during which a Member makes payroll contributions to the System is considered the “Membership Service” period.

Reinstated Membership Service (Prior City of Austin Service) – When Members leave City employment, withdraw their deposits, and later return to City employment or employment with a participating proportionate system, they may purchase and reinstate the earlier time with the City. To purchase this service, they must become a Member of COAERS or another proportionate system. The cost to purchase prior service credit is based on the amount previously withdrawn, plus interest, as required by law.

Non-Contributory Service Credit – Members may purchase service credit for the following non-contributory categories:

- Non-contributory service, such as temporary or part-time service (less than 30 hours per week)
- Approved leave of absence
- Workers’ compensation leave due to an injury sustained in the course and scope of employment with the employer

Credit for Federal Active Duty Military Service

Prior Federal Active Duty Military Service – Members may establish up to 48 months Creditable Service for prior military service. Military service eligible for purchase is full-time active duty service in the armed forces of the United States performed before the first day of the most recent period of active membership in COAERS. Military service in the reserves, a service academy, or for less than 90 consecutive days is not eligible for purchase. To purchase prior military service, Members must present an original DD214 showing honorable discharge.

Military Leave of Absence – Members may establish Creditable Service for an authorized leave of absence from employment for military service. The Member may establish such Creditable Service during the authorized leave of absence by continuing to make retirement contributions during the period of service. Alternatively, if the Member returns to employment within the applicable period (that varies from 14 to 90 days, depending on the length of service) after the completion of the military service, the Member and the employer may secure such Creditable Service by making a lump-sum payment within five years of the date the Member returns to employment and Active-Contributing Member status.

Supplementary Service Credit (Previously known as Permissive Time) – Group A members may purchase up to five years of Creditable Service to advance their retirement eligibility date and/or increase the amount of their monthly annuity upon retirement. Group B members may purchase up to five years of Creditable Service only to increase the amount of their annuity but not to advance their retirement eligibility. Only Vested Active-Contributing or inactive Members are eligible to purchase Supplementary Service Credit, provided they have five years of membership

service. Age, salary, earliest retirement date, and a combination of actuarial data determine the cost. There may be federal limitations on certain purchases.

Sick Leave Conversion – Retiring Members may convert sick leave hours to increase Creditable Service time. Employees eligible to be paid by the City of Austin for up to 720 hours of sick leave upon retirement cannot convert the eligible hours to Creditable Service. Converted sick leave hours cannot be used to reach retirement eligibility. Sick leave must be converted in pay period (80-hour) increments. Both the Member and the employer must pay the current contribution rate at the time of retirement to convert hours.

Service prior to 1941 – Additional service credit is allowed for Members with service performed before 1941, when the System came into existence. Two percent is applied for the number of years (prior to 1941) times the average salary for the years 1946 through 1950.

Proportionate Service

In 1991 the Texas Legislature established a Proportionate Retirement Program for the benefit of members of participating public retirement systems. A member of two or more of the following participating retirement systems may be eligible for proportionate benefits:

- City of Austin Employees' Retirement System
- City of Austin Police Retirement System
- El Paso City Employees' Pension Fund
- El Paso Firemen and Policemen's Pension Fund
- Employees Retirement System of Texas
- Judicial Retirement System of Texas I & II
- Texas Municipal Retirement System
- Texas County and District Retirement System
- Teacher Retirement System of Texas
- Other Texas retirement systems covering municipal employees who have qualified plans and have elected to participate in the Proportionate Retirement Program

Participating systems recognize service from other participating systems upon proper notice. A member with service credit in more than one participating retirement system may be eligible to retire in another system based on the combined service of two or more systems in order to satisfy the length of service requirements used to determine eligibility for service retirement. Members must qualify for retirement eligibility independently in each system. Retirement benefits will be paid separately from each system and will be determined based on the actual amount of Creditable Service earned in and the benefit structure of each plan. Military service may only be used once in determining the amount of the member's combined service credit. Proportionate participation is generally based on funded service.

A limited proportionate service arrangement was also established in 2007 for those individuals who have membership in COAERS and a retirement system within the Travis County Healthcare District (District) organization. This arrangement, effective with employees transitioning into the District effective March 1, 2009, is similar to the general proportionate program except that it applies only between these two retirement systems. Participation in the District retirement system can be used to establish retirement eligibility with COAERS.

Calculation of Retirement Benefits

Factors used to calculate COAERS retirement benefits:

Total Creditable Service – Total years and months of Creditable Service, including:

- Regular membership service
- Reinstated membership service
- Military service purchased
- Non-contributory service purchased

- Supplementary service purchased
- Converted sick leave
- Up to one six-month probationary period granted at retirement to Active-Contributing/Vested Members hired on or before October 1, 1995
- Note: Proportionate service is only used to reach eligibility; it is not used to calculate retirement benefits.

Multiplier for Group A Members – 3.0%

Multiplier for Group B Members – 2.5%

Average Final Compensation – The average base salary for the highest 36 months of contributory service during the last 10 years of salary prior to retirement.

Retirement Date

The effective date of retirement is always the last day of the month.

Retirement Options

COAERS provides several options for payment of monthly benefits. All payment options are actuarially equivalent to the basic Member Only Life Annuity benefit.

The options that include benefits to a survivor are calculated according to the ages of both the Member and the surviving beneficiary included in the plan. The Member's benefits are reduced if an option is chosen that provides survivor benefits. This reduction is applied to the Member's basic Life Annuity benefit according to the option the Member chooses. Some restrictions may apply to non-spouse survivor benefits.

If the Member is married, spousal consent is required. A Member cannot change options or the survivor beneficiary after retirement. Even if a Retiree and the beneficiary spouse later divorce, the survivor beneficiary cannot be changed. Only the survivor beneficiary named at retirement will receive survivor benefits.

Life Annuity – A basic monthly benefit payable for the life of the Retiree.

Option I: 100% Joint and Survivor – A reduced monthly benefit payable throughout the Retiree's life. At the Retiree's death, the survivor beneficiary will continue to receive the Retiree's benefit for the remainder of his/her life.

Option II: 50% Joint and Survivor – A reduced monthly benefit payable throughout the Retiree's life. At the Retiree's death, the survivor beneficiary will continue to receive 50% of the Retiree's benefit for the remainder of his/her life.

Option III: 66 2/3% Joint and Survivor – A reduced monthly benefit payable throughout the Retiree's life. At the Retiree's death, the survivor beneficiary will continue to receive 66 2/3% of the Retiree's benefit for the remainder of his/her life.

Option IV: Joint and 66 2/3% Last Survivor – A reduced monthly benefit payable until the death of either the Retiree or the survivor beneficiary. After death of the Retiree or the survivor beneficiary, the last survivor of the two will receive 66 2/3% of the Retiree's benefit for the remainder of his/her life.

Option V: Fifteen Year Certain and Life Annuity (180 payments) – A monthly benefit payable to the Retiree. If the Retiree's death occurs before 180 payments are made, the Retiree's beneficiary, spouse (if applicable), or estate will receive remaining monthly payments until all 180 payments have been made. If the Retiree is still living after receiving 180 payments, payments to the retiree will continue until the Retiree's death.

Option VI: Actuarial Equivalent of Life Annuity – This option allows Members to develop their own benefit payment plan with the assistance and approval of the System's actuary. Members have flexibility to design a retirement benefit that is most appropriate for the needs of both the Member and the Member's beneficiary, subject to limitations established in Board policy. All options are subject to approval by the Board of Trustees.

A "Pop-up" benefit is provided for Retirees choosing Options I, II, or III as well as Retirees who selected any Joint and Survivor option other than Joint and Last Survivor option. The "Pop-up" increases the Retiree's benefits to the Member Only Life Annuity level if the survivor beneficiary predeceases the Retiree on or after October 1, 1999.

Lump-Sum Payments

Backward DROP Program – The Backward Deferred Retirement Option Program (Back DROP) allows a Member to receive a lump-sum payment in addition to receiving a monthly annuity.

Members who have already reached retirement eligibility, excluding proportionate service, and who continue to work and contribute to COAERS beyond retirement eligibility, may elect to receive a lump-sum amount and have their retirement calculated as though they had retired at an earlier date. The Back DROP period can be no earlier than:

- The day of first retirement eligibility,
- The date of the last purchase of Creditable Service of any type other than Sick Leave Conversion, or
- 60 months (in one-month increments) prior to the retirement date.

The lump-sum amount is 90% of the sum of the monthly annuity payments, based on the Member Only Life Annuity benefit, the participant would have received if the Member had retired at the earlier date. The lump-sum amount may be rolled over to other qualified plans, paid in one lump-sum to the Member, or a combination of both.

Cost-of-living adjustments, interest, and Member or employer contributions do not increase the monthly amount credited to the Back DROP.

Partial Lump-Sum Payment – As an alternative to the Back DROP, a retiree may select a retirement option and request a one-time lump-sum payment to be paid at the same time as the Member's first annuity payment. The Member's annuity amount will be actuarially reduced for the lump-sum payment. Members may select a partial lump-sum distribution, or both a partial lump-sum distribution and a Back DROP, not to exceed 60 months of annuity payments under a basic Member Only Life Annuity benefit.

IRS Section 415 Restoration of Retirement Income Plan

Certain highly compensated Members may have their retirement annuity limited because of Section 415(b)(1) of the Internal Revenue Code. A plan amendment, effective January 1, 2000, provides for COAERS to pay a benefit that exceeds the limitation imposed by the Internal Revenue Code from a separate, non-qualified, and unfunded "Restoration of Retirement Income Plan". Additional details are made available to affected Members during the retirement process.

Retirees Returning to Work

The retirement allowance of a retired member who resumes employment with an employer within 90 days after retirement and has not attained age 55, or who resumes employment after retirement as a regular full-time employee of an employer, is subject to suspension. Suspension also occurs if a retired member resumes employment with an employer in a position that is not required to participate in another retirement system maintained by an employer, and works for, or is compensated by, an employer for more than 1,508 hours in any rolling 12-month period after the member resumes employment with the employer.

DISABILITY RETIREMENT BENEFITS

Disability Retirement Requirements

Members may apply for disability retirement benefits if:

- They are mentally or physically incapacitated for the performance of all employment duties, AND
- The incapacity is likely to be permanent.

Disability Retirement Eligibility

Active-Contributing Members with less than five years Creditable Service may only apply for disability retirement if the disability is a result of an on-the-job accident or injury. Active-Contributing Members with five or more years of Creditable Service may apply for disability retirement even if the disability is not job related. Members who are already eligible to retire may not apply for disability retirement.

Members are considered to remain in the same membership category in effect on the date of termination for 90 days following termination. Members are allowed to apply for disability retirement for up to 90 days following termination for inability to perform all employment duties.

Disability Retirees are periodically required to provide proof of continued disability and are annually required to provide employment and income documentation to the COAERS Board of Trustees.

Disability Retirement Options

A Member approved for disability retirement may choose a Member Only Life Annuity benefit or a benefit described in Options I, II, III, or IV. Disability Retirees are not eligible for any type of lump-sum payment.

DEATH AND SURVIVOR BENEFITS

Retired Members

Upon the death of a Retiree, a death benefit of \$10,000 is paid by COAERS to the designated beneficiary(ies) of the deceased. This \$10,000 death benefit is paid to the beneficiary(ies) in addition to any of the following benefits that are applicable:

- If the Retired Member chose the Member Only Life Annuity option, the monthly benefit stops the month following the death of the Retiree. However, if death occurs before the Retiree's accumulated deposits have been paid out, the Retiree's remaining deposits will be paid in a lump-sum to the Retiree's designated beneficiary(ies), spouse (if applicable), or estate.
- If the Retired Member chose an option providing benefits to a survivor beneficiary, upon the Retiree's death, such benefits will be paid to the designated survivor. If the survivor beneficiary does not survive the Retiree, monthly benefits cease. However, if the survivor beneficiary does not survive the Retiree, and the Retiree's deposits have not been paid out, the Retiree's remaining deposits will be paid in a lump-sum to the Retiree's designated beneficiary(ies), spouse (if applicable), or estate.

Active Members

Not Eligible to Retire

Upon the death of an Active Member who was not yet eligible for retirement, the designated beneficiary(ies) is entitled to a lump-sum payment of the Member's accumulated deposits (contributions and interest) plus a death benefit from COAERS equal to the Member's deposits (excluding any purchases for non-contributory time, prior military service purchases, or Supplementary Service Credit).

Eligible to Retire

If the Active Member was eligible for retirement prior to death and had not yet retired:

- A surviving spouse may choose any retirement option that would have been available to the Member, except for Member Only Life Annuity, and receive the \$10,000 death benefit. Alternatively, a surviving spouse may choose to receive a one-time lump-sum payment of the Member's accumulated deposits and a death benefit from COAERS equal to the Member's deposits (excluding any purchases for Non-contributory time, prior military service purchases, or Supplementary Service Credit).
- If there is no spouse, the deceased Member's designated beneficiary may elect to receive payments under Option V, Fifteen Year Certain and Life Annuity, and receive the \$10,000 death benefit. The non-spouse beneficiary may otherwise choose to receive a one-time lump-sum payment as described above.

The \$10,000 death benefit is not paid to beneficiaries electing a one-time lump-sum payment.

Inactive Vested Members

Beneficiaries of Inactive Vested Members receive the same death benefits as beneficiaries of Active Members as described above.

OTHER INFORMATION

Compliance with Applicable Law

Article 6243n of Vernon's Texas Civil Statutes, the Internal Revenue Code, and other state and federal laws are applicable to the operation and management of, and the benefits provided by, the System. Such laws place restrictions and limitations on retirement systems, including COAERS, and directly or indirectly affect Member benefits and options. Deposits or retirement benefits may not be transferred or assigned except pursuant to a Qualified Domestic Relations Order (QDRO). All QDROs are subject to approval and must meet all statutory requirements. In addition, funds actually due and payable to a Member, beneficiary, or alternate payee may be subject to IRS levy. The Internal Revenue Code also sets limits which affect purchases of service credit, final average salary, and monthly benefits for certain individuals.

Determining Interest on Members' Contributions

The Board of Trustees annually determines the amount of interest paid on Members' accumulated deposits, taking into consideration the average yield of the 10-year U.S. Treasury note during the 12-month period ending on October 31st and recommendations of the System's actuary. Retirement interest is accrued on the last day of the calendar year based on the amount that each Member had in the System on the first day of the calendar year. The money must remain on deposit for the entire calendar year in order to accrue interest.

Prohibition on COAERS Loans and Withdrawals

Plan provisions do not allow Active Members to make a partial withdrawal of deposits or to receive loans from their retirement funds.

Request for Hearing

A Member or Beneficiary directly affected by a decision of the Executive Director of the City of Austin Employees' Retirement System may appeal to the Board of Trustees. The Member or Beneficiary must appeal the decision within thirty (30) days of notification of denial by the Executive Director or his/her designee.

HISTORY OF BENEFIT CHANGES

January 1, 1941

City Council established the City of Austin Employees' Retirement System.

Original City Ordinance provided a maximum annuity of \$100 per month at age 65.

Contributions to retirement system set at 4.0%.

No survivor options, no early retirement eligibility, no vesting, no disability benefits, and no death benefits.

1951

Established two options for survivor benefits:

Option I – 100% Joint and Survivor

Option II – 66 2/3% Joint and Survivor

Established eligibility for early retirement.

Established a provision for vested benefits after 15 years of Creditable Service.

Established disability retirement benefits.

Increased contribution rate to 5.0%.

1962

System changed from a money purchase plan to a formula based plan with a multiplier of 1.125%.

Established additional options for survivor benefits:

Option III – 50% Joint and Survivor

Option IV – 66 2/3% Joint and Last Survivor

1967

Multiplier increased from 1.125% to 1.25%.

Set Active Member death benefits at \$2,000.

1969

Established provisions for cost-of-living adjustment (COLA).

Set Retired Member death benefits at \$2,000.

1971

Increased multiplier from 1.25% to 1.5%.

Established a provision for unreduced retirement benefits at age 62 (lowered from age 65) with any number of years of service.

Provided free health insurance benefits, ages 62 - 65.

Increased contribution rate to 6.0%.

1972

Established a provision for vested eligibility after 10 years of Creditable Service.

Established a provision for regular employees working 30 or more hours per week to make retirement contributions.

Established a provision for Members eligible for early retirement benefits to choose Option I to provide survivor benefits.

1973

Increased multiplier from 1.5% to 1.75%.

Established a provision for Final Average Earnings based on highest 60 months of contributing service.

Allowed Members eligible for retirement to select option to provide survivor benefit before actually retiring.

Established disability retirement for line-of-duty disabilities regardless of Creditable Service. Disability retirement available for any disability after 10 years of service. Disability retirement benefits based on age and years of service at time of disability retirement; no penalty based on age.

December 1977

Elimination of \$2,000 death benefit for Active Members; continued for Retirees.

Established a provision for Active Members' designated beneficiaries to receive contributions and interest plus an equal amount from the System if Member dies prior to retirement eligibility.

September 1978

Established additional retirement options.

December 1979

Discontinued medical insurance payment for Retirees who were ages 62 - 65.

July 1981

Established a provision for contributions to be required after age 62 until retirement. Members older than age 62 have option to make up missed contributions to benefit from higher salary averaging for retirement benefits.

Reduced Final Average Earnings period from 60 to 36 months.

October 1982

Increased contribution rate to 6.6%, matched by City.

November 1982

Established retirement benefits for Members age 55 or older with 20 years service.

March 1984

Adopted unisex option factors. The sex of the Member and the beneficiary no longer considered in the determination of any System benefits.

December 1984

Increased Member contribution rate from 6.6% to 7.0%, matched by the City.

Increased multiplier from 1.75% to 1.85%.

Established a provision for a surviving spouse to select an optional benefit if Active Member dies who was already eligible to retire and had not yet selected a benefit option.

Implemented employer "pick up" of member contributions pursuant to 414(h)(2) of the Internal

Revenue Code. Member contributions after January 1, 1985 not taxed until time when benefits are paid to the Member.

Limited "Prior Service" Purchase – Former Members who forfeited membership service by taking a refund when they left City employment may purchase their prior Creditable Service. Current Members allowed six months to reinstate former credit by repaying withdrawn deposits plus interest. Only former Members who had been reemployed by the City before December 20, 1984 are eligible.

Established that the 36 months of salary used to calculate monthly benefits need not be consecutive. Highest 36 months of salary during last 10 years of Creditable Service would be averaged to determine Final Average Earnings.

March 1985

Granted a special one-time benefit increase based on year of retirement.

October 1985

Increased multiplier from 1.85% to 2.0%.

February 1986

Change in composition of Board of Trustees; replaced Council Member position with Retired Member Trustee to be appointed by the City Council.

May 1987

Established that Members laid-off during the period from September 30, 1986 through October 1, 1989, and who were eligible for retirement would receive an unreduced current service annuity.

October 1987

Reduced Member and City contribution rates to the System temporarily from 7.0% to 6.2% of basic compensation for the period from October 1, 1987 to September 30, 1988.

March 1988

Established survivor benefit options for Disability Retirees effective March 13, 1988.

August 1988

Established vesting eligibility at five years of Creditable Service.

Extension of “Prior Service Purchases” – Former Members who forfeited membership service by taking a refund of their retirement contributions when they left City employment, who have returned to City employment, may purchase and reinstate their prior Creditable Service.

For purposes of calculating benefits and determining eligibility, three years were added to both age and service for all Members retiring between September 1, 1988 and December 31, 1988.

September 1988

Restored Member and employer contribution rates to 7.0% from 6.2% of basic earnings effective September 30, 1988.

December 1989

Amended ordinance for Retiree Member Trustee position of the Board to be elected by Retired Members to a four-year term, instead of appointment by the City Council.

January 1990

Granted a special one-time benefit increase ranging from 0.5% to 15% based on date benefit commenced.

February 1990

Established unreduced retirement benefits for Members at any age with 30 years Creditable Service.

Increased multiplier from 2.0% to 2.1%.

October 1990

Adopted limits on income of Social Security disability benefits for System Disability Retirees.

August 1991

Established System governance by Article 6243n of Texas State Law effective August 26, 1991. All changes to the System made by the Texas State Legislature.

Became a member of Proportionate Retirement Program with five other statewide retirement systems. Membership service may be combined with other participating systems for meeting service requirements for retirement eligibility.

July 1993

Increased multiplier from 2.1% to 2.2%, with commensurate increase for members retired before December 1, 1989.

Established a provision for unreduced retirement benefits for Members at any age with 25 years of service.

Allowed purchases for up to 24 months of former active duty U.S. military service.

October 1995

Increased multiplier from 2.2% to 2.3%, with commensurate increase for previous Retirees.

Established that new City of Austin employees hired after October 1, 1995 become Members of COAERS at date of employment. Current employees as of October 1, 1995 are given retirement service credit for up to one six-month probationary period at time of retirement.

Change in composition of Board of Trustees; Director of Finance Designee replaced with additional Retired Member Trustee to be elected by Retired Members.

Increased death benefit for Retirees from \$2,000 to \$10,000.

October 1997

Increased multiplier from 2.3% to 2.6%, with commensurate increase for previous Retirees.

Established a provision for unreduced retirement benefits for Members at age 55 with 20 years service.

Increased purchases of former active duty U.S. military service from 24 to 48 months.

Allowed new purchase option of Creditable Service for non-contributory time including time while on workers' compensation, leaves of absence, part-time and temporary service.

Allowed for the City of Austin to purchase service credit for Members in order to qualify an employee for unreduced retirement benefit at age 55.

October 1999

Increased multiplier from 2.6% to 2.7%, with commensurate increase for previous Retirees.

Increased Member contribution rate from 7.0% to 8.0% following vote by Active Members.

Established a provision for unreduced retirement benefits for Members at any age with 23 years of service.

Set new limits on Retirees returning to work for the City.

Added “pop-up” benefit for Retirees choosing Options I, II, or III (Joint and Survivor Annuities) to increase Retiree benefits if the survivor beneficiary predeceased the Retiree on, or after, October 1, 1999.

Granted Board authority to authorize certain benefit improvements subject to statutory guidelines.

Gave Board the ability to grant an additional payment to Members receiving monthly annuity payments in the form of an additional lump-sum benefit payment. The additional payment would be a percentage of the current monthly payment with a maximum percentage of 100%.

Established a provision for disability retirement benefits for off-the-job injury/illness after five years Creditable Service (previously 10 years).

Removed limitations on employer purchases of Creditable Service for a Member.

January 2000

Established Restoration of Retirement Income Plan to restore retirement income otherwise limited by Section 415 of the Internal Revenue Code.

April 2000

Increased multiplier from 2.7% to 2.98%, with commensurate increase for previous Retirees.

Increased employer contribution rate from 7.0% to 8.0%, matching Member contribution rate.

July 2000

Extended “pop-up” benefit to Retirees who selected the actuarial equivalent of Life Annuity option with underlying options of I, II, or III.

January 2002

Increased multiplier from 2.98% to 3.0%, with commensurate increase for previous Retirees.

Established a provision for purchases of Permissive Time to Active/Inactive Vested Members, based on EGTRRA federal law with a minimum purchase of one month and a maximum of 60 months (five years) or the number of months needed to reach first eligibility for retirement, whichever is less.

Amended Proportionate Retirement Program provided by Texas Government Code 803 to allow former members of participating proportionate systems to re-establish Creditable Service previously forfeited in that system without returning to membership in that system.

April 2002

Established Sick Leave Conversion benefit. Allows Members to convert sick leave balances to Creditable Service at time of retirement with purchase paid by Member and City of Austin.

Established Backward DROP (Deferred Retirement Option Program) benefit up to five years for Members working beyond retirement eligibility.

January 2003

Extended “pop-up” benefit to any Joint and Survivor option other than Joint and Last Survivor.

Amended Permissive Time resolution removing provision which restricted Members from purchasing Permissive Time in excess of the amount needed to reach first eligibility for retirement.

May 2005

City Council adopted a Supplemental Funding Plan providing additional City contributions in Resolution No. 20050512-045. The Plan is structured to increase City contributions to achieve a 30-year amortization period

as follows: 1% in fiscal year 2007, 2% in fiscal year 2008, 3% in fiscal year 2009, and 4% in fiscal year 2010 and thereafter, if necessary. If during any calendar year, COAERS earns greater than a 12% time weighted rate of return net of fees, the increase is delayed one budget cycle. Any future benefit enhancements or cost of living adjustments require a recommendation from the City Manager and approval by the City Council. In addition, if the CPI index exceeds 3.0% in any calendar year, an actuarial study is to be performed to determine the additional subsidy needed if a cost of living adjustment were to be provided.

October 2006

City Council adopted a budget including a Supplement Funding Plan contribution subsidy of 1% for fiscal year 2007.

September 2007

Established a limited proportionate service arrangement exclusively for those individuals who have membership in COAERS and a retirement system within the Travis County Healthcare District (District) organization. This arrangement, effective with employees transitioning into the District effective March 1, 2009, is similar to the general proportionate program except that it applies only between these two retirement systems.

October 2007

Scheduled increase in City Supplemental Funding Plan contribution subsidy postponed due to time weighted rates of investment returns (net of fees) exceeding 12%.

October 2008

City Council adopted a budget including a Supplement Funding Plan contribution subsidy of 2% for fiscal year 2009.

March 2009

City of Austin Police Retirement System joins the Proportional Retirement Program.

October 2009

City Council adopts a budget increasing Supplemental Funding Plan City contributions from 2% to 4% for fiscal year 2010.

September 2010

City Council approves an Amended Supplemental Funding Plan establishing the City's total employer contribution to the System as follows:

- 14% of compensation effective October 1, 2010 for fiscal year 2010-11;
- 16% of compensation effective October 1, 2011 for fiscal year 2011-12; and
- 18% of compensation effective October 1, 2012 for fiscal year 2012-13, and each fiscal year thereafter.

The City's total employer contribution levels remain in effect until the Amended Supplemental Funding Plan is amended or repealed.

The Amended Supplemental Funding Plan also requires any future benefit enhancements or cost of living adjustments otherwise permitted under the System's governing documents to be recommended by the City Manager and approved by the City Council. Finally, the Amended Supplemental Funding Plan stated that it was the City and the System's intention to seek legislative amendments to state law to improve the overall financial condition of the System by establishing reasonable but different benefit levels for employees of the City who became members of the System on or after January 1, 2012.

March 2011

The Board, through policy, increased the waiting period for certain retirees returning to work from 60 to 90 days.

June 2011

Article 6243n was amended establishing a new benefit tier for employees hired on and after January 1, 2012. The following provisions apply to those employees:

- Normal retirement eligibility at age 65 with 5 years of service credit; or at age 62 with 30 years of service credit;

- Early reduced retirement eligibility at age 55 with 10 years of service credit;
- An annuity formula multiplier of 2.5%;
- The purchase of nonqualified permissive service (supplementary service credit) for annuity calculations only and not for eligibility purposes;

Unrelated to the new benefit tier, Article 6243n was amended to revise the rules for retirees returning to work. The revised rules require the Board to suspend the retirement allowance of a retired member who resumes employment with an employer in a position that is not required to participate in another retirement system maintained by an employer, and who is not a regular full-time employee of an employer, if the member works for, or is compensated by, an employer for more than 1,508 hours in any rolling 12-month period after the member resumes employment with the employer.

November 2014

The Board implemented a Funding Policy which established certain actuarial methods for funding and created long-term funding goals to ensure that COAERS is well funded into the future and to specify under what conditions future benefit enhancements would be considered.

Independent Auditors' Report

The Board of Trustees
 The City of Austin Employees' Retirement System

Report on the Financial Statements

We have audited the accompanying statements of fiduciary net position of the City of Austin Employees' Retirement System (COAERS) as of December 31, 2016 and 2015, and the related statements of changes in fiduciary net position for the years then ended and the related notes to the financial statements, which collectively comprise COAERS's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the fiduciary net position of the City of Austin Employees' Retirement System as of December 31, 2016 and 2015, and the changes in fiduciary net position for the years then ended in accordance with U.S. generally accepted accounting principles.

Other Matters

Required Supplementary Information

U.S. generally accepted accounting principles require that the Management's Discussion and Analysis, the Schedule of Changes in Net Pension Liability and Related Ratios, and the Schedule of Investment Returns on pages 29–32 and 58–59 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's response to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary and Other Information

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise COAERS's basic financial statements. The Introductory Section on pages 1–26, Other Supplementary Information – Investment, General & Administrative, and Consultant Expenses on page 60, the Investment Section on pages 61–73, the Actuarial Section on pages 75–121, and the Statistical Section on pages 122–133 are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The Other Supplementary Information – Investment, General & Administrative, and Consultant Expenses are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such statements directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, Other Supplementary Information – Investment, General & Administrative, and Consultant Expenses are fairly stated in all material respects in relation to the basic financial statements as whole.

The Introductory, Investment, and Statistical Sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

CITY OF AUSTIN EMPLOYEES' RETIREMENT SYSTEM

Management's Discussion and Analysis (unaudited)

December 31, 2016 and 2015

This section of the City of Austin Employees' Retirement System's (COAERS, or, the System) financial report presents our discussion and analysis of the System's financial performance during calendar years 2016 and 2015. We encourage readers to consider the information presented here in conjunction with our financial statements that follow.

Financial Highlights

- Net position held in trust by the System increased by \$154.9 million, or 7.2%, in 2016, and decreased by \$65.0 million, or -2.9%, in 2015. All changes primarily correlate with investment returns.
- Contributions increased by \$10.6 million, or 6.8%, in 2016, and by \$10.7 million, or 7.5%, in 2015. The 2016 increase was due to a \$2.2 million increase in the City's supplemental funding, an increase of \$3.4 million in employee and City contributions based on payroll, and an increase of \$5.0 million in employee creditable service purchases. The 2015 increase was due to a \$4.0 million increase in the City's supplemental funding, an increase of \$6.3 million in employee and City contributions based on payroll, and an increase of \$0.4 million in employee creditable service purchases.
- The amount of benefits paid to retired members and beneficiaries, and refunded to terminating employees, increased approximately \$9.7 million, or 5.7% during 2016, and by approximately \$7.8 million, or 4.8%, during 2015. This is the result of increases in the number of System retirees and the average annuity payment. Benefit payments exceeded employee and City contributions by \$14.1 million in 2016, and by \$15.0 million in 2015.
- The System's time-weighted rate of return on investments for the year ended December 31, 2016, was 8.44% gross of fees, and 8.09% net of fees, on a market value basis, which was greater than the return of -1.55% gross of fees, and -1.97% net of fees, for the year ended December 31, 2015. The actuarial assumed rate of return is 7.50%.

Overview of the Financial Statements

This discussion and analysis is intended to assist the reader in a better understanding of the purpose and meaning of each of the key components of COAERS' financial statements, which are comprised of the following:

- Statement of Fiduciary Net Position
- Statement of Changes in Fiduciary Net Position
- Notes to the Financial Statements

Collectively, this information presents the net position held in trust for pension benefits as of the end of each year, and summarizes the changes in net position held in trust for pension benefits for the year. The information available in each of these components is briefly summarized below:

- **Financial Statements**

The *Statement of Fiduciary Net Position* presents the System's assets and liabilities and the resulting net position, which is held in trust for pension benefits. This statement reflects a year-end comparison of the Plan's investments, at fair value, along with cash and short-term investments, receivables and other assets and liabilities, to the previous year.

(Continued)

CITY OF AUSTIN EMPLOYEES' RETIREMENT SYSTEM

Management's Discussion and Analysis (unaudited)

December 31, 2016 and 2015

The *Statement of Changes in Fiduciary Net Position* provides a view of current year additions to and deductions from the plan.

These two statements report the System's net fiduciary position held in trust for pension benefits (net position restricted for pensions), the difference between assets and liabilities, as one way to measure COAERS' financial position. Over time, increases and decreases in net position are one indicator of whether its financial health is improving or deteriorating.

- **Notes to the Financial Statements** provide important background and detailed information about COAERS, the plan, and the financial statements.

Financial Analysis

Summary of Fiduciary Net Position
December 31, 2016, 2015, 2014

Assets	2016	2015	2014
Cash and receivables	\$ 87,126,461	24,550,092	29,427,801
Investments	2,274,600,237	2,125,761,049	2,195,189,470
Invested securities lending collateral	102,574,024	147,167,478	177,128,773
Capital assets, net	3,370,047	2,099,727	1,149,272
Total assets	<u>2,467,670,769</u>	<u>2,299,578,346</u>	<u>2,402,895,316</u>
Liabilities			
Total liabilities	<u>167,962,383</u>	<u>154,754,224</u>	<u>193,075,637</u>
Net position restricted for pensions	<u>\$ 2,299,708,386</u>	<u>2,144,824,122</u>	<u>2,209,819,679</u>

Assets. As shown in the table above, assets increased \$168.1 million in 2016, and decreased \$103.3 million in 2015, due to the changes in the value of investments.

- During 2016, there was a \$62.6 million increase in the net amount of cash and receivables; this was attributable to an increase of \$1.3 million in cash held by the System, and a \$61.3 million increase in receivables which included a \$60.0 million increase in trades pending settlement. In 2015, there was a \$4.9 million decrease in the net amount of cash and receivables at year end; this resulted from a \$5.9 million increase in the amount of cash, and a \$10.8 million decrease in receivables which included a \$8.0 million decrease in trades pending settlement.
- In 2016, investments increased by \$148.8 million, and in 2015, investments decreased by \$69.4 million, reflective of the changes in the financial markets.
- The 2016 decrease in invested securities lending collateral of \$44.6 million reflected the net change in the number of securities on loan at year end; in 2015, the decrease was \$30.0 million.
- In both 2016 and 2015, the increase in capital assets reflects the continued development of the new pension administration system.

Liabilities. Liabilities increased \$13.2 million in 2016, and in 2015, decreased \$38.3 million. These fluctuations were primarily due to changes in trades pending settlement and in securities lending collateral. See further discussion in footnote 3.

Management's Discussion and Analysis (unaudited)

December 31, 2016 and 2015

Summary of Changes in Fiduciary Net Position
Years Ended December 31, 2016, 2015, and 2014

	<u>2016</u>	<u>2015</u>	<u>2014</u>
Additions:			
Contributions	\$ 165,289,544	154,702,426	143,959,262
Investment income (depreciation)	176,689,033	(40,810,744)	106,077,708
Investment expenses	<u>5,050,013</u>	<u>6,799,215</u>	<u>6,377,080</u>
Net investment income (depreciation)	171,639,020	(47,609,959)	99,700,628
Other income	995	2,298	3,471
Total additions	<u>336,929,559</u>	<u>107,094,765</u>	<u>243,663,361</u>
Deductions:			
Benefit payments and contribution refunds	179,344,379	169,668,990	161,856,915
General and administrative expenses	<u>2,700,916</u>	<u>2,421,332</u>	<u>2,631,217</u>
Total deductions	<u>182,045,295</u>	<u>172,090,322</u>	<u>164,488,132</u>
Net increase (decrease) in net position	154,884,264	(64,995,557)	79,175,229
Net position restricted for pensions:			
Beginning of year	<u>2,144,824,122</u>	<u>2,209,819,679</u>	<u>2,130,644,450</u>
End of year	<u>\$ 2,299,708,386</u>	<u>2,144,824,122</u>	<u>2,209,819,679</u>

Additions. Additions needed to fund benefits are accumulated through contributions and returns on invested funds. Contributions from COAERS members and the City of Austin for 2016 and 2015 totaled \$165.3 million and \$154.7 million, respectively. The 2016 contributions represent an increase of \$10.6 million, or approximately 6.8% above 2015; 2015 contributions represent an increase of \$10.7 million, or approximately 7.5% above 2014. The increase in 2016 was due to both an increase in base salaries on which employee and employer contributions are made and the increased percentage of payroll being contributed under the Supplemental Funding Plan. The increase in 2015 was due to both an increase in base salaries on which employee and employer contributions are made and the increased percentage of payroll being contributed under the Supplemental Funding Plan.

In 2016, COAERS had a net investment gain on the market value of its securities of \$171.6 million, an increase of \$219.2 million from 2015. In 2015, the net investment loss on the market value of securities was \$47.6 million, a decrease of \$147.3 million from 2014. Interest, dividends and net securities lending income generated 2016 income of \$42.5 million, a slight increase from the 2015 income of \$39.4 million. Investment managers' fees are based on their cumulative performance; in 2016, fees decreased by \$1.7 million; in 2015, fees increased \$0.5 million compared to 2014. The total rate of return (net of fees) for the System's investment portfolio in 2016 was 8.09%; in 2015 it was -1.97%.

Deductions. The expenses paid by COAERS include benefit payments, refunds of member contributions, and administrative expenses.

(Continued)

CITY OF AUSTIN EMPLOYEES' RETIREMENT SYSTEM

Management's Discussion and Analysis (unaudited)

December 31, 2016 and 2015

Benefits paid in 2016 were \$175.4 million, an increase of \$9.8 million from payments made in 2015, which is consistent with an increase in the number of retirees to 5,934 in 2016. Refunds to terminating employees decreased by \$0.1 million. Administrative expenses in 2016 were \$2.7 million, an increase of \$0.3 million, or 11.5% over 2015.

Benefits paid in 2015 were \$165.6 million, an increase of \$7.9 million from payments made in 2014, which is consistent with the 2015 increase in the number of retirees to 5,679, from 5,396 in 2014. Refunds to terminating employees decreased by \$0.1 million. Administrative expenses in 2015 were \$2.4 million, a decrease of 8.0% from those of 2014.

Overall Analysis. Overall, as of December 31, 2016, net position increased by \$154.9 million, or 7.2%, from the prior year; over the five-year period ending December 31, 2016, net position increased by 38.1%.

CITY OF AUSTIN EMPLOYEES' RETIREMENT SYSTEM

Notes to Financial Statements

December 31, 2016 and 2015

(1) Plan Description

Plan administration. The City of Austin Employees' Retirement System (COAERS, or, the System) administers the City of Austin Employees' Retirement (the Plan), a single-employer defined benefit pension plan that provides pensions for eligible employees of the City of Austin.

The System was created under Article 6243n, Vernon's Texas Civil Statutes (the Pension Statute), as amended.

The Pension Statute grants the authority to establish and amend the benefit terms to the Texas State Legislature.

Management of the Plan is vested in the eleven-member COAERS Board of Trustees, which is composed of:

- 4 active members elected by the active membership
- 2 retired members elected by the retired membership
- 2 City Council Appointed Citizen Members
- 1 Board Appointed Citizen Member
- 1 City Manager of the City of Austin or Designee
- 1 City Council Member

Plan membership. Participating employees include all regular, full time employees who work at least 30 hours per week, except for civil service firefighters and civil service police officers. At December 31, 2016, 2015, and 2014, membership consisted of the following:

	<u>2016</u>	<u>2015</u>	<u>2014</u>
Inactive plan members or beneficiaries currently receiving benefits	5,934	5,679	5,396
Inactive plan members entitled to but not yet receiving benefits	2,507	2,389	2,303
Active plan members	<u>9,364</u>	<u>9,063</u>	<u>9,028</u>
Total plan members	<u><u>17,805</u></u>	<u><u>17,131</u></u>	<u><u>16,727</u></u>

Benefits provided. The System provides service retirement, death, disability, and withdrawal benefits. Benefits vest with five years of creditable service.

Membership in the System is comprised of two benefit tiers: Group A and Group B.

Group A members continue under the plan originated in 1941. Participants may retire at age 62, at age 55 with 20 years of service, or at any age with 23 years of service. Prior to October 1, 1999, the monthly benefit was equal to 2.6% of the highest 36-month average annual salary of the last ten years multiplied by years and months of service. Effective October 1, 1999, the monthly benefit multiplier was increased to 2.7%. Effective April 1, 2000, the monthly benefit multiplier was increased to 2.98%. Effective January 1, 2002, the monthly benefit multiplier was increased to 3.0%. Effective January 1, 2001, the System approved a 3.5% ad hoc retiree increase and a 2.5% increase effective January 1, 2002.

Group B members are employees who were hired on and after January 1, 2012, with the following provisions:

- Normal retirement eligibility at age 65 with 5 years of service credit; or at age 62 with 30 years of service credit;
- Early reduced retirement eligibility at age 55 with 10 years of service credit;
- An annuity formula multiplier of 2.5%;
- The purchase of nonqualified permissive service (supplementary service credit) for annuity calculations only, not for eligibility purposes.

(Continued)

CITY OF AUSTIN EMPLOYEES' RETIREMENT SYSTEM

Notes to Financial Statements

December 31, 2016 and 2015

The following apply to both Group A and Group B:

- Effective in 2002, a Member may elect to retroactively participate in the System's Backward DROP (Deferred Retirement Option Program). This program benefits retiring employees by allowing a lump-sum payment in lieu of additional creditable service time after reaching retirement eligibility. The Member would receive a lump-sum payment equal to 90% of the sum of the monthly annuities the participant would have received if the member had retired at the DROP entry date. While the nomenclature used in the Pension Statute resembles that of an arrangement requiring additional disclosures under GASB 67, the COAERS Backward Drop benefit is technically different.
- The lump-sum death benefit payable upon the death of a retiree is \$10,000.
- There is no guaranteed cost of living increase.

Contributions. Prior to October 1, 1999, active member contributions to the Plan were 7%. Effective October 1, 1999, active member contributions increased to 8%. Currently, all Participants are required to contribute 8% of their base compensation to the Plan. The City of Austin (the City) also contributes 8% of base compensation. The benefit and contribution provisions of this plan are governed by state law. Amendments may be made by the Legislature of the State of Texas. Should the Plan fully terminate at some future time, the retirement allowance of a member would be determined by reference to the member's average final compensation as if the member had attained normal retirement age on that date.

Pursuant to the 2005 COAERS Supplemental Funding Plan and beginning in October 2006, the City contributed an additional 4% subsidy for their 2010 fiscal year ended September 30, 2010. An Amended Supplemental Funding Plan (ASFP), adopted by the City Council in October 2010, incrementally increased the supplemental contribution to the Plan from 6% of base compensation to 10% of base compensation effective October 1, 2012 for fiscal year 2012-13, and each fiscal year thereafter.

Under the terms of the Plan, the System's employees obtain membership in the Plan on the same basis as City employees. Accordingly, the System contributes 8% of base employee compensation to the Plan, plus a 10% subsidy, as described above, for its fourteen current employees; System employees also contribute 8% of their base compensation to the Plan. Since there is only one Plan, all actuarial calculations are provided on an aggregate basis. The System's annual pension cost for its employees and related contributions made for the past three years are:

		<u>Annual pension cost</u>	<u>Contributions made</u>
2016	\$	209,433	209,433
2015		215,235	215,235
2014		213,231	213,231

The System participates in the Proportionate Retirement Program through which a member of the System may meet requirements for service retirement eligibility by combining COAERS membership service with service credit from the following participating entities: City of Austin Police Retirement System, The El Paso City Employees' Pension Fund and Firemen and Policemen's Pension Fund, Employees' Retirement System of Texas, Judicial Retirement System of Texas I & II, Texas Municipal Retirement System, Texas County and District Retirement System, Teacher Retirement System of Texas, or any other Texas retirement systems covering municipal employees who have qualified plans and have elected to participate in the Proportionate Retirement Program. A limited proportionate service arrangement was established in 2007 between COAERS and individuals who have membership in a retirement system within the Travis County Healthcare District.

(Continued)

CITY OF AUSTIN EMPLOYEES' RETIREMENT SYSTEM

Notes to Financial Statements

December 31, 2016 and 2015

Restoration Plan

On November 23, 1999, the Board adopted a resolution to establish a "Restoration of Retirement Income Plan for Certain Participants in the City of Austin Employees' Retirement System" (Restoration Plan).

This Restoration Plan is effective as of January 1, 2000, and is intended to be a "qualified governmental excess benefit arrangement" within the meaning of Section 415(m) of the Internal Revenue Code, and shall be construed, interpreted and administered in accordance with such provision. The Restoration Plan shall be administered as an unfunded plan which is not intended to meet the qualification requirements of Section 401 of the Internal Revenue Code. Eligible members are those who are members in the Plan whose pension or pension-related benefits under the Plan are limited due to the provision of Section 415 of the Internal Revenue Code.

All benefits payable under this Restoration Plan shall be paid by the City of Austin Employees' Retirement System from contributions provided by the employer and not from the Fund or any other trust unless such trust is maintained solely for the purpose of providing benefits from this Restoration Plan. No contribution receivable is due for the years ended December 31, 2016 and 2015, for this Restoration Plan. Assets remaining in this plan as of December 31, 2016 and 2015, were \$20,000.

The Restoration Plan's annual pension cost and related contributions for the past three years are:

	<u>2016</u>	<u>2015</u>	<u>2014</u>
Annual pension cost	\$ 215,497	151,939	138,689
Contributions made	215,497	151,939	138,689

At December 31, 2016, 2015, and 2014, membership in the Restoration Plan included the following:

	<u>2016</u>	<u>2015</u>	<u>2014</u>
Retirees and beneficiaries currently receiving benefits	<u>16</u>	<u>12</u>	<u>11</u>

Other Information

The System is required by the Pension Statute to maintain two separate funds in its internal accounting records. The first fund, defined in the statute as "Fund 1", shall be maintained to account for all accumulated deposits (contributions and interest) of Members who have not withdrawn from the System. The second fund, defined as "Fund 2", shall be maintained to account for all other net assets of the System less the amount held in "Fund 3"; this third fund is maintained to account for accumulated contributions by the employer for the Internal Revenue Code Section 415 Restoration Plan as adopted by Board Resolution on November 23, 1999. At December 31, 2016, the balances of Fund 1, Fund 2, and Fund 3 were \$498,142,683, \$1,801,545,703, and \$20,000, respectively. At December 31, 2015, the balances of Fund 1, Fund 2, and Fund 3 were \$471,178,600, \$1,673,625,522, and \$20,000, respectively.

Notes to Financial Statements

December 31, 2016 and 2015

(2) Summary of Significant Accounting Policies and System Asset Matters

The System is not included in any other governmental "reporting entity" as defined by the Governmental Accounting Standards Board (GASB). The System has no component units and is not a component unit of any other entity.

(a) Basis of Accounting

The System's financial statements are prepared using the economic resources measurement focus and the accrual basis of accounting. Contributions are recognized when due pursuant to formal commitments, as well as statutory or contractual requirements; accordingly, contributions are recognized as revenues in the period in which the employer reports compensation for their employees. Benefits and refunds are recognized when due and payable in accordance with the terms of the Plan.

(b) Cash and Cash Equivalents

Cash and cash equivalents include demand deposit accounts and money market checking accounts. As of December 31, 2016 and 2015, the book balances of the demand deposit accounts totaled \$16,957,578 and \$15,623,591, respectively.

(c) Method Used to Value Investments

Plan investments are reported at fair value. Fair value is the amount at which an investment could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. Refer to Note 5(c) for more detail regarding the System's policy on accounting for investments.

GASB Statement No. 72, *Fair Value Measurement*, was adopted by COAERS for the year ended December 31, 2016, and accordingly has categorized fair value measurements within the required hierarchy.

(d) Contributions Receivable

The employee and City contributions for the years ended December 31, 2016 and 2015 that were not deposited with the System by year-end and are shown as contributions receivable.

(e) Capital Assets

Capital assets are recorded at cost. The System capitalizes all computers and electronic equipment purchased as well as any other assets greater than \$1,000. Depreciation is computed using the straight-line method over the assets' estimated useful lives of:

Furniture and equipment	3-12 years
Building	40 years

(f) System Expenses

Substantially all System administrative costs are the responsibility of the System. The administrative costs are funded through the investment income.

(g) Use of Estimates

The preparation of financial statements in conformity with United States Generally Accepted Accounting Principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Notes to Financial Statements

December 31, 2016 and 2015

(3) Deposit and Investment Risk Disclosure

Deposit and investment resources are exposed to risks that have the potential to result in losses that could impact delivery of System services. The Board has adopted a Statement of Investment Policies and Objectives (Investment Policy) to set forth the factors involved in the management of investment assets for the System. This policy is included in every investment management agreement. The document is designed to mitigate risk by requiring that investing be done in compliance with policy guidelines by qualifying the broker and financial institution with whom the System will transact, and by establishing sufficient collateralization, portfolio diversification, and limiting maturity. The System's Board, in accordance with the power and authority conferred under the Texas Statutes, has employed The Northern Trust Company as custodian of the assets of the System. The following summary of total investments by type as of December 31, 2016 and 2015, presents the System's investment mixes.

	<u>2016</u>	<u>2015</u>
Summary of investments by type:		
Domestic fixed income:		
Commercial mortgage-backed securities	\$ 8,394,634	13,255,653
Corporate bonds	137,066,248	142,739,670
Government agencies	2,136,001	7,176,171
Government bonds	44,885,763	31,969,895
Government mortgage-backed securities	47,228,203	48,974,089
Other fixed income:		
NT Collective Aggregate Bond Index Fund - Non-Lending	206,311,430	201,173,027
	<u>446,022,279</u>	<u>445,288,505</u>
Real estate commingled fund	207,531,567	190,104,785
US denominated equities	1,009,402,651	917,039,246
International equities	388,034,670	366,774,762
Alternative investments	201,369,783	174,046,277
Short-term investment funds	22,239,287	32,507,474
Investments at fair value on balance sheet	<u>2,274,600,237</u>	<u>2,125,761,049</u>
Receivables and pending trades, net	4,773,886	2,291,448
Total investments (per investment consultant)	<u>\$ 2,279,374,123</u>	<u>2,128,052,497</u>

Custodial Credit Risk

Custodial credit risk for deposits is the risk that, in the event of the failure of a depository financial institution, the System will not be able to recover its deposits or will not be able to recover collateral securities that are in the possession of an outside party. While the Board has no formal policy specific to custodial credit risk, operating bank account deposits in excess of Federal Deposit Insurance Corporation (FDIC) insured amounts are backed by US government, treasury and agency securities, repurchase agreements, and pledged securities held as collateral.

As of December 31, 2016 and 2015, the System's operating bank balances of \$16,957,578, and \$15,623,591, respectively, were not exposed to custodial credit risk.

(Continued)

CITY OF AUSTIN EMPLOYEES' RETIREMENT SYSTEM

Notes to Financial Statements

December 31, 2016 and 2015

Custodial credit risk for investments is the risk that, in the event of the failure of the counterparty to a transaction, the System will not be able to recover the value of its investment or collateral securities that are in the possession of an outside party. Investment securities are exposed to custodial risk if the securities are uninsured, are not registered in the name of the System, and are held by the counterparty, its trust or agent, but not in the System's name. The System's investment securities are not exposed to custodial credit risk because all securities are held by the System's custodial bank in the System's name. At December 31, 2016 and 2015, the System was not exposed to credit risk through security lending.

Borrowers of System securities through the Northern Trust Securities Lending Program are required to fully collateralize their obligation to return such securities when the loans are called. Proceeds from loaned securities are invested in a short-term fixed income portfolio, Northern Trust Collective SL Core STIF Fund.

Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributed to the magnitude of the System's investment in a single issuer. The System is authorized to invest in the following as of December 31, 2016:

(a) Fixed Income Investments

The aggregate exposure to the fixed income and real estate asset classes may not exceed 35.0% of the fund. Fixed income investment should be no less than twenty-one and one-half percent (21.5%) and no more than twenty-seven and one-half percent (27.5%) of the fund measured at fair value. No single issuer's securities shall represent more than six percent (6%) of the market value of any manager's portfolio. This restriction applies to asset-backed securities, non-agency mortgage-backed securities (including commercial mortgage-backed securities) and taxable municipal securities. The total holdings of an agency-issued mortgage-backed security of the same coupon and maturity series of the same agency shall not exceed twenty percent (20%) of the portfolio (agency-issued mortgage-backed securities include Government National Mortgage Association (GNMA) securities).

Section 144(a) securities shall be limited to no more than five percent (5%) of the portfolio at market value of any manager's portfolio. This does not apply to obligations of the US government (Treasury bonds, bills and notes).

The assets of the System are to be invested only in the following fixed income securities:

1. United States Treasury notes, bonds, and bills;
2. United States government agency obligations;
3. Investment grade corporate bonds (however, the average rating of all corporate bonds held in any investment portfolio, taken together, may not fall below AA);
4. Preferred stocks;
5. Investment grade foreign bonds payable in United States dollars;
6. Cash equivalents in the form of commercial paper rated as A1 by Moody's or P1 by Standard & Poor's;
7. Other corporate obligations with an equivalent or higher rating than items 1 through 6 above; or,
8. Obligations backed by United States government and investment grade municipal funds.

(Continued)

CITY OF AUSTIN EMPLOYEES' RETIREMENT SYSTEM

Notes to Financial Statements

December 31, 2016 and 2015

(b) Domestic Equity Investments

The aggregate exposure to the global equity asset class may not exceed 65.0% of the fund. Domestic equity investments should total no less than twenty-five percent (25%), and no more than thirty-five (35%), of the total fund measured at fair value. No single company's securities shall represent more than six percent (6%) of the market value of any manager's portfolio.

(c) International Equity Investments

The aggregate exposure to the global equity asset class may not exceed 65.0% of the fund. International equity investments should total no less than 25% and no more than 35% of total value of the System's investments at fair value. No single company's securities shall represent more than six percent (6%) of the market value of any manager's portfolio.

(d) Real Estate Investments

The aggregate exposure to the fixed income and real estate asset classes may not exceed 35.0% of the portfolio. Total investments in real estate funds, while not exposed to concentration of credit risk, should be no less than two and three-quarters percent (2.75%) and no more than eight and one quarter percent (8.25%) of the investment portfolio measured at fair value.

(e) Other Investment Information

As of December 31, 2016 and 2015, the following was the composition of the System's portfolio:

	<u>2016</u>	<u>2015</u>
Alternative investments	8.85%	8.19%
Commercial mortgage-backed securities	0.37%	0.62%
Corporate bonds	6.03%	6.72%
Government agencies	0.09%	0.34%
Government bonds	1.97%	1.51%
Government mortgage-backed securities	2.08%	2.30%
Other fixed income:		
NT Collective Aggregate Bond Index Fund - Non-Lending	9.07%	9.46%
Real estate commingled fund	9.12%	8.94%
U.S. denominated equities *	44.38%	43.14%
International equities *	17.06%	17.25%
Short-term investment funds	0.98%	1.53%
	<u>100.00%</u>	<u>100.00%</u>

* The asset allocation policy noted in footnote 3 (a to d) is based on the type of portfolio managers. The composition percentages in this table reflect the classification of investments for GASB 40 presentation purposes. Certain amounts have been reclassified from international to U.S. equities as they are denominated in U.S. dollars.

Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The System does not have a formal policy regarding interest rate risk, i.e., maturities of investments by type, but its Investment Policy requires fixed income managers to disclose their credit exposure and portfolio duration in their quarterly reports. The System monitors credit exposure using segmented time distribution. Mortgage obligations are sensitive to changes in prepayments, which may arise from a change in interest rates.

CITY OF AUSTIN EMPLOYEES' RETIREMENT SYSTEM

Notes to Financial Statements

December 31, 2016 and 2015

As of December 31, 2016, the System had the following investments and maturities:

Investment type	Fair value	Less than 1 year	1 to 6 years	6 to 10 years	10+ years
Commercial mortgage-backed securities	\$ 8,394,634				8,394,634
Corporate bonds	137,066,248	4,892,056	84,087,395	29,459,298	18,627,499
Government agencies	2,136,001		1,665,143		470,858
Government bonds	44,885,763		25,896,883	9,840,515	9,148,365
Government mortgage-backed securities	47,228,203	4,297	427,432	4,383,979	42,412,495
Other fixed income:					
NT Collective Aggr Bond Index Fund	206,311,430	1,856,803	82,813,408	89,869,259	31,771,960
	\$ 446,022,279	6,753,156	194,890,261	133,553,051	110,825,811

As of December 31, 2015 the System had the following investments and maturities:

Investment type	Fair value	Less than 1 year	1 to 6 years	6 to 10 years	10+ years
Commercial mortgage-backed securities	\$ 13,255,653				13,255,653
Corporate bonds	142,739,670	1,470,280	96,365,143	27,844,546	17,059,701
Government agencies	7,176,171		6,684,270		491,901
Government bonds	31,969,895		14,233,266	5,668,068	12,068,561
Government mortgage-backed securities	48,974,089		791,764	618,696	47,563,629
Other fixed income:					
NT Collective Aggr Bond Index Fund	201,173,027	1,146,686	90,326,689	80,589,915	29,109,737
	\$ 445,288,505	2,616,966	208,401,132	114,721,225	119,549,182

Credit Risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations to the System. To control credit risk, credit quality guidelines are incorporated into the Investment Policy, as follows:

- Fixed income securities shall not be rated lower than investment grade (Baa3 by Moody's or BBB- by Standard & Poor's or Fitch) by either rating agency unless specific written permission is granted by the Board to a manager. The average rating of all corporate bonds held in any investment portfolio, taken together, may not fall below AA.
- Split-rated securities in which the middle rating is below investment grade shall not comprise more than five percent (5%) of the market value of any manager's portfolio unless specific authority has been granted.
- The issues of individual entities rated AAA to Aa3 (Moody's) or AA- (Standard & Poor's, and Fitch) may have a seven percent (7%) position at market value.
- Issues of individual entities rated below Aa3 (Moody's) or AA- (Standard & Poor's and Fitch) may have a three percent (3%) position at market value.

(Continued)

CITY OF AUSTIN EMPLOYEES' RETIREMENT SYSTEM

Notes to Financial Statements

December 31, 2016 and 2015

- The ratings issue does not apply to direct obligations of the US government and its agencies, but the securities issued by any one issuer shall not otherwise, in the aggregate, exceed the foregoing limitations.
- If specific managers are given international flexibility, the same quality restrictions apply.
- Money market instruments shall have a minimum quality rating comparable to an A3 (Moody's) or A- (Standard & Poor's and Fitch) bond rating and commercial paper shall be rated A1/P1 unless held in a diversified short-term commingled fund.

The quality ratings of investments in fixed income securities as described by nationally recognized statistical rating organizations at December 31, 2016, are as follows:

Standard & Poor's Quality Rating	Total fair value	Commercial mortgage-backed	Corporate bonds	US govt & agencies	Municipal Bonds	NT Collective Aggregate Bond Index Fund
AAA	\$ 203,529,070	6,157,477	1,042,119	47,228,203		149,101,271
AA	20,216,022	2,237,157	9,602,621			8,376,244
A	75,894,275		48,314,003	470,858	4,270,739	22,838,675

US govt & agencies*	27,609,371					
	<u>\$ 445,288,505</u>					

* Obligations of the US government or obligations explicitly guaranteed by the US government are not considered to have credit risk and do not have purchase limitations.

(Continued)

CITY OF AUSTIN EMPLOYEES' RETIREMENT SYSTEM

Notes to Financial Statements

December 31, 2016 and 2015

Foreign Currency Risk

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or a deposit.

The System's currency risk exposure, or exchange rate risk, primarily resides within the System's international equity investment holdings. The System's Investment Policy is to allow its external managers to decide what action to take regarding their respective portfolio's foreign currency exposures using currency forward contracts.

The System's exposure to foreign currency risk includes the following international securities (all equity) as of December 31, 2016 and December 31, 2015:

Currency	2016 Fair value	2015 Fair value
British Pound Sterling	\$ 105,105,903	104,100,729
EURO Currency	74,967,063	73,275,485
Japanese Yen	64,428,234	57,770,062
Swiss Franc	33,840,062	34,778,103
Hong Kong Dollar	30,031,984	30,103,082
Australian Dollar	19,355,900	15,854,309
Canadian Dollar	18,076,343	11,249,424
Singapore Dollar	15,868,053	20,205,787
Swedish Krona	6,844,603	4,956,013
Danish Krone	6,637,154	6,273,636
New Zealand Dollar	6,369,404	3,211,060
Norwegian Krone	3,603,811	2,219,214
South African Rand	2,906,156	2,302,364
Malaysian Ringgit	-	475,494
Total securities subject to foreign currency risk	\$ 388,034,670	366,774,762

Foreign Currency Options

The System periodically invests in foreign currency options in order to hedge the value of a portion of its investments denominated in foreign currencies. Financial options are an agreement giving one party the right, but not the obligation, to buy or sell a specific amount of an asset for a specified price on or before a specified expiration date. The foreign currency options held by the System entitle the System to convert the value of certain foreign equities into US dollars at an agreed rate. At December 31, 2016 and 2015, the System held no foreign currency options.

Securities Lending

The System is authorized under its Investment Policy to participate in securities lending programs through Northern Trust Investments Inc. under which, for an agreed-upon fee, System-owned investments are loaned to a borrowing financial institution. Under this agreement, when the loan closes, the borrowed securities are returned to the System and the collateral is returned to the borrower. The lending agreement requires securities on loan to be collateralized by cash, US government securities, or irrevocable letters of credit with a total market value of at least 102% of the loaned System securities. For global securities pledged as collateral, total market value shall not be less than 105%. The System cannot sell or pledge the non-cash collateral of \$14,121,753 unless a default of the securities lending agreement has occurred.

(Continued)

CITY OF AUSTIN EMPLOYEES' RETIREMENT SYSTEM

Notes to Financial Statements

December 31, 2016 and 2015

Cash collateral can be invested in a short-term investment pool or in term loans. The term loans can be terminated on demand by either lender or borrower. At December 31, 2016 and 2015, System investments in possession of a borrowing financial institution were collateralized by cash and irrevocable letters of credit. The cash collateral was invested in a short-term investment pool with an average weighted maturity approximating the maturity of the security loans. There were no significant violations of legal or contractual provisions, and no borrower or lending agent default for fiscal years 2016 and 2015.

As of December 31, 2016 and 2015, the System owned the following securities that were in possession of a borrowing financial institution:

	2016		2015	
	Market value of loaned securities	Cash collateral received	Market value of loaned securities	Cash collateral received
US agencies	\$ 527,028	540,851	-	-
US corporate fixed	9,502,942	9,743,635	3,790,316	3,896,783
US equities	80,399,158	82,537,330	107,692,311	110,773,477
Global stocks	9,271,390	9,752,208	8,160,699	8,655,822
US government fixed	-	-	23,315,204	23,841,396
Total	\$ 99,700,518	102,574,024	142,958,530	147,167,478

Cash collateral received from borrowers of securities is invested in accordance with COAERS' securities lending agreement. As of December 31, 2016 and 2015, cash collateral was invested in the following categories:

Investment Category	2016	2015
Cash and other liquid assets	\$ 23,150,957	25,401,107
Asset-backed securities	14,083,413	18,189,900
Commercial paper	8,759,822	25,769,025
Repurchase agreements	10,062,512	7,726,293
Certificates of deposit	12,811,495	26,460,713
US govt & agencies	1,877,105	1,677,709
Domestic corporate fixed-income securities	31,828,720	41,942,731
Total cash collateral received	\$ 102,574,024	147,167,478

(4) Fair Value Measurement

In accordance with GASB 72, COAERS categorizes the fair value measurements of its investments within a fair value hierarchy as established by generally accepted accounting principles. Fair value measurements are classified as Level 1, Level 2 or Level 3, based on the inputs utilized to establish fair value:

Level 1 inputs are based on quoted prices (unadjusted) in active markets for identical assets or liabilities in active markets that an entity can access at the measurement date.

Level 2 inputs (other than quoted prices included within Level 1) are observable for similar assets or liabilities.

Level 3 inputs are developed by the reporting entity based on unobservable inputs for an asset or liability.

For investments in certain entities that calculate net asset value and do not have a readily determinable fair value, fair value reporting is permitted based on the NAV per share (or its equivalent) as a practical expedient, where certain conditions are met. These investments are not included in the leveling hierarchy.

The categorization of investments described above is based solely upon the objectivity of the inputs used, to reflect their relative reliability in the measurement of an investment's fair value, and does not reflect the level of risk associated with the investment.

(Continued)

CITY OF AUSTIN EMPLOYEES' RETIREMENT SYSTEM

Notes to Financial Statements

December 31, 2016 and 2015

COAERS' investments in stocks, bonds and other such publicly traded securities held directly in separately managed accounts (SMAs) are assigned to Level 1, 2 or 3 classifications. COAERS' investments in shares or units of commingled vehicles such as mutual funds, collective investment trusts (CITs), and limited partnerships are first reviewed to determine whether a Readily Determinable Fair Value (RDFV) exists as the basis for current transactions. Commingled vehicles that are deemed to have an RDFV are then assigned to Level 1, 2 or 3 classifications based on examination of the vehicle structure, nature of the underlying assets, liquidity terms fund governance, transparency and pricing. Investments in commingled vehicles that are not unitized (such as LLC or limited partnership interests) are deemed to not have an RDFV and are measured at net asset value under the practical expedient provided by GASB 72.

COAERS' investments and securities lending collateral reinvested have the following fair value measurements as of December 31, 2016 and 2015, respectively.

	2016				
	Fair value measurements using				
	Total	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Net asset value (NAV)

CITY OF AUSTIN EMPLOYEES' RETIREMENT SYSTEM

Notes to Financial Statements

December 31, 2016 and 2015

(5) Pension Plan Investments**(a) Investment Policy**

The Board has the authority to establish the investment policy and the asset allocation policy. The general investment objective is to obtain a reasonable long term total return consistent with the degree of risk assumed, while emphasizing the preservation of capital.

(b) Asset Allocation

The System's strategic asset allocation targets as of December 31, 2016 and 2015, as adopted by the Board of Trustees, are as follows:

	<u>2016</u>	<u>2015</u>
US equities	30.00%	30.00%
International equities	30.00%	30.00%
Fixed income	24.50%	24.50%
Real estate	5.50%	5.50%
Alternative investments -		
Risk Parity	5.00%	5.00%
Master Limited Partnerships	4.00%	4.00%
Commodities	1.00%	1.00%
	<u>100.00%</u>	<u>100.00%</u>

During 2016, the Board restructured the US equity and international equity portfolios. These moves resulted in the termination of certain existing investment managers and the hiring of several new ones. The investment policy was updated to reflect these changes. Aside from the incorporation of these new mandates, there were no significant modifications to the investment policy.

(c) Method Used to Value Investments

- The System's equity and fixed income investments are reported at fair value based on independent pricing services.
- Short-term cash investments are reported at cost, which approximates fair value.
- International securities are reported at fair value in U.S. dollars converted at current exchange rates.
- Investments that do not have an established market are valued based on the net asset value provided by independent audits.
- The System's real estate commingled fund is an open-end investment fund that includes properties that are valued monthly; all properties within this fund are appraised externally by nationally recognized appraisers.
- The System's exposure to international emerging markets comes through three funds: one managed by City of London Investment Management, another by Baillie Gifford Overseas LTD, and a third by Northern Trust Investments Inc. (the Trustee) Collective Emerging Markets Index Fund. These investments are commingled arrangements where assets are pooled with other institutional investors and then unitized with the value of the units determined by the fair value of the entire pool.
- The System also invests in the Northern Trust Investments Inc. (the Trustee) Collective Aggregate Bond Index Fund that may hold units of participation in any fixed income collective fund established and maintained by the Trustee or any of its affiliates. The Trustee values its securities at fair value; any securities for which no current market quotation is readily available are valued at fair value as determined in good faith by the Trustee.
- Investment income is recognized in the period earned and purchases and sales of investments are recorded on a trade-date basis. Net appreciation/depreciation in Plan investments includes both realized and unrealized gains and losses.

(Continued)

CITY OF AUSTIN EMPLOYEES' RETIREMENT SYSTEM

Notes to Financial Statements

December 31, 2016 and 2015

(d) Rate of Return

For the year ended December 31, 2016, the annual money-weighted rate of return on System investments net of pension plan investment expense was 8.30%, an increase from -1.90% at December 31, 2015. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

(e) Concentrations

If the pension plan held investments (other than those issued or explicitly guaranteed by the U.S. government, commingled funds, and other pooled investments) in any one organization representing 5% or more of the pension plan's fiduciary net position, the pension plan should disclose this information. At December 31, 2016 and 2015, there are no holdings that exceeded this disclosure trigger.

(6) Contributions and Funding Policy

As of December 31, 2016 and 2015, the System's funding policy, as guided by state law, requires contributions equal to 8% of base compensation by the participants and by the City.

While the contribution requirements are not actuarially determined, state law requires that each plan of benefits adopted by the System must be approved by a qualified actuary. The actuary certifies that the contribution commitment by the participants and the City provides an adequate financing arrangement. Using the entry age actuarial cost method, the System's normal cost is determined as a percentage of payrolls. The excess of the total contribution rate over the normal cost rate is used to amortize the System's unfunded actuarial accrued liability, if any exists, and the number of years needed to amortize the System's unfunded actuarial accrued liability is determined using a level percentage of payroll method.

The funding objective of the System is for contribution rates to be sufficient to cover the normal cost of the Plan and to amortize any unfunded actuarial accrued liabilities over a period not to exceed 25 years.

In 2005, the City of Austin City Council approved a Supplemental Funding Plan (SFP) relating to the System. The basic elements of this plan provided for an initial 1% contribution from the City beginning in October 2006, and increasing 1% each year until reaching a cap of 4%. This additional funding would continue as long as necessary and in an amount necessary, up to 4%, to sustain a 25-year funding period. While compliance with the SFP continued into 2010, the negative impact of 2008 capital markets on the Plan rendered the effect of SFP, the contributions of which had reached the 4% maximum, inadequate to achieve the System's funding goal.

An Amended Supplemental Funding Plan, adopted by the City Council in October 2010, increased the total employer contribution to the System to 14% of base compensation effective October 1, 2010. The Amended Supplemental Funding Plan also increases future employer contributions as follows: 16% of base compensation effective October 1, 2011 for fiscal year 2011-12; and 18% of base compensation effective October 1, 2012 for fiscal year 2012-13, and each fiscal year thereafter.

(7) Capital Assets

The following summarizes the capital asset account balances as of December 31, 2016 and December 31, 2015, and changes to the accounts during the years then ended:

	Balance December 31, 2014	Net Change	Balance December 31, 2015	Net Change	Balance December 31, 2016
Capital assets not being depreciated:					
Land	\$ 249,964	-	249,964	-	249,964
Capital assets being depreciated:					
Building	1,198,925	-	1,198,925	-	1,198,925
Furniture and fixtures	300,037	3,406	303,443	186,948	490,391
Work in Progress	228,917	992,727	1,221,644	1,133,843	2,355,487
Total capital assets being depreciated	1,727,879	996,133	2,724,012	1,320,791	4,044,803
Less accumulated depreciation:					
Building	559,842	29,973	589,815	29,973	619,788
Furniture and fixtures	268,729	15,705	284,434	20,498	304,932
Total accumulated depreciation	828,571	45,678	874,249	50,471	924,720
Total capital assets, net of accumulated depreciation	\$ 1,149,272	950,455	2,099,727	1,270,320	3,370,047

(8) Federal Income Taxes

The Plan is a Public Employee Retirement System and is exempt from federal income taxes. A favorable determination letter from the Internal Revenue Service was issued in February 2014.

(9) Risk Management

The System is exposed to various risks of loss related to torts, errors and omission, violation of civil rights, theft of, damage to, and destruction of assets, and natural disaster. These risks are covered by insurance purchased by the System. This coverage is in compliance with the workers' compensation laws of the State of Texas with no accident or aggregate deductibles. Property physical damage is insured to replacement value with a \$5,000 deductible and a building limit of \$2,107,000 with contents coverage of \$719,000. Automobile limits are set at \$1,000,000 per occurrence. Insurance coverage by major category of risk has remained relatively constant as compared to the prior fiscal year. Insurance settlements have not exceeded insurance coverage for any of the past three years. The System obtains Workers Compensation and Employers Liability coverage through Texas Mutual Insurance Company.

The System maintains a pension and welfare fund fiduciary responsibility insurance policy with an aggregate limit of liability of \$20,000,000, and officers and directors liability coverage of \$5,000,000.

CITY OF AUSTIN EMPLOYEES' RETIREMENT SYSTEM

Notes to Financial Statements

December 31, 2016 and 2015

(10) Health Plan for Retired COAERS Employees**(a) Plan Description**

The City of Austin Employees' Retirement System (COAERS) participates in the healthcare plan administered by the City of Austin (the City). The City provides healthcare insurance for eligible retirees and their dependents through their group health insurance plan covering both active and retired members. The authority to amend and establish benefit provisions to the healthcare plan resides with the City. Any reports regarding the healthcare plan are available from the City.

(b) Funding Policy

Benefit provisions are established and amended by the City Council; rates are actuarially determined by a third-party actuary. COAERS, as the employer, has fewer than twenty current and potential plan members. COAERS does not participate in plan design or administration, and is subject to the terms and conditions set by the City. Both COAERS and the four members currently participating in the plan, pay monthly premiums based on the City's assumptions and actuarial data. COAERS contributed the required amounts for fiscal years 2016, 2015, and 2014, which were approximately \$22,200, \$18,400, and \$9,700, respectively. In addition, the Plan members receiving this benefit contributed approximately \$900 per month in 2016, \$935 per month in 2015, and \$300 per month in 2014, for individual coverage; dependent coverage paid by these members was approximately \$1,400 per month in 2016, \$1,240 in 2015, and \$800 in 2014.

(11) Net Pension Liability

The net pension liability is measured as the total pension liability, less the amount of the pension plan's fiduciary net position. In actuarial terms, this will be the accrued liability less the market value of assets. The Schedule of Net Pension Liability presents multi-year trend information (beginning with FY 2014) to illustrate changes in the plan fiduciary net positions over time, relative to the total pension liability. The components of COAERS' net pension liability at December 31, were as follows:

Schedule of Net Pension Liability

FY Ending December 31	Total Pension Liability	Plan Net Position	Net Pension Liability	Plan Net Position as a % of Total Pension Liability
2014	\$ 3,094,055,712	\$ 2,209,799,679	\$ 884,256,033	71.42%
2015	3,391,796,116	2,144,804,122	1,246,991,994	63.24%
2016	3,591,376,306	2,299,688,386	1,291,667,920	64.03%

In addition to the above, this information is presented in the Required Supplementary Information section beginning on page 58.

(Continued)

CITY OF AUSTIN EMPLOYEES' RETIREMENT SYSTEM

Notes to Financial Statements

December 31, 2016 and 2015

(a) Actuarial Methods and Assumptions Used to Determine Contribution Rates

The total pension liability was determined by an actuarial valuation as of December 31, 2016, using the following actuarial assumptions:

Summary of Actuarial Assumptions

Valuation date	December 31, 2016
Actuarial cost method	Entry Age Normal
Remaining amortization period	25 years for ADEC based on Board's Funding Policy
Asset valuation method	Expected actuarial value plus 20% recognition of prior years' differences between expected and actual investment income
Inflation	2.75%
Salary increases	4.00% to 6.25%
Investment rate of return	7.5%
Retirement age	Experience-based table of rates that are gender specific. Last updated for December 31, 2015 valuation pursuant to an experience study of the 5-year period ending December 31, 2015.
Mortality	RP-2014 Mortality Table with Blue Collar adjustment. Generational mortality improvements in accordance with Scale BB are projected from the year 2014.

The Plan does not require regular ad hoc post-employment benefits, and none have been made since 2002.

(b) Single Discount Rate

The Single Discount Rate of 7.50% (reduced in 2015 from the previous 7.75% rate established in 2002) used to measure the total pension liability, was based on the expected rate of return on pension plan investments. The projection of cash flows used to determine this Single Discount Rate assumed that plan member contributions will be made at the current contribution rate and that employer contributions will be made in accordance with the Supplemental Funding Plan. Based on these assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Expected Real Rates of Return

<u>Asset Class</u>	<u>2016</u>	<u>2015</u>
US equity	4.57%	3.82%
International equity	5.90%	6.41%
Fixed income	1.25%	1.75%
Real estate	4.00%	4.75%
Risk parity	4.75%	5.00%
Master limited partnerships	7.25%	8.75%
Commodities	3.25%	5.00%
Cash	0.25%	0.50%

(Continued)

CITY OF AUSTIN EMPLOYEES' RETIREMENT SYSTEM

Notes to Financial Statements

December 31, 2016 and 2015

(c) Sensitivity of the Net Pension Liability to Changes in the Discount Rate

Regarding the sensitivity of the net pension liability to changes in the Single Discount Rate, the following presents the plan's net pension liability, calculated using a Single Discount Rate of 7.50%, as well as what the plan's net pension liability would be if it were calculated using a Single Discount Rate that is one percent lower or one percent higher:

**Sensitivity of Net Pension Liability to the
Single Discount Rate Assumption**

1% Decrease 6.50%	Current Single Discount Rate Assumption 7.50%	1% Increase 8.50%
\$ 1,731,803,028	\$ 1,291,687,920	\$ 924,511,814

(12) Commitments and Contingencies

In 2014, the System entered into a long-term agreement with Levi, Ray, & Shoup for the development and installation of a new pension administration system. Contract work began in 2014 and is scheduled to continue through 2018 at an approximate cost of \$5 million.

INVESTMENT SECTION

City of Austin Employees' Retirement System

April 2017

Dear Members:

During 2016 it was my honor and privilege to become the second Chief Investment Officer in the history of the Fund. In this role I aim to build on the long history of effective stewardship of those who have come before me. To that end, our management of the Fund continues to be guided by the same bedrock set of beliefs that has been articulated in prior annual letters:

- A pension fund has the longest of investment horizons and therefore rightly focuses on factors that impact long-term results.
- Strategic asset allocation is the primary factor that determines long-term investment returns.
- Diversification within and across asset classes is the most effective tool for controlling risk.
- Disciplined rebalancing towards the target asset allocation is necessary to maintain diversification and controls risk.
- Passive investment management is typically the most effective approach to efficient markets, while active investment management can be successful in inefficient markets.

By adhering to these longstanding principles, we expect continued success in the prudent management of the assets of the Fund. As shown in the allocation table below, the Fund remains well diversified across a wide range of assets. Diversification is often called “the only free lunch” in finance since it represents the only way to reduce the risk of a portfolio without decreasing its expected return. During 2016, the allocation remained within the major rebalancing thresholds (shown in gray below) set forth in the investment policy statement, so no rebalancing activities took place.

ASSET ALLOCATION				
ASSET CLASS	12/31/16	Minimum	Target	Maximum
COMMON STOCKS	62.17%	55.00%	60.00%	65.00%
Domestic Large Cap	27.49%	21.25%	26.25%	30.00%
Domestic Non-Large Cap	6.21%	2.50%	3.75%	5.00%
International	28.47%	25.00%	30.00%	35.00%
FIXED INCOME AND REAL ESTATE	28.77%	25.00%	30.00%	35.00%
Fixed Income	19.67%	21.50%	24.50%	27.50%
Real Estate	9.10%	2.75%	5.50%	8.25%
ALTERNATIVES	8.89%	7.00%	10.00%	13.00%
CASH	0.17%	0.00%	0.00%	0.00%

This allocation produced investment returns of 8.1% net of expenses for the Fund during 2016, marking the best year since 2013. In addition, the fund beat its benchmark by 0.54% due to strong performance by its investment managers and a favorable asset allocation. These gains allowed the fund to end the year at \$2.279 billion in assets, the highest level in its 75-year history.

As shown in the table below, these returns were driven primarily by strong gains in global equities that came against a backdrop of political surprises around the globe. Voters in the United Kingdom approved a referendum to have the country exit the European Union after 43 years of membership. Likewise, the US political scene delivered the biggest surprise of the year as Donald Trump was elected the 45th President of a deeply divided nation. Even so, global markets rallied strongly with the S&P 500 Index up 11.96% for the year and the MSCI All Country World Index up 7.86%. Excess returns generated by the fund's investment managers, particularly those operating in international markets, added 42 basis points of incremental gains to the Fund.

Index	Asset Class	1 Year	3 Year	5 Year
S&P 500	US Large Cap Equity	12.0%	8.9%	14.7%
Russell 2000	US Small Cap	21.3%	6.7%	14.5%
MSCI ACWI IMI	Global Equity	8.4%	3.2%	9.6%
MSCI EAFE	International Developed Large Cap Equity	1.0%	-1.6%	6.5%
MSCI Emerging Markets	Emerging Markets Equity	11.2%	-2.6%	1.3%
Alerian MLP	Master Limited Partnerships	18.3%	-5.8%	2.2%
Barclays Aggregate	US Core Fixed Income	2.6%	3.0%	2.2%
Barclays	US Treasuries	1.0%	2.3%	1.2%
NCREIF ODCE (net)	Core US Real Estate	7.7%	11.0%	11.1%

Within the Fund the strongest returns of the year came from real assets, where the Alerian MLP Index rose 18.31% as the price of oil marked a bottom at \$26 early in the year. The Bloomberg Commodity Index gained 11.74% and US core real estate (as measured by the NCREIF Property Index) gained 7.97%. The weakest returns of the year came from fixed income, where the Barclays Aggregate Bond Index delivered returns of only 2.65% for the year. The fund's significant underweight in this asset class relative to the policy allocation helped add 10 basis points of incremental return to the Fund.

Indeed, the low interest rate environment since the global financial crisis has continued to put pressure on long-term returns for the fund. Over the last ten years the fund has gained an average of 5.2% annually, below its actuarially assumed long-term rate of return of 7.5%. Yet while this absolute level of realized return is low by historical standards, it represents a significant improvement over the meager 0.7% return that owning US Treasury bills would have provided during this time as shown in the table on the prior page. In this way diversification across stocks, bonds, and other assets continues to deliver steady growth in the Fund's principal balance in order to meet its obligations to future generations.

Our continuing commitment to best-in-class stewardship of the fund also led us to undertake several important strategic initiatives with respect to investments last year.

- First, COAERS issued a request for proposal (RFP) for investment consulting services, a process that seeks to ensure that the Board receives the top quality strategic advice that well-aligned with the interests of the Fund.
- Second, we conducted a review of the Fund's investment managers to ensure that each is adding value for the fees they are paid, a process that has resulted in the reallocation of 20% of the fund last year to better performing options. As a result of these efforts and others that remain in the works, the fund expects to save several million dollars in fees annually while improving its ability to serve as a secure source of retirement income for all beneficiaries.
- Third, the agency adopted a new ethics policy that we believe to be best in class that requires full disclosure of all conflicts of interest on the part of investment managers or other fiduciaries that seek to do business with the Fund.

In short, the Fund continues to be managed in a professional and principled manner amid a volatile and unpredictable market environment. In the year ahead we look forward to moving forward with these initiatives and many others in the service of the Fund and its beneficiaries.

Sincerely,

David T. Veal, CFA, CAIA, FRM
Chief Investment Officer

Summit Strategies Group

January 1, 2017

The Board of Retirement
 City of Austin Employees' Retirement System
 418 E. Highland Mall Boulevard
 Austin, TX 78752-3720

The COAERS investment portfolio experienced strong returns in 2012 (+13.8%) and 2013 (+16.0%). The COAERS investment portfolio saw a slowdown of returns in 2014, where the fund returned 5.1% gross of fees, and slightly negative returns for fiscal year ending December 31, 2015 of -1.6% gross of fees. Fiscal year 2016 was strong for the Fund, and the portfolio returned 8.4% gross of fees, recapturing some of the value lost in 2015. The Fund increased from a beginning value of \$2.1 billion to its current value of \$2.3 billion as a result of net flows of \$24 million and an investment capital appreciation of \$176 million. The S&P 500 and MSCI EAFE Indices posted returns of 12.0% and 1.5%, respectively, as a strong dollar aided US equities but was a headwind for international corporations.

As detailed earlier, the COAERS' investment portfolio returned 8.4% for the year ending December 31, 2016. The fund outperformed the Policy Index and the Passive Index and ranked in the 21st percentile as part of the Investment Metrics sample. Specifically, the investment portfolio was ahead of its Policy Index return by 0.9% and the Passive Index by 1.6%. The outperformance versus the Passive Index is largely attributable to COAERS' exposure to MLPs, which had very strong performance for the year. A driver of the strong relative returns versus peers is due to asset allocation; COAERS has a higher international equity weighting versus peers and a lower fixed income allocation versus peers. On a relative basis, international equity outperformed fixed income by 3.9%. Domestic equity was strong with an 11.1% return in 2016 and real estate continued its strong run, returning 10.0%. Longer-term results are strong and positive on a relative basis. For the 10-year period, the fund returned 5.5% annualized, exceeding the index by 1.1% and ranking above median versus the peer sample. All rates of return were calculated using a time-weighted rate of return and are reported gross of fees.

The results for 2016 exceeded the actuarial assumption for long-term investment results. The major events in 2016 impacting financial markets were the United Kingdom's surprise vote to exit the European Union and the election of Donald Trump as the 45th president of the United States. These events brought uncertainty to the markets given the potential for large changes to these two economies. Due to a strengthening labor market, increasing consumer and business confidence, and higher growth supported the Federal Reserve's decision to increase rates by 25 bps in December after keeping the federal funds rate unchanged since December 2015. Looking forward, global political and economic uncertainties will continue and be impacted by changing monetary policy around the world. Inflation uncertainty remains as the global economy continues its slow growth.

The long-term results of the fund are positive and the hard work of the Board and staff over the past few years has benefited the System and its members. We believe the fund is in a good position to capture consistent, quality results in the years to come. All of us at Summit Strategies Group have enjoyed our COAERS' experience and look forward to continued service and success. Thank you.

Sincerely,

Eric J. Ralph, CFA
 Principal

OUTLINE OF INVESTMENT POLICIES

The City of Austin Employees' Retirement System Board of Trustees, which has the fiduciary duty of overseeing the pension fund investments, has adopted a Statement of Investment Policy. This summary includes the major elements of this annually reviewed document. A copy, in its entirety, is available upon request.

INVESTMENT GOALS

The purpose of the Fund is to accumulate the financial reserves necessary to provide for the retirement or pensioning of eligible members of the City of Austin Employees' Retirement System and their beneficiaries. Given this purpose, the System's liquidity requirement, and the source and predictability of contributions, the Board elects to assume normal pension fund risk (i.e. risk levels near the median of a comparable universe of pension funds) in pursuing an investment program. A primary objective of the investment management of the Fund is to emphasize consistency of growth in a manner intended to protect the Fund from excessive volatility in market value from year to year.

The Board, with consultation, advice and assistance from the System's Professional Staff and Investment Consultant, will use the Fund's asset allocation as the primary tool to achieve this goal. As this is a long term projection and investments are subject to short-term volatility, the main investment review focus of the Board will be to emphasize total return of the Fund versus its absolute and relative targets, each asset segment's composite performance versus appropriate market benchmarks, and each Investment Manager's performance versus a specified asset class style benchmark and style peer comparisons over relevant time periods. Each Investment Manager is expected to maintain a consistent philosophy and style, perform well versus others utilizing the same style, add incremental value after costs and provide investment management in compliance with this document and the Investment Manager's contract with the System.

INVESTMENT PHILOSOPHY

The Fund is a permanent one.

The benefit obligations of the System must be met on a timely and regular basis.

There is currently no expectation of need for significant liquidity from the Fund.

The Fund shall be considered a total return fund, with appropriate recognition given to both current income and capital appreciation. Taxes shall not be a consideration. As such, market value will be the only relevant basis for measuring investment value.

In the long run, ownership (equity investment) is a prudent investment vehicle for preservation of real values. The purpose of fixed income investments is to protect the principal, provide income and provide a measure of stability to the Fund.

Diversification is integral to the fund's design and as a result, investments that improve fund diversification will be considered.

As a long-term fund with a commitment to funding the full benefits of the participants, cash flow considerations shall take precedence over the liability stream when considering overall asset allocation of fund assets.

IDENTIFICATION OF DUTIES

There are several parties acting as fiduciaries regarding the investment program for the Fund. This document will set out specific duties and responsibilities for the investment related parties that are established to achieve the objectives of the Fund.

PERMISSABLE INVESTMENTS

The investment vehicles listed below are currently specifically permitted under the Investment Policy. They are categorized as equity, fixed income, or real estate to indicate how they are classified for purposes of the asset allocation guidelines in a subsequent section. Unless given authorization in writing, managers are allowed to invest only in the security types listed below for the asset class for which they have been hired.

Equities	Fixed Income	Real Estate
Common Stocks	Domestic and Yankee Bonds	Open-ended Commingled Funds
Convertible Bonds	Mortgages and Mortgage-Backed Securities	
Preferred Stocks	Asset-Backed Securities	
Real Estate Investment Trusts*	Cash-Equivalent Securities	
	Money Market Funds, Bank STIF and STEP Funds	

*(if included in an investment manager's assigned benchmark)

1. The above assets can be held in mutual funds and commingled private investment funds, as well as privately managed separate accounts. If held in a Board approved commingled private investment fund or mutual fund, the prospectus, organizational document, or Declaration of Trust takes precedence over this document solely to the extent of any conflict with this document, unless provided otherwise in a written agreement between COAERS and the Investment Manager.
2. Private placement bonds are not permitted. Section 144(a) fixed income securities are allowable.
3. Investments may not be made in any investment that is prohibited by the Internal Revenue Service, the Department of Labor, or other federal or state law.
4. For purposes of definition, cash equivalent securities are any fixed income investment with less than one year to maturity or reset date.
5. The following portfolio concentration limitations will apply. The securities representing equity of any one company shall not exceed 6% of the market value of any manager's Portfolio. Fixed income securities of any one corporation may not exceed 6% of the Portfolio at market. This restriction also applies to asset-backed securities, non-agency mortgage-backed securities (including commercial mortgage-backed securities) and taxable municipals. The total holdings of a federal agency-issued mortgage-backed security of the same coupon and maturity series of the same agency shall not exceed 20% of the Portfolio at market (agency-issued mortgage-backed securities include, but are not limited to GNMA's). The direct debt of the federal government (treasury bonds, bills and notes) shall not be restricted as a percentage of the Portfolio.
6. Quantitative or Enhanced Index investment styles may deviate from the above concentration limitations provided the Investment Manager is following a pre-established investment process and relative position limitation (i.e. index weight plus 1%) authorized in the IMA or specifically granted as an exception within this Policy. The Investment Manager shall monitor the account and shall promptly inform the Staff and Investment Consultant if the concentration restriction noted above in this Policy is exceeded regardless of authorization or specifically granted exception.
7. Derivatives are permissible for the purpose of equitizing cash (e.g., an overlay program, reducing cash exposure, or in Portfolio transitions and rebalancing activities).
8. The Fund will be invested in a manner consistent with the Guidelines.
9. Equity Investment Managers may invest in depository receipts as long as the underlying security is permissible within these guidelines and the investment does not expose the Fund to any greater risk than the risk from holding the underlying security.
10. Domestic equity Investment Managers are allowed to invest in dollar-denominated, SEC-registered stock of foreign domiciled companies traded on the NYSE, AMEX or OTC markets. Concentration restrictions for these securities are the same as for any other equity security.

11. Investment Managers may be hired to manage accounts using primarily closed-end funds, and open-end funds as approved by the Board. In such accounts, closed-end and open-end funds are permissible holdings.
12. Investments for the Fund shall be made and managed by one or more investment managers who meet the requirements of Sections 802.203(d) and 802.204, Texas Government Code.
13. Risk parity and commodities investment managers are authorized to manage portfolios that gain exposure to asset classes by investing in futures and other derivative instruments.
14. Investment Managers may be hired to manage accounts using primarily master limited partnership units. In such accounts, master limited partnership units are permissible holdings.

TOTAL PENSION FUND INVESTMENT OBJECTIVES

Both relative and absolute results will be considered in the evaluation of the total Fund's performance. The following are the performance expectations for the Fund:

- The Fund's total return after fees should exceed the total return of an index composed of a mix of asset class benchmarks in proportions set out in the Statement of Investment Policy.
- The time period for this objective is on the market cycle or five years, whichever is shorter.

ASSET ALLOCATION

The Trustees believe that the level of risk assumed in the Fund is in large part a function of the Fund's asset allocation. The proportion of assets allocated for equity investments is the most important determinant of volatility of future returns. As indicated by long term historical data, the risk of equity ownership has been rewarded with a higher rate of return.

Periodic asset/liability studies provide the basis for changes to the portfolio allocation policy. Guidelines will be amended when a proposed investment strategy is adopted. During times of phased transition to a new allocation, current values may deviate from the established strategic mix. The Board will review its asset allocations at least every two years, or sooner, if a material event in either the liability structure of the plan or the capital markets warrants a sooner look.

Market movements also may cause a portfolio to differ from its strategic mix. Therefore, a range has been set for the actual asset allocation of the System's assets to allow for the fluctuations that are inherent in marketable securities. Rebalancing will take place when such triggering event effects variances beyond their recommended range.

ACTUARIAL SECTION

May 12, 2017

Mr. Christopher Hanson
Executive Director
City of Austin Employees' Retirement System
418 E. Highland Mall Blvd.
Austin, TX 78752

Dear Mr. Hanson:

Subject: Actuarial Valuation as of December 31, 2016

We are pleased to present our report on the actuarial valuation of the City of Austin Employees' Retirement System (COAERS or the System). This report describes the current actuarial condition of COAERS, determines the period over which the unfunded liabilities of the System are expected to be paid off and determines the funded status of the System.

In addition, the report provides various summaries of the data. A separate report is issued with regard to valuation results determined in accordance with Governmental Accounting Standards Board (GASB) Statements 67 and 68. Results of this report should not be used for any other purpose without consultation with the undersigned. Valuations are prepared annually as of December 31st, the last day of the COAERS plan year. This report was prepared at the request of the Board and is intended for use by the COAERS staff and those designated or approved by the Board. This report may be provided to parties other than COAERS staff only in its entirety and only with the permission of the Board.

As you know, the employee and employer contribution rates are set by statute. It is expected that these contribution rates will remain level as a percentage of payroll. The System's recently adopted funding policy is for the contribution rates to be sufficient to cover the normal cost of the plan and to amortize any unfunded actuarial accrued liabilities over a period not to exceed 25 years.

Currently, the total contribution rate is sufficient to amortize the System's unfunded liabilities in approximately 31 years. Therefore, the Board's funding policy is not currently being met. As of the prior valuation, the total contribution rate was sufficient to amortize the unfunded liabilities in 33 years. The decrease in the funding period is primarily due to an increase in the active membership and the corresponding increase in covered payroll.

In 2010 the City of Austin adopted the Amended Supplemental Funding Plan (ASFP). The ASFP provides for an additional City contribution rate of up to a maximum of 10.0% above the base 8.0% rate. The City is now contributing an additional 10.0%, or a total rate of 18.0%. The additional contribution rate is intended to stay in place until the ASFP is amended or repealed.

We certify that the information presented herein is accurate and fairly portrays the actuarial position of COAERS as of December 31, 2016. All of the supporting schedules and tables contained in this actuarial valuation report were prepared by Gabriel, Roeder, Smith &

Page 2

Company, including various accounting and statistical tables which should help you compare the results of this plan year with prior years. The information presented in the trend data schedules of this report has been prepared by Gabriel, Roeder, Smith & Company (GRS). The information for years 1993 through 2000 was prepared by Watson Wyatt & Company.

The following schedules in the actuarial section of the COAERS Comprehensive Annual Financial Report were prepared by GRS: Summary of Cost Items, Analysis of Normal Cost by Component, Actuarial Present Value of Future Benefits and Calculation of Actuarial Accrued Liability, Development of Actuarial Value of Assets, Change in Net Position, Change in Unfunded Actuarial Accrued Liability, Relative Size of Unfunded Actuarial Accrued Liability, Schedule of Active Member Valuation Data, Schedule of Retirees and Beneficiaries Added to and Removed from Rolls, Solvency Test, Schedule of Funding Progress.

GRS provided COAERS with the information used in preparing the following trend schedules in the financial section of the CAFR: Notes to the Financial Statements - Schedule of Net Pension Liability, and Sensitivity of the Net Pension Liability to Changes in the Discount Rate; Required Supplementary Information - Schedule of Changes in the Net Pension Liability and Related Ratios. GRS provided no additional assistance in the preparation of any other schedules in the financial section of the CAFR.

As authorized under Article 6243n of the Vernon's Civil Statutes of the State of Texas, actuarial assumptions and methods are set by the Board of Trustees, based upon recommendations made by the plan's actuary. An experience investigation was performed for the five year period ending December 31, 2015. As a result of that study, revised assumptions were adopted by the Board effective with the valuation as of December 31, 2015. We believe the assumptions are internally consistent, reasonable, and, where appropriate, based on the actual experience of COAERS. All of the assumptions and methods used in this valuation were selected in compliance with the Actuarial Standards of Practice.

The results of the actuarial valuation are dependent on the actuarial assumptions used. Actual results can and almost certainly will differ, as actual experience deviates from the assumptions. Even seemingly minor changes in the assumptions can materially change the liabilities, calculated contribution rates and funding periods. Due to the limited scope of this assignment, GRS did not perform an analysis of the potential range of such possible future differences. The actuarial calculations are intended to provide information for rational decision making.

Member data for retired, active and inactive participants was supplied as of December 31, 2016, by the COAERS staff. We have not subjected this data to any auditing procedures, but have examined the data for reasonableness and consistency with the prior year's data. Asset information was also supplied by the COAERS staff.

The last actuarial valuation of COAERS was prepared as of December 31, 2015 by Gabriel, Roeder, Smith & Company. Valuations are prepared annually as of December 31st.

Gabriel Roeder Smith & Company

The undersigned are independent actuaries and consultants. Mr. Falls is an Enrolled Actuary and a Member of the American Academy of Actuaries and he meets the Qualification Standards of the American Academy of Actuaries. Both Mr. Falls and Mr. Ward are experienced in performing valuations for large public retirement systems.

We would like to thank you and your staff for your assistance in providing all necessary information to complete this valuation. Your courteous help is very much appreciated. We look forward to discussing this actuarial valuation report with you at your convenience. Please do not hesitate to let us know if you have any questions or need additional information.

Sincerely,

Lewis Ward
Consultant

EXECUTIVE SUMMARY

The key results from the valuation of the City of Austin Employees' Retirement System as of December 31, 2016 may be summarized as follows:

	<u>December 31, 2016</u>	<u>December 31, 2015</u>
	(1)	(2)
• Members		
— Actives	9,364	9,063
— Retirees (including disabled) and beneficiaries	5,934	5,679
— Vested - terminated	<u>981</u>	<u>985</u>
— Total	16,279	15,727
• Covered payroll	\$ 599,574,934	\$ 559,829,504
• Normal cost as % of payroll*	18.01%	18.49%
• Actuarial accrued liability	\$ 3,591,376,306	\$ 3,391,796,116
• Actuarial value of assets	\$ 2,423,269,015	\$ 2,308,087,140
• Unfunded actuarial accrued liability (UAAL)	\$ 1,168,107,291	\$ 1,083,708,976
• Estimated yield on assets		
— Actuarial value basis	5.74%	5.91%
— Market value basis	8.03%	-2.27%
• Contribution rate		
— Employee	8.00%	8.00%
— Employer	18.00%	18.00%
• Benefit and refund payments	\$ 179,128,881	\$ 169,517,052
• Amortization period of unfunded actuarial accrued liability	31 years	33 years
• Funding Policy employer contribution rate	19.61%	19.84%
• Funded ratio	67.5%	68.0%

* Includes 0.51% of payroll for administrative expenses beginning in December 31, 2015 valuation.

INTRODUCTION

This December 31, 2016 actuarial valuation of the City of Austin Employees' Retirement System has been prepared by Gabriel, Roeder, Smith & Company. The primary purpose of the valuation is to value the liabilities of the System as of December 31, 2016, determine the funding period of any unfunded liability for the plan year beginning January 1, 2017, and to provide certain required disclosure information. We are pleased to have the privilege of working for the Board, and look forward to discussing the results with you at your convenience.

Section C of this report provides the current funded status of the plan and reviews the valuation results. Assets are discussed in Section D, while Section E contains an analysis of the actuarial gains and losses during the past year.

Section F discusses some of the historical comparisons and statistical summaries for the plan. Section G provides a summary of the valuation results along with other comments.

Various tables supporting the report are contained in Sections H and I, including any change in benefit provisions since the last valuation.

FUNDED STATUS OF THE PLAN

The funded status of the plan is shown in Table 1, Table 2, and Table 3. Table 1 summarizes the various cost items from the current year's and prior year's actuarial valuations, while Table 2 provides an allocation of the normal cost by its various components. Table 3 shows the components of the actuarial liability.

Reviewing the composition of normal cost of the System, Table 2 indicates that the employer normal cost as of December 31, 2016, is 18.01% of pay. This compares with 18.49% of pay as of the last valuation on December 31, 2015. This normal cost is developed based on the Individual Entry Age Normal (EAN) actuarial cost method. As may be seen in Item 1, the normal cost for the retirement benefits is 14.41% of pay. The normal cost for the deferred termination benefits is 1.08% and 1.34% for refunds of terminated employees (both vested and non-vested). The normal cost for disability benefits is 0.19%, and the normal cost for death benefits is 0.48%. In addition, the cost of anticipated administrative expenses is being added to the normal cost rate. This adds 0.51% of pay to the normal cost rate as of December 31, 2016. The decline in the average normal cost reflects the continued shift in the active membership from Group A to Group B. We expect this pattern of declining normal costs (as a percentage of payroll) to continue until the active population is mostly Group B.

Table 1 illustrates a number of the key actuarial items for the 2016 valuation. As mentioned above, the total normal cost rate is 18.01% of covered payroll. The actuarial accrued liability is \$3,591.4 million as shown in Item 5 and as detailed in Table 3. The actuarial value of assets equals \$2,423.3 million, as shown in Item 6. Item 7 of Table 1 shows that the plan has an \$1,168.1 million unfunded liability (i.e. liabilities exceed plan assets) as of the valuation date. As of the last valuation (December 31, 2015), the System was underfunded by \$1,083.7 million. The increase in the unfunded liability is described in greater detail in Section E and Table 6.

On October 1, 2012, the City began contributing 18% of payroll and the employees are contributing 8% of payroll. Combining the employees' contributions with the City contribution, the System will have 26.00% of payroll to fund benefits. The current normal cost of the plan is 18.01%, which means that the System is currently receiving contributions in excess of the normal cost equal to 7.99% of pay (26.00% less 18.01%). These excess contributions are available to amortize any unfunded actuarial accrued liability. Based on these contribution rates, if all assumptions are exactly met then the current unfunded liability will be fully amortized over the next 31 years.

FUNDED STATUS OF THE PLAN
(Continued)

The actuarial valuation report as of December 31, 2016 reveals that the funded ratio (the ratio of actuarial assets to actuarial accrued liability) is 67.5%. On a market value of asset basis the funded status is 64.0%. The funded status is one of many metrics used to show trends and develop future expectations about the health of the System. The funded status measure itself is not appropriate for assessing the sufficiency of plan assets to cover the estimated cost of settling the plan's benefit obligations or assessing the need for or the amount of future contributions since it does not reflect normal cost contributions, the timing of amortization payments, or future experience other than expected.

Under the Amended Supplemental Funding Plan (ASFP) the total City contribution rate is 18.0% of pay. The additional contribution is intended to stay in place until the ASFP is amended or repealed. The normal cost was determined using the Individual Entry Age Normal (EAN) actuarial cost method. This method determines the normal cost for all employees on an individual basis, based on the benefits applicable to each individual member. Because employees hired on or after January 1, 2012 (Group B) have a less valuable benefit tier than employees hired prior to that date (Group A), the normal cost for Group B is less than the normal cost of Group A. With the application of the Individual EAN method, the normal cost is equal to the average of the individual members' normal costs. Since the current group of employees is primarily Group A, this means that the average normal costs for the group will decline over time as Group B employees replace Group A employees.

Because the contributions to the System are a fixed percentage of payroll, this means that the percentage of payroll that will go to pay off the unfunded liability will increase in the future as the average normal cost decreases. This result makes it difficult to calculate the funding period using a mathematical formula since the amount of contributions to pay off the unfunded liability will not be either a constant dollar amount or a constant percentage of payroll in the future. For this reason we are using an open group projection to determine when the System is expected to pay off its unfunded liability. The open group projection assumes a constant active population and that there will be no actuarial gains or losses on liabilities or the actuarial value of assets. Based on the open group projection the funding period of the System as of the valuation date is 31 years.

CHANGE IN ASSETS

Table 4 shows the development of the actuarial value of assets. Item 11 of Table 4, shows that the actuarial value of assets as of December 31, 2016 is \$2,423.3 million. Table 4 also shows the development of the gain/(loss) on the actuarial value of assets for the prior plan year. As shown in Item 12, the System had a loss on an actuarial asset basis of \$41.1 million in 2016. This compares to the \$40.8 million loss in 2015.

The method for determining the actuarial value of assets offsets excesses or shortfalls in the current year's investment income dollar for dollar against prior years' deferred gains or losses. Any remaining amounts from the current or prior years continue to be recognized over a five-year period. Despite the investment income exceeding the assumed 7.50% rate of return on a market value of assets (MVA) basis, the current year provided a shortfall in investment income on an actuarial value of asset basis due to the prior year's actuarial value of assets (AVA) having yet to fully recognize the large deferred losses from fiscal year 2015. In other words, since the prior year AVA was much greater than the MVA (due to the deferred losses), this year's investment gains on a market value basis were not sufficient to "catch up" to this year's expected AVA. In addition to the current year shortfall of \$1.4 million, the significant loss in 2015 will continue to be incrementally recognized, leaving \$164.7 million in deferred losses to be recognized. As a result, \$41.1 million, was recognized in the current year's actuarial value of assets, with the remainder deferred to future valuations.

The total deferral of all Excess/(Shortfall) investment income for the year (shown in Table 4, Column 6 of Item 8) is (\$123.6) million.

An analysis of the change in the System's market value of assets for the last two plan years and an estimate of the return on assets for the System are included in Table 5. The estimated average annual rate of return for the year ending December 31, 2016, assuming that income, revenue, and expenditures are evenly distributed throughout the year is 8.03% on a market value of assets basis. The rate of return for the year ending December 31, 2016, on an actuarial value basis was 5.74%. This compares with the actuarial assumed investment return at the beginning of the year of 7.50%.

ACTUARIAL GAINS AND LOSSES

An important part of the change in unfunded actuarial accrued liability from year to year is due to the impact of actuarial gains and losses of the System. This section summarizes the combined asset and liability experience changes since the prior valuation on December 31, 2015.

As can be seen in Item 7 of Table 6, the expected value of the unfunded actuarial accrued liability as of December 31, 2016, was an underfunded position of \$1,117.1 million. This expected value reflects an assumed investment return assumption of 7.50% on the beginning of year unfunded actuarial accrued liability, normal cost, and contributions during 2016.

Since the actual unfunded actuarial accrued liability as of December 31, 2016 is \$1,168.1 million, it represents a total unexpected net increase for the period of \$51.0 million, as shown in Item 9 of Table 6. That is, the unfunded actuarial accrued liability is greater than expected. The net increase in the unfunded actuarial accrued liability includes an asset loss of \$41.1 million as shown in Table 4, and an unexpected increase on the liability side equal to \$9.9 million, which is broken out by source in Items 15-22 of Table 6.

Please see Table 12 for a more detailed description of the assumptions and methods.

HISTORICAL COMPARISONS AND STATISTICAL SUMMARIES

Various statistical data on the System is shown in the tables contained in Section I. In addition, Tables 7 through 10 of Section H contain certain actuarial trend information which may be of interest.

Table 7 relates the size of the unfunded actuarial accrued liability (UAAL) to three different measurements. In Columns 3 and 4 the UAAL is related to the covered payroll of the System. Columns 5 and 6 relate the UAAL to the actuarial value of assets, while Columns 7 and 8 relate the UAAL to the total actuarial liabilities of the System.

Tables 8 through 10 provide information which should be included in your annual report. Table 8 provides a schedule of active member valuation data. Table 9 provides a schedule of retirees and beneficiaries added to and removed from payment rolls. Solvency test results are presented in Table 10.

SUMMARY AND CLOSING COMMENTS

It is our opinion that the results of this valuation provide a reasonable reflection of the funded status of the System. The System's contributions are currently sufficient to amortize the unfunded liability of the System.

As previously mentioned, in 2010 the City of Austin adopted an Amended Supplemental Funding Plan (ASFP) which provides for an additional contribution from the City, above the 8.0% base rate, which has resulted in a gradual increase the City's total contribution rate to the System to 18.0%. This additional contribution is intended to remain in place until the ASFP is either amended or repealed.

The overall funded position of the System decreased from 68.0% at the prior valuation to 67.5% at this valuation. Using an open group projection, we have determined that the System is expected to be fully funded in 31 years, assuming all valuation assumptions are realized in the future. The decrease in the funding period is primarily due to an increase in active membership and the corresponding increase in covered payroll. Because the payroll base is larger, we are now expecting larger future contributions towards the unfunded liability than in the prior year. Of course these projections could change with the addition of any unfunded liabilities (such as cost of living adjustments) or if there is a significant downturn in the financial markets.

STATEMENT OF ACTUARIAL METHODS AND ASSUMPTIONS
(Effective as of December 31, 2016)

The most recent experience study was completed in conjunction with the December 31, 2015 actuarial valuation. Please see our Experience Study report dated May 2016 to see more detail of the rationale for the current assumptions. As authorized under Article 6243n of the Vernon's Civil Statutes of the State of Texas, actuarial assumptions and methods are set by the Board of Trustees, based upon recommendations made by the plan's actuary.

A. ACTUARIAL ASSUMPTIONS

1. Investment Return Rate (adopted effective December 31, 2015)

7.50% per annum, compounded annually, composed of an assumed inflation rate of 2.75% and a real rate of return of 4.75%, net of investment expenses.

2. Mortality

a. Nondisabled annuitants (adopted effective December 31, 2015)

Healthy retirees and beneficiaries – The RP-2014 Combined Healthy Mortality Tables with Blue Collar Adjustments. Generational mortality improvements in accordance with Scale BB from the table's base year of 2014 (see Item 21 for further discussion of mortality improvement).

b. Disabled annuitants (adopted effective December 31, 2015)

Disabled annuitants – The RP-2014 Combined Healthy Mortality Tables with Blue Collar Adjustments, set forward three years. Generational mortality improvements in accordance with Scale BB from the table's base year of 2014; minimum 3% rate of mortality at all ages (see Item 21 for further discussion of mortality improvement).

c. Active members (adopted effective December 31, 2015)

Active employees – The RP-2014 Employee Mortality Tables with Blue Collar Adjustments. Generational mortality improvements in accordance with Scale BB from the table's base year of 2014 (see Item 21 for further discussion).

STATEMENT OF ACTUARIAL METHODS AND ASSUMPTIONS
(EFFECTIVE AS OF December 31, 2016)
(Continued)

3. Retirement Rates: (adopted effective December 31, 2015)
The following rates of retirement are assumed for members eligible for normal retirement.

<u>Age</u>	<u>Rates of Retirement</u>	
	<u>Males</u>	<u>Females</u>
44 & under	22.0%	25.0%
45	22.0%	23.0%
46	22.0%	23.0%
47	22.0%	23.0%
48	22.0%	23.0%
49	22.0%	23.0%
50	22.0%	26.0%
51	22.0%	26.0%
52	22.0%	26.0%
53	22.0%	26.0%
54	22.0%	26.0%
55	22.0%	26.0%
56	22.0%	26.0%
57	22.0%	26.0%
58	22.0%	26.0%
59	22.0%	26.0%
60	22.0%	21.0%
61	22.0%	21.0%
62	27.0%	24.0%
63	22.0%	21.0%
64	22.0%	21.0%
65	22.0%	24.0%
66	30.0%	24.0%
67	30.0%	24.0%
68	22.0%	21.0%
69	22.0%	21.0%
70	22.0%	20.0%
71	22.0%	20.0%
72	22.0%	20.0%
73	22.0%	20.0%
74 & older	100.0%	100.0%

Group B members are assumed to retire at twice the applicable rate upon the first year they attain eligibility for normal retirement. Early retirement rates (of 1% at age 55 increasing by 1% every two years to 5% at ages 63 and 64) apply for Group B members.

STATEMENT OF ACTUARIAL METHODS AND ASSUMPTIONS
(EFFECTIVE AS OF December 31, 2016)
(Continued)

4. Rates of Decrement Due to Withdrawal (adopted effective December 31, 2015)

Rates of withdrawal are comprised of a select period for the first 3 years of employment and ultimate rates based on years of service from retirement after the end of the select period. The following rates during the select period apply at all ages during the applicable year of employment:

<u>Years of Employment</u>	<u>Males</u>	<u>Females</u>
1	0.125	0.175
2	0.115	0.160
3	0.090	0.140

STATEMENT OF ACTUARIAL METHODS AND ASSUMPTIONS
(EFFECTIVE AS OF December 31, 2016)
(Continued)

After the select period ends, rates of withdrawal are based on the number of years from retirement. The rates are shown below for males and females

<u>Years from Eligibility for Unreduced Retirement</u>	<u>Rates of Withdrawal After Select Period</u>	
	<u>Males</u>	<u>Females</u>
1	0.0090	0.0086
2	0.0122	0.0160

30	0.0470	0.0650
31+	0.0500	0.0700

STATEMENT OF ACTUARIAL METHODS AND ASSUMPTIONS
(EFFECTIVE AS OF December 31, 2016)
(Continued)

5. Disability Rates* (adopted effective December 31, 2015)

Sample rates are shown below:

<u>Age</u>	<u>Rates of Decrement Due to Disability Males and Females</u>
20	0.000004
25	0.000025
30	0.000099
35	0.000259
40	0.000494
45	0.000804
50	0.001188
55	0.001647
60	0.002180

* Rates are for disability due to all causes, occupational disability rates are assumed to be 10% of all causes.

6. Rates of Salary Increase (adopted effective December 31, 2015)

<u>Years of Service</u>	<u>Promotional Rate of Increase</u>	<u>Total Annual Rate of Increase Including 2.75% Inflation Component and 1.25% Productivity Component</u>
1 – 7	2.25%	6.25%
8	2.00%	6.00%
9	1.50%	5.50%
10	1.25%	5.25%
11 - 15	1.00%	5.00%
16 - 19	0.75%	4.75%
20 or more	0.00%	4.00%

7. DROP Participation: (adopted effective December 31, 2015)

It was assumed that 20% of retiring active members with at least 20 years of service would elect a "Backward" DROP. It is assumed that all members who Back Drop will elect to DROP back to the date that would provide the greatest actuarial value to the member.

STATEMENT OF ACTUARIAL METHODS AND ASSUMPTIONS
(EFFECTIVE AS OF December 31, 2016)
(Continued)

8. Married Percentage: (adopted effective December 31, 1997)
100% of the active members are assumed to be married.
9. There will be no recoveries once disabled: (adopted effective December 31, 1997)
10. Spousal Age Difference: (adopted effective December 31, 2012)
Males are assumed to be three years older than their spouses.
11. Normal Form of Payment: (adopted effective December 31, 1997)
It is assumed that all retiring members will elect the Life only form of payment with a guaranteed return of accumulated employee contributions.
12. Crediting Rate on Employee Contributions: (adopted effective December 31, 2002)
It is assumed that the interest credit rate on employee contributions will be 6.0%.
13. Individual salaries used to project benefits: (adopted effective December 31, 1997)
Rates of pay as of the valuation date are reported for all employees.
14. Pay increase timing: (adopted effective December 31, 1997)
Middle of calendar year.
15. Decrement timing: (adopted effective December 31, 1997)
Decrements of all types are assumed to occur mid-year.
16. Eligibility testing: (adopted effective December 31, 2002)
Eligibility for benefits is determined based upon the age nearest birthday and service nearest whole year on the date the decrement is assumed to occur.

STATEMENT OF ACTUARIAL METHODS AND ASSUMPTIONS
(EFFECTIVE AS OF December 31, 2016)
(Continued)

17. Decrement relativity: (adopted effective December 31, 2002)

Decrement rates are used directly from the experience study, without adjustment for multiple decrement table effects.

18. Incidence of Contributions: (adopted effective December 31, 2002)

Contributions are assumed to be received continuously throughout the year based upon the computed percent of payroll shown in this report, and the actual payroll payable at the time contributions are made.

19. Benefit Service: (adopted December 31, 1997)

All members are assumed to accrue one year of eligibility service each year.

20. Mortality Improvement:

The base mortality tables are anchored at the year 2014. To account for future mortality improvement, the base mortality rates shown in Item 2 are projected forward using scale BB for all future years.

21. Service Purchases (military, permissive, and sick leave conversion):

No service purchases of any type are assumed. Any gains or losses due to these purchases are recognized in the valuation following the purchase.

ACTUARIAL VALUE OF ASSETS

The actuarial value of assets is equal to the market value of assets less a five-year phase in of the Excess (Shortfall) between expected investment return and actual income. The expected investment return each year is calculated based on the actuarial value of assets with the difference from actual income smoothed in over five years in 20% increments. If the current year's difference is opposite sign of the prior years' deferred Excesses/(Shortfalls), then the prior years' bases (starting with the oldest) are reduced dollar for dollar along with the current year's base. Any remaining bases are then recognized over five years (20% per year) from their initial creation.

If the resulting preliminary asset value is less than 80% or more than 120% of the market value of assets, then 1/3 of the amount outside of the 80%-120% corridor is recognized in the final actuarial value of assets.

STATEMENT OF ACTUARIAL METHODS AND ASSUMPTIONS
(EFFECTIVE AS OF December 31, 2016)
(Continued)

B. ACTUARIAL FUNDING METHOD

The actuarial accrued liability is determined using the Entry Age Normal actuarial cost method. This method assigns the System's total actuarial present value of future benefits to various periods. The actuarial accrued liability is assigned to years prior to the valuation and the normal cost is assigned to the year following the valuation. The remaining costs are assigned to future years.

The normal cost is determined on an individual basis using the Individual Entry Age Normal Cost method. The actuarial accrued liability is the difference between the total present value of future benefits and the actuarial present value of future normal costs where future normal costs are based on the benefit provisions that are applicable to each individual member. The unfunded actuarial accrued liability is the excess of the actuarial accrued liability over the actuarial value of assets.

C. FUNDING PERIOD

The funding period is determined using an open group projection. In the open group projection, the demographic assumptions are applied to the current active employees and any employees that are assumed to leave employment are replaced one for one with a new employee. Over time this results in the change of the employee group from mostly Group A members to Group B members. The projection is built to assume no gains or losses on the actuarial accrued liability or the actuarial value of assets. The funding period is the length of time it takes in the open group projection for the actuarial value of assets to exceed the actuarial accrued liability.

In the projection, new members' pay are assumed to increase at 4.00% year over year (i.e. a new employee in 2015 is assumed to be hired at a salary that is 4.00% greater than a new employee hired in 2014. The 4.00% growth rate is equal to our wage inflation assumption of 4.00% (ultimate salary increase assumption showing in Item A.6.)

D. CHANGES IN ASSUMPTIONS AND METHODS

No changes in the actuarial assumptions and methods since the prior valuation.

**SUMMARY OF BENEFIT PROVISIONS
OF THE RETIREMENT PLAN AS OF DECEMBER 31, 2016**

A. EFFECTIVE DATE

January 1, 1941.

B. ELIGIBILITY AND PARTICIPATION

Any regular and permanent employee of the City of Austin, excluding all civil service commissioned police officers and firefighters, the Mayor and members of the City Council and all part-time employees who work less than 75 percent of a normal work week.

Members originally hired prior to January 1, 2012 are classified as Group A members and members hired on or after January 1, 2012 are classified as Group B members.

Unless noted otherwise, the provisions for Group A and Group B are the same.

C. MEMBERSHIP SERVICE

The period of time during which an eligible employee pays into and keeps on deposit the contribution prescribed to be paid by the employee into the System.

D. AVERAGE FINAL COMPENSATION

The average of the monthly compensation for the 36 calendar months of highest compensation during the last 120 months prior to termination. The monthly compensation used in the determination of benefits cannot exceed the compensation limits of Internal Revenue Code §401(a)(17) for the applicable period. The limit for 2017 is up to \$22,500 for persons who first become members after 1995 (members hired prior to 1996 have no limit on their compensation).

E. CITY AND MEMBER CONTRIBUTION RATES

The City currently contributes a base rate of 8.00% of pay for each active member. Under the Amended Supplemental Funding Plan, the City is providing an additional contribution for each active member. Beginning October 1, 2012, this additional contribution became 10% of pay, for a total city contribution of 18%. Each active member contributes 8.00% of pay. These employee contributions are made under a pre-tax 401(h) pick-up arrangement.

**SUMMARY OF BENEFIT PROVISIONS
OF THE RETIREMENT PLAN AS OF DECEMBER 31, 2016
(Continued)**

F. RETIREMENT BENEFITS

1. Normal Retirement

a. Eligibility:

Group A – A participant may retire upon attaining age 62, or any age with 23 years of service, or attaining age 55 with 20 years of service.

Group B – A participant may retire upon attaining age 62 with 30 years of service, or at age 65 with 5 years of service.

b. Monthly Benefit:

Group A – 3.00% of average final compensation times years of service.

Group B – 2.50% of average final compensation times years of service.

- c. Payment Form: Benefits are paid as a monthly life annuity to the participant, with a provision that should the participant die prior to receiving monthly payments whose sum is greater than or equal to the participant's accumulated employee contributions, then the participant's beneficiary shall receive a lump-sum equal to the excess of the participant's accumulated employee contributions with interest over the sum of the monthly payments received.

d. Optional Forms of Payment:

- i) Joint and contingent annuity with either 100%, 66 2/3%, or 50% of the reduced retirement income payable for the life of the contingent annuitant upon the death of the retiring participant, with the provision that, should the contingent annuitant predecease the participant, the monthly annuity will revert to the amount that would have been payable under the normal form of payment,
- ii) Joint and 66 2/3% last survivor provides a reduced retirement income payable as long as both the member and the joint annuitant are alive, and upon the death of either the member or the joint annuitant, the benefit reduces to 2/3 of such amount for the remainder of the life of the last survivor,

**SUMMARY OF BENEFIT PROVISIONS
OF THE RETIREMENT PLAN AS OF DECEMBER 31, 2016
(Continued)**

- iii) Period certain and life annuity with 15 years of payments guaranteed, or
- e. Deferred Retirement Option Program (DROP): A member may elect to retroactively participate in the System's DROP (i.e. a Backward DROP). The member would receive a lump-sum payment equal to 90% of the sum of the monthly annuities the participant would have received if the member had retired at the DROP entry date. No COLAs are included but changes in the benefit multiplier are reflected. The maximum period a member may retroactively elect under the DROP is 60 months.
2. Early Retirement:
- a. Eligibility:
- Group A – Currently there are no reduced retirement benefits under the plan.
- Group B – A participant may retire with a reduced benefit upon attaining age 55 with 10 years of service.
- b. Monthly Benefit:
- Group A – Not applicable.
- Group B – the same formula benefit as determined under normal retirement multiplied by an actuarial equivalent early retirement reduction factor.

G. DISABILITY RETIREMENT

1. Eligibility: If the employee is terminated by reason of a total and permanent disability which prevents the employee from engaging in any employment duties. If the employee has less than five years of service, the disability must be job related.
2. Monthly Benefit: Same as Normal Retirement benefit using pay and service at date of disability.
3. Form of Payment: The normal form of payment that is available to a member taking normal retirement and the optional forms of payments described in F.1.d.i) and F.1.d.ii) above.

**SUMMARY OF BENEFIT PROVISIONS
OF THE RETIREMENT PLAN AS OF DECEMBER 31, 2016
(Continued)**

H. VESTING OF BENEFITS

1. Vesting

An employee is vested according to the following schedule:

<u>Years of Vesting Service</u>	<u>Vested Percentage</u>
Less than 5	0%
5 or more	100%

Benefits Upon Vesting

A vested participant is entitled to the retirement benefit payable at normal retirement earned to the date of participant's termination multiplied by his/her vested percentage, or a refund of the employee's accumulated employee contributions with interest.

I. DEATH IN SERVICE

1. **Eligibility:** All active members.
2. **Benefit:** The amount of the benefit payable to the beneficiary is:

- a. Employee eligible for retirement at date of death:

The surviving spouse if any may elect to receive an annuity equal to the monthly benefit as if the member had retired under any retirement option that would have been available to the member at the end of the month in which the member died. If there is no surviving spouse, then the beneficiary may elect to receive a 15 years certain and life annuity. The surviving spouse or beneficiary instead of electing the annuity may elect to receive a death benefit equal to twice the member's accumulated employee contributions with interest.

- b. Employee not eligible for retirement at date of death:

A refund of the member's accumulated deposits (with interest) plus a death benefit from COA ERS equal to the member's accumulated deposits (with interest), but excluding any purchases for Non-contributory time, prior military service purchases, or Supplementary Service Credit.

**SUMMARY OF BENEFIT PROVISIONS
OF THE RETIREMENT PLAN AS OF DECEMBER 31, 2016
(Continued)**

J. RETIREE LUMP-SUM DEATH BENEFIT

Upon death of a retired member, a \$10,000 lump-sum death benefit is payable. This benefit is also payable upon the death of an active member eligible for retirement whose surviving spouse or beneficiary elects to receive an annuity.

K. COST-OF-LIVING ADJUSTMENT (COLA)

On January 1 of each year the Board may approve a cost-of-living adjustment for those retirees who retired on or before December 31 of the previous year. The maximum adjustment which can be approved is 6%. The amount of the adjustment is set by the Board upon recommendation by the System's actuary that such an adjustment will not make the Fund financially unsound, and the adjustment is not inconsistent with the Code. The adjustment is prorated for any benefit which has been in effect for less than a year, with the proration being 1/12 for each monthly payment received during the prior year.

L. LUMP-SUM ADDITIONAL BENEFIT PAYMENT

Once each year the Board may approve a lump-sum additional benefit payment to be paid to those members and beneficiaries currently in payment status. The additional payment would be equal to a percentage of the member's monthly annuity with a maximum percentage of 100%.

M. LEGISLATED PLAN CHANGES ENACTED BY 1995 LEGISLATURE

1. 2.3% Multiplier

The benefit multiplier was increased from 2.2% per year of service to 2.3% per year of service effective October 1995.

2. 2.3% Retiree Gross-up

Effective October 1995, current retirees received an increase in their benefit amount to bring their retirement benefit amount up to what it would be currently if they had retired under the 2.3% multiplier.

**SUMMARY OF BENEFIT PROVISIONS
OF THE RETIREMENT PLAN AS OF DECEMBER 31, 2016
(Continued)**

3. \$10,000 Retiree Lump-Sum Death Benefit

The lump-sum death benefit payable upon the death of a retiree was increased from \$2,000 to \$10,000.

4. Plan Participation Begins at Date of Hire

The six-month service requirement for participation was eliminated. Current active members were granted service for the period between their date of hire and their date of participation, up to six months.

N. LEGISLATED PLAN CHANGES ENACTED BY 1997 LEGISLATURE

1. 2.6% Multiplier

The benefit multiplier was increased from 2.3% per year of service to 2.6% per year of service effective October 1997.

2. 2.6% Retiree Gross-up

Effective October 1997, current retirees received an increase in their benefit amount to bring their retirement benefit amount up to what it would be currently if they had retired under the 2.6% multiplier.

3. Military Service Purchase

Increased the number of months of military service that may be purchased from 24 to 48.

4. Noncontributory Service Purchase

Allowed an employee to purchase noncontributory service for the following periods of time: (1) while employee was on workers' compensation leave, (2) while employee was on an authorized leave of absence, and (3) while employee performed service for the employer in a position for which the service was not otherwise creditable. The employee pays the full actuarial cost of the service purchase.

**SUMMARY OF BENEFIT PROVISIONS
OF THE RETIREMENT PLAN AS OF DECEMBER 31, 2016
(Continued)**

5. Employer Purchase of Creditable Service

Allowed the employer to purchase the amount of service required to qualify an employee for an unreduced retirement benefit at age 55. To be eligible for the purchase, the employee must never have been a highly compensated employee within the meaning of IRC Section 414(q). The cost of the service purchase is the full actuarial cost of both the benefit and the retirement eligibility.

O. LEGISLATED PLAN CHANGES ENACTED BY 1999 LEGISLATURE

1. 2.7% Multiplier

The benefit multiplier was increased from 2.6% per year of service to 2.7% per year of service effective October 1999.

2. 2.7% Retiree Gross-up

Effective October 1999, current retirees received an increase in their benefit amount to bring their retirement benefit amount up to what it would be currently if they had retired under the 2.7% multiplier.

3. 23 & Out Provision

The service requirement at which a participant may retire with an unreduced retirement benefit was decreased from 25 years of Creditable Service to 23 years of Creditable Service.

4. Pop-Up Provisions for Certain Joint and Survivor Payment Options

Certain optional forms of payment which extend coverage to a joint annuitant (Options I, II, and III) were amended so that, should the contingent annuitant predecease the participant, the monthly annuity will revert to the amount that would have been payable under the normal form of payment.

5. LUMP-SUM ADDITIONAL BENEFIT PAYMENT

The Board was given the ability to make an additional payment to members and beneficiaries in payment status in the form of a lump-sum additional benefit payment. The additional payment would be a percentage of the current monthly payment with a maximum percentage of 100%.

**SUMMARY OF BENEFIT PROVISIONS
OF THE RETIREMENT PLAN AS OF DECEMBER 31, 2016
(Continued)**

6. EMPLOYER PURCHASE OF CREDITABLE SERVICE

Limitations on employer purchases of Creditable Service for a Member before actual retirement were removed.

P. BENEFIT ENHANCEMENTS ENACTED BY THE BOARD OF TRUSTEES IN 2000

1. "415 Restoration of Retirement Income Plan"

Certain highly compensated members may have their retirement annuity limited because of Section 415(b)(1) of the Internal Revenue Code. A plan amendment effective January 1, 2000, provides for COA ERS to pay a benefit payment that exceeds the maximum benefit limitation imposed by the Internal Revenue Code from a separate, non-qualified, pay-as-you-go "Restoration of Retirement Income Plan."

2. 2.98% Multiplier

The benefit multiplier was increased from 2.7% per year of service to 2.98% per year of service effective April 2000.

3. 2.98% Retiree Gross-up

Effective April 2000, current retirees received an increase in their benefit amount to bring their retirement benefit amount up to what it would be currently if they had retired under the 2.98% multiplier.

4. "Pop-up" Benefit Amendment

The "pop-up" benefit is extended to retirees who selected the actuarial equivalent of Life Annuity option with underlying options of I, II, or III.

Q. BENEFIT ENHANCEMENTS ENACTED BY THE BOARD OF TRUSTEES IN 2001

None

**SUMMARY OF BENEFIT PROVISIONS
OF THE RETIREMENT PLAN AS OF DECEMBER 31, 2016
(Continued)**

R. BENEFIT ENHANCEMENTS ENACTED BY THE BOARD OF TRUSTEES IN 2002

1. 3.00% Multiplier

Benefit multiplier was increased from 2.98% per year of service to 3.00% per year of service effective January 2002.

2. 3.00% Retiree Gross-up

Effective January 2002, current retirees received an increase in their benefit amount to bring their retirement benefit amount up to what it would be currently if they had retired under the 3.00% multiplier.

3. Deferred Retirement Option Program

A "Backward" DROP was added as an optional benefit effective in 2002. The retiring member may elect to retroactively participate in a DROP. The member would receive a lump-sum payment equal to 90% of the sum of the monthly annuities the participant would have received if the member had retired at the DROP entry date. No COLAs are included but changes in the benefit multiplier are reflected.

4. Purchase of Permissive Time

A member may purchase up to five years of Permissive Time. The purchase price charged to the member is the anticipated actuarial cost to the System for the additional service. Minimum purchase is one month with a maximum of 60 months (5 years) or the number of months needed to reach first eligibility for retirement whichever is less.

5. Conversion of Unused Sick Leave

At retirement an employee may elect to purchase Creditable Service for unused sick leave. The Board requires payment by the Member, and then by the City of the equivalent amount of retirement contributions that would have been made had the sick hours been exercised as sick hours. An employee must already be eligible for retirement to purchase the service.

**SUMMARY OF BENEFIT PROVISIONS
OF THE RETIREMENT PLAN AS OF DECEMBER 31, 2016
(Continued)**

S. BENEFIT ENHANCEMENTS ENACTED BY THE BOARD OF TRUSTEES IN 2003

1. “Pop-up” Benefit Amendment

“Pop-up” benefit was extended to any Joint and Survivor option (including level income options), other than Joint and Last Survivor.

2. Permissive Time Amendment

Permissive Time resolution was amended removing the provision that restricts members from purchasing Permissive Time in excess of the amount needed to reach first retirement eligibility.

AA. LEGISLATED PLAN CHANGES ENACTED BY THE 2011 LEGISLATURE

1. Retirement Provisions

For members hired on after January 1, 2012 (Group B members), changed the eligibility for normal retirement to age 65 with 5 years of service, or age 62 with 30 years of service. Also for members hired on or after January 1, 2012, added an eligibility for early retirement upon age 55 with 10 years of service.

2. Benefit Multiplier

For members hired on after January 1, 2012, the benefit multiplier was changed to 2.5% per year of service. Early retirement benefits would be reduced on an actuarially equivalent basis.

DEFINITION OF TERMS**1. *Actuarial Cost Method***

A method for determining the actuarial present value of future benefits and allocating such value to time periods in the form of a normal cost and an actuarial accrued liability.

2. *Present Value of Future Benefits*

This is computed by projecting the total future benefit cash flow from the System, using actuarial assumptions, and then discounting the cash flow to the valuation date.

3. *Normal Cost*

Computed differently under different actuarial cost methods, the normal cost generally represents the value of the portion of the participant's anticipated retirement, termination, and/or death and disability benefits accrued during a year.

4. *Actuarial Accrued Liability*

Computed differently under different actuarial cost methods. Generally actuarial accrued liability represents the value of the portion of the participant's anticipated retirement, termination, and/or death and disability benefits accrued as of the valuation date.

5. *Entry Age Actuarial Cost Method*

A method under which a participant's actuarial present value of future benefits is allocated on a level basis over the earnings of the participant between his/her entry into the System and his/her assumed exit.

6. *Unfunded Actuarial Accrued Liability*

The difference between total actuarial present value of future benefits over the sum of the tangible assets of the System and the actuarial present value of the members' future normal costs. The System is underfunded if the difference is positive and overfunded if the difference is negative.

7. *Actuarial Value of Assets*

The value of cash, investments, and other property belonging to the System, as valued by the actuary for purposes of the actuarial valuation.

DEFINITION OF TERMS
(Continued)**8. Actuarial Gain or Loss**

From one valuation to the next, if the experience of the plan differs from that anticipated by the actuarial assumptions, an actuarial gain or loss occurs. For example, an actuarial gain would occur if the assets in the trust had a yield of 12% based on actuarial value, while the assumed yield on the actuarial value of assets was 7.50%.

Notes:

^a Type of Retirement

1. Normal retirement for age and service
2. Beneficiary payment, normal retirement or death in service
3. Disability retirement
4. QDRO - alternate payee

^b Option Selected:

Unmodified Plan: life annuity

The following options reduce the retired member's monthly benefit:

- Option 1 - Beneficiary receives 100 percent of member's reduced monthly benefit
- Option 2 - Beneficiary receives 50 percent of member's reduced monthly benefit
- Option 3 - Beneficiary receives 66-2/3 percent of member's reduced monthly benefit
- Option 4 - Survivor receives 66-2/3 percent of member's reduced monthly benefit upon first death
- Option 5 - Level income option payable for life of retiree
- Option 6 - Level income option, beneficiary receives 66-2/3 percent of member's monthly benefit
- Option 7 - Life annuity with 15 years guaranteed
- Option 8 - Other participant created actuarial equivalent forms of payment
- Option 9 - Level income option, beneficiary receives 100 percent of member's monthly benefit

*The number of Retired Members and the number of options selected are not equal due to the inclusion of 981 deferred vested members in the Unmodified option selection.

SCHEDULE OF PARTICIPATING EMPLOYERS

The City of Austin and the City of Austin Employees' Retirement System are the only participating employers in the plan.

^a In 1969, the adjustment was 1.5% prorated for 4 months, 4/12 x 1.5% or .05%.

^b Includes City of Austin subsidy payment, effective at beginning of their fiscal year, October 1, pursuant to Supplemental Funding Plan.

^c Increased to 14.00% effective October 1, 2010; increased to 16.00% effective October 1, 2011; increased to 18.00% effective October 1, 2012 and thereafter; pursuant to Amended Supplemental Funding Plan.

^d The multiplier was set at 2.50% for those hired on and after January 1, 2012. The multiplier remained at 3.00% for those hired before January 1, 2012.

Notes: The System was a money purchase plan until 1962 when a formula for computing benefits was introduced with a multiplier of 1.125%. Special adjustments based on years of retirement granted by City Council in 1985 and 1990 are not reflected in table.
