**Texas County & District Retirement System** 

# **Comprehensive Annual Financial Report**

For the years ended December 31, 2017 & 2016

# We are proud to serve those who serve Texas

That's why we're committed to keeping our retirement system strong.

In August 2017, Hurricane Harvey slammed into the Texas coast as a Category 4 storm. Sustained winds of 130 miles an hour caused severe

damage to many communities in South Texas. Record-shattering rain inundated Harris and its surrounding counties as the storm stalled over the area for four days.

This photo of Harris County Deputy Sheriff Rick Johnson carrying two small children from their flooded home circled the globe on social media. It became representative of the many heroic acts during Hurricane Harvey. He and so many other county and district employees were among the thousands of Texans who stepped up to help those in need during the storm.

Deputy Johnson is just one of our more than 294,000 TCDRS members and retirees. They work in our parks and our ports, in rural towns and urban areas. They are nurses, mechanics, road crew workers, sheriffs, attorneys, office workers, jailers and judges. The one thing they have in common: their jobs make their communities better every day, rain or shine.

## PARTICIPATING EMPLOYERS

Since 1967, the system has grown to include 760 counties and districts.

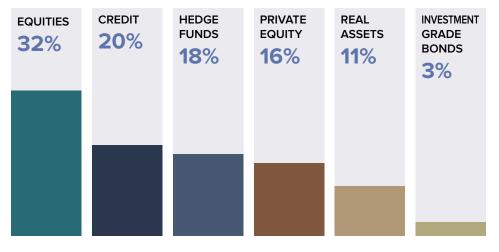

as of Dec. 31, 2017

Avg. Age at Retirement Avg. Years of Service A 61 18

Avg. Annual Benefit **\$22,764** 

# Investing for the Long Term

#### ASSET ALLOCATION TARGETS

# Funding Plans Responsibly

## AVERAGE REQUIRED EMPLOYER CONTRIBUTION RATES

Investment earnings fund nearly 80¢ of every dollar of benefits. Employers must pay 100% of their required contributions every year. Each plan is funded independently by a county or district and its employees. Our conservative funding methods ensure any debt is paid down to zero within 20 years. This means money is there when needed and debt is not pushed to future generations.

#### BENEFIT FUNDING (Estimated)

89% 100% 80% 60% 40% 20% 2013 2014 2015 2016 2017

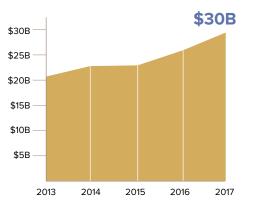

FUNDED RATIO

## FIDUCIARY NET POSITION

Fiduciary net position totaled \$30 billion. Broad diversity in our investment portfolio reduces possible overall losses due to negative experience in any single asset class or investment.

# **294,000** MEMBERS

Our more than 294,000 members save for retirement along with their employers. A percentage of each employee's paycheck is deposited in their TCDRS account every month. This, along with the 7% compound interest those deposits earn, helps employee accounts grow.

# Introductory

The Certificate of Achievement for Excellence in **Financial Reporting** was presented by the **Government Finance** Officers Association of the United States and Canada for the fiscal year ended Dec. 31, 2016. This was the 25th consecutive year that TCDRS has received this prestigious award, which recognizes comprehensive annual financial reports that have achieved the highest standards in government accounting and reporting.

Public Pension Coordinating Council

Public Pension Standards Award For Funding and Administration 2017

Presented to

#### Texas County & District Retirement System

In recognition of meeting professional standards for plan funding and administration as set forth in the Public Pension Standards.

Presented by the Public Pension Coordinating Council, a confederation of

National Association of State Retirement Administrators (NASRA) National Conference on Public Employee Retirement Systems (NCPERS) National Council on Teacher Retirement (NCTR)

TCDRS was awarded the Public Pension Coordinating Council's Public Pension Standards award for the 15th consecutive year. This award is in recognition of meeting professional standards for plan funding and administration as set forth in the Public Pension Standards.

## LETTER OF TRANSMITTAL

June 5, 2018

### **TEXAS STRONG**

We are pleased to present the Comprehensive Annual Financial Report (CAFR) of the Texas County & District Retirement System (TCDRS) for the year ended Dec. 31, 2017.

In 2017, Hurricane Harvey, a Category 4 storm, impacted 60 counties across the state of Texas. Our members were the first responders. They were on the front lines providing vital services even as they themselves were affected by the storm. By coming together, our communities proved that we are Texas Strong. The work our members do every day to make Texas a better and safer place to live is why we at TCDRS are proud to serve our more than 294,000 members and why we are committed to maintaining a strong retirement system.

Since 1967, we have grown into a \$30 billion trust partnering with 760 counties and governmental districts to provide reliable retirement, disability and survivor benefits. Employers choose to provide a retirement benefit through TCDRS as part of their compensation plans so that they may recruit and retain qualified staff. The number of participating employers continues to grow and, for the 10-year period ended Dec. 31, 2017, has increased by 34%. Over the past decade our membership has risen by 49%.

The TCDRS Board of Trustees provides leadership for the system. Our nine-person board is appointed by the governor and confirmed by the Texas Senate. The board appoints an executive director, who is responsible for all day-to-day operations, and a chief investment officer, who manages investment operations.

#### WE DO RETIREMENT RIGHT

Our unique savings-based, cash-balance plan helps employers provide reliable benefits at a predictable cost. Members save for their own retirement over the length of their careers. At retirement, benefits are based on a member's final savings balance and employer matching. This plan design makes costs more predictable for employers and provides excellent portability for our members.

In 2017, we paid out \$1.4 billion in benefits to retirees and former members. Over 96% of these benefits went to Texas addresses where the income serves as an economic engine to our local economies. On average, our current retirees start their benefit payments at age 61 after working 18 years. The average annual benefit for current retirees is \$22,764 as of Dec. 31, 2017. The number of retirees has increased over the past decade by 85%.

#### **INVESTMENTS**

Because members and employers are saving in advance for retirement they are getting the maximum power of investment earnings over time. Investment earnings fund almost 80 cents for every benefit dollar our members receive.

TCDRS is a long-term investor with a fully diversified portfolio. The TCDRS Board of Trustees constructs the investment portfolio to achieve our long-term investment return goal of 8%. In 2017, the TCDRS portfolio returned 14.7%, net of all fees. Our 30-year return was 8.4% for the period ended Dec. 31, 2017. And, we have consistently exceeded our portfolio benchmark.

The board has adopted and periodically reviews an investment policy that defines and restricts

investment authority. The policy also emphasizes the importance of a long-term investment philosophy with minimization of risk.

## **MAJOR INITIATIVES**

This year we made great progress in our strategic initiatives, outlined in the TCDRS Strategic Plan 2017-2020. This progress includes:

- Strengthening our organizational responsiveness and infrastructure — In 2017 we finished implementing a multi-year project to replace our pension administration system. The final phase included all member-related financial transactions, benefit and payment calculations, benefit estimates and tax reporting. This project established a best-in-class technology platform so that TCDRS may continue to enhance services to our members and employers.
- Protecting sensitive information As the world becomes increasingly connected, with more information and services available online, it is essential that the sensitive data of members and employers remain protected. To ensure our assets are safeguarded we have developed and are implementing a comprehensive information security program. The accomplishments in 2017 included an incident response plan, a patch management plan and the implementation of security awareness training.
- Connecting anytime, anywhere TCDRS recognizes that today's membership desires to connect with TCDRS in a number of different ways and at their convenience. We are in the process of rolling out services, such as video counseling, that make it easier for members to receive education about their benefits.
- Helping members retire with confidence In addition to providing improved benefit information based on feedback from recent retirees, we introduced new online services, such as the ability to change withholding electronically.

## FUNDING

TCDRS is one of the best-funded retirement systems in the nation. As of Dec. 31, 2017, TCDRS was 89% funded in aggregate. The actuarial value of assets and actuarial liabilities totaled \$28.98 billion and \$32.54 billion, respectively. The net position for pension benefits at year end 2017 and 2016 was \$30.00 billion and \$26.29 billion, respectively, an increase of \$3.71 billion (14.1%). The system also maintains a reserves position to help keep rates stable and to offset future adverse experience. TCDRS is funded at 92% when the reserves are considered.

TCDRS does not receive funding from the State of Texas. Each plan is funded by our employers, members and investment earnings. TCDRS has one of the most conservative funding policies in the nation, ensuring that our employers fund their plans responsibly. By paying 100% of their required contribution rate every year, employers are paying for their current employees' future benefits and are paying down any unfunded liabilities within 20 years. The average amortization period of TCDRS plans is 12.3 years, one of the lowest in the state.

TCDRS employers have tools to help manage their risk of providing benefits. Over one-third of TCDRS' participating employers make additional contributions over the required amounts in order to prefund benefits or to build up reserves within their plan to mitigate any negative plan experience. Also, every year each employer has the ability to adjust benefits and costs prospectively based on local workforce needs and budgets. This flexibility and local control is unique among public pension plans.

Cash flow from deposits and contributions currently are slightly less than the amounts required to meet annual benefits paid to TCDRS retirees, member account withdrawals and the administrative expenses of the organization in 2017. The negative net cash flow is expected as the system has matured. Investment returns and changes in employer plans also affect annual cash flow and the change in net position.

To better understand TCDRS' financial strength, the recent history of net investment income, contributions and deposits, benefit payments and administrative costs is shown in the Statistical Section on page 81. Information on funding progress for all employers as a group is in the Actuarial Section, Table 6: Funding Progress, on page 69.

## LETTER OF TRANSMITTAL

## MANAGEMENT RESPONSIBILITY FOR FINANCIAL REPORTING

This report fulfills the requirements established by the Texas Government Code for public retirement systems to publish an annual financial report. TCDRS management is responsible for the accuracy of the data and the completeness and fairness of the presentation within this report.

The financial statements have been prepared in accordance with the principles of governmental accounting and reporting set forth by the Governmental Accounting Standards Board (GASB).

A comprehensive framework of internal controls exists to provide reasonable assurance regarding the safekeeping of assets and fair presentation of the financial statements and supporting schedules. Internal controls also provide reasonable, rather than absolute, assurance that the financial statements are free of any material misstatements. The concept of reasonable assurance recognizes that first, the cost of a control should not exceed the benefits likely to be derived; and second, the valuation of the cost and benefits requires estimates and judgments by management.

KPMG LLP, Certified Public Accountants, has issued an unmodified ("clean") opinion on TCDRS' financial statements for the year ended Dec. 31, 2017. The independent auditor's opinion is located at the front of the Financial Section of this report (see page 20). Immediately following the independent auditor's opinion, Management's Discussion and Analysis (MD&A) provides a narrative introduction, overview and analysis of the basic financial statements. The MD&A complements the Letter of Transmittal and should be read in conjunction with it.

#### AWARDS AND ACKNOWLEDGMENTS

TCDRS proudly accepted a Certificate of Achievement for Excellence in Financial Reporting from the Government Finance Officers Association of the United States and Canada (GFOA) for the fiscal year ended Dec. 31, 2016. This was the 25th consecutive year that the system achieved this prestigious award, which recognizes comprehensive annual financial reports that are readable and efficiently organized, and that satisfy accepted accounting principles and applicable legal requirements.

TCDRS was also awarded the Public Pension Coordinating Council's (PPCC) Public Pension Standards award for 2017, which is the 15th consecutive year that the system received this award in recognition of meeting professional standards for plan funding and administration.

### **SUMMARY**

TCDRS staff under the direction of the Board of Trustees worked together to produce this report. Our thanks go out to everyone who has contributed to the preparation of this report and who works to ensure that TCDRS remains strong for our participating employers and members.

Sincerely,

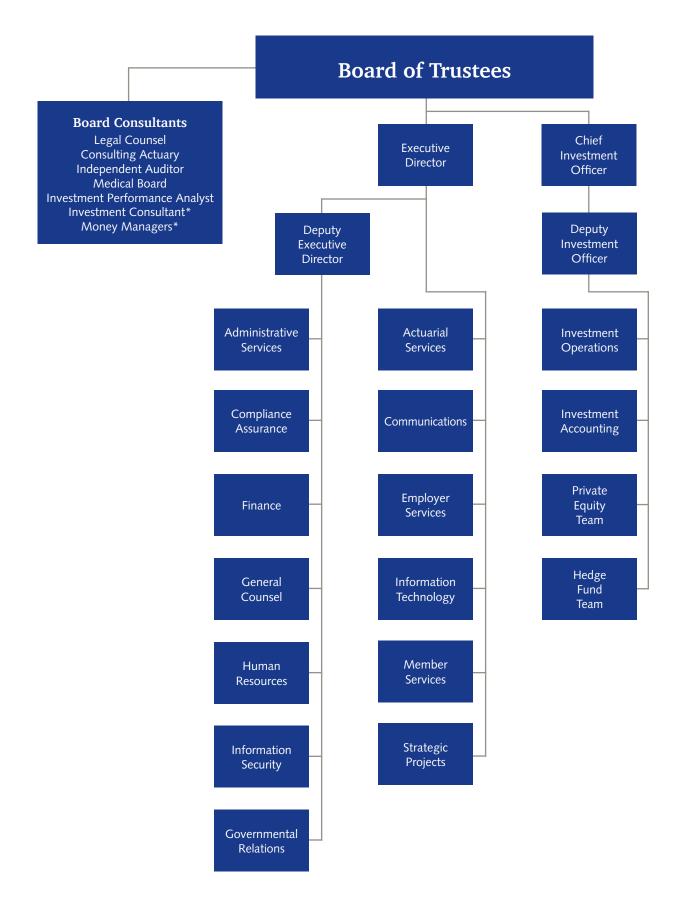

Robert A. Eckels Chair

Umy Beskop

Amy Bishop Executive Director

Paul J. Williams Chief Investment Officer

#### Independent Auditors' Report

The Board of Trustees Texas County & District Retirement System

We have audited the accompanying financial statements of the Texas County & District Retirement System (TCDRS), as of and for the years ended December 31, 2017 and 2016, which comprise the statements of fiduciary net position as of December 31, 2017 and 2016, and the related statements of changes in fiduciary net position for the years then ended, and the related notes to the financial statements, which collectively comprise TCDRS' basic financial statements as listed in the table of contents.

#### Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditors' Responsibility

Our responsibility is to express opinions on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the fiduciary net position of the Texas County & District Retirement System as of December 31, 2017 and 2016, and the changes in fiduciary net position for the years then ended in accordance with U.S. generally accepted accounting principles.

KPMG LLP is a Delaware limited liability partnership and the U.S. member firm of the KPMG network of independent member firms affiliated with KPMG International Cooperative ("KPMG International"), a Swiss entity.

#### **Other Matters**

#### Required Supplementary Information

U.S. generally accepted accounting principles require that the Management's Discussion and Analysis and Schedule of Money-Weighted Rates of Return on pages 22-25 and 45, respectively, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

#### Supplementary and Other Information

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The Introductory Section on pages 2-18, Other Supplementary Information – Changes in Fiduciary Net Position by Fund and Interfund Transfers, Changes in Endowment Fund, Changes in Income Fund, Administrative Revenues and Expenses, Investment Expenses, and Professional/Consultant Fees and Services on pages 46-52, the Investment Section on pages 53-62, the Actuarial Section on pages 63-78, and the Statistical Section on pages 79-90 are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The Other Supplementary Information – Changes in Fiduciary Net Position by Fund and Interfund Transfers, Changes in Endowment Fund, Changes in Income Fund, Administrative Revenues and Expenses, Investment Expenses, and Professional/Consultant Fees and Services is the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the Other Supplementary Information – Changes in Fiduciary Net Position by Fund and Interfund Transfers, Changes in Endowment Fund, Changes in Income Fund, Administrative Revenues and Expenses, Investment Expenses, and Professional/Consultant Fees and Services is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The Introductory, Investment, Actuarial, and Statistical Sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on it.

Austin, Texas June 5, 2018

## **INTRODUCTION**

This section provides an overview and analysis of the system's financial position and performance, focusing on the current year's results, changes in those results (including three-year trends), and other currently known information. Readers are encouraged to consider this information in conjunction with information provided in other areas of the Financial Section, as well as information presented in the Letter of Transmittal in the Introductory Section.

## **OVERVIEW OF THE FINANCIAL STATEMENTS**

The basic financial statements consist of the Statements of Fiduciary Net Position, Statements of Changes in Fiduciary Net Position and the Notes to the Financial Statements. Required Supplementary Information and Other Supplementary Information are also presented.

- The Statements of Fiduciary Net Position report the assets less liabilities and the resulting net position restricted for pension or insurance benefits at the end of 2017, compared to 2016.
- The Statements of Changes in Fiduciary Net Position report the transactions that occurred during 2017 and 2016 for which additions less deductions equal the net increase or decrease in fiduciary net position.
- Notes to the Financial Statements include additional information not readily evident in the statements themselves. The notes are considered essential to a full understanding of the information provided in the financial statements.
- Required Supplementary Information provides the money-weighted rate of return information.
- Other Supplementary Information provides detailed information, including activity by fund, administrative and investment expenses, and professional and consultant fees and services. These schedules support summary data presented in the basic financial statements.

TCDRS operates two trusts, both of which are accounted for as fiduciary funds. The Pension Trust Fund accounts for and provides retirement, disability and survivor benefits to the employees of participating employers. The Group Term Life Fund (GTLF or Group Term Life) provides a program of group term life insurance for the employees and, if covered, retirees of electing employers. No assets of the Pension Trust Fund may be used to pay any insurance benefit due from the GTLF, nor may assets of the GTLF be used to pay any benefit due from the Pension Trust Fund. Discussion and analysis is provided separately for each of the two trusts.

The Statements of Fiduciary Net Position and Statements of Changes in Fiduciary Net Position show financial information for both the Pension Trust Fund and the GTLF.

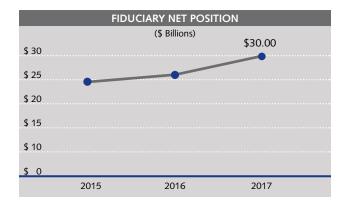

## FINANCIAL ANALYSIS: PENSION TRUST FUND

The Pension Trust Fund is comprised of six individual funds, each with a specific operational purpose. Note A in the Notes to the Financial Statements has additional information about each of these funds.

Summary information about fiduciary net position and the changes in fiduciary net position showing comparative detail for 2017, 2016 and 2015 is presented on page 23.

Net position (the amount that assets exceed liabilities) restricted for pensions at year end 2017 totaled \$30.00 billion. The 2016 amount was \$26.29 billion and for 2015 was \$24.53 billion. In 2017 and 2016 the fiduciary net position increased by \$3.71 billion and \$1.76 billion, respectively, while fiduciary net position decreased in 2015 by \$0.19 billion.

The increase in 2017 fiduciary net position was primarily due to a net investment gain of \$3.84 billion — a 14.7% overall return, net of all fees. Net investment results for 2017 consist of the

## **MANAGEMENT'S DISCUSSION AND ANALYSIS**

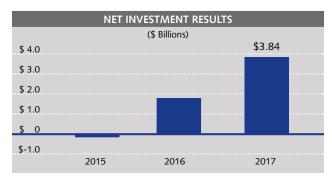

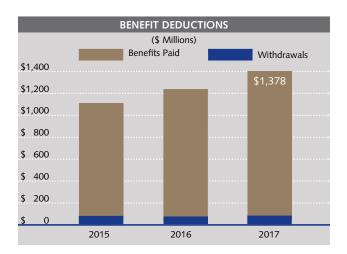

appreciation in fair value of investments of \$3.75 billion, plus \$126 million in interest and dividends, net income from securities-lending activity of \$2 million, less \$41 million of investment activity expenses. Net investment gain in 2016 was \$1.82 billion and the loss in 2015 was \$172 million.

Lack of volatility is the best overall description for markets in 2017. Strong growth across developed and emerging economies drove equities higher, while bond returns were driven primarily from yield. All asset classes recorded gains in 2017 except the master limited partnerships which experienced a single-digit decline. The results from investing activities for all asset classes, net of all fees, are presented on page 57.

Additions to fiduciary net position in 2017 also included \$453 million in employee deposits and \$824 million in employer contributions. Employee deposits increased \$20 million and employer contributions rose \$52 million over 2016 amounts. In 2016, employee deposits increased by \$18 million and employer contributions rose by \$29 million. Together, employee deposits and employer contributions increased during 2017 by 6.0% and in 2016 by 4.0% over the previous year's amounts, primarily due to growth in covered payroll.

Deductions for benefits paid and withdrawals for 2017 were \$1.38 billion, an 11.3% increase over the previous year. These deductions for 2016 were \$1.24 billion, a 7.9% increase over 2015, and in 2015, these deductions were \$1.15 billion, a 10.0% increase over 2014. Higher deductions in 2017 and 2016 were due to several factors, including increases in the number of retiree and beneficiary accounts in 2017 (a 6.1% increase) and in 2016 (a 6.4% increase) along with higher average benefits. Withdrawals increased in 2017 but decreased in 2016.

## OTHER CURRENTLY KNOWN INFORMATION: PENSION TRUST FUND

TCDRS' investment return for 2017 was 14.7% net of fees, matching its benchmark return.

## FINANCIAL ANALYSIS: GROUP TERM LIFE FUND (GTLF)

The GTLF provides an optional program of group term life insurance for the employees and, if covered, retirees of electing employers. An actuarial valuation is performed annually to determine employers' premium rates and to maintain adequate funding over the long term. Based on actuarial analysis, the amount of fiduciary net position is expected to be sufficient to cover any adverse experience that may occur.

Summary information about fiduciary net position and the changes in fiduciary net position showing comparative detail for 2017, 2016 and 2015 is presented on page 25.

The net position restricted for insurance benefits at year-end 2017 was \$36.1 million, an increase of \$2.5 million (7.4%) over the 2016 amount. The increase

is due to an interest allocation of \$2.4 million, along with a \$0.1 million increase in operating income (higher employer premiums than insurance benefits). For the year ended 2017, employer premiums declined \$0.5 million (10.0%), while insurance benefits rose \$1.2 million (39.1%) related to more active members having claims (up 50%) and their claims were for a higher average benefit (up 6%).

At year-end 2016, the net position restricted for insurance benefits was \$33.6 million, which was an increase of \$4.0 million (13.4%) over the 2015 amount. For the year ended 2016, employer premiums rose by \$0.2 million while insurance benefits declined by \$0.3 million.

## **REQUESTS FOR INFORMATION**

This annual report is designed to provide a general overview of TCDRS' finances. Questions concerning any of the information provided in this report or requests for additional information should be addressed to TCDRS, Finance Division, Barton Oaks Plaza IV, Ste. 500, 901 S. MoPac Expy., Austin, TX 78746.

## A: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

## **Reporting Entity**

The Texas County & District Retirement System (TCDRS or system) was created in 1967 by the Texas Legislature. The system partners with Texas counties and districts to provide their employees with retirement, disability and survivor benefits. TCDRS is governed by the Texas Legislature and overseen by an independent board of trustees, which is responsible for the administration of the system. TCDRS does not receive state funding. Each plan is funded independently by the county or district, its employees and by investment earnings.

The TCDRS Board of Trustees provides leadership for the system, which serves more than 294,000 TCDRS members and retirees. Our independent, nine-member board is comprised of system members and retirees appointed by the governor and confirmed by the Texas Senate. TCDRS trustees serve staggered six-year terms and have oversight of all system operations, including the annual budget, policy determination, legislative proposals and investment policy. The board appoints an executive director to manage the dayto-day operations of TCDRS and chief investment officer to manage TCDRS investments.

The financial statements of TCDRS have been prepared to conform to generally accepted accounting principles as prescribed by the Governmental Accounting Standards Board (GASB). The accompanying financial statements report the operations of TCDRS, which consists of two fiduciary funds: the Pension Trust Fund and the Group Term Life Fund (GTLF). The Pension Trust Fund is used to provide retirement, survivor, disability and withdrawal benefits and to pay the operating expenses of the system. The GTLF is used to operate a voluntary program of group term life insurance benefits.

## **New Accounting Pronouncements**

In February 2015, GASB issued Statement No. 72, *Fair Value Measurement and Application*, which expanded the disclosures related primarily to investments. The statement describes fair value as an exit price. It requires the use of valuation techniques that will provide sufficient information to measure fair value. The statement establishes a hierarchy of inputs to valuation techniques in order to measure fair value. The requirements of this statement were implemented in the 2016 CAFR.

In June 2015, the GASB issued Statements No. 74, Financial Reporting for Postemployment Benefits Other Than Pension Plans, and No. 75, Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions. Postemployment benefits other than pensions are known as "OPEB". The two new statements replace Statement No. 43, Financial Reporting for Postemployment Benefit Plans Other than Pension Plans, and Statement No. 45, Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions. The purpose of the two new OPEB statements is to ensure consistency with the accounting and financial reporting for pensions as promulgated by Statements 67 and 68. The requirements of Statement No. 74 are not applicable to TCDRS due to the fact that the TCDRS Group Term Life Fund is not an OPEB trust, since it covers both actives and retirees. The requirements of Statement No. 75 are implemented for employers participating in the Group Term Life Fund for fiscal years beginning after June 15, 2017, and who offer coverage to their retirees. GASB 75 information is sent directly to impacted employers and is not included in this CAFR.

## **Basis of Accounting**

The system's funds are maintained on the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when incurred, regardless of when payment is made. Employee deposits and employer contributions are recognized in the period the employer reports compensation for its employees pursuant to statutory requirements. Benefit payments are recognized when due and payable in accordance with the plans' terms.

The preparation of financial statements in accordance with accounting principles generally accepted in the United States requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

## NOTES TO THE FINANCIAL STATEMENTS

The system invests in a diversified portfolio of assets. Investments, in general, are exposed to various risks, such as interest rate, credit and market volatility. It is possible that changes in the values of investments will occur in the near term and that such changes could materially affect the amounts reported in the financial statements.

#### **Basis of Presentation**

TCDRS maintains separate funds and accounts in accordance with the TCDRS Act. This is done to help ensure observance of limitations and restrictions on the use of resources available to TCDRS.

In the Pension Trust Fund, the assets of all employer plans are pooled for investment purposes. However, each employer's plan is accounted for separately, so that each employer's assets are used only for the funding of its individual plan.

The costs of administering TCDRS are paid from investment earnings and general reserves of the pooled assets of all plans.

The TCDRS Act requires that all assets of the retirement system be credited to one of the following funds and accounts, according to the purpose for which they are held:

### **Employees Saving Fund**

The Employees Saving Fund (ESF) contains an account for each member. Each account is increased as a member makes deposits and earns interest. Accounts are reduced for payments due to withdrawals and benefit payments.

#### **Subdivision Accumulation Fund**

The Subdivision Accumulation Fund (SAF) receives employer contributions and contains an account for each participating employer to fund retirement benefits. An account is increased as an employer makes contributions. Annually, the board decides on the income allocation to each employer's account based on investment earnings and the employer's plan assets. Employer accounts increase if there is a positive allocation of earnings; accounts decrease if there is a negative allocation.

#### **Closed Subdivision Annuity Reserve Fund**

State legislation effective January 1, 2017 changed the fund accounting related to annuitants and renamed the Current Service Annuity Reserve Fund to the Closed Subdivision Annuity Reserve Fund (CSARF).

Prior to 2017, when a member retired, the member's account balance in the ESF plus an equal amount from the employer's SAF account was transferred to a system-wide fund called the Current Service Annuity Reserve Fund. This transfer funded a portion of the retiree's benefit. The remainder of the retiree's monthly benefit was paid from the employer's SAF account.

Effective Jan. 1, 2017, each employer received a percentage of the total Jan. 1, 2017 Current Service Annuity Reserve Fund balance. This percentage was based on the fund's liabilities related to annuitants of each actively participating employer divided by the total fund's liabilities for all actively participating employers.

Effective 2017, at retirement there are no longer transfers of funds to the CSARF at retirement except for retirees of terminated plans. The member's account balance in the ESF is transferred to the employer's SAF at retirement. All monthly benefit payments for each employer's annuitants are now paid from that employer's SAF account.

The renamed Closed Subdivision Annuity Reserve Fund is used to pay benefits to retirees of terminated plans. When a member retires from an employer that is terminated, amounts are transferred from the member's account to the CSARF to fund the member's retirement annuity.

#### **Endowment Fund**

The Endowment Fund contains accounts that hold the general reserves of the system, inactive accounts from the ESF and reserves to transfer to the Expense Fund for subsequent year operating expenses. Refer to the schedule of Changes in Endowment Fund on page 48.

General reserves are maintained in the Endowment Fund and have been used to keep rates stable and to help offset future adverse experience. The Endowment Fund may increase or decrease based on allocation decisions to or from the general reserves by the board of trustees.

## Income Fund

All investment income is credited to the Income Fund. It accounts for investment earnings and expenses, and annual allocations to other funds. The fund is reduced by investment expenses and by the statutory allocation of interest to the ESF, CSARF and GTLF. In addition, the board makes an allocation to the SAF.

If any excess exists after all allocations are made, the remainder is transferred to the Endowment Fund. Refer to the Changes in Income Fund schedule on page 49 for additional information.

## **Expense Fund**

TCDRS pays administrative and investment operating expenses from this fund. As mentioned in the Endowment Fund and the Income Fund, operating expenses are financed from general reserves at the beginning of the year, and the Income Fund finances the investment expenses by reimbursing the Expense Fund.

The Group Term Life Fund reports the net position available to pay insurance benefits for covered participants. Premiums paid by employers and an annual allocation are added to the fund, while insurance benefits are paid from the fund.

## Investments

Investments consist of a diversified portfolio, including equities, hedge funds, high-yield investments, private equity, real assets and investment-grade bonds along with cash and cash equivalents. The portfolio is further diversified within each of the asset classes.

Investment purchases and sales are recorded as of their trade dates. Investments are reported at fair value, and are primarily valued on the basis of market valuations provided by FT Interactive Data. Government securities (including TIPS) and other fixed-income securities are priced using a matrix methodology. REIT investments are priced using their primary exchange closing price. U.S. and international commingled equity investments, commodities, hedge fund investments, private equity and private real estate partnerships are valued based on the net asset value provided by the respective investment company or partnership. Security transactions and any resulting gains or losses are accounted for by the specific identification method on a trade-date basis.

For the years ended Dec. 31, 2017 and 2016, the annual money-weighted rate of return on investments, net of investment expenses, was 14.72% and 7.48%, respectively. The moneyweighted rate of return expresses investment performance, net of investment expenses, adjusted for the changing amounts actually invested. In the Required Supplementary Information is a table of the annual money-weighted rates of return for the 10-year period ended Dec. 31, 2017.

## **Capital Assets**

Capital assets, which consist of land, building and improvements, software, and equipment and furniture are reported at historical cost and are depreciated on a straight-line basis over the estimated useful lives. TCDRS has elected to capitalize items that individually exceed \$5,000 and have a useful life of greater than one year. The estimated useful lives for building and improvements range from 5 to 40 years, for furniture, fixtures and equipment 3 to 10 years, and for leasehold improvements 3 to 40 years.

## **B: PLAN DESCRIPTION**

## **Pension Trust Fund**

TCDRS is a statewide, agent multiple-employer, public-employee retirement system. The system serves 760 participating counties and districts throughout Texas. Each employer maintains its own customized plan of benefits. Plan provisions are adopted by the governing body of each employer, within the options available in the TCDRS Act. Employers have the flexibility and local control to adjust benefits annually and pay for those benefits based on their needs and budgets.

Each employer has a defined benefit plan that functions similarly to a cash balance plan. The assets of the plans are pooled for investment purposes, but each employer's plan assets may be used only for the payment of benefits to the members of that employer's plan. In accordance

Total	318	312			

with Texas law, it is intended that the pension plan be construed and administered in a manner that the retirement system will be considered qualified under Section 401(a) of the Internal Revenue Code. All employees (except temporary staff) of a participating employer must be enrolled in the plan. Membership in TCDRS as of Dec. 31, 2017 and 2016 is summarized in Table 1.

### Benefits

A percentage of each employee's paycheck is deposited into his or her TCDRS account.

That percentage (from 4% to 7%) is set by the employer.

The employee's savings grow, by law, at a rate of 7%, compounded annually. The employer selects a matching rate — at least "dollar for dollar," up to \$2.50 per \$1.00 in the employee's account. At retirement, the employee's account balance is combined with employer matching and converted into a lifetime monthly benefit.

Employees receive a month of service time for each month that they make a deposit into their account. The amount of service an employee needs to earn a future benefit is called the vesting requirement. When an employee is vested, he or she has the right to a monthly benefit, which includes employer matching, at age 60 or older. Employers may choose 5-, 8- or 10-year vesting. In addition, employees may retire before age 60 if they meet one of the following requirements, set by the employer:

- **"Rule of" eligibility:** Under these rules, a vested employee can retire if their age plus years of service time add up to at least 75 or 80.
- 20-year or 30-year retirement at any age: This lets employees retire when they have at least 20 or 30 years of service time.

Retirees elect to receive their lifetime benefit by choosing one of seven actuarially equivalent payment options, which are detailed on page 73.

Employers may elect to provide other optional benefits. Prior service gives employees monetary credit for time worked for an organization before it joined the system. Buybacks allow current employees to re-establish a closed TCDRS account from previous service with an employer. Partial lump-sum payments at retirement allow employees to withdraw part of their TCDRS account balance as a lump sum at retirement with a reduced monthly benefit.

In addition, an employer may choose to adopt a cost-of-living adjustment (COLA) for its retirees. This adjusts retiree benefits to restore purchasing power lost due to the effects of inflation.

## Contributions

A combination of three elements funds each

FINANCIAL

employer's plan: employee deposits, employer contributions and investment income.

- The deposit rate for employees is 4%, 5%, 6% or 7% of compensation, as adopted by the employer's governing body.
- Participating employers are required, by law, to contribute at a minimum the actuarially required rates, which are determined annually.
- Investment income funds a large part of the benefits employees earn.

Employers have the option of paying more than the required contribution rate each year. Extra contributions can help employers "prefund" benefit increases, such as a cost-of-living adjustment to retirees, and they can be used to help offset or mitigate future increases in the required rate due to negative plan experience. There are two approaches for making extra contributions: (a) paying an elected contribution rate higher than the required rate and (b) making an extra lump-sum contribution to the employer account.

Administrative costs of TCDRS are financed through the system's general reserves, which are part of the Endowment Fund.

## Group Term Life Fund (GTLF)

TCDRS also administers the Group Term Life program, a group term life insurance. The fund for this benefit is a separate trust administered by the board. The fund receives monthly participating employers' premiums and pays benefits when due. The obligations of the program are payable only from this fund, and are not an obligation of, or a claim against, the TCDRS Pension Trust Fund. The fund's assets are pooled with those of the Pension Trust Fund under provisions of the TCDRS Act and annually receive an allocation of income based on the fund value. This optional program provides group term life insurance coverage to currently employed members, and if elected by employers, to retirees. Participation in the Group Term Life program as of Dec. 31, 2017 and 2016 is summarized in Table 1 on page 31.

## Benefits

Current employees of participating employers are insured for an amount equivalent to the

employee's current annual compensation. Employers may also choose to cover retirees. Retirees are insured for \$5,000. Life insurance proceeds are payable as a lump sum. The coverage provided to retirees is a postemployment benefit other than pension benefits (OPEB).

## Contributions

Each participating employer contributes to the Group Term Life program at a contractually required rate. An annual actuarial valuation is performed and the contractual rate is equal to the cost of providing one-year term life insurance. The premium rate is expressed as a percentage of the covered payroll of members employed by the participating employer. There is a one-year delay between the actuarial valuation that serves as the basis for the employer contribution rate and the calendar year when the rate goes into effect.

The Group Term Life program is voluntary and employers can cease participation at any time. Therefore, the funding policy of the program is to ensure that adequate resources are available to meet all insurance benefit payments for the upcoming year. It is not the intent of the funding policy to pre-fund retiree term life insurance during employees' entire careers.

## **C: TCDRS AS EMPLOYER**

## **Pension Trust Fund**

TCDRS, as an employer, participates in the Texas County & District Retirement System.

A brief description of benefit terms:

- 1. All full- and part-time employees in a nontemporary position participate in the plan, regardless of the number of hours they work in a year. Employees in a temporary position are not eligible for membership.
- 2. The plan provides retirement, disability and survivor benefits.
- 3.TCDRS is a savings-based plan. For TCDRS, as an employer, 7% of each employee's pay is deposited into his or her TCDRS account. By law, employee accounts earn 7% interest on the beginning of year balances annually. At retirement,

the account is matched at an employer set percentage (current match is 200%) and is then converted to an annuity.

- 4. There are no automatic COLAs. Each year, TCDRS, as an employer, may elect an ad hoc COLA for its retirees. There are two COLA types, each limited by actual inflation.
- 5.Benefit terms are established under the TCDRS Act. They may be amended as of Jan. 1 each year, but must remain in conformity with the Act.

TCDRS, as an employer, has a contribution rate that is calculated annually on an actuarial basis, although the employer may elect to contribute at a higher rate. The contribution rate is based on the TCDRS funding policy adopted by the TCDRS Board of Trustees and must conform with the TCDRS Act. Contributions to the pension plan from TCDRS, as an employer, for 2017, were based on the elected rate of 10.5%, plus a one-time lump-sum amount of \$815,508.

## **Group Term Life Fund**

TCDRS participates in the Group Term Life program. For a general explanation of the Group Term Life program, turn to page 32. TCDRS provides coverage to current eligible employees and to retired employees.

TCDRS, as an employer, contributes to the Group Term Life program at a contractually required rate.

TCDRS' contributions, as an employer, to the Group Term Life program for the years ended Dec. 31, 2017, 2016 and 2015, were \$28,078, \$27,497 and \$24,412 respectively, which equaled the required contributions each year.

## TCDRS Bridge Program Health Reimbursement Arrangement

TCDRS adopted the TCDRS Bridge Program Health Reimbursement Arrangement (Bridge Program) for its employees. The program is open to all former TCDRS employees who meet all three conditions: (a) employed with TCDRS on or after Jan. 1, 2007; (b) accumulated at least 10 years of full-time employment with TCDRS; and (c) an active TCDRS employee on or after attaining age 58½. The Bridge Program is a self-insured medical expense reimbursement plan that provides a maximum credit of \$550 per month for 60 consecutive months. Coverage begins on the first day of the month immediately after the eligible former employee reaches age 60 or has separated from employment with TCDRS, whichever occurs later.

As of Jan. 1, 2017, the most recent actuarial valuation date, the Bridge Program was 0% funded. The actuarial accrued liability was \$839,333 and the actuarial valuation of assets was \$0, resulting in a UAAL of \$839,333. Based on an annual covered payroll of \$11,699,282, the UAAL as a percentage of covered payroll was 7.2%. The annual OPEB cost for 2017 was \$104,255 and TCDRS' contributions as an employer in 2017 were \$52,377; the annual OPEB cost for 2016 was \$98,350 and TCDRS' contributions as an employer in 2016 was \$98,350 and TCDRS' contributions as an employer in 2016 was \$94,053, and TCDRS' contributions as an employer in 2015 wa

The actuarial cost method used was the projected unit credit with a level dollar open amortization method and the amortization period of 15 years. The discount rate used was 3.5%.

## **Deferred Compensation**

The employees of TCDRS may participate in a deferred compensation plan created in accordance with Internal Revenue Code Section 457. This plan, available to all employees of TCDRS, permits the deferral of a portion of their salary until future years. The deferred compensation is not available to the employees until termination, retirement, death or certain unforeseeable emergencies. All compensation deferred under the plan is held by a custodian for the exclusive benefit of participants and beneficiaries.

## **D: CASH AND CASH EQUIVALENTS**

Cash and cash equivalents consist of funds on deposit with a financial institution in interestbearing demand deposit accounts. They are invested on an overnight basis (sweep) in a U.S. dollar-denominated investment under a repurchase agreement. The funds are collateralized at 102% using U.S. Treasury, government or agency

## NOTES TO THE FINANCIAL STATEMENTS

securities. Cash held in (1) demand deposit accounts, (2) the overnight sweep, and (3) the JPMorgan U.S. Government Money Market Fund (an open-end institutional money market fund) is available to pay benefits, operational expenses and funds awaiting transfer to investment management.

Custodial credit risk is the risk that in the event of a bank failure, the system's deposits may not be returned to it. A discussion of custodial credit risk pertaining to cash and cash equivalents can be found in Note G, beginning on page 36.

## **E: INVESTMENTS**

Investment decisions of the board are subject to Section 67, Article XVI of the Texas Constitution, and to the applicable statutory provisions of the Texas Trust Code that provide for a "prudent person" standard of care. Investment authorization is restricted by the investment policy adopted by the board that emphasizes the importance of a long-term investment philosophy with minimization of risk while targeting a long-term investment return of 8%. The board has determined that a diversified portfolio will offer the best opportunity to produce the desired 8% investment return. Accordingly, the TCDRS investment portfolio now includes investments in the following asset classes:

## **Equity Holdings**

The system's U.S. equities and a portion of its developed international and emerging market equities are passively managed in commingled index funds. The remaining developed international, emerging market and global equities are actively managed in commingled funds or limited partnerships.

## Hedge Funds

The vehicles for hedge fund investments are typically commingled vehicles, such as limited partnerships, limited liability companies or offshore corporations. At Dec. 31, 2017, the system's hedge fund portfolio consisted of 31 partnerships with a fair value totaling \$6.59 billion.

## **High-Yield Investments**

The board has divided the high-yield asset class into four portions. The first portion, the high-yield

bond portfolio, encompasses the portion of the U.S. corporate bond market that is rated below BBB- by S&P or below Baa3 by Moody's. Accordingly, credit risks associated with these bonds are greater than risks with investment-grade bonds and have historically traded at yields of 3.5% to 4.5% above comparable U.S. Treasury instruments. The second portion consists of distressed debt partnerships, which invest in securities of companies whose debt has declined in value because they are experiencing financial stress. Typical holdings are senior and subordinated debt instruments. The third portion consists of opportunistic credit partnerships that invest in securitized credit instruments made up of senior corporate bank loans and asset-backed credit investments secured by commercial and residential mortgages, auto loans, and other types of assets. The fourth portion, direct lending partnerships, consists of privately originated debt made to small and medium-sized companies or to real estate investors in order to take advantage of dislocations in the capital markets. Table 2 lists the committed and unfunded capital to opportunistic credit, distressed debt and direct lending investments at Dec. 31, 2017.

## **Private Equity**

TCDRS' private equity investments consist of partnerships that (a) take public companies private in order to improve their operations and then resell them in the future; (b) invest in start-up companies with new ideas or technologies; (c) invest in both traditional and renewable energy discovery and production; and (d) invest in real estate. As of Dec. 31, 2017, TCDRS had committed \$7.17 billion of capital to 182 private equity partnerships.

Table 2 lists the committed and unfunded capital to private equity investments at Dec. 31, 2017. During the first quarter of 2018, an additional \$235 million has been committed to private equity partnerships.

## **Real Assets**

• Real estate investment trusts (REITs) are companies that own and operate income-producing real estate, such as commercial office buildings, apartments, malls, warehouses and storage facilities. Under provisions of the U.S. tax law, if REITs pay out most of their income in dividends, they are not required to pay income taxes. Consequently, substantial amounts of income can be received from investing in REITs.

- Treasury Inflation-Protected Securities (TIPS) are issued by the U.S. Treasury and structured as a hedge against inflation. The principal value of the securities is adjusted based on changes in the consumer price index (CPI). Interest payments are determined by multiplying a fixed coupon by the inflation-adjusted principal. The inflation-adjusted principal is payable at maturity.
- Commodities consist of investments in resources that can be either perishable (grains, sugar, etc.) or non-perishable (metals, energy, etc.). Commodities provide protection against inflation and have low correlation to stocks and other asset classes.
- Private real estate partnerships acquire and operate commercial properties including office buildings, apartments, hotels, malls and residential real estate. Private real estate investments are illiquid and typically have expected holding periods of 10 to 12 years. As reported in Table 2, at Dec. 31, 2017, TCDRS had committed \$1.83 billion to 34 private real estate partnerships.
- Master Limited Partnerships (MLPs) are publicly traded partnership interests authorized by Congress to encourage investment in domestic energy infrastructure. At the entity level, these interests are tax free provided that 90% of their income comes from natural resources such as oil, natural gas, coal, timber and other depletable resources.

#### **Investment-Grade Bonds**

I

The investment-grade bond portfolio consists of debt instruments issued by the United States Treasury and governmental agencies, asset-backed securities, and corporate bonds that are rated investment grade by the major ratings agencies. Additionally, this portfolio may contain minimal investments in short-term instruments, non-rated securities, private placement securities, convertible bonds and preferred stock.

The portfolio should exhibit an overall dollarweighted average quality rating of AA with no investment rated lower than BBB- or equivalent as rated by Standard & Poor's (S&P), Moody's Investor Service or Fitch Investor's Service at the time of purchase or, if not rated, be deemed by the manager to be of similar quality.

#### **Cash and Cash Equivalents**

The TCDRS Board of Trustees may select one or more commercial banks, depository trust companies or other entities to serve as custodian or custodians of the system's cash, cash equivalents and short-term investments, and may authorize the custodian to invest the cash in such short-term investments as the board determines. TCDRS has authorized its custodian to invest cash, on an overnight basis, in the custodian's Collective Trust Government Short-Term Investment Fund (STIF). The investment objective of the STIF is to provide safety of principal, daily liquidity and competitive returns. The STIF owns high-quality debt instruments (which include U.S. government or U.S. government agencies, repurchase agreements, floating-rate notes, etc.). At Dec. 31, 2017, the dollar-weighted average maturity of the STIF was 42 days with an average current yield of 0.99%.

The investment officer manages cash in the STIF together with new contributions until they are allocated to a portfolio.

TABI	LE 2: SCHEDULE OF UNFUNDED CO	OMMITMENTS	
	Dec. 31, 2017		
Investment Category	Total Commitment	Unfunded Commitment	Fair Value

#### **F: SECURITIES LENDING**

State statutes and the board's policies permit TCDRS to use its investments to enter into securities-lending transactions — loans of securities to broker-dealers and other entities in exchange for collateral with a simultaneous agreement to return the collateral for the same securities in the future. The system's custodian, The Bank of New York Mellon Corp. (BNY Mellon), is engaged as the lending agent to lend securities from the system's portfolios for collateral of a minimum of 102% of the fair value of securities loaned.

Collateral, either cash or U.S. government securities, is initially pledged for the securities on loan and additional collateral is required from the borrower by the close of the next business day if its value falls to less than 100% of the fair value of the securities on loan. TCDRS does not have the ability to pledge or sell collateral securities unless the borrower defaults. At Dec. 31, 2017 and 2016, BNY Mellon held \$115,809,856 and \$39,743,527 of non-cash collateral, respectively.

Cash collateral is invested in short-term fixedincome instruments in accordance with the system's securities-lending guidelines. Table 3 lists the categories of cash-collateral investments at Dec. 31, 2017 and 2016.

At the end of years 2017 and 2016, TCDRS had no credit risk exposure to borrowers because the amounts the system owed to borrowers (cash plus non-cash collateral) exceeded the amounts the borrowers owed to TCDRS. The contract with the lending agent requires the agent to indemnify TCDRS if borrowers fail to return the securities

(and if the collateral is inadequate to replace the securities on loan) or fail to pay TCDRS for income distributions while the securities are on loan. At Dec. 31, 2017 and 2016, the fair value of securities on loan for cash and non-cash collateral was \$440,791,750 and \$43,726,236, respectively.

Additionally, TCDRS invests in two commingled domestic and international equity portfolios that participate in securities-lending programs managed by State Street Global Advisors. TCDRS receives a proportionate share of the securities-lending income generated from these activities.

#### **G: DEPOSIT AND INVESTMENT RISK**

Identification of credit risk, custodial credit risk, concentration of credit risk, interest rate risk and foreign currency risk is mandated by GASB Statement No. 40.

Credit risk is the risk that an issuer of an investment will not fulfill its obligation to the holder of the investment. This is measured by the assignment of a rating by a nationally recognized statistical rating organization. The TIPS portfolio contains obligations of the U.S. government and is not considered to have credit risk. At both Dec. 31, 2017 and 2016, according to Standard and Poor's (S&P) evaluations, the investment-grade bond portfolio exhibited an overall quality rating of AA-. The Bloomberg Barclays U.S. Aggregate Bond Index is the benchmark for performance measurement of the investment-grade bond portfolio. At Dec. 31, 2017 and 2016, the Bloomberg Barclays U.S. Aggregate Bond Index had an average S&P quality rating of AA and AA-, respectively.

At both Dec. 31, 2017 and 2016, according to S&P evaluations, the high-yield bond portfolio exhibited an overall quality rating of B+. The FTSE High-Yield Cash-Pay Capped Index is the benchmark for performance measurement of the high-yield bond portfolio. At both Dec. 31, 2017 and 2016, according to S&P evaluations, the benchmark exhibited an average quality rating of B+.

The investment policy does not explicitly outline an acceptable level of credit risk for the investmentgrade bond or high-yield bond portfolios, but the board's adoption of their respective benchmark indices is an implicit adoption of the market risk inherent in these portfolios.

Table 4 lists the credit risk associated with the investment-grade bond portfolio and the high-yield investments portfolio.

At Dec. 31, 2017, according to Moody's Investors Service evaluations, the BNY Mellon STIF contained short-term securities with quality ratings of P-1/P-2 (Prime-1 and Prime-2), which exhibit a superior ability for repayment of senior shortterm debt obligations, and long-term investments (maturity date greater than one year) with an average quality rating of Aaa. Based upon the fair value of the fund at Dec. 31, 2017, 76% of the instruments were rated P-1, 24% of the instruments were rated Aaa and less than 1% was held in cash.

At Dec. 31, 2016, according to Moody's Investors Service evaluations, the BNY Mellon STIF exhibited average short-term quality ratings of P-1/P-2 and an average long-term quality rating of Aaa with 62% of the instruments rated P-1, 36% of the instruments rated Aaa and the remaining 2% was held in cash.

Custodial credit risk is the risk that, in the event of the failure of a depository financial institution, TCDRS will not be able to recover deposits or will not be able to recover collateral securities that are in the possession of an outside party. TCDRS requires that demand deposit accounts be fully collateralized. Funds received by its master custodian are invested on an overnight basis or, if the funds are received late during a business day, are maintained in a U.S. dollar-denominated interest bearing deposit account insured by the FDIC.

TCDRS investments, evidenced by securities in physical or book entry form and not on loan, are registered and held in safekeeping for TCDRS by its custodian bank.

Concentration of credit risk is the risk of loss attributed to the magnitude of investment in a single issuer. Investment guidelines established with the individual investment managers generally address concentration risk limits. At Dec. 31, 2017 and 2016, TCDRS did not have investments in any one issuer which were greater than 5% of net investments.

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. The values of portfolios of longer duration are more affected by interest rate changes than are those of shorter duration. Increases in bond market yields result in fair value losses; decreases result in fair value gains. Multiplying the change in market yield by the duration of the portfolio can approximate the size of the gain or loss in fair value. For example, if one owned a portfolio of investment-grade bonds that had a

duration of 6.5 years and if the yields within the bond market were to immediately fall 1%, the fair value gain of the portfolio would approximate 6.5%. This change in fair value indicates the level of interest rate risk inherent in the portfolio.

Table 5 discloses the level of interest rate risk inherent in the TCDRS fixed-income portfolios by reporting the effective duration of those portfolios.

The effective duration of the Bloomberg Barclays U.S. Aggregate Bond Index at Dec. 31, 2017 and 2016 was 5.9 and 5.8 years, respectively.

Performance of the TIPS portfolio was measured against the Bloomberg Barclays U.S. TIPS Index through July 2016. Effective August 2016, the portfolio transitioned to a breakeven strategy and is measured against the Bloomberg Barclays U.S. 10 Year Breakeven Inflation Index. The portfolio seeks to benefit from a rise in inflation expectations. The primary risk to the strategy is not interest rate risk, but a significant decline in inflation expectations.

The high-yield investment portfolio is measured against the FTSE High-Yield Cash-Pay Capped Index. The effective duration of the FTSE High-Yield Cash-Pay Capped Index at Dec. 31, 2017 and 2016 was 3.8 and 4.2 years, respectively.

TCDRS does not have a formal policy governing interest rate risk, but the board's adoption of the respective benchmark indices used to measure the investment-grade bond, TIPS, and high-yield bond portfolios against is an implicit adoption of the market risk inherent in these portfolios.

Due to rounding, totals and detail may not equal.

Any material interest rate risk on investments from cash collateral received from securities lending is mitigated by maintaining an investment yield higher than the rebate rate owed to borrowers. Further, to reduce risk, investment guidelines require floating-rate instruments to reset no less frequently than 90 days or limit maturity of fixedrate instruments to no more than 18 months.

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or deposit. The asset allocation plan adopted in the investment policy includes an 18.5% allocation to international and global equities, a 3% allocation to distressed debt, a 2% allocation to REITs, a 3% allocation to MLPs, a 10% allocation to Direct Lending, a 6% allocation to private real estate partnerships and a 16% allocation to private equity, all of which allow non-U.S. dollar-denominated investments. TCDRS does not have a formal policy governing foreign currency risk. Accordingly, the foreign currency risks inherent in the benchmark indices assigned to these asset classes have been implicitly adopted as an acceptable level of foreign currency risk.

Table 6 lists the foreign currency risk associated within the international equities, REITs, MLPs, high-yield investments, private equity and private real estate partnerships portfolios.

Additionally, at Dec. 31, 2017 and 2016, the international equity portfolio contained nine commingled funds subject to foreign currency risk with an aggregate fair value of \$5,906,193,020 and \$4,468,963,509, respectively.

Derivative instruments are financial contracts whose values depend on the values of one or more underlying assets, reference rates or financial indexes. The investment policy does not explicitly outline the use of derivatives, but investment guidelines allow the TIPS and investment-grade bond managers the use of exchange-traded treasury futures to replicate cash investments or to manage yield curve or other risk positions within their portfolio. In 2015, the board approved the implementation of a currency overlay program to the passive developed international equity and emerging market allocations managed by State Street Global Advisors using foreign currency forward contracts which are over-the-counter (OTC) instruments used to hedge volatility in currency exchange rates on assets held within these portfolios. TCDRS' derivative instruments are considered investments and not hedges for accounting purposes. In 2016 the overlay program was suspended but may be re-engaged at a future date.

Table 7 lists TCDRS' exposure to derivative instruments at Dec. 31, 2017.

#### H: FAIR VALUE MEASUREMENT AND APPLICATION

TCDRS categorizes fair value measurements of investment assets and liabilities within the fair value hierarchy established by generally accepted accounting principles as mandated by GASB Statement No. 72. These investments are valued through industry standard practices for the respective type of security at a price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The hierarchy classifications are based on the transparency of inputs to the valuation techniques used and should not be perceived as the particular investment's risk. These classifications are summarized into three broad levels, arranged from highest to lowest:

Level 1 - Unadjusted inputs using quoted prices in active markets or exchanges for identical investments.

Level 2 - Other significant observable inputs including quoted prices of securities that are comparable in coupon, rating, maturity and industry. Inputs other than quoted prices that are observable take into account operational, market, financial and non-financial factors (interest rates, yield curves, credit risk, and default rates) or other market corroborated inputs that are observable at commonly quoted intervals for the full term of the investment.

Level 3 – Significant inputs that are not observable and cannot be corroborated by observable market data (assumptions, cash flows or earnings multiples).

In instances where inputs used to measure fair value fall into different levels in the fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The assessment of the significance of particular inputs to their fair value measurements requires judgment and considers factors specific to each asset.

In 2017 and 2016 there were no changes in valuation techniques that had a significant impact on the result.

#### **Short Term Securities**

Holdings in short-term securities at Dec. 31, 2017 and 2016 consist of a Government Short-Term Investment Fund (STIF) which invests principally or entirely in securities or other obligations issued by or guaranteed by the U.S. government or its agencies and repurchase agreements collateralized by securities or other obligations issued by or guaranteed by the U.S. government. The value of the fund is reported at cost plus accrued interest which approximates fair value. TCDRS classifies the STIF at level 2 based on the availability of a daily value, traded in an inactive market.

#### Equity, Debt and Other Securities

Equity and debt securities classified in level 1 are valued using prices quoted in active markets. Investments classified in level 2 are derived using either a bid evaluation or a matrix pricing technique. Bid evaluations may include market quotations, yields, maturities, call features and ratings. Matrix pricing is used to value securities based on the securities' relationship to benchmark quoted prices. Index linked securities are valued by using multiples of the external market price and the index ratio. Level 3 debt securities at Dec. 31, 2017 and 2016 are impaired assets and are valued using unobservable inputs in inactive markets such as proprietary information or single source pricing.

Commingled funds are valued daily or monthly through an exchange or provided by the investment manager. Funds that pricing is obtained daily are considered to be in an active market and are listed in level 1 and monthly priced funds are listed in level 2.

## Investments Measured at the Net Asset Value (NAV)

For assets that are measured at the NAV per share (or its equivalent), the non-lagged year-end valuation provided by the fund manager is used. All partnerships provide audited financial statements with unmodified opinions, along with unaudited quarterly reports. In addition, as part of the annual audit, a confirmation is obtained which includes additional information regarding the underlying holdings and TCDRS' ownership percentage of the total limited partnership.

#### **Commingled Funds**

The commingled funds with fair values reported at NAV per share (or its equivalent), such as member units or an ownership interest in partners' capital to which a proportionate share of net assets is attributed, are reported in Tables 8 and 9 disclosures along with their redemption restrictions.

#### Hedge Funds & Opportunistic Credit Funds

Most hedge funds and opportunistic credit funds are organized as limited partnerships under the laws of Delaware and use partnership accounting methodologies. These partnerships may invest their assets directly or through a master fund and may also use a wider range of investment techniques such as leverage, short selling and derivatives to achieve their objectives. The fair value of these investments has been determined using the NAV per share or its equivalent. Due to the inherent uncertainty of valuations of investments that are determined to be illiquid and/or do not have readily ascertainable fair values, the estimates of fair value may differ from the values ultimately realized by the partnership, and those differences can be material. The amount of notice the investor is required to give to the general partner in order to redeem ranges from two to one hundred eighty days. For hedge funds, investors are generally able to sell their interest in the partnerships at regular intervals ranging from monthly to every two years. Opportunistic credit funds can be organized using a traditional hedge fund structure, which provides investors regular intervals to sell their interest in the partnership ranging from quarterly to every two years, or organized using a shorter duration, private equity structure which allows for a two-year investment period, one-year harvest period, and an optional one- to two-year extension. Certain funds may allow for the creation of "special investments" which are investments the investment manager believes lack a readily ascertainable fair value, are illiquid, or should be held until the resolution of a special event or circumstance.

TCDRS targets 25% of its hedge fund allocation to equity long/short funds in which the equity securities maintain some level of market exposure (either net long or net short); however, the level of exposure may vary through time. TCDRS

targets 5% of its hedge fund allocation to a market neutral strategy designed to maintain no net exposure to the overall direction of the equity market. Event-driven funds, which are targeted at 20% of TCDRS' hedge fund allocation, focus on identifying and analyzing securities that can benefit from the occurrence of an extraordinary corporate transaction or event such as mergers, acquisitions, buyouts, stock splits and bankruptcies. Credit/ distressed debt funds can come in the form of bonds, mutual funds or the distressed firm itself. TCDRS targets 25% of its hedge fund allocation to this strategy which has a low correlation with factors that affect the stock markets. The global macro strategy structures its holdings, such as long and short positions, in order to take advantage of shifts in macroeconomic trends; TCDRS allocates 20% of hedge funds to this strategy. The remaining 5% uses a multi-strategy approach, which represents a mix of the other hedge fund strategies.

#### **Private Equity**

Private equity is risk capital provided outside of the public markets. Investments are illiquid and traded only on acquisition or exit. The term private equity is very broad and includes many types of investments. TCDRS targets 50% of its private equity allocation to buyout funds which include investments in acquisitions, growth equity, recovery investments, and special situations (a class which represents a diversified strategy across many subclasses). Buyouts use leverage (debt), aggressive restructuring and the purchase of large controlling stakes in the portfolio companies. Venture capital includes funds that invest in companies in a range of stages of development from start-up/ seed-stage, early stage, and later/expansion stage. TCDRS targets 20% of its private equity allocation to venture capital funds. TCDRS targets 10% of its private equity allocation to real assets. Funds that invest in real assets have a return linked to inflation, such as energy or other commodity-based investments. The remaining allocation to private equity targets non-U.S. investments. These may be buyout, venture capital or real assets.

Fair value for these funds is determined by reference to observable valuation measures for comparable companies or transactions, adjusted for differences between the investment and the referenced comparable, and in some instances by

reference to option pricing models or other similar methods. Inputs may include, but are not limited to, significant developments such as meaningful third-party transactions, material progress or slippage in the development of the investee company's business, a change in the cash or debt on a company's balance sheet, dividend accretion on certain types of securities, valuation of comparable publicly traded companies, significant changes in the overall market environment and discounts for lack of marketability.

Private equity investments are illiquid and typically have expected holding periods of 10 to 12 years. These investments are not eligible for redemption. Distributions from each fund are received as the underlying investments in the funds are liquidated.

#### **Distressed Debt**

Distressed debt includes investments in the debt instruments of companies which may be publicly traded or privately held that are financially distressed and are either in bankruptcy or likely candidates for bankruptcy. Typical holdings are senior and subordinated debt instruments and bank loans. Gains can be realized by holding the debt until there are some payments by the company at maturity or through distributions of cash, restructured debt or equity resulting from the bankruptcy process. Distressed debt investments are not eligible for redemption. Distributions are received as the underlying investments in the funds are liquidated. Investments are typically made in years one through five with capital typically returned in years three through ten.

#### **Direct Lending**

Direct lending partnerships invest primarily in privately originated debt and preferred equity instruments to small and mid-sized companies and privately originated senior and mezzanine debt for real estate. Direct lending investments may also include other types of yield-oriented non-correlated funds including, but not limited to, royalty streams and aviation leases. Direct lending investments are not eligible for redemption. Distributions are received as the underlying investments in the funds are liquidated, which may take up to three to five years.

#### **Private Real Estate**

Private real estate may behave as highly debt-like securities or as highly equity-like securities, depending on the characteristics of the property. Core properties tend to be held for a long time to take full advantage of the lease and rental cash flows that they provide. Value-added and opportunistic real estate achieve a substantial portion of their return from appreciation in value. Value-added real estate can involve repositioning, renovation, and redevelopment of existing properties while opportunistic real estate includes all of these activities as well as the purchase of raw land and ground-up development. These investments are not eligible for redemption. Distributions from each fund will be received as the underlying investments in the funds are liquidated. As a private, non-exchange-traded asset, private real estate funds are illiquid. The life of a private real estate fund is typically 10 to 12 years.

## **REQUIRED SUPPLEMENTARY INFORMATION AND NOTES**

# **14.7%** RETURN

Our investments returned 14.7% last year. Investment return helps fund the benefits employers choose to provide their employees. Almost 80 cents of every benefit dollar comes from investment return.

# Investment

May 2018

Board of Trustees Texas County and District Retirement System P.O. Box 2034 Austin, Texas 78768-2034

To the members of the Board:

It is our pleasure to be the investment consultant for the Texas County and District Retirement System (hereinafter referred to as "TCDRS") and to report on your investment performance and activities for the year ending 2017. Retained in 2005, Cliffwater LLC provides investment policy development and review, asset allocation analysis, asset class structure analysis, investment manager searches and investment performance monitoring and evaluation to the Board and its staff. In calculating investment performance, TCDRS uses the industry standard time-weighted rate of return methodology (net of fees) based upon market values.

2017 was a year of strong performance for risky assets. US stocks had a spectacular year as the S&P 500 was up 21.8%, posting 62 new highs. Performance accelerated in the final quarter of the year as Congress passed an overhaul of the tax code that resulted in the reduction of the corporate tax rate. In fact, S&P 500 earnings per share climbed 21% in 2017 compared to a 6.2% average over the past 65 years. Outside of the US, developed and emerging global equities also had a banner year due to a benign backdrop that included robust global growth, continued central bank support, strong earnings and a declining US dollar. This was all coupled with record low equity volatility. On the back of strong equity markets, the high yield market generated solid gains with tightening spreads and light default volume. With tight labor markets and inflation nearing targets, the Fed raised interest rates three times in 2017, increasing the fed funds target range to 1.25-1.50%. In spite of this, the 10 Year US Treasury yield ended up the year at 2.41% compared to 2.44% at the end of 2016, resulting in a flattening yield curve. Oil remained in a trading range throughout the year while other real assets, such as REITs, posted strong returns with higher prices and stable income and performed in line with private real estate.

TCDRS' diversified investment portfolio increased in total assets from \$26.2 billion to \$29.9 billion. The one year total fund return was 14.7% after fees which matched the Board's Total Fund Policy Benchmark return. Over 10 years, the fund's 5.6% return exceeded the Board's Total Fund Policy Benchmark return of 4.6%. At the asset class level, TCDRS' passively-managed US equities portfolio returned 21.2% for the year. TCDRS' balance of active and passive developed international managers resulted in a 24.5% return, above the 24.2% benchmark return while the active global equity portfolio returned 27.1% vs. 22.4% for the benchmark. Emerging market equities had a 32.9% return compared to the benchmark's 7.6% return. The MLP portfolio declined due to dividend cuts, but the -5.6% return outperformed the benchmark's -6.5% return. The active investment-grade bond portfolio returned 4.0% relative to 3.5% for the benchmark and the hedge fund portfolio returned 6.0% compared to its benchmark return of 7.8%. The active high yield and opportunistic credit asset classes returned 6.6% and 12.9%, respectively, relative to the benchmark's 6.9% return. The private equity program returned 19.8%, distressed debt returned 18.2%, direct lending returned 11.3% and the real estate program returned 16.6% for the year. Overall, it was a year where exposure to public equity and private market asset classes drove total fund level returns.

In terms of asset allocation, the TCDRS Board shifted 2% from public equities to private equity, shifted 1% from public to private real estate, and lowered hedge funds exposure by 5% while increasing direct lending by 5%. The fund added several hedge funds and opportunistic credit managers to increase diversification. The fund also committed to new private equity, private real estate, distressed debt and direct lending partnerships in accordance with its annual commitment budget.

Respectfully submitted,

Hell R. Bankich

Kathleen K. Barchick, Sr. Managing Director

#### A: THE TCDRS ACT AND INVESTMENT POLICY

Investment decisions of the TCDRS Board of Trustees (board) are subject to the Texas Constitution, the TCDRS Act and to the applicable statutory provisions of the Texas Trust Code that provide for a "prudent person" standard of care.

Additionally, the board has adopted, and reviews at least annually, an investment policy that defines investment authority and emphasizes the importance of a long-term investment philosophy with minimization of risk.

#### **B: INVESTMENT PHILOSOPHY AND STRATEGY**

The board has established a long-term target investment return of 8% and has diversified the TCDRS portfolio to include:

- Equities
  - U.S., international developed and emerging markets, and global equities
- Hedge funds

TABLE 1: CAPITAL MARKET ASSUMPTIONS							
As of Jan. 1, 2017

  - Real estate investment trusts (REITs), commodities, private real estate partnerships, Treasury Inflation-Protected Securities (TIPS) and Master Limited Partnerships (MLPs)
- Investment-grade bonds

(For more information on these types of securities, please see the Glossary on page 87.)

The board uses a long-term, strategic approach to asset allocation based upon capital market assumptions that are reviewed and adopted annually. The assumptions in effect as of January 2017 are shown in Table 1 and include the long-term expected return and risk (standard deviation) for each asset class.

#### **C: ASSET ALLOCATION**

The board has established asset allocation targets for each asset class within the TCDRS portfolio. Table 2 shows the target allocations in effect during 2017 for each asset class.

#### **D: ASSET CLASSES, INVESTMENT STYLES AND INVESTMENT MANAGERS**

TCDRS uses both active and passive styles of investment management. The passive style seeks to match the performance of an established market index by holding the same securities as the index. An active style seeks to exceed the performance of a benchmark by allowing the manager to actively trade securities that may be different from the index.

Asset classes managed actively are hedge funds, high-yield bonds, opportunistic credit, distressed debt, direct lending, private equity, REITs, TIPS, commodities, MLPs, private real estate partnerships, investment-grade bonds, global equities, and a portion of the developed international and emerging market equities portfolios. Asset classes managed passively are U.S. equities and the remainder of the developed international and emerging market equities.

The investment manager responsible for an externally managed portfolio holds any cash that portfolio generates in interest-bearing instruments or accounts until it is reinvested. The TCDRS Investment Officer manages cash as well as new contributions in a shortterm investment fund until allocated to a portfolio.

#### **E: INVESTMENT RESULTS**

TCDRS retains a professional performance measurement analyst that regularly reports investment performance to the board for each investment manager, for the aggregate of all managers in each asset class and for the total portfolio.

#### **Performance Reporting**

Performance of each investment manager is measured against the performance of similar assets contained within a benchmark portfolio, as represented by a specific index. Comparisons indicate the value added by each manager, if any, in excess of the performance that was experienced by the specific benchmark index. When multiple investment managers are retained within a particular asset class, a benchmark portfolio is selected for measurement of the performance of the entire asset class. Table 3 identifies the benchmark portfolio associated with each asset class contained within the TCDRS investment portfolio.

A policy benchmark portfolio consisting of individual asset class benchmarks, weighted by asset class target

allocation, is constructed for measurement of the performance of the entire portfolio.

#### **Performance Results**

The TCDRS 2017 portfolio returned 14.7% net of fees, matching its benchmark return. Lack of volatility is the best overall description for markets in 2017. Strong growth across developed and emerging economies drove equities higher. TCDRS'U.S. equities (+21.2%), developed international equities (+24.5%), global equities (+27.1%), and emerging market equities (+32.9%) were all up significantly. Bond returns were driven primarily from yield and were up 4.0%. High-yield bonds were up 6.6%. The private asset classes also produced strong returns with private equity (+19.8%), distressed debt (+18.2%), private real estate (+16.6%) and direct lending (+11.3%). The opportunistic credit portfolio (+12.9%) performed well while the hedge fund portfolio (+6.0%) was up modestly. The lowest performing asset class was MLPs (-5.6%).

#### F: LISTS OF LARGEST HOLDINGS<sup>1</sup>

#### **Equity Holdings**

The system's exposure to equity markets is achieved through participation in commingled investment pools, such as State Street Global Advisors (SSgA)

<sup>1</sup> A complete listing of all securities TCDRS owned at Dec. 31, 2017, is available upon written request.

<sup>1</sup> TCDRS invests in equity securities through separately managed and commingled equity vehicles. At Dec. 31, 2017, the largest equities contained in the U.S. Equities portfolio represent TCDRS' investment in a State Street U.S. Total Stock Market Index Fund which TCDRS owns a 92% undivided interest in. The remaining securities are individual shares held in the MLP portfolio.

U.S. equity and international equity index funds, and direct investment in separately managed REIT and MLP portfolios. At Dec. 31, 2017, TCDRS' largest equity holdings were in the U.S. equity and MLP portfolios. Table 5 displays our exposure to the 10 largest equity holdings.

#### **Fixed-Income Holdings**

Table 6 presents the top 10 fixed-income securities owned by TCDRS. The securities are contained within the investment-grade bond portfolios. At Dec. 31, 2017, the aggregate fair value of the investmentgrade bond portfolios was \$1,632 million.

#### **G: RESULTS OF SECURITIES-LENDING ACTIVITIES**

TCDRS retains The Bank of New York Mellon Corp. as securities-lending agent to engage in lending securities from its portfolios. Securitieslending transactions consist of loans of securities to broker-dealers and other entities in exchange for collateral with a simultaneous agreement to return the collateral for the same securities in the future. The gross income and expenses attributable to securities-lending activity and net lending income of \$0.2 million are shown in Table 7.

Additionally, SSgA passively manages the U.S. and international equity portfolios of TCDRS in commingled funds. The securities in these funds participate in the securities-lending program of

Trust Fund and do not include fees incurred and charged by general partners in partnerships investing in private equity, distressed debt, direct lending, opportunistic credit, private real estate and hedge funds as these types of fees are netted directly against returns for those investments in accordance with FASB ASC 820. In the interest of greater transparency, fees and profit shares associated with these types of investments are disclosed in Table 8, based on information requested and received from fund general partners in conjunction with the annual audit.

The investment expenses related to TCDRS' investments in partnerships investing in private equity, distressed debt, direct lending, opportunistic credit, private real estate and hedge funds fall into the categories of management fees and profit share (also called "carried interest").

Management fees typically range from 1.5% to 2% of the value of invested assets (hedge funds and opportunistic credit) or committed capital (private equity, private real estate, distressed debt and direct lending) and are intended to compensate the general partner for its costs in operating the partnership.

Profit sharing or carried interest incentivizes and aligns the general partner's interest with TCDRS' interest. The carried interest represents the general partner's share of the partnership's profits, typically 20%, with 80% going to the limited partners such as TCDRS. Carried interest earned by hedge funds and opportunistic credit funds is generally accrued monthly and paid annually since the underlying investments are relatively liquid and more easily valued. Due to the long-term nature of private equity, private real estate, distressed debt and direct lending partnerships (typically 8 to 12 years) and the illiquidity associated with the underlying investments, carried interest is accrued over the life of the partnership but is usually not finalized until the fund is fully liquidated. Generally, an agreed rate of return, or preferred return, must first be surpassed before carried interest is earned by the general partner. To incentivize general partners to maintain performance over the life of a partnership, periods of negative performance may result in previously accrued carried interest being reduced or "clawed back". During such periods, negative carried interest expense would be reported.

The fees reported in Table 8 are those that directly

impact TCDRS' various partnership investments. General partners may receive additional economic benefits from their management of the partnerships in accordance with the partnerships' governing documents.

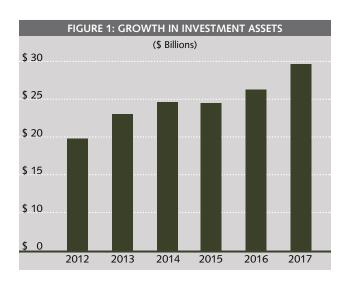

Table 9 presents the commissions paid to brokers by the system's equity managers. The managers executed trades of 126 million shares through 105 brokers. The \$1,522,000 in commissions earned by these brokers represents a cost of \$.01 per share traded.

#### I: ASSET GROWTH OF THE SYSTEM

As shown in Figure 1, the total value of TCDRS' investment assets, including accrued interest and dividends, has increased by \$10.08 billion over the past five years (from \$19.81 billion at Dec. 31, 2012 to \$29.89 billion at Dec. 31, 2017). The growth of investment assets in 2017 was attributable solely to investment return as the system has reached a stage in its maturity where cash flow from employee deposits and employer contributions is slightly less than the amounts required to meet annual benefits, withdrawals and administrative expenses.

#### J: INVESTMENT SUMMARY

The total value of the portfolio and each asset class at Dec. 31, 2017 is shown in Table 10 and is composed of the fair value of the underlying investments plus the amount of accrued interest and dividends, if any. The values shown in each asset class under the column labeled "Fair Value" are the investment amounts presented in the Statements of Fiduciary Net Position shown on page 26 in the Financial Section of this CAFR.

Board of Trustees Texas County & District Retirement System Austin, Texas

Dear Trustees:

In accordance with the Texas County & District Retirement System (TCDRS) Act, the annual actuarial valuation of the assets and liabilities of TCDRS has been completed as of December 31, 2017. This valuation was performed using actuarial assumptions that were adopted by the Board in December 2017.

We believe the assumptions individually and collectively represent reasonable expectations of experience over the long-term future and that all methods and assumptions used for funding and financial reporting are in compliance with the relevant Actuarial Standards of Practice. Nevertheless, the emerging costs of the TCDRS employers will vary from those presented in our report to the extent that actual experience differs from that projected by the actuarial assumptions.

To test how well the financing objective for each plan is being achieved, annual actuarial valuations are made. These valuations recognize differences in the past year between the actuarial assumptions and the actual experience, and any benefit changes for each plan.

The financing objective for each TCDRS plan is to provide retirement, death and disability benefits for a county's or a district's employees financed by an employer contribution rate. This rate is determined annually and is designed to remain approximately level from year to year as a percent of the employer's covered payroll. The employer contribution rate consists of the normal cost contribution rate plus the unfunded actuarial accrued liability (UAAL) contribution rate. The UAAL as of December 31, 2008 and any subsequent gains and losses are amortized over closed 20-year periods (open 30-year period if the employer is in an overfunded position). Benefit increases are amortized over closed 15-year periods. The methods for calculating the required contribution rates are specified in the funding policy which has been adopted by the Board.

A separate actuarial valuation for each participating county and district was performed based on the plan benefits in effect on January 1, 2018. The aggregate results of the actuarial valuation of system-wide assets and liabilities are presented in the Actuarial Section in the Summary Actuarial Valuation Results schedule. The assumptions and methods used in this valuation are summarized in the actuarial section. The member, annuitant and asset data used in the valuation were all prepared and furnished by TCDRS. We relied on that data after examining it for general reasonableness and year-to-year consistency. Please refer to the December 31, 2017 System-wide Actuarial Valuation Report for further disclosures.

Milliman provided the information that TCDRS used in preparing Table 1 and the TCDRS Bridge Program Health Reimbursement Arrangement section of the Notes to the Financial Statements in the financial section, all of the supporting schedules in the actuarial section, and Tables 3, 4 and 5 and Figure 4 of the statistical section.

Sincerely,

Mark C Olleman

#### A: ACTUARIAL ASSUMPTIONS

The actuarial assumptions for funding valuation purposes described below were developed from an actuarial experience investigation of TCDRS over the years 2013-2016. They were recommended by Milliman, Inc., adopted by the TCDRS Board of Trustees in 2017 and first used in the Dec. 31, 2017 actuarial valuation.

#### **Termination Rates**

The termination rates are used to estimate future terminations of employment for reasons other than death, disability or retirement. The rates vary by length of service, entry-age group (age at hire), gender and termination group assignments, and do not apply after an employee is eligible for retirement. Sample rates for three of the seven termination groups are shown in Table 1.

Each employer was assigned to a termination group based primarily upon the termination characteristics of the members of that employer's plan during the years 2013-2016 relative to the termination characteristics of TCDRS membership system-wide during the same period.

For plans that have adopted the partial lump-sum payment option, adjustments are made to the

	15	.019	.024	.029	.022	.027	.032

termination rates. Rates are reduced at ages near retirement as it is anticipated that if the partial lump sum is available, members are less likely to terminate employment so they can withdraw their accounts.

#### Withdrawal Rates

Members who terminate employment with the county or district may either elect to leave their accounts with TCDRS or withdraw their accounts. The likelihood that an active member who terminates employment will elect to withdraw varies by length of service and vesting requirement. Sample withdrawal rates are shown in Table 2.

Members who have already terminated employment and are neither vested nor active with another TCDRS employer are assumed to withdraw their accounts. Otherwise, they are assumed to defer their benefit until retirement eligible.

#### **Disability Rates**

There are two types of disability rates, occupational disability rates (predicts disabilities that occur during the performance of job duties) and all-othercauses disability rates (predicts all disabilities that are not occupational). Sample disability rates are shown in Table 3. Before a member is vested, only the occupational disability rates are applicable. For members who are vested, but not eligible for service retirement, the rate of disablement is the sum of the occupational rate and the all-other-causes rate. Rates are assumed to be zero after the member is eligible for service retirement.

#### **TABLE 2: RATES OF WITHDRAWAL** UPON TERMINATION Vesting Requirement Years of Service 5 Years 8 Years 10 Years 0 100% 100% 100% 4 100 100 100 6 49 100 100 8 47 47 100 10 45 45 45 15 40 40 40 20 28 28 28 25 18 18 18 0 0 0 30 and over

#### Service Retirement Rates

Retirement rates predict when active retirement eligible members will commence receiving benefit payments and are based on age. Retirement eligible members age 75 or older are assumed to commence receiving benefits immediately. Sample rates are shown in Table 4, and vary by age.

Non-depositing members are assumed to retire at the later of first retirement eligibility or age 60.

#### **Mortality Rates**

Depositing members:

90% of the RP-2014 Active Employee Mortality Table for males and 90% of the RP-2014 Active Employee Mortality Table for females, both projected from 2014 using 110% of the MP-2014 Ultimate scale.

Service retirees, beneficiaries and non-depositing members:

130% of the RP-2014 Healthy Annuitant Mortality Table for males and 110% of the RP-2014 Healthy Annuitant Mortality Table for females, both projected from 2014 using 110% of the MP-2014 Ultimate scale.

Disabled retirees:

130% of the RP-2014 Disabled Mortality Table for males and 115% of the RP-2014 Disabled Mortality Table for females, both projected from 2014 using 110% of the MP-2014 Ultimate scale.

#### **Investment Return**

An 8% annual discount rate is used in the valuation based on the expected long-term investment return of 8%. The components of the 8% investment return assumption are a 2.75% rate of inflation and a 5.25% real rate of return. This rate of 8% is net of investment and administrative expenses.

#### **Salary Increases**

The salary increase assumption predicts salary increases for individuals over their projected careers. These rates vary by the employee's service and age at hire (entry age). Annual increase percentages consist of a general wage inflation component of 3.25% and a merit, promotion and longevity component that varies from 0.50%

to 5.00% based on entry age and service. The 3.25% wage inflation component is based on the underlying price inflation assumption of 2.75% and 0.5% for assumed increases in productivity. The salary scale varies by entry age, with an approximately 4.9% average annual increase over a typical employee's entire career. Because the TCDRS benefit is not based on final average salary, this assumption is generally not as significant as for other defined benefit retirement systems. Refer to Table 5 for sample salary increase rates.

#### **Payroll Increase**

The payroll increase assumption projects the rate of growth of the employer's aggregate payroll. The rate varies by employer, with a maximum of 3.25%, or a smaller percentage as considered appropriate based on the employer's number of employees and prior experience. The payroll increase assumption does not consider future growth in the number of employees.

TABLE 5: ANNUAL RATE OF SALARY INCREASE						
Years		Entry-Age Group				
of Service	< 30	30-39	40-49	> 50		
1	7.6%	7.1%	6.6%	6.1%

20	4.4	4.1	3.9	3.8		
25	4.1	3.9	3.8	3.8		

#### **Cost-of-Living Adjustment**

An annual increase of 0% cost-of-living adjustment for retirees and beneficiaries is assumed. Within certain parameters, employers may elect on an ad hoc basis to increase benefit payment amounts to retirees and beneficiaries.

#### **B: ACTUARIAL METHODS**

#### Actuarial Cost Method

For funding calculations, TCDRS uses an entry-age actuarial cost method assuming the current plan provisions have always been in place. The goal of this cost method is to fund benefits in an orderly manner for each participant over his or her career so that sufficient funds are accumulated by the time benefit payments begin. Under this approach, benefits are funded in advance as a level percentage of pay. This portion of the contribution rate is called the normal cost rate and generally remains stable from year to year.

#### **Amortization Policy**

The portion of the contribution rate that funds any remaining unfunded amounts for benefits that are not covered by the normal cost is called the unfunded actuarial accrued liability (UAAL) rate. UAAL amounts occur when benefit enhancements are adopted, when actual investment or demographic experience varies from the actuarial assumptions (actuarial gains and losses), or when there are changes in actuarial assumptions or methods.

UAAL amounts are amortized on a levelpercentage-of-covered-payroll basis over a closed period with a layered approach. The closed periods ensure all unfunded liabilities are financed over no more than a 20-year period. Each year, new layers are established to amortize changes in the UAAL due to actuarial gains or losses, as well as any plan benefit changes elected by an employer for that year.

Benefit enhancements are amortized over a 15-year closed period. All other changes in the UAAL except for changes due to scheduled amortization are amortized over 20-year closed periods.

For newly participating districts that have five or fewer employees who are all within five years of retirement eligibility, any initial UAAL and any subsequent adoption of prior service credits are amortized over a five-year closed amortization period. This ensures that benefits are appropriately funded over the current generation of employees.

Extra contributions may be made by employers by choosing to pay an elected rate that is greater than the required funding rate or making ad hoc lumpsum contributions. If extra contributions over the required amount are made to a plan during the year, any extra contributions made as lump sums are first used to offset the UAAL increase, if any, related to plan changes elected during the current year. Any remaining extra contribution amounts are then used to pay down existing loss bases, in the order of oldest to most recent. After all existing loss bases have been paid off, any remaining extra contributions are incorporated into the actuarial gains or losses for the current year.

Notwithstanding the layered approach, the total UAAL payment may not be less than the required payment obtained by amortizing the entire UAAL over a 20-year period.

If a plan is overfunded, the overfunded actuarial accrued liability (OAAL) is calculated annually using a 30-year open amortization period.

#### Asset Valuation Method

When determining the actuarial value of assets, used for determining required plan funding, TCDRS smooths each year's actuarial investment gains and losses in the following manner. First, to the extent that there is a loss for the year and there are unrecognized gains from previous years, or to the extent that there is a gain for the year and there are unrecognized losses from previous years, the gain or loss for the year shall be used to offset unrecognized gains or losses from previous years in the order of oldest to most recent. Any remaining gain or loss for the year is recognized over a five-year period. This better reflects the system's long-term investment horizon and keeps employer contribution rates more stable. As actuarial asset investment gains and losses are recognized, they become part of the actuarial gains and losses for the year and are funded according to the amortization policy. This method ensures that an investment gain or loss for a year will be recognized within five years, helping to stabilize employer rates while still resulting in rates that are reasonably reflective of current market conditions. In addition, the board has the ability to set aside reserves from investment earnings that are used to help offset future negative economic cycles. These reserves are held separately and are not counted as part of a participating employer's plan assets until they are passed through to employers when determined necessary by the board. Reserves help maintain rate stability for employers. In addition, reserves ensure that employers do not adopt benefit increases based on a temporarily lower plan cost at a high point in a market cycle and, conversely, are not as pressured to immediately reduce benefit levels during a low point in a market cycle.

#### C: CHANGES IN ACTUARIAL ASSUMPTIONS AND METHODS

There were no changes in methods, but the following changes in actuarial assumptions were reflected in the Dec. 31, 2017 actuarial valuation:

- Inflation assumption decreased from 3.0% per year to 2.75% per year, with a corresponding decrease in the general wage growth assumption from 3.5% to 3.25%.
- Slightly adjusted all mortality rates to better reflect anticipated experience
- Adjusted retirement rates to reflect people retiring at older ages
- Lowered disability retirement rates
- Adjustments made to termination rates and some employers assigned to a different termination group
- Lowered probability of withdrawal of contributions upon termination
- Adjusted merit salary scale to reflect anticipated future experience

• Adjusted payroll increase assumption for some employers to reflect the change in the general wage growth assumption and to reflect changes in anticipated experience.

#### SUMMARY ACTUARIAL DATA

#### FUNDED STATUS AND FUNDING PROGRESS

#### **Pension Trust Fund**

The funded status of the pension plan as of Dec. 31, 2017, the most recent actuarial valuation date is:

	(\$ Millions)
Actuarial Value of Assets (a)	\$ 28,975.7
Actuarial Accrued Liability (AAL) – Entry Age (b)	\$ 32,539.9
Unfunded AAL (UAAL) (b-a)	\$ 3,564.2
Funded Ratio (a/b)	89.0%
Covered Payroll (c)	\$ 6,676.5
UAAL as a Percentage of Covered Payroll [(b-a) / c]	53.4%

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment and mortality. Actuarially determined amounts are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The schedule of funding progress presents multi-year trend information about whether the actuarial values of plan assets are increasing or decreasing over time relative to the actuarial accrued liabilities for benefits.

Actuarial calculations reflect a long-term perspective. The actuarial methods and assumptions used include techniques that are designed to reduce the effects of short-term volatility in actuarial accrued liabilities and the actuarial values of assets, consistent with the long-term perspective of the calculations.

<sup>1</sup> Each county and district participating in TCDRS is financially responsible for its own plan. Therefore, the aggregate numbers shown above reflect only the aggregate condition of TCDRS and are not indicative of the status of any one plan. The valuations above reflect changes in benefits elected by individual employers.

<sup>2</sup> The entry-age actuarial cost method is used for all plans. Each valuation above reflects the actuarial cost method, assumptions and benefits in effect as of the valuation date.

<sup>3</sup> The annual covered payroll is based on the employee deposits received by TCDRS for the year ending with the valuation date.

<sup>4</sup> Revised economic and demographic assumptions due to an experience review were first used in this valuation.

12/31/16	6,563.4	11,601.0	12,309.5	26,951.9	100	100	71.4
12/31/17	6,901.3	12,712.6	12,925.2	28,975.7	100	100	72.4

Presented above is one short-term means of checking a system's progress under its funding program. The present assets are compared with: (1) current member contributions on deposit; (2) the liabilities for future benefits to current retirees and beneficiaries; and (3) the employer-financed portion of the liabilities for service already rendered by current members. In a system that has been following the discipline of level percent of payroll financing, the liabilities for current member contributions on deposit (liability 1) and the liabilities for future benefits to current retirees and beneficiaries (liability 2) will be fully covered by present assets (except in rare circumstances). In addition, the employer-financed portion of liabilities for service already rendered by current members (liability 3) will be at least partially covered by the remainder of present assets. Generally, the funded portion of liability 3 will move toward 100% over time if there are no changes in the plan benefits.

Each employer participating in TCDRS is financially responsible for its own plan. Therefore, the aggregate numbers shown above reflect only the aggregate condition of TCDRS and are not indicative of the status of any one plan.

#### TABLE 11: CONTRIBUTION RATE INFORMATION FOR PARTICIPATING EMPLOYERS

Distribution of TCDRS Plans by Year 2019 Employer Actuarially Determined Contribution Rate

Number of Depositing	Year 2019 Employer Actuarial Determined Contribution Rate Based on the Plan of Benefits in Effect 1/1/2018

#### A: ORGANIZATION

TCDRS is a statewide, agent multiple-employer, public-employee retirement system that provides the employees of participating counties and districts with retirement, disability and survivor benefits. Each county and district that participates in TCDRS maintains its own customized plan of benefits which may be changed annually. The governing body of each employer has the option to adopt or change plan provisions based on their needs and budget.

Each employer has a savings-based defined benefit plan where member benefits are based on each member's account balance at retirement and employer matching. All plan assets are pooled for investment purposes, but each employer's plan assets may be used only for the payment of benefits to the members of that employer's plan. This summary describes the plan provisions in general terms. Any questions related to the actual administration, provisions or policies of the retirement plans should be directed to TCDRS.

#### **B: MEMBERSHIP**

All full- and part-time non-temporary employees become members in TCDRS, regardless of the number of hours they work in a year. Employees in a temporary position are not eligible for membership.

#### **C: TERMINATION OF MEMBERSHIP**

TCDRS membership is terminated by a member's death, retirement, or withdrawal of a member's account.

#### **D: MEMBER DEPOSITS**

TCDRS is a savings-based plan. Every paycheck, a portion of each employee's pay — from 4% to 7% as set by the employer — is deposited into his or her TCDRS account. By law, member accounts earn 7% interest annually.

#### E: SERVICE

Members receive a month of service for each month that they make a deposit into their account. Service may also be granted for periods of employment prior to the employer joining TCDRS, and for military and certain other service. Within TCDRS, all periods of service with any TCDRS participating employers are combined. Also, service periods with other Texas public retirement plans participating with TCDRS in the Texas Proportionate Retirement Program are combined to satisfy TCDRS retirement eligibility and vesting requirements.

#### **F: ELIGIBILITY REQUIREMENTS**

#### Service Retirement Benefits

The amount of service a member needs to earn a future monthly benefit is called the vesting requirement. When a member is vested, he or she has the right to a monthly benefit at age 60 or older. Employers may choose 5-, 8- or 10-year vesting. In addition, members may retire before age 60 if they meet one of the following requirements, set by the employer:

- "Rule of" eligibility: Under these rules, vested members can retire if their age plus years of service time add up to at least 75 or 80.
- 20-year or 30-year retirement at any age: This lets members retire when they have at least 20 or 30 years of service time.

#### **Disability Retirement Benefits**

A member who is vested and who is totally and permanently disabled is eligible for an immediate disability retirement benefit. A member who is not vested is eligible for an immediate disability retirement benefit if the total and permanent disability was a result of an on-the-job injury.

#### **Survivor Benefits**

Benefits are payable to the beneficiaries or estate of a deceased member. The eligibility requirement for an employer-provided survivor benefit is four years of TCDRS service. Otherwise the survivor benefit is the deceased member's account balance.

#### G: DETERMINATION OF RETIREMENT BENEFITS

The service or disability retirement benefit is calculated based on the member's account balance and employer matching as selected by the employer, and may include other employer provided funds. The employer matching can range from a "dollar

#### **RETIREMENT PLAN: SUMMARY OF PLAN PROVISIONS**

for dollar," up to \$2.50 per \$1.00 in the member's account. The member's account and employer provided funds are combined and converted to a lifetime annuity. The retiree receives a payment every month for the rest of his or her life. Conversions to a lifetime annuity are based on a 7% discount rate and the following mortality assumptions.

- The portion of the benefit that accrues before 2018, including member deposits made before 2018 and interest and employer matching on those deposits, shall be calculated based on the UP-1984 table with an age setback of five years for retirees and an age setback of 10 years for beneficiaries, with a 30% reserve refund assumption for the single life option.
- The portion of the benefit that accrues after 2017, including member deposits made after 2017 and interest and employer matching on those deposits, shall be calculated on a generational mortality basis using the RP-2000 Combined Mortality Table, with a one-year set-forward for males and no set-forward for females, projected to 2014 using Scale AA and for projections after 2014 using 110% of MP-2014 Ultimate Projection Scale, with a 32.79% reserve refund assumption for the single life option. Mortality assumptions for these calculations are blended 50% male and 50% female for retirees, and blended 30% male and 70% female for beneficiaries.

Retirees elect to receive their monthly lifetime benefit by choosing from one of the following seven actuarially equivalent payment options.

- **Single Life option** Monthly payments cease upon death of the retiree. This option provides the highest monthly benefit.
- Guaranteed Term Benefit options The two guaranteed term benefit options are 10-year guaranteed term and 15-year guaranteed term. These options provide a lifetime monthly benefit to the retiree. In addition, if the retiree passes away within 10 or 15 years of the retirement date, the beneficiary will receive the monthly benefit until the end of the guaranteed term.
- **Dual Life options** The four dual life options are 100% to beneficiary, 75% to beneficiary, 50% to beneficiary and 100% to beneficiary with pop-up. Under each of these options, after the death of the retiree, the beneficiary receives a monthly

lifetime benefit equal to the selected percentage of the retiree's benefit payment. Under the 100% to beneficiary with pop-up option, if the beneficiary dies before the retiree, the monthly benefit amount will "pop up" to a higher monthly amount, as if the retiree had retired under the single life option.

All options pay a death benefit equal to the excess of the person's account at retirement over the total monthly benefits that have been paid.

Each employer may allow partial lump-sum payments. This allows the retiring member to receive an immediate lump-sum payment not to exceed his or her account balance, and choose a reduced monthly lifetime benefit from any of the payment options.

#### **H: FUNDING PROVISIONS**

Contributions are made monthly by both the employees and the employers based on covered payroll.

Each year the actuary determines the required contribution rate for the following year to adequately fund each employer's benefit plan using the actuarial methods described beginning on page 65. Employers may also elect to fund at a rate higher than the required rate, and may also make additional lumpsum contributions.

#### I: CHANGES IN PROVISIONS

There were no system-wide changes in plan provisions reflected in the Dec. 31, 2017 actuarial valuation.

Effective each Jan. 1 and within the parameters described previously in the summary of plan provisions, each TCDRS plan may make certain changes to their benefit levels, vesting, retirement eligibility and other plan provisions. The Dec. 31, 2017 actuarial valuation reflects plan provisions in effect for each plan as of Jan. 1, 2018.

May 3, 2018

Board of Trustees Texas County & District Retirement System Austin, Texas

Dear Trustees:

The Group Term Life Fund (GTLF) is an optional cost-sharing multiple-employer defined benefit plan that is administered by the Texas County & District Retirement System. It provides death benefits to active and, if elected, retired employees of participating employers. The financing objective of the GTLF is to operate as a group term insured benefit, charging each employer its premium based on current actuarial assumptions and its own demographic membership (number of active and retired members covered by GTLF). The funding of the GTLF is in accordance with Section 845.406 of the TCDRS statute. Contribution rates are established as a percentage of pay.

Milliman annually determines contribution rates for those employers that elect to participate in the GTLF for the Group Term Life Fund (GTLF). Additionally, Milliman performs GASB 75 financial reporting valuations of employers participating in the GTL who have elected both active and retiree coverage. It is our understanding that GASB 74 reporting is not required for the GTLF as it is not an Other Post-Employment Benefit (OPEB) trust, because it covers both actives and retirees.

The GTLF provides death benefits to both active and retired members. Each participating employer can elect to cover just active members, or active and retired members. The required contribution rates for funding purposes are equal to a premium rate that is individually determined for each participating employer annually, and is based on the mortality and service experience of all employees and retirees covered by the fund and the demographics specific to the workforce of the participating employer. The rate is expressed as a percentage of the compensation of members employed by the participating employer. The required contributions are determined using a one-year term cost funding method.

Milliman provided the summarized information about the GTLF that TCDRS has used in preparing Tables 14, 15, and 16 in the actuarial section. The assumptions and methods used in the funding calculations are also summarized in the actuarial section.

Sincerely,

Mark C Olleman Mark C. Olleman, FSA, EA, MAAA

#### A: ACTUARIAL ASSUMPTIONS AND METHODS

The actuarial assumptions used in the funding valuation for the Group Term Life plan are described below and were developed from an actuarial investigation of the experience of TCDRS over the years 2013-2016. They were recommended by Milliman, Inc., adopted by the TCDRS Board of Trustees in 2017 and first used in the Dec. 31, 2017 actuarial valuation.

#### **Mortality Rates**

Same as for retirement plan.

#### **Investment Return**

The rate of return is 7%, which is a statutory allocation and is not dependent on investment earnings.

#### Actuarial Cost Method

For funding purposes, the unit credit cost method is used for determining the cost of one-year term life insurance for both active employees and retirees. The only demographic assumptions used for determining funding requirements are active employee mortality rates and retiree mortality rates.

#### Actuarial Value of Assets

As contribution rates are based on the one-year term life insurance cost, the GTLF assets are not included in the calculation.

#### Changes in Actuarial Assumptions and Methods

There were changes in the mortality assumptions first reflected in the Dec. 31, 2017 Group Term Life Plan actuarial funding valuation. Overall, the new mortality rates had a small impact on the GTLF contribution rates with slightly more employers seeing decreases in rates than those seeing increases.

#### **B: PLAN PROVISIONS**

#### Participation in the Group Term Life Plan

Employers who participate in the TCDRS retirement plan may elect to participate in the Group Term Life plan. Employers may elect to cover members who are active employees only or both members who are active employees and retirees, and may elect to change or discontinue coverage annually.

#### **Benefit Eligibility**

The county or district must have elected the applicable Group Term Life coverage for the calendar year in which a member who is an active employee or retiree dies.

#### Amount of Insurance Benefit

If death occurs while the member is actively employed, the benefit is an amount equal to the employee's most recent regular annualized salary. The insurance benefit payable upon the death of a retiree is \$5,000.

#### **GTLF: SUMMARY OF ACTUARIAL ASSUMPTIONS, METHODS AND DATA**

## **64,000** RETIREES

TCDRS retirees return value to Texas. The majority of our retirees live in the communities they served as employees. The benefit dollars that flow into local economies help support businesses and jobs. In 2017, TCDRS sent out \$1.4 billion in benefit payments.

# Statistical

#### **INTRODUCTION**

The Statistical Section provides additional detail to assist you in interpreting the information in the Financial Statements, Notes to Financial Statements and Required Supplementary Information. The information is presented in two main categories: Financial Trends Data and Demographic and Operating Information.

The Financial Trends Data illustrates how TCDRS' financial position has changed over time. The changes in net position for the last 10 fiscal years show additions by source, deductions by type and the total change in Pension Trust Fund and Group Term Life Fund (GTLF) net position for each year. The pension benefit expenses by type gives data on benefits paid and withdrawal deductions for the last 10 fiscal years.

The Demographic and Operating Information provides details about TCDRS' operations and membership. The schedule of New Retiree Average Benefits gives the average monthly benefit and number of retired members, organized by five-year increments of credited service, for the last 10 fiscal years. Data is given for both pension benefits and for GTLF benefit payments. This section also includes information on the number of annuitants grouped by age and by type of benefits, along with a description of the retirement payment options. The schedule of largest participating employers compares the number of current members for those employers for the most recent year-end and as of nine years ago.

Totals	63,	628					63,628				

<sup>1</sup> Includes Alternate Payees of Retirees.

<sup>2</sup> Retirement payment option is no longer available to new retirees.

#### RETIREMENT BENEFIT PAYMENT OPTIONS

All options pay the retiree a monthly benefit for life and, when a retiree passes away, guarantee that the total benefit paid will equal, at a minimum, the total accumulated contributions of the retiree.

#### Single Life

Payments cease upon the death of the retiree.

#### 15-year Guaranteed Term

If the retiree dies within 15 years of retirement, the beneficiary will receive the same monthly payment as the retiree for the balance of the 15-year period, at which time payments cease.

#### 10-year Guaranteed Term

If the retiree dies within 10 years of retirement, the beneficiary will receive the same monthly payment as the retiree for the balance of the 10-year period, at which time payments cease.

#### 50% to Beneficiary

At the death of the retiree, the beneficiary will receive 50% of the retiree's monthly payment throughout the beneficiary's life.

#### 75% to Beneficiary

At the death of the retiree, the beneficiary will receive 75% of the retiree's monthly payment throughout the beneficiary's life.

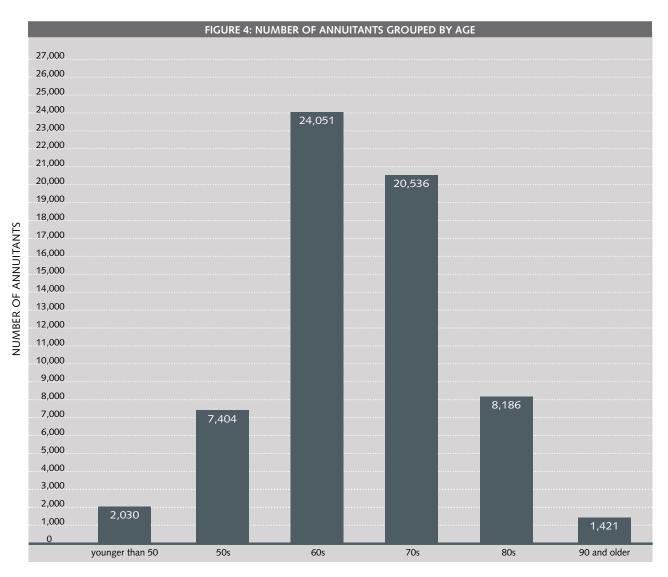

#### 100% to Beneficiary

At the death of the retiree, the beneficiary will receive 100% of the monthly amount paid to the retiree throughout the beneficiary's life.

#### 100% to Beneficiary with Pop-up

If the beneficiary survives the retiree, monthly payments equal to 100% of the monthly amount paid to the retiree continue to the beneficiary for life. If the retiree outlives the beneficiary, the monthly payment amount will increase (pop up) after the beneficiary's death to the higher amount of the Single Life option.

<b>2017</b> Average Benefit Payment Number of Payments	\$41,175 81	\$5,000 202

#### ACTUARIAL ACCRUED LIABILITY

The portion, as determined by the actuarial cost method, of the Actuarial Present Value of pension plan benefits and expenses that is not provided for by future Normal Costs.

#### **ACTUARIAL ASSUMPTIONS**

In order to estimate the cost of funding benefits, the actuaries use long-term assumptions. Examples include mortality, termination, disablement and retirement; changes in salary; payroll growth; investment returns and other relevant items. Actuarial assumptions are adopted by the board of trustees upon recommendation of the consulting actuaries. The assumptions are reviewed every four years.

#### **ACTUARIAL GAIN (LOSS)**

The difference between actual results and what was projected to happen based on Actuarial Assumptions during the period between annual Actuarial Valuations.

#### ACTUARIAL PRESENT VALUE

The calculated value of a series of projected cash flows expressed in present day dollars as of the valuation date using actuarial assumptions.

#### **ACTUARIAL VALUATION**

The process to calculate the employer contribution rate. This process determines the Normal Cost, Actuarial Accrued Liability, Actuarial Value of Assets and Actuarial Present Values.

#### **ACTUARIAL VALUE OF ASSETS**

The value of cash, investments and other property belonging to a pension plan, as used by the actuary for the purpose of an Actuarial Valuation.

#### ACTUARIALLY EQUIVALENT PAYMENT OPTIONS

Different benefit payment options that pay different amounts per month, but are of equal value at the time the option is selected.

#### **ALERIAN MLP INDEX**

This index is a composite of the 50 most prominent energy Master Limited Partnerships. The index is calculated using a float-adjusted, capitalizationweighted methodology.

#### **BASIC BENEFIT**

Benefits attributable to the member's accumulated deposits and an equal matching amount provided by the employer.

#### **BENCHMARK PORTFOLIOS**

Portfolios represented by specific indices that are created for the purpose of measuring the relative performance of investment managers, asset classes and, in the case of the Policy Benchmark Portfolio, the entire TCDRS portfolio. Data regarding performance of these benchmark portfolios during any period indicate the returns that were available during the period for comparable investments that were passively managed. Comparisons indicate the value added by each manager, if any, in excess of the performance that was experienced by the specific benchmark index.

#### BLOOMBERG BARCLAYS U.S. AGGREGATE BOND INDEX

This index incorporates all domestic debt issues with maturities greater than one year and in amounts greater than \$1 million. Included are publicly issued, nonconvertible, domestic debt issues of the U.S. government and its agencies and corporations in industrial, utility or financial segments.

#### BLOOMBERG BARCLAYS U.S. 10-YEAR BREAKEVEN INFLATION INDEX

This index is designed to provide access to 10-year breakeven inflation by capturing the returns of a simultaneous long position in 10-year inflation linked securities and a short position in suitable nominal comparator U.S. Treasury bonds.

#### **BLOOMBERG COMMODITIES INDEX**

This index is composed of futures contracts on physical commodities. It provides broad-based exposure to commodities, with no single commodity or sector dominating the index. The liquidity and diversity of the benchmark makes it suitable for institutional investment.

#### CAMBRIDGE ASSOCIATES DISTRESSED SECURITIES INDEX

A custom benchmark index provided by Cambridge Associates based on data compiled from more than 200 distressed debt funds, including fully liquidated partnerships with first cash flows beginning in 2005. The benchmark return is net of fees, expenses and carried interest.

#### CAMBRIDGE ASSOCIATES GLOBAL PRIVATE EQUITY & VENTURE CAPITAL INDEX

A custom benchmark index provided by Cambridge Associates based on data compiled from more than 1,500 global private equity and venture capital funds, including fully liquidated partnerships, with first cash flows beginning 2006. The benchmark return is net of fees, expenses and carried interest.

#### CAMBRIDGE ASSOCIATES REAL ESTATE INDEX

A custom benchmark index provided by Cambridge Associates based on data compiled from nearly 400 global private real estate funds, including fully liquidated partnerships with first cash flows beginning 2007. The benchmark return is net of fees, expenses and carried interest.

#### COMMODITIES

Investment in resources that can be perishable (grains, sugar, etc.) and non-perishable (metals, energy, etc.). Commodities provide protection against inflation and have low correlation to stocks and other asset classes.

#### DIRECT LENDING

Privately originated debt made to small to mediumsized companies or to real estate investors in order to take advantage of disruptions in the banking system.

#### DISTRESSED DEBT

Distressed debt investments are investments in partnerships that purchase the debt of companies experiencing financial distress ranging from deteriorating financial conditions to bankruptcy. Strategies employed include trading, participating in restructuring transactions and controlling bankruptcy proceedings.

#### DOW JONES U.S. TOTAL STOCK MARKET INDEX

This index is one of the broadest measures of domestic equity performance since it is computed based upon all equity trades of U.S. stocks during any day. Each company included within the index is not equally weighted within the index, but rather is weighted according to its market value among the market values of all U.S. companies.

#### EMPLOYER REQUIRED CONTRIBUTION RATE

The percentage of payroll the employer is required to contribute to fund future benefits for their current employees, former employees and retirees. It is the sum of the Normal Cost Contribution Rate and the Unfunded Actuarial Accrued Liability Contribution Rate.

#### ENTRY-AGE ACTUARIAL COST METHOD

An actuarial cost method under which the Actuarial Present Value of the Projected Benefits of each individual included in an Actuarial Valuation is allocated on a level basis over the earnings or service of the individual between entry age and assumed exit ages. The portion of this Actuarial Present Value allocated to a valuation year is called the Normal Cost. The portion of this Actuarial Present Value not provided for at a Valuation Date by the Actuarial Present Value of future Normal Costs is called the Actuarial Accrued Liability.

#### FOREIGN CURRENCY FORWARD CONTRACTS

Forward contracts are over-the-counter agreements between two parties to buy and sell a currency at a set price on a future date. The contracts are markedto-market on each valuation date with any resulting unrealized appreciation or depreciation recorded on such date. Realized gains or losses equal to the value of the contract when it was opened and the settlement amount at the time the contract is closed (or rolled) are recorded upon receipt of the currency.

#### FTSE EPRA/NAREIT GLOBAL REAL ESTATE INDEX

This index, developed by The Financial Times and London Stock Exchange (FTSE) in conjunction with the European Public Real Estate Association (EPRA) and National Association of Real Estate Investment Trusts (NAREIT) includes worldwide listed stocks of income-producing real estate.

#### FTSE HIGH-YIELD CASH-PAY CAPPED INDEX

This index includes cash-pay bonds with a belowinvestment-grade rating by both Moody's Investor Services and Standard & Poor's. The bonds must have a maturity of at least one year and a minimum amount outstanding of \$100 million. The par value of individual issuers is capped at \$5 billion par outstanding.

#### FTSE NAREIT ALL EQUITY REIT INDEX

This index gives a broad exposure to U.S. publicly traded equity REITs in every property sector.

#### **GLOBAL EQUITY**

Investments in stocks included in all public markets, both domestic and international.

#### HEDGE FUND RESEARCH INSTITUTE (HFRI) FUND OF FUNDS COMPOSITE INDEX

This index consists of more than 650 funds with each managing a group of diverse hedge funds. Each fund of funds has at least \$50 million under management or has been actively trading for at least twelve months. The index includes both domestic and offshore funds that offer diverse strategies. All constituent funds report returns net of fees on a monthly basis.

#### **HEDGE FUNDS**

An investment strategy applied to a variety of different investments to help manage risk within the entire portfolio. Over a full market cycle, hedge funds produce equity-like returns with less than half the risk of stocks. Hedge funds do well when markets are up and mitigate losses during market downturns.

#### **HIGH-YIELD BONDS**

Domestic fixed-income securities that have not been highly rated by national rating agencies, such as Moody's Investors Service (Moody's) or Standard & Poor's (S&P). A security is considered a high-yield bond if it is rated below Baa3 by Moody's or below BBB- by S&P. To pay for the risk, the interest rates earned are higher than investment-grade bonds.

#### **INVESTMENT-GRADE BONDS**

The investment-grade bonds portfolio consists of debt securities issued by the U.S. Treasury or an agency or government-sponsored entity (GSE) of the United States (U.S. governments); mortgagerelated instruments, U.S. dollar-denominated fixed-income securities issued by U.S. and foreign corporations; and U.S. dollar-denominated debt issued by foreign governments and supranationals. Additionally, these portfolios may contain minimal investments in short-term instruments, non-rated securities, private placement securities, convertible bonds and preferred stock. The portfolio should exhibit an overall dollar-weighted average quality rating of AA.

#### MASTER LIMITED PARTNERSHIPS (MLPS)

Publicly traded partnership interests created by Congress to encourage investment in domestic energy infrastructure. At the entity level, these interests are tax free provided that 90% of their income comes from natural resources such as oil, natural gas, coal, timber and other depletable resources.

#### MSCI EAFE INDEX (EUROPE, AUSTRALASIA, FAR EAST)

This index, prepared by Morgan Stanley Capital International (MSCI), is designed to measure developed market equity performance excluding the United States and Canada.

#### MSCI EMERGING MARKETS (EM) INDEX

This index, prepared by Morgan Stanley Capital International (MSCI), captures large and mid-cap performance across 23 emerging market countries with 835 constituents.

#### MSCI WORLD EX U.S.

This index, prepared by Morgan Stanley Capital International (MSCI), is designed to measure developed market equity performance excluding the United States.

#### NORMAL COST

The portion of the Actuarial Present Value of pension plan benefits and expenses that is allocated to a valuation year by the actuarial cost method.

#### NORMAL COST CONTRIBUTION RATE

This is the rate required to fund current employees' benefits over their projected careers. It is equal to the Actuarial Present Value at hire of Projected Benefits divided by the Actuarial Present Value at hire of anticipated future compensation. It is calculated for each contributing member and the average is weighted by compensation.

#### **OPPORTUNISTIC CREDIT**

Comprises investments primarily in debt instruments that provide return opportunities resulting from dislocations in capital markets.

#### OVERFUNDED ACTUARIAL ACCRUED LIABILITY (OAAL)

The excess, if any, of the Actuarial Value of Assets over the Actuarial Accrued Liability.

#### **GLOSSARY**

#### PLAN YEAR

The period from Jan. 1 to Dec. 31 inclusive.

#### PRIOR SERVICE

Benefits attributable to an amount provided by the employer for service rendered by an employee prior to employer participation in TCDRS.

#### PRIVATE EQUITY

Private partnerships that (a) take public companies private in order to improve their operations and resell them in the future; (b) invest in start-up companies with new ideas or technologies; and (c) invest in both traditional and renewable energy discovery and production.

#### PRIVATE REAL ESTATE

Non-publicly traded vehicles that invest in a broad array of real estate properties and ventures. Private real estate investments are expected to be very illiquid and long term in nature. The vehicles for private real estate investments are typically partnerships, but may also include other entities such as limited liability companies or offshore corporations.

#### **PROJECTED BENEFITS**

Retirement benefit amounts that are estimated to be paid at various future times under a particular set of Actuarial Assumptions, taking into account such factors as the effect of advancement in age, and past and anticipated future compensation and service time.

#### REITS

Real estate investment trusts are companies that own and operate income-producing real estate, such as commercial office buildings, apartments, malls, warehouses and storage facilities. Under provisions of the U.S. tax law, if REITs pay out most of their income, they do not pay income taxes. This means higher income earnings along with any increase in the value of the real estate.

### S&P/LSTA LEVERAGED LOAN TOTAL RETURN INDEX

This index is a market value-weighted index designed to measure the performance of the U.S. leveraged loan market based upon market weights, spreads and interest payments.

#### TIPS

Treasury Inflation-Protected Securities are bonds issued by the U.S. Treasury just like other U.S. government bonds. However, the principal amount of TIPS increases with the rate of inflation so that inflation does not decrease the value of the bond. They provide a way to protect against inflation.

#### UNFUNDED ACTUARIAL ACCRUED LIABILITY (UAAL)

The excess, if any, of the Actuarial Accrued Liability over the Actuarial Value of Assets.

#### UNFUNDED ACTUARIAL ACCRUED LIABILITY CONTRIBUTION RATE

The amount needed to amortize the Unfunded Actuarial Accrued Liability over a closed period of 20 years, expressed as a percent of payroll. If the plan has an Overfunded Actuarial Accrued Liability, it is amortized over an open period of 30 years, and the resulting negative Unfunded Actuarial Accrued Liability Contribution Rate is offset against the Normal Cost Contribution Rate.

## Service doesn't stop at retirement

Walker County retiree Byron Bush made a career out of helping people. After 33 years in state and county law enforcement, Byron retired and started enjoying some of the many benefits of retired life, like taking time to go hunting and fishing.

He also spends his time being a volunteer firefighter for Walker and Taylor counties, a vocation he started while still in law enforcement. Soon after retirement, he earned his EMT certification.

"My most rewarding experiences have been from being a firefighter or EMT," he said in 2014. "It's a chance to give someone a chance they might not otherwise have."

Byron and so many other former county and district employees continue to serve their communities after retirement — doing everything from preserving endangered wildlife to playing Santa Claus at a local nursing home.

They make their piece of Texas a better place. It's another reason why TCDRS is proud of who we serve.
