# Houston Police Officers' Pension System

ACTUARIAL VALUATION REPORT FOR THE YEAR BEGINNING JULY 1, 2018

November 28, 2018

Board of Trustees Houston Police Officers' Pension System 602 Sawyer Suite 300 Houston, TX 77007

Re: Risk Sharing Valuation Study as of July 1, 2018

Dear Members of the Board:

We are pleased to present our Risk Sharing Valuation Study (RSVS, or sometimes referred to as the actuarial valuation in the report) of the Houston Police Officers' Pension System ("HPOPS" or "the System") for the plan year commencing July 1, 2018. This Report describes the current actuarial condition of HPOPS, determines the calculated employer contribution rate (the actuarially determined rate), and analyzes changes in this contribution rate from the prior year. Valuations are prepared annually, as of July 1st, the first day of the HPOPS' plan year. This report was prepared at the request of the Board and is intended for use by the HPOPS staff and those designated or approved by the Board. This report may be provided to parties other than HPOPS staff only in its entirety and only with the permission of the Board, or as required by law.

#### Financing objectives and funding policy

Under the HPOPS statute, the employer contribution rate is determined actuarially, based on the Board's funding policy and HPOPS' governing law. The contribution rate determined by a given actuarial valuation and implemented by the Board becomes effective twelve months after the valuation date, i.e., the rates determined by this July 1, 2018 actuarial valuation will be used by the Board when determining the employer contribution rate for the year beginning July 1, 2019 and ending June 30, 2020.

While inside the RSVS Corridor, the actual City Contribution Rate will be the greater of the Estimated City Contribution Rate determined below and the Corridor Midpoint that was established in the June 30, 2016 RSVS. The Estimated City Contribution Rate (City of Houston) for FY 2020 is 31.58%, which is less than the Corridor Midpoint of 31.82%, thus the City Contribution rate for FY2020 is 31.82%.

The Estimated City Contribution Rate and liabilities are computed using the Ultimate Entry Age Normal (UEAN) actuarial cost method. The Estimated City Contribution Rate is the sum of two pieces: the employer normal cost rate and the amortization rate. The normal cost rate is determined as a percentage of active member payroll, with the employer normal cost being the difference between the total normal cost and the member contribution rate. The amortization rate is determined as a level percentage of active member payroll. It is the amount required to amortize the unfunded actuarial accrued liability (UAAL) over a closed period using the process of "laddering".

Board of Trustees November 28, 2018 Page 2 of 4

The UAAL as of June 30, 2016, as restated in the "Final Risk Sharing Valuation Study as of June 30, 2016" (RSVS Study), which was dated September 28, 2017, is the initial base and is amortized over a closed 30-year period beginning FY2018. Each future valuation will establish either a liability gain layer or a liability loss layer. These layers will represent unexpected increases/decreases in the unfunded actuarial accrued liability (after subtracting out any remaining Legacy Liability or any remaining prior years' liability layers). New loss bases will be amortized over a 30-year period, while new gain bases will be amortized over the remaining amortization period as of one year after the valuation date of the largest remaining loss base (will typically be the initial RSVS base). The amortization of all bases will begin one year after the valuation date using a level percentage of payroll amortization method. Note that in the prior valuation, the AVA was increased by the present value of an expected \$750 million in Pension Obligation Bonds (POB), discounted from January 1, 2018 at 7.00%. The proceeds from the POB issuance are reflected in the employer contribution for the year ending June 30, 2018, so the beginning of year actuarial value of assets has been adjusted in the calculations in tables 10 through 12 of Section IV to exclude the adjustment made in the prior valuation.

Gains from assets returning 9.46% on an AVA basis compared to the 7.00% assumed were largely offset by payroll growth lower than assumed, an upcoming cost of living adjustment (COLA) greater than assumed, and a liability loss due to several factors including fewer retiree deaths than expected. Note that the calculation of the COLA (return on AVA less 5.0% with a minimum of 0.0% and max of 4.0%) means that gains due to asset performance will necessarily result in liability losses due to COLAs being greater than assumed, while asset losses will result in liability gains from COLAs being less than assumed. The impact of the COLAs being different than assumed will be larger in magnitude once the Plan is outside the three-year COLA holiday. Please see Table 6 under Section IV of our Report for a detailed analysis of the change in the estimated City contribution rate from the prior year to this year.

The contribution rate is determined using an actuarial value of assets rather than market value. The actuarial value of assets recognizes 20% of the difference (typically referred to as "five year smoothing") between the market value of assets and the expected actuarial value of assets, based upon the assumed valuation rate of return of 7.00% per annum. There are currently \$357.8 million in asset gains being deferred that will be recognized in the future and will provide some help with improvement in the funded status absent future asset losses.

#### Progress toward realization of financing objectives

The funded ratio (the ratio of the actuarial value of assets to the actuarial accrued liability) is a standard measure of a plan's funded status. In the absence of benefit improvements, it should increase over time, until it reaches 100%. The funded ratio as of July 1, 2018 is 79.3% which is up compared to last year's funded ratio of 78.3%. The funded ratio measured on the market value of assets is higher at 84.9% as of July 1, 2018. The funded status alone may not be appropriate for assessing the sufficiency of plan assets to cover the estimated cost of settling the plan's benefit obligations.

#### **Benefit provisions**

The benefit provisions reflected in this valuation are those which were in effect on July 1, 2018. There were no changes in the benefit provisions since the prior valuation. The benefit provisions are summarized in Appendix B of our Report.

Board of Trustees November 28, 2018 Page 3 of 4

#### **Assumptions and methods**

Actuarial assumptions and methods are set by the Board of Trustees, based upon recommendations made by the System's actuary. As part of the legislation enacting the 2016 RSVS benefit changes, the investment return assumption (7.0%) was set into statute (Article 6243g-4, Vernon's Texas Civil Statutes). This assumption is now considered a prescribed assumption under the actuarial standards of practice. The assumptions used in this valuation were adopted by the Board based on the recommendations from GRS following the Actuarial Experience Investigation Study for the 5-year period ending June 30, 2017. These assumptions were first used in the current actuarial valuation. Changes from the experience study included updating the mortality tables, minor changes to the retirement rates, and adjustments to the disability rates. See Section III of this report for a more detailed summary of changes.

The results of the actuarial valuation are dependent upon the actuarial assumptions used. Actual results can and almost certainly will differ, as actual experience deviates from the assumptions. Even seemingly minor changes in the assumptions can materially change the liabilities, calculated contribution rates and funding periods. The actuarial calculations presented in our Report are intended to provide information for rational decision making.

The actuarial assumptions and methods used in this Report all comply with the actuarial standards of practice (ASOPs) and are described in Appendix A of our Report.

#### Data

Member data for retired, active and inactive members was supplied as of July 1, 2018 by the HPOPS staff. We did not audit this data, but we did apply a number of tests to the data, and we concluded that it was reasonable and consistent with the prior year's data. GRS is not responsible for the accuracy or completeness of the information provided to us.

Asset and all financial information as of July 1, 2018 were supplied to us by the HPOPS staff.

#### **Plan Experience**

As part of each valuation, we examine the System's experience relative to the assumptions. The aggregate results of these analyses are disclosed in Tables 5 & 6 under Section IV of our Report.

#### **Actuarial Certification**

All of the tables contained in this actuarial valuation report and in the actuarial section of the HPOPS Comprehensive Annual Financial Report (CAFR) were prepared by Gabriel, Roeder, Smith & Company. Historical information for years prior to 2008 was prepared by the prior actuarial firm and was not subjected to our actuarial review. We certify that the information presented herein is accurate and fairly portrays the actuarial position of HPOPS as of July 1, 2018.

All of our work conforms with generally accepted actuarial principles and practices, and to the Actuarial Standards of Practice issued by the Actuarial Standards Board. In our opinion, our calculations also comply with the requirements of State law and the Statements of the Governmental Accounting Standards Board. The undersigned are independent actuaries and consultants. All of the undersigned are Enrolled Actuaries, Members of the American Academy of Actuaries, and meet the Qualification Standards of the American Academy of Actuaries. Finally, all of the undersigned are experienced in performing valuations for large public retirement systems.

Respectfully submitted,

Gabriel, Roeder, Smith & Company

**RISK SHARING VALUATION STUDY** 

#### RISK SHARING VALUATION STUDY DISCUSSION

The purpose of the Risk Sharing Valuation Study (RSVS) is to determine the City Contribution Rate for the fiscal year beginning one year after the valuation date. The initial RSVS study was based on the membership and financial information as of the June 30, 2016 valuation, and the results are detailed in the actuarial impact statement dated September 25, 2017. The initial RSVS determined the Corridor and Corridor midpoint to be used in this and all future RSVS studies.

The first exhibit in this section shows the RSVS Corridor. Column 3 shows the Corridor Midpoint, which for fiscal year 2020, is 31.82% of pay. Columns 2 and 4 show the Corridor Minimum and Corridor Maximum respectively. Column 5 shows the actual City Contribution Rate for the fiscal year.

The next exhibit shows the individual pieces and Estimated City Contribution Rate. While only three years of information are shown, this table is intended to show historic information in the future.

The third exhibit shows the Liability Gain/Loss Layers established by each RSVS. Columns 2 and 3 show the original liability layer and any remaining liability layer respectively. Column 4 is the payment on that particular layer for the fiscal year beginning one year after the valuation date. The payment is determined using a level percentage of payroll and the remaining amortization period is shown in column 5. The payments reflect the one year delay between the determination of the payment and the beginning of the fiscal year in which the payment is made. The dollar amounts of the payments are summed and then converted to a percentage of payroll based on the projected payroll for the fiscal year beginning one year after the valuation date.

## RISK SHARING VALUATION STUDY CORRIDOR

				City
Fiscal Year	Corridor	Corridor	Corridor	Contribution
Ending	Minimum	Midpoint	Maximum	Rate

### **SECTION III**

**DISCUSSION** 

#### **CONTRIBUTION REQUIREMENTS**

- The above Executive Summary shows the City Contribution Rate for FY 2020 to be 31.82% of active member payroll
  - The Estimated City Contribution Rate was 31.58%, a decrease from 31.74% of active member payroll for FY 2019
  - The final City Contribution Rate is the greater of the City Contribution Rate or the Corridor Midpoint of 31.82%.
  - Gains from assets returning 9.46% on an AVA basis compared to the 7.00% assumed were largely offset by payroll growth lower than assumed, an upcoming cost of living adjustment (COLA) greater than assumed, and a liability loss due to several factors including fewer retiree deaths than expected.
  - Rates shown on the Executive Summary are calculated rates for the twelve-month period beginning July 1, 2019, based on current board policy
  - Table 6 under Section IV of our Report reconciles the Estimated City Contribution Rate from the prior valuation date to the current valuation date
- Projected FY 2020 payroll was based on the prior year's annualized salaries of the active members as of July 1, 2018 of \$426.7 million rolled forward two years at the 2.75% assumed payroll growth rate.
- There were no changes to the benefit provisions since the previous actuarial valuation
- There were several changes to the demographic actuarial assumptions since the RSVS Study and first
  reflected in this actuarial valuation. Changes resulting from the experience study following the July 1,
  2017 actuarial valuation include updated mortality tables, minor changes to the retirement rates, and
  adjustments to the disability rates.
- The amortization payments are developed based upon the following assumptions:
  - Laddering of bases with initial base set up with the June 30, 2016 RSVS study
  - 30-year closed funding period for each new gain or loss base
  - Dollar contribution amounts increase as a level percentage of payroll
  - Total payroll increases 2.75% per year

#### **CALCULATION OF CONTRIBUTION RATES**

The funds available to pay benefits come from two sources, contributions and investment income on those contributions (the majority of the funds available to pay benefits typically come from investment income). HPOPS receives contributions from two sources, employer contributions which are currently based on the funding policy prescribed by statute and member contributions which are a percentage of pay. As shown in Table 2 under Section IV of our Report, the Estimated Employer Contribution Rate has two components:

- The normal cost percentage (NC%)
- The amortization percentage (UAAL%)

The normal cost is the present value of the portion of projected benefits that is attributable to service accrued in the current year. The NC% is shown in Table 4 under Section IV of our Report.

Members are required to make employee contributions and only the excess of the NC% over the member contribution rate is included in the employer contribution rate.

The actuarial accrued liability (AAL) is the difference between (i) the actuarial present value of all future benefits for the current participants of the fund, including active, inactive and retired members, and (ii) the actuarial present value of future normal costs. Thus the AAL represents the liability associated with past years. The unfunded actuarial accrued liability (UAAL) is the difference between the AAL and the actuarial value of assets (AVA). It is the shortfall/excess between the liability associated with prior years (the AAL) and the assets actually accumulated (the AVA). This shortfall/excess can arise from several sources, including actuarial gains and losses which are caused by differences between actual experience and the plan's assumptions, changes to the plan's actuarial assumptions, and amendments to the benefit provisions.

The UAAL% is the amount required to fund this difference and is developed using the process of laddering with the initial base established in the July 1, 2016 RSVS Study and amortized over a closed 30-year period beginning FY2018 as a level percentage of payroll. Each future valuation will establish either a liability gain layer or a liability loss layer. These layers will represent unexpected increases/decreases in the unfunded actuarial accrued liability (after subtracting out any remaining Legacy Liability or any remaining prior years' liability layers). New loss bases will be amortized over a 30-year period, while new gain bases will be amortized over the remaining amortization period as of one year after the valuation date of the largest remaining loss base (will typically the initial RSVS base). The amortization of all bases will begin one year after the valuation date using a level percentage of payroll amortization method. Item 11a of Table 2 in Section IV of our Report shows the UAAL%.

While inside the RSVS Corridor, the actual City Contribution Rate will be the greater of the Estimated City Contribution Rate determined below and the Corridor Midpoint that was established in the June 30, 2016 RSVS.

#### FINANCIAL DATA AND EXPERIENCE

As of July 1, 2018, HPOPS has a total market value of about \$5.49 billion. Financial information was gathered from the HPOPS staff.

Our Report includes a number of Exhibits related to plan assets. Table 8 under Section IV of our Report shows how the total market value is distributed among the various asset classes of investments. Currently 33.6% of invested assets are held in commingled funds and ETFs consisting of US and Non-US public equity securities and while it is not readily apparent from Table 8, short term investments are used as collateral for additional public equity exposure obtained through the futures market for a combined public equity exposure of 54.53% compared with a 50.25% investment policy target. Comparable figures for the prior year are 54.53% total exposure to public equity with the same 50.25% public equity target. HPOPS has 9.46% invested in a variety fixed income strategies that are either interest rate sensitive or credit oriented strategies, some of which are classified in the schedule on Table 8 as Fixed Income while other strategies are classified in Table 8 as Alternative Investments. This compares to an investment policy target of 12.00% for all of these fixed income strategies. Comparable figures for the prior year are a 9.46% total exposure to these fixed income strategies with the same 12.00% target.

Table 9 under Section IV of our Report shows a reconciliation of the market values between the beginning and end of FY2018.

During FY2018, the dollar-weighted total investment return on the market value of assets (MVA) was 9.77%, net of investment expenses, as shown in Table 11 under Section IV of our Report. The Comprehensive Annual Financial Report (CAFR) states the time-weighted return for FY2018 was 10.20%.

In determining the contribution rates and funded status of the System, an actuarial value of assets (AVA) is used, rather than the market value of assets. The AVA recognizes 20% of the difference between the projected actuarial value (based on last year's annual assumed 7.00% investment return rate) and the market value at the valuation date. This is an approximation of five year smoothing and is intended to help reduce the volatility of the contribution rates from year to year. In the prior valuation the AVA was increased by the present value of an expected \$750 million in Pension Obligation Bonds (POB), discounted from January 1, 2018 at 7.00%. However, the proceeds from the POB issuance are reflected in the employer contribution for the year ending June 30, 2018, so the beginning of year actuarial value of assets has been adjusted in the calculations in tables 10 through 12 of Section IV to exclude the adjustment made in the prior valuation.

The development of the AVA is shown in Table 10 under Section IV of our Report. The AVA as of July 1, 2018 increased to \$5.13 billion from \$4.87 billion as of the last valuation. This year, the AVA is 93.5% of the MVA compared to 93.0% last year (prior to the adjustment for the POB).

In addition to the market return, Table 11 also shows the return on the actuarial value of assets for HPOPS. For FY2018, this return was 9.46%. Because this is greater than the assumed 7.00% investment return, an actuarial gain occurred, decreasing the unfunded actuarial accrued liabilities of the System by \$109 million. Table 13 shows a historical summary of market and actuarial return rates in recent years.

#### MEMBER DATA

Member data as of July 1, 2018 was supplied electronically by the HPOPS staff. While we did not audit this data, we did perform various tests to ensure that it was internally consistent, consistent with the prior year's data, and was reasonable overall.

Table 19 under Section IV of our Report shows the number of members by category (active, inactive, retired, etc.). Tables 20a-d show active member statistics by Group. Tables 17 and 18 show summaries of certain historical data, including membership statistics.

The number of active and DROP members was 5,226 as of July 1, 2018, up from 5,164 as of July 1, 2017.

The total payroll shown on the statistical tables is the amount that was supplied by HPOPS, annualized, if necessary. For the cost calculations, the pay amounts were adjusted in accordance with the actuarial assumptions to reflect one year's salary increase.

Total projected active member payroll decreased 0.50% last year, compared with a 3.84% increase the prior year.

The rate of payroll growth is significant because the methodology used in the valuation to amortize the unfunded actuarial accrued liability assumes a growing payroll into the future. If the payroll does not grow at the assumed 2.75% per year average, the current amortization payments may be understated and the funding position of the System will not strengthen over time.

#### **BENEFIT PROVISIONS**

Appendix B of our Report includes a summary of the benefit provisions for HPOPS. There were many significant benefit changes effective since the prior actuarial valuation, and these were detailed in the "Final Risk Sharing Valuation Study as of June 30, 2016" dated September 25, 2017. A brief summary of the current benefit provisions inclusive of the changes is provided below.

- Normal Retirement Eligibility
  - Sworn Prior to October 9, 2004 20 years of service
  - Sworn on or after October 9, 2004 Age 55 with 10 years of service or the Rule of 70 (age plus service greater or equal to 70)
- Normal Retirement Benefit
  - Sworn Prior to October 9, 2004 2.75% of average direct pay for the first 20 years of service and 2% for each year after 20
  - Sworn on or after October 9, 2004 2.25% for the first 20 years of service and 2% for each year after 20 up to a maximum of 80%
- Normal Form of Payment is a 100% Joint & Survivor Annuity for married retirees and Life Annuity for unmarried retirees
- Employee Contributions 10.50% for all employees.
  - Contributions of employees in DROP are no longer credited to the DROP account.
- Post-retirement Cost of Living Adjustments (COLA) are granted each year on April 1 and is calculated prospectively at 100% of the 5-year average investment return less 5.0%. However, the COLA can never be less than 0.0% or greater than 4.0%. This COLA is applied to retirement and survivor benefits and is included in the benefit payment made at the end of April.
  - COLA does not apply to DROP benefits.
  - Beginning July 1, 2017 there is a 3-year moratorium on COLA's for retirees and beneficiaries under age 70 and certain line-of-duty death beneficiaries.
  - Following the moratorium, the COLA will begin at age 55 except for line-of-duty survivors and participants or survivors of participants who began receiving benefit prior to June 8, 1995.
- Insurance Benefit Retired members and surviving spouses are entitled to receive an additional stipend of \$150.00 per month to help offset the cost of medical insurance premiums

This valuation reflects all benefits offered to HPOPS members. There are no ancillary benefits that might be deemed a HPOPS liability if continued beyond the availability of funding by the current funding source. There were no changes in benefit provisions since the prior valuation.

#### **ACTUARIAL METHODS AND ASSUMPTIONS**

Appendix A of our Report includes a summary of the actuarial assumptions and methods used in this valuation. In conjunction with the actuarial experience investigation following the July 1, 2017, several demographic assumptions changed since the prior valuation. A summary of the changes is listed below:

- Updated the base assumption for Post-Retirement Mortality from a multiple of the RP-2000 Blue Collar Table to the RP-2014 table (Blue Collar for Males and No Collar for Females) projected to 2018 using the MP-2017 projection scale. The scale used to build in generational improvements in mortality for the future was also changed from Scale BB to the ultimate rates of the MP tables.
- Slightly lowered the retirement patterns for ages before 50.
- Added an additional 1% disability probability for members hired post 2004 during the period in which they would have been eligible to retire under the previous conditions but are not yet eligible under their eligibility provisions.

Please see Appendix A of our Report for a complete description of all assumption. Also, for a detailed analysis of the actuarial assumptions, please see our 2018 Actuarial Experience Study, dated July 16, 2018.

**SUPPORTING EXHIBITS** 

## SUMMARY OF COST ITEMS (\$000) TABLE 1

	Valuation as of			Valuation as of			
		July 1, 20	018		July 1, 2	2017	
			Cost as %			Cost as %	
	(	Cost Item	of Pay	(	Cost Item	of Pay	
		(1)	(2)		(3)	(4)	
1. Participants							
a. Active participants, hired post 10/9/2004		2,805			2,582		
b. Active participants enrolled in DROP		1,795			1,797

# CALCULATION OF ACTUARIALLY DETERMINED CONTRIBUTION RATE (\$000) TABLE 2

		July 1, 2018		July 1, 2017	
			(1)		(2)
1.	Projected valuation payroll (adjusted for two-year's payroll growth)	\$	450,452	\$	452,731
2.	Present value of future pay	\$	4,711,352	\$	4,425,296
3.	Employer normal cost rate (Table 4)		13.51%		13.85%
4.	Actuarial accrued liability for active members				
	<ul> <li>a. Present value of future benefits for active members</li> <li>b. Less: present value of future employer normal costs</li> <li>c. Less: present value of future employee contributions</li> <li>d. Actuarial accrued liability</li> </ul>	\$	3,515,130 (589,889) (494,692) 2,430,549	\$	3,434,028 (563,783) (464,656) 2,405,589
	u. Actuarial accided hability	Ą	2,430,343	ې	2,403,363
5.	<ul> <li>Total actuarial accrued liability for:</li> <li>a. Retirees and beneficiaries</li> <li>b. Inactive participants</li> <li>c. Active members (Item 4d)</li> <li>d. Total</li> </ul>	\$	4,025,879 7,444 2,430,549 6,463,872	\$	3,805,340 7,364 2,405,589 6,218,293
6.	Actuarial value of assets (Table 10)	\$	5,128,835	\$	4,868,614
7.	Unfunded actuarial accrued liability (UAAL) (Item 5d - Item 6)	\$	1,335,037	\$	1,349,679
8.	Funding period		29.0		30.0
9.	Assumed payroll growth rate		2.75%		2.75%
10.	City Contribution Rate  a. UAAL amortization payment as % of pay  b. Employer normal cost  c. Estimated City Contribution Rate (a + b)  d. Corridor Midpoint		18.07% 13.51% 31.58% 31.82%		17.89% 13.85% 31.74% 31.85%
	e. City Contribution Rate (greater of c and d)		31.82%		31.85%

## ACTUARIAL PRESENT VALUE OF FUTURE BENEFITS (\$000) TABLE 3

		Ju	ıly 1, 2018	Ju	ıly 1, 2017
			(1)		(2)
1.	Active members, hired post 10/9/2004				
	a. Retirement benefits	\$	949,335	\$	814,490
	b. Deferred termination benefits		0		0
	c. Refunds		8,470		7,667
	d. Death benefits		62,610		55,232
	e. Disability benefits		45,084		39,218
	f. Total	\$	1,065,499	\$	916,607
2.	Active members enrolled in DROP				
	a. Retirement benefits	\$	1,981,031	\$	1,977,263
	b. Deferred termination benefits		0		0
	c. Refunds		0		0
	d. Death benefits		38,647		29,374
	e. Disability benefits		0		0
	f. Total	\$	2,019,678	\$	2,006,637
3.	Other active members				
	a. Retirement benefits	\$	409,388	\$	489,293
	b. Deferred termination benefits		298		410
	c. Refunds		309		349
	d. Death benefits		17,924		18,058
	e. Disability benefits		2,034		2,674
	f. Total	\$	429,953	\$	510,784
4.	Members in Pay Status				
	a. Service retirements	\$	3,569,427	\$	3,373,221
	b. Disability retirements		114,214		107,798
	c. Beneficiaries		342,238		324,321
	d. Total	\$	4,025,879	\$	3,805,340
5.	Inactive members	\$	7,444	\$	7,364
6.	Total actuarial present value of future benefits	\$	7,548,453	\$	7,246,732

### ANALYSIS OF NORMAL COST RATE TABLE 4

		July 1, 2018	July 1, 2017
1	Gross normal cost rate	(1)	(2)
1.	a. Retirement benefits	20.03%	20.13%
	b. Deferred termination benefits	0.00%	0.00%
	c. Refunds	0.32%	0.32%
	d. Disability benefits	1.25%	1.23%
	e. Death benefits	1.57%	1.67%
	f. Total	23.17%	23.35%
2.	Plus: Administrative expenses as percentage of payroll	0.84%	1.00%
3.	Less: weighted average of member contribution rate	10.50%	10.50%
4.	Employer normal cost rate (Item 1f + Item 2 - Item 3)	13.51%	13.85%

### CALCULATION OF TOTAL ACTUARIAL GAIN OR LOSS TABLE 5

1. Unfunded actuarial accrued liability (UAAL) as of July 1, 2017	\$ 1,349,679
2. Total normal cost for year	107,290
3. Actuarially calculated contribution requirement	(186,115)
4. Interest on UAAL for one year	94,478
5. Interest on Item 2 and Item 3 for one-half year	(2,712)
6. Actuarially expected UAAL as of July 1, 2018 (1+2+3+4+5)	\$ 1,362,620
7. Actual UAAL as of July 1, 2018	1,335,037
8. Actuarial gain/(loss) for the period (6 - 7)	\$ 27,583
SOURCE OF GAINS/(LOSSES)	
9. Asset gain/(loss) (See Table 12)	\$ 109,045
10. Impact of contributions less than actuarially determined	(3,718)
11. COLA & DROP credit different than assumed	(27,623)
12. Changes Due to Experience Study	(18,633)
13. Other liability gain/(loss) for the period	(31,488)
14. Actuarial gain/(loss) for the period	\$ 27,583

Note: Dollar amounts in \$000

# CHANGE IN CALCULATED CONTRIBUTION RATE SINCE THE PRIOR VALUATION TABLE 6

1.	Estimated City Contribution Rate as of July 1, 2017		31.74%
2.	Change in Contribution Rate During Year		
	a. Change in Employer Normal Cost	(0.13%)	
	b. Assumption changes	0.06%	
	c. Recognition of prior asset losses (gains)	(1.00%)	
	d. Actuarial (gain) loss from current year asset performance	(0.39%)	
	e. COLA & DROP credit different than assumed	0.35%	
	f. Actuarial (gain) loss from other liability sources	0.31%	
	g. Impact of City contributing different than actuarially detern	nined 0.09%	
	h. Effect of Payroll growing slower than Payroll Growth Rate	0.55%	
	i. Total Change	_	(0.16%)
3.	Estimated City Contribution Rate as of July 1, 2018		31.58%

### DEVELOPMENT OF ACTUARIAL VALUE OF ASSETS (\$000) TABLE 10

		ear Ending une 30, 2018
1.	. Actuarial value of assets at beginning of year (prior to adjustment)	\$ 4,143,562 *
2.	. Net new investments	
	a. Contributions	\$ 932,397
	b. Benefits and refunds paid	(362,362)
	c. Administrative expenses	 (3,679)
	d. Subtotal	\$ 566,356
3.	. Assumed investment return rate for fiscal year	7.00%
4.	. Assumed investment return rate for fiscal year (Item $1 + Item 2 / 2$ ) x Item $3$	\$ 309,872
5.	. Expected Actuarial Value at end of year (Item 1+ Item 2 + Item 4)	\$ 5,019,790
6	. Market value of assets at end of year	\$ 5,486,613
7.	. Difference (Item 6 - Item 5)	\$ 466,823

8. Development of amounts to be recognized as of June 30, 2018:

Fiscal	Remaining Deferrals								
Year	of Excess (Shortfall)	Offsetting of		Net Deferrals	Years	Recognized for		Remaining after	
End	of Investment Income	Gains/(Losses)		Remaining	Remaining	this valuation			this valuation
	(1)	(2)		(3) = (1) + (2)	(4)	(5) =	= (3) / (4)		(6) = (3) - (5)
2014	\$ 0	\$ 0	\$	0	1	\$	0	\$	0
2015	0	0		0	2		0		0
2016	0	0		0	3		0		0
2017	313,616	0		313,616	4		78,404		235,212
2018	153,207	0		153,207	5		30,641		122,566
Total	\$ 466,823	\$ 0	\$	466,823		\$	109,045	\$	357,778
9. Actuarial va	alue of plan assets, end	of year (Item 6 - Item	8)					\$	5,128,835
10. Asset gain (loss) for year (Item 9 - Item 5)								\$	109,045
11. Asset gain (	(loss) as % of actual actu	arial assets							2.13%
12. Ratio of act	uarial value to market v	alue							93.5%

Notes: Remaining deferrals in Column (1) for prior years are from last year's report column (6). The number in the current year is the difference between the remaining deferrals in for prior years and the total Excess/(Shortfall) return shown in Item 7. Column 2 is a direct offset of the current year's excess/(shortfall) return against prior years' excess/(shortfall) of the opposite type.

\* AVA as of July 1, 2017 is prior to recognition of \$750M from issue of Pension Obligation Bond on January 1, 2018

### ESTIMATION OF DOLLAR-WEIGHTED INVESTMENT RETURN (\$000) TABLE 11

	Market Value (2)	Actuarial Value (3)
1. Assets as of July 1, 2017	\$ 4,457,178	\$ 4,143,562
2. Contributions during FY2018	932,397	932,397
3. Benefit payments made during FY2018	361,033	361,033
4. Refunds of contributions during FY2018	1,329	1,329
5. Administrative Expenses during FY2018	3,679	3,679
6. Investment return during FY2018	463,079	418,917
7. Assets as of July 1, 2018: (1 + 2 - 3 - 4 - 5 + 6)	5,486,613	5,128,835
<ul><li>8. Approximate rate of return on average invested assets</li><li>a. Net investment income</li><li>b. Net investment return FY 2018</li></ul>	463,079 9.77%	418,917 9.46%

<sup>\*</sup> AVA as of July 1, 2017 is prior to recognition of \$750M from issue of Pension Obligation Bond on January 1, 2018

### INVESTMENT EXPERIENCE GAIN OR LOSS (\$000) TABLE 12

Item		Valuation as of 6/30/2018			Valuation as of 6/30/2017		
(1)			(2)		(3)		
1. Actuarial assets, prior valuation		\$	4,143,562 *	\$	4,758,079		
2. Total contributions since prior val	uation	\$	932,397	\$	173,909		
3. Benefits and refunds since prior v	valuation	\$	(362,362)	\$	(460,429)		
4. Administrative expenses since pr	ior valuaton	\$	(3,679)	\$	(4,238)		
<ul> <li>5. Assumed net investment income</li> <li>a. Beginning assets</li> <li>b. Contributions</li> <li>c. Benefits and refunds paid</li> <li>d. Administrative expenses</li> <li>e. Total</li> </ul>	-	\$	290,050 32,634 (12,683) (129) 309,872	\$	333,065 6,087 (16,115) (148) 322,889		
6. Expected actuarial assets (Sum of	Items 1 through 5)	\$	5,019,790	\$	4,790,210		
7. Actual actuarial assets, this valuat	cion	\$	5,128,835	\$	4,868,614		
8. Asset gain (loss) since prior valua	tion (Item 7 - Item 6)	\$	109,045	\$	78,404		

<sup>\*</sup>The actuarial assets as of the June 30, 2017 valuation reflected \$750M from the Pension Obligation Bond (POB) to be issued on January 1, 2018 discounted by half a year's interest. This starting value backs out the impact of the POB (impact =  $$750,000 / 1.07 ^ 0.5 = 725,052$ ) since it is reflected in the contributions for FY2018.

Note: Dollar amounts in \$000

#### SUMMARY OF ACTUARIAL ASSUMPTIONS AND METHODS

The following methods and assumptions were used in preparing the July 1, 2018 actuarial valuation report.

#### 1. Valuation Date

The valuation date is as of July 1<sup>st</sup>, the first day of each plan year. This is the date as of which the actuarial present value of future benefits and the actuarial value of assets are determined.

#### 2. Actuarial Cost Method

The Ultimate Entry Age Normal (UEAN) actuarial cost method allocates the System's actuarial present value of future benefits to various periods based upon service. The portion of the present value of future benefits allocated to years of service prior to the valuation date is the actuarial accrued liability, and the portion allocated to years following the valuation date is the present value of future normal costs. The normal cost is determined for each active member as the level percent of payroll necessary to fully fund the expected benefits to be earned over the career of each individual active member. Under UEAN, the normal cost calculation is done assuming all members earn benefits that would be applicable to a newly hired member so that the normal cost should remain fairly stable as the relative distribution of active employees in different benefit groups changes. The normal cost is partially funded with active member contributions with the remainder funded by employer contributions.

An unfunded accrued liability exists in the amount equal to the excess of accrued liability over valuation assets. The amortization period of the System is the number of years required to fully amortize the unfunded accrued liability, on an actuarial value of asset basis, with the expected amount of employer contributions in excess of the employers' portion of the normal cost.

The contribution rate determined by this valuation will not be effective until one year later, but the determination of the rate does not reflect this deferral. It is assumed that there will be no change in the employer normal cost rate due to the deferral, and it is assumed that payments are made uniformly throughout the year.

#### 3. Actuarial Value of Assets

The actuarial value of assets is equal to the market value of assets less a five-year phase in of the excess (shortfall) between expected investment return and actual income. The actual calculation is based on the difference between actual market value and the expected actuarial value of assets each year, and recognizes the cumulative excess return (or shortfall) over at a minimum rate of 20% per year. Each year a base is set up to reflect this difference. If the current year's base is of opposite sign to the deferred bases then it is offset dollar for dollar against the deferred bases. Any remaining bases are then recognized over the remaining period for the base (5 less the number of years between the bases year and the valuation year). This is intended to ensure the smoothed value of assets will converge towards the market value in a reasonable amount of time. Expected earnings are determined using the assumed investment return rate and the beginning of year actuarial value of assets (adjusted for receipts and disbursements during the year). The returns are computed net of investment expenses.

The actuarial value of assets was set equal to the market value of assets as of July 1, 2016.

#### 4. <u>Economic Assumptions</u>

- a. Investment return: 7.00% per year, compounded annually, composed of an assumed 2.75% inflation rate and a 4.25% net real rate of return. This rate represents the assumed return, net of all investment expenses.
- b. Cost of Living Adjustment (COLA): Monthly benefits for participants receiving payments are increased each April 1 by the five-year average investment return minus 5.00%, with a minimum of 0.00% and a maximum of 4.00%. For this valuation, the annual COLA is assumed to be 2.00%.
- c. Salary increase rate: A service-related component, plus a 2.75% inflation and productivity component, as follows:

Years of Service	Service-related Component	Total Annual Rate of Increase Including 2.00% Inflation & Productivity Component					
(1)	(2)	(3)					
1 2	0.00% 20.00%	2.75% 22.75%					
3	3.00%	5.75%					
4	3.00%	5.75%					
5	3.00%	5.75%					
6	6.00%	8.75%					
7	6.00%	8.75%					
8	2.00%	4.75%					
9	2.00%	4.75%					
10	2.00%	4.75%					
11	6.00%	8.75%					
12	1.00%	3.75%					
13	5.00%	7.75%					
14	1.00%	3.75%					
15	1.00%	3.75%					
16	1.00%	3.75%					
17	5.00%	7.75%					
18 and Over	0.00%	2.75%					

d. Payroll growth rate: In the amortization of the unfunded actuarial accrued liability, payroll is assumed to increase 2.75% per year. This increase rate is solely due to the effect of inflation on salaries, with no allowance for future membership growth.

#### 5. Demographic Assumptions

#### a. Retirement Rates

	Service									
Age	<25	25 - 29	30+							
40-49	3.0%	3.0%	9.0%							
50-54	4.0%	6.0%	10.0%							
55-59	6.8%	10.2%	17.0%							
60-64	9.6%	14.4%	24.0%							
65 +	100.0%	100.0%	100.0%							

For members hired after October 9, 2004, 3% per year the member's first retirement eligibility exceeds 45 is added to the retirement rate at first eligibility up to a maximum increase of 30% at age 55. For members in DROP as of July 1, 2016, retirement rates are multiplied by 110% to reflect that future employee contributions are no longer credited to the DROP balance.

#### b. DROP Participation

100% of eligible active participants are assumed to elect the DROP.

#### c. DROP Entry Date

Active members (not already in DROP) are assumed to take advantage of the DROP and enter when first eligible. Participants are assumed to elect the maximum duration for the back DROP, up to 20 years.

#### d. DROP Interest Credit

Interest in the amount of 65% of the five-year average investment return, with a minimum of 2.50%, will be credited to existing DROP accounts on a monthly basis. For this actuarial valuation, the drop interest credit is assumed to be 5.10%.

#### e. Withdrawal of DROP and PROP Balances

Members are assumed to withdraw balances in equal annual installments over 10 years.

- f. Mortality rates (for active and retired members)
  - Healthy retirees The Gender-distinct RP-2014 Healthy Annuitant Mortality Tables
    with Blue Collar Adjustment for Males and no collar adjustment for Females. The
    rates are projected from the 2006 central rates to the valuation year using scale
    MP-2017, and thereafter on a fully generational basis by the ultimate values of
    scale MP-2014 to account for future mortality improvements.
  - Disabled males and females The Gender-distinct RP-2014 Disabled Retiree
     Mortality Tables are used without adjustment. The rates are projected on a fully
     generational basis by the ultimate values of scale MP-2014 to account for future
     mortality improvements.
  - Active members The Gender-distinct RP-2014 Employee Mortality Tables with Blue Collar Adjustment. The rates are projected on a fully generational basis by the ultimate values of scale MP-2014 to account for future mortality improvements.

Sample rates are shown below for 2018:

	Healthy	Healthy			Healthy	Healthy
	Retired	Retired	Disabled	Disabled	Active	Active
Age	Males	Females	Males	Females	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)
25	0.08%	0.03%	0.81%	0.23%	0.06%	0.02%
30	0.11%	0.07%	0.76%	0.29%	0.06%	0.02%
35	0.15%	0.12%	0.88%	0.38%	0.07%	0.03%
40	0.21%	0.17%	1.06%	0.52%	0.08%	0.04%
45	0.28%	0.22%	1.64%	0.87%	0.12%	0.07%
50	0.41%	0.27%	1.96%	1.14%	0.21%	0.12%
55	0.61%	0.38%	2.24%	1.39%	0.35%	0.18%
60	0.89%	0.58%	2.56%	1.63%	0.58%	0.26%
65	1.34%	0.85%	3.04%	2.00%	1.03%	0.40%
70	2.04%	1.31%	3.88%	2.71%	1.66%	0.67%
75	3.25%	2.16%	5.21%	3.94%	2.68%	1.13%
80	5.42%	3.69%	7.36%	5.86%	4.32%	1.90%

#### g. Termination Rates and Disability Rates

Termination rates (for causes other than death, disability or retirement) are a function of the member's service and are not applied after a member becomes eligible for a retirement benefit. Disability rates are age-based and not applied for members in the DROP or those members eligible to back DROP. All disabilities are assumed to be duty-related. Rates at selected ages and service levels are shown below.

Termination						
Service	Male	Female				
1	2.71%	2.71%				
3	1.95%	1.95%				
5	1.40%	1.40%

55	0.2538%	0.2538%			
60	0.3023%	0.3023%			

1% is also added to the rates above during the period that members hired post-2004 would have been eligible to retire under pre-2004 retirement eligibilities, but are not yet eligible.

#### 6. Other Assumptions

- a. Percent married: 90% of employees are assumed to be married. (No beneficiaries other than the spouse assumed.)
- b. Valuation payroll: To determine the amortization rate, the payroll used is the amount budgeted by the City for the fiscal year following the valuation date increased by one year of payroll growth.
- c. Age difference: Male members are assumed to be three years older than their spouses, and female members are assumed to be three years younger than their spouses.
- d. Percent electing annuity on death (when eligible): All of the spouses of vested, married participants are assumed to elect an annuity.
- e. Percent electing deferred termination benefit: 50% of vested terminating members are assumed to elect a refund rather than take a deferred benefit at age 60.
- f. There will be no recoveries once disabled.
- g. No surviving spouse will remarry.
- h. Assumed age for commencement of deferred benefits: Members electing to receive a deferred benefit are assumed to commence receipt at the first age at which unreduced benefits are available.
- i. Administrative expenses: Administrative expenses are accounted for as an explicit component on the normal cost rate.
- j. Pay increase timing: Beginning of (fiscal) year. This is equivalent to assuming that reported pays represent amounts paid to members during the year ended on the valuation date.
- k. Decrement timing: Decrements of all types are assumed to occur mid-year.
- I. Eligibility testing: Eligibility for benefits is determined based upon the age nearest birthday and service nearest whole year on the date the decrement is assumed to occur.
- m. Decrement relativity: Decrement rates are converted to probabilities in order to account for multiple decrements.
- n. Incidence of Contributions: Contributions are assumed to be received continuously throughout the year based upon the computed percent of payroll shown in our Report, and the actual payroll payable at the time contributions are made.
- o. Benefit Service: All members are assumed to accrue one year of service each year. Exact fractional service is used to determine the amount of benefit payable.

#### 7. Participant Data

Participant data was supplied in electronic files. There were separate files for (i) active members, (ii) inactive members, and (iii) members and beneficiaries receiving benefits.

The data for active members included birth date, gender, most recent hire date, salary paid during last fiscal year, hours worked by the employee, and employee contribution amounts. For retired members and beneficiaries, the data included date of birth, gender, amount of monthly benefit, and date of retirement. Also included was the member's Group and for members participating in DROP, their account balances and monthly DROP income.

All healthy and disabled retirees are assumed to have 100% joint and survivor annuities, prorated by the 90% marriage assumption and reflecting the three year spousal age differential described above. All beneficiaries are assumed to have life annuity only benefits.

Salary supplied for the current year was based on the earnings for the year preceding the valuation date. This salary was adjusted by the salary increase rate for one year.

In fiscal years when a 27<sup>th</sup> pay period occurs the individual pays for employees who were employed throughout the year will be adjusted by multiplying their reported pay by the ratio of 26/27. In years that have only 26 pay periods no adjustment would be needed.

Assumptions were made to correct for missing, bad, or inconsistent data. These had no material impact on the results presented.

**SUMMARY OF PLAN PROVISIONS** 

#### **SUMMARY OF PLAN PROVISIONS**

#### **Covered Members**

All police officers sworn before September 1, 1975 are covered under Plan 1, except those who elected by December 31, 1981 to participate in Plan 3.

All police officers sworn on or after September 1, 1975, but before September 1, 1981 are covered under Plan 2, except those who elected by December 31, 1981 to participate in Plan 3 and those Plan 1.

All other police officers are covered by Plan 3, except those from Police Cadet Classes 70 and 71 who elected to pay additional contributions and transfer to Plan 1.

#### **Final Compensation**

Prior to November 28, 1998

Monthly base salary paid to the participant in his/her last month of service. For any participant from a position held for less than 3 years, final compensation is the average monthly base salary for the 3 years prior to retirement.

After November 28, 1998 but prior to July 1, 2001

Monthly total direct pay less overtime paid to the participant in his/her last month of service. For any participant from a position held for less than 3 years, final compensation is the average monthly base pay for the 3 years prior to retirement plus the other current components of total direct pay.

After July 1, 2001 but prior to October 9, 2004

Highest biweekly pay period (excluding overtime) during the last 26 pay periods annualized. Amounts not paid on a biweekly basis are deducted from period paid. Annual amounts are divided by 26 and added to the highest pay period, including motorcycle allowances.

On or after October 9, 2004

Average of the last three years of compensation (excluding exempt time, overtime and strategic officer staffing pay). This average will be phased in beginning with the pay period ending after October 9, 2004 until the new definition is fully phased in after 78 pay periods.

#### **Service Retirement**

Eligibility

Sworn prior to October 9, 2004 20 years of service.

Sworn on or after October 9, 2004

The age at which the sum of age and years of service is at least 70 (Rule of 70).

#### Benefit

1955▶ After November 1, 1955but prior to January 13, 1968

Prior to November 1,

After January 13, 1968but prior to July 1, 1986

After July 1, 1986 but prior to July 1, 1988

After July 1, 1988 but prior to September 1, 1997

After September 1, 1997but prior to July 1, 2001

After July 1, 2001 but prior to October 9, 2004

\$75 per month plus \$2 per month for each year of service in excess of 25 years.

30% of final compensation plus 1 % of final compensation for each year of service in excess of 20 years.

Plans 1 and 2: 30% of final compensation plus 2% of final compensation for each year of service in excess of 20 years. Plan 3: 2% of final compensation for each year of service up to 40 years, reduced 0.42% for each month benefit commencement precedes age 55.

2% of final compensation for each year of service up to 40 years.

45% of final compensation plus 2% of final compensation for each year of service in excess of 20 years; maximum 80% of final compensation. Benefit based on prior formula is payable until July 1, 1991 and recomputed benefit is payable thereafter 50% of final compensation plus 2% of final compensation for each year of service in excess of 20 years; maximum 80% of final compensation.

55% of final compensation plus 2% of final compensation for service in excess of 20 years.

The Pension System recomputed the benefit of each person who retired before July 1, 2001. The retiree's benefit was increased by the result of multiplying the difference between 55% and the percentage used at the time of retirement in computing the retiree's benefit for the first 20 years of service by the base salary of the retiree at the time of retirement. Retroactive cost-of-living increases were not applied to the increased benefit. This recomputed benefit is effective for all payments on or after July 1, 2001.

After October 9, 2004

Participants sworn prior to October 9, 2004 will receive the highest of the following alternatives using Final Average Compensation effective after October 9, 2004, from October 9, 2004 through October 7, 2007:

- 1) 2.75% of Final Average Compensation for each of the first 20 years of service plus 2% of Final Average Compensation for each year of service in excess of 20 years, with a maximum of 80% of Final Average Compensation.
- 2) Benefit participant would have received had participant retired or entered the DROP immediately before October 9, 2004
- 3) Benefit calculated using a sliding average of the pay received for the pay periods elapsed since October 9, 2004.

New participants after October 9, 2004:

2.25% of Final Average Compensation for each of the first 20 years of service plus 2% of Final Average Compensation for each year of service in excess of 20 years, with a maximum of 80% of Final Average Compensation.

**Additional Benefits** 

An extra monthly benefit of \$150.00 is payable for life. Effective November 28, 1998, a \$5,000 lump sum is payable upon retirement for members sworn prior to October 9, 2004.

### **Terminated Vested Pension Benefit**

Eligibility

Sworn in before October 9, 2004 and more than 10 but less than 20 years of service. Termination on or after November 28, 1998.

Benefit

2.75% of final average compensation times years of service. This benefit commences at age 60 or at termination of service if later.

### **Deferred Retirement Option Plan (DROP)**

Eligibility

20 years of service and sworn in prior to October 9, 2004.

#### Benefit

After September 1, 1995 but Eligible participants may elect to participate in the DROP until prior to September 1, 1997 they leave active service. The member's retirement pension will be calculated based on service and earnings at the time the DROP is elected.

A notional account will be maintained for each DROP participant. This account will be credited with the following amounts while the member is participant of the DROP:

- The member's monthly retirement pension, including applicable cost-of-living adjustments,
- The member's contribution to the Pension System, limited to 8.75% of pay, and
- Investment earnings/losses at the rate of the Pension System's earnings/losses averaged over a five-year period. Effective July 1, 2001, this rate is subject to a minimum of 0%.

A benefit equal to the DROP account balance is paid at the time the member leaves active service. The payment is made as a single lump sum.

If a DROP participant suffers an on-duty disability resulting in the inability to perform his/her usual and customary duties as a police officer or dies in the line of duty, he (or his survivors) are allowed to revoke the DROP election and to receive the more generous on-duty disability or death benefits.

After September 1, 1997 but prior to December 1, 1998

The Pension System recomputed the benefit of each person who entered the DROP before September 1, 1997. The benefit was increased in the same manner as the retiree's benefit.

After December 1, 1998 but prior to July 1, 2001

The Pension System recomputed the benefit of each person who entered the DROP before December 1, 1998. The benefit was recalculated based on Total Direct Pay less overtime upon entry to the DROP. This recomputed benefit is effective for all payments on or after December 1, 1998.

After July 1, 2001 but prior to October 9, 2004

The Pension System recomputed the benefit of each person who entered the DROP before July 1, 2001. The member's benefit was increased by the result of multiplying the difference between 55% and the percentage used at the time of DROP entry in computing the member's benefit for the first 20 years of service by the base salary of the member at the time of DROP entry. Retroactive cost-of-living increases were applied to the increased benefit. The account balance for each participant was recomputed as if this new benefit had been effective since DROP entry.

After October 9, 2004

A minimum of 3.00% interest will be credited to existing DROP accounts with a maximum of 7.00%. If the actuary certifies that past service costs are fully funded, the credit may be as high as 10.00%.

After July 1, 2016

Participants may participate in the DROP for a maximum of 20 years. Cost of living adjustments will not be granted while still active, and the member's contributions to the Pension System will no longer be credited to the DROP account. DROP accounts will be credited with interest equal 65% of the five-year average investment return, with a minimum of 2.50%.

Benefit Recalculation Effective July 1, 2001, monthly benefit at retirement will be

recalculated to be the greater of (i) current monthly benefit, or (ii)monthly benefit based on service at DROP entry and Final Compensation at retirement date. The recalculation provision was

discontinued effective July 1, 2016.

Back DROP Option Effective on July 1, 2001, a back DROP option is available for all

eligible participants. The DROP account is recalculated under the option based on what the account balance would have been had the participant elected the DROP earlier than he/she actually did. The initial DROP entry date cannot be backdated prior to September 1, 1995 or prior to 20 years of credited service, and must be on the first of the month selected. The Back DROP provision was discontinued

effective July 1, 2016.

Postretirement
Option Plan (PROP)

Benefit

Benefit

Eligibility Retired from DROP and sworn in prior to October 9, 2004.

▶ After November 28, 1998 but

prior to July 1, 2001

A retired member is allowed to leave all or a portion of their DROP account in the System. These accounts are credited every calendar year with the 30-year Treasury bond rate as of June of the preceding

year.

▶ After July 1, 2001 The interest rate earned on PROP accounts will be the same as the

interest rate credited to DROP accounts, including a minimum

credited rate of 0%.

Partial Lump Sum
Optional Payment ( PLOP)

Eligibility Participant on or after October 9, 2004.

▶ After October 9, 2004 Up to 20% of the actuarial value of the accrued pension at

retirement.

**Disability Retirement** 

Eligibility Effective July 1, 2001, a disabled participant is eligible for Disability Retirement as defined below:

Disability is defined as "unable to perform his/her usual and

customary duties as a police officer".

Benefit

Duty-connected
The service retirement benefit accrued to date of disability. For

participants before October 9, 2004, the disability benefit is 2.75% of final average pay times years of service with a minimum of 55% of

final average pay. For participants after

October 9, 2004, the disability benefit is 2.25% of final average pay times years of service with a minimum of 45% of final average pay. For participants before October 9, 2004, an education allowance equal to 100% of final compensation less disability benefit is payable

for up to four years for off-duty or duty-related disability.

Proportionate members injured while on-duty as a municipal worker

will receive immediate off-duty benefit upon Board approval.

**Survivor Benefits** 

**Additional Benefits** 

Eligibility Surviving spouses and dependent children and parents of

participants, including surviving spouses of retired or disabled participants who were not married at the time of retirement or disability, provided the spouse was married to the participant for at

least 5 years at the time of death.

Benefit

▶ Prior to September 1, 1997 If duty-connected: monthly lifetime benefit equal to 100% of final

compensation at date of death.

death.

If not duty-connected: monthly lifetime benefit equal to 100% of the service retirement benefit the participant had accrued at the time of

Spouse's benefit upon death after retirement: monthly lifetime benefit equal to actual benefit payable at time of death.

Dependent children's benefit if no surviving spouse: the benefit that would have been payable to the spouse is divided equally among the dependent children.

If there is a surviving spouse, the dependent children of Plan 1 and Plan 2 participants receive \$25 per month. Dependent

children include unmarried children who are under age 18, and for Plan 3, full-time students under age 22, or permanently disabled children.

Dependent parent's income if no surviving spouse or children, but there is a dependent parent: the benefit that would have been payable to the spouse will be paid to the dependent parent.

After September 1, 1997 but prior to July 1, 2001

The Pension System recomputed the benefit of each survivor whose original benefit was computed prior to September 1, 1997. The benefit was increased in the same manner as the retiree's benefit.

▶ After July 1, 2001

The Pension System recomputed the benefit of each survivor whose original benefit was computed prior to July 1, 2001. The benefit was increased in the same manner as the retiree's benefit. Effective December 1, 1998, a \$5,000 lump sum is paid upon the death of an active member who was sworn in prior to October 9, 2004.

**Additional Benefits** 

Effective July 1, 2001, an extra monthly benefit of \$150.00 is payable for life. Children receiving equivalent of the spouse's benefit do not receive this additional benefit.

#### **Benefit Adjustments**

#### Cost-of-Living

▶ Prior to October 9, 2004

Monthly benefits for participants receiving payments are increased each April 1 by 2/3 of the increase in the Consumer Price Index for All Urban Consumers (CPI-U) for the preceding calendar year. Effective September 1, 1997 this increase is subject to a minimum of 3.0% per year compounded and a maximum increase of 8.0% per year compounded. Monthly benefits for participants receiving payments are increased each April 1 by 80% of the increase in the Consumer Price Index for All Urban Consumers (CPI-U) for the preceding year, with a minimum of 2.4% and a maximum of 8%.

Between October 9, 2004 and July 1, 2016

After July 1, 2016

Monthly benefits for participants receiving payments are increased each April 1 by 100% of the five-year average investment return minus 5.00%, with a minimum of 0.00% and a maximum of 4.00%.

COLAs are suspended from July 1, 2017 through July 1, 2020 for members who are not over the age of 70 or receiving a line of duty -connected survivor benefit. Following this period, members will receive their COLA once they reach age 55.

**Service Adjustments** 

Effective November 28, 1998, participants with previous service with the City in non-classified positions may use that service to satisfy the service requirement of 20 years for retirement purposes only. Effective July 1, 2001, participants who have service credit in more than one City of Houston Pension Plan may use their combined service to qualify for DROP participation. Effective July 1, 2001, participants involuntarily transferred to the System from the Houston Municipal Employees System will receive service under this plan for years worked while serving as a City Marshall, Airport Police or Park Police.

#### **Contributions**

**Employee Contributions** 

Prior to December 1,

1998 ▶ After December 1, 1998

but before October 9, 2004

After October 9, 2004

 Members sworn in prior to October 9, 2004

Others

▶ After July 1, 2016

Refunds

Each participant contributes 8.75% of base salary.

Each participant contributes 8.75% of average total direct pay less overtime.

Each participant contributes 9.00% of pay. The additional 0.25% will be credited to the Plan's general fund. 8.75% of pay is used for purposes of crediting eligible DROP accounts

Each participant contributes 10.25% of pay, which will be credited to

the Plan's general fund.

Each participant contributes 10.50% of pay, which will be credited

to the Plan's general fund.

Contributions are refunded without interest.

**Employer Contribution** 

The City of Houston will contribute the City Contribution Rate which will consistent of a normal cost contribution and a fixed layer closed amortization schedule with each new loss layer having a 30 year period. Each layer will be assumed to begin with the fiscal year beginning 12 months after the valuation date.

#### **GLOSSARY**

**Actuarial Accrued Liability (AAL):** That portion, as determined by a particular Actuarial Cost Method, of the Actuarial Present Value of Future Plan Benefits which is not provided for by future Normal Costs. It is equal to the Actuarial Present Value of Future Plan Benefits minus the actuarial present value of future Normal Costs.

**Actuarial Assumptions:** Assumptions as to future experience under the Fund. These include assumptions about the occurrence of future events affecting costs or liabilities, such as:

- mortality, withdrawal, disablement, and retirement;
- future increases in salary;
- future rates of investment earnings and future investment and administrative expenses;
- characteristics of members not specified in the data, such as marital status;
- characteristics of future members;
- future elections made by members; and
- other relevant items.

**Actuarial Cost Method** or **Funding Method**: A procedure for allocating the Actuarial Present Value of Future Benefits to various time periods; a method used to determine the Normal Cost and the Actuarial Accrued Liability. These items are used to determine the ADC.

Actuarial Gain or Actuarial Loss: A measure of the difference between actual experience and that expected based upon a set of Actuarial Assumptions, during the period between two Actuarial Valuation dates. Through the actuarial assumptions, rates of decrements, rates of salary increases, and rates of fund earnings have been forecasted. To the extent that actual experience differs from that assumed, Actuarial Accrued Liabilities emerge which may be the same as forecasted, or may be larger or smaller than projected. Actuarial gains are due to favorable experience, e.g., the Fund's assets earn more than projected, salaries do not increase as fast as assumed, members retire later than assumed, etc. Favorable experience means actual results produce actuarial liabilities not as large as projected by the actuarial assumptions. On the other hand, actuarial losses are the result of unfavorable experience, i.e., actual results that produce actuarial liabilities which are larger than projected. Actuarial gains will shorten the time required for funding of the actuarial balance sheet deficiency while actuarial losses will lengthen the funding period.

**Actuarially Equivalent:** Of equal actuarial present value, determined as of a given date and based on a given set of Actuarial Assumptions.

**Actuarial Present Value (APV):** The value of an amount or series of amounts payable or receivable at various times, determined as of a given date by the application of a particular set of Actuarial Assumptions. For purposes of this standard, each such amount or series of amounts is:

- a. adjusted for the probable financial effect of certain intervening events (such as changes in compensation levels, marital status, etc.)
- b. multiplied by the probability of the occurrence of an event (such as survival, death, disability, termination of employment, etc.) on which the payment is conditioned, and
- c. discounted according to an assumed rate (or rates) of return to reflect the time value of money.

Actuarial Present Value of Future Plan Benefits: The Actuarial Present Value of those benefit amounts which are expected to be paid at various future times under a particular set of Actuarial Assumptions, taking into account such items as the effect of advancement in age and past and anticipated future compensation and service credits. The Actuarial Present Value of Future Plan Benefits includes the liabilities for active members, retired members, beneficiaries receiving benefits, and inactive, non-retired members either entitled to a refund or a future retirement benefit. Expressed another way, it is the value that would have to be invested on the valuation date so that the amount invested plus investment earnings would be provide sufficient assets to pay all projected benefits and expenses when due.

**Actuarial Valuation**: The determination, as of a valuation date, of the Normal Cost, Actuarial Accrued Liability, Actuarial Value of Assets, and related Actuarial Present Values for a plan. An Actuarial valuation for a governmental retirement system typically also includes calculations of items needed for compliance with GASB 25, such as the funded ratio and the ADC.

**Actuarial Value of Assets** or **Valuation Assets:** The value of the Fund's assets as of a given date, used by the actuary for valuation purposes. This may be the market or fair value of plan assets, but commonly actuaries use a smoothed value in order to reduce the year-to-year volatility of calculated results, such as the funded ratio and the ADC.

**Actuarially Determined:** Values which have been determined utilizing the principles of actuarial science. An actuarially determined value is derived by application of the appropriate actuarial assumptions to specified values determined by provisions of the law.

Amortization Method: A method for determining the Amortization Payment. The most common methods used are level dollar and level percentage of payroll. Under the Level Dollar method, the Amortization Payment is one of a stream of payments, all equal, whose Actuarial Present Value is equal to the UAAL. Under the Level Percentage of Pay method, the Amortization payment is one of a stream of increasing payments, whose Actuarial Present Value is equal to the UAAL. Under the Level Percentage of Pay method, the stream of payments increases at the assumed rate at which total covered payroll of all active members will increase.

**Amortization Payment:** That portion of the pension plan contribution or ADC which is designed to pay interest on and to amortize the Unfunded Actuarial Accrued Liability.

**Annual Determined Contribution (ADC):** The employer's periodic required contributions, expressed as a dollar amount or a percentage of covered plan compensation, determined under GASB 25. The ADC consists of the Employer Normal Cost and the Amortization Payment.

**Closed Amortization Period:** A specific number of years that is counted down by one each year, and therefore declines to zero with the passage of time. For example if the amortization period is initially set at 30 years, it is 29 years at the end of one year, 28 years at the end of two years, etc. See Funding Period and Open Amortization Period.

**Decrements:** Those causes/events due to which a member's status (active-inactive-retiree-beneficiary) changes, that is: death, retirement, disability, or termination.

**Defined Benefit Plan:** A retirement plan that is not a Defined Contribution Plan. Typically a defined benefit plan is one in which benefits are defined by a formula applied to the member's compensation and/or years of service.

**Defined Contribution Plan:** A retirement plan, such as a 401(k) plan, a 403(b) plan, or a 457 plan, in which the contributions to the plan are assigned to an account for each member, and the plan's earnings are allocated to each account, and each member's benefits are a direct function of the account balance.

**Employer Normal Cost:** The portion of the Normal Cost to be paid by the employers. This is equal to the Normal Cost less expected member contributions.

**Experience Study:** A periodic review and analysis of the actual experience of the Fund which may lead to a revision of one or more actuarial assumptions. Actual rates of decrement and salary increases are compared to the actuarially assumed values and modified as deemed appropriate by the Actuary.

**Funded Ratio:** The ratio of the actuarial value of assets (AVA) to the actuarial accrued liability (AAL). Plans sometimes calculate a market funded ratio, using the market value of assets (MVA), rather than the AVA.

**Funding Period** or **Amortization Period:** The term "Funding Period" is used it two ways. In the first sense, it is the period used in calculating the Amortization Payment as a component of the ADC. This funding period is chosen by the Board of Trustees. In the second sense, it is a calculated item: the number of years in the future that will theoretically be required to amortize (i.e., pay off or eliminate) the Unfunded Actuarial Accrued Liability, based on the statutory employer contribution rate, and assuming no future actuarial gains or losses.

GASB: Governmental Accounting Standards Board.

**GASB 67** and **GASB 68**: Governmental Accounting Standards Board Statements No. 67 and No. 68. These are the governmental accounting standards that set the accounting rules for public retirement systems and the employers that sponsor or contribute to them. Statement No. 68 sets the accounting rules for the employers that sponsor or contribute to public retirement systems, while Statement No. 67 sets the rules for the systems themselves.

**Normal Cost:** That portion of the Actuarial Present Value of pension plan benefits and expenses which is allocated to a valuation year by the Actuarial Cost Method. Any payment in respect of an Unfunded Actuarial Accrued Liability is not part of Normal Cost (see Amortization Payment). For pension plan benefits which are provided in part by employee contributions, Normal Cost refers to the total of employee contributions and employer Normal Cost unless otherwise specifically stated. Under the entry age normal cost method, the Normal Cost is intended to be the level cost (when expressed as a percentage of pay) needed to fund the benefits of a member from hire until ultimate termination, death, disability or retirement.

**Open Amortization Period:** An open amortization period is one which is used to determine the Amortization Payment but which does not change over time. In other words, if the initial period is set as 30 years, the same 30-year period is used in determining the Amortization Period each year. In theory, if an Open Amortization Period is used to amortize the Unfunded Actuarial Accrued Liability, the UAAL will never completely disappear, but will become smaller each year, either as a dollar amount or in relation to covered payroll.

**Unfunded Actuarial Accrued Liability:** The excess of the Actuarial Accrued Liability over the Actuarial Value of Assets. This value may be negative in which case it may be expressed as a negative Unfunded Actuarial Accrued Liability, also called the Funding Surplus.

**Valuation Date or Actuarial Valuation Date:** The date as of which the value of assets is determined and as of which the Actuarial Present Value of Future Plan Benefits is determined. The expected benefits to be paid in the future are discounted to this date.
