

UTAH RETIREMENT SYSTEMS

ACTUARIAL VALUATION REPORT

AS OF JANUARY 1, 2014

August 19, 2014

Utah State Retirement Board 540 East 200 South Salt Lake City, UT 84102

Dear Members of the Board:

#### Subject: Actuarial Valuation as of January 1, 2014

This report describes the current actuarial condition of the Utah Retirement Systems (URS), determines the calculated employer contribution rates, and analyzes changes in these contribution rates. In addition, the report provides various summaries of the data. A separate report is issued with regard to valuation results determined in accordance with Governmental Accounting Standards Board (GASB) Statements 67 and 68. Results of this report should not be used for any other purpose without consultation with the undersigned. Valuations are prepared annually as of January 1, the first day of the URS plan year. This report was prepared at the request of the Board and is intended for use by the URS staff and those designated or approved by the Board. This report may be provided to parties other than URS staff only in its entirety and only with the permission of the Board.

Under URS statutes, the Board of Trustees must certify employer contribution rates annually. These rates are determined actuarially, based on the Board's funding policy, although, as discussed below, under certain circumstances the Board may choose not to reduce the current rate if it is greater than the actuarially calculated rate. Contribution rates determined by a given actuarial valuation become effective eighteen months after the valuation date. In other words, the rates determined by this January 1, 2014 actuarial valuation will be used by the Board when certifying the employer contribution rates for the year beginning July 1, 2015 and ending June 30, 2016. If new legislation is enacted between the valuation date and the date the contribution rates become effective, the Board may adjust the calculated rates before certifying them in order to reflect this new legislation. Such adjustments are based on information supplied by the actuary.

#### FINANCING OBJECTIVES AND FUNDING POLICY

In setting contribution rates, the Board's principal objectives are:

- To set rates so that the unfunded actuarial accrued liability (UAAL) will be amortized over a reasonable period from the current valuation date
- To set rates so that they remain relatively level over time.

To accomplish this, the Board's funding policy requires that the employer contribution rate be at least equal to the sum of the employer normal cost rate (which pays the current year's cost) and

Utah State Retirement Board August 19, 2014 Page 2

an amortization rate which results in the amortization of the UAAL over 20 years in installments that increase at the assumed rate of growth in payroll for URS.

Under this policy, the objective of maintaining a relatively level contribution rate over time is achieved in normal conditions such as consistent financial markets.

Section 49-11-301(5) of the Utah Code allows the Board to set the employer contribution rate at the prior year's rate, if the rate otherwise would decrease and if the funded ratio is less than 110%. In such a case, the rate set by the Board would be higher than the actuarially determined contribution rate. The purpose of this legislation is to enhance the Board's ability to maintain more level contribution rates while targeting a 100% - 110% funded level. The Board has historically followed this policy, so the recommended contribution rate may be greater than the actuarially determined rate.

#### PROGRESS TOWARD REALIZATION OF FINANCING OBJECTIVES

The funded ratio (the ratio of the actuarial value of assets to the actuarial accrued liability) is a standard measure of a plan's funded status. In the absence of benefit improvements, it should increase over time, until it reaches at least 100%.

For all systems on a combined basis, the funded ratio increased from 77.1% to 81.7%. This increase was due to the recognition of favorable investment and liability experience, as well as the adoption of recommended assumptions resulting from an assumption review conducted in 2014. Absent unfavorable actuarial experience, we expect the funded ratio to gradually increase in future years.

If market value had been used in the calculation instead of actuarial value, the aggregate funded ratio for all funds combined would have been 87.6% compared to 79.9% in the prior year. The increase in the funded ratio on a market value basis is largely due to the asset return exceeding the expected return assumption during calendar year 2013. Specifically, the market value of assets earned a 14.8% return on a dollar-weighted basis for the 2013 calendar year, net of expenses, which provided \$1.6 billion more in assets than was expected.

#### **BENEFIT PROVISIONS**

The benefit provisions reflected in this valuation are those which were in effect on January 1, 2014, or which were adopted by the end of the 2014 legislative session and are effective on or before July 1, 2015. There were no legislative changes enacted since the previous valuation that had a measurable effect on the current valuation.

Utah State Retirement Board August 19, 2014 Page 3

#### ASSUMPTIONS AND METHODS

The Board, in consultation with the actuary, sets the actuarial assumptions and methods used in the valuation. Current Board policy is to have the actuary perform an experience study every three years. In connection with the appropriate valuation, the actuary conducts a thorough review of plan experience for the preceding five years, and then makes recommendations to the Board.

An experience analysis was carried out in connection with this valuation, and as a result, we recommended, and the Board adopted a number of changes in the actuarial assumptions. Our recommendations included:

- Decrease the wage inflation assumption for all employee groups from 3.75% to 3.50%. Modify the rate of salary increases for most of the groups.
- Decrease the payroll growth assumption from 3.50% to 3.25%.
- Improve the post-retirement mortality assumption for female educators.
- Minor adjustments to the pre-retirement mortality assumption.
- Modify the retirement rates for most groups. The changes generally resulted in an overall decrease in rates at which active members are assumed to retire.
- Modify the termination rates which generally resulted in overall increase in rates at which active members are assumed to terminate for most groups.
- Modify the disability rates for some groups. The rates of disability incidence were generally decreased for those groups.

The investment return assumption remains unchanged at 7.50%. This investment return assumption was reviewed in detail and we determined its use continued to be appropriate for performing the January 1, 2014 actuarial valuation. The actuary reviews the investment return assumption each year and provides consultation to the Board regarding its appropriateness. The Board has the authority to change this assumption each year.

The results of the actuarial valuation are dependent on the actuarial assumptions used. Actual results can and almost certainly will differ, as actual experience deviates from the assumptions. Even seemingly minor changes in the assumptions can materially change the liabilities and calculated contribution rates.

It is our opinion that the assumptions used to perform this valuation are internally consistent and are reasonable based on past and anticipated future experience of the System.

#### **DATA**

Member data for retired, active and inactive members was supplied as of December 31, 2013 by the URS staff. The staff also supplied asset information as of December 31, 2013. We did not audit this data, but we did apply a number of tests to the data and concluded that it was

Utah State Retirement Board August 19, 2014 Page 4

reasonable and consistent with the prior year's data. GRS is not responsible for the accuracy or completeness of the information provided to us by URS.

#### **CERTIFICATION**

We certify that the information presented herein is accurate and fairly portrays the actuarial position of URS as of January 1, 2014.

All of our work conforms with generally accepted actuarial principles and practices and with the Actuarial Standards of Practice issued by the Actuarial Standards Board. In our opinion, our calculations also comply with the requirements of Utah state law and, where applicable, the Internal Revenue Code, ERISA, and the Statements of the Governmental Accounting Standards Board.

The undersigned are independent actuaries and consultants. Mr. White is an Enrolled Actuary and a Member of the American Academy of Actuaries and meets the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein. Both consultants below are experienced in performing valuations for large public retirement systems.

Sincerely,

Daniel J. White, FSA, EA, MAAA

EXECUTIVE SUMMARY

#### **EXECUTIVE SUMMARY AND CONTRIBUTION REQUIREMENTS**

- There were no increases in the gross recommended contribution rates from the prior year.
  - The contribution rate for the Noncontributory State & School Fund (Fund 16) is 22.19% of payroll.
  - The contribution rate for the Noncontributory Local Government Fund (Fund 15) is 18.47% of payroll.
  - The recommended contribution rate for the defined benefit portion of the Tier II Public Employee Retirement System and Tier II Public Safety and Firefighter Retirement System is 8.22% and 10.67% of pay, respectively. Both Tier II funds continue to have a funded ratio greater than 100%.
  - Due to a decrease in the average fire insurance premium receipts, the net employer contribution rates for both firefighter funds increased by 0.17% of pay. The employer rate for Fund 31 (Division A) increased from 3.82% to 3.99% and the rate for Fund 32 (Division B) increased from 6.59% to 6.76%. The member contribution rates remained unchanged at 15.05% for Division A and 16.71% for Division B.
    - See Exhibit 2(b) for details about the offsets applied to contribution rates for Firefighters.
  - Due to a decrease in the average court fee receipts, the net employer contribution rates for the Judicial fund increased by 1.57% of pay to 41.58%.
    - See Exhibit 2(b) for details about the offsets applied to contribution rates for Judges System.
- Total projected contributions for all funds combined are estimated to be \$1.1 billion for fiscal year 2015.
- Exhibits 1(a) and 1(b) show the recommended contribution rates for FY 2016, and compare these to the rates certified for FY 2015 based on the last valuation.
  - Rates include funding for the 3% substantial substitute benefit, where applicable.
  - Rates do not include the 1.50% 401(k) contribution.
  - Offsets for Firefighters System and Judges System are shown.
  - Rates shown on Exhibits 1(a) and 1(b), column 6 are for the twelve-month period beginning July 1, 2015 (FY 2016).
  - Rates may need to be adjusted for the effect of 2015 legislation.
- Exhibits 1(c) and 1(d) show the development of the recommended rates under §49-11-301(5). The recommended rates are the larger of the actuarially calculated rates from the current valuation (Col. 2) and the rates certified for FY 2015 (Col. 3).
  - §49-11-301(5) permits the Board to set the contribution rate at the prior year's level if the actuarially calculated rate would be less and the funded ratio is less than 110%.

- The funded ratio for the Tier II Public Safety and Firefighter Hybrid System exceeds 110%. Therefore, the rates are being adjusted from the prior year level. See the discussion on page 7.
- The policy is applied to the gross rates for the Tier I Firefighter funds and the Judges, i.e., before application of the offsets for the fire insurance premium tax receipts and the court fees.
- This policy is separately applied to the contribution rate for the 3% substantial substitute that is included with the contribution rates for the State and School funds, the State Public Safety funds and the Judges.
- Exhibit 2(a) shows the components of the actuarially determined contribution rate, and Exhibit 4(a) reconciles the actuarially calculated rates determined by this valuation and the previous valuation.
  - All of the funds, except the 3% Substantial Substitute fund, experienced a decrease in their actuarially calculated contribution rate primarily due to favorable investment experience and the changes in the actuarial assumptions.
- There were no legislative changes enacted since the previous valuation that had a measurable effect on the current valuation.
- Recommend adoption of new assumptions. Principle assumption changes include:
  - Decrease the wage inflation assumption from 3.75% to 3.50% for all groups
  - Decrease the payroll growth rate assumption from 3.50% to 3.25%
  - Overall decrease in the rates of retirement for most groups
  - Overall increase in the rates of termination for most groups
  - Minor adjustments were also made to most over assumptions. Refer to the Actuarial Methods and Assumptions section of the Discussion Section for a more comprehensive list and discussion
- Amortization payments for the calculated contribution rates are based on:
  - A 20-year amortization period is used for determining the contribution rates
  - Contributions determined as level percentage of pay (except for Governors and Legislators Plan, where amortization is in level payments)
  - Total payroll assumed to increase 3.25% per year
  - No future growth in the number of active members is taken into account
- The plan earned 14.80%, net of investment and administrative expenses, on a market-value basis during 2013
  - The actual market value as of December 31, 2013 (\$25.096 billion) was \$1.6 billion more than the expected market assets at this date based on a 7.50% return assumption

- Plan uses actuarial value to determine contribution rates and funded status
  - 5-year smoothing of net earnings above or below the investment return assumption
  - Method reflects just 20% of investment gain or loss each year
- The local government, state and school, firefighters, as well as a majority of the public safety funds experienced liability gains.
  - Impact on contribution rates shown on Exhibit 4(a) col. (5), and Exhibit 4(b) col. (4)
- The Governors and Legislative Plan was 77.6% funded as of January 1, 2014. We recommend a \$421,429 appropriation be made to the plan on or before June 30, 2016. Please see Exhibit 16.

## SECTION II

DISCUSSION

#### **DETERMINATION OF CALCULATED CONTRIBUTION RATES**

The URS retirement systems, except for the Governors' and Legislators' Retirement Plan, are funded by employer contributions which are expressed as a percent of pay, and in some cases by member contributions. The Firefighters System and the Judges System receive additional funding from outside sources. As shown in Exhibit 2(a), the calculated employer contribution rate can have as many as four components:

- The normal cost percentage (NC%)
- The amortization percentage (UAAL%)
- The contribution required to fund the 3% substantial substitute benefit (3%SS)
- The offset for fire insurance premium taxes and court fees which reduce the employer contribution rates in the Firefighters System and the Judges System, respectively.

The NC% is the theoretical amount which would be required to pay the members' benefits, based on the current plan provisions, if this amount had been contributed from each member's entry date and if the fund's experience exactly followed the actuarial assumptions. This is the amount it should cost to provide the benefits for an average new member. The NC% for each fund is shown in Exhibit 6(a).

Some of the funds require active member contributions, and for these, only the excess of the NC% over the member contribution rate is included in the employer contribution rate, as shown in Exhibit 6(b) and in column 2 of Exhibit 2(a).

The actuarial accrued liability (AAL) is the difference between (i) the actuarial present value of all future benefits for all current members of the fund, including active, inactive and retired members, and (ii) the actuarial present value of future normal costs. Thus, the AAL represents the liability associated with past years. The unfunded actuarial accrued liability (UAAL) is the difference between the AAL and the actuarial value of assets (AVA). It is the shortfall/excess between the liability associated with prior years (the AAL) and the assets actually accumulated (the AVA). This shortfall/excess can arise from several sources, including actuarial gains and losses which are caused by differences between actual experience and the plan's assumptions, changes to the plan's actuarial assumptions, and amendments to the benefit provisions.

The UAAL% is the amount required to fund this difference. It is the amount, expressed as a level percentage of payroll, necessary to amortize the UAAL. The Board's current policy calls for developing the actuarially determined contribution by amortizing the UAAL over an open 20 year period. Column 3 of Exhibit 2(a) shows the UAAL% of the calculated rates for each fund.

The 3% Substantial Substitute component of the employer contribution rate is only required for funds whose members are employees of the state (or who are paid by state funding). This piece is the amount necessary to fund the 3% Substantial Substitute. It is shown in column 4 of Exhibit 2(a), and is described in greater detail later. The last piece of the contribution rate is the offset. The Firefighters System receives a portion of the fire insurance premium taxes collected by the state, and the Judges System receives a portion of court fees collected by the judiciary. The calculation of the offsets is shown in Exhibit 2(b).

Section 49-11-301(5) of the Utah Code gives the Board the option of setting contribution rates at the higher of the previous year's rate and the current year's actuarially calculated rate. The Board does not have to decrease the contribution rate from the prior year as long as it is funding towards or maintaining a funded ratio of 110%. The Board has historically followed the policy of holding the rates constant, but not less than the actuarially calculated rate, as permitted by §49-11-301(5).

Under the policy, the actuarial rates and last year's certified rates are compared, and the larger is set as the new certified rate. This is done separately for: (1) the 3% Substantial Substitute fund, (2) each Tier II hybrid fund, (3) the total contribution rate applicable to the payroll of Tier I members, and (4) the total contribution rate applicable to the payroll of Tier II members. Then the offset for the fire insurance premium tax and the court fees are applied, as shown in Exhibit 1(a). Because the Tier II Public Safety and Firefighter Hybrid System's funded ratio is greater than 110%, the defined benefit contribution rate could no longer be held at the prior year's rate. Therefore, we determined a credit to the contribution rate for the assets in excess of 110% of the liabilities and applied this credit to the prior year's rate. This credit amounted to a 0.05% reduction in the defined benefit contribution rate and a corresponding 0.05% increase in the contribution to these members' defined contribution account.

The Governors' and Legislators' Retirement Plan, unlike the other systems, is funded by direct legislative appropriations. Similar to last year, we are recommending an appropriation be made for this plan by the end of FY 2016. Please see the discussion about the determination of the appropriation later in this section and the calculation of the appropriation on Exhibit 16.

Exhibit 2(a) also shows the development of the calculated contribution rate for the Tier II Hybrid systems. The State makes contributions on Tier II payroll towards the 3% substantial substitute. However, since the Tier II Hybrid Plans are cost sharing plans and the State and local governments participating in the plans do not have separate Tier II Hybrid Plan contribution rates, the rates shown on Table 2(a) exclude the 3% Substantial Substitute contribution.

All employers in Tier II must make an additional contribution, based on the payroll of their Tier II employees, towards the amortization of their Tier I unfunded liabilities. This additional contribution rate is not shown on Exhibit 2(a) because it varies by employer. However, the additional amortization payment for each fund is shown in Column 7 of Table 1(d). This additional amortization payment also includes the payment for the 3% Substantial Substitute if applicable.

#### FINANCIAL DATA AND EXPERIENCE

As of December 31, 2013, the retirement systems that are part of URS have a total market value of \$25.096 billion. This excludes assets of the defined contribution plans that are also administered by URS. Assets of the various funds and systems are commingled for investment purposes. Financial information was gathered from the 2013 URS Comprehensive Annual Financial Report, with additional information provided by the URS staff.

This report includes a number of exhibits related to plan assets. Exhibit 11(a) shows how the total market value is distributed among the various classes of investments. Currently, 65% of invested assets are held in equities and alternative investments, compared with 63% last year and 62% the year before.

Exhibit 11(b) shows a reconciliation, for each fund, of the market values between the beginning and end of 2013. The contributions shown in column 3 of Exhibit 11(b) include employer and member contributions, as well as court fees and fire insurance premium tax receipts. The 3% substantial substitute fund is shown as a separate item.

During 2013, the total investment return on market values was 14.8%, as shown on Exhibit 12(a). This return is net of all investment and administrative expenses.

In determining the contribution rates and funded status of the funds, an actuarial value of assets (AVA) is used, rather than the market value of assets. The method used to compute the AVA takes the difference between actual earnings and expected earnings (based on the assumed rate of investment return) each year, and recognizes the difference over five years, at 20% per year. This is intended to reduce the volatility of the contribution rates from year to year. This "smoothed" asset value is then subjected to the further constraint that the actuarial value of assets cannot be less than 75% or more than 125% of the market value of assets. For 2014, the five-year smoothed asset value is \$23.4 billion for all systems combined, or 93% of the market value of assets.

The development of the AVA is shown on Exhibits 13 and 14. URS staff prepared the initial calculation of the AVAs, but these were reviewed and if necessary modified by GRS.

Some funds in the Contributory Public Employees System and the Contributory Public Safety System are paired with funds in the Noncontributory Public Employees and Noncontributory Public Safety systems. For example, Fund 23, Other Division A, in the Contributory Public Safety System is paired with Fund 43, Other Division A, in the Noncontributory Public Safety System. In these cases, URS has established a policy of maintaining either the same difference between contribution rates for pairs of funds, or it maintains equal amortization percentages. To accomplish this, assets are transferred each year between fund pairs, as necessary. Because the 4% COLA funds in the Public Safety funds also contain employers that have members in both the Contributory and Noncontributory systems, we have continued the practice of pairing funds and transferring assets between the paired funds to produce the same amortization payment as a percentage of pay. For this purpose, Funds 77 & 75 are paired as are Funds 74 & 76. Exhibit 14, column 6 shows the change that must occur to the AVA in order to accomplish this. Exhibit 14, column 3 shows how much must be transferred between systems to accomplish this in terms of market value.

In addition to the market return, Exhibit 12(a) also shows the return on the actuarial value for URS. For 2013, this return was 11.0%. Because this is greater than the assumed 7.50% investment return, the plan experienced a gain on the actuarial value of assets. Exhibit 12(b) shows a summary of market and actuarial return rates in recent years.

Exhibits 4a and 4b show the reconciliation of the contribution rates and the unfunded actuarial accrued liabilities from the last valuation to this one, including the effect of asset and liability gains and losses, changes in assumptions, changes in plan provisions, etc.

#### MEMBER DATA

Member data was supplied by URS staff on electronic files as of December 31, 2013. While we did not audit this data, we did perform various tests to ensure that it was internally consistent, consistent with the prior year's data, and was reasonable overall.

The number of public employees decreased from 92,744 to 91,934. On the other hand, the number of public safety and firefighters increased from 9,580 to 9,708. The following table provides the number of Tier I and Tier II employees as of the valuation date for these two groups.

| Tier I and Tier II Employee Count       |        |                    |                      |        |  |
|---|--------|--------------------|----------------------|--------|--|
|   |        |                    | Tier II              |        |  |
|   |        | Tier II            | Defined              |        |  |
|   | Tier I | <b>Hybrid Plan</b> | ${f Contribution}^1$ | Total  |  |
| All Public Employee Funds <sup>2</sup>  | 77,075 | 13,352             | 1,507                | 91,934 |  |
| All Public Safety and Firefighter Funds | 8,791  | 843                | 74                   | 9,708  |  |

<sup>&</sup>lt;sup>1</sup> Tier II members electing the defined contribution plan will be moved into that plan after their first year of employment and their election becomes irrevocable.

For all the funds combined, the number of retirees (including disables and beneficiaries) increased from 51,677 to 54,117. There are now 1.9 employees for every retiree in the Retirement System.

Exhibit 8 shows the number of members by category (active, inactive, retired, etc.) and by fund. Exhibit 9 shows active member statistics by fund, and Exhibit 10 shows retiree statistics by fund. Exhibits 17(a)-17(i) show summaries of certain historical data, including membership statistics, for each system.

<sup>&</sup>lt;sup>2</sup> Excludes employees in the Judges and Governors and Legislative Retirement Funds.

#### **BENEFIT PROVISIONS**

Appendix 2 includes a summary of the benefit provisions for each of the retirement systems in URS. The valuation would typically reflect any benefit changes enacted by the 2014 legislature. Although not effective on the valuation date, such legislation would generally be effective on or before the contribution rates actually go into effect at July 1, 2015.

However, there were no legislative changes made since the previous valuation that had a measurable effect on the current valuation.

This valuation reflects all benefits promised to URS members, either by the statutes, or in the case of the special supplement for the Governors' and Legislators' Retirement Plan and the ROPP payments (discussed later), by the Board. There are no ancillary benefits that might be deemed a URS liability if continued beyond the availability of funding by the current funding source.

#### **ACTUARIAL METHODS AND ASSUMPTIONS**

Appendix 1 includes a summary of the actuarial assumptions and methods used in this valuation.

The actuary reviews the investment return assumption each year and provides consultation to the Board regarding its appropriateness. Current Board policy is to perform an experience study every three years. In connection with the appropriate valuation, the actuary conducts a thorough review of plan experience for the preceding five years, and then makes recommendations to the Board. An experience study was conducted in conjunction with this valuation which resulted in a number of changes to the assumptions.

The following is a description of the main findings and recommendations of our study:

- Overall decrease in the rate of salary increase. Decrease the wage inflation assumption from 3.75% to 3.50% (i.e. 2.75% price inflation plus 0.75% for productivity), and slight modifications to the service-related salary increase assumptions.
- Decrease the payroll growth assumption from 3.50% to 3.25%.
- Modify the retirement rates for most groups. The changes result in an overall decrease in the rates at which active members are expected to retire.
- Modify the termination rates for most groups. The updates generally result in a slight increase in the rates at which active members are expected to terminate.
- Minor adjustments to the pre-retirement mortality assumption. Update the post-retirement mortality assumption for female teachers.

The investment return assumption remains unchanged at 7.50%. This investment return assumption was reviewed in detail and we determined it continues to be appropriate for performing the January 1, 2014 actuarial valuation. The actuary reviews the investment return assumption each year and provides consultation to the Board regarding its appropriateness. The Board has the authority to change this assumption each year.

For a more thorough discussion of the analysis of the experience and the assumption recommendations, please see our Actuarial Experience Study dated August 19, 2014. Please refer to Appendix 1 of this report for a complete description of these assumptions.

#### GOVERNORS AND LEGISLATIVE PENSION PLAN

The Governors and Legislative Pension Plan (Leg/Gov Plan) is funded by direct appropriations rather than through pay-period contributions. Since the plan continues to be less than fully funded for 2014, we are recommending an appropriation for fiscal year 2016. Please see Exhibit 16 for the determination of the appropriation amount. We also anticipate that appropriations will be recommended for each fiscal year for the next several years.

The Leg/Gov Plan is unique among the retirement systems in URS in that neither the benefits of the plan nor the contributions to the plan are tied to member pay. As a result, the calculation of the appropriation is performed in a slightly different manner than the determination of the contribution rates for the other funds.

The Entry Age Normal funding method is used to determine the cost allocation of the contribution requirements because it produces a cost pattern that remains level over time (if the assumptions are met). With the other URS systems, the cost is determined so as to remain level as a percentage of pay over time. Since neither the contributions nor benefits of the Leg/Gov Plan are pay related, we have determined the cost as a level dollar amount. This method will produce appropriations that should remain level over time (if the actuarial assumptions are exactly met).

The Entry Age Normal level dollar approach will be used to determine the normal cost and actuarial accrued liabilities of the Leg/Gov Plan. In addition, the determination of the amortization payment for amortizing the unfunded liabilities of the system is determined using a level dollar approach as well. This valuation determines the appropriation for fiscal year 2016. Because of the lag between the determination of the dollar contribution amount and the payment of the contribution, we included an adjustment for interest in the determination of the appropriation.

The recommended appropriation for fiscal year 2016 is \$421,429. The allocation of this appropriation to the Governor's Office, House, and Senate is \$18,201, \$290,790, and \$112,438, respectively.

The allocation of the Plan's normal cost was based on the number of active positions in each of the branches of government. Since the current Governor does not participate in the defined benefit plan, there is no normal cost assigned to the Governor's Office. Therefore, the normal cost was allocated to just the House and Senate based on their percentage of positions that are eligible for coverage (75 House members and 29 Senators). Because there are only three former governors on whose behalf benefits are payable (or will be payable in the future), we directly determined the liability and amortization charge directly for the Governor's office based on that percentage of the total liability of the Plan. We then allocated the remaining liability between the House and Senate in the same manner as the allocation of the normal cost. Finally, the interest charge was allocated in proportion to the sum of the normal cost and amortization charges.

We believe this procedure fairly allocates the required appropriation to the three entities.

#### FIREFIGHTERS AND JUDGES OFFSETS

A portion of the fire insurance premium taxes collected by the State of Utah is contributed to the Firefighters System, and a portion of the court fees collected by the state judiciary is contributed to the Judges System. To account for this prospectively, the recommended contribution rates for the funds in these systems are reduced.

In order to dampen year-to-year fluctuations in the offsets, we use a rolling three-year average of the fire insurance premium receipts and court cost in computing the offsets. The offset is first applied to reduce the amortization cost. The remaining offset (if any) will reduce the employer's normal cost. The calculation of the offsets is shown on Exhibit 2(b).

For the Firefighters, the offset for the amortization costs is determined using the combined payroll of Tier I and Tier II. The offset, if any, for the normal cost is determined only using the expected pay from Tier I. In addition, it is assumed that all of the offset will be contributed to Tier I.

Due to a decrease in the insurance premium receipts for calendar year 2013, the offset for the Firefighter System slightly decreased from 11.71% to 11.54%. Similarly, a decrease in the amount of court fees received during 2013 decreased the offset for the Judges System from 11.90% to 10.33%.

The gross employer contribution rate for both Firefighter funds is larger than the offset, so employers will be required to make contributions. Member contribution rates will remain at last year's rate of 15.05% and 16.71% for Division A and Division B respectively.

The 2004 Legislature enacted legislation which created the Public Safety Retirees' Cost-of-Living Increases Restricted Account (Restricted Account). As a result of this legislation a portion of fire insurance premium tax receipts that would normally have been contributed to the Firefighter System may instead be redirected to this new account. No funds were transferred to this account in calendar year 2013.

#### 3% SUBSTANTIAL SUBSTITUTE

Due to the removal of the state income tax exemption for benefits paid by URS, legislation was passed to provide a 3% retirement benefit increase for URS retirees who were members of URS prior to January 1, 1989. All future retirees who were members of URS prior to January 1, 1989 will be eligible for this benefit as well, as will beneficiaries of eligible members.

The 3% increase applies to all benefits paid to eligible members, including benefits earned after January 1, 1989 and including future cost-of-living increases. However, the 3% increase does not apply to refunds of employee contributions or to the Restoration of Purchasing Power (ROPP) benefits; see the next section.

Due to legislation passed in 1994, this benefit is now pre-funded. The obligation for payment of this benefit belongs to the state, however, not to the employer. Therefore the contribution needed to fund the benefit is determined as an addition to the employer contribution rates required for the State and School Funds in the Public Employees Contributory and Noncontributory Systems, the State of Utah funds in the Public Safety Contributory and Noncontributory Systems, and the Judges System. Contributions are also collected on the payroll of state employees covered under the Tier II systems.

The actuarially determined contribution required to pay for this benefit is 0.71%, 0.14% less than the current contribution rate of 0.85%. Details of the calculation are shown in Exhibit 15(a), while Exhibit 15(b) shows a distribution of the liabilities associated with this benefit.

The Board has the authority, under Section 11-49-301(5), to hold the contribution rate for the Substantial Substitute at 0.85% (last year's rate).

## RESTORATION OF PURCHASING POWER (ROPP)

URS provides a special benefit to a closed group of retired members. This benefit was granted by the Board of Trustees, not by the legislature, and hence it does not appear in the statutes governing URS. The Board provided this benefit, called the Restoration of Purchasing Power benefit or ROPP benefit, to retired members during the 1980s, in order to counteract some of the impact of inflation.

The ROPP benefit is a fixed amount that does not increase and is not adjusted for changes in the cost of living. It is provided only to the closed group of members who were retired at the time of the Board's action. Therefore, since the group is closed and since the benefit amount cannot increase, this liability decreases from year to year as the retiree group receiving the ROPP grows older and decreases in size due to mortality.

Exhibit 5(e) shows the liabilities for the ROPP benefits in column 5.

Note: Recommended contribution rates include the contribution to the Tier II DC Plan and the Tier I amortization cost Rates reflect 3% Substantial Substitute where applicable

The contribution rates shown above include the cost of the 75% of pay active death benefit. The cost of the death benefit for public employee funds for FY 2015 and FY 2016 was 0.11% and 0.08%, respectively. Similarly, the cost of the death benefit for public safety and firefighter funds for FY 2015 and FY 2016 was 0.08% for each fiscal year.

Recommended rates reflect application of U.C. Sec. 49-11-301(5)

<sup>\*</sup> Contribution rate for the Tier II defined benefit plan. Rates shown above do not include the cost of the 75% of pay death benefit provided to active members.

Note: Tier I certified amortization rates include 3% Substantial Substitute where applicable.

Tier I certified amortization percentage is the difference between the total Tier I rate after reflecting application of U.C. Sec. 49-11-301(5) and the net normal cost. Rates shown for Firefighters and Judges exclude offsets for fire insurance premium tax and court fees.

<sup>\*\*</sup> The recommended contribution rate for the public employees hybrid plan is equal to the greater of the calculated rate for the current year and the certified rate from the prior year. The recommended contribution rate for the public safety and firefighter plan is equal to the great of the calculated rate for the current year and the certified rate from the prior year decreased by 0.05% for amortization credit for assets in excess of 110% of the actuarial accrued liability.

<sup>&</sup>lt;sup>1</sup> The net employer rate may be less than the recommended contribution rates because they do not reflect the Board's policy of maintaining the prior year's rate, if greater, as permitted by U.C. Sec. 49-11-301(5).

<sup>&</sup>lt;sup>2</sup> These rates exclude the Tier I amortization payment and the 3% Substantial Substitute. The normal cost excludes the 75% of pay death benefit provided to active members.

| Average return |              |                 |
| Last 5 years:  | 11.2%        | 4.7%            |
| Last 10 years: | 7.0%         | 5.9%            |
| Last 15 years: | 6.4%         | 6.5%            |
| Last 20 years: | 7.8%         | 7.8%            |

## Calculation of Actuarial Value of Assets (All Retirement Systems Combined)

1. Market value of assets

\$ 25,096,075

2. Adjustments to smooth asset values based on excess/shortfall of expected investment income for:

|    | Year  | Total<br>Excess / (Shortfall) | Weight<br>Subtracted | Weight<br>Subtracted |
|----|-------|-------------------------------|----------------------|----------------------|
| a. | 2013  | 1,600,276                     | 80%                  | 1,280,221            |
| b. | 2012  | 1,016,923                     | 60%                  | 610,154              |
| c. | 2011  | (977,081)                     | 40%                  | (390,832)            |
| d. | 2010  | 955,219                       | 20%                  | 191,044              |
| e. | 2009  | 855,756                       | 0%                   | 0                    |
| f. | Total |                               |                      | 1,690,587            |
|    |       |                               |                      |                      |

3. Preliminary actuarial value of assets (1-2f)

\$ 23,405,488

4. Corridor Limits

| CO | HIGOT LIHIUS   |               |
|----|--|---------------|
| a. | 75% of market value  | \$ 18,822,056 |
| b. | 125% of market value   | 31,370,093    |
| c. | Actuarial value (Item 3, not more than 4b, not less than 4a) | \$ 23,405,488 |
|    |  |               |

5. Ratio of actuarial value to market value

93.3%

Note: Amounts shown are in \$ thousands

<sup>\*\*</sup> Unfunded Actuarial Accrued Liability.

#### STATEMENT OF ACTUARIAL ASSUMPTIONS AND METHODS

#### 1. *Investment return rate*:

7.50% per annum, compounded annually, composed of a 2.75% inflation rate, a 4.75% net real rate of return.

#### 2. Active member mortality rates:

Active member mortality rates are a function of the member's sex, occupation, and age. These rates were developed based on plan experience. For the Public Safety and Firefighters Systems, 25% of deaths are assumed to be service related. Rates at selected ages are shown:

|     | Active Mal           | e Members        |
|-----|----------------------|------------------|
|     | All Public Employees |                  |

4. *Termination rates (for causes other than death, disability or retirement)*:

Termination rates are a function of the member's sex, occupation, and service. These rates were developed based on plan experience. Termination rates are not applied after a member becomes eligible for a reduced or unreduced retirement benefit.

#### 5. *Refund rates*:

Refund rates are the percentage of vested members electing to receive a refund of contributions upon termination of employment. This rate is only applied to members of the contributory systems; vested members in the noncontributory systems are assumed to defer their benefits until retirement, even if they have a contribution account from service prior to the establishment of the noncontributory system. The rate is a function of the member's sex, occupation and service. These rates are based on plan experience.

#### 6. *Retirement rates*:

Retirement rates are a function of the member's age, sex and occupation (and service in the case of Firefighters, Public Safety and Judges). Rates are based on plan experience. Rates are applied only at ages at which the member is eligible for a reduced or unreduced retirement benefit. Members are assumed to retire no later than age 75 (age 70 for the public safety, firefighter and judges systems). Sample rates are shown below.

|     | Tier I - Local Government |       |         |           |  |  |
|-----|---------------------------|-------|---------|-----------|--|--|

### 7. *Salary increase rates*:

Salaries for individual members are assumed to increase each year, as a function of the member's occupation and service. Rates are composed of a 2.75% inflation rate, a 0.75% general increase rate that applies to all, and a variable promotional/longevity component that is a function of the member's service.

#### 8. *Annuitant mortality rates (nondisabled retirees)*:

#### All non-educator groups:

Male retirees: 100% of RP-2000 Combined Healthy for Males with White Collar adjustments, projected with Scale AA from 2000.

Female retirees: 120% of rates in a GRS table based on female teacher experience, projected with Scale AA from 2000.

#### Educator group:

Male retirees: 90% of rates in a GRS table based on male teacher experience, projected with Scale AA from 2000.

Female retirees: 100% of rates in a GRS table based on female teacher experience, projected with Scale AA from 2000.

| Mortality Rates in Base Tables before Projection (Multipliers Applied) |               |          |           |          |  |

| Females  | 16.1 16.4 16.7 16.9 17.2 |  |  |  |  |

#### 10. Actuarial cost method:

The Entry Age Normal actuarial cost method is used. This method is designed to produce a relatively level funding pattern when expressed as a percent of pay.

First, the actuarial present value of all future expected benefits is determined for each member, including retired members, beneficiaries, inactive members and active members. This takes into account both the probability that a benefit will be paid at a given age and the time value of money. The sum of these amounts--the Present Value of Future Benefits (PVFB)--is then determined.

Next, the Entry Age Normal actuarial cost method is used to allocate the PVFB between the current year (the normal cost), prior years (the Actuarial Accrued Liability), and future years (future normal costs). The current and future normal costs are determined as a level percentage of pay, except that for the Legislators and Governors plan, which is not pay related, normal costs are determined as a level dollar amount.

A portion of the normal cost may be paid by employee contributions in which case the balance becomes the normal cost portion of the employer contribution rate.

The difference between the Actuarial Accrued Liability (the portion of the total actuarial present value of future benefits allocated to prior years) and the Actuarial Value of Assets is called the Unfunded Actuarial Accrued Liability (UAAL). This is funded over 20 years from the valuation date.

The total employer cost rate is the sum of (i) the normal cost rate, net of employee contributions if applicable, and (ii) the level percent-of-pay amortization of the UAAL. For the Judges' System and the Firefighters' System, certain specified revenues (court fees and a tax on fire insurance premiums, respectively) are used as an offset to the employer contribution rate each year, as described elsewhere in this report.

All contribution rates are based upon monthly payments of contributions.

#### 11. Actuarial value of assets:

The actuarial value of assets is equal to the market value, adjusted for a five-year phase in of actual investment return in excess of (or less than) expected investment return. The actual return is calculated net of investment and administrative expenses, and the expected investment return is equal to the assumed investment return rate multiplied by the prior year's market value of assets, adjusted for contributions, benefits paid, and refunds. The actuarial value of assets is further adjusted, if necessary, so that it is not less than 75% of market value and not more than 125% of market value.

#### 12. *Payroll growth rate*:

In determining the level percent of payroll amortization rate, payroll is assumed to grow annually at 3.25%. No allowance is made for future growth in the number of members.

#### 13. *Marital status*:

All nonretired members are assumed to be married with no children. Female members are assumed to be three years younger than their spouses, while male members are assumed to be three years older than their spouses.

#### 14. *Administrative and investment expenses*:

The assumed 7.50% investment return rate represents the anticipated net return after payment of all investment and administrative expenses. Administrative expenses are assumed to be 0.06% of plan assets each year.

#### 15. Judges System:

For the Judges System, no disability or withdrawal rates were used. Salaries are assumed to increase at 3.50% per year.

#### 16. *Governors and Legislative Pension Plan*:

A 10% withdrawal rate is assumed regardless of age or service. No disability rates are used. No salary increase rate is used because the benefits do not reflect pay. Members are assumed to retire at the earlier of (i) age 65 with four years of service, or (ii) age 62 with 10 years of service. Normal cost and actuarial accrued liability are based on Level Dollar Entry Age Cost Method (not Level Percent of Pay).

#### 17. Interest Credited on Member Contribution Account Balances:

In projecting member contribution account balances, we assume that the rate credited is 7.50% each year. (The actual rate is set by the Board of Trustees annually, based on investment performance.) Interest is not credited to account balances for members of the Firefighters Retirement System.

#### 18. *Mortality Improvement:*

For post-retirement mortality, both healthy and disabled, we assume continuous (generational) mortality improvement according to Scale AA from a base year of 2000. Mortality improvement is ignored for the pre-retirement mortality assumption, since it would not have a material effect on the liabilities.

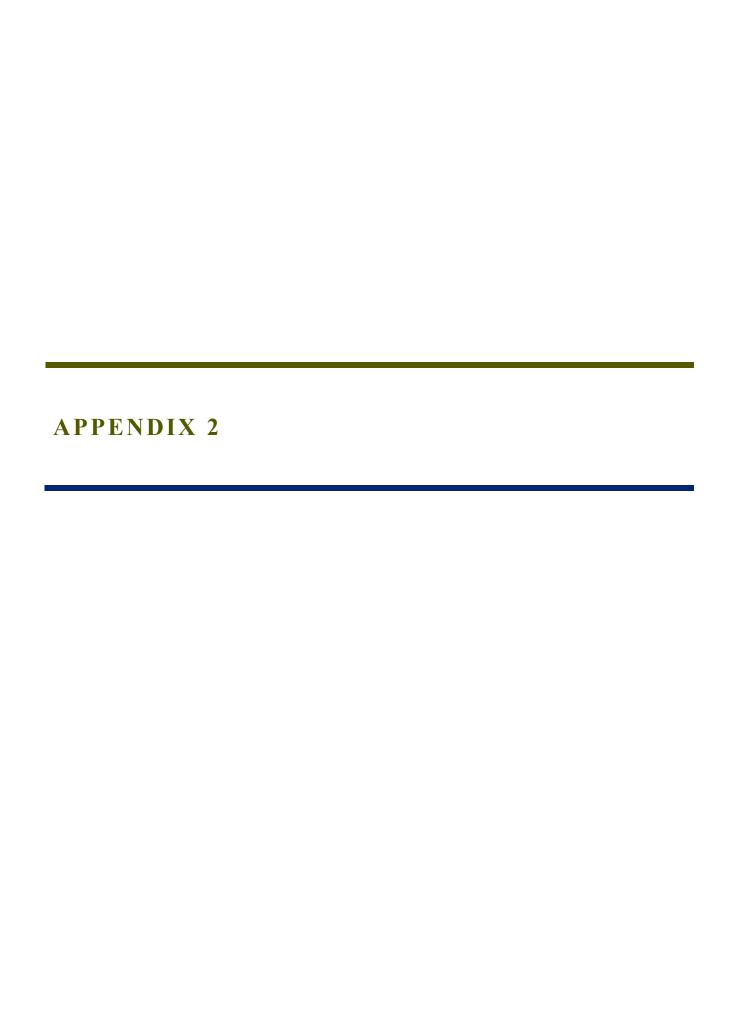

#### 19. LTD Benefit Protection Contracts:

It is assumed that all members of the Tier I Public Employee Retirement Systems are covered by an LTD Benefit Protection Contract. LTD benefit protection contract coverage for the Tier II Hybrid Retirement Systems (Public Employees and Public Safety and Firefighters) is being valued for those members who are employed by a participating employer that elected to provide coverage to their workforce.

#### 20. *Cost-of-living increases*:

Retirement benefits for all systems with a maximum 4.00% COLA are assumed to increase at 2.75% even though the maximum allowable rate is 4.00%. Retirement benefits for the funds with a maximum 2.50% COLA—e.g., some of the Public Safety funds—are assumed to increase at the maximum allowable rate of 2.50%.

For current retirees who have received cumulative COLAs less than the total of annual CPI increases since retirement, we assume higher COLAs, subject to the annual maximum, as long as the member has "banked" CPI increases left.

# SUMMARY OF BENEFIT PROVISIONS FOR PUBLIC EMPLOYEE RETIREMENT SYSTEMS (CONTRIBUTORY AND NONCONTRIBUTORY)

- 1. *Effective Date*: Contributory System July 1, 1961. Noncontributory System - July 1, 1986.
- 2. *Plan Year*: Twelve-month period ending December 31st.
- 3. *Administration*: The Systems are administered by a Board of Trustees (which also administers the other Utah Retirement Systems). The Board of Trustees is responsible for both administration of the Systems and investment of the fund assets.
- 4. *Type of Plan*: These are qualified governmental defined benefit retirement plans. Under GASB 25, they are considered to be cost-sharing multiple-employer plans.
- 5. Eligibility: These Systems cover eligible employees of the State of Utah, most local government employees, and most public education employees. Generally all employees are covered, except for those covered by another System--public safety employees, firefighters, judges, legislators, and higher education employees covered under TIAA-CREF. Eligible employees become participants immediately when hired, and are required to participate. The employer-selected plan determines whether new employees participate in the Contributory or Noncontributory System. Employees who were members of the Contributory System at the time their employer selected the Noncontributory System had an option to remain in the Contributory System. These Systems are closed to members hired on and after July 1, 2011.
- 6. *Employee Contributions*: Members of the Contributory System contribute 6.00% of salary per year. Employers may "pick-up" employee contributions under Section 414(h) of the Internal Revenue Code. No contributions are made by members of the Noncontributory System.
- 7. *Employer Contributions*: The current contribution rates differ between the Contributory and Noncontributory Systems, and also differ depending on whether the member is employed by a local government (Level B) or the State of Utah or a public school (Level A). Rates are set by the Board of Trustees, based upon the actuarial valuation report for the preceding year. The Funds participating in these systems are:
  - Fund 11 Local Government Contributory
  - Fund 12 State and School Contributory
  - Fund 15 Local Government Noncontributory
  - Fund 16 State and School Noncontributory
- 8. *Final Average Monthly Salary (FAMS)*: The monthly average of the member's highest salaries preceding retirement. For the Contributory System a five-year average is used, while a three-year average is used for the Noncontributory System.

- 9. Service Retirement (Unreduced):
  - a. <u>Eligibility</u>: A member may retire with an unreduced benefit at age 65 with four years of service or after 30 years of service if earlier.
  - b. <u>Monthly Benefit (Contributory)</u>: 2.00% times Final Average Monthly Salary (FAMS) times years of service earned since July 1, 1975, plus 1.25% of FAMS times service earned prior to July 1, 1975.
  - c. <u>Monthly Benefit (Noncontributory</u>): 2.00% of Final Average Monthly Salary times years of service.
  - d. <u>Payment Form</u>: Life annuity.
- 10. Service Retirement (Reduced):
  - a. <u>Eligibility</u>: A member may retire with a reduced benefit upon attaining age 62 with 10 years of service or age 60 with 20 years of service. A member of the Noncontributory System may retire at any age after earning 25 years of service.
  - b. <u>Reduction</u>: 3% per year that retirement is earlier than age 65. For Noncontributory System members retiring prior to age 60, actuarial reduction is applied to the 85% factor at age 60. The early retirement reduction factors are shown below:

| Age | Factor | Age | Factor |
|-----|--------|-----|--------|
| 64  | 97.00% | 54  | 49.58% |
| 63  | 94.00% | 53  | 45.47% |
| 62  | 91.00% | 52  | 41.73% |
| 61  | 88.00% | 51  | 38.34% |
| 60  | 85.00% | 50  | 35.24% |
| 59  | 77.49% | 49  | 32.42% |
| 58  | 70.73% | 48  | 29.84% |
| 57  | 64.62% | 47  | 27.49% |
| 56  | 59.10% | 46  | 25.33% |
| 55  | 54.11% | 45  | 23.36% |

c. Payment Form: Life annuity.

**GRS** 

#### 11. *Disability Retirement:*

- a. <u>Eligibility</u>: Member must be eligible for retirement under the Disability Act and must not be eligible for a 30-year service retirement at time of disability.
- b. <u>Monthly Benefits Payable Prior to Retirement</u>: A separate fund established under the Disability Act provides benefits from the time of disability until the age specified in 49-21-403. Benefits from this separate fund are not covered by these Systems.
- c. <u>Monthly Benefits Payable after Retirement</u>: An unreduced service retirement benefit is payable. The member receives service credit for time while disabled (both for computing the benefit amount and for determining whether the member is eligible for an unreduced service retirement benefit). Final Average Monthly Salary is increased by the same factors used for automatic cost-of-living benefit increases. I.e., the FAMS is adjusted by a cost-of-living increase up to 4.0% per year (simple interest).
- d. Payment Form: Life annuity.
- e. <u>Death while Disabled</u>: A disabled member is treated as an active member for purposes of determining a death benefit for the period prior to retirement.

#### 12. *Vesting and Refunds*:

- a. <u>Eligibility</u>: All members who are not vested are eligible for a refund when they terminate service. Members are vested after four years of service. Vested members may also elect to receive a refund in lieu of the deferred termination benefit described below. (Noncontributory System members hired after July 1, 1986, are ineligible for a refund.)
- b. <u>Amount</u>: The refund benefit is the accumulated value of the member's contributions plus interest credited by the fund. The amount of interest credited each year is set annually by the Board of Trustees.

#### 13. *Deferred Termination Benefit*:

- a. <u>Eligibility</u>: Member must be vested (4 years of service) and must elect to leave his/her contributions on deposit.
- b. <u>Monthly Benefit</u>: Same as the unreduced or reduced service retirement benefit, based on service and FAMS at termination, and commencing once the member is eligible.
- c. <u>Payment Form</u>: Life annuity.
- d. <u>Death Benefit</u>: The beneficiary of an inactive member who dies is entitled to receive the benefit described in 14.2.a. and 2.b.

- 14. *Death while an Active Member:* 
  - a. Members will receive benefits 1. and 2. described below.
    - 1. <u>Death Benefit Insurance</u>: A lump-sum payment that is equal to 75% of the member's highest annual salary.
    - 2.a. <u>In General</u>: A refund of the member's accumulated contributions (with interest) is paid to the beneficiary of a deceased member.
    - 2.b. Spousal Annuity: If the deceased member was married at the time of death and was either (i) eligible for reduced or unreduced service retirement, or (ii) had 25 years of service (15 years of service in the noncontributory system), the spouse may elect an annuity benefit in lieu of the refund benefit. The annuity is equal to the reduced or unreduced service retirement benefit payable as though Option 3 (a Joint and 100% Survivor annuity) were elected. If the member had 25 years of service or more, no reduction factor is applied in determining the service retirement benefit. If a member of the noncontributory system is not eligible for a retirement benefit and has less than 25 years of service, then the death benefit is equal to 1/3 of Option 3 benefit if the member has at least 15 and less than 20 years of service, and 2/3 of the Option 3 benefit if the member has at least 20 and less than 25 years of service.
- 15. Optional Forms of Benefit: The Systems permit members to elect from six forms of benefit at retirement. In each case the benefit amount is adjusted to be actuarially equivalent to the "Option 1" form. The six optional forms are:
  - Option 1 A life annuity with no benefits due following the member's death.
  - Option 2 Modified Cash Refund Annuity. A reduced annuity payable for the member's lifetime, plus a death benefit equal to the excess of the member's accumulated contributions (determined at retirement) over the sum of the member's annuity payments from retirement. (The annuity payments are that part of the original benefit derived from the member's own accumulated contributions.)
  - Option 3 Joint and 100% Survivor Annuity. An annuity payable as long as either the member or his/her spouse is living.
  - Option 4 Joint and 50% Survivor Annuity. An annuity payable during the member's lifetime, and after the member's death if the member's spouse is still living, an annuity to the spouse of 50% of the original benefit.
  - Option 5 Joint and 100% Pop-up Annuity. Same as Option 3, except that the benefit amount reverts to the Option 1 (life annuity) amount if the member's spouse predeceases the member.
  - Option 6 Joint and 50% Pop-up Annuity. Same as Option 4, except that the benefit amount reverts to the Option 1 (life annuity) amount if the member's spouse predeceases the member.

- 16. *Postretirement Death Benefit*: None, except as elected by the member. See Optional Forms of Benefit above.
- 17. Postretirement Benefit Increases: Benefits are increased annually to take into account changes in the cost of living, with a maximum annual increase of 4% of the original benefit (i.e., a maximum 4% simple interest increase). In years in which the cost of living increases more than 4%, the excess increase is accumulated and used in later years in which the cost-of-living increase is less than 4%. This calculation is made separately for each individual. In addition, a closed group of retirees also receives a second special increase amount paid as a level annuity under whichever form of payment was elected. This is the Restoration of Purchasing Power (ROPP) payment.
- 18. *3% Substantial Substitute*: All members whose service began before January 1, 1989, receive an additional annual payment equal to 3% of their benefit. These payments are made to offset the taxability of the retirement benefits under the State income tax provisions. Prior to July 1, 1995, this benefit was funded by annual appropriations made by the State on a pay-as-you go basis. Beginning July 1, 1995, this benefit is funded on an actuarial basis by increasing the employer contribution rate for those Funds which are funded by the State.

# SUMMARY OF BENEFIT PROVISIONS FOR PUBLIC SAFETY RETIREMENT SYSTEMS (CONTRIBUTORY AND NONCONTRIBUTORY)

- 1. *Effective Date*: Contributory System July 1, 1969. Noncontributory System - July 1, 1989.
- 2. *Plan Year*: Twelve-month period ending December 31st.
- 3. *Administration*: The Systems are administered by a Board of Trustees (which also administers the other Utah Retirement Systems). The Board of Trustees is responsible for both administration of the Systems and investment of the fund assets.
- 4. *Type of Plan*: These are qualified governmental defined benefit retirement plans. Under GASB 25, they are considered to be a combination of agent and cost-sharing multiple-employer plans.
- 5. *Eligibility*: These Systems cover eligible public safety employees of the State of Utah and some local governments. Eligible employees become participants immediately when hired, and are required to participate. The employer-selected plan determines whether new employees participate in the Contributory or Noncontributory System. Employees who were members of the Contributory System at the time their employer selected the Noncontributory System had an option to remain in the Contributory System. These Systems are closed to members hired on and after July 1, 2011.
- 6. *Employee Contributions*: Members of the Contributory System contribute a percentage of salary, as shown below. Employers may "pick-up" employee contributions under Section 414(h) of the Internal Revenue Code. No contributions are made by members of the Noncontributory System. Rates in the Contributory System vary by employer as follows:

| Fund 22 - State of Utah                | 12.29% |
|--|--------|
| Fund 23 - Other Division A (2.5% COLA) | 12.29% |
| Fund 77 - Other Division A (4.0% COLA) | 12.29% |
| Fund 27 - Logan                        | 11.13% |
| Fund 29 - Other Division B (2.5% COLA) | 10.50% |
| Fund 74 - Other Division B (4.0% COLA) | 10.50% |

7. *Employer Contributions*: The current contribution rates differ between the Contributory and Noncontributory Systems, and also differ depending on which fund (employer or group of employers) the member belongs to. Rates are set by the Board of Trustees, based upon the actuarial valuation report for the preceding year. The Funds included in these Systems are:

#### Contributory System

Fund 22 - State of Utah (Div A)

Fund 23 - Other Division A (2.5% COLA)

Fund 77 - Other Division A (4.0% COLA)

Fund 27 - Logan (Div B)

Fund 29 - Other Division B (2.5% COLA)

Fund 74 - Other Division B (4.0% COLA)

#### Noncontributory System

Fund 42 - State of Utah (Div A)

Fund 43 - Other Division A (2.5% COLA)

Fund 75 - Other Division A (4.0% COLA)

Fund 44 - Salt Lake City (Div B)

Fund 45 - Ogden (Div B)

Fund 46 - Provo (Div B)

Fund 47 - Logan (Div B)

Fund 48 - Bountiful (Div A)

Fund 49 - Other Division B (2.5% COLA)

Fund 76 - Other Division B (4.0% COLA)

The division designation (A or B) distinguishes between those employers covered by Social Security (A) and those not covered (B). Some plan provisions differ depending on the member's division.

- 8. *Final Average Monthly Salary (FAMS)*: The monthly average of the member's highest three salaries preceding retirement.
- 9. *Service Retirement*:
  - a. <u>Eligibility</u>: A member may retire with an unreduced benefit at age 65 with four years of service or at age 60 with 10 years of service or at any age with 20 years of service.
  - b. <u>Monthly Benefit</u>: 2.50% of Final Average Monthly Salary (FAMS) times years of service up to 20 years, plus 2.00% of FAMS times years of service in excess of 20.
  - c. <u>Payment Form</u>: For married members benefits are paid as an automatic unreduced Joint and 65% Survivor Annuity. A life annuity is payable to unmarried members (although children's benefits may also be due following the member's death).

#### 10. *Disability Retirement*:

- a. <u>Eligibility</u>: Member must be eligible for retirement under the Disability Act (or a substantially equivalent program) and must not be eligible for a 20-year service retirement at time of disability. Note that not all political subdivisions cover their members under a disability program.
- b. <u>Monthly Benefits Payable Prior to Retirement</u>: A separate fund established under the Disability Act (or an equivalent program) provides benefits from the time of disability until the age specified in 49-21-403. Benefits from this separate fund are not covered by these Systems.
- c. <u>Monthly Benefits Payable after Retirement</u>: An unreduced service retirement benefit is payable. The member receives service credit for time while disabled (both for computing the benefit amount and for determining whether the member is eligible for an unreduced service retirement benefit). Final Average Monthly Salary is increased by the same factors used for automatic cost-of-living benefit increases. I.e., the FAMS is adjusted by a cost-of-living increase up to 2.5% per year (up to 4% per year for the 4% COLA funds).
- d. Payment Form: Same as for Service Retirement.
- e. <u>Death while Disabled</u>: A disabled member is treated as an active member for purposes of determining a death benefit for the period prior to retirement.

#### 11. *Vesting and Refunds*:

- a. <u>Eligibility</u>: All members who are not vested are eligible for a refund when they terminate service. Members are vested after four years of service. Vested members may also elect to receive a refund in lieu of the deferred termination benefit described below. (Noncontributory System members hired after July 1, 1989, are ineligible for a refund.)
- b. <u>Amount</u>: The refund benefit is the accumulated value of the member's contributions credited by the fund. Interest is credited on the member's contribution account, beginning July 1, 1996. The amount of interest credited each year is set annually by the Board of Trustees.

#### 12. Deferred Termination Benefit:

- a. <u>Eligibility</u>: Member must be vested (4 years of service) and must elect to leave his/her contributions on deposit.
- b. <u>Monthly Benefit</u>: Same as the service retirement benefit, based on service and FAMS at retirement, and commencing once the member is eligible.
- c. Payment Form: Same as for service retirement.

- d. <u>Death Benefit</u>: The beneficiary of an inactive member who dies is entitled to receive a refund benefit (or \$500 if larger). The spouse of an inactive member with 20 years of service receives a monthly annuity equal to 50% of the service retirement benefit that would have been paid had the member died immediately prior to retirement. (An actuarial reduction factor is applied if the member was under age 50 at death.)
- 13. Death while an Active Member (On Duty): If death occurs in the line of duty, the lump-sum and annuity benefits described below will be paid to the spouse. (The benefits are not applicable to unmarried members, although children's benefits may be due.)
  - a. <u>Lump-sum (Division A members)</u>: \$1,500.
  - b. <u>Annuity (Division A members)</u>: 30% of member's FAMS.\*
  - c. Lump-sum (Division B members): \$1,500.
  - d. Annuity (Division B members): 37.5% of member's FAMS.
- 14. Death of an Active Member (Off Duty): If death occurs from a cause not related to the member's duties, the lump-sum and annuity benefits described below will be paid to the spouse. (The benefits are not applicable to unmarried members, although children's benefits may be due.)
  - a. <u>Lump-sum (Division A members)</u>: If the member has less than 10 years of service, the benefit is \$1,000 or a refund benefit, whichever is larger. If the member has 10 or more years of service, the benefit is \$500.
  - b. <u>Annuity (Division A members):</u> If the member has less than 10 years of service, no annuity is due. For members with 10 or more years of service, the benefit is 2% of FAMS per year of service, to a maximum of 30% of FAMS.\*
  - c. <u>Lump-sum (Division B members)</u>: If the member does not have two years of service, the benefit is the sum of 50% of the member's salary plus a refund benefit. If the member has two or more years of service, the benefit is \$1,500.
  - d. <u>Annuity (Division B members)</u>: If the member has fewer than two years of service, no annuity is due. If the member has two or more years of service, the annuity is 37.5% of the member's FAMS.
  - \*(For members of the Noncontributory System, not less than the benefit payable to the surviving spouse if the member had retired the day before the member's date of death.)
- 15. Optional Forms of Benefit: Married members may elect an optional Joint & 75% Survivor option in lieu of the standard Joint & 65% option. The amount of the Joint & 75% Survivor option is determined actuarially.
- 16. *Postretirement Death Benefit*: None, except for survivor benefit applicable to married members.

17. Postretirement Benefit Increases: Benefits are increased annually to take into account changes in the cost of living. Most funds have a maximum annual increase of 2.50% of the original benefit (i.e., a maximum 2.50% simple interest increase). A window was opened in 2008 to allow employers to make an election to provide a 4.00% maximum COLA. If elected, the 4.00% maximum applies to both current and future annuitants. The legislation opening the window mandated that the State public safety members would receive the 4.00% maximum COLA. The window was originally scheduled to close at the end of 2009, but it was extended in 2009 to December 2012.

In years in which the cost of living increases more than the maximum COLA, the excess increase is accumulated and used in later years in which the cost-of-living increase is less than the maximum COLA. This calculation is made separately for each individual. In addition, a closed group of retirees also receives a second special increase amount paid as a level annuity under whichever form of payment is applicable. This is the Restoration of Purchasing Power (ROPP) payment.

The table below shows which funds provide the 2.5% maximum COLA and which ones provide the 4.0% maximum COLA:

#### 2.50% Maximum COLA

Funds 23 & 43 - Other Division A

Fund 44 - Salt Lake City (Div B)

Fund 45 - Ogden (Div B)

Fund 46 - Provo (Div B)

Funds 27 & 47 - Logan (Div B)

Fund 48 - Bountiful (Div A)

Funds 29 & 49 - Other Division B

#### 4.00% Maximum COLA

Funds 22 & 42 - State of Utah (Div A)

Funds 75 & 77 - Other Division A

Funds 74 & 76 - Other Division B

18. 3% Substantial Substitute: All members whose service began before January 1, 1989, receive an additional annual payment equal to 3% of their benefit. These payments are made to offset the taxability of the retirement benefits under the State income tax provisions. Prior to July 1, 1995, this benefit was funded by annual appropriations made by the State on a pay-as-you go basis. Beginning July 1, 1995, this benefit is funded on an actuarial basis by increasing the employer contribution rate for those Funds which are funded by the State.

# SUMMARY OF BENEFIT PROVISIONS FOR FIREFIGHTERS RETIREMENT SYSTEM

- 1. Effective Date: July 1, 1971.
- 2. *Plan Year*: Twelve-month period ending December 31st.
- 3. *Administration*: The System is administered by a Board of Trustees (which also administers the other Utah Retirement Systems). The Board of Trustees is responsible for both administration of the System and investment of the fund assets.
- 4. *Type of Plan*: This is a qualified governmental defined benefit retirement plan. Under GASB 25, it is considered to be a cost-sharing multiple-employer plan.
- 5. *Eligibility*: This System covers eligible firefighters employed by participating local governments in Utah. Eligible employees become participants immediately when hired, and are required to participate. Employers are designated as either Division A (employers with Social Security coverage) or Division B (employers without Social Security coverage). Benefit provisions and contribution rates differ for members of different divisions. This System is closed to members hired on and after July 1, 2011.
- 6. *Employee Contributions*: Members contribute a percentage of salary, as shown below. Employers may "pick-up" employee contributions under Section 414(h) of the Internal Revenue Code.

Fund 31 - Division A 15.05% Fund 32 - Division B 16.71%

Contribution rates shown may be reduced by expected income from a tax on fire insurance premiums.

7. *Employer Contributions*: The current employer contribution rates depend on the Fund. Division A covers employers covered by Social Security and Division B covers other employers. The contribution rates are set by the Board of Trustees, based on the actuarial valuation for the preceding year. Contribution rates are reduced by expected income from a tax on fire insurance premiums. The Funds in this System are:

Fund 31 - Division A Fund 32 - Division B

8. *Final Average Monthly Salary (FAMS)*: The monthly average of the member's highest three salaries preceding retirement.

#### 9. *Service Retirement*:

- a. <u>Eligibility</u>: A member may retire with an unreduced benefit at age 65 with four years of service or at age 60 with 10 years of service or at any age with 20 years of service.
- b. <u>Monthly Benefit</u>: 2.50% of Final Average Monthly Salary (FAMS) times years of service up to 20 years, plus 2.00% of FAMS times years of service in excess of 20. There is a minimum benefit of \$500 per month.
- c. <u>Payment Form</u>: For married members benefits are paid as an automatic unreduced Joint and 75% Survivor Annuity. A life annuity is payable to unmarried members (although children's benefits may also be due following the member's death).

#### 10. *Disability Retirement*:

- a. <u>Eligibility</u>: Member must have five or more years of service or the disability must be related to the member's duties. In addition, the member must not be eligible for a 20-year service retirement at time of disability.
- b. <u>Monthly Benefits</u>: 50% of FAMS.
- c. <u>Payment Form</u>: Benefits are payable as long as the member is disabled. Upon reaching 20 years of service, including time while disabled, or at age 65 if earlier, benefits are converted to a retirement benefit. There are special rules governing when benefits must be converted for members who become disabled after age 60.
- d. <u>Death while Disabled</u>: Upon the death of a disabled firefighter, the spouse shall receive 75% of the benefit currently being paid.

#### 11. *Vesting and Refunds*:

- a. <u>Eligibility</u>: All members who are not vested are eligible for a refund when they terminate service. Members are vested after four years of service. Vested members may also elect to receive a refund in lieu of the deferred termination benefit described below.
- b. <u>Amount</u>: The refund benefit is the accumulated value of the member's contributions credited by the fund. Interest is not credited on member contributions.

#### 12. Deferred Termination Benefit:

- a. <u>Eligibility</u>: Member must be vested (4 years of service) and must elect to leave his/her contributions on deposit.
- b. <u>Monthly Benefit</u>: Same as the service retirement benefit, based on service and FAMS at termination, and commencing once the member is eligible.
- c. Payment Form: Same as for service retirement.

- d. <u>Death Benefit</u>: The beneficiary of an unmarried inactive member who dies with 20 or more years of service prior to retirement is entitled to receive a refund benefit (or \$500 if larger). The spouse of an inactive member with 20 years of service receives a monthly annuity equal to 50% of the service retirement benefit that would have been paid had the member died immediately prior to retirement. (An actuarial reduction factor is applied if the member was under age 50 at death.) If the inactive member had less than 20 years of service, no death benefit is due.
- 13. Death while an Active Member (On Duty): If death occurs in the line of duty, the lump-sum and annuity benefits described below will be paid to the spouse. (The benefits are not applicable to unmarried members, although children's benefits may be due.)
  - a. Lump-sum (Division A members): \$1,500.
  - b. <u>Annuity (Division A members)</u>: 30% of member's FAMS. For members with more than 20 years of service, the annuity is 75% of the retirement benefit earned by the member as of his/her date of death.
  - c. <u>Lump-sum (Division B members)</u>: \$1,500.
  - d. <u>Annuity (Division B members)</u>: 37.5% of member's FAMS. For members with more than 20 years of service, the annuity is 75% of the retirement benefit earned by the member as of his/her date of death.
- 14. <u>Death of an Active Member (Off Duty)</u>: If death occurs from a cause not related to the member's duties, the lump-sum and annuity benefits described below will be paid to the spouse. (The benefits are not applicable to unmarried members, although children's benefits may be due.)
  - a. <u>Lump-sum (Division A members)</u>: If the member has less than 10 years of service, the benefit is \$1,000 or a refund benefit, whichever is larger. If the member has 10 or more years of service, the benefit is \$500.
  - b. <u>Annuity (Division A members)</u>: If the member has less than 10 years of service, no annuity is due. For members with 10 or more years of service, the benefit is 2% of FAMS per year of service, to a maximum of 30% of FAMS.
  - c. <u>Lump-sum (Division B members)</u>: If the member does not have five years of service, the benefit is the sum of 50% of the member's salary plus a refund benefit. If the member has five or more years of service, the benefit is \$1,500.
  - d. <u>Annuity (Division B members):</u> If the member has fewer than five years of service, no annuity is due. If the member has five or more years of service, the annuity is 37.5% of the member's FAMS. For members with more than 20 years of service, the annuity is 75% of the retirement benefit earned by the member as of his/her date of death.
- 15. *Optional Forms of Benefit*: None.

**GRS** 

- 16. *Postretirement Death Benefit*: None, except for survivor benefit applicable to married members.
- 17. Postretirement Benefit Increases: Benefits are increased annually to take into account changes in the cost of living, with a maximum annual increase of 4% of the original benefit (i.e., a maximum 4% simple interest increase). In years in which the cost of living increases more than 4%, the excess increase is accumulated and used in later years in which the cost-of-living increase is less than 4%. This calculation is made separately for each individual. In addition, a closed group of retirees also receives a second special increase amount paid as a level annuity under whichever form of payment is applicable. This is the Restoration of Purchasing Power (ROPP) payment.
- 18. *3% Substantial Substitute*: All members whose service began before January 1, 1989, receive an additional annual payment equal to 3% of their benefit. These payments are made to offset the taxability of the retirement benefits under the State income tax provisions. Prior to July 1, 1995, this benefit was funded by annual appropriations made by the State on a pay-as-you go basis. Beginning July 1, 1995, this benefit is funded on an actuarial basis by increasing the employer contribution rate for those Funds which are funded by the State.

## SUMMARY OF BENEFIT PROVISIONS FOR JUDGES' NONCONTRIBUTORY RETIREMENT SYSTEM

- 1. Effective Date: July 1, 1963.
- 2. *Plan Year*: Twelve-month period ending December 31st.
- 3. *Administration*: The System is administered by a Board of Trustees (which also administers the other Utah Retirement Systems). The Board of Trustees is responsible for both administration of the System and investment of the fund assets.
- 4. *Type of Plan*: This is a qualified governmental defined benefit retirement plan. Under GASB 25, it is considered to be a single-employer plan.
- 5. *Eligibility*: This System covers judges of the State of Utah, including Supreme Court justices and appellate, district, circuit and juvenile court judges.
- 6. *Employee Contributions*: None. There are no longer any members in the Judges' Contributory Retirement System.
- 7. *Employer Contributions*: Fund 37 (Judges) has a contribution rate which is set by the Board of Trustees, based on the actuarial valuation for the preceding year. The rate is reduced by estimated court fees which are earmarked for this fund.
- 8. *Final Average Monthly Salary (FAMS)*: The monthly average of the member's highest two salaries preceding retirement.
- 9. *Service Retirement (Unreduced)*:
  - a. <u>Eligibility</u>: A member may retire with an unreduced benefit at age 70 with six years of service or after age 62 with 10 years of service or after 25 years of service.
  - b. <u>Monthly Benefit</u>: 5.00% times Final Average Monthly Salary (FAMS) times years of service up to 10, plus 2.25% of FAMS times years of service in excess of 10 but less than 20, plus 1.00% times FAMS times years of service in excess of 20. There is a minimum benefit equal to 110% of the formula benefit (but not greater than \$1,000 per month).
  - c. <u>Payment Form</u>: Married members receive an automatic, unreduced Joint and 65% Survivor annuity. Unmarried members receive a life annuity.

- 10. *Service Retirement (Reduced)*:
  - a. <u>Eligibility</u>: A member may retire with a reduced benefit upon attaining age 55 with 20 years of service.
  - b. <u>Reduction</u>: An actuarial reduction from age 65. The reduction factors are shown in the following table:

| Age | Factor | Age | Factor |
|-----|--------|-----|--------|
| 64  | 90.31% | 59  | 55.57% |
| 63  | 81.71% | 58  | 50.62% |
| 62  | 74.05% | 57  | 46.16% |
| 61  | 67.20% | 56  | 42.14% |
| 60  | 61.07% | 55  | 38.50% |

c. Payment Form: Same as for unreduced service retirement.

#### 11. Disability Retirement:

- . <u>Eligibility</u>: Member must be eligible for retirement under the Disability Act (or a substantially equivalent program) and must not be eligible for an unreduced service retirement benefit at time of disability.
- b. <u>Monthly Benefits Payable Prior to Retirement</u>: A separate fund established under the Disability Act (or an equivalent program) provides benefits from the time of disability until the age specified in 49-21-403. Benefits from this separate fund are not covered by these Systems.
- c. <u>Monthly Benefits Payable after Retirement</u>: An unreduced service retirement benefit is payable. The member receives service credit for time while disabled (both for computing the benefit amount and for determining whether the member is eligible for an unreduced service retirement benefit). Final Average Monthly Salary is increased by the same factors used for automatic cost-of-living benefit increases. I.e., the FAMS is adjusted by a cost-of-living increase up to 2.75% per year.
- d. Payment Form: Same as for Service Retirement.
- e. <u>Death while Disabled</u>: A disabled member is treated as an active member for purposes of determining a death benefit for the period prior to retirement.

#### 12. *Vesting and Refunds*:

a. <u>Eligibility</u>: All members who are not vested are eligible for a refund when they terminate service. Members are vested after six years of service. Vested members may also elect to receive a refund in lieu of the deferred termination benefit described below. (Although all judges are now members in the noncontributory system, some

- Judges
- retain member contribution accounts from their participation in the Judges' Contributory Retirement System.)
- b. <u>Amount</u>: The refund benefit is the accumulated value of the member's contributions plus interest credited by the fund. The amount of interest credited each year is set annually by the Board of Trustees.

#### 13. Deferred Termination Benefit:

- a. <u>Eligibility</u>: Member must be vested (6 years of service) and must elect to leave his/her contributions on deposit.
- b. <u>Monthly Benefit</u>: Same as the unreduced or reduced service retirement benefit, based on service and FAMS at termination, and commencing once the member is eligible.
- c. Payment Form: Same as for unreduced service retirement.
- d. Death Benefit: Same as for an active member.
- 14. Death while an Active Member: A refund of the member's accumulated contributions (with interest) is paid to the beneficiary of a deceased member. In addition, 65% of the member's FAMS (annualized) is paid to the spouse if the member was married. Alternatively, the spouse may waive these benefits and elect instead an annuity. The annuity is equal to 65% of the benefit determined using the unreduced service retirement formula, and based on current service and FAMS at the time of death.
- 15. Optional Forms of Benefit: The System permits married members to elect a reduced Joint and 75% Survivor annuity in lieu of the automatic Joint and 65% Survivor annuity. No other optional payment forms are available.
- 16. *Postretirement Death Benefit*: None, except for the Joint and Survivor annuities available to married members.
- 17. Postretirement Benefit Increases: Benefits are increased annually to take into account changes in the cost of living, with a maximum annual increase of 4% of the current benefit (i.e., a maximum 4% compound interest increase). In years in which the cost of living increases more than 4%, the excess increase is accumulated and used in later years in which the cost-of-living increase is less than 4%. This calculation is made separately for each individual. In addition, judges retired prior to July 1, 1983 received an increase of \$120 per month (\$60 for beneficiaries).
- 18. 3% Substantial Substitute: All members whose service began before January 1, 1989, receive an additional annual payment equal to 3% of their benefit. These payments are made to offset the taxability of the retirement benefits under the State income tax provisions. Prior to July 1, 1995, this benefit was funded by annual appropriations made by the State on a pay-as-you go basis. Beginning July 1, 1995, this benefit is funded on an actuarial basis by increasing the employer contribution rate for those Funds which are funded by the State.

## SUMMARY OF BENEFIT PROVISIONS FOR THE GOVERNORS AND LEGISLATIVE PENSION PLAN

- 1. Effective Date: July 1, 1967.
- 2. *Plan Year*: Twelve-month period ending December 31st.
- 3. *Administration*: The System is administered by a Board of Trustees (which also administers the other Utah Retirement Systems). The Board of Trustees is responsible for both administration of the System and investment of the fund assets.
- 4. *Type of Plan*: This is a qualified governmental defined benefit retirement plan. Under GASB 25, it is considered to be a single-employer plan.
- 5. *Eligibility*: This System covers state legislators with four or more years of service, and governors of the state who enter office before July 1, 2011, or accrued service credit in a Tier I system before July 1, 2011.
- 6. *Employee Contributions*: None.
- 7. *Employer Contributions*: The state annually appropriates an actuarially determined contribution.
- 8. *Benefit base*: The benefit base is used to determine the benefits payable at retirement.
  - a. <u>Legislators</u>: The base was \$10.00 per month per year of service as of July 1, 1967. The base is increased 2% each six months after that date. As of January 1, 2014, the benefit base is therefore \$28.60.
  - b. <u>Governors</u>: The base was \$500.00 per month per term as of July 1, 1973. The base is increased 2% each six months after that date. As of January 1, 2014, the benefit base is therefore \$1,310.00.
  - c. <u>Supplemental Benefit</u>: An additional benefit of \$3.50 per month per year of service. This benefit is not indexed nor are COLAs granted on it. This benefit only applies to members of the System on March 1, 2000 and is effective March 1, 2000.
- 9. *Service Retirement (Unreduced)*:
  - a. <u>Eligibility</u>: Age 65 with 4 years of service.
  - b. <u>Monthly Benefit</u>: Legislators receive the benefit base (see above) per year of service, while former governors receive the benefit base (see above) for each term served (maximum of two terms).
  - c. <u>Payment Form</u>: For married members, a Joint and 50% Survivor annuity. For unmarried members, a life annuity.

- 10. *Service Retirement (Reduced)*:
  - a. <u>Eligibility</u>: A member may retire with a reduced benefit upon attaining age 62 with 10 years of service.
  - b. Reduction: 3% per year that retirement is prior to age 65.
  - c. <u>Payment Form</u>: Same as for unreduced service retirement.
- 11. *Disability Retirement*: This System has no provisions applying to disability retirement.
- 12. *Vesting and Refunds*: A vested member who made contributions in another System and withdraws them forfeits all benefits under this System.
- 13. Deferred Termination Benefit:
  - a. <u>Eligibility</u>: Same as for reduced or unreduced service retirement. The member must not have withdrawn his/her contributions under another System.
  - b. <u>Monthly Benefit</u>: Same as the unreduced or reduced service retirement benefit, based on service at termination, and commencing once the member is eligible.
  - c. <u>Payment Form:</u> Same as for unreduced service retirement.
  - d. <u>Death Benefit</u>: Same as for an active member.
- 14. Death while an Active Member:
  - a. <u>Eligibility</u>: Four years of service as a legislator or governor.
  - b. <u>Monthly Benefit</u>: 50% of the unreduced service retirement benefit that the member would have been entitled to upon reaching age 65 based on the current benefit base. Benefit is paid to surviving spouse only.
- 15. *Optional Forms of Benefit*: None.
- 16. *Postretirement Death Benefit*: None, except for the Joint and Survivor annuity available to married members.
- 17. Postretirement Benefit Increases: Benefits are increased annually to take into account changes in the cost of living, with a maximum annual increase of 4% of the original benefit (i.e., a maximum 4% simple interest increase). In years in which the cost of living increases more than 4%, the excess increase is accumulated and used in later years in which the cost-of-living increase is less than 4%. This calculation is made separately for each individual. Note that the supplemental \$3.50 per month per year of service benefit is not eligible for these increases.

18. *3% Substantial Substitute*: All members whose service began before January 1, 1989, receive an additional annual payment equal to 3% of their benefit. These payments are made to offset the taxability of the retirement benefits under the State income tax provisions. Prior to July 1, 1995, this benefit was funded by annual appropriations made by the State on a pay-asyou go basis. Beginning July 1, 1995, this benefit is funded on an actuarial basis by increasing the employer contribution rate for those Funds which are funded by the State.

### SUMMARY OF BENEFIT PROVISIONS FOR TIER II PUBLIC EMPLOYEE HYBRID RETIREMENT SYSTEM

- 1. Effective Date: July 1, 2011.
- 2. *Plan Year*: Twelve-month period ending December 31st.
- 3. *Administration*: The Systems are administered by a Board of Trustees (which also administers the other Utah Retirement Systems). The Board of Trustees is responsible for both administration of the Systems and investment of the fund assets.
- 4. *Type of Plan*: This is a qualified governmental defined benefit retirement plan. Under GASB 25, it is considered to be a cost-sharing multiple-employer plan.
- 5. *Eligibility*: This System covers eligible employees (i.e. those employees first hired after June 30, 2011) of the State of Utah, most local government employees, and most public education employees. Generally all employees are covered, except for those covered by another System—public safety employees, firefighters, judges, legislators, and higher education employees covered under TIAA-CREF.
  - Eligible employees are required to make an election within their first 30 days after employment to participate in this Plan or to participate in the Tier II Defined Contribution System. This election is irrevocable beginning 1 year after employment.
- 6. *Employee Contributions*: Member contributions are required only when the certified contribution rate of the defined benefit portion of the Plan exceeds 10% in which case they must pay the excess. Employers may not elect to pay all or part of any required employee contributions.
- 7. *Employer Contributions*: Contribution rates are set by the Board of Trustees, based upon the actuarial valuation report for this preceding year, and the employers must pay up to 10% of employee compensation towards this rate. If the certified contribution rate is less than 10%, they must make a contribution to the member's 401(k) account equal to the difference. Finally, employers must pay the corresponding Tier I amortization rate on Tier II employees' compensation to be applied to the employer's corresponding Tier I System liability.
- 8. *Final Average Monthly Salary (FAMS)*: The monthly average of the member's five highest years of annual compensation preceding retirement.
- 9. Service Retirement (Unreduced):
  - a. <u>Eligibility</u>: A member may retire with an unreduced benefit at age 65 with four years of service or after 35 years of service if earlier.
  - b. <u>Monthly Benefit (Contributory)</u>: 1.50% times Final Average Monthly Salary (FAMS) times years of service.

- c. <u>Payment Form</u>: Life annuity.
- 10. Service Retirement (Reduced):
  - a. <u>Eligibility</u>: A member may retire with a reduced benefit upon attaining age 62 with 10 years of service or age 60 with 20 years of service.
  - b. <u>Reduction</u>: A full actuarial reduction is applied for each year of retirement prior to age 65 if a member has less than 35 years of service. The early retirement reduction factors are shown below:

| Age | Factor | Age | Factor |
|-----|--------|-----|--------|
| 64  | 90.51% | 61  | 67.80% |
| 63  | 82.07% | 60  | 61.75% |
| 62  | 74.54% |     |        |

c. <u>Payment Form</u>: Life annuity.

#### 11. *Disability Retirement:*

- a. <u>Eligibility</u>: Member must be eligible for retirement under the Disability Act and must not be eligible for a 35-year service retirement at time of disability. Note that not all political subdivisions cover their members under a disability program or provide LTD benefit protection contracts covering their Tier II members.
- b. <u>Monthly Benefits Payable Prior to Retirement</u>: A separate fund established under the Disability Act provides benefits from the time of disability until the age specified in 49-21-403. Benefits from this separate fund are not covered by these Systems.
- c. Monthly Benefits Payable after Retirement:
  - 1. Member is covered by an LTD benefit protection contract: An unreduced service retirement benefit is payable at eligibility for an unreduced retirement benefit. The member receives service credit for time while disabled (both for computing the benefit amount and for determining whether the member is eligible for an unreduced service retirement benefit). Final Average Monthly Salary is increased by the same factors used for automatic cost-of-living benefit increases. I.e., the FAMS is adjusted by a cost-of-living increase up to 2.5% per year (simple interest). Employers are required to contribute the full contribution rate on the imputed pay of the disabled member to the Retirement System while the member is disabled.
  - 2. <u>Member is not covered by an LTD benefit protection contract</u>: An unreduced service retirement benefit is payable at eligibility for an unreduced retirement benefit. The benefit is determined using the member's service and Final Average Monthly Salary as of the date of their disability. Employers do not make contributions to the retirement system on the imputed pay of their disabled members.
- d. Payment Form: Life annuity.

e. <u>Death while Disabled</u>: A disabled member is treated as an active member for purposes of determining a death benefit for the period prior to retirement.

#### 12. *Vesting and Refunds*:

- a. <u>Eligibility</u>: All members who are not vested are eligible for a refund when they terminate service. Members are vested after four years of service. Vested members may also elect to receive a refund in lieu of the deferred termination benefit described below.
- b. <u>Amount</u>: The refund benefit is the accumulated value of the member's contributions plus interest credited by the fund. The amount of interest credited each year is set annually by the Board of Trustees.

#### 13. Deferred Termination Benefit:

- a. <u>Eligibility</u>: Member must be vested (4 years of service) and must elect to leave his/her contributions on deposit.
- b. <u>Monthly Benefit</u>: Same as the unreduced or reduced service retirement benefit, based on service and FAMS at termination, and commencing once the member is eligible.
- c. <u>Payment Form</u>: Life annuity.
- d. <u>Death Benefit</u>: The beneficiary of an inactive member who dies is entitled to receive a benefit as described in 14.2.a or 14.2.b below.

#### 14. Death while an Active Member:

- a. Members will receive benefits 1. and 2. described below.
  - 1. <u>Death Benefit Insurance</u>: A lump-sum payment that is equal to 75% of the member's highest annual salary.
  - 2.a. <u>In General</u>: A refund of the member's accumulated contributions (with interest) is paid to the beneficiary of a deceased member.
  - 2.b. Spousal Annuity: If the deceased member was married at the time of death and was either (i) eligible for reduced or unreduced service retirement, or (ii) had 25 years of service (15 years of service in the noncontributory system), the spouse may elect an annuity benefit in lieu of the refund benefit. The annuity is equal to the reduced or unreduced service retirement benefit payable as though Option 3 (a Joint and 100% Survivor annuity) were elected. If the member had 25 years of service or more, no reduction factor is applied in determining the service retirement benefit. If a member of the noncontributory system is not eligible for a retirement benefit and has less than 25 years of service, then the death benefit is equal to 1/3 of Option 3 benefit if the member has at least 15 and less than 20 years of service, and 2/3 of the Option 3 benefit if the member has at least 20 and less than 25 years of service.

- 15. Optional Forms of Benefit: The Systems permit members to elect from six forms of benefit at retirement. In each case the benefit amount is adjusted to be actuarially equivalent to the "Option 1" form. The six optional forms are:
  - Option 1 A life annuity with no benefits due following the member's death.
  - Option 2 Modified Cash Refund Annuity. A reduced annuity payable for the member's lifetime, plus a death benefit equal to the excess of the member's accumulated contributions (determined at retirement) over the sum of the member's annuity payments from retirement. (The annuity payments are that part of the original benefit derived from the member's own accumulated contributions.)
  - Option 3 Joint and 100% Survivor Annuity. An annuity payable as long as either the member or his/her spouse is living.
  - Option 4 Joint and 50% Survivor Annuity. An annuity payable during the member's lifetime, and after the member's death if the member's spouse is still living, an annuity to the spouse of 50% of the original benefit.
  - Option 5 Joint and 100% Pop-up Annuity. Same as Option 3, except that the benefit amount reverts to the Option 1 (life annuity) amount if the member's spouse predeceases the member.
  - Option 6 Joint and 50% Pop-up Annuity. Same as Option 4, except that the benefit amount reverts to the Option 1 (life annuity) amount if the member's spouse predeceases the member.
- 16. *Postretirement Death Benefit*: None, except as elected by the member. See Optional Forms of Benefit above.
- 17. Postretirement Benefit Increases: Benefits are increased annually to take into account changes in the cost of living, with a maximum annual increase of 2.5% of the original benefit (i.e., a maximum 2.5% simple interest increase). In years in which the cost of living increases more than 2.5%, the excess increase is accumulated and used in later years in which the cost-of-living increase is less than 2.5%. This calculation is made separately for each individual.

# SUMMARY OF BENEFIT PROVISIONS FOR TIER II PUBLIC SAFETY AND FIREFIGHTERS HYBRID RETIREMENT SYSTEM

- 1. *Effective Date*: July 1, 2011.
- 2. *Plan Year*: Twelve-month period ending December 31st.
- 3. *Administration*: The Systems are administered by a Board of Trustees (which also administers the other Utah Retirement Systems). The Board of Trustees is responsible for both administration of the Systems and investment of the fund assets.
- 4. *Type of Plan*: These are qualified governmental defined benefit retirement plans. Under GASB 25, it is considered to be a cost-sharing multiple-employer plan.
- 5. *Eligibility*: This System covers eligible public safety employees (i.e. those employees first hired after June 30, 2011) of the State of Utah as well as eligible public safety employees and firefighters employed by participating local governments.
  - Eligible employees are required to make an election within their first 30 days after employment to participate in this Plan or to participate in the Tier II Defined Contribution System. This election is irrevocable beginning 1 year after employment.
- 6. *Employee Contributions*: Member contributions are required only when the certified contribution rate of the defined benefit portion of the Plan exceeds 12% in which case they must pay the excess. Employers may not elect to pay all or part of required employee contributions.
- 7. Employer Contributions: Contribution rates are set by the Board of Trustees, based upon the actuarial valuation report for this preceding year, and the employers must pay up to 12% of employee compensation towards this rate. If the certified contribution rate is less than 12%, they must make a contribution to the member's 401(k) account equal to the difference. Finally, employers must pay the corresponding Tier I amortization rate on Tier II employees' compensation to be applied to the employer's corresponding Tier I System liability.
- 8. *Final Average Monthly Salary (FAMS)*: The monthly average of the member's highest five salaries preceding retirement.
- 9. *Service Retirement*:
  - a. <u>Eligibility</u>: A member may retire with an unreduced benefit at age 65 with four years of service or at any age with 25 years of service.
  - b. <u>Monthly Benefit</u>: 1.50% of Final Average Monthly Salary (FAMS) times years of service.
  - c. Payment Form: Life annuity

#### 10. Service Retirement (Reduced):

- a. <u>Eligibility</u>: A member may retire with a reduced benefit upon attaining age 62 with 10 years of service or age 60 with 20 years of service.
- b. <u>Reduction</u>: A full actuarial reduction is applied for each year of retirement prior to age 65 if a member has less than 25 years of service. The early retirement reduction factors are shown below:

| Age | Factor | Age | Factor |
|-----|--------|-----|--------|
| 64  | 90.21% | 61  | 66.99% |
| 63  | 81.55% | 60  | 60.87% |
| 62  | 73.85% |     |        |

#### 11. *Disability Retirement*:

- a. <u>Eligibility</u>: Member must be eligible for retirement under the Disability Act (or a substantially equivalent program) and must not be eligible for a 25-year service retirement at time of disability. Note that not all political subdivisions cover their members under a disability program or provide LTD benefit protection contracts covering their Tier II members.
- b. <u>Monthly Benefits Payable Prior to Retirement</u>: A separate fund established under the Disability Act (or an equivalent program) provides benefits from the time of disability until the age specified in 49-21-403. Benefits from this separate fund are not covered by these Systems.
- c. Monthly Benefits Payable after Retirement:
  - 1. Member is covered by an LTD benefit protection contract: An unreduced service retirement benefit is payable at eligibility for an unreduced retirement benefit. The member receives service credit for time while disabled (both for computing the benefit amount and for determining whether the member is eligible for an unreduced service retirement benefit). Final Average Monthly Salary is increased by the same factors used for automatic cost-of-living benefit increases. I.e., the FAMS is adjusted by a cost-of-living increase up to 2.5% per year (simple interest). Employers are required to contribute the full contribution rate on the imputed pay of the disabled member to the Retirement System while the member is disabled.
  - 2. <u>Member is not covered by an LTD benefit protection contract</u>: An unreduced service retirement benefit is payable at eligibility for an unreduced retirement benefit. The benefit is determined using the member's service and Final Average Monthly Salary as of the date of their disability. Employers do not make contributions to the retirement system on the imputed pay of their disabled members.
- d. <u>Payment Form</u>: Life annuity.

e. <u>Death while Disabled</u>: A disabled member is treated as an active member for purposes of determining a death benefit for the period prior to retirement.

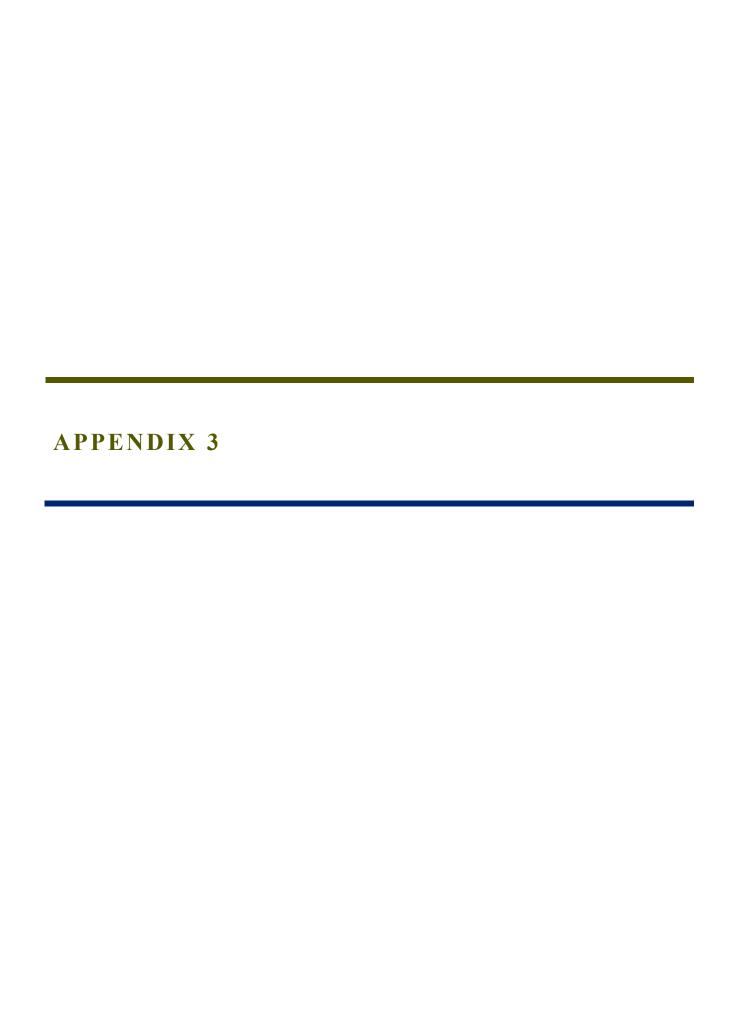

#### 12. *Vesting and Refunds*:

- a. <u>Eligibility</u>: All members who are not vested are eligible for a refund when they terminate service. Members are vested after four years of service. Vested members may also elect to receive a refund in lieu of the deferred termination benefit described below.
- b. <u>Amount</u>: The refund benefit is the accumulated value of the member's contributions credited by the fund. Interest is credited on the member's contribution account, and the amount of interest credited each year is set annually by the Board of Trustees.

### 13. Deferred Termination Benefit:

- a. <u>Eligibility</u>: Member must be vested (4 years of service) and must elect to leave his/her contributions on deposit.
- b. <u>Monthly Benefit</u>: Same as the service retirement benefit, based on service and FAMS at retirement, and commencing once the member is eligible.
- c. <u>Payment Form</u>: Life annuity.
- d. <u>Death Benefit</u>: The beneficiary of an inactive member who dies is entitled to receive a benefit as described in 14.2.a or 14.2.b below.
- 14. *Death while an Active Member*: All members who die while an active member receive a lump-sum payment that is equal to 75% of the member's highest annual salary. Members also receive death benefits described below depending on whether there death was duty related or non-duty related.
  - a. *Death while an Active Member (On Duty)*: If death occurs in the line of duty, the lumpsum and annuity benefits described below will be paid to the spouse. (The benefits are not applicable to unmarried members)
    - 1. Less than 20 years of service: \$1,000 lump sum payment plus an annuity equal to 30% of FAMS.
    - 2. 20 or more years of service: The option 1 benefit (life annuity) is calculated and paid to the spouse with no actuarial reduction.
  - b. Death of an Active Member (Off Duty): If the deceased member was married at the time of death and had (i) 15 or more years of service or (ii) attained age 62 with 10 or more years of service or (iii) attained age 65 with 4 or more years of service, the spouse may elect an annuity benefit in lieu of the refund benefit. The annuity is equal to the reduced or unreduced service retirement benefit payable as though Option 3 (a Joint and 100% Survivor annuity) were elected. If the member had 25 years of service or more, no reduction factor is applied in determining the service retirement benefit (the "full

- allowance"). If a member has 20 to 24 years of service but is not 60 or older, then the death benefit is equal to 2/3 of the "full allowance". If the member has at least 15 but less than 20 years of service and is below age 62, the benefit is 1/3 of the "full allowance". If the member is age 60 or older with at least 20 years of service, age 62 or older with at least 10 years of service, or age 65 with 4 or more years of service, the spouse will receive the Option 3 benefit with actuarial reductions.
- 15. Optional Forms of Benefit: The Systems permit members to elect from six forms of benefit at retirement. In each case the benefit amount is adjusted to be actuarially equivalent to the "Option 1" form. The six optional forms are:
  - Option 1 A life annuity with no benefits due following the member's death.
  - Option 2 Modified Cash Refund Annuity. A reduced annuity payable for the member's lifetime, plus a death benefit equal to the excess of the member's accumulated contributions (determined at retirement) over the sum of the member's annuity payments from retirement. (The annuity payments are that part of the original benefit derived from the member's own accumulated contributions.)
  - Option 3 Joint and 100% Survivor Annuity. An annuity payable as long as either the member or his/her spouse is living.
  - Option 4 Joint and 50% Survivor Annuity. An annuity payable during the member's lifetime, and after the member's death if the member's spouse is still living, an annuity to the spouse of 50% of the original benefit.
  - Option 5 Joint and 100% Pop-up Annuity. Same as Option 3, except that the benefit amount reverts to the Option 1 (life annuity) amount if the member's spouse predeceases the member.
  - Option 6 Joint and 50% Pop-up Annuity. Same as Option 4, except that the benefit amount reverts to the Option 1 (life annuity) amount if the member's spouse predeceases the member.
- 16. *Postretirement Death Benefit*: None, except as elected by the member. See Optional Forms of Benefit above.
- 17. Postretirement Benefit Increases: Benefits are increased annually to take into account changes in the cost of living. The maximum annual increase is 2.50% of the original benefit (i.e., a maximum 2.50% simple interest increase). However, in years in which the cost of living increases more than the maximum COLA, the excess increase is accumulated and used in later years in which the cost-of-living increase is less than the maximum COLA. This calculation is made separately for each individual.

#### GLOSSARY

Actuarial Accrued Liability (AAL): That portion, as determined by a particular Actuarial Cost Method, of the Actuarial Present Value of Future Plan Benefits which is not provided for by future Normal Costs. It is equal to the Actuarial Present Value of Future Plan Benefits minus the actuarial present value of future Normal Costs.

**Actuarial Assumptions:** Assumptions as to future experience under the Fund. These include assumptions about the occurrence of future events affecting costs or liabilities, such as:

- mortality, withdrawal, disablement, and retirement;
- future increases in salary;
- future rates of investment earnings and future investment and administrative expenses;
- characteristics of members not specified in the data, such as marital status;
- characteristics of future members;
- future elections made by members; and
- other relevant items.

Actuarial Cost Method or Funding Method: A procedure for allocating the Actuarial Present Value of Future Benefits to various time periods; a method used to determine the Normal Cost and the Actuarial Accrued Liability.

Actuarial Gain or Actuarial Loss: A measure of the difference between actual experience and that expected based upon a set of Actuarial Assumptions, during the period between two Actuarial Valuation dates. Through the actuarial assumptions, rates of decrements, rates of salary increases, and rates of fund earnings have been forecasted. To the extent that actual experience differs from that assumed, Actuarial Accrued Liabilities emerge which may be the same as forecasted, or may be larger or smaller than projected. Actuarial gains are due to favorable experience, e.g., the Fund's assets earn more than projected, salaries do not increase as fast as assumed, members retire later than assumed, etc. Favorable experience means actual results produce actuarial liabilities not as large as projected by the actuarial assumptions. On the other hand, actuarial losses are the result of unfavorable experience, i.e., actual results that produce actuarial liabilities which are larger than projected. Actuarial gains will decrease the calculated contribution rates while actuarial losses will increase the calculated contribution rates.

**Actuarially Equivalent:** Of equal actuarial present value, determined as of a given date and based on a given set of Actuarial Assumptions.

Actuarial Present Value (APV): The value of an amount or series of amounts payable or receivable at various times, determined as of a given date by the application of a particular set of Actuarial Assumptions. For purposes of this standard, each such amount or series of amounts is:

- a. adjusted for the probable financial effect of certain intervening events (such as changes in compensation levels, marital status, etc.)
- b. multiplied by the probability of the occurrence of an event (such as survival, death, disability, termination of employment, etc.) on which the payment is conditioned, and
- c. discounted according to an assumed rate (or rates) of return to reflect the time value of money.

Actuarial Present Value of Future Plan Benefits: The Actuarial Present Value of those benefit amounts which are expected to be paid at various future times under a particular set of Actuarial Assumptions, taking into account such items as the effect of advancement in age and past and anticipated future compensation and service credits. The Actuarial Present Value of Future Plan Benefits includes the liabilities for active members, retired members, beneficiaries receiving benefits, and inactive, nonretired members either entitled to a refund or a future retirement benefit. Expressed another way, it is the value that would have to be invested on the valuation date so that the amount invested plus investment earnings would be provide sufficient assets to pay all projected benefits and expenses when due.

Actuarial Valuation: The determination, as of a valuation date, of the Normal Cost, Actuarial Accrued Liability, Actuarial Value of Assets, and related Actuarial Present Values for a plan. An Actuarial valuation for a governmental retirement system typically also includes calculations of items needed for compliance with GASB 25, such as the funded ratio and the ARC.

Actuarial Value of Assets or Valuation Assets: The value of the Fund's assets as of a given date, used by the actuary for valuation purposes. This may be the market or fair value of plan assets, but commonly actuaries use a smoothed value in order to reduce the year-to-year volatility of calculated results, such as the funded ratio and the actuarially determined contribution rate.

**Actuarially Determined:** Values which have been determined utilizing the principles of actuarial science. An actuarially determined value is derived by application of the appropriate actuarial assumptions to specified values determined by provisions of the law.

Amortization Method: A method for determining the Amortization Payment. The most common methods used are level dollar and level percentage of payroll. Under the Level Dollar method, the Amortization Payment is one of a stream of payments, all equal, whose Actuarial Present Value is equal to the UAAL. Under the Level Percentage of Pay method, the Amortization payment is one of a stream of increasing payments, whose Actuarial Present Value is equal to the UAAL. Under the Level Percentage of Pay method, the stream of payments increases at the assumed rate at which total covered payroll of all active members will increase.

**Amortization Payment:** That portion of the pension plan contribution which is designed to pay interest on and to amortize the Unfunded Actuarial Accrued Liability.

*Closed Amortization Period:* A specific number of years that is counted down by one each year, and therefore declines to zero with the passage of time. For example if the amortization period is initially set at 30 years, it is 29 years at the end of one year, 28 years at the end of two years, etc. See Funding Period and Open Amortization Period.

**Decrements:** Those causes/events due to which a member's status (active-inactive-retiree-beneficiary) changes, that is: death, retirement, disability, or termination.

**Defined Benefit Plan:** A retirement plan that is not a Defined Contribution Plan. Typically a defined benefit plan is one in which benefits are defined by a formula applied to the member's compensation and/or years of service.

**Defined Contribution Plan:** A retirement plan, such as a 401(k) plan, a 403(b) plan, or a 457 plan, in which the contributions to the plan are assigned to an account for each member, and the plan's earnings are allocated to each account, and each member's benefits are a direct function of the account balance.

*Employer Normal Cost:* The portion of the Normal Cost to be paid by the employers. This is equal to the Normal Cost less expected member contributions.

*Experience Study:* A periodic review and analysis of the actual experience of the Fund which may lead to a revision of one or more actuarial assumptions. Actual rates of decrement and salary increases are compared to the actuarially assumed values and modified as deemed appropriate by the Actuary.

*Funded Ratio:* The ratio of the actuarial value of assets (AVA) to the actuarial accrued liability (AAL). Plans sometimes calculate a market funded ratio, using the market value of assets (MVA), rather than the AVA, although GASB 25 reporting requires the use of the AVA.

**Funding Period** or **Amortization Period**: The term "Funding Period" is used it two ways. In the first sense, it is the period used in calculating the Amortization Payment as a component of the ARC. This funding period is chosen by the Board of Trustees. In the second sense, it is a calculated item: the number of years in the future that will theoretically be required to amortize (i.e., pay off or eliminate) the Unfunded Actuarial Accrued Liability, based on the statutory employer contribution rate, and assuming no future actuarial gains or losses.

*GASB*: Governmental Accounting Standards Board.

Normal Cost: That portion of the Actuarial Present Value of pension plan benefits and expenses which is allocated to a valuation year by the Actuarial Cost Method. Any payment in respect of an Unfunded Actuarial Accrued Liability is not part of Normal Cost (see Amortization Payment). For pension plan benefits which are provided in part by employee contributions, Normal Cost refers to the total of employee contributions and employer Normal Cost unless otherwise specifically stated. Under the entry age normal cost method, the Normal Cost is intended to be the level cost (when expressed as a

percentage of pay) needed to fund the benefits of a member from hire until ultimate termination, death, disability or retirement.

*Open Amortization Period:* An open amortization period is one which is used to determine the Amortization Payment but which does not change over time. In other words, if the initial period is set as 20 years, the same 20-year period is used in determining the Amortization Period each year. In theory, if an Open Amortization Period is used to amortize the Unfunded Actuarial Accrued Liability, the UAAL will never completely disappear, but will become smaller each year, either as a dollar amount or in relation to covered payroll.

*Unfunded Actuarial Accrued Liability:* The excess of the Actuarial Accrued Liability over the Actuarial Value of Assets. This value may be negative in which case it may be expressed as a negative Unfunded Actuarial Accrued Liability, also called the Funding Surplus.

Valuation Date or Actuarial Valuation Date: The date as of which the value of assets is determined and as of which the Actuarial Present Value of Future Plan Benefits is determined. The expected benefits to be paid in the future are discounted to this date.
