EXECUTIVE DIRECTOR

April 12, 2011

Utah State Retirement Board
540 East 200 South
Salt Lake City, UT 84102-2044

Dear Board Members:

We are pleased to present the 2010 Comprehensive Annual Financial Report of the Utah Retirement Systems (Systems), including the 401(k), 457, Roth and Traditional IRA Plans, and the Health Reimbursement Arrangement (Plans). Together, the Systems and Plans constitute a component unit of the State of Utah, administered by the Utah State Retirement Board (Board) for calendar year 2010.

The financial reporting entity of the Systems and Plans include the Public Employees Noncontributory and Contributory Retirement Systems, for both government and public education employees, the Public Safety, Firefighters and Judges Retirement Systems, the Utah Governors and Legislators Retirement Plan, and the 401(k), 457, Roth and Traditional IRA Plans, and Health Reimbursement Arrangement (HRA).

Responsibility for both the accuracy of the data and the completeness and fairness of the presentation, including all disclosures, rests with the management of the Systems and Plans. To the best of our knowledge and belief, the enclosed data is accurate in all material respects and is reported in a manner designed to present fairly the financial position and results of operations of the fiduciary funds.

For financial reporting purposes, the Systems and Plans utilize Governmental Accounting Standards Board (GASB) Statement No. 25, *Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans*, GASB Statement No. 34,

Basic Financial Statements — and Management's Discussion and Analysis — for State and Local Governments, GASB Statement No. 37, *Basic Financial Statements — and Management's Discussion and Analysis — for State and Local Governments: Omnibus*, GASB Statement No. 38, *Certain Financial Statement Note Disclosures*, GASB Statement No. 40, *Deposit and Investment Risk Disclosures*, GASB Statement No. 44, *Economic Condition Reporting: The Statistical Section*, GASB Statement No. 45, *Accounting and Financial Reporting for Employers for Postemployment Benefits Plans Other Than Pensions*, GASB Statement No. 51, *Accounting and Financial Reporting for Intangible Assets*, and GASB Statement No. 53, *Accounting and Financial Reporting for Derivative Instruments*. Assets of the Systems and Plans are presented at fair value. The actuarial value of assets and the actuarial accrued liability are presented in the required supplementary information following the notes to the basic financial statements.

The Utah Retirement Systems and 401(k), 457, Roth and Traditional IRA Plans, and HRA were established by legislation and authorized as indicated in the notes to the basic financial statements on page 48. The Summaries of Plan Provisions are presented on pages 135 through 146. The number of active and retired members and beneficiaries for each system is presented in the Systems' Highlights on pages 12 through 24. The purpose of the Systems and Plans is to provide benefits for all eligible State, local government and most public education employees whose employers have elected to participate. Services provided by the staff are performed to meet that objective.

Management's Discussion and Analysis

The Management's Discussion and Analysis (MD&A) beginning on page 28 provides an overview and analysis of the Systems and Plans Basic Financial Statements.

Letter of Transmittal

(Continued)

This letter of transmittal is intended to complement the MD&A and should be read in conjunction with it.

Actuarial

The actuarial assumptions and contribution rates were based on the recommendations of our actuary. See the Actuarial Section of this report and the notes to the basic financial statements for explanations of these rates. Rate changes resulted from actuarial assumption modifications, economic conditions, actuarial experience gains and losses and benefit enhancements in the Systems.

The Utah Retirement Systems are maintained on an actuarially sound basis as certified in this report by our actuary, thus protecting participants' future benefits. We anticipate that investment earnings on a long term basis will continue to meet or exceed the actuarially assumed earning rate. We expect all systems to continue towards fully funded positions in accordance with actuarial assumptions.

An actuarial valuation of the Systems is performed annually. An assumption experience study is performed at least every third year. The actuarial firm Gabriel, Roeder, Smith & Company completed the actuarial reviews and valuations and served as technical advisor to the Systems. Actuarial certification and supporting statistics are included in the Actuarial and Statistical Sections of this report.

Financial Information

Management is responsible for maintaining a system of adequate internal accounting controls designed to provide reasonable assurance that transactions are executed in accordance with management's general or specific authorization, and are recorded as necessary to maintain accountability for assets and to permit preparation of financial statements in accordance with generally accepted accounting principles. The concept of reasonable assurance recognizes that the cost of a control should not exceed the benefits likely to be derived. This system includes written policies and procedures and an internal audit department that reports to the Board. Discussion and analysis of net assets and related additions and deductions is presented in the MD&A beginning on page 28.

Funding

Funds are derived from the excess of additions, which include contributions and investment earnings, over deductions, which are comprised of benefits and

administrative expenses. Funds are accumulated to meet future benefit obligations to retirees and beneficiaries. This accumulated balance is referred to as the "net assets held in trust for pension benefits" in the Statements of Fiduciary Net Assets in the Financial Section of this report. The actuarial accrued liability is not disclosed in the basic financial statements but is disclosed in the note 5 to the basic financial statements and in the required supplementary information. These schedules show the actuarial value of assets, which is based on a five-year smoothed expected rate of return, wherein the excess or shortfall of investment income over or under the actuarial assumed income rate (currently 7.75%) is recognized over a five-year period. This is the value of assets used by the actuary in determining contribution rates for the Systems as disclosed in note 5 to the basic financial statements. The current funded ratios at year end range from 77% to 92%.

The actuarial accrued liability of the Systems is determined by the actuary. It is a measure of the present value of actuarial accrued liabilities estimated to be payable in the future to current retirees, beneficiaries and employees for service earned to date. The percentage computed by dividing the actuarial value of net assets available for benefits by the actuarial accrued liability is generally referred to as the "funded ratio" This ratio provides an indication of the funded status of the Systems on a going-concern basis and generally, the greater this percentage, the stronger the system. A higher level of funding gives the participants a greater degree of assurance that their pension benefits are secure.

Investments

The economic condition of the Systems is based primarily upon investment earnings. For 2010 the Systems experienced a 13.7% rate of return. The Systems' investments were evaluated at year end by Callan Associates Inc., Investment Measurement Service. A comparative analysis of rates of return is presented on page 108 of this report.

The investment portfolio mix at fair value as of the end of 2010 is 21% debt securities, 36% equities, 9% private equity, 14% real estate, 5% short term, and 15% absolute return. The 21% debt securities is comprised of 17% domestic and 4% international instruments. The 36% equities is comprised of 23% domestic and 13% international equities. See MD&A and Investment Section for more detailed analysis and information. The Systems' investment outlook is long term allowing the

Letter of Transmittal

(Continued)

portfolio to take advantage of the favorable risk-return characteristics of equities by placing more emphasis on this category.

The Board utilizes internal and external portfolio managers employing both passive (indexed) and active strategies. The portfolio is broadly diversified among equities, debt securities, real estate and private equity with additional diversification achieved through domestic and international investing.

The investment policy is to minimize credit and market risks while maintaining a competitive yield on its portfolio. Accordingly, deposits are either insured by federal depository insurance or collateralized. All collateral on deposits is held in the counterparties' joint custody accounts at the Federal Reserve Bank. On occasion, deposits may be significantly greater than collateral due to investment purchase "fails": receipt of interest earnings on the 15th of each month, and proceeds from investment sales and maturities. Of approximately \$24.2 billion in investments at fair value as of December 31, 2010, none of the investments were in the category of highest custodial credit risk as defined by the GASB.

Independent Audit

An annual audit of the Systems and Plans was conducted by the independent accounting firm of Deloitte & Touche LLP. The auditors' report on the basic financial statements is included in the Financial Section of this report.

Awards

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the Utah Retirement Systems for its Comprehensive Annual Financial Report for the fiscal year ended

December 31, 2009. The Certificate of Achievement is a prestigious national award recognizing conformance with the highest standards for preparation of state and local government financial reports.

In order to be awarded a Certificate of Achievement, a government unit must publish an easily readable and efficiently organized comprehensive annual financial report, whose contents conform to program standards. Such financial reports must satisfy both generally accepted accounting principles and applicable legal requirements. A Certificate of Achievement is valid for a period of one year only. The Utah Retirement Systems has received a Certificate of Achievement for the last 26 years. We believe our current report continues to conform to the Certificate of Achievement Program requirements, and we are submitting it to GFOA.

In addition the Utah Retirement Systems were awarded the Public Pension Coordinating Council Public Pension Standards 2010 Award. This award is in recognition of meeting professional standards for plan design and administration as set forth in the Public Pension Standards.

Acknowledgments

The compilation of this reflects the combined efforts of the staff under the leadership of the Utah State Retirement Board. The report is intended to provide extensive and reliable information for making management decisions, determining compliance with legal provisions, and determining responsible stewardship for the assets contributed by the Systems' members and their employers.

We would like to take this opportunity to express our gratitude to the Board, the staff, the advisors, and the many people who have worked so diligently to assure the successful operation and financial soundness of the Utah Retirement Systems.

Sincerely yours,

Robert K. Kellersberger, CGFM
Finance Director

ROBERT V. NEWMAN
EXECUTIVE DIRECTOR

April 12, 2011

Utah State Retirement Board
540 East 200 South
Salt Lake City, UT 84102-2044

Dear Members of the Retirement Systems:

As board members and trustees of the Utah Retirement Systems (URS) we have the responsibility to provide retirement benefits to eligible members for the valuable services they have rendered to the public. We serve to insure that members' interests are properly safeguarded. Thanks to prudent funding principles established over several decades by governors, legislatures and boards, I can confidently report that the outlook for the Systems is positive.

Investment Performance in 2010

Financial markets rebounded in 2010 and restored positive investment performance for the year for a return of 13.7%, which exceeded the actuarial assumption of 7.75%. This translated into net investment income of \$2.3 billion. Assets of the systems increased by \$2.0 billion ending 2010 with total assets of \$19.8 billion. These figures reflect the Systems' diversified investment strategy which seeks to maximize long-term total returns consistent with prudent levels of risk.

Defined Contribution Assets Exceed \$3 Billion

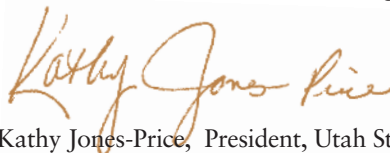

Members have benefited from the market recovery in a personal way. Net assets of the URS Defined Contribution Retirement Savings Plans continue to grow. Members contributed \$263 million and at year end, defined contribution assets were \$3.3 billion. While participants' individual rates of return varied according to their choices among the available investment options, I believe most participants were rewarded with investment gains in 2010. I encourage members to continue contributing to these valuable retirement savings plans. I also encourage members to increase their knowledge of what they are investing in by taking advantage of the educational opportunities URS offers through the website and other means.

Excellent Leadership Keeps Systems Sound

Members also benefit from the Membership Advisory Council, a valued body that keeps the Board and the Legislature abreast of the interests and concerns of members, so they can be properly addressed.

I express my appreciation for the breadth and depth of experience possessed by members of the Board, each of whom makes a valuable contribution to the success of the Utah Retirement Systems. The Board meets numerous times during the year and also spends considerable time preparing for those meetings.

As we enter a new decade, I want to emphasize that the Systems remain sound. Our retirees will continue to receive their monthly pension payments. Our working members will upon retirement receive their promised pension payments. I express the Board's confidence in and appreciation to Executive Director Robert Newman and his staff for their excellent management of the Systems. I am optimistic about the future.

Defined Contribution Savings Plans Highlights

The purpose of the Defined Contribution Savings Plans (401(k), 457, Roth and traditional IRAs) is to allow public employees throughout Utah to adequately prepare themselves for retirement by investing a portion of their income in one or more of these supplemental retirement plans.

It has long been recognized that for employees to experience the comfortable and rewarding retirement they desire, they cannot rely entirely upon Social Security and their employer-provided retirement. Employees should take the initiative to personally put aside a portion of their salary into some type of long term savings plan.

Each year the number of employees participating in these plans increases. Individuals may participate in more than one plan. As of December 31, 2010, the number of participants by investment plan is shown below.

Annualized rates of returns for the Investment Funds are shown on page 113.

The Plans provide the following benefits:

- Convenient, automatic payroll deduction
- Eleven investment options
- Brokerage window option
- Tax deferred and/or tax free savings
- Increase or decrease contributions as often as every pay period
- Flexible payout options when eligible.
- Upon death, funds transfer to beneficiaries (except HRA)
- Immediate vesting
- No sales commissions
- Low investment and administrative fees
- Plan Loans (401(k) and 457)
- Hardship and emergency withdrawals

INDEPENDENT AUDITORS' REPORT

Utah State Retirement Board:

We have audited the accompanying basic financial statements of Utah Retirement Systems, a component unit of the State of Utah, administered by the Utah State Retirement Board, as of and for the year ended December 31, 2010, listed in the foregoing table of contents. These financial statements are the responsibility of the management of Utah Retirement Systems. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Utah Retirement Systems' internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and the significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, such basic financial statements present fairly, in all material respects, the fiduciary net assets of the pension (and other employee benefit) trust funds of Utah Retirement Systems, administered by the Utah State Retirement Board, as of December 31, 2010, and the changes in fiduciary net assets of the pension (and other employee benefit) trust funds for the year then ended in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 2 to the financial statements, the financial statements include investments that are not listed on national exchanges or for which quoted market prices are not available. These investments include limited partnerships, absolute return strategies, and investments in real estate. Such investments totaled \$7.8 billion (29.7% of total assets) at December 31, 2010. Where a publicly listed price is not available, the management of Utah Retirement Systems uses alternative sources of information including audited financial statements, unaudited interim reports,

independent appraisals, and similar evidence to determine the fair value of the investments.

Management's Discussion and Analysis and the Schedules of Funding Progress and of Employer Contributions, listed in the foregoing table of contents, are not required parts of the basic financial statements but are supplementary information required by the Governmental Accounting Standards Board. This supplementary information is the responsibility of the management of Utah Retirement Systems. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The supplementary financial supporting schedules listed in the foregoing table of contents are presented for purposes of additional analysis and are not a required part of the basic financial statements. The supplementary financial supporting schedules are the responsibility of the management of Utah Retirement Systems. Such additional information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

The Introductory Section, Investment Section, Actuarial Section, and Statistical Section listed in the foregoing table of contents are presented for the purpose of additional analysis and are not a required part of the basic financial statements of Utah Retirement Systems. Such additional information has not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on it.

In accordance with *Government Auditing Standards*, we have also issued our report dated April 12, 2011 on our consideration of Utah Retirement Systems' internal control over financial reporting and on our tests of their compliance with certain provisions of laws, regulations and contracts and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

www.deloitte.com

**INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER
FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS
BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED
IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS**

Utah State Retirement Board:

We have audited the basic financial statements of Utah Retirement Systems, a component unit of the State of Utah, administered by the Utah State Retirement Board, as of and for the year ended December 31, 2010, and have issued our report thereon dated April 12, 2011, which included an explanatory paragraph regarding the fair value of investments where a publically listed price is not available. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered Utah Retirement Systems' internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinion on the basic financial statements, but not for the purpose of expressing an opinion on the effectiveness of Utah Retirement Systems' internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of Utah Retirement Systems' internal control over financial reporting.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the Utah Retirement System's financial statements will not be prevented, or detected and corrected on a timely basis.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over financial reporting that might be deficiencies, significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses, as defined above. However, we noted other matters involving internal control over financial reporting that we have reported to the management of Utah Retirement Systems in a separate letter dated April 12, 2011.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether Utah Retirement Systems' basic financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and the Utah Retirement Systems' policies regarding purchasing, personnel, budgeting, and investments, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

This report is intended solely for the information and use of the Board, management, and others within the Utah Retirement Systems, and applicable State officials and is not intended to be and should not be used by anyone other than these specified parties.

April 12, 2011

Management's Discussion and Analysis

Introduction

This section presents management's discussion and analysis of the Utah Retirement Systems' (URS) financial position and performance for the year ended December 31, 2010. It is presented as a narrative overview and analysis. Please read it in conjunction with the Letter of Transmittal included in the Introductory Section, the financial statements and other information which are presented in the Financial Section of this Comprehensive Annual Financial Report.

URS is responsible for administering retirement and defined contribution benefits for State, local government and public education employees in the State of Utah. URS is composed of six defined benefit pension systems (Systems) and five defined contribution plans (Plans). The six defined benefit pension systems are the Public Employees Noncontributory Retirement System (Noncontributory System), the Public Employees Contributory Retirement System (Contributory System), the Public Safety Retirement System (Public Safety System), the Firefighters Retirement System (Firefighters System), the Judges Retirement System (Judges System) and the Utah Governors and Legislators Retirement Plan (Governors and Legislative Plan). The five defined contribution plans (Plans) are the 401(k), 457, Roth and Traditional IRA Plans, and Health Reimbursement Arrangement. All of these Systems and Plans are defined as pension (and other employee benefit) trust funds, which are fiduciary funds. Throughout this discussion and analysis units of measure (i.e. billions, millions, thousands) are approximate, being rounded up or down to the nearest tenth of the respective unit value.

Financial Highlights

- The URS Defined Benefit Pension Systems' combined total net assets increased by \$2.0 billion, or 11.5 percent during calendar year 2010. The increase was primarily due to the increase in the markets.
- The URS Defined Benefit Pension Systems' rate of return on investments during calendar year 2010 was 13.73 percent compared with the calendar year 2009 rate of return of 12.88 percent. The increase in rate of return was due primarily to the increase in market performance in 2010.
- The URS Defined Benefit Pension Systems were actuarially funded at an average of 85.8 percent as of January 1, 2010, a decrease from the comparative average of 86.6 percent as of January 1, 2009. During 2010 the funded ratio decreased from 85.8 percent at the beginning of the year to 82.2 percent at December 31, 2010, due to lower than expected investment results over the previous five years.
- The Defined Contribution Plans' net assets increased \$328 million during calendar year 2010 primarily due to investment gains.
- The Defined Contribution Plans' rates of return for investment options ranged from a high of 30.4 percent to a low of 0.0 percent compared to prior year investment option returns of a high of 36.0 percent and a low of 0.1 percent.

Management's Discussion and Analysis

(Continued)

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the URS financial reporting which is comprised of the following components:

- 1) basic financial statements,
- 2) notes to the basic financial statements,
- 3) required supplementary information, and
- 4) other supplementary schedules.

Collectively, this information presents the combined net assets held in trust for pension benefits for each of the funds administered by URS as of December 31, 2010. This financial information also summarizes the combined changes in net assets held in trust for pension benefits for the year then ended. The information in each of these components is briefly summarized as follows:

1) Basic Financial Statements

For the calendar year ended December 31, 2010, basic financial statements are presented for the fiduciary funds administered by URS. Fiduciary funds are used to

account for resources held for the benefit of the participants outside of URS. The fiduciary funds are comprised of eleven pension (and other employee benefit) trust funds which consist of six defined benefit systems and five defined contribution plans.

- The Statements of Fiduciary Net Assets are presented for the pension trust funds at December 31, 2010, with combined total comparative information at December 31, 2009. These financial statements reflect the resources available to pay benefits to members, including retirees and beneficiaries, at the end of the years reported.
- The Statements of Changes in Fiduciary Net Assets are presented for the pension trust funds for the year ended December 31, 2010, with combined total comparative information for the year ended December 31, 2009. These financial statements reflect the changes in the resources available to pay benefits to members, including retirees and beneficiaries, for calendar years 2010 and 2009.

Management's Discussion and Analysis

2) Notes to the Basic Financial Statements

The Notes to the Basic Financial Statements provide additional information that is essential to a full understanding of the data provided in the basic financial statements. Information in the Notes to the Basic Financial Statements is described below.

- Note 1 provides a general description of URS as well as a description of each of the Systems and Plans administered by URS and a summary of benefits. Information regarding employer and member participation in the Systems and Plans administered by URS is also provided.
- Note 2 provides a summary of significant accounting policies including the basis of accounting, investment accounting policies, management's use of estimates, information regarding the implementation of new accounting pronouncements, and other significant accounting policies.
- Note 3 describes deposits, investment risk disclosures, and additional information about cash, securities lending, and derivatives.
- Note 4 explains property and equipment of URS including depreciation and net carrying amounts.
- Note 5 provides information about actuarial values and methods for the defined benefit systems administered by URS.
- Note 6 provides information about contributions to the defined benefit systems administered by URS.
- Note 7 provides information about the funded status of the systems administered by URS.

- Note 8 explains transfers to or from affiliated systems.
- Note 9 describes supplemental benefits.
- Note 10 provides information about litigation.
- Note 11 describes commitments for investment funding.
- Note 12 provides information about pension plan participation.
- Note 13 provides information about URS post employment benefits.
- Note 14 describes compensated absences and insurance reserves.
- Note 15 describes required supplementary information.
- Note 16 provides information about risk management of URS.
- Note 17 provides information about real estate liabilities.

3) Required Supplementary Information

The required supplementary information consists of two schedules and related notes concerning actuarial information, funded status and required contributions of the defined benefit pension systems administered by URS.

4) Other Supplementary Schedules

Other schedules include more detailed information pertaining to the Systems and Plans as well as schedules of administrative expenses.

Management's Discussion and Analysis

(Continued)

Financial Analysis of the Systems — Defined Benefit Plans

Investments

Investments of the URS Defined Benefit Systems are combined in a commingled investment pool as authorized by state statute. Each system owns an equity position in the pool and receives proportionate investment income from the pool in accordance with each respective ownership percentage.

Each system's allocated share of each type of investment in the pool is shown in the Statement of Net Assets of each respective system. Investment gains or losses are reported in the Statement of Changes in Fiduciary Net Assets of each retirement system. The rate of return on investments is therefore approximately the same for each of the systems.

Systems' Total Investments

At December 31, 2010, URS Defined Benefit Systems had total net assets of \$19.8 billion, an increase of \$2.0 billion from calendar year 2009 investment totals. The combined investment portfolio experienced a return of 13.73 percent compared with the URS investment benchmark return of 13.54 percent. Investment results over time compared with URS benchmarks are presented on page 108 in the Investment Section.

Since the investment gain in all of the retirement systems was about 13.73 percent of net assets, further investment performance will not be evaluated in each respective system.

Equities

At December 31, 2010, URS Defined Benefit Systems held \$7.5 billion in U.S. and international equity securities, an increase of \$416.8 million from year 2009. U.S. equity and international equity securities had returns of 18.36 percent and 13.84 percent respectively for calendar year 2010, compared to URS benchmark returns of 16.93 percent and 10.81 percent respectively.

Debt Securities

At December 31, 2010, URS Defined Benefit Systems held \$4.4 billion in U.S. debt and international debt securities, a decrease of \$114.5 million from year 2009. U.S. debt securities returned 9.65 percent while international debt securities returned 5.73 percent in calendar year 2010 compared with URS benchmark returns of 6.54 percent and 5.54 percent respectively.

Real Estate

At December 31, 2010, URS Defined Benefit Systems held \$3.0 billion in real estate investments, an increase of \$225 million from year 2009. Real estate investments returned 14.68 percent in calendar year 2010 compared with URS benchmark return of 15.37 percent.

Private Equity

At December 31, 2010, URS Defined Benefit Systems held \$1.8 billion in private equity investments, an increase of \$428.6 million from year 2009. Private equity investments returned 14.6 percent in calendar year 2010. The URS benchmark for private equity investments was 20.3 percent.

Management's Discussion and Analysis

(Continued)

Short Term

At December 31, 2010, URS Defined Benefit Systems held \$1.1 billion in short term investments, an increase of \$252.3 million from year 2009. Short term investments returned 0.21 percent in calendar year 2010, which compared to the URS benchmark return of 0.13 percent.

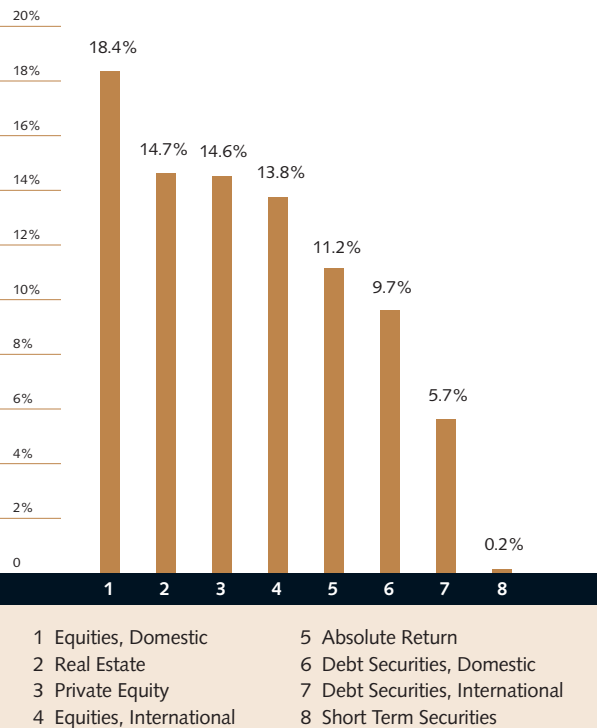

Absolute Return

At December 31, 2010, URS Defined Benefit Systems held \$3.1 billion in absolute return investments, an increase of 726.2 million from year 2009. Absolute return investments returned 11.18 percent in calendar year 2010 compared with URS benchmark return of 5.13 percent.

Security Lending

The Systems earn additional investment income by lending investment securities to brokers. This is done on a pooled basis by URS' custodial bank, The Northern Trust Company (TNT). The brokers provide collateral to TNT and generally use the borrowed securities to cover short sales and failed trades. TNT invests the cash collateral received from the brokers in order to earn interest. At December 31, 2010, the Systems had \$1.23 billion on loan secured by collateral of \$1.26 billion. For calendar year 2010, net securities lending income to the Systems amounted to \$3.7 million, a decrease of \$3.4 million over calendar year 2009. The decrease in security lending revenue for year 2010 represents mainly a decrease in demand by brokers to borrow available securities.

Defined Benefit Systems Investment Rates of Return by Investment Type for 2010
(in percents)

Defined Benefit Systems Investments at Fair Value

1 Equities, Domestic (22.6%)	5 Short Term Securities (5.0%)
2 Equities, International (13.2%)	6 Absolute Return (15.0%)
3 Debt Securities, Domestic (16.8%)	7 Private Equity (8.8%)
4 Debt Securities, International (4.2%)	8 Real Estate (14.4%)

Management's Discussion and Analysis

Analysis of the Defined Benefit Systems

Noncontributory System

The Noncontributory System provides retirement benefits to covered State of Utah, local government and public education employees. Benefits of the system are funded by employer contributions and by earnings on investments. The system net assets held in trust for benefits at December 31, 2010, totaled \$15.8 billion, an increase of \$1.6 billion (11.7 percent) from \$14.2 billion at December 31, 2009.

Additions to the Noncontributory System net assets held in trust for benefits include employer contributions, investment income and transfers. For the calendar year 2010, member and employer contributions increased from \$549.4 million for calendar year 2009 to \$597.7 million, an increase of \$48.3 million (8.8 percent). Contributions increased because salaries and contribution rates increased. The system recognized a net investment gain of \$1.9 billion for calendar year 2010 compared with net investment gain of \$1.7 billion for calendar year 2009. The increase in investment gain for 2010 compared to 2009 was due to the higher rate of return realized in 2010.

Deductions from the Noncontributory System net assets held in trust for benefits include retirement benefits, administrative expenses and transfers. For the calendar year 2010, benefits amounted to \$797.4 million, an increase of \$71.5 million (9.8 percent) over calendar year 2009. The increase in benefit payments was due to an increased number of benefit recipients and benefit increases. For the calendar year 2010, the costs of administering the system totaled \$8.4 million, an increase of \$49 thousand (0.6 percent) from calendar year 2009.

An actuarial valuation of the Noncontributory System assets and benefit obligations is performed annually. At the date of the most recent actuarial valuation, January 1, 2010, the funded status of the system decreased to 85.7 percent from 86.5 percent at January 1, 2009. The amount by which the Noncontributory System actuarial assets were under actuarial benefit liabilities was \$2.8 billion at January 1, 2010, compared with being underfunded by \$2.5 billion at January 1, 2009. The decrease in funded status as of the last actuarial valuation was a result of lower than expected investment results over the previous five years.

Contributory System

The Contributory system provides retirement benefits to covered State of Utah, local government and public education employees. Benefits of the system are funded by member and employer contributions and by earnings on investments. The system net assets held in trust for benefits at December 31, 2010, totaled \$1.0 billion, an increase of \$69.7 million (7.4 percent) from \$937.6 million at December 31, 2009.

Additions to the Contributory System net assets held in trust for benefits include employer and member contributions, investment income and transfers. For calendar year 2010, member and employer contributions increased from \$19.5 million for calendar year 2009 to \$22.2 million, an increase of \$2.6 million (13.5 percent). Contributions increased because salaries and contribution rates increased. For the most part the Contributory System is a closed system. For this reason both the numbers of active members and retired individuals are declining. The system recognized a net investment gain

Management's Discussion and Analysis

(Continued)

of \$121.2 million for calendar year 2010 compared with net investment gain of \$112.6 million for the calendar year 2009. The increase in investment gain for 2010 compared to 2009 was due to the higher rate of return realized in 2010.

Deductions from the Contributory System net assets held in trust for benefits include retirement benefits, administrative expenses and transfers. For calendar year 2010, benefits amounted to \$69.2 million, an increase of \$2.2 million (3.3 percent) from calendar year 2009. The increase in benefit payments was due to the increase in the number of retired members in the system. For calendar year 2010, the costs of administering the system totaled \$535 thousand, a decrease of \$20 thousand (3.6 percent) from calendar year 2009.

An actuarial valuation of the Contributory System assets and benefit obligations is performed annually. At the date of the most recent actuarial valuation, January 1, 2010, the funded status of the system increased to 90.4 percent from 90.1 percent at January 1, 2009. The amount by which the Contributory System actuarial assets were under actuarial benefit liabilities was \$119.3 million at January 1, 2010, compared with \$120.9 million at January 1, 2009.

Public Safety System

The Public Safety System provides retirement benefits to eligible public safety employees of the State of Utah, local governments and higher education. Benefits of the system are funded by member and employer contributions and by earnings on investments. The system net assets held in trust for benefits at December 31, 2010, amounted to \$2.1 billion, an increase of \$233.3 million (12.8 percent) from \$1.8 billion at December 31, 2009.

Additions to the Public Safety System net assets held in trust for benefits include employer contributions, investment income and transfers. For calendar year 2010, member and employer contributions increased from \$100.3 million for calendar year 2009 to \$105.3 million, an increase of \$5.0 million (5.0 percent). Contributions increased because salaries and contribution rates increased. The system recognized a net investment gain of \$241.2 million for calendar year 2010 compared with net investment gain of \$213.6 million for calendar year 2009. The increase in investment gain for 2010 compared to 2009 was due to the higher rate of return realized in 2010.

Deductions from the Public Safety System net assets held in trust for benefits include retirement benefits and administrative expenses. For calendar year 2010, benefits amounted to \$116.3 million, an increase of \$9.7 million (9.1 percent) over calendar year 2009. The increase in benefit payments was due to an increased number of benefit recipients and benefit increases. For calendar year 2010, the costs of administering the system totaled \$1.1 million, an increase of \$19 thousand (1.7 percent) from calendar year 2009.

An actuarial valuation of the Public Safety System assets and benefit obligations is performed annually. At the date of the most recent actuarial valuation, January 1, 2010, the funded status of the system decreased to 80.6 percent from 81.6 percent at January 1, 2009. The amount by which the Public Safety System actuarial assets were under actuarial benefit liabilities was \$513.6 million at January 1, 2010, compared with being underfunded by \$456.1 million at January 1, 2009. The decrease in funded status as of the last actuarial valuation was a result of lower than expected investment returns over the previous five years.

Management's Discussion and Analysis

(Continued)

Firefighters System

The Firefighters System provides retirement benefits to covered firefighters of the State of Utah and local governments. Benefits of the system are funded by member and employer contributions and by earnings on investments. The system net assets held in trust for benefits at December 31, 2010, amounted to \$756.3 million, an increase of \$74.0 million (10.9 percent) from \$682.2 million at December 31, 2009.

Additions to the Firefighters System net assets held in trust for benefits consist of employer contributions, including insurance premium taxes, investment income and transfers. For calendar year 2010, member and employer contributions decreased from \$27.4 million for calendar year 2009 to \$25.0 million, a decrease of \$2.4 million (8.8 percent). Contributions decreased because insurance premium taxes decreased. The system recognized a net investment gain of \$89.1 million for calendar year 2010 compared with net investment gain of \$79.8 million for calendar year 2009. The increase in investment gain for 2010 compared to 2009 was due to the higher rate of return realized in 2010.

Deductions from the Firefighters System net assets held in trust for benefits include retirement benefits and administrative expenses. For calendar year 2010, benefits amounted to \$41.5 million, an increase of \$3.0 million (7.8 percent) over calendar year 2009. The increase in benefit payments was due to an increased number of benefit recipients and benefit increases. For calendar year 2010, the costs of administering the system totaled \$361 thousand, an increase of \$7 thousand (2.0 percent) from calendar year 2009.

An actuarial valuation of the Firefighters System assets and benefit obligations is performed annually. At the date of the most recent actuarial valuation, January

1, 2010, the funded status of the system decreased to 96.3 percent from 98.6 percent at January 1, 2009. The amount by which the Firefighters System actuarial assets were under actuarial benefit liabilities was \$31.3 million at January 1, 2010, compared to being underfunded by \$10.8 million at January 1, 2009. The decrease in funded status as of the last actuarial valuation was a result of lower than expected investment returns over the previous five years.

Judges System

The Judges System provides retirement benefits to judges in the State of Utah who are eligible to participate in the system. Benefits of the system are funded by employer contributions and by earnings on investments. The system net assets held in trust for benefits at December 31, 2010, amounted to \$123.0 million, an increase of \$11.3 million (10.1 percent) from \$111.7 million at December 31, 2009.

Additions to the Judges System net assets held in trust for benefits consist of employer contributions, including court fees, investment income and transfers. For calendar year 2010, employer contributions increased from \$4.3 million for calendar year 2009 to \$4.7 million, an increase of \$464 thousand (10.9 percent). Contributions increased because the contribution rate and court fees increased. The system recognized a net investment gain of \$14.6 million for the calendar year 2010 compared with net investment gain of \$13.2 million for calendar year 2009. The increase in investment gain for 2010 compared to 2009 was due to the higher rate of return realized in 2010.

Deductions from the Judges System net assets held in trust for benefits include retirement benefits and administrative expenses. For calendar year 2010, benefits

Management's Discussion and Analysis

(Continued)

amounted to \$9.0 million, an increase of \$1.4 million (18.6 percent) over calendar year 2009. The increase in benefit payments was due to an increased number of benefit recipients and benefit increases. For calendar year 2010, the costs of administering the system totaled \$69 thousand, a slight increase over the preceding year.

An actuarial valuation of the Judges System assets and benefit obligations is performed annually. At the date of the most recent actuarial valuation, January 1, 2010, the funded status of the system decreased to 83.1 percent from 86.4 percent at January 1, 2009. The amount by which the Judges System actuarial assets were under actuarial benefit liabilities was \$26.8 million at January 1, 2010, compared with \$19.8 million at January 1, 2009. The decrease in funded status as of the last actuarial valuation was a result of lower than expected investment returns over the previous five years.

Utah Governors and Legislators Retirement Plan

The Governors and Legislators Retirement Plan provides retirement benefits to governors and legislators of the State of Utah. Benefits of the system are funded by employer contributions and by earnings on investments. The system net assets held in trust for benefits at December 31, 2010, amounted to \$9.3 million, an increase of \$344 thousand (3.8 percent) from \$9.0 million at December 31, 2009.

Additions to the Governors and Legislators Retirement Plan net assets held in trust for benefits include investment income and transfers. No employer contributions were needed for this plan because of the current funded status. The system recognized a net investment gain of \$1.1 million for calendar year 2010 compared with net investment gain of \$1.1 million for calendar year 2009. The increase in investment gain for 2010 compared to 2009 was due to the higher rate of return realized in 2010.

Deductions from the Governors and Legislators Retirement Plan net assets held in trust for benefits include retirement benefits and administrative expenses. For calendar year 2010, retirement benefits amounted to \$795 thousand, an increase of \$11 thousand (1.4 percent) from calendar year 2009. The increase in benefit payments was due to an increase in the number of benefit recipients. For calendar year 2010, the costs of administering the system totaled \$5 thousand, a slight increase over the preceding year.

An actuarial valuation of the Governors and Legislators Retirement Plan assets and benefit obligations is performed annually. At the date of the most recent actuarial valuation, January 1, 2010, the funded status of the system decreased to 95.3 percent from 98.7 percent at January 1, 2009. The amount by which the Governors and Legislators Retirement Plan actuarial assets were under actuarial benefit liabilities was \$536 thousand at January 1, 2010, compared with being underfunded by \$141 thousand at January 1, 2009. The decrease in funded status as of the last actuarial valuation was a result of lower than expected investment returns over the previous five years.

Management's Discussion and Analysis

(Continued)

Actuarial Valuations and Funding Progress

Actuarial valuation of each defined benefit system is performed annually. At January 1, 2010, the date of the most recent actuarial valuation, the average funded ratio of the Systems was 85.8 percent. This was a decrease from the Systems' January 1, 2009, valuation average funded ratio of 86.6 percent, a decrease in funded status of 0.8 percent. As of December 31, 2010, the Systems' average funded ratio had decreased to 82.2 percent. This was a decrease in the Systems' funded ratio of 3.6 percent for calendar year 2010. The funded ratio decrease for all systems was the result of lower than expected investment returns over the previous five years.

At December 31, 2010, the Systems' underfunded actuarial accrued liability was \$4.6 billion. This was a net increase in the unfunded position of \$1.1 billion for the year. At December 31, 2010, the difference between the actuarial value of assets and market value of assets was \$1.4 billion in actuarially deferred losses. This was a

decrease of \$1.7 billion in actuarially deferred losses from the \$3.1 billion in actuarially deferred losses at January 1, 2010. These actuarially deferred losses will be recognized by the actuary over the next four years.

In 2009 two changes were made to the actuarial valuation. The first change was to increase the amortization period for amortizing the unfunded actuarial accrued liability (UAAL) from 20 years to 25 years. This funding period will be closed (i.e. the funding period will decrease by one year each year) until the funding period reaches 20 years, at which time the period will once again revert to an open 20 year amortization period. The second change was to widen the corridor used to determine the actuarial value of assets from 80% – 120% to 75% – 125% of market value. This change allows more of the 2008 investment losses to be smoothed into the actuarial value of assets over the next four years rather than being recognized in this valuation.

Analysis of the Defined Contribution Savings Plans

401(k) Defined Contribution Plan

The 401(k) Plan is established under section 401(k) of the Internal Revenue Code. This plan provides supplemental retirement benefits for plan participants. The plan is funded by contributions and by investment earnings. The plan net assets held in trust for benefits at December 31, 2010, amounted to \$2.9 billion, an increase of \$279.4 million (10.7 percent) over net assets at December 31, 2009.

Additions to the 401(k) Plan net assets held in trust for benefits include contributions, rollovers, and investment income. For calendar year 2010, contributions increased from those of calendar year 2009 from \$222.4 million to \$222.5 million, an increase of \$105 thousand (0.0 percent). Contributions increased because of increased participation. The plan recognized a net investment gain of \$254.3 million for calendar year 2010 compared with a net investment gain of \$387.0 million for calendar year 2009.

Deductions from the 401(k) Plan net assets include participant and beneficiary refunds, and administrative expenses. For calendar year 2010, refunds amounted to \$191.0 million, an increase of \$63.3 million (49.6 percent) over calendar year 2009. The increase in refunds

was due to an increase in withdrawals for calendar year 2010. For calendar year 2010, the costs of administering the plan amounted to \$6.4 million, an increase of \$69 thousand over calendar year 2009.

Benefit obligations of the 401(k) Defined Contribution Plan are equal to the member account balances, which are equal to net assets of the plan.

457 Defined Contribution Plan

The 457 Plan is established under Section 457(b) of the Internal Revenue Code. This plan provides supplemental retirement benefits for plan participants. The plan is funded by contributions and by investment earnings. The plan net assets held in trust for benefits at December 31, 2010, amounted to \$316.9 million, an increase of \$33.3 million (11.7 percent) over net assets at December 31, 2009.

Additions to the 457 Plan net assets held in trust for benefits include contributions and investment income. For calendar year 2010, contributions decreased from those of calendar year 2009 from \$26.6 million to \$26.5 million or a decrease of \$95 thousand (0.4 percent). Contributions decreased because of decreased participation. The plan recognized a net investment gain of

Management's Discussion and Analysis

(Continued)

\$27.6 million for calendar year 2010 compared with a net investment gain of \$41.6 million for the calendar year 2009.

Deductions from the 457 Plan net assets include participant and beneficiary refunds and administrative expenses. For calendar year 2010, refunds amounted to \$20.2 million, an increase of \$6.8 million (51.2 percent) over calendar year 2009. The increase in refunds was due to an increase in withdrawals for calendar year 2010. For calendar year 2010, the costs of administering the plan amounted to \$711 thousand, an increase of \$12 thousand over calendar year 2009.

Benefit obligations of the 457 Defined Contribution Plan are equal to the member account balances, which are equal to net assets of the plan.

Roth IRA Plan

The Roth IRA is a “deemed IRA” authorized by section 408(q) of the Internal Revenue Code, and governed by section 408A of the code. This plan allows participants to make after-tax contributions, while the earnings may be withdrawn tax-free (for qualified distributions). The plan net assets held in trust for benefits at December 31, 2010, amounted to \$20.6 million, an increase of \$8.3 million (68.0 percent) over net assets at December 31, 2009.

Additions to the Roth IRA Plan include contributions, transfers from other Roth IRAs, conversions from traditional IRAs, and investment earnings. For calendar year 2010, contributions increased from those of calendar year 2009 from \$3.6 million to \$8.1 million (124.0 percent). Contributions increased because of increased participation. The plan recognized a net investment gain of \$1.8 million for calendar year 2010 compared with a net investment gain of \$2.0 million for calendar year 2009.

Deductions from the Roth IRA Plan net assets include participant and beneficiary refunds and administrative expenses. For calendar year 2010, refunds amounted to \$1.6 million, an increase of \$1.1 million (255.5 percent) over calendar year 2009. For calendar year 2010, the costs of administering the plan amounted to \$38 thousand, an increase of \$12 thousand over calendar year 2009.

Traditional IRA Plan

The traditional IRA is a “deemed IRA” authorized by section 408(q) of the Internal Revenue Code, and governed by section 408 of the code. This plan allows participants to make after-tax contributions and possibly deduct all or a portion of the contributions from their current taxable income. This plan also allows participants to consolidate many other eligible plan assets when they become eligible for rollover (such as 401(k), 457, and other IRAs). Participants may also convert traditional IRA funds into a Roth IRA. The plan net assets held in trust for benefits at December 31, 2010, amounted to \$26.3 million, an increase of \$3.8 million (16.8 percent) over net assets at December 31, 2009.

Additions to the traditional IRA Plan include contributions, rollovers, and investment earnings. For calendar year 2010, contributions increased from those of calendar year 2009 from \$3.2 million to \$6.1 million (92.9 percent). Contributions increased because of increased rollovers. The plan recognized a net investment gain of \$1.7 million for calendar year 2010 compared with a net investment gain of \$2.8 million for calendar year 2009.

Deductions from the traditional IRA Plan net assets include participant and beneficiary refunds and administrative expenses. For calendar year 2010, refunds

Management's Discussion and Analysis

(Continued)

amounted to \$4.0 million, an increase of \$1.3 million (50.1 percent) over calendar year 2009. For calendar year 2010, the costs of administering the plan amounted to \$55 thousand, an increase of \$3 thousand over calendar year 2009.

Health Reimbursement Arrangement

The Health Reimbursement Arrangement (HRA) is a tax-advantaged health savings plan for state employees funded by employer contributions to pay for qualified health care expenses incurred after retirement. No employee contributions are permitted. The plan net assets held in trust for benefits at December 31, 2010, amounted to \$6.3 million, an increase of \$3.3 million (110.0 percent) over the net assets at December 31, 2009.

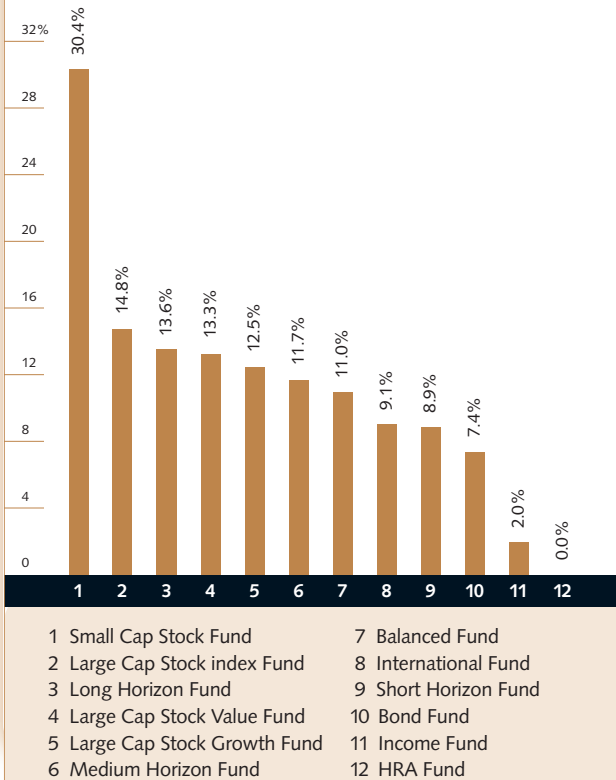

Additions to the HRA include contributions and investment earnings. For calendar year 2010, contributions increased from those of calendar year 2009 from \$2.0 million to \$4.3 million (116.5 percent). Contributions increased because of the number of state retirees and an increase in the average amount deposited by the employer in behalf of the retiree.

Deductions from the HRA Plan net assets include participant and beneficiary refunds and administrative expense. For calendar year 2010 refunds amounted to \$987 thousand, an increase of \$454 thousand (85.2 percent) over calendar year 2009. The increase in refunds was due to an increase in withdrawals for calendar year 2010.

Benefit obligations of the HRA plan are equal to the member account balance, which are equal to net assets of the plan.

Notes to the Basic Financial Statements

December 31, 2010

Note 1

Description of Systems and Plans

A brief description of the Utah Retirement Systems (Systems) and 401(k), 457, Roth and Traditional IRA Plans (Plans), and Health Reimbursement Arrangement (HRA) follows. For a more complete description of plan provisions, membership and benefit statistics, see the Systems Highlights on pages 12 through 24 and Summaries of Plan Provisions on pages 135 through 146.

A) General Information and Reporting Entity

GENERAL — The Utah Retirement Systems are comprised of the following pension trust funds:

- i) the **Public Employees Noncontributory Retirement System (Noncontributory System)**; the **Public Employees Contributory Retirement System (Contributory System)**; and the **Firefighters Retirement System** which are multiple-employer, cost sharing, public employee retirement systems;
- ii) the **Public Safety Retirement System** which is a mixed agent and cost-sharing, multiple-employer retirement system;
- iii) the **Judges Retirement System** and the **Utah Governors and Legislators Retirement Plan** which are single-employer service-employee retirement systems; and
- iv) five defined contribution plans comprised of the **401(k) Plan, 457 Plan, Roth and Traditional IRA Plans, and HRA.**

These Systems and Plans cover employees of the State of Utah and participating local government and public education entities.

REPORTING ENTITY — These basic financial statements cover all of the foregoing retirement systems and defined contribution plans administered by the Utah State Retirement Board (Board), the sole governing body for these Systems and Plans.

The Systems are established and governed by the respective sections of Title 49 of the Utah Code Annotated 1953, as amended. The Systems' defined benefit plans are amended statutorily by the State Legislature. The Utah State Retirement Office Act in Title 49 provides for the administration of the Systems and Plans under the direction of the Board, whose members are appointed by the Governor. The Plans are established under the authority of the same sections of the Utah Code Annotated 1953, as amended, as well as under Sections 401(k), 457, 408 and 408A of the Internal Revenue Code. The Plans may be amended by the Board within the parameters of the Internal Revenue Code. The Systems and Plans are fiduciary funds defined as pension (and other employee benefit) trust funds. Utah Retirement Systems are a component unit of the State of Utah.

B) Retirement and Death Benefits

Retirement Systems' benefits are specified by the statute listed in note 1(A). The Retirement Systems are defined benefit plans wherein benefits are based on age

Notes to the Basic Financial Statements (Continued)

Summary of Benefits by System

	Noncontributory System	Contributory System	Public Safety System	Firefighters System	Judges System
Final average salary is	Highest 3 years	Highest 5 years	Highest 3 years		Highest 2 years
Years of service required and/or age eligible for benefit	30 years any age 25 years any age* 20 years age 60* 10 years age 62* 4 years age 65	30 years any age 20 years age 60* 10 years age 62* 4 years age 65	20 years any age 10 years age 60 4 years age 65		25 years any age 20 years age 55* 10 years age 62 6 years age 70
Benefit percent per year of service**	2.0% per year all years	1.25% per year to June 1975 2.00% per year July 1975 to present	2.5% per year up to 20 years 2.0% per year over 20 years		5.00% first 10 years 2.25% second 10 years 1.00% over 20 years

Note: The Utah Governors and Legislators Retirement Plan benefits are explained in the second paragraph of section B) above.

*With actuarial reductions.

**For members and retirees in the systems, prior to January 1, 1990, there may be a 3% benefit enhancement.

Notes to the Basic Financial Statements (Continued)

December 31, 2010

Participating Membership by System

	Noncontributory System	Contributory System	Public Safety System	Firefighters System	Judges System	Utah Governors and Legislators Retirement Plan
Number of participating:						
Employers	419	159	130	56	1	1
Members:						
Active	92,392	2,330	7,624	1,887	109	125
Terminated vested	31,834	1,286	2,401	131	6	76
Retirees and beneficiaries:						
Service benefits	36,139	4,762	4,002	1,067	115	220
Disability benefits	—	2	10	82	—	—

and/or years of service and highest average salary. Various plan options within the Systems may be selected by retiring members. Some options require actuarial reductions based on attained age, age of spouse and similar actuarial factors. A brief summary of eligibility and benefits of the various Systems is shown in the table on page 49.

The Utah Governors and Legislators Retirement Plan provides the following benefits. Former governors at age 65 receive \$1,240 per month per term. Legislators receive a benefit at age 65 with four or more years of service at the rate of \$27.20 per month per year of service. Retirement at age 62 with ten or more years of service will receive an actuarial reduction. Both the governors' and legislators' benefits are adjusted based on the CPI limited to 4% of the base benefit per year.

Death benefits for active and retired employees are in accordance with retirement statutes. Upon termination of employment, members of the Systems may leave their retirement account intact for future benefits based on vesting qualification or withdraw the accumulated funds in their individual member account and forfeit service credits and rights to future benefits upon which the contributions were based.

C) Defined Contribution Plans

The 401(k), 457, Roth and Traditional IRA Plans, and HRA administered by the Board are defined contribution plans. These Plans are available as supplemental plans to the basic retirement benefits of the Retirement Systems. Contributions may be made into the Plans subject to plan and Internal Revenue Code limitations by employees of employers sponsoring the Plans. Employer contributions may be made into the 401(k) and 457 Plans at rates determined by the employers and according to Utah Title 49. There are 365 employers participat-

ing in the 401(k) Plan and 152 employers participating in the 457 Plan. There are 143,807 plan participants in the 401(k) Plan, 16,586 participants in the 457 Plan, 2,542 participants in the Roth IRA Plan, 595 participants in the Traditional IRA Plan, and 1,452 in the HRA.

After termination of employment, benefits are paid out to individuals in lump-sum, or as periodic benefit payments, at the option of the participant based on individual account balances and plan provisions. The defined contribution Plans account balances are fully vested to the participants at the time of deposit.

Investments in the defined contribution Plans are individually directed and controlled by plan participants who direct the investment of their funds among several investment options of varying degrees of risk and earnings potential. Participants may transfer their funds between these options no more frequently than every seven days. There is also a 2% trading fee for investment transfers between core fund options more frequently than every thirty days. Investments of the Plans are reported at fair value.

D) Contributions

As a condition of participation in the Systems, employers and/or employees are required to contribute certain percentages of salaries and wages as authorized by statute and specified by the Board. Employee contributions may be paid in part or in whole by the employer. Contributions in some Systems are also augmented by fees or insurance premium taxes. Contribution rates are listed in note 6.

Employee (member) contributions are placed into member accounts, and in systems where it is authorized, interest is credited to member accounts. Upon termination of employment, a member may withdraw their

Notes to the Basic Financial Statements *(Continued)*

December 31, 2010

account balance, including interest which has been credited. Upon withdrawal a member forfeits the service credit which corresponds to the member contributions withdrawn. The noncontributory retirement systems have no member contributions flowing into them. However, where members had a balance transferred in or purchased service credit in the system, these balances and on-going interest, where authorized, are credited to individual member accounts which may be withdrawn upon the termination of employment.

In the 401(k) and 457 defined contribution plans, voluntary deferral of compensation within the limits of plan provisions may be made by employees. In addition to employee voluntary deferrals, employer contributions may be made into the Plans in behalf of employees. The recognition of deferred compensation, employer contributions and earnings on the accounts are deferred for income tax purposes until actually paid to the participant or beneficiary. The employee may also contribute to the Roth and traditional deemed IRAs where earnings may grow tax deferred and possibly tax free.

E) Covered Employees

The **Public Employees Noncontributory Retirement System (Noncontributory System)** was established on July 1, 1986. All eligible employees of the State and school entities hired subsequent to that date are automatically members of the Noncontributory System. Local government entities had the option of adopting the new System or remaining with the Contributory System. All Contributory System members whose employers adopted the Noncontributory System were given the

opportunity to transfer to the new System during limited window periods. All eligible new hires subsequent to adoption of the noncontributory plans are automatically members of that plan.

The **Public Employees Contributory Retirement System (Contributory System)** includes eligible public employees of the State of Utah and its political subdivisions including public education employees of those entities covered by the System. Members of this System are those who did not elect to transfer to the Public Employees Noncontributory Retirement System during the period when they were eligible to transfer or whose employers are not participants in the Noncontributory System.

The **Public Safety Retirement System** includes eligible state and local government employees directly involved in law enforcement (e.g., game wardens, prison guards, police officers and highway patrol officers). The Public Safety System consists of both contributory and noncontributory divisions. The noncontributory divisions were authorized by the Legislature effective July 1, 1989.

The **Firefighters Retirement System** includes eligible state and local government employees directly involved in fire fighting.

The **Judges Retirement System** includes justices and judges of the court as authorized by State Statutes.

The **Utah Governors and Legislators Retirement Plan** includes only governors and legislators of the State.

The **Defined Contribution Plans** may be utilized by employers adopting the Plans and by their employees.

At December 31, 2010, participating members by System are included in the table on page 50.

Notes to the Basic Financial Statements *(Continued)*

December 31, 2010

Note 2

Summary of Significant Accounting Policies

The following are the significant accounting policies followed by the Systems and Plans:

A) Method of Accounting

The Systems maintain records and accounts, and prepare financial statements using fund accounting principles and the accrual basis of accounting, under which benefits and expenses are recognized when due and payable and revenues are recorded in the accounting period in which they are earned and become measurable in accordance with the terms of each system and plan.

Utah Retirement Systems adhere to Governmental Accounting Standards Board (GASB) Statement No. 25, *Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans*, GASB Statement No. 34, *Basic Financial Statements — and Management's Discussion and Analysis — for State and Local Governments*, GASB Statement No. 37, *Basic Financial Statements — and Management's Discussion and Analysis — for State and Local Governments: Omnibus*, GASB Statement No. 38, *Certain Financial Statement Note Disclosures*, GASB Statement No. 40, *Deposit and Investment Risk Disclosures*, GASB Statement No. 44, *Economic Condition Reporting: The Statistical Section*, GASB Statement No. 45, *Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions*, GASB Statement No. 51, *Accounting and Financial Reporting for Intangible Assets*, and GASB No. 53, *Accounting and Financial Reporting for Derivative Instruments*. Investments are presented at fair value. The actuarial accrued liability under the entry age actuarial funding method is presented in the Required Supplementary Information on page 76.

B) Investments

By state statute all of the investment assets of the various Systems are pooled and invested in the common Utah State Retirement Investment Fund (Investment Fund). Each of the Systems has equity in the Investment Fund based on funds contributed and earnings allocated. Earnings of the Investment Fund are allocated based on the average month-end balances of each of the respective Systems. Individual investments in the Investment Fund

are not specifically identified to the respective Systems (see note 3). For financial statement presentation, the Investment Fund assets, liabilities, revenues and expenses have been allocated to and presented in each respective system in the basic financial statements as required for investment pools.

Investments are presented at fair value. The defined contribution investments are classified by investment manager classification. The fair value of investments is based on published market prices and quotations from major investment brokers at current exchange rates, as available. Many factors are considered in arriving at that value. Corporate debt securities are valued based on yields currently available on comparable securities of issuers with similar credit ratings.

Mortgages have been valued on an amortized cost basis which approximates market or fair value. The fair value of real estate investments has been estimated based on independent appraisals. Short term investments are reported at market value when published market prices and quotations are available, or at cost plus accrued interest, which approximates market or fair value. For alternative investments (private equity, absolute return, and real estate) where no readily ascertainable market value exists, management, in consultation with their investment advisors, values these investments in good faith based upon audited financials, cash flow analysis, purchase and sales of similar investments, other practices used within the industry, or other information provided by the underlying investment advisors. The estimated fair value of these investments may differ significantly from values that would have been used had a ready market existed.

Approximately 10% of the net assets held in trust for pension benefits are invested in debt securities of the U.S. Government and its instrumentalities. Of the 10%, approximately 4% are U.S. Government debt securities and approximately 6% are debt securities of the U.S. Government instrumentalities. The Systems and Plans have no investments of any commercial or industrial organization whose market value equals 5% or more of the Systems' net assets held in trust for pension benefits.

Notes to the Basic Financial Statements *(Continued)*

December 31, 2010

C) Property and Equipment

Property and equipment are recorded at cost (see note 4), are depreciated utilizing the straight-line method, and are included in the assets of the Investment Fund. The schedule below summarizes the estimated useful life by class. The Systems policy is to capitalize all acquisitions of furniture and equipment with a unit cost of \$5,000 or more.

Buildings.....	40 years
Building improvements.....	10 years
Furniture and equipment.....	3-10 years
Computer software.....	5 years

D) Administrative Expenses

Expenses for the administration of the Systems and Plans are budgeted and approved by the Board. Systems expenses are paid from investment earnings. Plan expenses are paid from Plan assets.

E) Federal Tax Status

The Systems and Plans are exempt from Federal income taxes under the Internal Revenue Code.

F) Use of Estimates

Management of the Systems and Plans have made a number of estimates and assumptions relating to the reporting of assets and liabilities and the disclosure of contingent assets and liabilities to prepare these financial statements in conformity with accounting principles generally accepted in the United States of America. Actual results could differ from these estimates.

G) Subsequent Events

The Systems have performed an evaluation of subsequent events through April 12, 2011, the date the basic financial statements were available to be issued. No material events were identified by the Systems.

Note 3

Deposits and Investment Risk Disclosures

A) Deposits

Custodial Credit Risk for Deposits is the risk that in the event of a bank failure, the Systems' and Plans' deposits may not be returned to them. The deposits are held in one financial institution with an insured balance of \$250,000. Deposits in the bank in excess of \$250,000 are uninsured and uncollateralized, because they are not required to be by state statute. The Systems and Plans do not have a deposit policy for custodial credit risk. Deposits are presented in the basic financial statements at cost plus accrued interest which is also the market or

fair value. At December 31, 2010, the carrying amount of deposits totaled approximately \$(8,074,000) and the corresponding bank balance was \$2,782,015 of which \$2,532,015 was exposed to custodial credit risk.

B) Investments

The table below shows the Systems' and Plans' investments by type.

(in thousands)	12/31/2010	12/31/2009
Private equity	1,839,452	\$1,410,809
Absolute return	3,137,599	2,411,419
Real estate	2,814,306	2,629,760
	<u>\$7,791,357</u>	<u>\$6,451,988</u>

The following investments are not listed on national exchanges, over-the-counter markets, nor do they have quoted market prices available.

The Systems and Plans value these investments in good faith at the Systems' and Plans' pro-rata interest in the net assets of these investments based upon audited financial statements or other information provided to the

Systems and Plans by the underlying investment managers. The estimated fair value of these investments may differ significantly from values that would have been used had a ready market existed.

C) Credit Risk Debt Securities:

The Systems and Plans expect their domestic debt securities investment managers to maintain diversified portfolios by sector and by issuer by using the following guidelines:

- U.S. Government and Agency Securities — no restriction.
- Total portfolio quality shall maintain a minimum overall rating of "A" (S&P) or equivalent rating.
- Securities with a quality rating of below BBB- are considered below investment grade. No more than 5% of an investment manager's assets at market with a single issuer of 1% of the total portfolio can be below investment grade.

Notes to the Basic Financial Statements (Continued)

December 31, 2010

- Upon approval, a domestic debt securities investment manager may invest up to 10% of the portfolio in non-U.S. dollar denominated bonds.
- Upon approval, the international debt securities investment managers may hold up to 25% of the market value of their portfolios in securities rated below investment grade (S&P index below BBB- or Moody's index below Baa3). The remaining assets shall have on average an investment grade rating.

The weighted quality rating average of the domestic debt securities, excluding pooled investments, at December 31, 2010, is AAA, and the fair value of below grade investments is \$341,495,443 or 9.69% of the domestic portfolio. The weighted quality rating average of the international debt securities investments, at December 31, 2010, is AA+ and the fair value of below grade investments is \$20,122,644 or 2.28% of the international portfolio.

Notes to the Basic Financial Statements (Continued)

December 31, 2010

D) Custodial Credit Risk

Custodial credit risk for investments is the risk that, in the event of a failure of the counterparty, the Systems and Plans will not be able to recover the value of the investment or collateral securities that are in the possession of an outside party. URS does have an investment policy regarding custodial credit risk. At December 31, 2010, the table below represents the investments that have custodial credit risk. The \$15,391,000 frictional cash and cash equivalents subject to custodial credit risk are in foreign banks in the Systems and Plans name. Because it is in foreign banks, it is subject to custodial credit risk. URS does not have an investment policy regarding custodial credit risk for frictional cash in foreign banks.

Custodial Credit Risk**Exposed to Custodial Credit Risk**

Type of Investment	(in thousands) Fair Value
Cash and cash equivalents	\$ 15,391

Exposure to Custodial Credit Risk Not Determined

Type of Investment	(in thousands) Fair Value
Cash and cash equivalents	\$ 2,220
Other assets	90,650

E) Concentrations of Credit Risk

The Systems and Plans expect investment managers to maintain diversified portfolios by sector and by issuer using the following guidelines:

- AAA/Aaa Debt Securities — no more than 5% of an investment manager's assets at market with a single issuer
- AA-/Aa3 Debt Securities or higher — no more than 4% of an investment manager's assets at market with a single issuer
- A-/A3 Debt Securities or higher — no more than 3% of an investment manager's assets at market with a single issuer
- BBB-/Baa3 Debt Securities or higher — no more than 2% of an investment manager's assets at market with a single issuer
- For Debt Securities — no individual holding shall constitute more than 10% of the market value of out-

standing debt of a single issuer with the exception of the U.S. Government or its agencies, or collateralized mortgage obligations.

- For Domestic Equity Securities — no individual holdings shall constitute more than 4% of the securities of any single issuer. Also, no more than 8% of an investment manager's assets shall be invested in the equity or REIT securities of any single issuer at market; or if specifically authorized in the manager's contract, the exposure of the portfolio to any single issuer shall not exceed the greater of 5% of the portfolio value or 2% of the portfolio value plus the benchmark weight measured at the time of purchase.
- For International Equity Securities — no more than 8% of an investment manager's assets shall be invested in the equity or REIT securities of any single issuer at market; or if specifically authorized in the manager's contract, the exposure of the portfolio to any single issuer shall not exceed the greater of 5% of the portfolio value or 2% of the portfolio value plus the benchmark weight measured at the time of purchase.

At December 31, 2010, there were no single issuer investments that exceeded the above guidelines.

F) Interest Rate Risk

The Systems and Plans manage their exposure to fair value loss arising from increasing interest rates by complying to the following policy:

- For domestic debt securities managers, an individual debt securities investment manager's portfolio shall have an effective duration between 75 – 125% of the effective duration of the appropriate index.
- The international debt securities investment managers shall maintain an effective duration of their portfolio between 50 – 150% of the appropriate index.

Duration is a measure of a debt investment's exposure to fair value changes arising from changes in interest rates. It uses the present value of cash flows, weighted for those cash flows as a percentage of the investments full price.

The Systems and Plans compare an investment's effective duration against the Barclays Capital Aggregate Index for domestic debt securities, the Barclays Capital Global Aggregate Index for international debt securities, and the Barclays Capital Global Inflation Bond Index (USD hedged) for inflation-linked debt securities. The index range at December 31, 2010, is 3.74 – 6.23 for domestic debt securities, 2.85 – 8.55 for international debt securities, and 7.97 – 11.95 for inflation-linked debt securities. At December 31, 2010, no individual debt

*American Depository Receipts

Notes to the Basic Financial Statements *(Continued)*

December 31, 2010

security investment manager's portfolio was outside of the policy guidelines. At December 31, 2010, the tables on page 56 show the investments by investment type, amount and the effective weighted duration.

G) Foreign Currency Risk

The Systems and Plans expect the International Securities Investment Managers to maintain diversified portfolios by sector and by issuer using the following guidelines:

- International investment managers invest in fixed income instruments and equity instruments of corporations headquartered outside of the United States unless specifically authorized within the investment managers' contract.
- Domestic investment managers are allowed to invest in international corporations traded in American Depository Receipts (ADR).
- Portfolios should be adequately diversified to limit foreign currency and security risk.

Risk of loss arises from changes in currency exchange rates. The Systems' and Plans' exposure to foreign currency risk is shown on page 58.

H) Security Lending

The Systems and Plans participate in a security lending program as authorized by Board policy, whereby securities are transferred to an independent broker or dealer in exchange for collateral in the form of cash, government securities and irrevocable bank letters of credit equal to approximately 102% of the market value of the domestic securities on loan and 104% of the market value of the international securities on loan, with a simultaneous agreement to return the collateral for the same securities in the future. The custodial bank is the agent for the securities lending program. Securities under loan are maintained in the financial records, and corresponding liabilities are recorded for the market value of the collateral received.

At year end there was no credit risk exposure to borrowers because the collateral exceeded the amount borrowed. The securities on loan at year end were \$1,226,313,000 and the collateral received for those securities on loan was \$1,256,870,000. Under the terms of the lending agreement, the Systems and Plans are indemnified against loss should the lending agent be unable to recover borrowed securities and distributions due to borrower insolvency or failure of the lending

agent to properly evaluate the creditworthiness of the borrower. In addition, the Systems and Plans are indemnified against loss should the lending agent fail to demand adequate and appropriate collateral on a timely basis. All securities loaned can be terminated on demand by either the Systems and Plans or the borrower. Cash collateral is invested in the lending agent's short term investment pool.

The short term investment pool guidelines specify that a minimum of 20% of the invested cash collateral is to be available each business day and the dollar weighted average maturity of holdings should not exceed 60 days. The relationship between the maturities of the short term investment pool and the Systems' and Plans' loans is affected by the maturities of the securities loans made by other entities that use the agent's pool, which the Systems and Plans cannot determine. Since the securities lending collateral is in a pool maintained by the custodial bank, the Systems and Plans do not have the ability to pledge or sell the securities, and it is not necessary to report the total income and expenses of securities lending.

I) Derivative Financial Instruments

The Systems and Plans invest in derivative financial investments as authorized by Board policy. Derivatives are financial arrangements between two parties whose payments are based on, or "derived" from, the performance of some agreed-upon benchmark. All derivatives are considered investments. The fair value of all derivative financial instruments are reported in the Statements of Fiduciary Net Assets — Pension (and Other Employee Benefit) Trust Funds. By policy, portfolio liabilities associated with investments shall be backed by cash equivalents or deliverable securities. URS does not have a policy regarding master netting arrangements. At December 31, 2010, the Systems and Plans had five types of derivative

Notes to the Basic Financial Statements (Continued)

December 31, 2010

financial instruments: futures, currency forwards, options, swaps and Synthetic Guaranteed Investment Contracts.

FUTURES

Futures represent commitments to purchase (asset) or sell (liability) securities at a future date and at a specified price. Futures contracts are traded on organized exchanges (exchange traded) thereby minimizing the Systems' and Plans' credit risk. The net change in the futures contracts value is settled daily in cash with the exchanges. Net gains or losses resulting from the daily settlements are included with trading account securities gains (losses) in the Statement of Changes in Fiduciary Net Assets. At December 31, 2010, the Systems' and Plans' investments had the notional future balances as shown to the right.

December 31, 2010

CURRENCY FORWARDS

Currency forwards represent forward foreign exchange contracts that are entered into in order to hedge the exposure to changes in foreign currency exchange rate on the foreign currency dominated portfolio holdings. A forward foreign exchange contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. The gain or loss arising from the difference between the original contracts and the closing of such contracts is included in the net realized gains or losses on foreign currency related transactions in the Statement of Changes in Fiduciary Net Assets. At December 31, 2010, the Systems' and Plans' investments included the currency forwards balances on page 60.

OPTIONS

Options represent or give buyers the right, but not the obligation, to buy (call) or sell (put) an asset at a preset price over a specified period. The option's price is usually a small percentage of the underlying asset's value. As a writer of financial options, the Systems and Plans receive a premium at the outset of the agreement and bear the risk of an unfavorable change in the price of the financial instrument underlying the option. As a purchaser of financial options, the Systems and Plans pay a premium at the outset of the agreement and the counterparty bears the risk of an unfavorable change in the price of the financial instrument underlying the option.

At December 31, 2010, the Systems' and Plans' investments had the option balances shown at the lower left.

SWAPS

The Systems and Plans have entered into various inflation and interest rate swap agreements in an attempt to manage their exposure to inflation and interest rate risk. Inflation risk represents the exposure to fair value losses arising from inflation, while interest rate risk represents the exposure to fair value losses arising from the future changes in prevailing market interest rates. Swaps represent an agreement between two or more parties to exchange sequences of cash flows over a period in the future. In the most common type of interest rate swap arrangement, one party agrees to pay fixed interest payments on designated dates to a counterparty, who in turn agrees to make return interest payments that float with some reference rate. In an inflation swap one party pays a fixed rate on a notional principal amount to a counterparty, who in turn agrees to make return payments associated with a floating rate linked to an inflation index. Most of the interest rate swaps were purchased in connection with variable real estate debt. Those interest rate swaps allowed the Systems to effectively convert most of their long term variable interest rate credit facility loans into fixed interest rate loans, thereby mitigating some of their interest rate risk. All swap instruments contain collateral clauses. As of December 31, 2010, only the Goldman Sachs swap has collateral held for \$1,460,000. Gains and losses on swaps are determined based on market values and are recorded in the Statement of Changes in Plan Net Assets. Swap market values are determined by an independent third party. At December 31, 2010, the Systems' investments had the swap market value balances as shown in the table on pages 62 and 63.

DERIVATIVE CREDIT RISK

Derivatives which are exchange traded are not subject to credit risk. No derivatives held are subject to custodial credit risk. The maximum loss that would be recognized at December 31, 2010, if all counterparties fail to perform as contracted is \$787,492,804. This maximum exposure is reduced by \$1,460,000 in collateral held and

\$890,503,478 of liabilities, resulting in no net exposure to credit risk. Credit ratings for the wrap contracts associated with the SGICs are noted on page 64. At December 31, 2010, the counterparties' credit ratings for currency forwards, swaptions and swaps are subject to credit risk.

Credit Risk Derivatives at Fair Value

Total subject to credit risk	\$4,999,616	(6,126,979)	(101,883,307)	(103,010,670)

Notes to the Basic Financial Statements (Continued)

December 31, 2010

SYNTHETIC GUARANTEED INVESTMENT CONTRACTS

In the Utah Retirement Systems Defined Contribution Plans, members are able to participate in Synthetic Guaranteed Investment Contracts (SGICs). The SGICs are fully benefit responsive which means that Utah Retirement Systems is prohibited from assigning and selling the contract or its proceeds to a third party without the consent of the issuer. Prospective interest crediting rate adjustments are provided to plan participants. The SGICs provide assurance that the probability of future rate adjustments resulting in an interest crediting rate less than zero is remote. The underlying investments are high credit quality averaging AA- and therefore credit loss is remote. The terms of the SGICs require all plan participants to initiate transactions within the fund at contract value. The contract value is the fair value (cost plus accrued interest). The fair value of these contracts at December 31, 2010, is \$863,573,000 and the market value is \$877,259,000.

J) Investment Payables

The investment accounts payable are comprised of investment advisor fees payable of \$11,186,000, administrative expenses payable of \$5,632,000, investment purchases payable of \$900,861,000 and various real estate payables of \$5,000,000.

K) Investment Compliance Officer

The Systems and Plans have an investment compliance officer on staff who reports his/her findings directly to the Board. The investment compliance officer monitors all of the investments made by the investment managers to determine that the investments were made in accordance with the investment policies which were approved by the Board.

Less operating reserves	5,650	6,747
Net property and equipment	\$ 860	322

Note 5

Actuarial Valuations and Methods

A) Actuarial Asset Valuation

The actuarial value of assets is used in determining the funding progress of the Retirement Systems. The actuarial value of assets is based on a smoothed expected income investment rate. Beginning with the 2008 actuarial study, the investment rate of return assumption was changed from 8% to 7.75%. Investment income in excess or shortfall of the expected rate on fair value is smoothed over a five-year period with 20% of a year's excess or shortfall being recognized each year beginning with the current year.

In 2009 two changes were made to the actuarial valuation. The first change was to increase the amortization period for amortizing the unfunded actuarial accrued liability (UAAL) from 20 years to 25 years.

This funding period will be closed (i.e. the funding period will decrease by one year each year) until the funding period reaches 20 years, at which time the period will once again revert to an open 20 year amortization period. The second change was to widen the corridor used to determine the actuarial value of assets from 80% – 120% to 75% – 125% of market value. This change allows more of the 2008 investment losses to be smoothed into the actuarial value of assets over the next four years rather than being recognized in this valuation.

This smoothed actuarial value of assets utilized by the actuary in determining the actuarial funding status of the retirement systems is also used in establishing the contribution rates necessary to accumulate needed assets to pay benefits when due.

Notes to the Basic Financial Statements (Continued)

Calculation of Actuarial Value of Assets

January 1, 2010

(dollars in thousands)

1. Fair value of assets				\$17,717,845
2. Deferral to smooth asset values based on (excess)/shortfall of expected investment income for:				
	Year	Total Excess/ (Shortfall)	Percent Deferred	Amount Deferred
a. 2009	\$	855,755	80%	\$ 684,605
b. 2008		(6,490,100)	60%	(3,894,059)
c. 2007		(286,303)	40%	(114,520)
d. 2006		1,116,942	20%	223,389
e. 2005		199,197	0%	0
f. Total deferred gains (losses)				(3,100,585)
g. Total deferred losses				3,100,585
3. Actuarial value of assets available for benefits				\$20,818,430

December 31, 2010

(dollars in thousands)

1. Fair value of assets				\$19,756,106
2. Deferral to smooth asset values based on (excess)/shortfall of expected investment income for:				
	Year	Total Excess/ (Shortfall)	Percent Deferred	Amount Deferred
a. 2010	\$	955,382	80%	\$ 764,306
b. 2009		855,755	60%	513,453
c. 2008		(6,490,100)	40%	(2,596,041)
d. 2007		(286,303)	20%	(57,262)
e. 2006		1,116,942	0%	0
f. Total deferred gains (losses)				(1,375,544)
g. Total deferred losses				1,375,544
3. Actuarial value of assets available for benefits				\$21,131,650

*Actuarial value of assets can not exceed 125% of the fair value of assets or below 75% of the fair value of assets.

Actuarial Value of Assets by System

January 1, 2010

(in thousands)

Calculation of Net Assets Available Based on Five Year Expected Investment Income	Noncontributory System	Contributory System	Public Safety System	Firefighters System	Judges System	Governors and Legislative	Total All Systems
1. Net assets available for benefits at fair value	\$14,150,242	939,907	1,824,758	682,219	111,726	8,993	17,717,845
2. Deferral to smooth asset values based on excess/shortfall of expected investment income on fair value	2,469,589	176,829	312,269	120,357	19,765	1,776	3,100,585
3. Actuarial value of assets available for benefits (1-2)	\$16,619,831	1,116,736	2,137,027	802,576	131,491	10,769	20,818,430

The calculations above were utilized in determining the actuarial value of assets as of January 1, 2010, and December 31, 2010, and the next table shows the smoothed actuarial value of assets for each System.

B) Actuarial Accrued Liability

The actuarial accrued liability for the Systems is presented in the Required Supplementary Information Schedule of Funding Progress on page 76 and 77 of this report.

C) Actuarial Cost Method and Assumptions

The Board engages an independent firm of actuaries to estimate the present value of actuarial accrued liability for the purpose of determining actuarial accrued liabili-

ties for active and terminated members, retired individuals and beneficiaries, and for the determination of contribution rates (note 6).

Actuarial accrued liabilities are future periodic payments including lump-sum distributions that are attributable to the service employees have rendered to date and the plan provisions of the various systems. The present value of actuarial accrued liabilities are calculated based on the entry age actuarial cost method with benefits based on projected salary increases.

A schedule of the actuarial assumptions used in the actuarial report dated January 1, 2010, is presented in Notes to Required Supplementary Information on page 79.

Notes to the Basic Financial Statements (Continued)

December 31, 2010

Actuarial valuations of the ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Amounts determined regarding the funded status and the annual required contributions are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The schedule of funding progress on page 73, presented as required supplementary information, shows the actuarial value of plan assets compared to the actuarial accrued liabilities for benefits.

**Note 6**

Actuarially Determined Contribution Requirements and Contributions Made

Employer contribution rates consist of (1) an amount for normal cost, the estimated amount necessary to finance benefits earned by the members during the current year, and (2) an amount for amortization of the unfunded or excess funded actuarial accrued liability over a closed 24 year amortization period. The rates are determined using the entry age actuarial cost method with a supplemental present value and the same actuarial assumptions that were used to calculate the actuarial accrued liability in the Schedules of Funding Progress on pages 76 and 77.

The schedule below summarizes contribution rates in effect at December 31, 2010.

Contribution Rates

December 31, 2010

Contribution Rates as a Percent of Covered Payroll

System	Contribution Rates as a Percent of Covered Payroll		
	Member	Employer	Other
Noncontributory	—	13.37-16.32%	—

Noncontributory	—	26.13-36.31	—
Contributory	10.50-12.29	14.86-23.22	—
Firefighters:			
Division A	15.05	1.72	11.87%
Division B	16.18	0.00	11.87
Judges:			
Noncontributory	—	23.72	14.08
Governors and Legislators	—	—	—

Contributions made by employers and members were in accordance with actuarially computed funding requirements. Fire insurance premium taxes and court fees are considered as part of employer contributions in the schedule shown on the top of page 68 for the Firefighters and Judges Systems, respectively. These contribution rates also include rates for a 3% benefit enhancement which is funded by the State. For contribution rate purposes the actuary evaluates the assets of the Systems based on a five-year smoothed expected return wherein 20% of a year's excess or shortfall of expected return is recognized each year for five years.

The actuary recommended some increases in contribution rates which became effective July 1, 2010.

Information with regard to contributions to the Retirement Systems for the year ended December 31, 2010, is indicated in the schedule on page 78.

Member contributions in the 401(k), 457, Roth and Traditional IRA Plans, total \$263,209,000 which in combination with the member contributions made in the Retirement Systems total \$322,861,000.

There are no funding requirements in the 401(k), 457, Roth and Traditional IRA Plans, and HRA other than deposit of employee contributions or contributions for the employee by the employer.

Public Safety Retirement System	1/01/10	2,137,027	2,650,675	513,648	80.6	373,959	137.4
Firefighters Retirement System	1/01/10	802,576	833,844	31,268	96.3	107,625	29.1
Judges Retirement System	1/01/10	131,491	158,303	26,812	83.1	14,434	185.8
Utah Governors and Legislative Retirement Plan	1/01/10	10,769	11,305	536	95.3	910	58.9

Actuarial valuations of the ongoing plan involve estimates of the value reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Amounts determined regarding the funded statute and the annual required contributions are subject to continual revision as actual results are compared with past expectations and new estimates are made about the

future. The Schedules of Funding Progress present multi-year trend information about whether the actuarial value of plan assets are increasing or decreasing over time relative to the actuarial accrued liabilities for benefits. These schedules are presented in the Required Supplementary Information section.

Summary of Actuarial Assumptions as of the latest actuarial valuation follows.

Amortization period	Open Group 24 Year Closed Period	Open Group 24 Year Closed Period	Open Group 24 Year Closed Period	Open Group 24 Year Closed Period	Open Group 24 Year Closed Period	Open Group 24 Year Closed Period
Actuarial asset valuation method (All Systems under same method.)	Based on the total fair value income of investments with the excess or shortfall of actual investment income over or under the expected investment return smoothed over five years. One-fifth of the excess or shortfall is recognized each year for five years.					
Actuarial assumptions:						
Investment rate of return	7.75%	7.75%	7.75%	7.75%	7.75%	7.75%
Projected salary increases	4.00-12.00%	4.00-12.00%	4.00-9.75%	4.00-10.25%	4.0%	None
Inflation rate	3.00%	3.00%	3.00%	3.00%	3.00%	3.00%
Post retirement cost-of-living adjustment	3.00%	3.00%	2.50% or 3.00% Depending on employer	3.00%	3.00%	3.00%

Note: All post retirement cost-of-living adjustments are noncompounding and are based on the original benefit except for Judges, which is a compounding benefit. The cost-of-living adjustments are also limited to the actual CPI increase for the year, although unused CPI increases not met may be carried forward to subsequent years.

Notes to the Basic Financial Statements *(Continued)*

December 31, 2010

Note 8

Transfers To of From Affiliated System

Asset transfers to or from affiliated systems are for the purpose of spreading employer contribution costs across same employer and same class of employee group and to record transfers of benefits and corresponding assets where employees transfer from one system to another. Benefit transfers usually are between contributory and noncontributory systems as allowed during authorized transfer windows established by statute or as otherwise authorized.

Note 9

Supplemental Benefits

In the past, the Utah State legislature appropriated funds as supplemental retirement benefits to be paid to qualified participants who have previously retired under the Contributory System. These benefits, already granted, are now and will continue to be funded through contribution rates unless otherwise provided by the legislature.

Note 10

Litigation

The Systems are involved in various claims and legal actions arising in the ordinary course of business in the opinion of management and legal counsel, the ultimate disposition of these matters will not have a material adverse effect on the Systems' financial position as a whole.

Note 11

Commitments

At December 31, 2010, the Systems had committed to fund certain private equity partnerships and real estate projects for an amount of \$6,654,473,000. Funding of \$4,553,064,000 had been provided by December 31, 2010, leaving an unfunded commitment as of December 31, 2010, of \$2,101,409,000 which will be funded over the next five years.

Notes to the Basic Financial Statements *(Continued)*

December 31, 2010

Note 12 Pension Plan Participation

Defined Benefit Plans

Utah Retirement Systems contributes to the State and School Noncontributory Retirement System, a cost-sharing multiple-employer defined benefit pension plan administered by Utah Retirement Systems (Systems). Utah Retirement Systems provides refunds, retirement benefits, annual cost-of-living adjustments and death benefits to plan members and beneficiaries in accordance with retirement statutes.

The Systems are established and governed by the respective sections of Chapter 49 of the Utah Code Annotated 1953 as amended. The Utah State Retirement Act in Chapter 49 provides for the administration of the Utah Retirement Systems and Plans under the direction of the Utah State Retirement Board (Board) whose members are appointed by the Governor. The Systems issue a publicly available financial report that includes financial statements and required supplementary information for the State and School Noncontributory Retirement System. A copy of the report may be obtained by writing to the Utah Retirement Systems, 540 East 200 South, Salt Lake City, UT 84102-2044 or by calling 1-800-365-8772.

Funding Policy: In the State and School Noncontributory Retirement System, the Utah Retirement Systems is required to contribute 16.32% of its annual covered salary. The contribution rates are the actuarial determined rates. The contributions were equal to the requirements of the Systems, are authorized by statute, and specified by the Board.

The Utah Retirement Systems' contributions to the State and School Noncontributory Retirement System for the years ending December 31, 2010, 2009, and 2008 were \$1,659,298, \$1,543,302, and \$1,426,976 respectively. The contributions were equal to the required contributions for each year.

Defined Contribution Plans

Utah Retirement Systems also participates in four defined contribution plans, the 401(k), 457, Roth and Traditional IRA Plans.

401(k) PLAN — The Utah Retirement Systems offers its employees a 401(k) plan to supplement retirement benefits accrued by participants in the Systems. Employees covered by the State and School Noncontributory Retirement System have a contribution of 1.5% of covered salaries automatically made by Utah Retirement Systems. Employees participating in the Systems can make additional contributions through payroll deduction to the 401(k) plan up to specified limits. Contributions and earnings may be withdrawn by the employee upon termination or may be used as supplemental income upon retirement. The employer 401(k) contributions for the years ended December 31, 2010, 2009, 2008 are \$382,286, \$390,188, and \$364,663 respectively; the employee contributions for the years ending December 31, 2010, 2009, 2008 are: \$459,476, \$486,056, and \$506,224 respectively. The 401(k) plan funds are fully vested to the participants at the time of deposit. Plan assets are administered and held by Utah Retirement Systems.

457 PLAN — The Utah Retirement Systems also offers its employees a deferred compensation plan created in accordance with Internal Revenue Code Section 457. The plan, available to all employees, permits them to defer a portion of their salary until future years. Employees are eligible to voluntarily participate from the date of employment and are vested immediately upon participating. Employee contributions to the Section 457 plan for the years ended December 31, 2010, 2009, 2008 are: \$251,940, \$260,055, and \$272,704 respectively.

ROTH AND TRADITIONAL IRAS — Utah Retirement Systems offers its employees two tax-advantaged savings plans authorized by section 408 of the Internal Revenue Code. Employees are eligible to participate from the date of employment and are vested immediately upon participating. For the years ended 2010, 2009 and 2008 the Roth IRA employee contributions were \$69,720, \$58,719, and \$65,490 respectively. For the years ended 2010, 2009 and 2008 the traditional IRA employee contributions were \$400, \$400, and \$1,564 respectively.

Notes to the Basic Financial Statements *(Continued)*

December 31, 2010

Note 13 Post Employment Healthcare Plan

Plan Description

The Utah Retirement Office contributes to a noncontributory defined benefit post employment healthcare plan to provide postemployment insurance benefits for retired employees of the Utah Retirement Office. This plan was established in 2005. The Utah Retirement Employees Post Employment Healthcare Plan, (UREPEHP), is an agent multiple employer post employment healthcare plan administered by The Utah Retirement Office.

Assets and liabilities of the plan are identified separately for each employer. Plan assets may be used only for the payment of benefits to the members of that system, in accordance with the terms of the plan. UREPEHP issues a publicly available financial report that includes financial statements and required supplementary information for UREPEHP. A copy of the report may be obtained by writing the Utah Retirement Office, 540 East 200 South, Salt Lake City, UT 84102-2044 or by calling 1-800-365-8772.

Funding Policy

The contribution requirements of Utah Retirement Employees Post Employment Healthcare Plan are determined by the Plan and approved by the Board. Utah Retirement Office is required to contribute the annual required contribution (ARC), an actuarially determined rate in accordance with the parameters of GASB Statement 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal costs each year and amortize any unfunded actuarial liabilities (or funding excess) over an open twenty year period using the level dollar amount. The current dollar amount is \$313,000.

Annual Costs

For the calendar year ending December 31, 2010, the annual cost (expense) of \$313,000 for UREPEHP was equal to the ARC. The net Other Post Employment Benefits (OPEB) obligation for 2010 was as follows:

Year Ended	Annual Required Contributions	Percentage Contributed	Net OPEB Obligation
12/31/05	\$220,000	100%	\$0
12/31/06	294,000	100	0
12/31/07	387,000	100	0
12/31/08	219,000	100	0
12/31/09	220,000	100	0
12/31/10	313,000	100	0

Funded Status and Funding Progress

The funded status of the plan as of January 1, 2010, the date of the most recent actuarial valuation, was as follows:

Actuarial accrued liability (AAL).....	\$7,008
Actuarial value of plan assets	4,206
<hr/>	
Unfunded actuarial accrued liability (UAAL).....	\$2,802
<hr/>	
Funded ratio (actuarial value of plan assets/AAL)	60%
Covered salaries and wages	
(active) (plan members)	\$8,673
UAAL as a percentage of covered salaries and wages.....	32%

Actuarial valuations of the ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Amounts determined regarding the funded status and the annual required contributions are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The schedule of funding progress below, presented as required supplementary information, shows the actuarial value of plan assets compared to the actuarial accrued liabilities for benefits.

Notes to the Basic Financial Statements (Continued)

December 31, 2010

Actuarial Methods and Assumptions

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and plan members) and include the types of benefits provided at the time of each valuation. The actuarial methods and assumptions used include techniques that are designed to reduce short term volatility in actuarial accrued liabilities consistent with the long term perspective of the calculations.

In the January 1, 2009, actuarial valuation, the entry age actuarial cost method was used. The actuarial assumptions included a 7.75 percent investment rate of return (net of administrative expenses) and an annual healthcare cost trend rate of 9.0 percent, reduced by decrements to an ultimate rate of 4.5 percent after 10 years. Both rates include a 3.0 percent inflation assumption. The actuarial value of UREPEHP assets is based on smoothed expected income investment rate. Investment income in excess or shortfall of the expected rate on air value is smoothed over a five-year period with 20% of

a year's excess of shortfall being recognized each year beginning with the current year. The actuarial accrued liability was computed using likely health benefits to be paid to retirees and to be paid active employees after their service that were discounted using the investment return, health cost increase and various mortality assumptions.

Schedule of Funding Progress

Division	Date*	(dollars in thousands) Based on fair value of assets					
		(1) Actuarial Value of Assets	(2) Accrued Liability (AAL) Entry Age	(3) Unfunded AAL (UAAL) (2) - (1)	(4) Funding Ratios Ratios (1) / (2)	(5) Annual Covered Payroll	(6) UAAL as a % of Covered Payroll (3)/(5)

Notes to the Basic Financial Statements *(Continued)*

December 31, 2010

Note 14

Compensated Absences, Post Employment Benefits and Insurance Reserve

The compensated absences liability for Utah Retirement Office employees at December 31, 2010, is \$3,610,000. This represents the amount of unused leave to be paid to employees upon termination. At December 31, 2010 the insurance reserve was \$5,000,000. The insurance reserve coverage is explained in Note 16, Risk Management.

Note 15

Required Supplementary Information

The historical trend information designed to provide Information about the Utah Retirement Systems' progress made in accumulating sufficient assets to pay benefits when due is required supplementary information. Required supplementary information is included immediately following the notes to the financial statements on pages 76 through 78. Other supplementary information presented in succeeding sections of this report is for the benefit of statement users and is not a required part of the basic financial statements.

Note 16

Risk Management

Most risks of loss to which the Systems, Plans and Investment Fund are exposed, other than routine investment losses, are covered under commercial insurance policies. Risks in excess of coverage limits or large deductible, and otherwise uninsured losses, are retained by the Systems, Plans or Investment Fund through the insurance reserve. There have been no reductions of insurance coverage from coverages of the previous year in any of the categories of risk. Coverages are increased or decreased commensurate with real estate acquisitions or dispositions. During the past three calendar years, no loss settlements exceeded insurance coverages beyond immaterial deductible amounts. The insurance reserve was established by the board from investment earnings as authorized by statute.

Notes to the Basic Financial Statements (Continued)

December 31, 2010

Note 17

Real Estate Liabilities

The real estate liabilities consist of five credit facility (lines of credit) loans, eight private placement notes and two mortgage loans. These loans and notes bear various interest rates and are scheduled to be repaid over the next seven years. The mortgages are secured by real estate. The rest of the liabilities are unsecured. As mentioned in Note 3, page 61, the Systems and Plans entered into various interest rate swap agreements that effec-

tively changed credit facility liabilities from variable interest rates to fixed interest rates. As of December 31, 2010, there are \$895 million in credit facility debt, \$68.5 million in private placement notes, and \$22.1 million in mortgages. Using interest rates as of December 31, 2010, principal and interest requirements of the debt and net swap payments for the terms of the debt and swaps are shown below.

Real Estate Liabilities	(in thousands)

Utah Retirement Systems

Notes to the Required Supplementary Information

December 31, 2010

Note 1**Schedules of Funding Progress**

The information contained in the schedule of funding progress is based on the actuarial study dated January 1, 2010, and calendar year 2010 activity. The actuarial accrued liability is presented based on the report generated by that study conducted by Gabriel, Roeder, Smith & Company. The actuarial value of assets for that date is based on a smoothed expected investment income rate. Beginning with the 2008 actuarial study, the investment rate of return assumption was changed from 8% to 7.75%. Investment income in excess or shortfall of the expected return on fair value is smoothed over a five-year period with 20% of a year's excess or shortfall being recognized each year beginning with the current year. The calculations for this smoothing process are disclosed in note 5 of the notes to the basic financial statements on page 65.

Note 2**Schedules of Employer Contributions**

The required employer contributions and percent of those contributions actually made are presented in the schedule.

Note 3**Actuarial Assumptions**

The information presented in the required supplementary schedules was determined as part of the actuarial valuations at the dates indicated. Additional information as of the latest actuarial valuations follows.

Additional Actuarial Information

	Noncontributory	Contributory	Public Safety	Firefighters	Judges	Governors and Legislators
Valuation date	1/1/10	1/1/10	1/1/10	1/1/10	1/1/10	1/1/10
Actuarial cost method	Entry Age	Entry Age	Entry Age	Entry Age	Entry Age	Entry Age
Amortization method	Level Percent of Payroll	Level Percent of Payroll	Level Percent of Payroll	Level Percent of Payroll	Level Percent of Payroll	Level Dollar Amount
Amortization period	Open Group 24 Year Closed Period	Open Group 24 Year Closed Period	Open Group 24 Year Closed Period	Open Group 24 Year Closed Period	Open Group 24 Year Closed Period	Open Group 24 Year Closed Period
Actuarial asset valuation method (All Systems under same method.)	Based on the total fair value income of investments with the excess or shortfall of actual investment income over or under the expected investment return smoothed over five years. One-fifth of the excess or shortfall is recognized each year for five years.					
Actuarial assumptions:						
Investment rate of return	7.75%	7.75%	7.75%	7.75%	7.75%	7.75%
Projected salary increases	4.00-12.00%	4.00-12.00%	4.00-9.75%	4.00-10.25%	4.0%	None
Inflation rate	3.00%	3.00%	3.00%	3.00%	3.00%	3.00%
Post retirement cost-of-living adjustment	3.00%	3.00%	2.50 or 3.00% Depending on employer	3.00%	3.00%	3.00%

Note: All post retirement cost-of-living adjustments are noncompounding and are based on the original benefit except for Judges, which is a compounding benefit. The cost-of-living adjustments are also limited to the actual CPI increase for the year, although unused CPI increases not met may be carried forward to subsequent years.

ROBERT V. NEWMAN
EXECUTIVE DIRECTOR

April 12, 2011

Utah State Retirement Board
540 East 200 South
Salt Lake City, UT 84102-2044

Dear Members of the Utah Retirement Systems:

The 2010 economy was expected to slow the second half of the year, due to the fading fiscal and monetary stimulus and the peaking of the inventory cycle. However, the economy produced a strong fourth quarter of 3.2%. This was mainly due to the passage of the tax compromise (which may have borrowed from future growth years), the pickup in personal consumption, the growth in exports, and the decline in imports.

The passage of the tax compromise extending the Bush tax cuts along with the payroll tax cut added additional stimulus to the economy. Consumption grew by 4.4% during the fourth quarter on the back of a 21.6% increase in durable goods spending. Exports increased 8.5% and imports decreased by 13.6%. For the year, the economy grew 2.9% as contrasted to a decline of 2.6% for 2009.

Although this is good news, the specters of a weak housing market, high unemployment of about 9.5%, and a weak dollar cast some uncertainty as to the sustainability of the recovery going forward. Banks need to extend

more credit in order to strengthen the housing market and the economy needs to generate approximately 100,000 net new jobs each month to accommodate the growth in the labor force and to impact the unemployment rate. However, for now, the Institute of Supply Management's index of manufacturing activity has remained solidly above 50, which indicates expansion versus contraction (a number below 50). Economic credit spreads also remain quiet with the Baa to AAA bond spreads still hovering at about 1%. A spread increasing denotes recessionary activity, whereas a decrease denotes economic expansion. There also appears to be no significant inflation expectations in the near term. Is this the calm before the storm or are we beginning a new round of solid economic activity? Only time will tell.

Domestic equity markets turned in a second year of positive performance with the S&P 500 returning 15.06% versus last year's number of 26.47%. The international market as measured by the Europe Australia Asia Far East index ("EAFE") fared worse returning 7.75% versus 31.78% for the previous year. Emerging Markets as measured by the Morgan Stanley Capital International ("MSCI") Emerging Markets Free-Unhedged Index returned 19.2% versus an impressive 79% for the previous year. Bonds, as measured by the Barclays Global Aggregate, returned 6.54%. Private real estate bounced back from the previous year, returning 13.11% compared to a decline of a year ago of 16.86%, as measured by the National Council of Real Estate Investment Fiduciaries ("NCREIF") and public real estate, as measured by the National Association of Real Estate Investment Trusts ("NAREIT") also did well returning 27.95%, virtually the same as the previous year's 27.99%.

The Utah Retirement Systems ("Systems") primary objective is to protect as much as possible in down markets. Although the Systems will lose money in down

Defined Benefit Investments
Investment Highlights *(Continued)*

markets it expects to lose less than most of its peers because of how the portfolio is structured. By losing less money in down markets, the compounding effect going forward is much greater thus producing more wealth to the portfolio. However, positioning the portfolio to protect in down markets will also cause the portfolio to underperform in up markets. The increased diversification lowers the return somewhat. We believe that is the best model to meet the obligations of the Systems and protect the participants' benefits.

The year 2010 was a very good year for The Utah Retirement Systems ("Systems"). The Systems posted a second positive double digit return. Our return of 13.73% exceeded our benchmark return for the portfolio of 13.54%. The Systems' one-year return of 13.73% was better than last year's return of 12.88%. The three-year rate of return was 0% compared to last year's three-year rate of return of a negative 1.98%. The five-year return of 4.16% improved from the 3.41% reported for the previous year and the ten-year return of 5.35% increased as compared to last year's 4.24% number.

We continue to recover. Our asset allocation is diversified and solid and should meet our obligations in the long run. The System's funded ratio of about 82% continues to improve and still ranks as a top quartile public pension fund in the United States.

Bruce H. Cundick

Outline of Investment Policies

The governing body of the Utah Retirement Systems (Systems) is the seven member Utah State Retirement Board (Board). The Board is composed of the Utah State Treasurer, who serves as an ex-officio member, and six trustees who are appointed by the Governor. Four board members are appointed for their investment expertise, and two members are appointed to represent employee and employer interests.

The Board has statutory authority to pool pension assets in the Utah Retirement Investment Fund (Fund). Statutes also establish that this Fund shall be invested in accordance with the “prudent person rule”. The prudent person rule requires all members of the Board and investment staff to discharge their duties solely in the interest of Systems’ participants and beneficiaries and with the care, skill, prudence and diligence which they would

exercise in the conduct of their own affairs. To this end a Statement of Investment Policy and Performance Objectives has been created for the Fund and adopted by the Board. The purpose of this Statement is to:

- Outline the expected return and risk profile for the Fund;
- Establish the target asset allocation mix and acceptable rebalancing ranges;
- Describe plan and manager policies and objectives for performance evaluation;
- Communicate investment performance standards to investment managers.

The primary investment objectives are to preserve Fund assets and generate an appropriate level of risk-adjusted return to meet future pension obligations. The Systems periodically complete an asset allocation and

liability study to determine the optimal portfolio diversification to meet those obligations.

The Systems’ investment portfolio includes strategic, long term commitments in the following asset classes: Domestic Equities, Domestic Debt Securities, International Equities, International Debt Securities, Real Estate, Private Equity, and Absolute Return. Asset allocation is reviewed in conjunction with the plan liabilities at least every five years.

The Board’s policy is to establish a long-term strategic asset allocation that manages overall expected portfolio risk (volatility) and maximizes expected return without unduly constraining the discretionary, tactical decision-making process of the investment managers.

To implement the asset allocation plan, the Executive Director, supported by the Board, staff and consultant, selects appropriate money management experts to invest

the Fund assets. This selection process includes the creation of specific search criteria, completion and documentation of analysis and due diligence on potential candidates, and interviews completed by the staff and/or Board. It is not the staff or Board’s intention to be involved with the day-to-day decisions made by external investment managers. Internal investment staff also manage segments of the portfolio.

All managers must acknowledge a co-fiduciary status to the Fund. All managers are expected to communicate with the staff at least quarterly.

Managers’ portfolios are evaluated both against appropriate market indices and similar manager style groups. The investment policy outlines appropriate benchmarks.

Investment return calculations are prepared using a time-weighted rate of return.

(1) *Smoothed Expected Rate of Return* consists of investment income in excess or shortfall of the expected 7.75% on fair value smoothed over a five-year period with 20% of a year's excess or shortfall being recognized each year beginning with the current year.

(2) *Fair Value Rate of Return* consists of cash income plus gains and losses due to changes in fair value, whether realized or unrealized (before deduction of investment fees). (For 2010, 13.54% net of fees.)

(3) *Actuarial Assumed Interest Rate* is the assumed rate of return on the fair value of assets, and is used in establishing retirement contribution rates and in determining current benefit reserve requirements.

Utah Retirement Systems uses a commission recapture program as part of its trading strategies. During the year ending December 31, 2010, Utah Retirement Systems recaptured approximately \$459,000 from the gross commission charges. This sum was used to fund almost \$400,000 in investment expenses that otherwise would have been paid for with investment funds.

Defined Contribution Investment Plans

Investment Highlights

Utah Retirement Systems' 401(k), 457, Roth and Traditional IRA Plans are tax-advantaged retirement savings programs authorized under sections 401(k), 457(b) and 408 of the Internal Revenue Code. These plans are available to employees of the state, local government and public education employers throughout Utah.

The participants of the plans have a choice of eleven core investment funds and a brokerage window in which their monies may be invested. Each participant may choose one or a combination of the core funds. The nearby table shows the total investments in the various investment options. The asset graph above it shows the asset distribution at December 31, 2010.

Investment and Administrative Expenses

There are no front-end load, redemption, or other hidden fees associated with these plans. All costs reflected in the table below are deducted from earnings prior to posting to participant accounts and do not appear as separate items on participant statements.

The administrative fee for the brokerage window account is a flat rate of \$25 per quarter. Investment fees and broker commissions are paid by the participant according to the trading and securities selected within the brokerage window.

By administering the defined contribution plans internally rather than through a third party, expenses are kept at very low levels to maximize earnings to each participant. The table on page 112 shows these expenses to be nominal when compared to much higher fees on most annuities, mutual funds and insurance contracts.

An annual account maintenance fee of \$15 is assessed to inactive accounts with combined 401(k), 457,

Defined Contribution Plans Investments

Investment Highlights *(Continued)*

Roth and Traditional IRA Plan balances of less than \$5,000. There may also be special service fees for loans and short term trading.

The investments described are not FDIC insured; not deposits or obligations of, or guaranteed by, any financial institution; and not guaranteed by the Utah Retirement Systems or any government agency.

The past performance of any of these funds does not guarantee future results.

Utah Retirement Systems' employees are not registered securities advisors. They cannot offer investment advice or make recommendations. Because the participants make the investment decisions about their accounts, the plans' sponsor, trustees, and others associated with the investments may be relieved of liability for investment performance.

Utah State Retirement Board
540 East 200 South
Salt Lake City, UT 84102

Dear Members of the Board:

Subject:
Certification of 2010 Actuarial Valuation

This report describes the current actuarial condition of the Utah Retirement Systems (URS), determines the calculated employer contribution rates, and analyzes changes in these contribution rates. Valuations are prepared annually, as of January 1, the first day of the URS plan year.

Under URS statutes, the Board of Trustees must certify employer contribution rates annually. These rates are determined actuarially, based on the Board's funding policy, although, as discussed below, under certain circumstances the Board may choose not to reduce the current rate if it is greater than the actuarially calculated rate. Contribution rates determined by a given actuarial valuation become effective eighteen months after the valuation date. I.e., the rates determined by this January 1, 2010 actuarial valuation will be used by the Board when certifying the employer contribution rates for the year beginning July 1, 2011 and ending June 30, 2012. If new legislation is enacted between the valuation date and the date the contribution rates become effective, the Board may adjust the calculated rates before certifying them, in order to reflect this new legislation. Such adjustments are based on information supplied by the actuary.

Financing objectives and funding policy

In setting contribution rates, the Board's principal objectives are:

- To set rates so that the unfunded actuarial accrued liability (UAAL) will be amortized over a reasonable period from the current valuation date
- To set rates so that they remain relatively level over time.

To accomplish this, the Board's funding policy requires that the employer contribution rate be at least equal to the sum of the employer normal cost rate (which pays the current year's cost) and an amortization rate which results in the amortization of the UAAL over 25 years in installments that increase at the assumed rate of growth in payroll for URS, currently 4.00%. The 25-year amortization period is measured from January 1, 2009, so 24 years remain at the current valuation date.

Under this policy, the objective of maintaining a relatively level contribution rate over time is achieved in normal conditions such as consistent financial markets.

Section 49-11-301(5) to the Utah Code allows the Board to set the employer contribution rate at the prior year's rate, if the rate otherwise would decrease and if the funded ratio is less than 110%. In such a case, the rate set by the Board would be higher than the actuarially determined contribution rate. The purpose of this legislation is to enhance the Board's ability to maintain more-level contribution rates while targeting a 100% - 110% funded level. The Board has historically followed this policy, so for some funds the recommended contribution rate may be greater than the actuarially determined rate. However, for almost all funds, the actuarially-determined contribution rates were larger than the rates being paid in FY 2011.

Actuary's Certification Letter

(Continued)

Progress toward realization of financing objectives

The funded ratio (the ratio of the actuarial value of assets to the actuarial accrued liability) is a standard measure of a plan's funded status. In the absence of benefit improvements, it should increase over time, until it reaches at least 100%.

For all systems on a combined basis, the funded ratio decreased from 86.6% to 85.7%. This decrease was primarily due to the recognition of an additional 20% of the extraordinary investment loss that occurred in 2008. (The actuarial value of assets spreads the recognition of asset losses over five years.) Absent favorable experience, we expect the funded ratio will continue to decrease for the next three years as the rest of the 2008 investment loss is recognized in the development of the actuarial value of assets.

If market value had been used in the calculation instead of actuarial value, the aggregate funded ratio for all funds combined would have been 73.0%, compared to 69.3% in the prior year. The increase in funded ratio on a market value basis is due to favorable experience with both the assets and liabilities. In particular, the investment return during 2009 on a market value basis was 13.2%, which provided \$856 million more in assets than was expected.

Benefit provisions

The benefit provisions reflected in this valuation are those which were in effect on January 1, 2010, or which were adopted by the end of the 2010 legislative session and are effective on or before July 1, 2011. No changes were reflected from the prior valuation, except for the election of the optional 4.00% COLA by some public safety units and the removal of the benefit maximums for Public Safety, Firefighters and Judges.

SB19 was passed during the 2008 legislative session. This law opened a window to allow employers of the Public Safety Retirement Systems to adopt a 4% maximum COLA in lieu of the current 2.5% maximum COLA. Adoption of the 4% maximum COLA was mandatory for the State of Utah. This window for making the election will close in December 2012. This legislation was reflected in

the valuation only for those units that made the election by December 31, 2009. Supplemental information will be provided to URS so that URS can adjust the contribution rates for employers electing the 4% COLA during 2010 or later.

The New Public Employees' Tier II Contributory Retirement Act (SB 63) was passed during the 2010 legislative session. This law will close the current retirement systems (except for the Judges Retirement System) to new members effective June 30, 2011. It creates a new retirement benefit structure (Tier II) for all employees hired after that date. Employers will continue to contribute the amortization rate to the current systems on the pay for Tier II members. Therefore, SB 63 did not affect the benefits provided to current URS members, and it creates a mechanism for ensuring that the UAAL is amortized over the payroll for both current and Tier II members. Therefore, this law had no effect on this actuarial valuation.

Under Governmental Accounting Standards Board Statement No. 25 (GASB 25), when a plan is closed to new members, the amortization charge should be determined based on the closed group's pay or as fixed dollar payments, rather than as payments which are level as a percentage of increasing payroll. However, because the plan will continue to receive amortization payments from the employers of Tier II members, i.e., based on the payroll for an open group of current and future employees, not the closed group of current members, we believe it is appropriate to continue to use a lever-payroll amortization of the UAAL.

In addition, SB 43 was enacted in 2010. This bill changed the eligibility and benefits for retirees who return to work. We believe this legislation will, by changing future retirement patterns, reduce the cost of the retirement plans in the future. However, the effects of this part of the legislation were not measurable in this valuation, and thus had no impact on the calculated liabilities and contribution rates. SB 43 also removed, for retirements on or after July 1, 2010, the maximum benefit caps for the retirement formulas of Public Safety, Firefighters and Judges, which is reflected herein.

No other legislation has been enacted since the last valuation that materially affects the benefits or contributions of URS.

Actuary's Certification Letter

(Continued)

Assumptions and methods

The current actuarial assumptions and methods are the same as used for the prior valuation.

The Board, in consultation with the actuary, sets the actuarial assumptions and methods used in the valuation. Current Board policy is to have the actuary perform an experience study every three years. In connection with the appropriate valuation, the actuary conducts a thorough review of plan experience for the preceding five years, and then makes recommendations to the Board. The last experience study was prepared in 2008, and the recommended assumptions and methods were adopted effective January 1, 2008. The next experience analysis is scheduled for 2011, in conjunction with next year's actuarial valuation.

The results of the actuarial valuation are dependent on the actuarial assumptions used. Actual results can and almost certainly will differ, as actual experience deviates from the assumptions. Even seemingly minor changes in the assumptions can materially change the liabilities and calculated contribution rates.

It is our opinion that the recommended assumptions are internally consistent and are reasonably based on past and anticipated future experience of the System. The actuarial assumptions and methods used in this report comply with the parameters for disclosure that appear in GASB 25.

Data

Member data for retired, active and inactive members was supplied as of December 31, 2009 by the URS staff. We did not audit this data, but we

did apply a number of tests to the data, and we concluded that it was reasonable and consistent with the prior year's data. The staff also supplied asset information as of December 31, 2009.

Certification

We certify that the information presented herein is accurate and fairly portrays the actuarial position of URS as of January 1, 2010. We prepared the accompanying Summary of Actuarial Assumptions and Methods, but the URS staff prepared the other supporting schedules in this section and the trend tables in the financial section based on information supplied in our report. The staff rolls forward to December 31 the actuarial liabilities supplied in our report as of January 1, and the staff computes the actuarial value of assets as of December 31. These procedures have been reviewed by us and found reasonable.

All of our work conforms with generally accepted actuarial principles and practices, and with the Actuarial Standards of Practice issued by the Actuarial Standards Board. In our opinion, our calculations also comply with the requirements of Utah state law and, where applicable, the Internal Revenue Code, ERISA, and the Statements of the Governmental Accounting Standards Board.

The undersigned are independent actuaries and consultants. Mr. White and Mr. Conradi are Enrolled Actuaries and Members of the American Academy of Actuaries and meet the Qualification Standards of the American Academy of Actuaries. All three consultants below are experienced in performing valuations for large public retirement systems.

Sincerely,
Gabriel Roeder Smith & Company

Summary of Actuarial Assumptions and Methods

As of January 1, 2010

- a) The actuarial valuation was prepared using the entry age actuarial cost method. As described in the certification letter, the contribution rates are set based on the board's funding policy, which states the contribution rate will not be less than the amount needed to amortize the unfunded actuarial accrued liability of each System over a 24-year period from the valuation date (January 1, 2010).

In calculating this minimum, amortization payments are designed to remain level as a percent of payroll, and payroll is assumed to increase 4% per year. Under this method, actuarial gains and losses are identified and amortized as part of the unfunded actuarial accrued liability over a 24-year period

- b) The future investment earnings of the assets of the Systems are assumed to accrue at an annual rate of 7.75%, compounded annually. This rate is made up of a 3.0% assumed inflation rate and a 4.75% assumed real rate of return. This assumption was adopted January 1, 2008.
- c) The total rates of assumed annual salary increase are shown on the actuarial schedule on page 123. The rates include increases due to promotion and longevity and a 4.00% per annum rate of increase in the general wage level of the membership. Salaries of judges are assumed to increase at 4.00%. Except for judges, these assumptions were adopted January 1, 2008. (Rates for judges were adopted January 1, 2005.)
- d) Post retirement benefit increases are based on the Consumer Price Index, limited by the provisions of each System. For members of the Public Safety Retirement System, annual increases are assumed to be 2.5% or 3.0%. All other Systems' annual increases are assumed to be 3.0%. Increases are based on the member's original retirement allowance except in the Judges Retirement System where increases are compounded. For current retirees who have received cumulative COLAs less than the total of annual CPI increases since retirement, higher COLAs are assumed, subject to the annual maximum (2.5% or 4% for Public Safety and 4% for all other Systems), as long as the member has "banked" CPI increases left.
- e) Except for educators, tables of mortality rates for members retired for service and beneficiaries were developed from standard mortality tables. The mortality basis is dependent upon the member's class and gender as shown on page 122. Most of these rates were adopted January 1, 2008. Rates for female educators were adopted January 1, 2005. Mortality rates for active members and retired educators were developed from actual experience of that group.

Summary of Actuarial Assumptions and Methods *(Continued)*

As of January 1, 2010

f) Mortality among disabled members is based on a special 1981 Disability Table developed by a previous actuary from the Systems' experience. Rates for males and females are multiplied by 85%. These rates were adopted January 1, 2008.

g) Other demographic assumptions regarding retirement, mortality, disablement and termination from employment are illustrated in the following actuarial schedules.

The retirement assumptions illustrated are for members of the Systems who are eligible to retire with 30 years of service. The rates vary by age and service groupings.

Except for firefighters, rates of assumed termination from employment at any age are assumed to vary during the first five years of employment. The rates of termination illustrated are for members in their first or in their sixth or subsequent year of service; rates at intermediate points fall between the two sets illustrated. Rates for firefighters vary only by years of service and not by age. All rates have been shown for the firefighters. All terminating members who are not eligible for vested benefits are assumed to withdraw their contributions immediately. Vested members are assumed to withdraw their contributions and forfeit the right to further benefits at the rates illustrated.

h) The Retirement Board uses the expected rate of return method for calculating the actuarial value of assets. This method is based on the total earnings of the commingled investments and spreads the excess/shortfall of actual investment returns over or under the expected return over five years. One-fifth of the excess/shortfall is recognized each year. The actuarial values of assets under this method were calculated and reported to us by the Systems' staff.

i) All of the actuarial assumptions were renewed or adopted by the Retirement Board in 2008, as recommended by the actuary.

Summary of Plan Provisions

Noncontributory Retirement System

Membership Eligibility

The Public Employees Noncontributory Retirement System was established on July 1, 1986. All eligible employees of the State and School entities hired subsequent to that date are automatically members of the Noncontributory System. Local government entities had the option of adopting the new System or remaining with the Contributory System. An employee is qualified for membership in the Noncontributory System if his or her employer participates in the System and the employee works at least 20 hours per week and receives benefits normally provided by his or her employer as approved by the Retirement Board, teachers who teach half-time, and classified school employees who work an average of 20 hours or more per week, regardless of benefits provided.

Vesting

Retirement benefit becomes vested upon the member's completion of 4 years of qualifying service.

Service Retirement

Age	Years of Service	Allowance Reduction†
Any age	30	None
Any age	25	Full actuarial before age 60
60-61	20	3% each year before age 65
62-64	10	3% each year before age 65
65	4	None

† With fewer than 30 years of service from any combination of Utah Retirement Systems, retiring before age 65 will reduce the monthly benefit approximately 7% for every year under age 60 and 3% for each year between ages 60 and 65.

Service Benefit Formula

Number of years of service x 2.0% x FAS.*

* FAS (Final Average Salary) = highest three years' earnings converted to a monthly average. Yearly salary increases are limited to 10% plus a COLA determined by the CPI.

Cost-of-Living Allowance

Up to 4% annually on the original retirement benefit. Eligible after one year.

Death Benefits

An active member's death benefit consists of an insurance payment equal to 75% of the highest annual salary with a minimum of \$1,000 and a refund of transferred contributions plus interest, if applicable. The spouse of a deceased member is eligible for a monthly benefit if they have been married for at least six months and the member meets age and service qualifications or

has 15 or more years of service credit.

An inactive member's death benefit for someone with fewer than ten years of service consists of a refund of transferred contributions plus interest, if applicable. For those with ten or more years of service credited to their account prior to July 1, 1987 and who have not withdrawn their contributions, the benefit is the same as for active members.

A retired member's death benefit depends on the retirement option selected at retirement. No death benefit is available without a reduced retirement benefit.

Refunds

A terminated member who transferred from the Contributory Retirement System is eligible for a 100% refund of transferred member contributions plus interest. There is a 60-day refund processing period after the last day of paid employment.

Redeposits

A redeposit with interest may be made in monthly installments, by a lump-sum payment, or by direct transfer from a qualified plan. A redeposit must be completed prior to retirement. Service credit is restored when the redeposit is completed.

Contribution Rates (as of 12-31-2010)

Employer rate for State & School (Level A) is 16.32% of covered salary and 13.37% for Local Government (Level B).

Interest

Up to 7.75% on member accounts transferred from the Contributory Retirement System.

Summary of Plan Provisions (Continued)

Contributory Retirement System

Membership Eligibility

The Public Employees Contributory Retirement System includes eligible public employees of the State of Utah and its political subdivisions including public education employees of those entities covered by the System. An employee is qualified for membership in the Contributory System if his or her employer participates in the System and the employee works at least 20 hours per week and receives benefits normally provided by his or her employer as approved by the Retirement Board, teachers who teach half-time, and classified school employees who work an average of 20 hours per week or more regardless of benefits provided.

Vesting

Retirement benefit becomes vested upon the member's completion of 4 years of qualifying service. Eligible member contributions and interest thereon vest immediately.

Service Retirement

Age	Years of Service	Allowance Reduction†
Any age	30	None
60-61	20	3% each year before age 65
62-64	10	3% each year before age 65
65	4	None

†With fewer than 30 years of service from any combination of Utah Retirement Systems, retiring before age 65 will reduce the monthly benefit by 3% for each year between ages 60 and 65.

Service Benefit Formula

- 1) Number of years of service before 7-1-75 x 1.25% x FAS.*
- 2) Number of years of service after 6-30-75 x 2.0% x FAS.*
- 3) Plan 1 allowance = total of 1 and 2.

*FAS (Final Average Salary) = highest five years' earnings converted to a monthly average. Yearly salary increases are limited to 10% plus a COLA determined by the CPI.

Cost-of-Living Allowance

Up to 4% annually on the original retirement benefit. Eligible after one year.

Death Benefits

An active member's death benefit consists of an insurance payment equal to 75% of the highest annual salary with a minimum of \$1,000 and a refund of contributions plus interest. The spouse of a deceased member is eligible for a monthly benefit if they have been married

for at least six months and the member meets age and service qualifications, or has 25 years of service.

An inactive member's death benefit for someone with fewer than ten years of service consists of a refund of contributions plus interest. For those with ten or more years of service credited to their account prior to July 1, 1987 and who have not withdrawn their contributions, the benefit is the same as for active members.

A retired member's death benefit depends on the retirement option selected at retirement. No death benefit is available without a reduced retirement benefit.

Refunds

A terminated member is eligible for a 100% refund of member contributions plus interest. There is a 60-day refund processing period after the last day of paid employment.

Redeposits

A redeposit with interest may be made in monthly installments, by a lump-sum payment, or by direct transfer from a qualified plan. A redeposit must be completed prior to retirement. Service credit is restored when the redeposit is completed.

Contribution Rates (as of 12-31-2010)

Member contribution rate is 6.00%* of covered salary. Employer rate for State and School (Level A) is 11.83% of covered salary and 9.36% for Local Government (Level B).

*Employers have the option of paying all or part of member contributions on behalf of their employees.

Interest

Up to 7.75% on member accounts.

Summary of Plan Provisions (Continued)

Public Safety Retirement System

Membership Eligibility

The Public Safety Retirement System includes eligible state and local government employees directly involved in law enforcement. The Public Safety System consists of the Contributory and Noncontributory divisions. Employees are qualified for membership in the Public Safety System if: (1) they are regularly scheduled to work and be compensated for 2,080 hours a year in a recognized public safety department; (2) they have completed a certified training program; (3) their primary duty is as a peace officer, correctional officer or special function officer; and (4) in the course of employment their life or personal safety is at risk.

Vesting

Retirement benefit becomes vested upon the member's completion of 4 years of service credit. Eligible member contributions vest immediately.

Service Retirement

Age	Years of Service	Allowance Reduction
Any age	20	None
60	10	None
65	4	None

Service Benefit Formula

- 1) 2.5% x FAS* x years of service up to 20 years.
- 2) 2.0% x FAS* x years of service over 20 years.
- 3) Monthly benefit = total of 1 and 2.

*FAS (Final Average Salary) = highest three years' earnings converted to a monthly average. Yearly salary increases are limited to 10% plus a COLA determined by the CPI.

Cost-of-Living Allowance

Up to 2.5% annually on original retirement benefit. Employers have the option to provide an enhanced cost-of-living (COLA) benefit to their public safety retirees that will raise the maximum COLA from 2.5% to 4% based on the CPI. Eligible after one year.

Death Benefits

DIVISION A (with Social Security)

If death is in the line of duty, the benefit to the surviving spouse is \$1,000 plus a monthly benefit of 30% of the final average salary. In the noncontributory system only, if the member has 20 years of service credit, the spouse's benefit is the same as for a retired member. If death is not in the line of duty, the benefit is \$1,000 or a refund of contributions for members with fewer than 10 years of service. For more than 10 years of service, the benefit to the surviving spouse is \$500 plus a monthly benefit of 2% of the final average salary for each year of service to a maximum of 30% of the final average salary. If there is no spouse, the settlement is a 100% refund of vested contributions payable to the beneficiary, or \$500, whichever is greater. Dependent children receive no additional benefits. A retired member's death benefit to the surviving spouse is 65% of the monthly benefit unless the member selects a reduced monthly benefit at the time of retirement to provide a 75% spousal benefit.

Continued on page 138.

Summary of Plan Provisions *(Continued)*

Public Safety Retirement System Continued

DIVISION B (without Social Security)

If death is in the line of duty, the benefit to the surviving spouse is \$1,500 plus a monthly benefit of 37.5% of the final average salary. Each unmarried child under 18 or dependent unmarried mentally or physically disabled child receives \$50 per month if the member had two or more years of service. If death is not in the line of duty, the benefit is a refund of contributions plus 50% of the last 12 months of salary for members with fewer than two years of service. For members with more than two years of service, the benefit is the same as that for death in the line of duty. If there is no spouse, the settlement is a 100% refund of vested contributions payable to the beneficiary, or \$500, whichever is greater. A retired member's death benefit to a surviving spouse is 65% of the monthly benefit unless the member selects a reduced monthly benefit at the time of retirement to provide a 75% spousal benefit. An unmarried child under 18 or dependent unmarried mentally or physically disabled child receives \$50 per month.

Refunds

A terminated member is eligible for a 100% refund of member contributions. There is a 60-day refund processing period after the last day of paid employment.

Redeposits

A redeposit with interest may be made in monthly installments, by a lump-sum payment, or by direct transfer from a qualified plan. A redeposit must be completed prior to retirement. Service credit is restored when the redeposit is completed.

Contribution Rates (as of 12-31-2010)

NONCONTRIBUTORY OPTION

Employer rates for Division A are: State units 32.75%; Provo 32.98%; Bountiful 27.73%; other law enforcement units with a 2.5% COLA 26.13% and units with a 4.0% COLA 28.82% of salary. Employer rates for Division B are: Salt Lake City 36.31%; Ogden 34.93%; Logan 31.49%; other law enforcement units with a 2.5% COLA 28.24% and units with a 4.0% COLA 32.70% of covered salary.

CONTRIBUTORY OPTION

Member rates in Division A are: State units 12.29%; all other law enforcement units with a 2.5% COLA 12.29% and units with a 4.0% COLA 12.29% of covered salary. Member rates in Division B are: Logan 11.13% and other law enforcement units with a 2.5% COLA 10.50% and units with a 4.0% COLA 10.50% of salary.

Employer rates for Division A are: State units 21.68%; all other law enforcement units with a 2.5% COLA 14.86% and units with a 4.0% COLA 18.34% of covered salary. Employer rates for Division B are: Logan 20.95% and other law enforcement units with a 2.5% COLA 18.98% and units with a 4.0% COLA 23.22% of salary.

** Employers have the option of paying all or part of member contributions on behalf of their employees.*

Interest

Up to 7.75% on member accounts.

Summary of Plan Provisions (Continued)

Firefighters Retirement System

Membership Eligibility

The Firefighters Retirement System includes eligible state and local government employees directly involved in fire fighting and whose duties are classified as hazardous. If an employer does not classify the duties as hazardous, the employee will be enrolled in either the Public Employees Contributory or Noncontributory Retirement System. Employees are qualified for membership in the Firefighters System if they are regularly scheduled to work and be compensated for 2,080 hours a year in a regular constituted fire department and are regularly assigned to hazardous duty. Although volunteer firefighters who are on the rolls of a legally organized volunteer fire department do not contribute to the System and are not eligible for service retirement benefits, they or their beneficiaries receive benefits based on the salary of the lowest paid firefighters in a first-class city if they are disabled or killed in the line of duty.

Vesting

Retirement benefit becomes vested upon the member's completion of 4 years of service credit. Eligible member contributions vest immediately.

Service Retirement

Age	Years of Service	Allowance Reduction
Any age	20	None
60	10	None
65	4	None

Service Benefit Formula

- 1) 2.5% x FAS* x years of service up to 20 years.
- 2) 2.0% x FAS* x years of service over 20 years.
- 3) Monthly benefit = total of 1 and 2.

* FAS (Final Average Salary) = highest three years' earnings converted to a monthly average. Yearly salary increases are limited to 10% plus a COLA determined by the CPI.

Cost-of-Living Allowance

Up to 4.0% annually on original retirement benefit. Eligible after one year.

Disability Benefits

If disability is in the line of duty, the benefit is 50% of the final average salary with no minimum age or service requirements. If disability is not in the line of duty, the benefit is a refund of contributions for members with fewer than five years of service. For members with more than five years of service, the benefit is the same as that for disability incurred in the line of duty. Benefits are suspended while receiving Workers Compensation.

Death Benefits

DIVISION A (with Social Security)

If death is in the line of duty, the benefit to the surviving spouse is \$1,500 plus a monthly benefit of 30% of final average salary. If death is in the line of duty, and the member has 20 or more years of service credit, the spouse's benefit is the same as for a retired member.

If death is not in the line of duty, the benefit is \$1,000 or a refund of contributions for members with fewer than 10 years of service. For members with more than 10 years of service, the benefit to the surviving spouse consists of \$500 plus a monthly benefit of 2% of the final average salary for each year of service to a maximum of 30% of the final average salary.

Continued on page 140.

Summary of Plan Provisions *(Continued)*

Firefighters Retirement System Continued

DIVISION B (without Social Security)

If death is in the line of duty, the benefit to the surviving spouse is \$1,500 plus a monthly benefit of 37.5% of the final average salary. Each unmarried child under 21 or dependent unmarried mentally or physically disabled child receives \$75 per month if the member had five or more years of service. If death is in the line of duty, and the member has 20 or more years of service credit, the spouse's benefit is the same as for a retired member.

If death is not in the line of duty, the benefit is a refund of contributions plus 50% of the last 12 months of salary for members with fewer than five years of service. For members with more than five years of service, the benefit is the same as that for death in the line of duty. If there is no spouse, the settlement is a 100% refund of vested contributions payable to the beneficiary, or \$500, whichever is greater. Total benefits cannot exceed 75% of the final average salary.

A retired member's death benefit to a surviving spouse is 75% of the monthly benefit with a minimum monthly payment of \$350. An unmarried child under 21 or dependent unmarried mentally or physically disabled child receives \$75 per month.

Refunds

A terminated member is eligible for a 100% refund of member contributions. There is a 60-day refund processing period after the last day of paid employment.

Redeposits

A redeposit with interest may be made in monthly installments, by a lump-sum payment, or by direct transfer from a qualified plan. A redeposit must be completed prior to retirement. Service credit is restored when the redeposit is completed.

Contribution Rates (as of 12-31-2010)

Member rate in Division A is 15.05% of covered salary. Member rate in Division B is 16.18% of covered salary.* Employer rate in Division A is 1.72% and in Division B is 0.00% of covered salary. A fire insurance premium tax equal to 11.87% of salaries is also an additional part of the employer contribution rates. Fire insurance premium taxes are collected by the Utah State Treasurer for the Firefighters Retirement System to help fund retirement benefits.

**Employers have the option of paying all or part of member contributions on behalf of their employees.*

Interest

Member contributions receive no interest.

Summary of Plan Provisions (Continued)

Judges Retirement System

Membership Eligibility

The Judges Retirement System includes justices and judges of the courts of record as authorized in state statutes.

Vesting

Retirement benefit becomes vested upon the member's completion of 6 years of service credit. Eligible member contributions and interest thereon vest immediately.

Service Retirement

Age	Years of Service	Allowance Reduction†
Any age	25	None
55	20	Full actuarial reduction
62	10	None
70	6	None

† With fewer than 30 years of service from any combination of Utah Retirement Systems, retiring before age 65 will reduce the monthly benefit by 3% for each year between ages 60 and 65.

Service Benefit Formula

- 1) 5.00% x FAS* x years of service up to 10 yrs.
- 2) 2.25% x FAS* x years of service between 10 and 20 yrs.
- 3) 1.00% x FAS* x years of service over 20 yrs.
- 4) Monthly benefit = total of 1, 2, and 3.

* FAS (Final Average Salary) = highest two years' earnings in judicial service converted to a monthly average. Yearly salary increases are limited to 10% plus a COLA determined by the CPI.

Cost-of-Living Allowance

Up to 4% compounded annually, beginning one year after retirement.

Death Benefits

An active or inactive member's death benefit to the surviving spouse consists of a refund of member contributions and interest plus 65% of the final average salary on a yearly rate, or a monthly allowance equal to 65% of the amount computed for a service retirement with no early retirement reduction.

A retired member's death benefit to the surviving spouse is 65% of the member's monthly benefit at the time of death. If the member elected a reduced monthly benefit, the surviving spouse will receive a death benefit of 75% of the member's monthly benefit.

Refunds

A terminated member is eligible for a 100% refund of member contributions plus interest. There is a 60-day refund processing period after the last day of paid employment.

Redeposits

A redeposit with interest may be made in monthly installments, by a lump-sum payment, or by direct transfer from a qualified plan. A redeposit must be completed prior to retirement. Service credit is restored when the redeposit is completed.

Contribution Rates (as of 12-31-2010)

Employer rate includes 23.72% of covered salary and 14.08% from court fees.

Interest

Up to 7.75% on member accounts.

Summary of Plan Provisions *(Continued)*

Utah Governors and Legislators Retirement Plan

Membership Eligibility

The Utah Governors and Legislators Retirement Plan includes only governors and legislators of the State of Utah.

Vesting

Retirement benefit becomes vested upon the member's completion of 4 years of service credit.

Service Retirement

Age	Years of Service	Allowance Reduction
65	4	None
62	10	3% each year before age 65

Service Benefit Formula

GOVERNORS: \$500 per month per term increased semi-annually up to 2% based on the CPI. The amount as of 12-31-10 is \$1,240 per term.

LEGISLATORS: \$10 per month per each year of service as a legislator increased semi-annually up to 2% based on the CPI. The amount as of 12-31-10 is \$27.20.

Cost-of-Living Allowance

Up to 4% annually on the original retirement benefit. Eligible after one year.

Death Benefits

An active or retired member's death benefit to a spouse consists of a monthly pension equal to 50% of the retirement allowance paid, or to which the member would have been entitled to upon reaching age 65, if the member has four or more years of service as a governor or legislator. The deceased member and surviving spouse must have been married at least six months.

Contribution Rates (as of 12-31-2010)

There are currently no required contributions to the Utah Governors and Legislative Retirement Plan.

Changes in Plan Provisions

The following retirement-related bills were passed by the 2010 Utah Legislature:

General

HB 233 Retirement Office Amendments

Clarifies board appointments; retirement service purchase rules; dual employment at retirement; appointment of certain third parties on behalf of a disabled member; makes technical changes.

SB 43 Post-Retirement Employment

Commencing July 1, 2010, Utah Senate Bill 43 lengthens the hiatus between a member's retirement date and his or her return to work for a participating employer and specifies alternatives for retaining or suspending the member's retirement allowance for the purpose of earning additional service credit.

Public Employees Retirement System

SB 63 New Public Employees Retirement System

Creates a two-tier public employees retirement system. Public employees hired on or after July 1, 2011, will enter URS under a different service and benefit structure called Tier II.

- Tier II employees, those who begin initial employment *on or after July 1, 2011*, will choose between a defined contribution (DC) retirement benefit only or a hybrid retirement benefit consisting of DC and defined benefit (DB) plans.

- Tier I employees are those who began or will begin employment *before July 1, 2011*. These employees' defined benefit (DB) retirement benefits are not changed by SB 63, nor are promised retirement benefits for current and future Tier I retirees.

HB 246 Charter School Retirement

Outlines service purchase requirements for charter school employees.

SB 171 Higher Ed Retirement

Higher education employees hired May 1, 2010, or after, with service credit in the Contributory or Noncontributory Retirement Systems, may continue participation in that system regardless of the institution's employment classification.

SB 240 Employer Non-Participation

Allows certain employers and employees to exempt from retirement coverage in the Noncontributory Retirement System.

Defined Contribution Savings Plans

Summary of Plan Provisions

Introduction

The 401(k), 457, Roth and Traditional IRA Plans administered by the Board are Defined Contribution Savings Plans. These Plans are available as supplemental plans to the basic retirement benefits of the Retirement Systems. These Plans are voluntary tax-advantaged retirement savings programs authorized under sections 401(k), 457(b), and 408 of the Internal Revenue Code and are available to state, local government, and education employees throughout Utah whose employers have adopted the plans.

Goals and Objectives

The purpose of these plans is to allow public employees throughout Utah to adequately prepare themselves for retirement by investing a portion of their income in one or more of these supplemental retirement plans.

It has long been recognized that in order for people to experience the comfortable and rewarding retirement they desire, they cannot rely entirely upon Social Security and their employer provided retirement. Employees must take the initiative to personally put aside a portion of their salary into some type of long term savings plan. These tax-advantaged plans provide exceptional vehicles to accomplish the goal of a well balanced retirement plan. Employees who begin participating in these plans early in their careers can accumulate sizeable assets by the time they retire.

Employer Contributions

In addition to accepting employee contributions, the 401(k) and 457 plans also accept employer contributions on behalf of their employees. All state and public education employees participating in the Noncontributory Retirement System receive an amount equal to 1.5% of their salary in the 401(k) Plan. All local government employers also have the option of contributing to the 401(k) and 457 Plans on behalf of their employees.

Social Security Substitute

Local governments that have exempted themselves from Social Security coverage and have part-time, temporary, or seasonal employees, who are not participating in a qualifying retirement system, must cover these employees with a substitute plan.

Employers may use the 401(k)/457 Plans as a qualifying retirement system for these employees, but must contribute a minimum of 7.5% of salary to the Plan(s) in their behalf for it to be considered a “qualifying system.” The employer may contribute the 7.5% themselves, or they may require their employees to pay a portion or all of it.

Summary of Plan Provisions

DEFERRAL LIMITS

401(k) — Limited in 2010 to an annual maximum of \$16,500. Employer contributions and employee deferrals combined could not exceed the lesser of \$49,000 or 100% of compensation.

457 — Limited to an annual maximum of \$16,500 or 100% of includable compensation.

Roth and Traditional IRA — Limited to an annual maximum of \$5,000 into all IRAs owned by the participant.

COORDINATION OF DEFERRALS

401(k) — Deferrals to the 401(k) and 403(b) plans must be coordinated.

457 — Contributions to the 457 must be coordinated with all 457(b) plans offered by the employer.

Roth and Traditional IRA — All IRA contributions must be coordinated.

CATCH-UP PROVISIONS

401(k) — An additional \$5,500 for participants 50 or older during the year.

457 — An additional \$5,500 for participants age 50 or older during the year. There is an additional “special catch-up” provision for individuals who are within four years of retirement eligibility. It allows participants to double their contributions to a 457(b) plan during the

Defined Contribution Savings Plans Summary of Plan Provisions *(Continued)*

three years immediately proceeding the year they qualify for retirement. However, the special catch-up is limited to unused deferrals allowed in previous years.

Roth and Traditional IRA — An additional \$1,000 for participants 50 or older.

WITHDRAWALS

401(k) — Allowable upon termination of employment, age 59 1/2, retirement, disability, death, or hardship caused by immediate and heavy financial needs.

457 — Allowable upon termination of employment, age 70 1/2, retirement, death, or severe unforeseeable financial emergencies.

Roth and Traditional IRA — Allowable at any time, but with possible tax penalties if withdrawn prior to age 59 1/2.

ROLLOVERS

401(k) — Allowable from other eligible retirement plans, or to other eligible retirement plans upon termination of employment or other qualifying events. May be either a direct rollover by the Plan or by the participant within 60 days after distribution.

457 — Allowable to other eligible retirement plans or from another 457(b) plan.

Roth and Traditional IRA — Allowable from other eligible retirement plans or to other eligible plans (depending on acceptance of receiving plan).

VESTING

401(k) — Fully vested.

457 — Fully vested.

Roth and Traditional IRA — Fully vested.

LOANS

401(k) and 457 — Available up to 50% of member account balance, to a maximum of \$50,000. Only one outstanding loan allowed, per plan.

Roth and Traditional IRA — Not available.

Short Term Trading Fees

Each time money managers purchase or redeem stocks and bonds there are trading costs involved. Because of the costs generated by frequent or short term trading, it became necessary to impose a short term trading fee. Individuals who transfer any or all of their current account between core investment options more often than once every 30 days, are charged 2% of the amount transferred for each additional trade. Each transfer starts a new 30 day period.

Investment Transfer Options

Changes in deferral amounts and in the investment options for future contributions may be made at any time. Participants may make one transfer of accumulated balances within each plan no more frequently than every seven calendar days.

2010 Core Investment Options

INCOME FUND

The Income Fund is a stable value option which invests in a diversified portfolio consisting of U.S. government securities, mortgages, corporate bonds, guaranteed investment contracts, and short term funds. This fund is the most conservative of the investment options and offers the most stable return.

BOND FUND

The Bond Fund invests in a diversified portfolio consisting of U.S. government securities, mortgage and asset backed securities, corporate bonds, and short term funds.

BALANCED FUND

The Balanced Fund invests in a portfolio consisting of approximately 60% stocks, and 40% bonds.

Defined Contribution Savings Plans

Summary of Plan Provisions *(Continued)*

LARGE CAP STOCK VALUE FUND

The Large Cap Stock Value Fund invests in a diversified portfolio of common stocks that appear to be undervalued by the stock market but have a favorable outlook for long term growth.

LARGE CAP STOCK INDEX FUND

The Large Cap Stock Index Fund invests in stocks included in the Standard & Poor's 500 Index and is similarly weighted. This fund represents a broad range of industries in the U.S. economy.

LARGE CAP STOCK GROWTH FUND

The Large Cap Stock Growth Fund emphasizes capital appreciation and seeks to identify companies with future relative earnings strength at a reasonable valuation.

INTERNATIONAL FUND

The International Fund invests primarily in stocks of companies outside of the United States. This fund offers international diversification, but adds currency risk and country risk not found in a U.S. fund.

SMALL CAP STOCK FUND

The Small Cap Stock Fund invests in a broad cross-section of U.S. small companies whose size (market capitalization) falls within the smallest 8% of the market universe. The market universe is comprised of companies listed on the NYSE, AMEX, and NASDAQ.

Brokerage Window

The brokerage window is a self-directed brokerage account available through Charles Schwab. The brokerage account offers a wide variety of investment options with varying degrees of risk. The brokerage window allows the participant to choose from mutual funds, stocks, bonds, and exchange traded funds (ETFs).

Horizon Funds

A **Horizon Fund** asset allocation is designed to help those who want to diversify their investment. If they select one of the three Horizon Funds, contributions will be allocated to the investment options according to the table above. The Horizon Funds will generally rebalance quarterly if target ranges are exceeded. Utah Retirement Systems reserves the right to change these percentages as needed.

The **Short Horizon Fund** is designed for investors expecting to withdraw their funds within five years. This fund provides a relatively conservative investment with a more stable rate of return. However, with reduced market risk there is usually a lower rate of return over the long term.

Horizon Funds Asset Allocation

	Short Horizon Fund	Medium Horizon Fund	Long Horizon Fund
Income Fund	15%	—	—
Bond Fund	55	45	20
Large Cap Stock Value Fund	5	10	10
Large Cap Stock Index Fund	5	15	25
Large Cap Stock Growth Fund	5	10	10
International Fund	10	15	25
Small Cap Stock Fund	5	5	10
Total	100%	100	100

The **Medium Horizon Fund** is designed for investors planning to withdraw their funds in five to ten years. This fund emphasizes moderate risk and moderate earnings potential. It has more risk than the Short Horizon Fund, but less than the Long Horizon Fund. The Medium Horizon Fund is the default vehicle when no investment option has been selected by the participant.

The **Long Horizon Fund** is designed for investors with ten or more years to invest before withdrawing their funds. The fund offers the potential for higher returns over a long period of time. There is higher market risk with this horizon fund, along with higher potential returns.

Health Reimbursement Arrangement

The Health Reimbursement Arrangement (HRA) is a tax-advantaged health savings plan funded by employer contributions to pay for qualified health care expenses incurred after retirement.

ELIGIBILITY — Benefits are eligible for the retiree, spouse, and dependents as defined by the Internal Revenue Service.

CONTRIBUTIONS — HRA rules require that all contributions be made by the employer and are determined by the employer's personnel policies. Contributions are generally from unused sick leave or other leave.

REFUNDS, ADMINISTRATION AND FEES — Money is available for the member, their spouse and dependents to pay qualified medical expenses. For a comprehensive list of eligible expenses, see IRS Publication 502, *Medical and Dental Expenses*.

Contributions are placed in a money market account managed by Northern Trust investment management. Administrative and money management fees totaling 0.6% are deducted from earnings. There is also a \$2.50 monthly fee for the benefit card and claims processing.

The historical rates of returns for each investment fund are found on page 113.

1—A maximum monthly benefit for the retiree's life. No benefit to a beneficiary.

2—A reduced lifetime benefit to the retiree. A beneficiary receives the balance in retiree's account after the monthly annuity payments are deducted.

3—A reduced lifetime benefit to a retiree and a lifetime benefit equal to the retiree's benefit payable to the retiree's lawful spouse at the time of retirement.

4—A reduced lifetime benefit to the retiree and a lifetime benefit equal to half of the retiree's benefit to the retiree's lawful spouse at the time of retirement.

5—Approximately 95% of the benefit in type 3 and the same lifetime benefit for retiree's lawful spouse at the time of retirement. Benefit reverts to 100% at time of spouse's death.

6—Approximately 98% of the benefit in type 4 and a lifetime benefit for equal to half of the retiree's for retiree's lawful spouse at the time of the retirement. Benefit reverts to 100% at time of spouse's death.

7—Normal retirement for age and service and a lifetime benefit of 65% of the retiree's benefit to the retiree's lawful spouse at the time of the retiree's death.

8—Normal retirement for age and service and a lifetime benefit of 65% of the retiree's benefit to the retiree's lawful spouse at the time of the retiree's death.

9—Reduced retirement benefit for age and service and a lifetime benefit of 75% of the retiree's benefit to the retiree's lawful spouse at the time of the retirement.

*Utah Governors and Legislators Retirement Plan provides a normal lifetime pension to the retiree and 50% of the retiree's benefit to the retiree's lawful spouse at the time of death if the retiree had four or more years of service.

A Highlight History 1907-2010

1907

The Legislature authorizes the organization of local teacher retirement associations.

1908

Salt Lake City institutes the first teacher retirement commission. Ogden follows in 1933 and Provo in 1934.

1919

First statewide pension plan for all full-time paid and volunteer firemen. Actuarially unsound, the system would be transferred to the Retirement Office in 1965.

1921

First police pension plans in Salt Lake, Ogden, Provo and Logan. Actuarially unsound, these plans would be transferred to the Public Safety Retirement System in 1969.

1927

The Prison and Industrial School Guards Retirement System is enacted. Industrial school guards join the teachers retirement system in 1937. Prison guards transfer to the Public Safety Retirement System in 1970.

1934

The Utah Education Association prepares a teacher retirement plan to present to the Legislature. This plan will form much of the basis for a new retirement system.

1937

First statewide teachers retirement system. Seven member board hires Ray L. Lillywhite as the first executive secretary.

1943

Utah Supreme Court rules that a retiree's statutory retirement benefit cannot be reduced, affirming the principle of vested rights. The Court would later affirm that a vested retirement benefit may not be reduced without providing a "substantial substitute."

1947

The State Officers' and Employees' Retirement System is created with a 3% contribution rate each by employee and employer.

Teachers in local systems are required to join the State Teachers Retirement System.

1948

The Utah Supreme Court permits service credit for prior service in parochial schools.

1949

The State Officers and Employees Retirement System is renamed The Public Employees Retirement System; it will cover all public employees and judges. Retirement benefit ceiling is \$100 a month.

1952

Ray Lillywhite resigns; Leonard W. McDonald is hired as 2nd executive secretary of the Teachers Retirement System.

1953

The short-lived Teachers Retirement System is liquidated in favor of Social Security.

1954

The Teachers Retirement System is replaced by the Utah School Employees Retirement System and integrated with Social Security to preserve its solvency. Local teacher retirement associations are terminated.

1957

Minimum monthly retirement benefit is \$85.

1959

The Utah State Public Employees Association is formed with the intent to produce a comprehensive plan for a statewide public employee retirement system.

1961

The Public Employees Retirement System is created with a seven member board.

The public employees and teachers retirement systems retain separate boards but unite under a single administrator and office.

A Highlight History 1907-2010 *(Continued)*

1963

Creation of a single board for all retirement systems is the crowning achievement in Utah public retirement history and the birth of today's Utah Retirement Systems.

1967

The heretofore separate school and public retirement systems are consolidated into a single Utah State Retirement System.

1969

The Utah Public Safety Retirement Act covers all public safety employees engaged full time in hazardous duty. Benefits would be uniform in each jurisdiction, but contribution rates would vary.

1971

Members gain a salary deferral program.

1975

Current service formula rises from 1.25% to 2%. The cost-of-living ceiling rises to 4%.

1976

Leonard W. McDonald retires. Bert D. Hunsaker becomes executive director.

1977

Governor Scott Matheson dedicates the new Leonard W. McDonald Building for the Utah Retirement Systems.

1979

Board gains custody of the retirement fund and greater investment authority.

1982

The court affirms that the Board is independent of the executive department and has authority to hire its own legal counsel.

1983

The Retirement Board sees its first actuarial surplus as new investments prove their worth; hires a full time investment manager.

1986

Public Employees Noncontributory Retirement System debuts: employers pay all contributions; 3-year final average salary; State and education employers pay 1.5% of salary into URS' 401(k) plan. Employees forfeit access to contributions, but the new system portends a superior career retirement.

1987

A "25-and-out" retirement incentive plan permits public employees to retire after 25 years with no actuarial reduction; and increases to 2% the value of each year of service. Over 3000 employees take advantage of its 6-month window.

1989

The U.S. Supreme Court rules that if federal retirement benefits are taxable, then state-provided retirement benefits cannot be exempt. Legislature grants a 3% substantial substitute benefit for affected members.

Bert Hunsaker steps down. Dee Williams becomes executive director.

The Public Safety Noncontributory Retirement System is created.

The Systems' assets nearly quadruple from \$1 billion to \$3.85 billion during the 1980s.

1990

Public Employees Noncontributory Retirement members receive 2% for all years of service.

1994

URS begins dividing pension, death, and DC benefits after court rules that a former spouse may be awarded death and retirement benefits, whether or not the spouse remarries.

1995

Members with 25 years of service in the Public Employees Noncontributory System may buy future service credit to permit immediate retirement.

1996

URS recovers 100% of member assets originally invested in Guaranteed Investment Contracts which failed when Confederation Life Insurance Company of Canada was declared insolvent in August, 1994.

A Highlight History 1907-2010 *(Continued)*

1997

Judges Noncontributory Retirement System is created.

The URS DC video receives a Telly Award — the commercial equivalent of an “Oscar” for motion pictures; URS’ publication for retirees, *Cycles*, places 2nd worldwide among corporate and institutional newsletters.

Legislature affirms the Board’s authority to define provisions and terms of the retirement code.

1998

The 401(k) plan launches a bold marketing program to help members better map a retirement investment strategy. Investment options are enhanced and expanded.

State employees at retirement may defer 25% of accumulated sick leave to the 401(k) plan, convert it to paid-up health or Medicare supplement insurance or take it as cash.

1999

Members may buy up to 5 years of future service credit, even if it exceeds the years required to retire.

Leonard W. McDonald, director of the Utah Retirement Systems 1952-1976 and to whom much of the structure of the Systems can be attributed, dies.

Dee Williams retires. Robert V. Newman becomes executive director.

Systems’ assets rise from \$3.85 billion to over \$13 billion during the 1990s.

2000

401(k) plan participants may now apply for a fixed rate loan for any purpose of up to 50% of his or her 401(k) account balance.

2001

A value stock fund joins the menu of DC investment options.

URS website calculators invite members to estimate pension benefits and compute potential 401(k)/457 earnings.

2002

The Olympic Winter Games are staged in Salt Lake City. URS adopts telecommuting.

457 plan permits deferrals up to 100% of includable compensation; offers a new catch-up feature; drops

irrevocable withdrawal decisions; allows roll-overs to any acceptant 457, 403(b), 401(k), or IRA; allows use for URS pension redeposits or to buy URS service credit.

Internet-based personal retirement account manager, myURS, lets members view and transfer account balances, alter deferrals, estimate payouts, integrate Social Security, and more.

2003

To protect 401(k) and 457 investors from the costs of others’ adverse trading activities, URS restricts frequent trading privileges. Systems assets are \$14.2 billion.

2004

Ray L. Lillywhite, executive secretary of the Teachers Retirement System from 1937 to 1952, dies.

2005

Legislature repeals 1998 benefit allowing 25% of a state employee’s accumulated sick leave to be converted to other retirement benefits.

2006

Members gain a partial lump sum payment option (PLSO) at retirement.

2007

Retirement Systems’ assets reached \$23.9 billion.

Members of the Public Safety Contributory Retirement System gain a window to convert to the Public Safety Noncontributory System.

2008

The Retirement Systems pay over \$1,000,000,000 in annual benefits.

2009

New online enrollment feature at urs.org offers simple, convenient way to enroll for benefits electronically.

IRS Private Letter Ruling confirms URS 457 Plan is an eligible deferred compensation plan as defined in IRC Section 457(b).

2010

Retirees who resume work for a URS employer within a year after retiring will be returned to active status to earn further service credit and may thereafter choose between retirement allowance options.
