West Virginia Consolidated Public Retirement Board
West Virginia Public Employees' Retirement System
4101 MacCorkle Avenue, SE
Charleston, WV 25304

Dear Board Members:

We respectfully present our report on the actuarial valuation of the West Virginia Public Employees' Retirement System (PERS) as of July 1, 2015. This valuation presents the annual cost and related liabilities of the System as of the valuation date.

The valuation assumptions for mortality, withdrawal rates, disability rates, retirement rates, salary scale, and non-contributory service loads were changed to reflect the most recent experience study.

The valuation indicates that the expected state contributions of 13.5% of payroll plus the member contributions of 4.5% of payroll are sufficient to meet the annual funding requirement of the System.

This report contains supporting data and background information pertaining to the development of costs and related liabilities of the System. The valuation is based on membership data as of June 30, 2015, maintained by the West Virginia Consolidated Public Retirement Board, and unaudited financial information received from the West Virginia Investment Management Board.

This report presents fairly the actuarial position of the West Virginia Public Employees' Retirement System as of July 1, 2015, in accordance with generally accepted actuarial principles applied on a basis consistent with that of the preceding valuation. In our opinion, the assumptions used in preparing the liabilities and costs are individually reasonable in respect to PERS experience and represent our best estimate of anticipated experience under PERS. The assumptions were developed in accordance with the guidance set forth in applicable Actuarial Standards of Practice, including ASOPs 27 and 35. In particular, the mortality assumptions were developed in accordance with the mandate that an appropriate margin for future improvement in mortality beyond the measurement date be included.

Future actuarial measurements may differ significantly from current measurements due to system experience differing from that anticipated by the economic and demographic assumptions, changes expected as part of the natural operation of the methodology used for these measurements, and changes in system provisions, or applicable law or regulations. An analysis of the potential range of such future differences is beyond the scope of this valuation.

The valuation results are based on liabilities used for funding purposes only. They do not reflect any changes under GASB 67 and 68, which are effective for fiscal years beginning after June 15, 2013, and June 15, 2014, respectively. The changes made under the new GASB standards affect only amounts reported for financial statement accounting disclosure purposes.

Use of this report for any other purpose may not be appropriate and may result in mistaken conclusions due to failure to understand applicable assumptions, methodologies, or inapplicability of the report for that purpose. Because of the risk of misinterpretation of actuarial results, Buck should be asked to review any statement to be made on the basis of the results contained in this report. Buck will not accept any liability for any such statement made without such prior review.

We are Fellows of the Society of Actuaries and Members of the American Academy of Actuaries. We meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained in this report. This report has been prepared in accordance with all applicable Actuarial Standards of Practice, and we are available to answer questions about it.

Section 1 – Summary of Valuation

This report presents the results of the July 1, 2015, actuarial valuation of the West Virginia Public Employees' Retirement System (PERS). The development of the results, including for comparison purposes the corresponding results as of July 1, 2014, is presented in Table 1. A summary of the system features, a summary of the methods, factors and assumptions and supplementary membership tables used in the valuation are also included.

Valuation Results

The West Virginia Public Employees' Retirement System is a defined benefit plan providing unreduced monthly benefits to members upon retirement at age 60 after completing 5 years of service, or retirement on or after age 55 and meeting the "Rule of 80." The System also provides reduced early retirement benefits, benefits in the event of disability or death while active, and deferred benefits to members who terminate prior to retirement, providing System eligibility conditions are met.

The System is funded through employer contributions, currently at 13.5% of payroll, and member contributions of 4.5% of payroll. The major purpose of the valuation is to determine the adequacy of the expected contributions with respect to funding expected System liabilities.

The valuation indicates that current contribution levels are more than the calculated cost to fund the benefits accruing during the year (the normal cost) plus the amount required to amortize at a level dollar amount the System's primary unfunded liability originally established as of July 1, 2005 over a 20-year period (30 years from July 1, 2005) and the amount required to amortize the liability for benefit improvements to actives under SB 173 over a 1-year period (10 years from July 1, 2006).

Comments on Valuation Results

Table 1 presents the development of the valuation results as of July 1, 2015, and, for comparison purposes, July 1, 2014. The calculated Employer cost is determined as the Employer's share of the normal cost (the cost to fund benefits accruing during the year), plus amortization of the unfunded actuarial liability segments over the specified periods.

Effective July 1, 2015, the valuation assumptions for mortality, withdrawal rates, disability rates, retirement rates, salary scale, and non-contributory service loads were changed to reflect the most recent experience study. These assumption changes increased the unfunded liability by approximately \$148.2 million.

The actual unfunded liability of approximately \$847.5 million differed from the expected amount of approximately \$820.4 million (excluding the Wood Decision estimate provided by the Board actuary for the July 1, 2014 results), primarily due to the following reasons:

- The combined actual demographic experience of turnover, mortality, retirement, and pay increases resulted in a liability gain of approximately \$29.1 million. This gain was the result of turnover and retirement experience, as well as lower pay increases and lower benefit payments than expected. These gains were partially offset by the losses incurred from fewer pensioner deaths than expected.
- The assumption changes effective July 1, 2015, as noted above, resulted in an increase in the accrued liability of approximately \$148.2 million.
- The return on the actuarial value of assets for the year ending June 30, 2015, was approximately 9.29%, which was higher than the assumed return of 7.50%. This resulted in an asset gain of approximately \$92.0 million.

Section 1 – Summary of Valuation

Table 2a presents a projection of the primary unfunded actuarial accrued liability to June 30, 2035. As noted above, the primary unfunded actuarial accrued liability at the valuation date is approximately \$847.5 million. This table illustrates the expected pattern of change in the unfunded liability over the remaining 20-year period. Table 2b presents a projection of the unfunded liability for benefit improvements to actives under SB 173 to June 30, 2016.

Table 3 presents a cash flow projection of expected asset balances, contributions, disbursements and earnings over the period to FY 2040.

Funding Progress

Table 4a presents the market value and actuarial value of assets for the fiscal year ending June 30, 2015 and, for comparison purposes, the fiscal year ending June 30, 2014. Table 4b presents the 4-year smoothing of deferred gains and losses used in the calculation of the actuarial value of assets. Table 5 presents the change in market value of assets for the fiscal year ending June 30, 2015.

System Membership

A summary of system membership, with a comparison to the prior year, follows:

Group	July 1, 2015	July 1, 2014
Actives	36,122	36,413
Retirees and Beneficiaries	25,679	24,931
Terminated Vested	4,169	4,001
Terminated Non-Vested	<u>15,473</u>	<u>14,402</u>
Total	81,443	79,747

Table 6 presents a reconciliation of system membership over the year and Table 7 presents supplemental information on system membership.

Tables 8a and 8b show the number and total compensation for State and Nonstate active members by 5-year age and service groupings as of July 1, 2015.

Table 9 shows the number and average monthly benefits of retirees and beneficiaries included in the valuation distributed by fifth age group. Table 10 shows a similar distribution for terminated members entitled to deferred benefits.

7. Expected Employer Contributions FY 2016 (2015)		
a. Employer Contribution Rate	13.50%	14.00%
b. Employer Contribution	\$ 187,935	\$ 194,472

¹ For the July 1, 2015 results, the PVFB and PVFNC reflect the additional military service credits under the Wood Decision, since the non-contributory service load assumptions were updated to include this extra service. However, this extra service is excluded from the PVFB and PVFNC for the July 1, 2014 results.

² The estimates of additional military service under the Wood Decision were provided by the Board actuary for the July 1, 2014 results. The July 1, 2015 results incorporate the impact of additional military service into the baseline costs.

³ FY 2016 amortization payment is over 20 years (30 years from July 1, 2005).

⁴ FY 2016 amortization payment is over 1 year (10 years from July 1, 2006).

2040	21,288,253	606,264	685,283	1,593,656	1,514,637	22,802,890

Assumed interest rate: 7.50%

Earnings: $[a + (b - c) / 2] \times \text{interest rate}$

Notes:

1. The fund balance as of July 1, 2015 is the market value of the fund.
2. The contribution for FY 2016 is determined as 18.0% of anticipated FY 2016 base pay (4.5% Member contributions and 13.5% State contributions). Thereafter, the contribution is assumed to increase at 3.75% per year to reflect the salary increase assumption. No new entrants are assumed in this projection.
3. The projection of future benefit payments is based on all members included in the valuation, including active and terminated vested members who are not yet receiving benefits.

Section 2 – Summary of System Provisions

System Name

The West Virginia Public Employees' Retirement System

Effective Date

The West Virginia Public Employees' Retirement Act was originally enacted March 11, 1961 to be effective July 1, 1961.

System Membership

All employees of the State of West Virginia or of any participating political subdivisions are required (with certain exceptions) to become system members. Among those employees not eligible for system membership are members (and retirees) of other State retirement systems, except for retirees from the Department of Public Safety or from municipal police or fire departments. Members of the State legislature and of local legislative bodies may elect system membership regardless of the above exclusions.

Annual Compensation

Annual compensation is the total salary paid to a member by a participating employer, including overtime pay and non-cash payments.

Final Average Salary

Final average salary is the average of the member's annual compensation during the 3 consecutive years of his credited service (during the 15 years preceding the termination of his employment) that produces the highest such average. If the member has less than 3 years of credited service, his final average salary is his average annual compensation during his period of credited service. Special rules apply to members of the legislature.

Contributions

Member Contributions

Members contribute 4.5% of their salary to the system. Member contributions earn interest at a rate of 4.0%, compounded annually (3.0% prior to July 1, 1968).

Employer Contributions

The State and its participating political subdivisions contribute 13.5% of members' compensation to the retirement system. Prior employer contribution rates are as follows:

- July 1, 2014 to July 1, 2015 14.0%
- July 1, 2013 to July 1, 2014 14.5%
- July 1, 2012 to July 1, 2013 14.0%
- July 1, 2011 to July 1, 2012 14.5%
- July 1, 2010 to July 1, 2011 12.5%
- July 1, 2009 to July 1, 2010 11.0%
- Prior to July 1, 2009 10.5%

Section 2 – Summary of System Provisions

Services Credits

Prior Service

Prior service is the period of employment credited to a member who worked for a participating employer before July 1, 1961. To receive credit for prior service, the employee must have worked for a participating employer within the 30-year period prior to July 1, 1961, and the employee must become a member of the system within 15 years of July 1, 1961 (or within 15 years of his employer's participation in the system, if later).

Contributing Service

Contributing service is the member's period of employment commencing on his date of participation in the system.

Credited Service

Credited service is the sum of the member's prior service and his contributing service. Under certain circumstances, credited service may also be granted for periods of military service and for credited service under the West Virginia Teachers' Retirement System.

Reinstated Service

A member who terminates service with a participating employer, who does not retire and who is not eligible for a deferred vested benefit, will forfeit his credited service. If the member subsequently reenters covered employment and remains employed for at least 1 year, then his forfeited credited service will be reinstated provided that he repays to the fund any member contributions (with interest) that he withdrew upon termination. Such repayment must commence no later than 2 years following his reemployment, and full repayment must be accomplished within 5 years following his reemployment.

Applied Unused Leave

A retiring member may have his unused sick or annual leave applied as credited service to increase the amount of his pension, but cannot apply it for purposes of gaining eligibility for benefits. Credited service for this purpose is determined by first doubling the number of unused leave days so applied, and then each 240 days of (doubled) leave counts as 1 year of credited service in the benefit formula used to compute the amount of the member's pension.

Normal Retirement Benefit

Eligibility

A member who has attained age 60 and has earned 5 or more years of contributing service is eligible for a normal retirement benefit.

Amount

The annual normal retirement benefit, payable in monthly installments, is equal to 2% of the member's final average salary times the number of years of his credited service.

Normal Form

The normal form of the retirement benefit is a single life cash refund annuity. This means that the pension is payable only during the member's lifetime, but if he dies before receiving pension payments that total the amount of his accumulated contributions (with interest) at the time of his retirement, then the difference will be paid to his beneficiary.

Optional Forms

The retiring member may elect an actuarially reduced joint and survivor annuity with his or her spouse as beneficiary, with either 100% or 50% of the amount payable while both are alive continuing to the surviving spouse during the spouse's remaining lifetime. This is a contingent joint and survivor annuity, which reduces in amount only if the retiree dies first (and not upon the spouse's death).

Section 2 – Summary of System Provisions

Early Retirement Benefit (Unreduced)

Eligibility

Rule of 80. A member who has completed at least 3 years of contributing service and who has attained age 55 with the sum of his age plus years of contributing service equal to or greater than 80, may retire at any age on or after age 55.

Amount

The early retirement benefit is equal to the member's normal retirement benefit based on final average salary and years of credited service as of early retirement date, without reduction for early commencement. The early retirement benefit is payable in monthly installments under the same normal or optional forms as the normal retirement benefit.

Early Retirement Benefit (Reduced)

Eligibility

A terminating member who has completed at least 3 years of contributing service and who either (i) has attained age 55 and completed 10 years of credited service, or (ii) has completed 20 years of credited service, may elect to have his deferred vested benefit commence on the first of any month following his 55th birthday. A terminating member with 30 years of credited service, at least 3 of which are contributing service, may retire early at any age.

Amount

The early retirement benefit is equal to the normal retirement benefit based on final average salary and years of credited service as of early retirement date actuarially reduced for the number of years by which the early retirement benefit commencement date precedes the retiring member's 62nd birthday. A member retiring after 30 years of service (who is not eligible for an unreduced benefit) receives a benefit actuarially reduced for the number of years by which his early retirement precedes age 60. The early retirement benefit is payable in monthly installments under the same normal or optional forms as the normal retirement benefit.

Disability Benefit

Eligibility

A member who has completed 10 years of credited service, including 3 years of contributing service, and who is found to be totally and permanently disabled, is eligible for a disability benefit. A member with less than 10 years of credited service (or less than 3 years of contributing service) who incurs a service-connected total and permanent disability and who is receiving workers' compensation on account of this disability is also eligible for a disability benefit.

Amount

The monthly disability benefit is 2% of the member's final average salary times his credited service when disabled. Prior to age 65, the disability benefit is not less than 50% of the member's final average salary. At age 65, the benefit is the greater of (i) 2% of the member's final average salary times his credited service at the time of disablement or (ii) 20% of the member's final average salary.

Section 2 – Summary of System Provisions

Deferred Vested Benefit

Eligibility

A terminating member who has completed 5 years of credited service, including at least 3 years of contributing service, and who does not withdraw his accumulated contributions, is entitled to a deferred vested benefit commencing at age 62.

Amount

The deferred vested pension is equal to 2% of the member's final average salary times his years of credited service. The deferred vested pension benefit is payable in monthly installments under the same normal or optional forms as the normal retirement benefit.

Pre-Retirement Death Benefits

Eligibility

A life annuity is paid to the surviving spouse or other designated beneficiary of an active member (or former member entitled to a deferred benefit) who dies after completing 10 years of credited service and before retiring. If a member has no spouse or designated beneficiary, his children (if any) receive annuities until they reach age 21 or marry, if earlier. If there is no spouse, child, or qualified beneficiary, or if the member dies with less than 10 years of credited service, then the member's accumulated contributions will be paid to his estate as a death benefit.

Amount

The spouse's or designated beneficiary's pension is calculated as if the member had retired on the day of his death and elected a 100% joint and survivor annuity with his spouse or designated beneficiary as co-annuitant. There is no reduction for early commencement of benefits.

The amount of a (non-designated beneficiary) surviving child's annuity is based upon the annuity reserve the member would have had if he had retired on his date of death. This annuity is payable until the child reaches age 21 or is married, if earlier. In no event is a surviving child paid more than \$250 monthly, and the total paid to all surviving children will not exceed 60% of the member's final average salary.

Post-Retirement Death Benefits

Other than the death benefit inherent in the cash refund feature of the normal form of benefit, or the survivor's annuity in the case of a joint and survivor pension, no post-retirement death benefits are payable under this retirement system.

Other Terminations

A member who terminates employment other than by death and prior to becoming eligible for a normal retirement, early retirement, deferred vested or disability benefit, may upon his request receive a refund of his contributions. If the member has at least 2 years of service in the system, the refund will include accrued interest on the member's contributions. After receiving a refund of contributions, a member has no further right to benefits under this retirement system.

Section 3 – Actuarial Assumptions and Methods

Valuation Date

July 1, 2015

Funding Method

The valuation is prepared under the Entry Age Normal Cost Method with individually computed accrued liabilities. The Normal Cost is computed in aggregate. Entry is based on date of hire.

Basis for Assumptions

Experience studies are performed at least once in every 5-year period. This valuation was prepared on the basis of assumptions that were recommended to and adopted by the Board based on the experience study covering the period from July 1, 2009, to June 30, 2014. These assumptions will remain in effect for valuation purposes until such time as the Board adopts revised assumptions.

Interest Rate and Expenses

The valuation interest assumption is 7.50% per annum, with no loading for system expenses.

Salary Scales

The salary scales are shown in the Appendix. Salary scales include an assumed underlying inflation rate of 3.00%. The ranges of projected salary increases are as follows:

- State 3.00% to 4.60% per year
- Nonstate 3.35% to 6.00% per year

Pre-Retirement Mortality

The pre-retirement mortality tables are as follows:

- In service males 110% of RP-2000 Non-Annuitant table, projected with Scale AA on a fully generational basis
- In service females 101% of RP-2000 Non-Annuitant table, projected with Scale AA on a fully generational basis

Post-Retirement Mortality

The post-retirement mortality tables are as follows:

- Healthy males 110% of RP-2000 Healthy Annuitant table, projected with Scale AA on a fully generational basis
- Healthy females 101% of RP-2000 Healthy Annuitant table, projected with Scale AA on a fully generational basis
- Disabled males 96% of RP-2000 Disabled Annuitant table, projected with Scale AA on a fully generational basis
- Disabled females 107% of RP-2000 Disabled Annuitant table, projected with Scale AA on a fully generational basis

Section 3 – Actuarial Assumptions and Methods

Withdrawal from Service

Withdrawal rates are shown in the Appendix. All withdrawal is assumed to result in refund of contributions if non-vested or a deferred annuity if vested. The liability for a refund of contributions for nonactive non-vested members as of the valuation date is assumed to be 60% of the total employee contribution balance of such members.

Disablement Rates

Disablement rates are shown in the Appendix.

Retirement Rates

Retirement rates are shown in the Appendix.

Family Composition

It is assumed that 85% of males and 80% of females are married, with husbands 3 years older than wives. Remarriage rates are not used.

Accrual of Future Service

It is assumed that active members will accrue 1 year of service for each future year of employment.

Noncontributory Service Loadings

Noncontributory service for active members is estimated from member's contributory service by adjusting the present value of benefits projected from contributory service alone. The assumed service loads are as follows:

- Male – State 10.400% load
- Male – Nonstate 10.000% load
- Female – State 2.800% load
- Female – Nonstate 2.475% load

Asset Valuation Method

4-year 25% level smoothing of actuarial gain or (loss) on trust fund return:

- Implemented over 4 years, prospectively commencing July 1, 2009 for the experience for the trust year ending June 30, 2009.
- Actuarial gain or (loss) on assets is calculated as the difference between the expected return under valuation assumptions based on the smoothed Actuarial Value of Assets and the actual trust fund return.
- Actuarial gain or (loss) is recognized at 25% of the original amount each year until fully recognized in the fourth year.
- Total accumulated deferred gain or (loss) amounts are used to adjust the reported Market Value of Assets to determine the Actuarial Value of Assets.

System Contributions

Both employee and employer contributions to the System are assumed to be paid in the middle of the year.

Appendix – Detailed Assumptions
